APPLETONS' CYCLOPAEDIA
OF AMERICAN BIOGRAPHY

Vol. I
AARON—CRANDALL
John Adams
As it is the commendation of a good huntsman to find game in a wide wood, so it is no imputation if he hath not caught all.

Plato
Appletons' Cyclopædia of American Biography is intended to supply a want that has long been felt by the nations of the New World, and more particularly by the people of the United States. Every scholar and every reader has recognized the benefit of the great French Dictionaries of Universal Biography, and the utility of the more recent National Biography of Great Britain, now in course of publication. Each nation should, if possible, have its own cyclopædia of biography. The Belgian, British, and German Dictionaries at present in progress are instances of such work in the Old World. It is proposed to provide a Cyclopædia of Biography for the New World worthy to rank with them.

The Cyclopædia will include the names of above twenty thousand prominent native and adopted citizens of the United States, including living persons, from the earliest settlement of the country; also the names of several thousand eminent citizens of Canada, Mexico, Brazil, Chili, Peru, and all the other countries of North and South America. The great aim has been to embrace all noteworthy persons of the New World, and to give biographies that shall embody with sufficient fulness the latest result of historical research, rendering it a reference-book of the highest order. The work will also contain the names of nearly one thousand men of foreign birth who, like Bishop Berkeley, Braddock, Burgoyne, Cabot, Columbus, Cornwallis, Lafayette, Montcalm, and Whitefield, are closely identified with American history.

The editors have endeavored, in all instances, to obtain the co-operation of the most competent students of special periods or departments of history, and they have had the assistance of scholarly and experienced associates, together with a well-equipped staff of writers. Many articles of importance have been contributed by some of the most brilliant names in American literature as well as by many of our most illustrious statesmen, soldiers, and jurists. Much valuable material has been obtained from original sources; and in the case of recent lives and those "men of light and leading" who are still with us, important aid has been afforded by the friends and relatives of the subjects.

It has been the aim of the editors to render the Cyclopædia educational as well as entertaining and instructive, by making those articles referring to important men and measures full and exhaustive; thus, in the articles on the Presi-
PREFACE.

...idents, some two hundred pages will be devoted to a complete and authentic account of all their public acts, placing the reader in possession of an accurate history of their administrations, covering more than a century of our national annals. The same statement may be made in respect to the chief colonial and state governors; our celebrated judges and statesmen; members of the Cabinets, of the Senate, and House; men distinguished in art, commerce, and literature; leaders in the Church; and those "great heirs of fame" who won renown in the late and previous wars—thus forming a very full and comprehensive history of the United States and those other countries of the New World with which we are bound by so many ties, since its first discovery by "the world-seeking Genoese." To the above are added numerous notices of persons of the pre-Columbian period, now appearing for the first time in the English language.

Although it is manifestly impossible, within the limits of six octavo volumes, to supply all the information that might be desired by students of genealogy, yet it is confidently believed that the data given will be found sufficient and satisfactory. Especial attention is called to the information concerning the publications of the New World, which is brought down to the date of publication. In the case of the more important notices of men and women,

"On Fame's eternall bele-roll worthy to be fyled," the principal authorities used are mentioned with a view to indicating the sources from which additional information may be obtained by those who are seeking for it. The projectors of the Cyclopaedia have made use of every available source of information, including a special library of several thousand volumes, and have utilized the most valuable portion of Francis S. Drake's "Dictionary of American Biography," together with the author's manuscript corrections and additions, purchased for that purpose, as well as the unpublished manuscripts of William Cushing, the compiler of "Initials and Pseudonyms," who was preparing a cyclopaedia of American and other authors.

The work is complete in six octavo volumes, and is illustrated with about sixty full-page portraits of eminent men of the New World, including the twenty-four Presidents of the United States, forming altogether a most valuable and attractive national portrait-gallery of illustrious Americans. These are supplemented by some fifteen hundred smaller vignette portraits from original drawings by Jacques Reich, accompanied by fac-simile autographs, and also several hundred views of birthplaces, residences, monuments, and tombs famous in history. The signatures are for the most part from the collection of some six thousand American autographs in the possession of the senior editor. In Volume VI will be found a supplement completed in December, 1899, containing nearly two thousand additional names. A carefully prepared and exhaustive analytical index of one hundred and fifteen pages greatly enhances the value of the work.

SOME OF THE CHIEF CONTRIBUTORS
TO APPLETON'S CYCLOPAEDIA OF AMERICAN BIOGRAPHY.

Adams, Charles Kendall,
President Cornell University.
Agassiz, Alexander,
Author and Professor.
Allibone, S. Austin,
Author "Dictionary of Authors."
Amory, Thomas C.,
Author "Life of General Sullivan," etc.
Bancroft, George,
Author "History of the United States."
Barrett, Lawrence,
Author "Life of Edwin Forrest."
Bayard, Thomas F.,
Secretary of State.
Bigelow, John,
Author "Life of Franklin," etc.
Boker, George H.,
Poet, late Minister to Russia.
Botta, Mrs. Vincenzo,
Author and Poet.
Bradley, Joseph P.,
Judge United States Supreme Court.
Buckles, Phillips,
Author "Sermons in English Churches."
Carter, Franklin,
President Williams College.
Chandler, William E.,
Ex-Secretary of the Navy.
Clarke, James Freeman,
Author "Ten Great Religions," etc.
Cooper, Miss Susan Fenimore,
Author "Rural Hours," etc.
Conway, Moncure D.,
Miscellaneous Writer.
Coppée, Henry,
Professor Lehigh University, Pa.
Coxe, Arthur Cleveland,
Bishop Western New York.
Cullum, Gen. George W.,
Author "Register of West Point Graduates," etc.
Curry, Daniel, D. D.,
Author and Editor.
Curtis, George Ticknor,
Author "Life of James Buchanan," etc.
Curtis, George William,
Author and Editor.
De Costa, Rev. B. F.,
Historical Writer.
De Lancy, Edward F.,
Ex-President Genealogical and Biographical Society.
Didier, Eugene L.,
Author "Life of Edgar Allan Poe."
Dix, Morgan,
Rector Trinity Church, New York.
Doane, William C.,
Bishop of Albany.
Drake, Samuel Adams,
Author "Historic Personages of Boston," etc.
Draper, Lyman C.,
Secretary Wisconsin Historical Society.
Fiske, John,
Author and Professor.
Frothingham, Octavius B.,
Author "Life of George Ripley."
Gayarré, C. E. A.,
Author "History of Louisiana."
Gerry, Elbridge T.,
Member of New York Bar.
Gilman, Daniel C.,
President Johns Hopkins University.
Goodwin, Daniel, Jr.,
Member of Illinois Bar.
Greely, Capt. A. W., U. S. A.,
Author "Three Years of Arctic Service."
Hale, Edward Everett,
Author "Franklin in France," etc.
Haydon, Rev. Horace E.,
Author "Pollock Genealogy," etc.
Henry, William Wirt,
Of the Virginia Historical Society.
Higginson, Col. T. W.,
Author "History of the United States," etc.
Hilliard, Henry W.,
Ex-United States Senator from Georgia.
Howe, Mrs. Julia Ward,
Author "Later Lyrics," etc.
Jay, John,
Late Minister to Austria.
Johnson, Gen. Bradley T.,
Member Maryland Bar.
Johnson, Rossiter,
Author "History of the War of 1812," etc.
Johnston, William Preston,
President Tulane University.

Jones, Rev. J. William,
Secretary Southern Historical Society.

Jones, William Alfred,
Author "Character and Criticism," etc.

Kobbé, Gustav,
Musical Editor of New York "Mail and Express."

Lathrop, George Parsons,
Author "A Study of Hawthorne," etc.

Lincoln, Robert T.,
Ex-Secretary of War.

Lodge, Henry Cabot,
Author "Life of Hamilton."

MacVeagh, Wayne,
Ex-Attorney-General, U. S.

Marble, Manton,
Late Editor "The World."

Mathews, William,
Author "Orators and Oratory," etc.

McMaster, John Bache,
Author "History of the People of the United States."

Mitchell, Donald G.,
Author "Reveries of a Bachelor," etc.

Mombert, Dr. J. L.,
Miscellaneous Writer.

O'Neal, Edward A.,
Governor of Alabama.

Parker, Cortlandt,
Member of the New Jersey Bar.

Parkman, Francis,
Author "Frontenac," "French in Canada," etc.

Phelps, William Walter,
Member of Congress from New Jersey.

Porter, David D.,
Admiral United States Navy.

Preston, Mrs. Margaret J.,
Author and Poet.

Puron, Dr. Juan G.,
Spanish Author and Editor.

Read, Gen. J. Meredith,
Late Minister to Greece.

Reid, Whitelaw,
Editor of New York "Tribune."

Robinson, E. G.,
President Brown University.

Romero, Mattias,
Mexican Minister to United States.

Royce, Josiah,
Professor in Harvard University.

Sanborn, Miss Kate,
Miscellaneous Writer.

Schurz, Carl,
Ex-Secretary of the Interior.

Shea, John Gilmary,
Author and Editor.

Sherman, William T.,
Late General of the Army.

Smith, Charles Emory,
Editor Philadelphia "Press."

Spencer, Jesse Ames,
Author and Professor.

Stedman, Edmund C.,
Author "Poets of America," etc.

Stiles, Henry R., M. D.,
Author "History of Brooklyn, N. Y."

Stoddard, Richard Henry,
Author "Songs of Summer," etc.

Stone, William L.,
Author "Life of Red Jacket," etc.

Strong, William,
Ex-Judge U. S. Supreme Court.

Tucker, J. Randolph,
Member of Congress from Virginia.

Waite, Morrison R.,
Chief Justice of the Supreme Court.

Washburne, E. B.,
Late Minister to France.

Welling, James C.,
President Columbian University.

Whitman, Walter,
Author "Leaves of Grass," etc.

Wilson, Gen. Jas. Grant,
President Genealogical and Biographical Society.

Winter, William,
Poet and Theatrical Critic.

Winthrop, Robert C.,
Ex-United States Senator.

Young, Alexander,
Miscellaneous Writer.
Among the Contributors to the first volume of "Appletons' Cyclopædia of American Biography" are the following:

Rev. Joseph H. Allen,
Author "Hebrew Men and Times."
Channing, William Ellery,
Channing, William Henry.

S. Austin Allibone, LL. D.,
Author of "Dictionary of Authors."
Bancroft, George.
Thomas C. Amory,
Author of "Life of Gen. Sullivan."
Coffin, Admiral Sir Isaac,
Coffin, Gen. John,
and other articles.

Marcus Benjamin,
Fellow of the Chemical Society.
Agassiz, Louis,
Bache, Alexander Dallas,
and other articles.

Arthur E. Bostwick, Ph. D.
Audubon, John James,
Colfax, Schuyler,
and other articles.

Mrs. Vincenzo Botta,
Author and Poet.
Carnegie, Andrew.

Charles Rollin Brainard, A. M.
 Beecher, Lyman, and his sons,
Benton, Thomas Hart,
and other articles.

James C. Brogan.
Articles on Catholic Clergymen.

Franklin Carter, LL. D.,
President of Williams College.
Chadbourne, Paul Ansel.

John D. Champlin, Jr.,
Editor of "Cyclopædia of Painters and Paintings."
Articles on American Painters.

William E. Chandler,
Ex-Secretary of the Navy.
Arthur, Chester Alan,
Berry, Nathaniel S.

John Esten Cooke,
Late Historian and Novelist.
Crawford, William Harris.

Arthur Cleveland Coxe,
P. E. Bishop of Western New York.
Cleveland, Aaron,
Cox, Samuel Hanson.

Rev. Daniel Curry, D. D.,
Author and Editor.
Articles on Bishops of the Methodist Episcopal Church.

George Ticknor Curtis, LL. D.,
Author of "Life of James Buchanan."
Buchanan, James.

Henry Dalby,
of the Montreal "Star."
Articles on Canadian Statesmen.

Lyman C. Draper, LL. D.
Campbell, Arthur,
Clark, George Rogers.

Maurice F. Egan,
of the "Freeman's Journal."
Corrigan, Michael Augustus,
and other articles.

John Fiske,
Professor and Author.
Adams, John,
Adams, John Quincy,
Arnold, Benedict,
Clinton, Sir Henry,
Cornwallis, Lord,
and other articles.

Daniel C. Gilman, LL. D.,
President of Johns Hopkins University.
Berkeley, George,
Buckingham, William A.,
and other articles.

Samuel Hart,
Professor at Trinity College.
Brownell, Thomas Church.

Thomas Wentworth Higginson,
Author of "History of the United States."
Brown, John, of Osawatomie.

Henry W. Hilliard,
Late Minister to Brazil.
Butler, Pierce M.,
and other articles.

Mrs. Julia Ward Howe,
Author and Poet.
Crawford, Thomas.

Frank Huntington.
Bolivar, Simon,
Bradford, William,
and other articles.
CONTRIBUTORS TO THE FIRST VOLUME.

Rev. Abram S. Isaacs, Ph. D.,
   Editor of the "Jewish Messenger."
Bondi, Jonas,
   and other articles.

Gen. Bradley T. Johnson,
   Member Baltimore Bar.
Carroll, Charles, of Carrollton,
   Claiborne, William.

Rossiter Johnson,
   Author and Editor.
Carter, Robert,
    Chase, Salmon Portland,
   and other articles.

Rev. J. Ryland Kendrick, D. D.,
   Ex-President of Vassar College.
Burr, Aaron,
   and articles on Baptist clergymen.

Gustav Kobbé,
   Musical Editor.
Catenhausen, Ernst,
    Chadwick, George W.,
   and other articles.

Neil Macdonald.
Brown, Peter, and his sons,
    Blake, William Hume,
   and other articles.

Frederic G. Mather,
   Journalist.
Church, Sanford Elias,
    Cornell, Ezra, and Alonzo B.

William Mathews, LL. D.,
   Author of "Orators and Oratory."
Ames, Fisher.

John Bach McMaster,
   Professor and Author of "History of the People of the United States."
Coxe, Tench,
   and other articles.

J. I. Mombert, D. D.
Allen, Ethan,
    Braddock, Edward,
    Boone, Daniel,
   Cartier, Jacques.

Charles Ledyard Norton.
Burnside, Ambrose Everett,
    Cooper, James Fenimore,
   and other articles.

Edward A. O'Neal,
   Governor of Alabama.
Chapman, Reuben.

David D. Porter,
   Admiral of U. S. Navy,
   Bainbridge, William.

William Purcell,
   Editor of the Rochester, N. Y., "Union."
Butts, Isaac,
    Cassidy, William.

Dr. Juan G. Puron,
   Spanish Author and Editor.
   Articles on South and Central American Characters.

Prof. Josiah Royce,
   Author of "California," in Commonwealth Series.
   Articles on California Pioneers.

Miss Kate Sanborn,
   Author and Editor.
Botta, Anne C. Lynch.

Carl Schurz,
   Ex-Secretary of the Interior.
Clay, Henry.

Rev. E. de Schweinitz, D. D.,
   Moravian Bishop.
   Articles on Bishops of the Moravian Church.

Charles Emory Smith,
   Editor of the Philadelphia "Press."
Blaine, James Gilsipie.

Rev. J. A. Spencer, D. D.
   Articles on Bishops of the Protestant Episcopal Church.

Richard Henry Stoddard,
   Author and Editor.
Bryant, William Cullen.

Frederick D. Stone,
   Pennsylvania Historical Society.
Coombe, Thomas,
   and other articles.

William L. Stone,
   Author of "Life of Brant."
Acland, Lady Harriet,
    Brant, Joseph,
    Burgoyne, John,
   and other articles.

William Strong,
   Ex-Justice U. S. Supreme Court.
Binney, Horace,
    Bradley, Joseph P.

Charles Burr Todd,
   Author of "Life of Joel Barlow."
Barlow, Joel.

J. Randolph Tucker,
   Member of Congress from Virginia.
Calloun, John Caldwell.

James C. Welling, LL. D.,
   President of Columbian University.
Corcoran, William Wilson.

Gen. Jas. Grant Wilson,
   Author and Editor.
Bayard, James Asheton,
    Clarke, McDonald,
    Cogswell, Dr. Jonathan,
    Columbus, Christopher,
   and other articles.

William Winter,
   Author and Critic.
Booth, Edwin,
    Brougham, John,
    Burton, William Evans.
APPETIONS' CYCLOPEDIA OF AMERICAN BIOGRAPHY.

A

AARON, Samuel, educator, b. in New Britain, Bucks co., Pa., in 1800; d. in Mount Holly, N. J., 11 April, 1865. He was left an orphan at six years of age, and became the ward of an uncle, upon whose farm he worked for several years, attending school only in winter. A small legacy inherited from his father enabled him at the age of sixteen to enter the Doylestown, Pa., academy, where he fitted himself to become a teacher. At the age of twenty he was engaged as assistant instructor in the classical and mathematical school in Burlington, N. J. Here he studied and taught, and soon opened an independent day school at Bridge Point, but was presently invited to become principal of Doylestown academy. In 1829 he was ordained, and became pastor of a Baptist church in New Britain. In 1839 he took charge of the Burlington high school, serving at the same time as pastor of the Baptist church in that city. Accepting in 1841 an invitation from a church in Norristown, Pa., he remained there three years, when he opened the Treeount seminary near Norristown, which under his management soon became prosperous, and grew to be regarded for its training and discipline. The financial disasters of 1857 found Mr. Aaron with his name pledged as security for a friend, and he was obliged to sacrifice all his property to the creditors. He was soon offered the head-ship of Mt. Holly, N. J., institute, a large, well-established school for boys, where, in company with his son as joint principal, he spent the remainder of his life. During these years he was pastor of a church in Mt. Holly. He prepared a valuable series of text-books introducing certain improvements in methods of instruction, which added greatly to his reputation as an educator. His only publication in book form, aside from his text-books, was entitled "Faithful Translation" (Philadelphia, 1842). He was among the early advocates of temperance, and was an earnest supporter of the anti-slavery cause from its beginning.

ABAD, or ABADIANO, Diego José, Mexican poet, b. near Jiquilpan, between Michoacan and Guadalajara, 1 July, 1727; d. in Italy, 30 Sept., 1779. He became a Jesuit in early youth, and afterward taught philosophy and civil and canon law in Zacatecas and the city of Mexico. When forty years old, and while rector of the college of Querétaro, he began the study of medicine, in the practice of which he was successful. Then he went to Italy and published a volume of Latin poetry, under the title of "Heroica Deo carmina," to which he owes his greatest fame. Among other works he wrote descriptions of the principal rivers of the world in a book called "Geographia hidraulica." Several editions of the "Heroica Deo carmina" were published, in Madrid (1769), Venice (1774), Ferrara (1776), and Cécina (1780).

ABADIE, Eugene Hilarian, surgeon, b. in Paris, France, 16 Aug., 1810; d. in St. Louis, 12 Dec., 1874. He entered the U. S. army in 1836, with the rank of assistant surgeon. In 1853 he was promoted surgeon, and as such served through the civil war, receiving the brevet rank of colonel in March, 1865. His first service was with the Creek nation, then recently removed from their hereditary lands in Georgia, and until the Seminole war he was engaged with the migrating tribes. After this service he was stationed at the forts in New York harbor, and at various regular posts in the interior until the war with Mexico, where he was on duty in 1848, but was ordered to Point Isabel, Texas, in 1849. Changing from station to station as the exigencies of the service demanded, he was in Texas when the U. S. forces in that state were surrendered by Gen. Twiggs, and in 1863 he contracted dysentery and was paroled as a prisoner of war and permitted to go north. He was stationed at West Point in 1862-64, during which period he was detailed to serve on medical boards in Philadelphia and New York. In 1865 he became chief medical officer of the military division of west Mississippi, in 1866 medical director of the department of Missouri, and lastly acting assistant medical purveyor at St. Louis. At the time of his death he had seen more years of actual service than any, save two, of the army surgeons.

ABAD Y QUEIPO, Manuel, Spanish bishop, b. in Asturias about 1775; d. about 1824. He studied theology in Spain, and went to Mexico. From Michoacan he was sent to Spain to plead against a royal decree affecting the interests of the priesthood, and was successful in his mission. In 1809 he was consecrated bishop of Michoacan. During the first period of the revolutionary war he adhered to the royal party, and went to the city of Mexico. After his return to Michoacan, through intrigues of his opponents, he was sent to Spain and imprisoned. But he obtained an interview with King Ferdinand VII., who not only pardoned him, but appointed him his minister of justice. Yet the Inquisitors imprisoned him again for his opposition to the Inquisition. Afterward he was bishop of Portona, but was again in prison in 1823, where he died, it is believed, in the following year.
ABBASOLI, Mariano, Mexican patriot, b. near Dolores, Guanajuato, about 1780; executed at Chihuahua, Aug., 1811. He became conspicuous during the Mexican war for independence, and was a colonel in the patriot army of Hidalgo, distinguishing himself during the campaigns that opened the war, and was exceptionally humane in his treatment toward the Indians whom he took prisoners at Las Cruces, and died with Hidalgo after the disastrous flight at Arec de Calderon; was captured by the government troops, and shot in company with his chief. Their bodies were exposed on poles and left unburied until 1822.

ABBADIE, Henri de St. Germain (ah-bad-ee'), governor about 1727 d., in New Orleans, 4 Feb., 1765. He was sent to America by Louis XV. of France, to take charge of certain royal business interests in New Orleans, and was granted military authority over the affairs of the province. His administration was marked by great wisdom. Restraining the tendency to brutality on the part of masters toward their Indians, he secured the good will of the best people in the community. In his dealings with the Indians he was equally successful, and his memory is piously cherished in the French parishes. As the result of the sale of Louisiana to Spain in 1762, Gov. Abbadie was ordered in 1764 to resign his command to a Spanish representative, and he died of grief, caused by the necessity of surrendering his command. He was regarded as the founder of New Orleans, and there appears to be no record of his Christian name.

ABBADIE, Antoine Thomson d' (ah-bah-dee'), explorer, b. in Dublin, Ireland, in 1810; d. in 1896. With his younger brother, Arnaud Michel, he was early taken to France by his father, a Frenchman. In 1835 he was sent by the academy of sciences on an exploring expedition to Brazil, where he remained nearly two years. In 1873 he published "Observations relatives à la physique du globe, faites au Brésil et en Ethiopie" in four volumes. His other works do not relate to South America.

ABBE, Cleveland, meteorologist, b. in New York city, 3 Dec., 1838. He was graduated at the New York free academy in 1857, taught mathematics in Trinity Latin school for a year, and then went to Michigan university, where he studied astronomy under Prof. Britonou, and taught the higher mathematics in the scientific school. From 1860 to 1864 he lived at Cambridge, Mass., where Dr. B. A. Gould, the astronomer, assigned him the teaching of the work of the U. S. coast survey. The years 1865-66 he spent mainly at the Imperial observatory at Pulkova, near St. Petersburg, Russia, as the guest of the resident staff of observers. After a short sojourn at Washington he was chosen director of the Cincinnati observatory. This was in 1868, and he soon proposed an enlargement of the scope of the institution to include terrestrial physics so far as they relate to astronomy. Investigation of the subject led him to suggest that Cincinnati should replace the headquarters of meteorological observation for the United States, for the purpose of collecting and comparing telegraphic weather-reports from all parts of the land, and making deductions therefrom. The Cincinnati chamber of commerce saw the value of the suggestion, and accepted his proposition. Sept., 1869, he was appointed director of the headsignal service, was directed to take charge of the new weather bureau, and he appointed Prof. Abbe his meteorologist, whose duty it was to prepare "probabilities" or storm warnings. Prof. Abbe became popularly known as "Old Probabilities," and under his direction the service soon reached a high point of efficiency. In 1871, Prof. Abbe in person did the work of collating and tabulating, which had to be done three times a day. The publication of the "Monthly Weather Review" and the "Bulletin of International Simultaneous Observations" was begun under his supervision. His publications, astronomical and meteorological, are very numerous, and his contributions to current periodicals, cyclopedias, and books of reference are well known to astronomers.

ABBEVILLE, Claude d' (dab' vej), French missionary, d. in Paris in 1632. He was connected with the mission of the Capuchin fathers. He arrived on the island of Maragana, near the coast of Brazil, which was established in 1612. In his "History" of the mission he describes the customs of the natives of the island and of the neighboring parts of the American continent.

ABBEY, Edwin Austin, artist, b. in Philadelphia, Pa., in 1852. He was a pupil of the Pennsylvania academy, Philadelphia, and has devoted himself chiefly to illustrated art. Among his illustrations for books and magazines, but since 1875 has done excellent work in water-colors. He removed in 1883 from New York to London, where
his studio now is. He is a member of the New York water-color society, and of the London institution of water-colors. Among his best works are "The Stage Office" (1787); "The Evil Eye" (1787); "Lady in a Garden" (1787); "Rose in October" (1789); "The Widower" (1883); and "Reading the Bible" (1884). Notable among his illustrations are those to Robert Herrick's poems and "She Stoops to Conquer." In 1898 he published two book illustrations, turning his attention to successful oil-painting.

**ABBOT, Richard**, clergyman, b. in Genesee county, N. Y., 16 Nov., 1805; d. in Yazzoo City, Miss., 23 Oct., 1891. In 1823 he removed to Natchez, Miss., and became a minister in the Methodist Episcopal church. In 1836 he organized a new and separate denomination that denominated its name the northern and southern branches. He published "Letters to Bishop Green on Apostolic Succession" and "End of the Apostolic Succession" (1853); "Credo of All Men" (1855); "Ecclesiastical Constitution" (1856); "Church and Ministry" (1859); "Theorem of the Church," and "An Answer to 'Ecce Homo'" (1868); "The Priesthood of God and the Church-Makers" (1873). In 1858 he was elected financial secretary of the Southern Methodist publishing house. His other works include "Baptismal Demonstrations," "Divine Assessment," "Scriptures on Church Government," and "The Divine Call to the Ministry."

**ABBOT, Abiel**, clergyman, b. in Wilton, N. H., 14 Dec., 1763; d. in West Cambridge, Mass., 31 Jan., 1839. He was graduated at Harvard in 1787, taught in Phillips Andover academy until 1789, studied theology, and labored as a missionary in Maine. In 1794 he was tutor of Greek in Harvard. He was ordained minister of the church in Coventry, Conn., in 1795, from which he was dismissed in 1811, on account of his theological opinions. He taught the Dummer academy until 1819, and then cultivated a farm in North Andover until 1827, when he was installed as pastor of the church at Peterborough, N. H., where he remained until his retirement from the ministry in 1848. He published "Sermons on the Coventry congregation," in 1829 a "History of Andover," Massachusetts, and in 1847 the "Genealogy of the Abbot Family."

**ABBOT, Abiel**, clergyman, b. in Andover, Mass., 17 Aug., 1770; d. on Staten Island, N. Y., 7 June, 1828. He was graduated at Harvard in 1792, became the Congregational minister at Haverhill, Mass., in 1794, and in 1809 took charge of the church at Beverly. He wrote a volume of descriptive "Letters from Cuba" (Boston, 1829) while visiting that island for his health in 1827, and died of yellow fever on his return voyage. Dr. Abbot was an eloquent preacher. His sermons, accompanied by a memoir by Samuel Everett, were published in Boston in 1831.
ABBOT, Francis Ellingwood, author, b. in Boston, 6 Nov., 1836. He was graduated at Harvard in 1859, and from 1870 to 1889 was editor of "The Index," a Boston journal of free thought. He has written much on metaphysical subjects, and has published in book form "Scientific Theism" (Boston, 1868), as well as "Science and Art," "Origin of Man," "The Evolution of Form, and Other Essays." (Boston, 1885-1886.)

ABBOT, Henry Larcom, soldier, b. in Beverly, Mass., 13 Aug., 1831. He was graduated at West Point in 1854, and made brevet second lieutenant of topographical engineers. His first service was in the office of the Pacific railroad surveys in Washington, whence in 1855 he was transferred to the Pacific railroad survey of the route between California and Oregon, and afterward served on the hydrographic survey of the delta of the Mississippi river. During the civil war he was principally engaged as a military engineer, and rose by successive steps until brevetted brigadier-general, U. S. army, 13 March, 1863, and made lieutenant-colonel of engineers, 11 March, 1880. He served in various capacities at Bull Run and in Maryland in 1861. Since the close of the war he has been engaged in superintending the defences of the East river; in command of the engineer post and depot at Willet's Point, N. Y., and of the engineer battalion and the engineer school of application, the latter of which he has created. He was a member of the committee to observe the solar eclipse in 1870, member of the engineer board on the U. S. military bridge equipage and drill, of one on a plan for the protection of the alluvial region of the Mississippi against overflows, and of various other boards connected with fortifications and river and harbor improvements. He invented and developed the U. S. system of submarine mines for coast and river defense, 1890 to 1886. He has published "Vol. VI. Pacific Railroad Reports" (Washington, 1857); "Physics and Hydraulics of the Mississippi," jointly with Capt. A. A. Humphreys (Philadelphia, 1861); "Siege Artillery in the Campaign against Richmond" (Washington, 1867); "Experiments and Investigations to develop a system of the Moon's Magnetic and Solar Influences on the Banners of the United States" (1881); jointly with boards and commissioners, "United States Bridge Equipage and Drill" (1870); "Reclamation of the Alluvial Basin of the Mississippi River" (1875); "Report of Gun-Foundry Board" (1884); and "Report of the Board on Fortifications or other Defences" (1886).

ABBOT, Joel, physician, b. in Fairfield, Conn., 17 March, 1768; d. in Washington, Ga., 19 Nov., 1826. He received an academic education, and then studied medicine, his father's profession. In 1794 he removed to Washington, Ga., and began practice. In 1809 he was elected to the legislature, and, after holding various local offices, was elected to the Senate of the second war with England, and re-elected until 1815. In 1820 he was appointed by the Georgia medical society as its representative in preparing the "National Pharmacopoeia."

ABBOT, Joel, naval officer, b. in Westford, Mass., 18 Jan., 1793; d. in Hong Kong, China, 14 Dec., 1853. He was appointed midshipman at the outbreak of the second war with England, and was ordered to the frigate "President," as aid and signal officer to Com. Rodgers, who, impressed by his zeal and efficiency, recommended him to Com. Macdonough, then in command of the naval forces on Lake Champlain. Learning that the British had accumulated a large supply of spars at Sorel, Macdonough sent for Midshipman Abbot and asked him if he was willing to die for his country. "Certainly," said Abbot, "if the enemy's flag flies on Sorel, I will be the first to die." This was the answer. Macdonough then told him what he wished done, and young Abbot, disguised as a British officer, entered the enemy's lines, taking the risk of being hanged as a spy in case of capture, discovered where the spars were stored, and destroyed them. Such were the hardships and dangers encountered in this expedition that when he reported to his commanding officer he was in a state of prostration, from the effects of which he was long in recovering. For this exploit and for gallantry in action off Cumberland Head, 11 September, 1814, he was promoted lieutenant commander, and congress voted him a handsome sword. During the remainder of the war he had no further opportunity for distinction, but at one time he quelled a formidable mutiny. In December, 1818, he was placed in charge of a 30-gun frigate named the "Mariana," captured by Com. Stockton off the African coast. On the voyage to Boston part of his crew mutinied, and the piratical prisoners succeeded in wrenching off their irons, during a terrible gale. Notwithstanding this seemingly hopeless state of affairs, Lieut. Abbot regained control of his crew, kept the mutineers at bay, and brought his ship safely into port. In 1838 he was promoted commander, serving on the various foreign squadrons, and from 1839 to 1842 was in command at the Boston navy-yard. In 1852 he commanded the "Macedonian" in the Japan expedition, succeeding Capt. Perry as flag-officer of the squadron. During this critical period of our relations with China he was often called upon to perform delicate diplomatic duties, discharging them to the complete satisfaction of the government. He probably shortened his life by devotion to the interests of commerce in personally superintending the placing of buoys and a light-ship in the harbor of Shanghai, which for the first time then had its channels and sailing-courses properly defined.

ABBOT, Joseph Hale, educator, b. in Wilton, N. H., 26 Sept., 1802; d. in Cambridge, Mass., 7 April, 1873. He was graduated at Bowdoin college in 1822, was tutor there in 1825-27, and from 1827 to 1836 professor of mathematics and teacher of geology in Phillips Exeter academy. He then taught a school for young ladies in Boston, and subsequently became principal of the high school in Beverly, Mass. He was a member, and for several years recording secretary, of the American academy of arts and sciences, to whose "Transactions" he contributed numerous scientific papers. He paid much attention to the solving of pneumatic and hydraulic problems, and published ingenious and original speculations on these subjects. In the "Ether Controversy" he was an advocate of the claims of Dr. Charles T. Jackson, and wrote warmly in his behalf. He was associated with Dr. Worcester in the preparation of
his English Dictionary, and furnished many of the scientific definitions.

ABBOTT, Samuel, philanthropist, b. in Andover, Mass., 25 Feb., 1792; d. 12 April, 1812. He was a merchant in Boston, and by his hard and honest methods acquired great wealth, which he devoted to various religious and charitable purposes. He interested himself in the establishment of Andover theological seminary, and contributed $20,000 for that purpose, which amount he increased by $100,000 on his death.

ABBOTT, Samuel, m. G. P. N., 30 March, 1796; d. there, 2 Jan., 1839. He was graduated at Harvard in 1808, studied law, and practiced his profession, first at Dunstable and then at Ipswich, Mass. He was the inventor of a process by which starch is made from the potato, and was burned to death in his factory.

ABBOTT, Benjamin, lawyer, b. in Boston, 4 June, 1839; d. in Brooklyn, N. Y., 17 Feb., 1890. He was graduated at New York university in 1859, admitted to the bar in 1851, and, after some years of practice, devoted himself mainly to compilations and digests of law. Some of the more important of these are enumerated in the articles on ABBOTT, P. C., and ABBOTT, B. A., his brother, who was associated with him. His earliest independent publication was "Reports of Decisions of Circuit and District Courts of the U. S." (2 vols., New York, 1870-71). In June, 1870, he was appointed to revise the statutes of the United States, a work that occupied three years, and resulted in the consolidation of sixteen volumes of U. S. laws into one large octavo, 1872). Charles P. James and Victor C. Barringer were associated with Mr. Abbott in this work. On its completion he undertook a new edition of the "U. S. Digest," a work that occupied him until 1879. The original digest was compressed into thirteen volumes, followed by nine volumes of annual supplements. The "National Digest of Decisions on Corporations from 1860 to 1870" (New York, 1872), and "A Treatise on the Courts of the United States and their Practice" (2 vols., New York, 1877). He then compiled a "Dictionary of Terms in American and English Jurisprudence." (2 vols., 1879); "A National Digest" (4 vols., 1884-89), which comprised all important acts of congress, and decisions of the U. S. supreme court, circuit and district courts, court of claims, etc., and the fourth American edition of "Addison on Contracts" (1883), "Judge and Jury" (New York, 1889) is a collection of articles contributed anonymously to periodicals; "Travelling Law School and Famous Trials" (1889) is a juvenile publication in the Chautauqua reading-circle series. He supplied many articles for the "Medical Reference Handbook," and acted as editor for the lawyers' cooperative publishing company of Rochester, N. Y. His latest work, entitled "The Patent Laws of all Nations," was still in preparation. 

Dr. Abbott has very carefully investigated the first appearance of pre-historic man in this country, and has accumulated a valuable archaeological collec-
tion containing 20,000 specimens, mainly stone implements, which is now in the Peabody museum, Cambridge, Mass. He is the author of "A Naturalist's Rambles about Home" (New York, 1884); "Upland and Meadow" (1886); "Wasteland Wanderings" (1887); "Days Out of Doors" (1890); "Outings at Odd Times" (1890); "Recent Rambles" (Philadelphia, 1892); "Travels on a Tree Top" (1894); "Birds about Us" (1895); "A Colonial Wooing"; "Bird-Land Echoes" (1896); "Notes of the Night" (New York, 1896); and "When the Century was New" (Philadelphia, 1897).

ABBOTT, Edward, journalist, b. in Farmington, Me., on the 28th of July, 1845. He was the fourth son of Jacob Abbott, was graduated at the University of the City of New York in 1869, and afterward studied at Andover theological seminary. In 1862 and 1863 he was with the U.S. sanitary commission of the Army of the Potomac. On 28 July, 1863, he was ordained to the ministry of the Congregational church, and until 1865 he was chaplain of the city institutions, Boston. He became pastor of Stearns' chapel (now Pilgrim church) in 1865, and remained there until 1869, when he became associate editor of the "Congregationalist," retaining the place until 1878. He then transferred his ecclesiastical relation to the Protestant Episcopal church, and took charge of St. James parish, Camden, Me. In the meantime he undertook the editorship of the "Literary World." He has published "The Baby's Things" (New York, 1871); "The Conversations of Jesus" (Boston, 1875); "A Paragraph History of the United States" (1873); "A Paragraph History of the Revolution" and "Revolutionary Times" (1874); "The New American Baby's\' (Boston) "Pilgrim Lesson Papers" (1872-74); and "Abbott's Young Christian," edited with a life of the author (New York, 1882), and contributed largely to periodical literature.

ABBOTT, Gorham Dummer, educator, b. in Hallowell, Me., 3 Sept., 1807; d. in South Natick, Mass., 31 July, 1871. He was the brother of Rev. Jacob Abbott, was graduated at Bowdoin College in 1826, and studied theology at Andover with the class of 1831. After receiving ordination as a Congregational minister in 1831, he became a teacher in New York city, and shortly afterward was settled at New Rochelle, N. Y., where he remained till 1838, doing at that time literary work for the American Tract Society. At the request of New Enchelle he assisted his brothers in establishing a female seminary, the Abbott Institute, in New York city. He founded in 1847 a young ladies' seminary, known as the Spangler institute, where he remained for thirteen years. The high reputation of this school necessitated an enlargement, and the building, a spacious edifice erected on the Alexandria manor, was procured, remodelled, and converted into an annex. His seminary held a high rank, not only in New York but throughout the country, for more than thirty years. He was a successful teacher, and possessed of great executive ability. The title of LL. D., was conferred on him by Ingham University in 1871; and he was an extremely low price in the latter part of his life, with a competence, but subsequent unfortunate investments caused a material diminution of his property. His researches as a biblical student displayed extreme thoroughness. He imported at his own expense a set of plates of the "Annotated Paragraph Bible" of the London Tract Society, and secured several editions of the work, which was issued at an extremely low price in order to facilitate biblical instruction. He was the author of several religions and didactic works, principal among which were the "Family at Home," "Nathan W. Dickerman," "Mexico and the United States," and "Pleasure and Profit."

ABBOTT, Horace, manufacturer, b. in Sudbury, Mass., 29 July, 1806; d. in Baltimore, Md., 8 Aug., 1857. He was early engaged in the manufacture of shingles, cranberries, etc., in Baltimore, and is said to have made the first large steamboat-shaft ever forged in this country. In 1850 he built his first rolling-mill, which was larger than any before attempted in the United States. A second mill, built in 1857, contained a pair of ten-foot rolls, which were described as being the largest pair of rolls in the world. A third mill was erected, and in 1861 a fourth. In these mills the armor-plates for the "Monitor" were made, and subsequently those for nearly all the vessels of the monitor class built on the Atlantic coast, as well as for the "Roanoke," "Agamemnon," "Monadnock," and other government vessels. In 1863 an association of capitalists purchased the entire works and organized a stock company known as the Abbott Iron Company of Baltimore, and elected Mr. Abbott president.

ABBOTT, Jacob, author, b. in Hallowell, Me., 14 Nov., 1803; d. in Farmington, Me., 31 Oct., 1879. He was graduated at Bowdoin College, Brunswick, Me., in 1829, and studied divinity at Andover, received ordination as a Congregational minister. From 1825 to 1829 he was professor of mathematics and natural philosophy in Amherst college, and afterward he established the Mount Vernon school for girls in Boston. In 1834 he organized a new Congregational church in Roxbury (the Eliot church) and became its pastor. He re- signed the pastorate in 1858, and subsequently devoted himself almost exclusively to literary labor, dividing his time between Farmington and New York, and travelling extensively abroad. A complete catalogue of his works (which are chiefly for the young) would considerably exceed 200 titles. Many of them are serial, each series comprising from 5 to 36 volumes. Among them are the "Young Christian" series (4 vols.; new ed., with life of the author, 1882), the "Rollo Books" (28 vols.), the "Lucy Books" (6 vols.), the "Jonas Books" (6 vols.), the "Franconia Stories" (10 vols.), the "Marco Paul Series" (6 vols.), the "Gay Family series" (12 vols.), the "Juno Books" (12 vols.), the "Rainbow Series" (4 vols.), and four other serials as: "Science for the Young" (4 vols., " Hort," " Light," " Water and Land," and "Force"); "A Summer in Scotland"; "The Teacher"; more than 20 of the series of illustrated histories to which his brother John S. C. contributed, and a separate series of histories of America in 8 volumes. He also edited, with additions, several German and French text-books, and compiled a series of school readers.

ABBOTT, John, entomologist. He was for many years a resident of Georgia, and wrote "The Natural History of the Rarer Lepidopterous Insects of Georgia," which was edited by Sir J. E. Smith, and published in London, with 104 colored plates, in 1837. In 1839 he was appointed official entomologist in the u. s. a. to explore the region of the Rio Grande, and in 1844 he was called to the bar of Lower Canada. In 1859 he was elected a representative from Argenteuil in the Canadian assembly, and he represented
this constituency until the union of the provinces, when he was returned for the house of commons. For a brief period in 1862 Mr. Abbott was solicitor-general in the Sandfield Macdonald-Sicotte administration. He was subsequently made the solicitor-general, and on the death of Sir John Macdonald he became premier. After serving a short period he retired, owing to ill-health. Sir John was regarded as one of the best authorities in Canada on commercial law, and headdled largely to his reputation by his "Jury Law Consolidation Act" for Lower Canada.

ABBOTT, John Stephens Carleton, b. in Brunswick, Me., 18 Sept., 1807; d. in Fair Haven, Conn., 17 June, 1877. He was a brother of Jacob Abbott, and was graduated at Bowdoin College in 1825, and at Andover Theological Seminary. He was ordained as a Congregational minister in 1830, and successively held pastorates at Worcester, Roxbury, and Nantucket, Mass. Like his elder brother, he had the narrative faculty in a remarkable degree, and, like him, he was a prolific writer. His first published work, "The Mother at Home" (1833), commanded a large sale, and was followed by "The Child at Home," and at short intervals by other books of a semi-religious character. In 1844 he resigned his pastorate and devoted himself to literature, his favorite field of literary labor being semi-historical. His principal books are "Practical Christianity"; "Kings and Queens, or Life in the Palace"; "The French Revolution of 1789"; "The History of Napoleon Bonaparte" (2 vols.); "Napoleon at St. Helena"; "The History of Napoleon III." (1868); 10 volumes of illustrated histories; "A History of the Civil War in America" (2 vols., 1863-1866); "Romance of Spanish History" (1870); and "The History of Frederick the Second, called Frederick the Great" (1871). Several of these have been translated into foreign languages.

ABBOTT, Joseph Carter, journalist, b. in Concord, N. H., 15 July, 1825; d. in Wilmington, N. C., 8 Oct., 1882. He studied at Phillips Andover academy, and subsequently under private instruction, covering the usual college course. He then read law in Concord, and was admitted to the bar in 1852, at which time he had already edited the "Dulcy American" for six months. He continued to edit this journal until 1857, and in the meantime (1855) he was appointed adjutant-general of New Hampshire, and in that capacity effectively reorganized the State militia. In 1859-'61 he assumed the editorship of the Boston "Atlas and Bee," but continued to discharge his duties as adjutant-general. He early joined the "Know Nothing" party, and during all these years was a frequent contributor to the magazines, his particular interest being in historical matters. He was a member of the commission for adjusting the boundary between New Hampshire and Canada. When the civil war broke out he showed great energy and efficiency in raising and organizing troops until, yielding to the desire for active service, he obtained a commission as lieutenant-colonel of the 7th regiment, New Hampshire volunteers. On various occasions he distinguished himself, but especially at the attack on Fort Fisher, N. C., where his brigade stormed successively several positions where the Confederates made a stand. He was promoted brigadier-general July 1863, and commanded his regiment in active service until the summer of 1864, when he was placed in charge of a brigade and brevetted brigadier-general. After the war he removed to Wilmington, N. C., where he was a member of the constitutional convention, was elected U. S. senator by the Republicans for a partial term ending in 1871, served as collector of the port under President Grant, and was inspector of ports under President Hayes.

ABBOTT, Lyman, clergyman, b. in Roxbury, Mass., 18 Dec., 1835. He is the third son of Jacob Abbott, was graduated at the University of the City of New York in 1859, studied law, was admitted to the bar, and went into partnership with his brothers, Benjamin V. and Austin, in 1856. Becoming convinced that he was better qualified for the pulpit than for the bar, he studied theology with his uncle, the Rev. John S. C. Abbott, and entered the ministry in 1860. His first pastoral charge was the Congregational church in Terre Haute, Ind. In 1862 he was elected president of Indiana Wesleyan University. In 1863 he was chosen secretary of the American Union (Freedmen's) Commission. This office called him to New York city, and occupied him until 1868. During a part of this period he was also pastor of the New England church in New York city, but he resigned in 1869 to devote himself to literature and journalism. He was joined and associated with other authors of novels (see Austin Abbott), and for several years he edited the "Literary Record" of "Harper's Magazine," at the same time conducting the "Illustrated Christian Weekly." This last-named duty he resigned to take charge of the "Christian Union," an independent weekly journal, in the editorship of which he was associated with Beecher. For several years he has been pastor of Plymouth church and editor of "The Outlook." His works include "Jesus of Nazareth: His Life and Teachings" (New York, 1869); "Old Testament Shadows of New Testament Truths" (1870); a "Dictionary of Bible Knowledge" (1873); "A Layman's Story of the New Testament," in four volumes (1875 et seq.); a Life of Henry Ward Beecher (1883); "For Family Worship," a book of devotions (1883); and "In Aid of Faith" (1886). He is also the author of several pamphlets, the most important being one on "The Results of Emancipation in the United States" (1867). He has edited two volumes of "Sermons by Rev. Henry Ward Beecher," and "Morning and Evening Exercises," selected from the writings of the same author.

ABBOTT, Robert Osborne, surgeon, b. in Pennsylvania in 1824; d. in Brooklyn, N. Y., 16 June, 1867. He entered the army in 1849 as assistant surgeon, and in that capacity accompanied Magruder's battery to California. He subsequently served in the East, and also in Florida and Texas. During 1861 he was assistant to the chief medical purveyor in New York. In 1862 he was made medical director of the fifth army corps, and later in the same year was appointed medical director of the central hospitals of the Department of Washington, and he was placed in charge of all the hospitals in and about the capital, together with all the hospital transports. The incessant and arduous duties of this office, which he held until November, 1866, seriously impaired his health. A six months' sick-leave failed to restore it, and he died a victim of over-work.
ABEEL, David, missionary, b. in New Brunswick, N. J., 12 June, 1804; d. in Albany, N. Y., 4 Sept., 1846. He was educated at Rutgers College, New Brunswick, N. J., and studied at the Theological Seminary of the Reformed church in that place. His first pastoral charge was at Athens, N. Y., where he remained for two years, and then sailed for Canton, China, in October, 1829, under the auspices of the Seaman’s Friend society, but after a year’s service placed himself under the direction of the American board of commissioners for foreign missions. He visited Java, Singapore, and the other Chinese ports; but his health failed and he returned home by way of Europe in 1833, visiting Holland, France, and Switzerland, and everywhere urging the claims of the heathen upon Christian nations. In England he aided in forming a society for promoting the education of women in the East. On returning to America he published “Bleak towers of the World to the Gospel,” “Residence in China,” and “The Missionary Convention at Jerusalem.” In 1839 he revisited Malaca, Borneo, and parts of Asia, and in 1842 established a mission at Amoy. In 1845 his health gave way altogether, and he returned home to die. He was one of the most successful of the early American missionaries, being gifted with sound judgment and energy, and in “Memoirs,” by the Rev. G. R. Williamson (1849).

ABERCRUMBIE, James, British soldier, b. in Scotland in 1706; d. 23 April, 1781. He was descended from a wealthy family, entered the army, and reached the grade of colonel in 1746, of major-general in 1756, of lieutenant-general in 1759, and of lieutenant-colonel-general in 1772. He survived the British forces in America after the departure of London in 1758, ordered the disastrous attack on Fort Ticonderoga, 8 July, 1758, and then retreated to his entrenched camp south of Lake George. Superseded in 1759 by Amherst, he returned to England and, as a member of parliament, supported policies designed to reduce the colonies. His son James died in Boston, 24 June, 1755, of a wound received at Bunker Hill. He had served as aide-de-camp to Gen. Amherst in 1759, and was promoted to the grade of lieutenant-colonel in 1770. In the charge on Bunker Hill he led the Grenadier Guards.

ABERCRUMBIE, James, clergyman, b. in Pennsylvania, 26 Jan., 1758; d. there, 26 June, 1841. He was graduated at the University of Pennsylvania in 1776, and studied divinity, but, owing to a disease of the eyes, followed mercantile pursuits from 1783 until 1796, when he was ordained and became associate pastor of Christ church. He was principal of the Philadelphia academy from 1810 to 1819, and retired from the ministry in 1833. He published “Lectures on the Catechism” (1807); “Lectures on Rhetoric” (1810); “Lectures on the Liturgy” (1811); “The Mourner Comforted” (1812); and sermons.

ABERCRUMBIE, John Joseph, soldier, b. in Tennessee in 1802; d. in Roslyn, N. Y., 3 Jan., 1877. He was graduated at West Point in 1822, served as adjutant in the 1st Infantry from 1825 to 1833, and was made captain in 1834. He served in the Florida war, and was brevetted major for gallant conduct at the battle of Okeechobee. He was engaged in frontier duty in the west until the Mexican war. For gallantry at the battle of Monterrey, where he was wounded, he received the brevet rank of lieutenant-colonel. He was at the siege of Vera Cruz in 1847 as aide-de-camp to Gen. Patterson. When the civil war broke out he was stationed in Minnesota. He took part in the Shenandoah campaign and was in command at the action of Falling Waters. He served through the Peninsula campaign as brigadier-general of volunteers, was wounded at Fair Oaks, and was present at Malvern Hill and in several skirmishes on the retreat to Harrison’s Landing. He was engaged in the defense of Harper’s Ferry in 1862 and 1863, had charge of depots at Fredericksburg in May, 1864, and took part in the defense against Hampton’s Legion in June, 1864. He was brevetted brigadier-general at the close of the war, and retired 13 June, 1865.

ABERCRUMBIE, Sir Robert, British soldier, b. in Orange County, N. Y., 1842; d. in Scotland, 1847. He was engaged in the defense of N. Washington in 1832 and 1833, had charge of depots at Fredericksburg in May, 1864, and took part in the defense against Hampton’s Legion in June, 1864. He was brevetted brigadier-general at the close of the war, and retired 13 June, 1865.

ABERT, John James, soldier, b. in Shephardstown, Va., 17 Sept., 1848; d. in Washington, D. C., 27 Sept., 1863. He was the son of John Abert, who came to this country with Rechabben in 1780. He was graduated at West Point in 1811. He was at once re-enlisted, and was then employed in the war-office. Meanwhile, he studied law, and was admitted to the bar in the District of Columbia in 1813. In the war of 1812 he volunteered as a private soldier for the defence of the capital. He was re-appointed to the army in 1814 as topographical engineer with the rank of major. In 1829 he succeeded to the charge of the topographical bureau at Washington, and in 1838 became colonel in command of that branch of the engineers. He was retired in 1861 after "long and faithful service." Col. Abert was associated in the supervision of many of the earlier national works of engineering, and his reports prepared for the government were standards of authority. He was a member of several scientific societies, and was one of the organizers of the national institute of science, which was subsequently merged into the Smithsonian institute. His sons served with distinction in the U. S. army during the civil war—James William, in the U. S. army during the civil war. James William, in the U. S. army during the civil war. He was engaged in the improvement of western rivers, except during the Seminole war in 1856-58, when he was in Florida. During the civil war he served on the
ACOSTA, d. 1809, was appointed engineer in charge of all the works of construction at the Pensacola navy-yard. During the civil war he served at first on the staff of Gen. Banks in his Virginia campaign, and later under Gen. Meade with the Army of the Potomac. From 1863 to 1866 he was engaged on the surveys of the Magdalena river for the Colombian government. On his return in 1866 he was appointed to the office of assistant engineer, having an annual salary of $4,000, and has been occupied on numerous government surveys. Since 1873 he has been in charge of the geographical division extending from Washington, D. C., to Wilmington, N. C. Col. Albert is the author of numerous valuable reports on his work, and has also published “Notes, Historical and Statistical, upon the Delaware and Schuylkill Rivers of Pennsylvania,” “Historical and Statistical Information relating to the Interoceanic Ship Canal between the Atlantic and Pacific Oceans” (Cincinnati, 1872).—William Stretch, soldier, b. in Washington, D. C., 1 Feb., 1836; d. in Galveston, Tex., 35 Aug., 1867. He was appointed lieutenant in the artillery in 1855, and at the outbreak of the civil war in 1861 was stationed at Fort Monroe, Va. He was appointed captain in the cavalry in 1861, and fought in the battles of Williamsburg and Hanover Court House. Later he joined Gen. McClellan's staff, and was at Antietam. From November, 1862, to October, 1864, he was assistant inspector-general at New Orleans under Gen. Banks, after which he served in the department of the Missouri as colonel of the 2d Massachusetts artillery. Subsequent to the war he was with his regiment in Texas, and became assistant inspector-general of the district of Texas. In June, 1867, he was advanced to the rank of major in the 7th U. S. cavalry. He received several brevets, the highest of which was that of lieutenant-colonel.

ABOVEVILLE, Francois Marie, Comte d', French soldier, b. in Brest, 23 Jan., 1793; d. 1 Nov., 1817. He distinguished himself as a young officer of artillery at the siege of Münster, came to America with the rank of colonel, commanded the artillery of Rochambeau's army at the siege of Yorktown, and was made a brigadier in 1788. He commanded the French artillery at Ardennes in 1792, with the rank of lieutenant-general, and was governor of Brest in 1809. Embracing the cause of the Bourbons, he was made a peer of France after the restoration in 1814.

ABRAHAMS, Simeon, physician and philanthropist, b. in 1809; d. in New York, 14 April, 1867. He practised medicine in New York with success, and bequeathed large sums to Jewish and other charities in that city.

ACAMAPICTLI (ah-kah-mah-petch'tli). I. An Aztec king, d. in 1389. He succeeded to the throne in 1352, and consolidated the kingdom, collecting the tribes and making new laws. He constructed roads and aqueducts, and was the founder of the city of Tenochtitlan. II. The third Aztec king, second grandson of the preceding. He assisted King Quinatzin, of Texcoco, against his two rebellious sons, and finally routed them. He ruled his own country in peace for forty-one years, and died in 1402.

ACCAULT, Michel (ak-kô), explorer. He was one of the trusted lieutenants of La Salle, discoverer of the Mississippi, and was sent by him with Louis Hennepin during the summer of 1679 to explore the upper part of that river. This expedition has been fully chronicled by Father Hennepin, who represented the church, while Accault and Du Goy were the military aids. They ascended the river to the falls of St. Anthony, were captured by the Sioux Indians, rescued by the gallant French officer Daniel Duthal, and reached the trading-station at Green bay in the autumn. See HENNEPIN.

ACLAND, Christina Harriet Caroline Fox, daughter of Stephen, first earl of Ilchester, b. 3 Jan., 1750; d. at Tetton, England, 21 July, 1815. She married, in September, 1770, Maj. John Dyke Acland, accompanied him to America, and shared in all the vicissitudes of Burgoyne's campaign, and while young and during her husband's absence, the British camp in a frail boat and in the midst of a driving storm to rejoin her husband. This expedition was received with the utmost cordiality by Gates, shared her husband's captivity, and carefully nursed him until restored to health. The kindness that had been shown to his wife Maj. Acland reciprocated, while on parole in New York, by doing all in his power to mitigate the sufferings of the American prisoners.

The other women of Acland's family, especially his wife, used their influence to soothe the wounded spirit of the soldier. As home was far away, the husband's land she became insane for a time, and finally married Chaplain Brudenell, is totally untrue. She died the widow of Maj. Acland, as is attested by the burial register. The story that her husband was killed in a duel is equally unfounded. He received a paralytic stroke on 29 Nov., 1778, while carrying some improvements about his place, and died on 2 Dec. In person Lady Harriet was highly graceful and delicate, and her manners were elegant and feminine. Mrs. Perez Norton commemorated her sufferings in a touching poem, and before she left New York a painting representing her standing in a boat, with a white handkerchief in her hand as a flag of truce, was exhibited at the royal academy, London. There is a striking portrait of her by Sir Joshua Reynolds, at Killerton, Exeter, the seat of Sir Thomas Dyke Acland. She suffered for years from cancer, but bore it with great fortitude. She is still remembered for her numerous charities.

ACOLUA I (ah-kol-hoo'-ah), a king of Azcapotzalco, 1229-1255. He ascended the throne in 1168. II. (also called by some historians Tetzotzomoc), a king of Azcapotzalco. He began to rule in 1338.

ACOSTA, Cecilio, Venezuelan jurist and writer, b. in Caracas in 1831; d. there, 8 July, 1881. He was the editor of the penal code now in force in his country, Venezuela. He was a great Spanish and Latin scholar, and had a thorough knowledge of the French, English, and Italian literatures. Acosta was among the first South Americans honored with the appointment of corresponding member of the Spanish academy.

ACOSTA, Joaquín, Colombian general and author, b. in Guaduas, Colombia, 29 Dec., 1799; d. there in 1852. He entered the Colombia army at
the age of twenty, and rendered distinguished services as an officer of engineers. He was a member of the convention of New Grenada in 1834, and worked for reform of the government. In 1834 he explored the valleys of the Socorro and Magdalena rivers, and in 1831 made researches relative to the Chiboes and other Indian tribes. He was for a time New Granadan minister to Ecuador, and from 26 July to 8 Nov., 1842, was chargé d'affaires at Washington. Subsequently he held the office of secretary of state in New Grenada government. He published in Paris, in 1848, a history of the discovery and settlement of New Grenada, accompanied by a valuable map made by himself, the first one published since Colombian independence. He also contributed to the publications of the French geographical society.

ACOSTA, José d., Spanish missionary, b. in Medina del Campo in 1539; d. in Salamanca, 15 Feb., 1599. At the age of fourteen he became a member of the Society of Jesus. He was a missionary in South America from 1571 until 1576, then visited Mexico, where he remained two years. After his return to Spain he published "De natura et de praevisione civitatis apud Barbaros" (Salamanca, 1588–90), which he translated into Spanish and extended. It was issued under the title "Historia natural y moral de las Indias" (1590), attained great popularity, and was translated into various languages. He was rector of the university of Salamanca at the time of the Luddite disturbances.

ACOSTA, Santos, Colombian statesman, b. in Miraflores, Colombia, in 1839. He became conspicuous in politics when quite young. He has been general-in-chief of the Colombian army, representative and senator in several legislatures, secretary of state, a foreign minister, and president of the republic from May, 1867, to April, 1868.

ACUALMETZLI, Ignacio (jikni'-le-oos), Spanish clergyman, b. in Österaker, Sweden, 25 Dec., 1714; d. in Fellingsbro, 25 April, 1800. He was educated in Upsala, ordained in 1743, and sent out as provost of the Swedish congregations in New Sweden (afterward Delaware), in 1749. He reached Philadelphia in November, and began his work with zeal and success, with a truly missionary spirit. He undertook the ecclesiastical affairs of the Swedish colonies, which he found in great disorder. But ill health obliged him to resign in 1756, after a sojourn of seven years in America, and on his return to Sweden the king gave him a pension and the living of Fellingsbro. He wrote various articles on America, for Swedish journals and for religious papers, and published "The Swedish Colonies in America" (Stockholm, 1759), which was translated into English in 1784, and is of great value and interest.

ACUALMETZLI, the Indian name of a Mexican warrior, b. in Coyucan in 1529; d. in 1542. His Christian name was Ignacio Alarcón de Roquevilla. When he was a year old his father and mother were murdered by the Spaniards, and the latter from the effects of punishment received because she insulted one of the captains of Cortés. A Spaniard took care of the orphan, had him christened, and gave him an education. But Acualmetzli, when about twenty years of age, learned the cause of his parents' death and avenged it, slaying the Chichimec then in revolt, in order to seek revenge. He fought bravely, and instructed the Indians in civilized warfare, until he fell in battle with the troops sent against them by the viceroy Antonio de Mendoza.

ACUNÁ, Cristóbal de (ah-koon'-ya), Spanish Jesuit missionary, b. in Burgos, Spain, in 1597; d. about 1676. He was attached to Tzeheí's Amazon expedition in 1669–71, with the special object of reporting the incidents of the exploration. On his return from the upper Amazon he published "Nuevo Descubrimiento del Gran Río de las Amazonas." All the copies of this work, except ten, were unfortunately destroyed, but from these a translation was made by Gomberville into French in 1684. Although great interest was excited by the expedition, the distractions in the mother country prevented the government from taking any marked interest in the colonization of the region to which so much energy and talent had been devoted. Acuná afterward went to the West Indies, thence returned to South America, and died while on his way from Panama to Lima.

ACUÑA, Juan, marquis of Casaforte, 37th viceregal of Mexico, b. in Lima, Peru, late in the 17th century; d. in Mexico, 17 March, 1774. He was an officer of artillery in the Spanish army. For twelve years, from 15 Oct., 1722, he governed New Spain with great success in all the departments of the administration. During that period many public buildings were erected, among them the famous observatory erected at Acapulco in 1725. The town of Vera Cruz, erected 1727, which for many years was called "Puerta de Acuña." Mining received a great impulse, while commerce with Spain and the Philippine islands was increased. Acuña sent to Texas a colony from the Canary islands, who founded the town of San Fernando.

ACUÑA, Manuel, Mexican poet, b. in the state of Guanajuato, 27 Aug., 1749; d. by his own hand 6 Dec., 1873. He founded the literary society "Netzahual Coyotl," in which he first showed his poetic talent. He was the author of a play entitled "El Pasado," his best poems are "Gloria" and "A Rosario." Disappointment in love is said to have been the cause of his suicide.

ADAIR, John, general, b. in Chester co., S. C., in 1759; d. in Harrisburg, Ky., 19 May, 1840. He served in the revolutionary army, and in 1787 removed to Kentucky, where he was appointed major under St. Clair and Wilkinson in their expeditions against the Indians of the northwest in 1791. In an attack by "Little Turtle," the Miami chief, 6 Nov., 1792, while in camp near Fort St. Clair, his command was destroyed and he was taken prisoner. At that time such an hypothesis was regarded as visionary, but the idea has since found many supporters, among them being Bondinot in his "Star of the West." Unsatisfactory as are his vocabularies of Indian dialects, they are the most valuable part of his writings.
New Orleans under Gen. Jackson. From 1829 to 1834 he was governor of Kentucky, and in 1831-'33 a member of congress, serving on the committee on military affairs.

ADAMS, William Penn, second chief of the Cherokee nation, b. about 1858; d. in Washington, D. C., 23 Oct., 1880. During the civil war he commanded a brigade of Indians, which was organized by Gen. Albert Pike, in the service of the confederacy, and fought at the battle of Pea Ridge. At the time of his death he was at the capital representing the interests of his tribe.

ADAM, Graeme Merzer, Canadian author, b. in Loanhead, Midlothian, Scotland, in 1839. He was educated at Portobello and at Edinburgh, and when quite young entered a publishing house in that city, and in 1858 was given charge of one of its departments. A few months later he accepted a proposal by the Blackwoods to take charge of a book store in Toronto, Canada. In 1869 he succeeded to this business as a member of the firm of Rollo & Adam, who were the publishers of the first of the more important Canadian periodicals, the “British American Magazine.” Mr. Rollo retired in 1866, and it then became the firm of Adam, Stevenson, & Co. The business was continued until 1868, when it was discontinued, and Mr. Adam went to New York, where he helped to found the publishing house that has since been developed into the John W. Lovell Publishing Company. He returned to Toronto in 1878; in 1879 he established the “Canada Educational Monthly,” which he edited for five years, and in 1882 assumed the editorship of the “Canada Monthly,” which he and Prof. Goldwin Smith were instrumental in founding in 1872. He also published “The Northwest, its History and its Troubles” (1885); “Outline History of Canadian Literature”; and, with Ethelwyn Wetherald, “An Algonquin Maiden” (Toronto, 1887).

ADAMS, Abigail (Smith), wife of John Adams, second president of the United States, b. in Weymouth, Mass., 23 Nov., 1744; d. in Quincy, Mass., 28 Oct., 1818. Her father, the Rev. William Smith, was for more than forty years minister of the Congregational church in Weymouth. Her mother, Elizabeth Quiney, was great-great-granddaughter of John Eliot, influential Puritan divine, Thomas Shepard, of Cambridge, and great-great-grandniece of the Rev. John Norton, of Boston. She was among the most remarkable women of the revolutionary period. Her education, so far as books were concerned, was but scanty. Of delicate and nervous organization, she was so frequently ill during childhood and youth that she was never sent to any school; but her loss in this respect was not so great as might appear, as England clergymen at that time were usually men of great learning, the education of their daughters seldom went further than writing or arithmetic, with now and then a smattering of what passed current as music. In the course of her long life she became extensively acquainted with the best English literature, and she wrote in a terse, vigorous, and often elegant style. Her case may well be cited by those who protest against the exaggerated value commonly ascribed to the routine of a school education. She spent much of her life in seclusion, but among people of learning and political sagacity. On 23 Aug., 1764, she was married to John Adams, then a young lawyer practising in Boston, and for the next ten years her life was quiet and happy, though she shared the intense interest of her husband in the fierce disputes that were so soon to culminate in war. During this period she became the mother of a daughter and three sons. Ten years of doubt and anxiety followed during which Mrs. Adams was left at home in Braintree, while her husband was absent, first as a delegate to the continental congress, afterward on diplomatic business in Europe. In the zeal of her husband. Mrs. Adams urged on the declaration of independence he was staunchly supported by his brave wife, a circumstance that used sometimes to be jocosely alleged in explanation of his superiority in boldness to John Dickinson, the women of whose household were perpetually conjuring up visions of the headstrong man’s return. In 1781 her husband went to France, and early in the following year she accompanied him to London. With the recent loss of the American colonies ranking in the minds of George III. and his queen, it was hardly to be expected that much courtesy would be shown to the first minister from the United States. Indeed, so slight was the recognition of their hospitality by the English minister, which she seems to have remembered vindictively. “Humiliation for Charlotte,” she wrote some years later, “is no sorrow for me.” From 1789 to 1801 her residence was at the seat of our federal government. The remainder of her life was passed in Braintree (in the part called Quincy), and her lively interest in public affairs was kept up till the day of her death. Mr. Adams was a man of sunny disposition, and great keenness and sagacity. Her letters are extremely valuable for the light they throw upon the life of the times. See “Familial Letters of John Adams and his Wife, Abigail Adams, during the Revolution,” with a memoir by C. F. Adams (New York, 1876).

ADAMS, Ib., wife of John Adams, first president of the United States, d. in Andover, Vt., 16 June, 1804; d. in Watertown, Mass., 2 Sept., 1877. In 1810 he established an express route between New York and Boston, making his first trip on 4 May. A few months later, under the firm-name of Adams & Co., he associated with himself Ephraim Farnsworth, who took charge of the New York office. On the death of the latter, soon afterward, William B. Dinsmore succeeded to his place, and for several years subsequently the business was limited to New York, New London, Norwich, Worcester, and Boston. In 1854 the corporation of Adams Express Co. was formed by the union of Adams & Co., Harmen & Co., Thompson & Co., and Emlen & Co., with Mr. Adams as president. Its business then rapidly extended throughout the south and west, and in 1870 to the far west. Mr. Adams was associated with the organization of the pioneer express throughout the mining camps of California in 1850; but on the consolidation of the companies in 1854, Adams & Co. disposed of their property to the new express company. During the civil war the facilities that were afforded by Adams Express Co. were of the greatest value to the national government. Mr. Adams accumulated a large fortune. See “History of the Express Business,” by A. L. Stimson (New York, 1884).
ADAMS, Amos, clergyman, b. in Medfield, Mass., 1 Sept., 1728; d. in Dorchester, 5 Oct., 1775. He was graduated at Harvard in 1752, and in September of the following year became pastor of a church in Roxbury, which he served until his death. He was secretary of the convention of ministers at Watertown, which in May, 1753, recommended the people of the town to take up arms. Many of his sermons were published from 1756 to 1769, as well as two discourses on "Religious Liberty" (1767). The most notable of his writings were two discourses on the general fast, 6 April, 1769, in which he gave "A Concise Historical View of the Difficulties, Hardships, and Perils which Attended the Pious Associates as an Experiment in Improving the Minds of the English, with a Particular Account of its Long and Destructive Wars, Expensive Expeditions," etc. (republished in London, 1770).

ADAMS, Andrew, jurist, b. in Stratford, Conn., in January, 1736; d. in Litchfield, 26 Nov., 1797. He was graduated at Yale college in 1759, admitted to the bar in Fairfield co., and practiced law for a time in Stamford, but in 1764 removed to Litchfield. He was a member of the legislature in 1776-'81, a delegate to congress in 1777-'80, and again in 1781-'82, as well as a member of the council in 1771. In 1789 he received the appointment of judge of the supreme court, of which he was made chief justice in 1793. He was an adroit and able returned judge.

ADAMS, Benjamin, lawyer, b. in Worcester, Mass., in 1765; d. in Uxbridge, 28 March, 1837. He was graduated at Brown university in 1788, and became a lawyer; was member of the legislature from 1809 to 1814, state senator in 1814-'15, and again in 1822-'25, and went to congress in 1816, when he resigned in 1819.

ADAMS, Charles, lawyer, b. in Arlington, Va., 12 March, 1759; d. in Burlington, 13 Feb., 1861. He prepared himself for college by the light of his father's forge, and was a member of the first class that was graduated from the university of Vermont in 1794. He became a prominent lawyer, and was a constant contributor to newspapers on political questions. He was the friend and adjutant of Gen. Wool during the Canadian difficulties of 1838, and wrote a history of the events connected with that rebellion under the title of "The Patriot War." The work appeared in parts in the local press, but was never issued in book form.

ADAMS, Charles Baker, geologist, b. in Dorchester, Mass.; drowned in the Stour River, W. I., 19 Jan., 1853. He was graduated at Amherst college in 1834, and studied for two years at Andover theological seminary. Later he was associated with Prof. Edward Hitchcock in a geological survey of New York. In 1837 he became tutor in Amherst college, and in 1838 was made professor of chemistry and natural history in Middlebury college, Vt. From 1840 to 1848 he was state geologist of Vermont, and published annual reports of his work. In 1847 he was chosen professor of astronomy and zoology in Amherst college. Between 1844 and 1854 he made journeys to Panama and the West Indies for scientific purposes. He was the author of eleven numbers of "Contributions to Conchology," a monograph of "Stommata" and "Virinella," "Catalogue of Shells Collected in Panama" (New York, 1852), and, with Alonzo Gray, "Elements of Geology" (1852).

ADAMS, Charles Follen, author, b. in Dorchester, Mass., 21 April, 1843. He received a common-school education, and at the age of fifteen entered into mercantile pursuits. At the age of twenty-two he enlisted in the 13th Massachusetts infantry; was in all the battles in which his regiment participated, was wounded at Gettysburg, taken prisoner; released, and detailed for hospital duty. Since 1872 he has been known as a writer of German dialect poems, chiefly humorous. The first that appeared was "The Puzzled Dutchman" in "Our Young Folks" in 1872. This was followed by various others of which "Leedle Yawcob Strauss" (1876) became immediately a favorite. Mr. Adams is a frequent contributor to periodical literature, and has published in a volume "Leedle Yawcob Strauss and Other Poems" (Boston, 1877).

ADAMS, Charles Francis, diplomatist, son of John Quincy Adams, b. in Boston, 18 Aug., 1807; d. there, 29 Nov., 1866. When two years old he was taken by his father to Petersburgh, where he learned German, French, and Russian. Early in 1815 he traveled all the way from St. Petersburgh to Paris with his mother in a private carriage, a difficult journey at that time, and not unattended with danger. His father was soon afterward appointed minister to England, and the little boy was placed at an English school. He himself was sent to one between British and Americans was then more hostile than ever before or since, and young Adams was frequently called upon to defend with his fists the good name of his country. When he returned after two years to America, his father placed him in the Boston Latin school, and he was graduated at Harvard college in 1825, shortly after his father's inauguration as president of the United States. He spent two years in Washington, and then returned to Boston, where he studied law in the office of Daniel Webster, and was admitted to the Suffolk bar in 1828. The next year he married the youngest daughter of Peter Chardon Brooks, whose elder daughters were married to Edward Everett and Rev. Nathaniel Frothingham. From 1831 to 1836 Mr. Adams served in the Massachusetts legislature. He was a member of the whig party, but, like all the rest of his vigorous and free-thinking family, he was extremely independent in politics and inclined to strike out into new paths in advance of the public sentiment. After 1836 he came to be used more widely with the leaders of the whig party with whom he had hitherto acted. In 1848 the newly organized free-soil party, consisting largely of democrats, held its convention at Buffalo and nominated Martin Van Buren for president and Charles Francis Adams for vice-president. There was no hope of electing these candidates. It was a great republican party. In 1858 he was elected to congress by the republicans of the 3d district of Massachusetts, and in 1860 he was re-elected. In the spring of 1861 President Lincoln appointed him minister to England, a place which both his father and his grandfather had filled before him. Mr. Adams had now to fight with tongue and pen for his country; in school-boy days he had fought
ADAMS, Professor and "the other hand the feeling of the governing classes and of polite society in London was either actively hostile to us or coldly indifferent. Even these students of history and politics who were most friendly to us failed utterly to comprehend the true character of the sublime struggle in which we were engaged—as may be seen in reading the introduction to Mr. E. A. Freeman's elaborate "History of Federal Government, from the Formation of the Achaean League to the Disruption of the United States" (London, 1862). Difficult and embarrassing questions arose in connection with the capture of the Confederate commissioners Mason and Slidell, the negligence of Lord Palmerston's Government in allowing the "Alabama" and other Confederate cruisers to sail from British ports to prey upon American commerce, and the ever manifest desire of Napoleon III. to persuade Great Britain to join him in an acknowledgment of the independence of the Confederacy. The diplomatic mission were discharged by Mr. Adams with such consummate ability as to win universal admiration. No more than his father or grandfather did he belong to the school of suave and crafty, intriguing diplomats. He pursued his ends with dogged determination and little or no attempt at conciliating others, while his demeanour was haughty and often defiant. His unflinching firmness bore down all opposition, and his perfect self-control made it difficult for an antagonist to gain any advantage over him. His career in England from 1861 to 1868 must be cited among the foremost triumphs of American diplomacy. In 1872 it was attempted to nominate him for the presidency of the United States, as the candidate of the Liberal Republicans, but Horace Greeley secured the nomination. He was elected in 1869 a member of the board of overseers of Harvard college, and was for several years president of the board. He has edited the works and memoirs of his father and grandfather, and has written a number of his own addresses and orations.—John Quincy, lawyer, b. in Boston, 23 Sept., 1833; d. in Quincy, Mass., 14 August, 1894. He was graduated at Harvard college in 1853, and admitted to the Suffolk bar in 1855. During the civil war he was on Gov. Andrew's staff. He was elected to the legislature by the town of Quincy in 1866, but failed to secure a reélection the following year because he had declared his approval of Andrew Johnson's policy. In 1869 and 1870 he was again a member of the legislature. In 1867 and 1871 he was democratic candidate for governor of Massachusetts, and was defeated. In 1877 he was chosen a member of the corporation of Harvard; in 1880 a lawyer and judge of the Circuit Court of the United States. Charles Francis, b. in Boston, 27 May, 1835. He was graduated at Harvard in 1856, and admitted to the bar in 1858. He served in the army throughout the whole of the civil war, and was mustered out in July, 1865, with the brevet rank of lieutenant-general of volunteers. He has since devoted his attention, both to railroad matters, and in 1869 was appointed a member of the board of railroad commissioners of Massachusetts. In 1871, in connection with his brother, Henry Adams, he published "Chapters of Erie and other Essays." He has since published an instructive book on railroad accidents. He was elected in 1882 a member of the board of overseers of Harvard college, and in 1884 president of the Union Pacific railway, from which he resigned in 1890.—Henry, author, third son of Charles Franklin Adams, b. in Cambridge, Mass., 1838. He graduated at Harvard in 1858, and was his father's private secretary in London from 1861 to 1868. From 1870 till 1877 he was assistant professor of history in Harvard college, and was one of the ablest instructors the university has known during the present generation, possessing to an extraordinary degree the power of infecting his pupils to original work. He now resides in Washington. D. C. Prof. Adams has published "Essays in Anglo-Saxon Law" (Boston, 1879); "Documents relating to New England Federalism, 1800—1815" (1877); "Life of Albert Gallatin" (Philadelphia, 1879); "Writings of Albert Gallatin," edited (3 vols., 1879); "John Randolph" (Boston, 1882); and "History of the United States, 1801—1817" (9 vols., 1889—91).—Brooks, lawyer, fourth son of Charles Francis Adams, b. in Quincy, Mass., 24 June, 1848, graduated at Harvard college in 1870, admitted to the Suffolk bar in 1873. He has published articles in the "Atlantic Monthly," and other periodicals; and the "Emancipation of Massachusetts" (Boston, 1886). ADAMS, Charles Kendall, educator, b. in Derby, Vt., 24 Jan., 1835. When twenty years of age he moved to Iowa, and subsequently entered the university of Michigan, graduating in 1861. He became assistant professor there in 1863, and five years later was elected to the full professorship of history. In 1869 he founded the history seminary at Ann Arbor. In 1881 he became a nonresident professor of history at Cornell university, and in 1885 succeeded Andrew D. White as its president. He has published papers and pamphlets on historical and educational subjects, and is the author of "Democracy and Monarchy in France" (New York, 1874) and a "Manual of Historical Literature" (New York, 1882). He has also edited "Representative British Orations" (3 vols., New York, 1884); and "Johnson's Cyclopedia" (1895). ADAMS, Daniel, author, b. in Townsend, Mass., 29 Sept., 1773; d. in Keene, N. H., 8 June, 1864. He was graduated at Dartmouth college in 1800, studied medicine, and settled in Lenox to practise his profession. Here he published an oration on the death of Washington, and began the preparation of his school-books, including the "Scholar's Arithmetic," "Grammar," and "Understanding Reading," which were issued from his own press. In 1806 he removed to Boston and opened a select school, and also edited the "Medical and Agricultural Register." He settled in Mount Vernon in 1813, resumed his practice, and revised his arithmetic, which was then published as "Adams's New Arithmetic." He also edited a newspaper called "The Telescope." In 1846 he settled in Keene, N. H., where he spent the remainder of his life. He was the author of many school-books, principally on mathematics. From 1838 till 1840 he served as a state senator, and he was for some time president of the New Hampshire Bible Society and also of the New Hampshire Medical Society. ADAMS, Edward, b. in Medford, Mass., 3 Feb., 1834; d. in Philadelphia, 25 Oct., 1877. He made his début 29 Aug., 1853, at the National theatre in Boston, acting Stephen in "The Hunchback." In November he appeared at the Howard Athenæum as Bernardo in "Hamlet," and thence he went to Philadelphia, where he appeared, 29 Sept., 1854, as Charles Woody in "The Soldier's Daughter."
He played also at the St. Charles theatre, Baltimore, where he achieved his first great success, about 1800. He appeared in Buffalo as Hamlet, and subsequently with Miss Kate Bateman and Mr. J. W. Wallack at the Winter Garden in New York; and afterward in all the principal cities in the United States as a star. In 1866 he returned to New York, and in Wallack's old theatre, the Broadway, played Robert Landry in the "Dead Heart," and Adrian de Tiligny in the "Heretic." At the opening of Booth's theatre, 3 Feb., 1867, he appeared as the great French stage-coachman Jago, Raphael, Rover, Claude Melnotte, and Enoch Arden, this last character becoming a great favorite. He appeared with Edwin Booth during the season of 1869-70 in several of Shakespeare's plays, then visited Australia, where his health failed, and, returning to San Francisco, received a generous benefit, 27 May, 1876, followed by others in New York, Philadelphia, Boston, and elsewhere. He possessed a voice of wonderful richness, strength, and melody, and was regarded as one of the best light comedians on the stage. His wife, a clever actress and graceful danceuse, retired from the stage several years ago.

ADAMS, Eliphei, clergyman, b. in Dedham, Mass., 26 March, 1730; d. New London, Conn., 4 Oct., 1753. He was the son of Rev. William Adams, the second minister of Dedham, Mass., was graduated at Harvard college in 1749, preached in various places without settlement for ten years, and in 1759 was ordained a Congregational minister in New London, Conn. He was a man of learning, and was an able divine, his discourses, of which several years is preserved in the "Massachusetts Historical Collection," iv. 1. Having become interested in the welfare of the Indians in the region, he acquired their language. As a preacher he was popular, and various of his sermons were delivered before bodies educational and political. Many of them were published, the principal ones being, one on the death of Rev. James Noyes, of Stonington, 1760; election sermons, 1761 and 1763; a discourse occasioned by a storm, 1771; Thanksgiving sermon, 1781; on the death of Gov. Saltonstall, 1784; on the ordination of Rev. William Gager, 1793; on the ordination of Thos. Chap., 1796, and a discourse before young men, 1797.

ADAMS, Nathan, b. in Concord, N. H., 29 Aug., 1813; d. in Oxford, Pa., 3 Nov., 1871. He was graduated at Dartmouth college in 1836, and in 1840 became chaplain to the seamen at Havre, France. After ten years of assiduous labor, he made an extensive tour in Europe, and then returned to America. In 1844 he became pastor of the Pearl st. Congregational church in Nashua, N. H., whence in 1860 he went to Philadelphia and entered the service of the foreign evangelical society. Soon afterward he took charge of an enterprise that developed into the Broad st. church of that city. From 1867 till his death he was professor of theology in Lincoln university, near Oxford, Pa., and in 1870 he began editorial work on the "Christian Register." He was a large reader, and, according to the superior tones of the Amati and Stradivarius instruments were due to tradition, which made me seek the same kind of wood, and accordingly he searched the forests of northern Vermont and Canada for maple and pine, taking his wood from partially decayed trees, and constructed 140 violins, some of which were remarkable for their powerful and sweet tones. He was the author of "Theological Criticisms" (Montpelier, 1845).

ADAMS, Hannah, author, b. in Medfield, Mass., in 1755; d. in Brookline, 11 Nov., 1832. She was the first woman in America who made literature a profession. Showing at an early age a fondness for study, she acquired a fair knowledge of Greek and Latin from divinity students boarding with her father, who was himself a man of literary tastes. He became bankrupt when she was in her seventh year; and then for six years she was obliged to provide for themselves. During the war of the revolution she supported herself by making lace, and afterward by teaching. She was a woman of varied learning and indomitable perseverance. Her principal work was a "View of Religious Opinions" (1784), in which she gave a comprehensive survey of the various religions of the world. It was divided into: 1. An Alphabetical Compendium of the Denominations among Christians; 2. A Brief Account of Paganism, Mohammedanism, Judaism, and Deism; 3. An Account of the Different Religions of the World. The work passed through several editions, and was reprinted in England. In the fourth edition, she changed the title to "Dictionary of Religions," and also a "History of New England" (1799) and "Evidences of Christianity" (1801). Her writings brought her little pecuniary profit, yet they secured her many friends, among them the Abbé Grégoire, with whom she carried on an extensive correspondence, and also received his aid in preparing her "History of the Jews" (1819). She published a "Controversy with Dr. Morse," and in 1826 "Letters to the Gospels." She was simple in her manners and of rare modesty. A voyage from Boston to Nahant, about ten miles, was her only journey by water, and a trip to Chelsford her farthest by land. During the closing years of her life she enjoyed an annuity given by friends in Boston, and at her death was buried in Mount Auburn, the first person whose body was placed in that cemetery. Her autobiography, edited with additions by Mrs. Hannah F. Lee, was published in Boston in 1832.

ADAMS, Henry A., Jr., naval officer, b. in Pennsylvania in 1853. He entered the naval school at Annapolis, Md., in 1869, and in 1871 became a passed midshipman in 1854, and a master the following year, when, while attached to the screw of war "Levant," he took part in the engagement with the forts at the mouth of Canton river, China. He was commissioned as lieutenant in 1856, and was on the "Brooklyn" at the passage of forts St. Philip and Jackson, and the capture of New Orleans in April, 1862. Commissioned as lieutenant-commander and transferred to the North Atlantic blockading squadron, he participated in both the attacks on Fort Fisher, and received the encomium from Admiral Porter in his official despatch of 28 Jan., 1865. "I recommend the promotion of Lieut.-Com. H. A. Adams, without whose aid we should have been obliged to stand a still more than once. He volunteered for anything and everything." After the taking of Richmond he was one of the party that accompanied President Lincoln on his entry into the city. He was commissioned as commander in July, 1866, and was ordered to the store-ship "Guard," of the European station, and was afterward assigned to duty in 1870 in the navy-yard at Philadelphia.

ADAMS, Herbert Baxter, educator, b. in Amherst, Mass., 16 April, 1850. His early training
was in the Amherst schools and in Phillips Exeter academy. He was graduated at Amherst in 1872, and received the degree of Ph. B. at Heidelberg, Germany. He entered Johns Hopkins university from 1876 to 1878, associate from 1878 to 1883, and was appointed associate professor in 1883. He has been secretary of the American historical association since its foundation in 1884. In 1873 he went to Europe and devoted three years to travel and study. His principal writings are: "The Genesis of the New England Towns"; "Saxon Tithing-Men in America"; "Norman Castles in America"; "Village Communities"; "Methods of Historical Study," and "Maryland's Influence upon Land Cessions to the United States." All these papers are published in the "Johns Hopkins University Studies in Historical and Political Science," about 1881; edited by Prof. Adams, 4 vols. (Baltimore, 1882-86).

ADAMS, Isaac, inventor, b. in Rochester, N. H., in 1803; d. in Sandwich, N. H., 19 July, 1883. His education was limited. At an early age he was a factory operative, and afterward learned the trade of cabinet maker, but in 1821 went to Boston and began to work in the machine shop of a printing-office. He invented the printing-press that bears his name. It was introduced in 1830, and came into almost universal use, being still so popular as to warrant its manufacture in more than thirty different sizes. He improved it in 1834, making it substantially what it now is. The distinctive feature of his press is the stationary platen or bed with its form against a stationary platen. The sheets are fed by hand. He engaged with his brother Seth in the manufacture of these and other machines, and acquired a competency. He was a member of the Massachusetts senate in 1840. His last years were spent in retirement.

ADAMS, James Hopkins, statesman, b. in South Charlestown, R. I., 16 July, 1811; d. near Columbia, S. C., 27 July, 1881. He was graduated at Yale in 1831. In 1832, during the "nullification" excitement, he strongly opposed the nullifiers in the legislature. After serving in the state senate for several sessions, he was elected governor for the term of 1853-55. He was one of the state commissioners employed in the Southern states by the government. The resolution was passed, to treat with the president concerning the disposition of United States property in South Carolina.

ADAMS, Jasper, educator, b. in Medway, Mass., 27 Aug., 1733; d. in Charleston, S. C., 25 Oct., 1841. He was graduated at Brown university in 1753, and studied theology at Andover. In 1759 he was chosen professor of mathematics at Brown university, and during the same year was ordained in the Protestant Episcopal church. He became president of the college of Charleston in 1784, and of Geneva, N. Y. (now Hobart) college in 1826. Again, from 1828 to 1836, he was in charge of the college. He was also president of the New England Association of the University of Cambridge, and professor of geography, history, and ethics at West Point from 1838 to 1840, and subsequently was in charge of a seminary at Pendleton, S. C. He published sermons and addresses, and a "Moral Philosophy" (New York, 1838).

ADAMS, John, clergyman, b. 1704; d. in Cambridge, Mass., 18 Jan., 1740. He was graduated at Harvard in 1721, became pastor of a church in Newport, R. I., April 11, 1728, and afterward settled in Philadelphia. He was well known as an author and linguist, and is described as "master of many languages, and conversant with Greek, Latin, French, and Spanish authors." His poems (Boston, 1745) include a metrical version of the Book of Revelation. A satirical poem on the love of money was published separately.

ADAMS, John, second president of the United States, b. in that part of the town of Braintree, Mass., which has since been set off as the town of Quincy, 30 Oct., 1735; d. there, 4 July, 1826. His great-grandfather, Henry Adams, received a grant of about 40 acres of land in Braintree in 1636, and soon afterward emigrated from Devonshire, England, with his eight sons. John Adams, the subject of this sketch, was the eldest son of John Adams and Susanna Boylston, daughter of Peter Boylston, of Brookline. His father, one of the selection of Braintree and a deacon of the church, was a thrifty farmer, and at his death in 1790 his estate was appraised at £1,530 9s. 6d., which in those days might have been regarded as a moderate competence. It was the custom of the family to send the eldest son to college, and accordingly John was graduated at Harvard in 1755. Previous to 1773 the graduates of Harvard were arranged in lists, not alphabetically or in order of merit, but according to the social standing of their parents. In a class of twenty-four members John thus stood fourteenth. One of his classmates was John Wentworth, afterward royal governor of New Hampshire, and then of Nova Scotia. After taking his degree and while waiting to make his choice of a profession, Adams took charge of the grammar school at Worcester. It was the year of Braddock's defeat, when the smouldering fires of a century of rivalry between France and England broke out in a blaze of war which was forever to settle the question of the supremacy of the English race in the modern world. Adams took an intense interest in the struggle, and predicted that if we could only drive out "these turbulent Gallics," our numbers would in another century exceed those of the British, and all Europe would be unable to subdue us. In sending him to college his family seem to have hoped that he would become a clergyman; but he soon found himself too much of a free thinker to feel at home in the pulpit of that day. When accused of Arminianism, he cheerfully admitted it to the clergyman, and later in life he was sometimes called a Unitarian, but of dogmatic Christianity he seems to have had as little as Franklin or Jefferson. "Where do we find," he asks, "a precept in the gospel requiring ecclesiastical synods, convocations, councils, decrees, creeds, confessions, oaths, subscriptions, and whole cartloads of other trumpery that we find religion encumbered with in these days?" In this mood he turned from the ministry and began the study of law at Worcester. There was then a strong prejudice against lawyers in New England, but the profession threw hasty nevertheless, so litigious were the people. In 1758 Adams began the practice of his profession in Suffolk co., having
his residence in Braintree. In 1764 he was married to Abigail Smith, of Weymouth, a lady of social position higher than his own and endowed with most rare and admirable qualities of head and heart. In this same year the agitation over the proposed stamp act was begun, and on the burning questions raised by this ill-considered measure Adams had already taken sides. When James Otis in 1761 delivered his memorable argument against writs of assistance, John Adams was present in the court-room, and the next day he wrote to Capt. Preston and his seven soldiers when they were tried for murder. His friend and kinsman, Josiah Quincy, assisted him in this invidious task. The trial was judiciously postponed for seven months until the popular fury had abated. Preston and five soldiers were acquitted; the other two soldiers were found guilty of manslaughter, and were barbarously branded on the face with hot iron. The verdict seems to have been strictly just according to the evidence presented. For his services to his eight clients Mr. Adams received a fee of nineteen guineas, but never got so much as a word of thanks from the churlish Preston. An ordinary American politician would have shrunk from the odium of such a proceeding, and Adams went on to perform the same service for Thomas Jefferson. He was the most admirable friend to Washington, and the most invidious one to his political opponents. He was frequently accused of defending men who were raised to higher positions by his efforts. He had a way of saying things in a private letter that he would never dare to express in public or in argument. He was almost always a martyr to his own eloquence.

John Adams

The people refused to make use of stamps, and the business of the inferior courts was carried on without them, judges and lawyers agreeing to connive at the absence of the stamps. In the supreme court, however, where Thomas Hutchinson was chief justice, the judges refused to transact any business without stamps, and there was a serious interruption to business and the town of Boston addressed a memorial to the governor and council, praying that the supreme court might overlook the absence of stamps. John Adams was unexpectedly chosen, along with Jeremiah Gridley and James Otis, as counsel for the town, to argue the case in favor of the memorial. Adams delivered the opening argument, and took the decisive ground that the stamp act was ipso facto null and void, since it was a measure of taxation which the people of the colony had taken no share in passing. No such measure, he declared, could be held as binding in America, and parliament had no right to tax the colonies. The governor and council refused to act in the matter, but presided at the end of the stamp act put an end to the disturbance for a while. About this time Mr. Adams began writing articles for the Boston “Gazette.” Four of these articles, dealing with the constitutional rights of the people of New England, were afterward republished under the somewhat curious title of “An Essay on the Canon and Found of English Law.” After years of practice, Mr. Adams’s business had become quite extensive, and in 1768 he moved into Boston. The attorney-general of Massachusetts, Jonathan Sewall, now offered him the lucrative office of advocate-general in the court of admiralty.

This was intended to operate as an indirect bribe by putting Mr. Adams into a position in which he could not feel free to oppose the policy of the crown; such invidious methods were systematically pursued by Gov. Bernard, and after him by Hutchinson. But Mr. Adams was too wary to swallow the bait, and he stubbornly refused the pressing offer. In 1770 came the first in the series of great acts that made Mr. Adams’s career illustrious. In the midst of the terrible excitement aroused by the proceedings of the Stamp Act, the provincial congress of Massachusetts, the Province of Council and Conven, met at Concord, and Mr. Adams was chosen one of the representatives of the people. This revolutionary body had already seized the revenues of the colony, appointed a committee of safety, and begun to organize an army and collect arms and ammunition. During the following winter the views of the loyalist party were set forth with great ability and elo-
quence in a series of newspaper articles by Daniel Leonard, under the signature of "Massachusetts-
ns." He was answered most effectively by Mr. Ad-
ams, who wrote an article weekly in the Boston "Gazette" until the battle of 
Lexington. The last of these articles, which was 
actually in type in that wild week, was not 
published. The series, which has been reprinted in 
the 4th volume of Mr. Adams's works, contains a 
valuable review of the policy of Bernard and 
Hutchinson and a powerful statement of the rights of 
the colonies.

In the second continental congress, which assem-
bled on May 10, Mr. Adams played a very im-
portant part. Of all the delegates present he was 
probably the only one, except his cousin, Samuel 
Adams, who was convinced that matters had gone 
too far for the king. As there was a strong 
prejudice against Massachusetts on the part of 
the middle and southern colonies, it was desirable 
that her delegates should avoid all appearance of undue 
 haste in precipitating an armed conflict. Never-
thless, his influence was in favor of the arming 
of 18,000 New England men had been gathered to be-
siege the British in Boston were such as to make it 
seem advisable for the congress to adopt it as a 
continental army; and here John Adams did the 
second notable deed of his career. He proposed 
Washington for the chief command of this army, 
and thus, by putting Virginia in the foreground, 
succeeded in committing that great colony to a 
course of action calculated to end in independence. 
This move not only put the army in charge of the 
only commander capable of winning independence 
for the American people in the field, but its politi-
cal importance was great and obvious. Afterward 
in some dark moments of the revolutionary war, 
Mr. Adams seems almost to have regretted his part in 
this selection of a commander. He under-
stood little or nothing of military affairs, and was 
incapable of appreciating Washington's transcendent 
ability. The results of the war, however, justi-
fied in every respect his action in the second con-
tinental congress.

Mr. Adams sat as a member of the Massachusetts 
council, which declared the office of governor va-
cant and assumed executive authority. Under 
the new provisional government of Massachusetts, Mr. 
Adams was made chief justice; but never took his 
seat, as continental affairs more pressingly de-
manded his attention. He was always loquacious, 
often too ready to express his opinions, whether 
with tongue or pen, and this trait got him more 
than once into trouble, especially as he was inclined 
to be sharp and censorious. For John Dickinson, 
the leader of the moderate and tempering party 
in congress, who had just prevailed upon that body 
to send another petition to the king, he was more 
harmful than dangerous. He did not carry much 
respect, and he gave vent to some contemptuous expressions 
in a confidential letter, which was captured by the 
British and published. This led to a quarrel with 
Dickinson, and made Mr. Adams very unpopular 
in Philadelphia. When congress reassembled in 
the autumn, Mr. Adams, as member of a special commit-
te for framing a constitution, drew up a body of regu-
lations, which came to form the basis of the Ameri-
can naval code. The royal governor, Sir John 
 Wentworth, fled from New Hampshire about this 
time, and the people sought the advice of congress 
as to the form of government which it should seem 
most advisable to adopt. Similar applications 
presently came from South Carolina and Virginia. 
Mr. Adams prevailed upon congress to recommend 
to these colonies to form for themselves new gov-
ernments, and entirely upon popular suffrage; 
and about the same time he reprinted a small 
work entitled "Thoughts on Government, Applicable to 
The Present State of the American Colonies." 
By the spring of 1776 the popular feeling had become 
so strongly inclined toward independence that, on 
the 15th of May, Mr. Adams was able to carry 
through congress a resolution that all the colonies 
should be invited to form independent govern-
ments. In the preamble to this resolution it was 
declared that the American people could no longer 
conscientiously take oath to support any govern-
ment deriving its authority from the crown; all 
such governments must now be suppressed, since 
the King had threatened his protection from the 
habitants of the united colonies. Like the fa-
mous preamble to Townshend's act of 1767, this 
Adams preamble contained within itself the gist of 
the whole matter. To adopt it was to cross the 
Rubicon, and it gave rise to a hot debate in con-
gress. Against the opposition of most of the dele-
gates from the middle states the resolution was 
finally carried. Mr. Adams now said, "the Gordian 
knot is cut." Events came quickly to 
maturity. On the 7th of June the declaration 
of independence was moved by Richard Henry 
Lee, of Virginia, and seconded by John Adams. 
The motion was allowed to lie on the table for 
three weeks, in order to hear from the colonies of 
Connecticut, New Hampshire, New Jersey, Penn-
sylvania, Delaware, Maryland, and New York, 
which had not yet declared their position with re-
gard to independence. Meanwhile three commit-
tees were appointed, one on a declaration of inde-
pendence, a second on confederation, and a third 
on foreign relations; and Mr. Adams was a mem-
er of the first and third of these committees. 
On the 1st of July Mr. Lee's motion was taken up 
by congress sitting as a committee of the whole; and 
as Mr. Lee was absent, the task of defending it de-
volved upon Mr. Adams, who, as usual, was op-
posed by Dickinson. Adams's speech on that oc-
casion was probably the finest he ever delivered. 
Jefferson called it "the best article of the battle and 
indeed his labors in bringing about the decla-
ratin of independence must be considered as the 
third signal event of his career. 

On the 12th of June congress established a 
board of war and ordinance, with Mr. Adams for its 
chairman, and he discharged the arduous duties of 
this office until after the surrender of Burgoyne. 
After the battle of Long Island, Lord Howe sent 
the captured Gen. Sullivan to Philadelphia, solicit-
ing a conference with some of the members of 
the congress. Adams opposed the conference, and 
with characteristic petulance alluded to the unfor-
tunate Sullivan as a decoy duck who had much 
better have been shot in the battle than sent to 
such a business. Congress, however, consented to 
the conference, and Adams was chosen as a com-
missioner, along with Franklin and Rutledge. 
Toward the end of the year 1777 Mr. Adams was 
appointed to supersede Silas Deane as commissioner 
to France. He sailed 12 Feb., 1778, in the frigate 
b"Boston," and after a stormy passage, in which he 
can no little risk of capture by British cruisers, he 
landed at Bordeaux, and reached Paris on the 8th 
of April. Long before his arrival the alliance with 
France had been consummated. He found a 
wretched state of things in Paris, our three com-
missioners there at loggerheads, one of them dab-
bbling in the British funds and making a fortune
by privateering, while the public accounts were kept in the laxest manner. All sorts of agents were drawing bills upon the United States, and commanders of war vessels were setting up their claims for expenses and supplies that had never been ordered. Mr. Adams, whose habits of business were extremely strict and methodical, was shocked at this confusion, and he took hold of the matter with such vigor as to put an end to it. He also recommended that the representation of the United States to the French court be put into the hands of a single minister instead of three commissioners. As a result of this advice, Franklin was retained at Paris, Arthur Lee was sent to Madrid, and Adams, being left without any instructions, returned to America, reaching Boston 2 Aug., 1779. He came home with a curious theory of the decline of Great Britain, which he had learned in France, and which serves well to illustrate the mood in which France had undertaken to assist the United States. England, he said, "loses every day her consideration, and runs toward her ruin." Her riches, in which her power consisted, she has lost with us and never can regain. She resembles the melancholy spectacle of a great man dying. He is still at the root." Such absurd notions were quite commonly entertained at that time on the continent of Europe, and such calamities were seriously dreaded by many Englishman in the event of the success of the Americans.

Immediately on reaching home Mr. Adams was chosen delegate from the first Congress to confer with Vergennes concerning the late convention for the reconciliation of the relations between Massachusetts; but before the work of the convention was finished he was appointed commissioner to treat for peace with Great Britain, and sailed for France in the same French frigate in which he had come home. But Lord North's government was not ready to make peace, and, moreover, Count Vergennes continued to insist that the commissioners hold up their communications to Great Britain of the extent of his powers. During Adams's stay in Paris a mutual dislike and distrust grew up between himself and Vergennes. The latter feared that if negotiations were to begin between the British government and the United States, he might be made to appear as a traitor and round up the animals of the English race and thus wave off that decadence of England for which France was so eagerly hoping. On the other hand, Adams quite correctly believed that it was the intention of Vergennes to sacrifice the interests of the Americans, especially as concerned with the Newfoundland fisheries, and the territory between the Alleaghamies and the Mississippi, in favor of Spain, with which country France when was then in close alliance. Americans must always owe a debt of gratitude to Mr. Adams for the clear-sightedness with which he thus read the designs of Vergennes and estimated at its true value the purely selfish interest of France in behalf of the United States. This clearness of intellect and statesmanship was thus put to the test of the event of the British evacuation of Boston in March, 1775, and had thrown down the glove of defiance to George III, on the great day of the Boston tea party. When he explained that he was only a cousin of that grand and picturesque personage, he found that fashionable society thenceforth took less interest in him.

In the summer of 1780 Mr. Adams was charged by congress with the business of negotiating a Dutch loan. In order to give the good people of Holland some correct ideas as to American affairs, he published a number of articles in the Leyden "Gazette" and in a magazine entitled "La politique hollandaise"; also "Twenty-six Letters upon the treaties between the United States of America," now reprinted in the 7th volume of his works. Soon after Adams's arrival in Holland, England declared war against the Dutch, ostensibly because of a proposed treaty of commerce with the United States in which the burgomaster of Amsterdam was implicated with Henry Laurens, but really because Holland had joined the league headed by the empress Catherine of Russia, designed to protect the commerce of neutral nations and known as the armed neutrality. Laurens had been sent out by congress as minister to Holland; but, as he had been captured by a British cruiser and taken to the tower of London, Mr. Adams was appointed minister in his place. His first duty was to sign the Dutch loan with the United States, and the articles of the armed neutrality. Before he had got any further, indeed before he had been recognized as minister by the Dutch government, he was called back to Paris, in July, 1781, in order to be ready to enter upon negotiations for peace with the British government. Russia and Austria had volunteered their services with the French, in George III, and the Americans; but Lord North's government rejected the offer, so that Mr. Adams had his journey for nothing, and presently went back to Holland. His first and most arduous task was to persuade the Dutch government to recognize him as minister from the independent United States. In this he was covertly opposed by Vergennes, who wished the Americans to be exclusively dependent upon France, and to have no other friendships or alliances. From first to last the aid extended by France to the Americans in the revolutionary war was purely selfish. That despotic government wished no good to a people struggling to preserve the immemorial principles of English liberty, but wished them to be supplanted by the despotism of France. It was to extort just enough aid to us to enable us to prolong the war, so that colonies and mother country might alike be weakened. When he pretended to be the disinterested friend of the Americans, he professed to be under the influence of sentiments that he did not really feel; and he thus succeeded in winning from congress a confidence to which he was in no wise entitled. But he could not hoodwink John Adams, who wrote home that the duke de la Vauguyon, the French ambassador at the Hague, was doing everything in his power to obstruct the progress of the negotiations; and in this, Adams correctly inferred, he was acting under secret instructions from Vergennes. As a diplomatist Adams was in no wise equal to the occasion; he introduced new and strange methods of warfare, which disconcerted the perfidions intrigues of the old school, of which Vergennes and Talleyrand were typical examples. Instead of beating about the bush and seeking to foil trickery by trickery (a business in which the wily Frenchman would doubtless have managed more than his match), he went straight to the duke de la Vauguyon and bluntly told him that he saw plainly what he was up to, and that it was of no use, since "no advice of his or of the count de Vergennes, nor even a requisition from the king, should re-
strain me." The duke said that Adams meant exactly what he said, and, finding that it was useless to oppose the negotiations, "fell in with me, in order to give the air of French influence" to them. Events worked steadily and rapidly in Adams's favor. The minister at Paris had raised the wrath of the Dutch against Great Britain to fever heat. In November came tidings of the surrender of Lord Cornwallis. By this time Adams had published so many articles as to have given the Dutch some idea as to what sort of people the Americans were. He had some months before presented a petition to the states general, asking them to recognize him as minister from an independent nation. With his wonted boldness he now demanded a plain and unambiguous answer to this petition, and followed up the demand by visiting the representatives of the several cities in person and arguing his case. As the reward of this, and Richard Oswald, a gentleman whom Lord Shelburne had sent to Paris for the purpose. One British ministry had already been wrecked through these negotiations, and affairs had dragged along slowly amid endless difficulties. The situation was one of the most complicated in the history of diplomacy. France was in alliance at once with Spain and Holland, and the United States, as it was, and fly in triumph over Sir Joseph Yorke and British pride. I shall look down upon the flagstaff with pleasure from the other world.

Mr. Adams had hardly time to finish this work when his presence was required in Paris. Negotiations for peace with Great Britain had begun some time before in conversations between Franklin and Richard Oswald, a gentleman whom Lord Shelburne had sent to Paris for the purpose. One British ministry had already been wrecked through these negotiations, and affairs had dragged along slowly amid endless difficulties. The situation was one of the most complicated in the history of diplomacy. France was in alliance at once with Spain and Holland, and the United States, as it was, and was extremely ready to make liberal concessions to them for the sake of thwarting the schemes of France. In the background stood George III., surly and irreconcilable, hoping that the negotiations would fail; and amid these difficulties they doubtless would have failed had not the parties by this time had a surfeit of bloodshed. The designs of the French government were first suspected by John Jay, soon after his arrival in Paris. He found that Vergennes was sending a secret emissary to Lord Shelburne under an assumed name; he ascertained that the right of the United States to the Mississippi valley was to be denied; and he got hold of a despatch from the French minister to Philadelphia, to Vergennes, opposing the American claim to the Newfoundland fisheries. As soon as Jay learned these facts he proceeded, without the knowledge of Franklin, to take steps toward a separate negotiation between Great Britain and the United States. When Adams arrived in Paris, Oct. 26, he coincided with Jay's views, and the two together overruled Franklin. Mr. Adams's behavior at this time was quite characteristic. It is said that he left Vergennes to learn of his arrival through the newspapers. It was certainly some time before he called upon him, and he took occasion, besides, to express his opinions about republics and monarchies in terms that curiously Frenchman thought very rude. Adams agreed with Jay that Vergennes should be kept as far as possible in the dark until everything was arranged. He thought that the negotiation with Great Britain went on separately. The annals of modern diplomacy have afforded few stranger spectacles. With the indispensable aid of France we had just got the better of England in fight, and now we proceeded amicably to divide territory and commercial privileges with the enemy, and, instead of the too friendly ally was virtually ignored. In this way the United States secured the Mississippi valley, and a share in the Newfoundland fisheries, not as a privilege but as a right, the latter result being mainly due to the persistence of Mr. Adams. The point upon which the British commissioners insisted most strongly was to have the American loyalists for the hardships they had suffered during the war; but this the American commissioners resolutely refused. The most they could be prevailed upon to allow was the insertion in the treaty of a clause to the effect that congress should recommend to the several state governments to reconsider their laws against the Tories and to give these unfortunate persons a chance to recover their property. In the treaty, as finally arranged, all the disputed points were settled in favor of the Americans; and, the United States being thus virtually detached from the alliance, the British government was enabled to turn a deaf ear to the demands of France and Spain for the surrender of Gibraltar. Vergennes was out of office, and a new one too friendly ally was virtually ignored. In this way the United States secured the Mississippi valley, and a share in the Newfoundland fisheries, not as a privilege but as a right, the latter result being mainly due to the persistence of Mr. Adams. The point upon which the British commissioners insisted most strongly was to have the American loyalists for the hardships they had suffered during the war; but this the American commissioners resolutely refused. The most they could be prevailed upon to allow was the insertion in the treaty of a clause to the effect that congress should recommend to the several state governments to reconsider their laws against the Tories and to give these unfortunate persons a chance to recover their property. In the treaty, as finally arranged, all the disputed points were settled in favor of the Americans; and, the United States being thus virtually detached from the alliance, the British government was enabled to turn a deaf ear to the demands of France and Spain for the surrender of Gibraltar. Vergennes was out of office, and a new one.
along with Franklin and Jay, to negotiate a commercial treaty with Great Britain. A sudden and violent fever prostrated him for several weeks, after which he visited London and Bath. Before he had fully recovered his health he learned that his presence was required in Holland. In those days, when we lived under the articles of confederation, and congress found it impossible to raise money enough to meet its current expenses, it was by no means unusual for the superintendent of finance to draw upon our foreign ministers to furnish them the means of drafts for cash. The practice was done again and again, when there was not the smallest ground for supposing that the minister upon whom the draft was made would have any funds wherewith to meet it. It was part of his duty as envoy to go and beg the money. Early in the winter Mr. Adams learned that drafts upon him had been presented to his bank in Amsterdam to the amount of more than a million florins. Less than half a million florins were on hand to meet these demands, and, unless something were done at once, the greater part of this paper would go back to America protested. Mr. Adams lost not a moment in starting for Holland, but he was delayed by a storm on his way from Boston to Liverpool, and it was only after fifty-four days of difficulty and danger that he reached Amsterdam. The bankers had contrived to keep the drafts from going to protest, but news of the bickerings between the thirteen states reached Holland. It was believed that the new nation was going to pieces, and the regency of Amsterdam had no money to lend. And the condition of the British government was not regarded as valid security for a sum equivalent to about $800,000. Adams was obliged to apply to professional usurers, from whom, after more humiliating perplexity, he succeeded in obtaining a loan at exorbitant interest. In the meantime he had been appointed commissioner, along with Franklin and Jefferson, for the general purpose of negotiating commercial treaties with foreign powers. As his return to America was thus indefinitely postponed, he sent for his wife, with their only daughter and youngest son, to come and join him in France, where the two elder sons were already with him. In the summer of 1784 the family was thus re-united, and began house-keeping in a way new to them. His new application of the British government for a loan of money to purchase the offices of trade of Prussia, but, before it was ready to be signed, Mr. Adams was appointed minister to the court of St. James, and arrived in London in May, 1785. He was at first politely received by George III., upon whom his bluff and fearless dignity of manner made a considerable impression. His stay in England was, however, far from pleasant. The king came to treat him with coldness, sometimes with rudeness, and the royal example was followed by fashionable society. The American government was losing credit at home and abroad. It was unable to fulfil its treaty engagements as to the payment of private debts due to British creditors, and as to the proceeds of the capture of the English vessel under the Articles of the British government in retaliation, refused to surrender the western posts of Ogdensburg, Oswego, Niagara, Erie, Sandusky, Detroit, and Mackinaw, which by the treaty were to be promptly given up to the United States. Still more, it refused to make any treaty of commerce with the United States, and neglected to send any minister to represent Great Britain in this country. It was generally supposed in Europe that the American government would presently come to an end in general anarchy and bloodshed; and it was believed by George III. and the narrow-minded politicians, such as Lord Sheffield, upon whose cooperation he relied, that, if sufficient obstacles could be thrown in the way of American commerce to cause serious distress in this country, the United States would repent of their independence and come straggling back, one after another, to their old allegiance. Under such circumstances it was impossible for Mr. Adams to accomplish much as minister in England. During his stay there he wrote his "Defence of the American Constitution," which subjected him at home to ridiculous charges of being an anti-republican. The object of the book was to set forth the advantages of a division of the powers of government, and especially of the legislative body, as opposed to the scheme of a single legislative chamber, which was advocated by many writers on the continent of Europe. The argument is enounced by needlessly long and sometimes hardly relevant discussions on the history of the Italian republics.

Finding the British government utterly stubborn and impracticable, Mr. Adams asked to be recalled, and his request was granted in February, 1788. For the "patriotism, perseverance, integrity, ability, and conduct" which had distinguished him at home and abroad he received the public thanks of congress. He had no sooner reached home than he was elected a delegate from Massachusetts to the moribund continental congress, but that body expired before he had taken his seat in it. During the summer the ratification of the new constitution was so far completed that it could be put into operation, and public attention was absorbed in the work of organizing the new government. As Washington was unanimously selected for the office of president, it was natural that the vice-president should be taken from Massachusetts. The candidates for the presidency and vice-presidency were voted for without any separate specification, the second ballot falling to the candidate who obtained the second highest number of votes in the electoral college. Of the 69 electoral votes, all were registered for Washington, 34 for John Adams, who stood second on the list; the other 35 votes were scattered among a number of candidates. Adams was somewhat chagrined at this marked preference shown for Washington. His chief fault was his success in the British ministry, which he was much better fitted by temperament and training to appreciate the kind of work that he had himself done than the military work by which Washington had won independence for the United States. He never could quite understand how or why the services rendered by Washington were so much more important than his own. The office of vice-president was then more highly esteemed than it afterward came to be, but it was hardly suited to a man of Mr. Adams's vigorous and aggressive temper. In one respect, however, he performed a more important part while holding that office than any of his successors. In the dark and uncertain days of 1789, he and Congress were the only advocates of the vigorous measures by which Washington's administration was seeking to reestablish American credit and enlist the conservative interests of the wealthier citizens in behalf of the stability of the government. These measures were for the most part opposed by the persons who were rapidly becoming organized under the leadership of the republican party, the opposition being mainly due to dread of the possible evil consequences that might flow from too great an increase of power in the federal government. In these debates the senate was very
evenly divided, and Mr. Adams, as presiding officer of that body, was often enabled to decide the question by his casting vote. In the first congress following the election, Adams made some notable speeches, in which he answered questions of vital importance to the whole subsequent history of the American people, and on all these occasions he supported Washington's policy. During Washington's administration grew up the division into the two great parties which have remained to this day in American politics—the one known as federalist, afterward as whig, then as republican; the other known at first as republican and afterward as democratic. John Adams was by his mental and moral constitution a federalist. He believed in strong government. To the opposite party he seemed much less a democrat than an aristocrat. In one of his essays he said, "All the federalist leaders argued this feeling more or less, and it presently became the chief source of weakness to the party. The disagreement between John Adams and Jefferson was first brought into prominence by the breaking out of the French revolution. Mr. Adams expected little or no good from this movement, which was like the rest seeming at first to个人 merit, and should not be withheld by any artificial enactments from the lowliest of men, to whom the chance of an illustrious career ought to be just as much open as to the "well-born." At the same time John Adams differed from Jefferson and from his cousin, Samuel Adams, in distrusting the masses of people. These views gave great umbrage to ever except in being called a revolution. He set forth his views on this subject in his "Discourses on Davila," which were published in a Philadelphia newspaper. Taking as his text Davila's history of the civil wars in France in the 16th century, he argued powerfully that a pure democracy was not the best form of government, but that a certain mixture of the aristocratic and monarchial elements was necessary to the permanent maintenance of free government. Such a mixture really exists in the constitution of the United States, and, in the opinion of many able thinkers, constitutes its peculiar excellence and the best guarantee of its stability. These views gave great umbrage to the extreme democrats, and in the election of 1792 they set up George Clinton, of New York, as a rival candidate for the vice-presidency; but when the votes were counted Adams had 77, Clinton 50, Jefferson 4, and Aaron Burr 1. During this administration Adams, by his casting vote, defeated the attempt of the republicans to bulk Jay's mission to France. Adams to Washington in admiration for the heroic strength of purpose with which he pursued his policy of neutrality amid the furious efforts of political partisans to drag the United States into a rash and desperate armed struggle in support either of France or of England.

In 1796, as Washington refused to serve for a third term, Mr. Adams seemed clearly marked out as federalist candidate for the presidency. Hamilton and Jay were in a certain sense his rivals; but Jay was for the moment unpopular because of the famous treaty that he had lately negotiated with England, and Hamilton, although the ablest man in the federalist party, was still not so conspicuous in the ranks of the masses of voters as Adams, who besides was sure to have the support of the indispensable New England vote. Having decided upon Adams as first candidate, it seemed desirable to take the other from a southern state, and the choice fell upon Thomas Pinckney, of South Carolina, a younger brother of Charles Pinckney, upon whom the opposite party was clearly united. Should Adams and Pinckney receive an exactly equal number of votes, it would remain for a federalist congress to decide which should be president. The result of the election showed 71 votes for John Adams, 68 for Jefferson, 59 for Pinckney, 50 for Burr, 15 for Samuel Adams, and 9 for others, and the elections were held in voting for Washington. When it appeared that Adams had only three more votes than Jefferson, who secured the second place instead of Pinckney, it seemed on the surface as if Hamilton's advice had been sound. But from the outset it had been clear (and no one knew it better than Washington) that several southern federalists would withhold their votes from Adams in order to give the presidency to Pinckney, always supposing that the New England voters could be depended upon to vote equally for both. The purpose of Hamilton's advice was to make Pinckney president and Adams vice-president, in opposition to the wishes of their party. This purpose was expected in New England, and while some of the southern federalists voted for Pinckney and Jefferson, eighteen New Englanders, in voting for Adams, withheld their votes from Pinckney. The result was the election of a federalist president with a republican vice-president. In case of the death, disability, or removal of the president, the administration could fall into the hands of the opposite party. Clearly a mode of election that presented such temptations to intrigue, and left so much to accident, was vicious and could not last long. These proceedings gave rise to a violent feud between John Adams and Alexander Hamilton, which ended in breaking up the federalist party, and has left
A furious debate ensued, which was interrupted by a motion from the federalist side, calling on the President to inform the public of the steps he had taken, or supposed he could have taken to avoid the war. Mr. Adams immediately sent in copies complete in everything except the letters X, Y, and Z, which were substituted for the names of Talleyrand’s emissaries. Hence these papers have ever since been known as the “X, Y, Z. despatches.” On the 8th of April the Senate voted to publish these despatches, and they aroused great excitement both in Europe and in America. The British government scattered them broadcast over Europe, to stir up indignation against France. In America a great storm of wrath seemed for the moment to have wrecked the republican party. Those who were not converted to federalism were for the moment silenced. From all quarters came up the outcry “Millions for defence: not one cent for tribute.” A few excellent frigates were built, the nucleus of the gallant little navy that was by and by to win such triumphs over England. An army was raised, and Washington was placed in command, with the rank of lieutenant-general. Gerry was recalled from France because he failed in showing less firmness than his colleagues, though indeed he had not done anything dishonorable. During this excitement the song of “Hail, Columbia” was published and became popular. On the 4th of July the effigy of Talleyrand, who had once been bishop of Autun, was arrayed in a cloak and burned publicly in the streets. But he was authorized to issue letters of marque and reprisal, and for a time war with France actually existed, though it was never declared. In February, 1799, Capt. Truxtun, in the frigate “Constitution,” defeated and captured the French frigate “L’Insurgente” near the island of St. Christopher. In February, 1800, the same gallant officer in a desperate battle destroyed the frigate “La Lutègnee,” which was much his superior in strength of armament. When the directory found that their silly and infamous policy was likely to drive the United States into alliance with Great Britain, they began to change their tactics. Talleyrand tried to claw out by disavowing his emissaries X, Y, and Z, and in the next American commercial treaty he had been imposed upon by irresponsible adventurers. He made overtures to Van Murray, the American minister at the Hague, tending toward reconciliation. Mr. Adams, while sharing the federalist indignation at the behavior of France, was too clear-headed not to see that the only safe policy for the United States was one of strict neutrality. He was resolutely determined to avoid war if possible, and to meet France half-way the moment she should show symptoms of a return to reason. His cabinet were so far under Hamilton’s influence that he could not rely upon them; indeed, he had good reason to suspect them of working against him. Accordingly, without consulting his colleagues except Rey, he transmitted the Senate the nomination of Van Murray as minister to France. This bold step precipitated the quarrel between Mr. Adams and his party, and during the year it grew fiercer and fiercer. He joined Ellsworth, of Connecticut, and Davie, of North Carolina, to Van Murray as commissioners, and awaited the assurance of Talleyrand that they would be properly received at Paris. On receiving this assurance, though it was couched in rather insolent language by the haughty Frenchman, the commissioners sailed Nov. 5. On reaching Paris, they found the directory overturned by Napoleon, with whom as first consul they succeeded in ad-
justing the difficulties. This French mission completed the split in the federalist party, and made Mr. Adams dismiss his cabinet and selected a new one. Another affair contributed largely to the downfall of the federalist party. In 1798, during the height of the popular fury against France, the federalists in congress presumed too much upon their strength, and passed the famous alien and sedition acts. By the first of these acts, aliens were rendered liable to summary banishment from the United States on the simplest pretexts. The second act overturned the constitutional amendment that forbids all infringement of freedom of speech and of the press, and both acts aroused more widespread indignation than any others that have ever passed in congress. They called forth from the southern republicans the famous Kentucky and Virginia resolutions, which were quickly followed by resolutions in language open to some latitude of interpretation, the right of a state to "nullify" or impede the execution of a law deemed unconstitutional.

In the election of 1800 the federalist votes were given to John Adams and Cotesworth Pinckney, and the republican votes to Jefferson and Burr. This was the occasion of the celebrated "bids" of Pinckney, and I for Jay, while Jefferson and Burr had each 73, and the election was thus thrown into the house of representatives. Mr. Adams took no part in the intrigues that followed. His last considerable public act, in appointing John Marshall to the chief justiceship of the United States, turned out to be of inestimable value to the country, and was worthy of a president of a different, and quite unworthy of such a man as John Adams, was the silly and puerile fit of rage in which he got up before daybreak of the 4th of March and started in his coach for Massachusetts, instead of waiting to see the inauguration of his successful rival. On several occasions John Adams's career shows as striking examples of the demoralizing effects of stupendous personal vanity, but on no occasion more strikingly than this. He went home with a feeling that he had been disgraced by his failure to secure a reflection. Yet in estimating his character we must not forget that in his resolute insistence upon the French mission of 1798 his motives were chiefly guided by the probable effect of his action upon his chances for re-election. He acted as a true patriot, ready to sacrifice himself for the welfare of his country, never regretted the act, and always maintained that it was the most meritorious of his life. "I desire," he said, "no other inscription over my grave-stone than this: Here lies John Adams, who took upon himself the responsibility of the peace with France in the year 1800." He was entirely right, as all disinterested writers now agree.

After so long and brilliant a career, he now passed a quarter of a century in his home in Quincy (as that part of Braintree was now called) in peaceful and happy seclusion, devoting himself to literary work relating to the history of his times. In 1820 the aged statesman was chosen delegate to the convention for revising the constitution of Massachusetts, and was a prominent advocate of the acknowledgment of the equal rights, political and religious, of others than so-called Christians. His friendship with Jefferson, which had been broken off by their political differences, was resumed in his old age, and an interesting correspondence was kept up between the two. As a writer of English, John Adams in many respects surpassed all his American contemporaries; his style was crisp, pungent, and vivacious. In person he was of middle height, vigorous, florid, and somewhat corpulent, quite like the typical John Bull. He was always truthful and outspoken, often vehement and brusque, vanity and loquacity, as he freely admitted, were his chief foibles. Without being quarrelsome, he had little or none of the tact that avoids quarrels; but he harbored no malice, and his anger, though violent, was short-lived. Among American public men there has been none more upright and honorable. He lived to see his son president of the United States, and died on the fiftieth anniversary of the declaration of independence, just half a century after the year of his age. His last words were, "Thomas Jefferson still survives." But by a remarkable coincidence, Jefferson had died a few hours earlier the same day. See "Life and Works of John Adams," by C. F. Adams (10 vols., Boston, 1850–56); "Life of John Adams," by J. Q. and C. F. Adams (2 vols., Philadelphia, 1849); "John Adams," by J. T. Morse, Jr. (Boston, 1885).

The portrait that forms the frontispiece of this volume is from a painting by Gilbert Stuart, which was executed while Mr. Adams was president and is now in the possession of his grandson. The one on page 16 was taken when he was a youth. The houses represented on page 15 are those in which President John Adams and his son John Quincy Adams were born.

**ADAMS, John**, educator, son of a revolutionary officer of the same name, b. in Canterbury, Conn., 18 Sept., 1772; d. 24 April, 1863. He was graduated at Yale in 1795, and taught for three years at the academy in his native town. In 1800 he became rector of Phillips Academy, N. J., academy, and in 1808 principal of Bacon academy, Colchester, Conn. In June, 1810, he was chosen principal of Phillips Andover academy, where he remained for twenty-three years, and, in addition to his regular duties, took part in the organization of several of the great charitable associations that have attained national importance. He resigned his office in 1833, and went to Illinois, where he established several hundred Sunday-schools. He received the degree of L.L. D. from Yale in 1854.

**ADAMS, John**, sailor, b. in Boston, Mass., 29 Nov., 1796; d. in Alston, Mass., 17 March, 1886. He was the last survivor of all who witnessed the victory gained by the American frigate "United States" over the French frigate "Comte de Duras" in the "Guerriere," 19 Aug., 1812. He was subsequently captured and confined in Dartmoor prison till the end of the war. For nearly half a century afterward he followed the sea, commanding some of the finest merchantmen that sailed from Boston.

**ADAMS, John**, soldier, b. in Tennessee in 1825; killed in the battle of Franklin, Tenn., 30 Nov., 1864. He was graduated at West Point in 1846, and joined the 1st dragoons. He was brevetted 1st lieutenant for gallantry at Santa Cruz de Rosales, Mexico, 16 March, 1848, after several years of frontier duty was promoted to 1st lieuten- chant, 9 Oct. 1853, and was appointed to be the governor of Minnesota with the rank of lieu-
tenant-colonel. He was promoted captain of 1st dragoons, 30 Nov., 1856, but resigned 31 May, 1861, and became a confederate brigadier-general.

ADAMS, John Folsom, clergyman, b. in Strath-

am, N. H., 23 May, 1790; d. in Greenland, N. H., 11 June, 1881. He began to preach in 1812, and joined the New England Methodist conference. He served as circuit rider in the backwoods of Maine, and so distinguished himself by zeal and ability that he was repeatedly assigned as presiding elder to important stations at Boston and Lynn, and the larger towns of eastern New England. In the anti-slavery agitation he took a prominent part in favor of emancipation, and on various occasions chanced to be a delegate at the general conference.

ADAMS, John Quincy, sixth president of the United States, b. in Braintree, Mass., 11 July, 1767; d. in Washington, D. C., 23 Feb., 1848. He was named for his mother's grandfather, John Quincy. In his eleventh year he accompanied his father to France, and was sent to school near Paris, where his father died in the. Effort to learn at once other studies soon became conspicuous. In the following year he returned to America, and back again to France with his father, whom, in August, 1780, he accompanied to Holland. After a few months at school in Amsterdam, he entered the university of Leyden. Two years afterward John Adams was sent to represent Massachusetts as ambassador to Russia, and the boy accompanied him as private secretary. After a stay of fourteen months, as Catharine's government refused to recognize Mr. Dana as minister, young Adams left St. Petersburg and travelled alone through Sweden, Denmark, and northern Germany to France, spending six months in the journey. Arriving in Paris in early 1782, he even before the negotiation of the treaty of peace between Great Britain and the United States, and was immediately set to work as secretary, and aided in drafting the papers that “dispersed all possible doubt of the independence of his country.” In 1785, when his father was appointed minister to England, he decided not to stay with him in the East, but to return to Massachusetts in order to complete his education at Harvard college. For an American career he believed an American education to be best fitted. Considering the immediate sacrifice of pleasure involved, it was a remarkably wise decision in a lad of eighteen. But Adams's character was already fully formed; he was what he remained throughout his life, a Puritan of the sternest and most uncompromising sort, who seemed to take a grim enjoyment in the performance of duty, especially when disagreeable. Returning home, he was graduated at Harvard college in 1788, and then studied law in the office of Theophilus Parsons, after whom chief justice of Massachusetts. In 1791 he was admitted to the bar, and among the first cases that came into his hands was the question of the commission, of which he was professed to be the ablest diplomat in the American service. In the fall of 1790 Mr. Adams accordingly took up his residence at the capital of Prussia. Shortly before this he had married Miss Louisa Johnson, a niece of Thomas Johnson, of Maryland. During his residence at Berlin Mr. Adams translated Wieland’s "Oberon" into English. In 1798 he was commissioned to negotiate a treaty with Sweden. In 1800 he made a journey through Silesia, and wrote an account of it, which was published in London and afterward translated into German and French. When Jefferson became president, Mr. Adams's mission terminated. He resumed the practice of law in Boston, but in 1802 was elected to the Massachusetts senate, and next always was chosen to the same office of the United States instead of Timothy Pickering. The federalist party was then rent in twain by the feud between the partisans of John Adams and those of Hamilton, and the reception of the younger Adams in the senate was far from flattering. Affairs grew worse when, at the next vacancy, Pickering was chosen to fill his uncle's place. The younger Adams was grossly and repeatedly insulted. Any motion he might make was sure to be rejected by the combined votes of republicans and Hamiltonians, though frequently the same motion, made soon afterward by somebody else, would be carried by a large majority. A committee of which he was a member would make a speech, and then adjourn, without knowing what was the time and place of meeting. At first Mr. Adams was subjected to such treatment merely because he was the son of his father; but presently he rendered himself more and more amenable to it by manifesting the same independence of party ties that had made his father so unpopular. Independence in politics has always been characteristic of the Adams family, and in none has this been more strongly marked than in John Quincy Adams. His first serious difference with the federalist party was occasioned by his qualified approval of Jefferson's purchase of Louisiana, a measure that was bitterly opposed and fiercely censured by nearly all the federalists, because it was feared it would open the way to the south. A much more serious difference arose somewhat later, on the question of the embargo. Questions of foreign rather than of domestic policy then furnished the burning subjects of contention in the United States. Our neutral commerce on the high seas, which had risen to very considerable proportions, was plundered in turn by England and France as "hostilities," and the practice of war by law, the tenets of which he relieved by writing occasional articles for the papers. Under the signature of "Publicola" he criticised some positions taken by Thomas Paine in his "Rights of Man"; and these articles, when republished in England, were generally ascribed to his father. In a further series of papers, signed "Marcellus," he attacked Warburton's "System of Political Philosophy," and in a third series, signed "Columbus," he discussed the extraordinary behavior of Citizen Genet, whom the Jacobins had sent over to browbeat the Americans into joining France in huring defiance at the world. These writings made him so conspicuous that in 1791 Washington appointed him minister to Holland, and two years later made an appointment transferring him to Portugal. Before he had started for the latter country his father became president of the United States and asked Washington's advice as to the propriety of promoting his own son by sending him to Berlin. Washington in strong terms recommended the promotion, declaring that in his opinion the young man would prove to be the ablest diplomat in the American service. In the fall of 1790 Mr. Adams accordingly took up his residence at the capital of Prussia. Shortly before this he had married Miss Louisa Johnson, a niece of Thomas Johnson, of Maryland. During his residence at Berlin Mr. Adams translated Wieland's "Oberon" into English. In 1798 he was commissioned to negotiate a treaty with Sweden. In 1800 he made a journey through Silesia, and wrote an account of it, which was published in London and afterward translated into German and French. When Jefferson became president, Mr. Adams's mission terminated. He resumed the practice of law in Boston, but in 1802 was elected to the Massachusetts senate, and next always was chosen to the same office of the United States instead of Timothy Pickering. The federalist party was then rent in twain by the feud between the partisans of John Adams and those of Hamilton, and the reception of the younger Adams in the senate was far from flattering. Affairs grew worse when, at the next vacancy, Pickering was chosen to fill his uncle's place. The younger Adams was grossly and repeatedly insulted. Any motion he might make was sure to be rejected by the combined votes of republicans and Hamiltonians, though frequently the same motion, made soon afterward by somebody else, would be carried by a large majority. A committee of which he was a member would make a speech, and then adjourn, without knowing what was the time and place of meeting. At first Mr. Adams was subjected to such treatment merely because he was the son of his father; but presently he rendered himself more and more amenable to it by manifesting the same independence of party ties that had made his father so unpopular. Independence in politics has always been characteristic of the Adams family, and in none has this been more strongly marked than in John Quincy Adams. His first serious difference with the federalist party was occasioned by his qualified approval of Jefferson's purchase of Louisiana, a measure that was bitterly opposed and fiercely censured by nearly all the federalists, because it was feared it would open the way to the south. A much more serious difference arose somewhat later, on the question of the embargo. Questions of foreign rather than of domestic policy then furnished the burning subjects of contention in the United States. J. Q. Adams.
daring to violate the edict. In December, 1807, Napoleon replied with the Milan decree, threatening to confiscate all ships bound to England, or which should have paid a fine to the British government or submitted to search at the hands of a British custom officer. All these decrees and orders were in flagrant violation of international law, and for a time they made the ocean a pandemonium of robbery and murder. Their effect upon American commerce was about the same as if both England and France had declared war against the United States. Their natural and proper effect upon the American people was accepted as an additional and immediate declaration of war against both England and France, save that our military weakness was then too manifest to make such a course anything but ridiculous. Between the animosities of the two bullies by whom we were thus tormented there was little to choose; but in two respects England's capacity to administer the punishment was increased. In the first place, she had more ships engaged in this highway than France, and stronger ones; in the second place, owing to the difficulty of distinguishing between Americans and Englishmen, she was able to add the crowning wickedness of kidnapping American seamen. The wrath of the Americans was not so much directed against England than against France; and never perhaps did that war have so waxed stronger than in the summer of 1807, when, in full sight of the American coast, the "Leopard" fired upon the "Chesapeake," killed and wounded several of her crew, and violently carried away four of them. For this outrage the commission of the "Leopard" was promoted in the British service. In spite of all the meannesses, the hatred of the federalists for France was so great that they were ready to put up with insult added to injury rather than attack the power that was warring against Napoleon. So far did these feelings carry them that Mr. John Lowell, a prominent federalist of Boston, was actually heard to declare in a public meeting that the "Leopard" was justified in committing the outrage. This was the cause, he afterward said, "which alienated me from that day and forever from the councils of the federal party." He tried to persuade the federalists of Boston to hold a meeting and pledge their support to the government in any measures, however serious, that might be proposed in order to prevent the insolence of Great Britain. But these gentlemen were too far blinded by party feeling to respond to the call; whereupon Mr. Adams attended a republican meeting, at which he was put upon a committee to draft and report such resolutions. Presently the federalists bowed to the storm of popular enthusiasm and held their meeting at which Mr. Adams, was also present and drafted resolutions. For his share in the proceedings of the republicans it was threatened that he should "have his head taken off for apostasy." It was never of much use to threaten Mr. Adams. An extra session of congress was called in October to consider what was to be done. Mr. Jefferson's government was averse to war, for which the country was unprepared, and it was thought that somewhat milder measures might harass England until she would submit to reason. For a year and a half a non-importation act had been in force; but it had proved no more effective than the non-importation agreements of 1768 and 1774. Now an embargo was laid upon all the ships' cargoes, and no American merchant could have foreign trade. This measure was very doubtful; it was damaging ourselves in the hope of damaging the enemy. The greatest damage fell upon the maritime states of New England, and there the vials of federalist wrath were poured forth with terrible fury upon Mr. Jefferson and the embargo. But the full measure of their ferocity was reserved for Mr. Adams, who had actually been a member of the committee that reported the bill, and had given it his most earnest support. All the choicest epithets of abuse were showered upon him; few men in history have been more fiercely berated and reviled. His term of service in the senate was to expire on 3 March, 1809. In the preceding June the Massachusetts legislature chose Mr. Lloyd to succeed him, a proceeding that was intended and accepted as an effort to defeat the mandate of the people, and Mr. Lloyd was chosen to fill the remainder of his term. In the course of the next month the republicans of his congressional district wished to elect him to the house of representatives, but he refused. In 1806 Mr. Adams had been appointed professor of rhetoric and belles-lettres at Harvard, and in the interval of six months he had delivered lectures there, which were published in 1810, and for a time were held in esteem.

One of Mr. Madison's first acts on succeeding to the presidency in 1809 was to nominate Dr. James Madison minister to Russia. Since Mr. Dana's failure to secure recognition in 1782, the United States had no minister at St. Petersburg, and the ministerial position was not regarded as important. The czar, at first, declined to concur in creating the mission, but a few months later the objects were yielded, and Mr. Madison's nomination was confirmed. He was very courteously received by Alexander I., and his four years and a half in Russia passed very pleasantly. His diary gives us a vivid account of the Napoleonic invasion and its disastrous ending. In the autumn of 1812 the czar offered his services as mediator between the United States and Great Britain. War had only been declared between these powers three months before, but the American government promptly accepted the proposal, and, in the height of the popular enthusiasm over the naval victories of September and October, a mission was formed to send stewards and Bayard to St. Petersburg to act as commissioners with Mr. Adams. The British government refused to accept the mediation of Russia, but proposed instead an independent negotiation, to which the United States agreed, and the commissioners were directed to meet at Ghent. Much time was consumed in the negotiation of the terms of defeating England again and again on the sea, and suffering in return some humiliating reverses on land, until at last the commissioners met at Ghent, in August, 1814. Henry Clay and Jonathan Russel were added to the American commission, while England was represented by Lord Gambier, Dr. Jefferson, and Mr. Goulburn. After four months of bitter wrangling, from which no good result could have been expected, terms of peace were suddenly agreed upon in December. In warring off the British attempts to limit our rights in the fisheries Mr. Adams played an important part, as his father had done in 1782. The war had been a drawn game, neither side was decisively victorious, and the treaty apparently left things much as before. Nothing was explicitly done to end the pretensions of England to the right of search and the impressment of seamen, yet the naval victories of the United States had taught the British a lesson, and these pretensions were never renewed. The treaty was a great one, and it is said to have been the one that Lord Castlereagh had hoped to obtain some advantages, and Mr. Adams, for his share in it, was reviled by the London press in a tone which could not but be regarded as a compliment to his powers. After the conclusion of the treaty he visited Paris and wit-
nessed the return of Napoleon from Elba and the exciting events that followed up to the eve of Waterloo. Here his wife and children joined him, after a tedious journey from St. Petersburg, not without distress and peril by the way. By this time Mr. Adams had been appointed commissioner, with Clay and Gallatin, to negotiate a new commercial treaty with England. This treaty was completed on 13 July, 1815; but already, on 26 May, when Mr. Adams arrived in London, he had received the news of his appointment as minister to England. The series of double coincidences in the Adams family between missions to England and treaties with that power is curious. First John Adams is minister, just after his share in the treaty that concluded the revolutionary war, then his son, just after the treaty that concluded the war of 1812–15, and then the grandson is minister during the civil war and afterward takes part in the treaty that disposed of the Alabama question.

After an absence of eight years, John Quincy Adams was called back to his native land to serve as secretary of state under President Monroe. A new era in American politics was dawning. The war which had just been concluded has sometimes been called our second war of independence; certainly the year 1815, which saw the end of the long strife between France and England, marks an important era in American history. Our politics ceased to be concerned mainly with foreign affairs. So suddenly were men's bones of political contention taken away from them that Monroe's presidency is traditionally remembered as the "era of good feeling." So far as political parties were concerned, such an epithet is well applied; but as between prominent individuals struggling covertly to supplant one another, it was anything rather than an era of good feeling. Mr. Adams' principal achievement as secretary of state was the treaty with Spain, whereby Florida was ceded to the United States in consideration of $5,000,000, to be applied to the liquidation of outstanding claims of American merchants against Spain. By the same treaty the boundary between Louisiana and Mexico was established as running along the Sabine and Red rivers, the upper Arkansas, the crest of the Rocky mountains, and the 42d parallel. Mr. Adams defended the conduct of Gen. Jackson in invading Spanish Florida and hanging Arthurnot and Ambrister. He supported the policy of recognizing the independence of the revolted colonies of Spanish America, and he was the principal author of what is known as the "Monroe Doctrine," that the American continent is no longer open to colonization by European powers. His official report on weights and measures showed remarkable scientific knowledge. Toward the close of Monroe's first term came up the first great political question growing out of the purchase of Louisiana: Should Missouri be admitted to the union as a slave-state, and should slavery be allowed or prohibited in the vast territory beyond? After the Missouri compromise had passed through congress, it was submitted to President Monroe for his signature, two questions were laid before the cabinet. First, had congress the constitutional right to prohibit slavery in a territory? and, secondly, in prohibiting slavery "forever" in the territory north of Mason and Dixon's line, as prolonged beyond the Mississippian line in the Old Northwest, had congress included the district only so long as it should remain under territorial government, or did it apply to such states as might in future be formed from it? To the first question the cabinet replied unanimously in the affirmative. To the second question Mr. Adams replied that the term "forever" really meant forever; but all his colleagues replied that it only meant so long as the district in question should remain under territorial government. Here for the first time we see Mr. Adams taking that firm stand in opposition to slavery which hereafter was to make him so famous.

Mr. Monroe's second term of office had scarcely begun when the question of the succession came to be the focus of attention. Then Mr. Adams, Mr. Quincy Adams, secretary of state; William H. Crawford, secretary of the treasury; John C. Calhoun, secretary of war; and Henry Clay, speaker of the house of representatives. Shortly before the election Gen. Jackson's strength began to loom up as more formidable than the other competitors had hitherto been. In 1820 Adams was the most popular of the men in the domestic circle, outside of it he had few warm friends, but he seemed to have a talent for making enemies. When Edward Everett asked him if he was "determined to do nothing with a view to promote his future election to the presidency as the successor of Mr. Monroe," he replied: "This is one of the most pleasant duties of a man in the cabinet. This resolution he never swerved. He desired the presidency as much as any one who was ever chosen to that high office; but his nature was such that unless it should come to him without scheming of his own, and as the unsolicited expression of popular trust in him, all its value would be lost. Under the circumstances, it was a remarkable evidence of the respect felt for his lofty character and distinguished services that he should have obtained the presidency at all. The result of the election showed 99 votes for Jackson, 81 for Adams, 41 for Crawford, 37 for Clay. Mr. Calhoun, who had withdrawn from the contest for the presidency, received 182 votes for the vice-presidency, and was elected vice-president of the United States. Mr. Clay had been chosen to the house of representatives, and Mr. Clay now used his great influence in favor of Mr. Adams, who was forthwith elected. When Adams afterward made Clay his secretary of state, the disappointed partisans of Jackson pretended that there had been a bargain between the two, that Adams had secured Clay's assistance by promising him the first place in the cabinet, and thus, according to a usage that seemed to be establishing itself, placing him in the line of succession for the next presidency. The perplexity John Randolph characterized this supposed bargain as "a coalition between Bilil and Black
George, the Puritan and the blackleg." There never was a particle of foundation for this reckless charge, and it has long since been disapproved. The Federalist party had become extinct. In the course of John Quincy Adams's administration the new division of parties into Whigs and Democrats began to grow up, the Whigs favoring internal improvements, the national bank, and a high tariff on importations, while the Democrats opposed all such measures on the ground that they were incompatible with a strict construction of the constitution. In its relation to such questions Mr. Adams's administration was Whig, and thus arrayed against itself not only all the southern planters, but also the ship-owners of New England and the importers of New York. But a new and powerful tendency now came in to overwhelm such an administration as that of Adams. The so-called "spoils system" was already germinating, and the time had come when it could be put into operation. Mr. Adams would have nothing to do with such a system. He would not reward the men who worked for him, and he would not remove from office the men who most vigorously opposed him. He stood on his merits, asked no favors and granted none; and was, of course, the most independent president we have had since Washington. Jackson and his friends promised their supporters a share in the government offices, in which a "clean sweep" was to be made by turning out the presiding monarch. The result of the election of 1828 showed that for the time Jackson's method was altogether the more potent; since he obtained 178 electoral votes, against 83 for Adams.

The close of his career as president was marked by an incident that increased the odium in which Mr. Adams was held by so many of the old Federalist families of Boston. In the excitement of the election the newspapers devoted to Jackson swarmed with mischievous paragraphs designed to injure Adams's reputation. Among other things it was said that, in 1803, he had suspected some of the federalist leaders of entertaining a scheme for carrying New England out of the union, and, fearing this, had sent secret agents to the north of the embargo, and that in case of its success the seceded states would almost inevitably be driven into alliance with Great Britain, he communicated his suspicions to President Jefferson and other leading republicans. These tales, published by unscrupulous newspapers twenty years after the event, grossly distorted what Mr. Adams had actually said and done; and thirteen eminent Massachusetts federalists addressed to him an open letter, demanding that he should bring in a bill of particulars supported by evidence. Adams replied by stating the substance of what he had really said, but declining to mention names or to point out the circumstances upon which his suspicion had been based. In preserving this reticence he was actuated mainly by unwillingness to stir up a furors controversy unwholesome in which he was not likely to do no good. But his adversaries made the mistake of attributing his forbearance to dread of ill consequences to himself, a motive by which, it is safe to say, Mr. Adams was never influenced on any occasion whatever. So the thirteen gentlemen returned to the attack. Mr. Adams then wrote out a full statement of the case, completely vindicating himself, and bringing forward more than enough evidence to justify any such suspicions as he had entertained and guardedly stated. After finishing this pamphlet he concluded not to publish it, but left it among his papers. It has lately been published by Prof. Henry Adams, in his "Documents concerning the presidency of his father," and is one of the finest specimens of political writing to be found in the English language.

Although now an ex-president, Mr. Adams did not long remain in private life. The greatest part of his career still lay before him. Owing to the mysteries of the declining party, he had betrayed some of the secrets of the Masonic order, there was in some of the northern states a sudden and violent prejudice against the Freemasons and secret societies in general. An "anti-mason party" was formed, and by its votes Mr. Adams was, in 1831, elected to congress, where he remained, representing the first district of Massachusetts, until his death in 1848. He was nominated by the anti-masons for the governorship of Massachusetts, but was defeated in the legislature, there being no choice by the people. In congress he occupied a perfectly independent attitude. He was one of those who opposed President Jackson's high-handed treatment of the bank, but he supported the war-effort in his firm attitude toward the South Carolina nullifiers and toward France. In 1835, as the French government delayed in paying over the indemnity of $5,000,000 which had been agreed upon by the treaty of 1831 for plunder of American shipping in the Napoleonic wars, Jackson threatened, in case payment should be any longer deferred, to take the French minister of war, who had been arrested against French commerce. This bold policy, which was successful in obtaining the money, enlisted Mr. Adams's hearty support. He defended Jackson as he had defended Jefferson on the occasion of the embargo; and this time, as before, his course was disapproved in Massachusetts, and he lost a seat in the U.S. Senate. He had been chosen to that office by the state senate, but the lower house did not concur, and before the question was decided the news of his speech in favor of reprisals turned his supporters against him. He was thus left in the house of representatives more independent of party ties than ever, and was accordingly enabled to devote his energies to the aid of the anti-masons, whose cause, which thus far had been conspicuously upon the scene. At that time it was impossible for the opponents of slavery to effect much. The only way in which they could get their case before congress was by presenting petitions for the abolition of slavery in the District of Columbia. Unwilling to receive such petitions, or to allow any discussion on the subject beforehand, congress in 1836 enacted the cowardly "gag-rule," that "all petitions, memorials, resolutions, or papers relating in any way or to any extent whatsoever to the subject of slavery or the abolition of slavery, shall, without being either printed or referred, be laid upon the table; and that no further
action whatever shall be had thereon." After the
year and days had been ordered on this, when Mr. 
Adams's name was called he rose and said: "I
held the resolution to be a direct violation of the
constitution of the United States, the rules of this
house, and the rights of my constituents." The
house sought to drown his words with loud shrieks
and yells of "Order!" "Order!" but he raised his voice
to a shout and defiantly finished his sentence.
The rule was adopted by a vote of 117 to 56, but it
did not stop him from good to endurable peace and
tolerance. They had put themselves in an untenable position,
and furnished Mr. Adams with a powerful weapon
which he used against them without mercy. As a
parliamentary debater he has had few if any su-
periors; in knowledge and dexterity there was no
one in the house who could be compared with him;
he was always master of himself, even at the white
heat of anger to which he often rose; he was terri-
ble in inventive, matchless at repartee, and insensi-
tible to fear. A single-handed fight against all the
slave-holders in the house was something upon
which he was always ready to enter, and he usually
came off with the last word. Though the vitupera-
tive vocabulary of the English language seemed
inadequate to convey his thoughts, the language
which the pro-slavery party regarded him, though
he was more than once threatened with assassina-
tion, nevertheless his dauntless bearing and bound-
less resources compelled the respect of his bitterest
opponents, and members from the South, with true
chivalry, sometimes confessed it. Every session he
read his report and read upon it, the disgraceful
measure was rescinded in 1845. This part of Mr.
Adams's career consisted of a vast number of small incidents, which make a very in-
teresting and instructive chapter in American his-
tory, but can not well be epitomized. He came to
serve as the rallying-point in congress for the ever-
growing anti-slavery sentiment, and may be con-
garded, in a certain sense, as the first founder of the
new republican party. He seems to have been the
first to enunciate the doctrine upon which Mr. Lin-
coln afterward rested his great proclamation of
emancipation. In a speech in congress in 1836 he
said: "From the instant that your slave-holding
states become the theatre of war—civil, servile, or
foreign—constantly increasing that your state consti-
tution extend to interference with the insti-
tution of slavery in every way in which it can be
interfered with." As this principle was attacked
by the southern members, Mr. Adams from time to
time reiterated it, especially in his speech of 14
April, 1842, on the question of war with England
and Mexico, when he said: "Whether the war be
civil, servile, or foreign, I lay this down as the
law of nations: I say that the military authority
takes for the time the place of all municipal in-
itutions, slavery among the rest. Under that
state of things, so far from its being true that the
states where slavery exists have the exclusive man-
agement of the subject, not only the president of the
United States, but the commander of the army
has power to order the universal emancipation of
the slaves."

After the rescinding of the gag-rule Mr. Adams
spoke less frequently. In November, 1846, he had
a shock of paralysis, which kept him at home four
months. On 21 Feb., 1848, while he was sitting in
the house of representatives, came the second shock.
He was carried into the speaker's room, where he
lay two days, and died on the 23d. His last words
were: "This is the last of earth; I am content." See
"Life and Public Services of John Quincy
Adams," by William H. Seward (Auburn, 1849);
"Life of John Quincy Adams," by Josiah Quincy
(Boston, 1858); "Diary of John Quincy Adams,"
edited by Charles F. Adams, 12 vols., 8vo (Phil-
delphia, 1874-75); and "John Quincy Adams," by
John T. Morse, Jr., (Boston, 1882).

The steel portrait of Mr. Adams, facing page 24,
is from a picture by Marchant, in the possession of
the New York Historical Society. The mansion
represented on page 26 is the Adams homestead at
Quincy, in which the presidents lived, now the
summer residence of the state and of John Quincy Adams.

ADAMS, Julius Walker, civil engineer, b. in
Boston, Mass., 18 Oct., 1812. He entered West
Point academy in 1836, but was never graduated.
After acting as assistant engineer of various rail-
roads, from 1832 to 1841, he was at Cootichute
water-works, Boston, in 1846, and in the same year
became superintending engineer of the Erie rail-
way. He remained with that company for eight years,
and then he has been chief engineer of the city works
of Brooklyn, projector of the East River suspen-
sion bridge, and for six years consulting engineer
to the department of public works, New York. He
has been president of the American society of civil
engineers, and has published "Sewers and Drains,"
and "The Water-supply of Towns" (Boston, 1840),
Julius W., b. in Westfield, Mass., in April, 1810.
In Brooklyn, N. Y., 11 Nov., 1856, and in 1860 was engineer
of the water-works at New Haven, Conn. During
the civil war he was colonel of the 67th New York
cavalry, and was a member of the railroad
committee which the pro-slavery party regarded him, though
he was more than once threatened with assassinat-
ion, nevertheless his dauntless bearing and bound-
less resources compelled the respect of his bitterest
opponents, and members from the South, with true
chivalry, sometimes confessed it. Every session he
read his report and read upon it, the disgraceful
measure was rescinded in 1845. This part of Mr.
Adams's career consisted of a vast number of small incidents, which make a very in-
teresting and instructive chapter in American his-
tory, but can not well be epitomized. He came to
serve as the rallying-point in congress for the ever-
growing anti-slavery sentiment, and may be con-
garded, in a certain sense, as the first founder of the
new republican party. He seems to have been the
first to enunciate the doctrine upon which Mr. Lin-
coln afterward rested his great proclamation of
emancipation. In a speech in congress in 1836 he
said: "From the instant that your slave-holding
states become the theatre of war—civil, servile, or
foreign—constantly increasing that your state consti-
tution extend to interference with the insti-
tution of slavery in every way in which it can be
interfered with." As this principle was attacked
by the southern members, Mr. Adams from time to
time reiterated it, especially in his speech of 14
April, 1842, on the question of war with England
and Mexico, when he said: "Whether the war be
civil, servile, or foreign, I lay this down as the
law of nations: I say that the military authority
takes for the time the place of all municipal in-
itutions, slavery among the rest. Under that
state of things, so far from its being true that the
states where slavery exists have the exclusive man-
agement of the subject, not only the president of the
United States, but the commander of the army
has power to order the universal emancipation of
the slaves."

After the rescinding of the gag-rule Mr. Adams
spoke less frequently. In November, 1846, he had
a shock of paralysis, which kept him at home four
months. On 21 Feb., 1848, while he was sitting in
the house of representatives, came the second shock.
He was carried into the speaker's room, where he
lay two days, and died on the 23d. His last words
were: "This is the last of earth; I am content." See
"Life and Public Services of John Quincy
Adams," by William H. Seward (Auburn, 1849);
Knoxville, Tenn., and afterward in Natchez, where he settled in 1819. He was a member of the legislature in 1828, and was elected a U. S. senator from Mississippi to fill the vacancy that had been caused by the death of Thomas B. Reed, serving from 8 Feb. to 31 May, 1830.

ADAMS, Samuel, b. in Boston, Mass., 27 Sept., 1722; d. there, 2 Oct., 1803. Among the grandchildren of Henry Adams, the emigrant from Devonshire, were Joseph Adams, of Braintree, and John Adams, of Boston, a sea-captain. The former was grandfather of President John Adams; the latter was grandfather of Samuel Adams, the statesman. The second son of Capt. John Adams, b. 6 May, 1699, was named Samuel, and in 1713 married Mary Fi-]

father that the younger Samuel inherited the political tastes and aptitudes which, displayed amid the grand events of the revolution, were to make him on the whole the most illustrious citizen that Massachusetts has ever produced. Young Adams was educated first at the Boston Latin school, then at Harvard college, where he was graduated in 1740. Very little is known of his college life, except that he was noted as a diligent student. He was fond of quoting Greek and Latin, after the pedantic fashion of the time. In 1748, being then twenty-one years of age and a candidate for the master's degree, he chose as the subject for his Latin thesis the question, "Whether it be lawful to resist the supreme magistrate if the commonwealth cannot otherwise be preserved"; and this question he answered in the affirmative. History has not told us how this bold doctrine affected Gov. Shirley and the other officers of the crown who sat there on commencement day and listened to it. It was the wish of the elder Samuel that his son should become a clergyman; but the son had no taste for theology and preferred the law. The legal profession was a respectable one in old-fashioned New England; and after a short time Samuel yielded to his mother's objections and entered the counting-house of Thomas Cushing, a prominent merchant, father of an eminent revolutionary leader. Shortly afterward his father gave him $1,000 with which to set up in business for himself. He lent half of this to a friend, who never returned it, and lost the other half in bad bargains. Then he became, with his father in a brewery, but the business did not prosper. About this time the father lost the greater part of his fortune in a wildcat banking enterprise. In 1690, at the time of the disastrous expedition of Sir William Phips against Quebec, Massachusetts had issued paper money, with the inevitable result that there was a great fall in prices, with frequent and disastrous fluctuations. This led to complaints from British merchants trading to Massachusetts, and the governor was ordered by the board of trade to veto any further issue. A quarrel ensued between the governor and the legis-
ing most of the remarkable state-papers of that period of fierce agitation. In the controversies first with Gov. Bernard, then with his successor, Hutchinson, Samuel Adams was always foremost. On the passage of the Townshend acts in 1767, Adams wrote the petition of the Massachusetts legislature to the king, the letter of instructions to their agent in England, and the circular letter addressed to the other colonies, inviting their aid in the defence of the common rights of Americans. The king was especially enraged by this circular letter, and Gov. Bernard was directed to order the legislature to rescind it under penalty of instant dissolution. After several days' discussion the legislature held a vote to order the king's resolution to rescind. This obstinacy had much to do with the decision of the British government to send troops to Boston in the hope of overwhelming the people of that town. On the morning after the famous "massacre" of 5 March, 1770, Mr. Adams was appointed chairman of a committee to communicate the votes of the town-meetings. More than 5,000 persons were present at the town-meeting, which was held in the old South meeting-house, and all the neighboring streets werecrowded. Lieut.-Gov. Hutchinson, with the council, and Col. Dalrymple, commander of the two regiments, sat in the old state-house at the head of King street. When Adams read the resolution of the town-meeting that the soldiers should be removed to the castle in the harbor, Hutchinson at first disclaimed any authority in the matter; but Adams reminded him that as acting governor of Massachusetts he was commander-in-chief of all troops within the province. Hutchinson consulted a while with Dalrymple, and at length replied that the colonel was willing to go to the castle. The regiments appeared to acquiesce in the indignation of the people. The committee, led by Adams, returned to the church with this message, and as they proceeded through the crowded street, Adams, bowing to right and left, passed along the watchword, "Both regiments or none!" When the question was put to vote in the church, 5,000 persons voted for the regiments or none. Armed with this ultimatum, Adams returned to the state-house and warned Hutchinson that if he failed to remove both regiments before nightfall he did so at his peril. Hutchinson was as brave and as obstinate as Adams, but two regiments were powerless in presence of the angry crowd that filled Boston, and before sunset they were removed to the castle. These events were afterward known in parliment as the "Sam Adams regiments." In 1772 the government ventured upon a step that went further than anything that had yet been done toward driving Massachusetts into rebellion. It was ordered that the judges, holding their offices at the king's pleasure, should henceforth be paid by the legislature. This they did, which aimed directly at the independence of the judiciary, aroused intense indignation. The judges were threatened with imprisonment if they should dare to accept a penny from the crown. Mr. Adams now had recourse to a measure that organized the American revolution. The people of Boston, in turn, presented the king the letter of instructions to the legislature to decide what should be done about the judges' salaries. On his refusal, Adams proposed that the towns of Massachusetts should appoint "committees of correspondence" to consult with each other about the common welfare. Such a step was strictly legal, but it virtually created a revolutionary legislative body, which the governors would neither dissolve, nor prorogue. Within a few months eighty towns had chosen their commit- 
mittees of correspondence, and the system was in full operation. Hutchinson at first scoffed at it, for he did not see to what it was leading. The next spring Dabney Carr, of Virginia, moved that intercolonial committees of correspondence should be formed, and this was soon done. But one more step was needed. It was only necessary that the intercolonial committees should assemble in one place, and there would be a continental congress speaking in the name of the united colonies, and, if need be, superseding the royal governments. By such stages was formed the revolutionary government that declared the independence of the United States and administered the affairs of the new nation for eight years. It was the first step toward its construction, though the idea had been first suggested in 1765 by the great preacher Jonathan Mayhew. In order to provoke the colonies to assemble in a continental congress, it was only necessary that the British government should take the aggressive upon some issue in this matter. The wretchedness of the Massachusetts committees and the general approval of the country. In this bold act of defiance Samuel Adams was from first to last the leading spirit. He had been the first of American statesmen to come to the conclusion that independence was the only remedy for the troubles of the time, and since it was a step upward, and one without publicly avowing it. The "Boston tea-party" made war inevitable. In April, 1774, parliament retorted with the acts for closing the port of Boston and annulling the charter of Massachusetts. This alarmed all the colonies, and led to the first meeting of the continental congress. In this hall were the representatives from Massachusetts to take the lead, and the work was managed by Mr. Adams with his accustomed shrewdness and daring. When the legislature met at Salem, 17 June, 1774, in conformity to the new acts of parliament, he locked the door, put the key into his pocket, and carried through the measures for assembling a congress at Philadelphia in September. A Tory member, fearing an overreach, was allowed to go out, and ran straight to the governor with the news. The governor lost no time in drawing up the writ dissolving the legislature, but when his clerk reached the hall he found the door locked and could not serve the writ. When the business was accomplished the legislature adjourned and did not meet for a whole year. This was done in obedience to the sovereign authority of Great Britain. The acts of April were henceforth entirely disregarded in Massachusetts.
of the congress with prayer was opposed by John Jay, on the ground that Episcopalians, Congregationalists, and even Mr. Duéché himself, hardly expected to unite in formal worship. Then Samuel Adams got up and said, with perfect sincerity, that “he was no bigot and could hear a prayer from a gentleman of piety and virtue who was at the same time a friend to his country. He was a stranger in Philadelphia, but he had heard the Second Session of the Continental Congress. It was a politic move, for it pleased the Episcopalians, who were the dominant sect in New York, Virginia, and South Carolina; and it produced an excellent impression in Philadelphia, where Duéché was the most popular preacher that day. It was thought that the men of New England were not so stiff-necked as had been generally supposed, and there was a reaction of feeling in their favor.

Toward the end of the following winter Gen. Gage received peremptory orders from the ministry to arrest Samuel Adams and “his willing and ready cooperators.” The London was to be tried for treason. A London newspaper predicted that their heads would soon be exposed on Temple Bar. It was intended to seize them at Lexington on the morning of 19 April, but, forewarned by Paul Revere, they escaped to Woburn and made their way to Philadelphia in and thereby gained a hearing in Congress. For the next eight years Mr. Adams took an active and important part in the work of the congress. Probably no other man did so much as he to bring about the declaration of independence. He had a considerable share in framing the state constitution of Massachusetts adopted in 1780. After the close of the war he was twice in Europe, and of the federal government, through fear of creating a tyranny that might swallow up the local governments. Like Patrick Henry, R. H. Lee, and others who had been foremost in urging on the revolution, he was ranked among the anti-federalists. Unlike the two Virginians just mentioned, however, he did not actively oppose the national constitution of 1788, but did not give it his support. In the Massachusetts convention of 1788, for considering the federal constitution, he was by far the most influential member. For two weeks he sat in silence listening to the arguments of other members. Then he decided to support the constitution and urge its ratification unconditionally, but with a general understanding that Massachusetts would submit to the new congress sundry amendments equivalent in effect to a bill of rights. His decision carried the convention in favor of ratification by the narrow majority of 187 votes to 168 nays. But for this ratification on the part of Massachusetts the constitution would not have been adopted, and of all the great services rendered by Samuel Adams to his country, the ratification of the constitution, was the most conspicuous. "It was a most excellent example of Massachusetts in proposing amendments was followed by other states, and it was thus that the first ten amendments, declared in force Dec., 1791, originated. In 1789 Mr. Adams was chosen lieutenant-governor of Massachusetts, Hancock being governor. There were many who urged his claims for the vice-presidency under Washing-

But for the services of Mr. Adams, there would have been no permanent establishment of the army. He was a born soldier, a man of war, and in after life was always ready to fight. Dr. Adams distinguished himself by riding along the advanced line of combatants, and, under the fire of the enemy, dressing the wounds of Gen. Potter, who could not be removed from the spot where his fell, and, but for the action of Surgeon Adams, would have lost his life. At the close of the war Surgeon Adams received an invitation from a wealthy and well-known gentleman to accompany him on a tour of the northern states, and to have his health attended. But an application for leave of absence was refused by the war department, on the ground that his services could not be spared. Soon afterward he was ordered to Texas, where yellow fever was epidemic, and his last days were spent among the victims of the disease, of which he died. He was highly esteemed for his Christian character.

ADAMS, Seth, inventor, b. in Rochester, N. H., 13 April, 1807; d. in Newton, Mass., 7 Dec., 1873. He was apprenticed to a cabinet maker, and after he had attained his majority he removed to Boston, where he worked in a machine shop. In 1831 he established a business for the manufacture of machinery, and two years later he became interested
in the printing-press invented by his brother Isaac, and subsequently obtained the exclusive right of making it. In 1866 he enlarged his shops in order to produce the famous power presses lately invented by his brother, the interests of the two brothers were united, and the firm of I. & S. Adams was established, which continued until 1856. In 1849 he took charge of the Adams sugar refinery, which for many years was the largest but one of its kind in the United States. He accomplished a very large fortune, a portion of which he left for the establishment of the Adams nerve asylum in West Roxbury, Mass., for hypochondriacs. He also gave a considerable sum of money to Bowdoin college. For some time he was a member of the city council and of the board of public works. A massive monument has been erected to his memory in his native town.

ADAMS, Stephen, senator, b. in Franklin co., Tenn.; d. in Memphis, Tenn., 11 May, 1857. He was a member of the state senate of Tennessee, after ward studied law, and began practice in Mississippi, where he took a prominent part in politics. He was elected to the state house of representatives, was a member of the circuit court in 1847-5, and became a judge of the circuit court in 1848. In 1852, on the resignation of Jefferson Davis, who gave up his seat to become candidate for governor, he was chosen as a state-rights democrat to serve out the term in the U. S. senate, which expired in 1857.

ADAMS, William, clergyman, b. in Colechester, Vermont, 10 Mar., 1817; d. at Oranges, N. J., 31 Aug., 1880. His father was John Adams, I. L. D., principal of the Bacon academy at Colechester, whence he removed in 1810 to assume charge of the Phillips academy at Andover, Mass. His mother was Elizabeth Riple, a line descendant ofGov. Bradford. He was prepared for college at Andover and was graduated at Yale in 1837, counting among his classmates Horace Greeley, Henry Durant, Judges Edwards, Hogeboom, Gould, and Welch, and N. P. Willard. He studied for the ministry at Andover theological seminary, under Prof. Moses Stuart, on whom he delivered a memorial discourse in New York, 25 Jan., 1832. He was graduated in 1830, and in February, 1831, was ordained pastor of the evangelical Congregational church in Brighton, Mass., where he remained until April, 1834. In August, 1834, he took charge of the Central Presbyterian church in Broome street, N. Y. He was moderator of the new-school general assembly at Washington in 1859. The university of New York gave him the degree of D. D. in 1842, and Princeton college that of I. L. D. in 1869. In 1853 his congregation founded the Madison square Presbyterian church, whose pastorate he resigned in October, 1873, after nearly forty years of consecutive service in one church, to accept the presidency of the Union theological seminary in the city of New York, in connection with the professorship of sacred rhetoric and pastoral theology of the New York theological seminary. He had resided in New York for ten years, and was a member of the general assembly of the Presbyterian church of America to the general assembly of the Presbyterian church of Scotland, and to the Free church assembly. In 1877 he was a delegate to the general council of the Presbyterian church in Edinburgh, responding to the address of welcome by the lord provost of that city. Dr. Adams' chief characteristics were his deep religious feeling, his cheerful and catholicity: he abhorred dogma and sectarianism. It was natural, therefore, to find him, from 1869 to 1871, a leader of the new-school branch of the Presbyterian church, in the efforts to reunite the two divisions of that church into one body, and he was chosen to address the old-school assembly that met in New York in June, 1869, as the representative of the new-school branch. In 1870 he delivered the address of welcome to the foreign delegates to the evangelical alliance, which met in New York, 3 Oct., 1873, and the following passage therefrom shows his creed: "We meet to express and manifest our Christian unity. Divers are the names we bear both as to countries and churches—Christian, Catholic, Church, and Reformed, but we desire and intend to show that amid all this variety of form and circumstance there is a real unity of faith and life: believing, according to the familiar expression of our common Christian veneration, in one God, the Father Almighty, Maker of heaven and earth, and in one Lord Jesus Christ, the only begotten Son of God, begotten of the Father before all worlds, and of the same substance with the Father; light from light, true God from true God to close them at its final meeting in the Academy of Music. His last sermon was delivered 6 June, 1880, before the graduating class at West Point. He was a personal friend of Daniel Webster, who always attended his church when passing through New York. From a conference in his study, brought about by a sermon delivered on the duty of employers to their employees, sprang the Young Men's Christian Association of New York, and the many kindred associations. He was prominent in the council of the American Bible society, the American board of foreign missions, and the American tract society. He was president of the Presbyterian board of home missions. He was president of the New York institution for the instruction of the deaf and dumb, a class of unfortunates in whom he took great interest. He edited the works of Robert Hall (4 vols., New York, 1830), and was the author of "The Three Gardens: Eden, Gethsemane, and Paradise" (1859); a biographical sketch of Isaac Taylor, preface to the "Spirit of the Day and Helps to the Habit" (1865); "Conversations of Jesus Christ with Representative Men" (1868), and other works.

ADAMS, William, educator, b. in Monaghan, Ireland, 3 July, 1813; d. in Nashotah, Wis., 2 Jan., 1897. He entered Trinity, and became a scholar...
of the house in 1833. He read law and medicine each for a year, and was for a time with his uncle at Ballyhaise as an accountant. In 1838 he entered the General Theological Seminary in New York, graduating in 1841. He was one of the founders of Nashotah mission, afterward Nashotah theological seminary, in Wisconsin, where he went in September, 1841. During the following winter he contributed to an English publication an article on the church's duties to her emigrants, which attracted much attention. From the foundation of the seminary he was the professor of systematic divinity. Dr. Adams published "Mercy to Babes" (New York, 1847); "Christian Science" (Philadelphia, 1850); and "A New Treatise on Baptismal Regeneration" (New York, 1871), and contributed largely to periodical literature, writing principally on theological topics.

ADAMS, William Forbes, bishop, of the American Episcopal church, b. in Ireland, 2 Jan., 1833. He came to the United States at the age of eight, and was ordained deacon 15 Dec., 1859, and priest in July of the following year. While rector of a parish in Boston, he was nominated to the house of bishops, 2 Nov., 1871, and elected missionary bishop of New Mexico and Arizona. He was consecrated in St. Paul's church, New Orleans, 17 Jan., 1875, and entered upon his work: but, in consequence of physical infirmity, his resignation was offered and accepted, 15 Oct., 1877. He is now (1897) bishop of Easton, Maryland, where he was established in 1887.

ADAMS, William Taylor, author, b. in Providence, Mass., 30 July, 1822; d. in Boston, 27 March, 1897. He was for twenty years a teacher in the public schools of Boston, fourteen years a member of the school committee of Dorchester, and one year a member of the legislature. He graduated with the most of his class. His uncle, Henry Wadsworth Longfellow, was a warm friend of his. He began to publish in 1850, and he produced a thousand stories in newspapers, exclusive of his books. In earlier life he edited the "Student and Schoolmate," and in 1851 "Our Little Ones," but he was best known as an editor by his "Oliver Optic's Magazine for Boys and Girls." He was editor-in-chief of "The Connecticut Guardian Slave, or the Heir of Belleview," which had a large sale, and was followed by "In-doors and Out," a collection of stories. The "Riverdale Series" (6 vols.) for boys was completed in 1862. His other works, mainly in series, include "The Boat Club," "Woodville," "Young America Abroad," "Starry Flag," "Onward and Upward," "Yacht Club," and "Great Western." His published works comprise about one hundred volumes. He wrote two novels for older readers, "The Way of the World," and "Living Too Fast."

ADET, Pierre Auguste, French diplomatist, b. in Nevers in 1763; d. in 1822. He left the army and devoted himself to the study of chemistry, and afterward engaged in politics and became minister to the United States in 1795. In 1797 he broke off diplomatic relations, presenting the note of the Directory declaring that France would treat neutrals as they allowed themselves to be treated by the English. Before returning to his own country he issued an address to the American people, intended to influence them against the policy of their government.

ADLER, Felix, author, b. in Alzey, Germany, 13 Aug., 1851. He is the son of a Hebrew rabbi. He was graduated at Columbia college in 1870, and subsequently studied at Berlin and Heidelberg, obtaining the degree of Ph. D. After his return to the United States he was professor of Hebrew and oriental literature at Cornell university from 1874 to May, 1876, when he established a new religious society in New York, called the Society of Ethical culture, to which place he speaks regularly on Sundays. He published in 1877 a series of discourses expounding his views, under the name of "Creded and Deed," followed by a volume entitled "The Moral Instruction of Children" (New York, 1891).

ADLER, George J., philologist, b. in Germany in 1821; d. in New York, 24 Aug., 1868. He was brought to New York at the age of twelve, and was graduated at the university of New York in 1844, in which institution he was professor of German from 1846 till 1854. He compiled a German-and-English dictionary, the first edition of which appeared in New York in 1848, and also a German grammar and other books, and published a lecture entitled "Poetry of the Arabs of Spain" (New York, 1868); "Wilhelm von Humboldt's Linguistic Studies" (1868); and a translation, with notes, of Farniel's "History of Provençal Poetry." He was insane, with occasional lucid intervals, for the last eight years of his life, and died in Bloomington asylum.

ADRAIN, Robert, mathematician, b. in Carrickfergus, Ireland, 30 Sept., 1755; d. in New Brunswick, N. J., 10 Aug., 1843. He took part in the Irish rebellion of 1798, received a severe wound, and escaped to America. He taught school in New Jersey and Pennsylvania, contributed to scientific journals, and from 1810 to 1813 was professor of natural philosophy and mathematics in Rutgers college, then until 1825 in Columbia college, and from 1827 to 1834 was professor of mathematics in the university of Pennsylvania. He edited Hutton's "Mathematics," published essays on the figure and magnitude of the earth and on gravity, and was editor from 1825 to 1829 of the "Mathematical Diary."—His son, Garnett B., lawyer, b. in New York city, 29 Dec., 1816; d. in New Brunswick, N. J., 17 Aug., 1878. He was graduated at Rutgers college in 1833, and in 1857 was admitted to the bar. He was elected to congress from New Jersey in 1856, and reelected in 1858, serving in the house as chairman of the committee on engraving.

AGASSIZ, Alexander, natural philosopher, of Neuchâtel, Switzerland, 17 Dec., 1833. He is the only son of Louis Agassiz by his first wife, and he followed his father to the United States in 1849. His early education was received abroad, and after his arrival in this country he prepared for Harvard, graduating in 1855. Then he studied engineering at the Lawrence scientific school, where in 1857 he received the degree of B. S., after which he took a further course in the chemical department, and also taught in his father's school for young ladies. In 1859 he went to California as an assistant on the coast survey, and was engaged on the northwest boundary. He collected specimens for the museum at Cambridge, and visited the prin-
In 1860 he returned to Cambridge and became assistant in zoology at the museum, taking charge of it in 1865 during his father's absence in Brazil. In 1865 he began engaged in coal-mining in Pennsylvania, and during the following year in the copper mines of Peru and Chili, where he was engaged until 1869 as superintendent of the Cahuil and Hecla mines. He developed these deposits until they became the most successful copper mines in the world, and from the wealth they have brought to him he has made gifts to Harvard amounting to over $500,000. During 1869-70 he was engaged examining the museums and collections of England, France, Germany, Italy, and Scandinavia. On his return in 1870 he resumed his duties at the museum in Cambridge, of which he was made curator, on the death of his father in 1874, and remained as such until 1885, when he resigned, owing to ill health. During the summer of 1875 he visited the western coast of South America, examining the copper mines of Peru and Chili, and making an extended survey of Lake Titicaca and collecting for the Peabody museum a great number of Peruvian antiquities. He afterward went to Scotland to assist Sir Wyville Thompson in arranging the collections made on their Expedition as part of the "Challenger," of which he brought to this country. He wrote one of the final reports on the zoology of the expedition, that on Echinodermata. From 1876 to 1881 his winters were spent in deep-sea dredging expeditions in connection with the coast survey, the steamer "Blake" having been placed at his disposal for this purpose. Mr. Agassiz was a fellow of Harvard college till 1885, and has served as an overseer. He is a member of the national academy of sciences, of the American association for the advancement of science, being its vice-president during the Boston meeting of 1880, of the American academy of sciences, and of numerous other scientific societies of the country and Europe. His publications, in the form of pamphlets, reports, and contributions to scientific periodicals and the proceedings of societies, are very numerous, and are principally on subjects connected with marine zoology. Most of these are to be found in the bulletins and memoirs of the museum at Cambridge, which has been his home and the best authority in the world on certain forms of marine life." He is the author, with Mrs. Elizabeth C. Agassiz, of "Seaside Studies in Natural History" (Boston, 1866); of "Marine Animals of Massachusetts Bay" (1871), and of the fifth volume of "Contributions to the Natural History of the United States," left incomplete by his father.

AGASSIZ, Jean Louis Rudolphe, naturalist, b. in Motier, canton Fribourg, Switzerland, 28 May, 1809; d. in Cambridge, Mass., 14 Dec., 1873. His father was pastor of the Protestant parish of Motier, a profession which his forefathers had for six generations; his mother, Milie, Rose Mayor, was the daughter of a physician residing in Cudelin, canton de Fribourg. His first studies at home were directed by his mother, who was a woman of high endowments and rare culture. At the age of ten years he and his younger brother were sent to the gymnasia at Biel, in the neighboring canton of Bern; here he acquired the ancient and modern languages, which later became so valuable to him in the discoveries he made in the early years of his life. Agassiz showed a fondness for natural science, and in his boyhood days he began collecting specimens. His leisure time at the gymnasia was similarly occupied, and his first collection of fishes dates from this period. During the vacations spent at Orbe (Fribourg), whether his father had been transferred, he became intimate with a young clergyman named Fivaz, who encouraged his interest in natural history and led him to the active study of botany. He continued his education in the college of Geneva, where he was admitted to the residence of his parents. Thence he went to Heidelberg, where he devoted his principal attention to anatomy under the famous Tieleman, and in 1827 to Munich, where he came under the influence of Schelling, Oken, Martins, Döllinger, Wagler, Zuccarini, Pouchet, and von Kobell. Döllinger, especially, at whose house he occupied a room, recognized the high talent of his pupil, and fostered his long-cherished plan of devoting himself exclusively to zoology. While at Munich, Agassiz organized the club called the "Little Academy," and became its president. He was a member of the society that Born, Rudolphi, Michaeilis, Schimper, and Braun first disclosed their latest discoveries, and even Döllinger made his new ideas known there before they were published. Martins, then lately returned from Brazil, where he had been sent on a scientific exploring expedition, intrusted young Agassiz, on the death of Spix, with the description of the fishes that had been collected. This work, completed when he had scarcely reached his twenty-first year, was dedicated to Cuvier, and published in Latin (Munich, 1829). The brilliant accomplishment of so arduous an undertaking at once gained him a reputation as one of the first ichthyologists. While at Munich he was made an intimate of the young students who were continually visiting the museum, and those at the museum in Munich, as well as such other paleontological collections as were available in central Germany, were carefully studied. Meanwhile he had not neglected his medical studies, and in 1829 he received the doctor's degree in medicine from Munich, and in philosophy from Erlangen in 1830. His second great undertaking was the "Natural History of the Fresh-water Fishes of Europe," in the preparation of which he was assisted peculiarly by the publisher, Cotta, of Stuttgart. It was never completed, but was partially published in 1839-40. After receiving his degree, he spent some time in Vienna, attending the hospitals, and pursuing his studies of the fossil fishes. In 1839 he was made a liberal professor and curator of natural history in the museum of Grenoble, which was then under the direction of Professor Zuecarini. It was 1844 when he visited the United States for the first time, as a member of the scientific party accompanying the steamer "Atlantic." In 1846 he was examined and reported upon the geological and natural history of the Mississippi valley; and in 1847-48 he returned to the United States and spent two years (1851-2) in Paris. This city was then the great scientific centre of Europe, and its collections were the richest and most celebrated in the world. Many of the students, especially the specialists, were attracted to the capital, and formed part of the brilliant circle under the leadership of the distinguished Humboldt. Cuvier, the great French naturalist, received the young Agassiz with
enthusiasm. The valuable treasures of the Paris museum were at his service, and the material collected for years by Cuvier for his work on fishes was freely transferred to the young naturalist.

The development theory of Geoffroy, then recently advanced, was opposed by Cuvier with all the power of his science and detailed knowledge. Agassiz accepted the ideas of his master, and firmly adhered to them throughout his life, and in later years, when the development theory advanced by Darwin came into prominence, he was uncompromising in his efforts against its promulgation. Humboldt also became his firm friend and patron, aiding him materially in the publication of his work. Among his associates were Owen, Milne-Edwards, R. W. Chambers, and John Muir.

In 1832, shortly after the death of Cuvier, he returned to Switzerland and became professor of natural history in the college at Neuchâtel. His labors on the fossil fishes were gradually approaching completion, the first of the five quarto volumes, "Recherches sur les poissons fossiles," appearing in 1833 in Paris. Shortly afterwards Agassiz, probably Agassiz’s most important contribution to science, and forms, with Cuvier’s, the leading, and Johannes Müller’s works, the foundation of our present knowledge of fishes. In this book one thousand species were completely, and seven hundred partially, figured and described. At Neuchâtel he gathered around him a large number of pupils, and the little city became one of the chief seats of science in Switzerland. He created the natural history museum, and was the chief founder of the scientific society, which issued the first volume of its memoirs in 1835. During the summers frequent scientific excursions were made in the Jura and the Alps. These expeditions led to studies, and in 1837 he published his first "Études sur les glaciers," which gave the results of his observations during the eight preceding summers. He had erected a station on the middle of the Aar glacier at a height of 9,000 feet above the sea and twelve miles from any human habitation, and from this now celebrated Hôtel des Néiges he conducted these works. In 1847 he published his "Système glacier," in which he thoroughly discussed the chief phenomena of glaciers and more fully developed his views on their earlier extension. In the mean while he had also devoted considerable attention to the echinoderms, and in 1836 and 1857 published special memoirs on them. His monograph on living and fossil echinoderms, published in parts, was first issued in 1839; portions of this work were prepared by Desor and by Valentin. In 1834, in 1835, and in 1840, Agassiz visited England to obtain material for his work on fossil fishes, and as a result he published monographs on the "Fossil Fishes of the Upper Devonian," 1837, and on the "Fishes of the London Clay" (1845).

In 1846 he came to the United States, partly to make himself familiar with the geology and natural history of this country, in fulfillment of a mission suggested to the king of Prussia by Humboldt, and partly to deliver a series of lectures on "Comparative Embryology," at the Lowell institute, Boston. The lectures met with a most cordial reception, and by special request he delivered an additional course on glacial phenomena. He then visited New York, Philadelphia, Charleston, and other cities, in search of material for his report. In 1847 Supt. A. D. Bache placed at his disposal the use of the United States Exploration Vessel "Blake." This led to a scientific cruise along the coast of Massachusetts, and some years later (1850-7) to a more extended trip to the coral reefs of Florida. In this manner he became thoroughly familiar with the marine life along our shores. The liberality of this offer affording him such valuable facilities for the continuation of his studies, and the enthusiasm with which he was everywhere greeted, induced him to make the United States his home. The Prussian government released him from his scientific mission, and he accepted, in 1848, the chair of zoology and geology in the Lawrence scientific school at Cambridge, Mass., a professorship specially created for him by Mr. Lawrence. At Cambridge, as abroad, he attracted brilliant young men, enthusiasts in science, many of whom to-day are among the leading naturalists in this country. Of these, besides his son Alexander, may be mentioned Bicknese, Clark, Hartt, Hyatt, Lyman, Morse, Niles, Packard, Putnam, Schlieder, Shaler, Stimpson, Tenney, Verrill, Wilder, and Ward. He prepared during 1848, with Dr. A. A. Gould, "Principles of Zoology," a text-book for the use of schools and colleges. In the summer of the same year, with the provision of a exploring expedition to Lake Superior, and the results were published in a volume entitled "Lake Superior; its Physical Characteristics," etc. (1850).

In succeeding years he traversed the entire country, lecturing in all the larger cities and accumulating vast collections of specimens, which constituted the foundation of the museum in Cambridge. From 1851 to 1854 he was professor of comparative anatomy and zoology in the medical college in Charleston, S. C., and during this time he studied the marine animals of the southern coast, also visiting the adjoining states; but, as the climate did not agree with him, he returned to Cambridge in 1854 with a successful termination, by the publication of a fourth volume, the "Bibliographie Zoologique et Geologique," which he had begun in 1848 with H. E. Strickland. This work contains a full list of all the periodicals devoted to zoology and geology, and an alphabetical list of authors and their works in the same departments. This "Kommunikator Zoologicus," which appeared in 1842-16. Agassiz next began to collect material for the publication of a magnificent work to be called "Contributions to the Natural History of the United States." In 1857 the first volume appeared, containing an introduction his well-known "Evolution of the World." The question of development was considered in a manner directly in opposition to the now generally accepted theory of descent. Of this work, projected on a gigantic scale, only four volumes ever appeared during his life; the fifth, left incomplete, was issued by his son. His attention was then turned to his collections, which had accumulated so large a bulk, and, unclassified, were stored wherever available accommodation could be obtained. In June, 1859, the museum of comparative zoology was founded, with Agassiz as its curator, and until his death much of his time was devoted to the classification and arrangement of the specimens.

In 1865, his health having become somewhat impaired by continual work, he was enabled, by the liberality of Mr. Nathaniel Thayer, a Boston merchant, to visit Brazil. Here again he made great collections, which now enrich the museum at Cambridge, and a journal of his trip was published in 1867. He was appointed in 1868 a non-resident professor of the history of the earth, at Barnard college, New York, N. Y., and there delivered a course of lectures. In 1871, the coast survey, having occasion to send the new war steamer "Hassler" around
Cape Horn to operate on the Pacific coast, extend-
ed to Agassiz an invitation to make the voyage in
the interest of science. The expedition, with a
competent corps of assistants, sailed in December
and reached San Francisco late in August. Much
valuable scientific information was accumulated.
New facts concerning the glacial phenomena of
South America were obtained, careful observations
of the temperature of the water and deep-sea
soundings were regularly made, and great collec-
tions of fishes, reptiles, mollusks, and other spec-
imens of natural history were gathered, a large
portion of which were called "Systema Naturae"
Cambridge. The gift of Penikese island and
money for its endowment, by John Anderson,
of New York, in 1873, made possible the establish-
ment of the Penikese island school of natural
history. This summer school, affording oppor-
tunities for the study of specimens direct from nature
without the intervention of text-books, was the
accomplishment of a long-cherished project of
Agassiz's. The first season was enthusiastically
passed, and at its end the pupils bade farewell to
the master, who, a few months later, after a short
illness, died in Cambridge. His grave in Mt.
Auburn is marked by a boulder from the glacier
of the Aar, and shaded by pine-trees brought from
Sweden.
Agassiz received the degree of LL. D. from the
universities of Edinburgh and Dublin before he was
thirty years of age. In 1836 he was elected to
the French academy of sciences, and in the same
year he was made a fellow of the royal society
of London. He was also a member of nearly all the
learned and scientific societies of the United
States, he was a member of the American
association for the advancement of science, of
the American academy of arts and sciences, of
the Boston natural history society, and of many other
scientific organizations. He was also an original
member of the national academy of sciences.
In addition to the works already enumerated,
there appeared, under the title of "The Structure
of Animal Life" (Boston, 1852), a collection of
newspaper extracts of lectures delivered extempo-
ranously. This book was never revised by him,
and contains numerous errors. Agassiz also pub-
lished "Methods of Study in Natural History,
with a preliminary and historical sketch (Boston,
1866—76); and "Journey in Brazil" (Boston,
1868), in conjunction with Mrs. Elizabeth Cary
Agassiz, who has edited "Louis Agassiz: His Life
and Correspondence" (Boston, 1886). His Contri-
butions of scientific memoirs to transactions and
proceedings of various societies were numerous.
A complete list of them may be found in the cata-
logue of scientific papers published by the royal
society of London.
AGNEW, Cornelius Rea, physician, born in New
York city, 8 Aug., 1830; d. there, 18 April, 1888.
He was graduated at Columbia College in 1849,
studied medicine at the college of physicians and
surgeons, and received his degree in 1852. Dur-
ing the following year he was house surgeon, and
subsequently curator, at the New York hospital.
After studying in Europe, he was surgeon to the
New York eye and ear infirmary until 1864. In
1858 he was appointed surgeon-general of the
state of New York, and at the outbreak of the
civil war he became medical director of the New
York military hospitals, where he was attached
and he performed most efficient service. He was a
prominent member of the U. S. sanitary com-
mission, and much of its success must be attributed
to his labors. In 1868 he established an ophthalmic
clinic in the college of physicians and surgeons,
and during the following year he was elected clin-
ical professor of diseases of the eye and ear in the
same institution. He founded in 1868 the Brook-
lyn eye and ear hospital, and in 1869 the Man-
hattan eye and ear hospital. For actual years
he was one of the managers of the New York state
hospital for the insane, at Poughkeepsie. Dr.
Agnew exhibited considerable interest in the edu-
cational institutions of New York city. In 1859
he was elected a trustee of the public schools, and
subsequently he was president of the board. In
1870 he became a trustee of the Columbia college
of mines, and in 1874 became one of the trustees of the
college. In 1872 he was elected president of the State medical
society. He contributed numerous papers to the
current medical journals, most of which are de-
voted to diseases of the eye and ear, and he also
published brief monographs and a "Series of
American Clinical Lectures," edited by P. C. Se-
guin, M. D. (New York, 1855).
AGNEW, James, British soldier, killed in the
battle of Germantown, 4 Oct., 1777. He came to
Boston in the latter part of 1775, holding the rank
of lieutenant-colonel. He commanded a brigade in
1776, and was engaged at Brooklyn heights, in the
battle of Long Island, and at Brandywine, where
he was wounded.
AGRAMONTE, Ignacio, Cuban revolutionist,
born in Puerto Príncipe, Cuba, in 1844; d. 11 May,
1875. He studied law in Havana, and was ad-
mitted to the bar in 1867. When the insurrection
against Spanish rule broke out in the eastern part
of the island, he joined the Central American
Legion, and in February, 1869, he was ap-
pointed secretary to the provisional government of
the insurrectionists. He was also a member of the
Cuban congress, and one of the signers of the act
freeing the slaves in the island. Finally he took
the field, and held a commission as major-general
of the forces operating in the Camagüey district,
where he distinguished himself in many bloody
contests with the Spanish troops. He fell in the
battle of Jimanavita.
AGUADO, Pedro (ah-go-ah'-do), Spanish Fran-
ciscan monk, born in Valledonro, near Madrid,
in the 16th century. He travelled in northern
America, where he wrote an interesting book that was pub-
lished under the title of "Descubrimiento pacifica-
y poblacion de la provincia de Santa Marta y
Nuevo reino de Granada."
AGüERO, Joaquin de, Cuban revolutionist,
born in Puerto Príncipe, Cuba, in 1816; d. there 12
Aug., 1851. In 1843 he freed all his slaves. In
1851 he headed an insurrection against the Spanish
government, in the central part of the island, was
defeated after a desperate contest, and was cap-
tured and shot, together with his principal followers.
AGUEYNABA (ahg-wan-ah'-ba). 1. Sachem of
the island of Porto Rico when the Spaniards, under
command of Juan Ponce de Leon, took possession
of that part of the West Indies. He was friendly
to Ponce, and accompanied him in an expedition to
Santo Domingo. Soon after returning to his
native land he died, in 1510. II. Sachem, brother
of the preceding, whom he succeeded early in 1511.
He promoted rebellion among his fellow-Indians,
who attacked the Spaniards and killed many of
them. He was friendly to Ponce, and accompanied
him in an expedition fearing the result of a war, as they believed the
Europeans to be immortal; but he convinced them
of the contrary by having a young Spaniard kept
under water until dead, and then preserved until
marks of decomposition became visible. Thus encouraged, the natives rebelled, but they were defeated, and the colony was reunited.

AGUILLAR, Maria, Mexican author, b. in Atlixco, near Puebla, 3 March, 1665; d. 25 Feb., 1766. She entered the nunnerly of Santa Rosia, of Puebla, at the age of nineteen, and in 1740 was elected abbess of her convent. Her conventional name was Sor Maria Águeda de San Ignacio, and she was highly esteemed for her scholarship and zeal. She wrote several religious books, which were printed in Puebla and in the city of Mexico.

AGUIRRE, José María (ah-gee-rhe), Mexican lawyer, b. in the city of Mexico in 1778; d. in 1832. He was a priest, but the authorities gave him permission to practise law, which he had studied thoroughly. His extraordinary ability as a lawyer was such that, in fifty-two years of continuos practice at the bar, he only lost half a dozen cases. He distinguished himself specially in defending persons accused by the Inquisition.

AGUIRRE, Lope de, Spanish adventurer, b. in Oñate; d. in Venezuela in October, 1561. He was commissioned by the queen for Florida on the American continent, instigated him to seize upon the supreme command, and then murdered him and succeeded to his place. He committed a series of crimes, and finally met with a violent death.

AHUIZOTL (ah-wus-ot'-l), king of the Aztecs, reigned toward the end of the 15th century; in 1486 he was killed and his kingdom disappeared; he founded the city of Tenochtitlán, built many canals and important buildings. He was constantly at war, and conquered Guatemala. According to tradition, 72,344 prisoners were immolated by his order in four days at the consecration of a temple in 1486.

AHUMADA Y VILLALON, Agustín de (ah-oo'-mah-dah ehl vin'-ah-lahn'), Spanish adventurer, b. in Morelia, 42d viceoy of Mexico, d. 5 Feb., 1750. He assumed the office of viceoy 10 Nov., 1755, and distinguished himself by his honesty and zeal in eradicating abuses and introducing reforms. In his time happened the sudden eruption of a new volcano at Jorullo, near Pátzcuaro, when its ashes spread in large quantities over considerable areas and the entire population of Querétaro. He died in Cuernavaca.

AIKEN, Charles Augustus, educator, b. in Manchester, Vt., 30 Oct., 1827; d. in Princeton, N. J., 14 Jan., 1892. He was graduated at the college of South Carolina in 1846 and at Andover theological seminary in 1853. From 1843 to 1866 he was professor of Latin at Dartmouth, and from 1866 to 1869 at Princeton college. From 1869 to 1871 he was president of Union college. Subsequently he held the chair of Christian ethics and apologistics in Princeton theological seminary.

AIKEN, William, statesman, b. in Charleston, S. C., in 1808; d. in Flat Rock, N. C., 7 Sept., 1857. He was graduated at the college of South Carolina in 1827, and became an extensive rice-planter on Jéhosee island, near Charleston. He was a member of the legislature from 1838 to 1840, state senator in 1842, governor of South Carolina in 1844, and representative in congress from 1851 to 1857. He contributed liberally to charitable and educational institutions. He took no part in secession, and was elected again to congress in 1866, but was not admitted to a seat.

AIKINS, James Cox, Canadian senator, b. in the township of Toronto, 30 March, 1825. He was educated at Victoria college, represented the county of Peel in the Canadian house of assembly from 1841 to 1863, and was a member of the legislative council of Canada from 1862 until the union; became a member of the privy council 9 Dec., 1869; was secretary of state of Canada from 1869 until the resignation of the Macdonald government, 5 Nov., 1873; was appointed by the union president of Canada 2d time 19 Oct., 1878, and was called to the senate in May, 1897. Mr. Aikins is a liberal conservative.

AIKMAN, Alexander, journalist, b. in Scotland in 1753; d. at Prospect Pen, St. Andrews, Jamaica, in July, 1828. He came to Charleston, S. C., and learned the trade of a printer. When the American colonies revolted he left the country and established in Jamaica a loyalist newspaper, the "Jamaica Mercury," afterward called the "Royal Gazette." He was public printer in that colony, and sat for many years in the assembly.

AILLEBOUR, Louis d', French governor of Canada, d. in Quebec in 1660. He brought a company of colonists for the island of Montreal, and, after administering that province in the absence of Maisonneuve, was nominated governor of Three Rivers. From 1647 to 1651 he was governor of Canada. He negotiated unsuccessfully with the governors of the New England provinces for a white league against the Iroquois chiefs.

AINSLEE, J., English poet, b. in Bargery Mains, Ayrshire, 5 April, 1752; d. in Louisville, Ky., 11 March, 1878. He was sent to the Ayr academy to complete his education, but was compelled to leave that institution when fourteen years of age, in consequence of ill-health. Three years afterward he went to Glasgow and engaged in the whaling trade in the Arctic waters. He improved uncongenially, he returned to Roslin, where his parents then resided, and engaged in landscape gardening. Soon afterward he was appointed a clerk in the register house, Edinburgh, and at intervals while so employed acted as amanuensis for Prof. Dugald Stewart, the last of whose works he completed before his death in 1828. He afterward was appointed a representative in the British Parliament, and his biographical sketch (1820) consists of a narrative embodying a number of sparkling lyrics. A collection of his Scottish songs and ballads, edited by his friend William Wilson, was issued in New York in 1855. Ainslie is one of the minor Scottish poets represented in "Whistle Binkie" (Glasgow, 1853) and in Wilson's "Poets and Poetry of Scotland" (New York, 1876). In 1854 he visited his native land and received gratifying evidences of esteem and friendship from literary men. His best-known poems are "The Ingle Side" and "On wi' the Tartan," which were much admired by Sir Walter Scott, who by mistake handed Ainslie, at the register house, several pages of the MS. of one of his early novels in place of a legal document. Sir Walter's confidence was never betrayed. Another circumstance that Ainslie recalled with pleasure was related by him on the one hundred and twelfth anniversary of the birth of Robert Burns, to a large company assembled in Louisville, over which he presided, to celebrate the day so dear to Scotchmen—the circumstance of his having had the honor of kissing "Bonnie Jean," widow of the great poet.
AINSWORTH, Laban, clergyman, b. in Woodstock, Conn., 19 July, 1757; d. in Jaffrey, N. H., 17 March, 1858. He was graduated at Dartmouth college in 1778, and was ordained pastor of the church at Jaffrey in 1782, where he remained until his death, seventy-six years. This is probably the longest pastorate on record.

AITKEN, Robert, publisher, b. in Scotland in 1734; d. in Philadelphia in July, 1802. He settled in Philadelphia in 1769, and published the "Pennsylvania Magazine, or American Monthly Museum," from January, 1775, till June, 1776, having Hopkinson and Witherspoon for contributors, and imprisoned in 1777 for his conduct in relation to the cause of independence. He printed the first American bible in 1782, losing money on the venture, and is reputed to have been the author of "An Inquiry Concerning the Principles of a Commercial System for the United States" (1787).

AKERLY, Samuel, physician, b. in 1755; d. on Staten Island, 6 July, 1845. He was graduated at Columbia college in 1804. He contributed to medical and scientific periodicals, was active in establishing institutions for deaf mutes, and published an "Essay on the Geology of the Hudson River" (1839) and "Observations on Deafness" (1821).

AKERMAN, Amos Tappan, lawyer, b. in Portland, Me., 22 February, 1782; d. at Elberton, Ga., 21 Dec., 1880. He was graduated at Dartmouth college in 1802, was admitted to the bar in 1814, and settled in Elberton, Ga., in 1850. He followed his state in secession in 1861, and served the confederate government in the quartermaster's department; but after the war he was a republican and reconstructionist. He held the office of attorney for Georgia in 1866 and attorney-general of the United States in 1870, remaining in that office until 1872, when he resigned.

AKERS, Benjamin Paul (Akers), sculptor, b. in Saccarappa, Westbrook, Me., 10 July, 1853; d. in Philadelphia, Pa., 21 May, 1904. No genius was ever more a special gift than his, since there could hardly be less congenial soil for the growth of an artist than a small Maine village seventy years ago. He had never seen an artist, nor even a statue or a building when he began modelling. He had previously attempted painting, which did not satisfy him, and the first plaster cast that he ever saw was, he said, "a revelation" to him. In 1849 he went to Boston and took lessons in plaster casting from Carew, and returning home to Hollis, where his family then lived, he obtained some clay from a pottery and began modelling, space for the work being given him in the office of the village physician, who believed in his genius. His first work was a head of Christ, which was remarkably original and impressive, and was afterward ordered in marble by the United States minister to the Hague. While this was in process of execution, the bust of a respected townsmen, of which in after years he said: "It was as ugly as Fra Angelico's devil, and was a remarkably faithful likeness." The next summer he took a studio in Portland, and for over two years labored diligently and conscientiously at what he now felt to be his real life work. He made many portrait busts, among them being that of Gov. Gilman, of New Hampshire, Rev. Dr. Nichols, of Portland, Prof. Sheppard, John Neal, Prof. Cleaveland, Samuel Appleton of Boston, M. S. Law, fellow, and others of less note. He also produced several ideal works, among them a head of "Charlotte Corday" and a bas-relief of "Evening." In the autumn of 1852 he sailed for Europe, reaching Italy in December. He remained studying a year in Florence, making several busts, and a "Morning" and "Evening." He then visited Egypt, and designing in marble several of his previous works. In the summer of 1853 he returned to Portland, and that winter modelled the statue of "Benjamin in Egypt," which was exhibited at the World's Fair in New York, and was destroyed at the burning of the Portland custom-house the next year. Among his portrait busts at this time was a head of Judge Shepley, of Boston. In a dominant career, he, who could humble modelled busts of many of the noted men of the time, among them that of Hon. Linn Boyd, of Kentucky, speaker of the house, Judge McLean, of Cincinnati, Edward Everett, Sam Houston, and Gerrit Smith. In January, 1855, he again visited Europe, residing at times in Rome, Venice, Naples, and the Swiss Alps on foot, and in the following two or three years produced his best-known works. These include "Peace," "Una and the Lion," "Girl Pressing Grapes," "Isisah," Schiller's "Diver," "Reindeer," "Saint Elizabeth of Hungary," "Diana and Endymion," "Paul and Francesca," "Milton," and the "Death of Scott," which he did for the Scottish Highlanders described in Hawthorne's "Marble Faun." During this time he also made many busts of Americans visiting Rome, and executed very many copies of antique busts and statues for the galleries of American and English patrons of art. The amount of labor which he crowed into a little more than two years was amazing; in fact, his constant toil on wet clay and cold clay, he who understood a constitution naturally delicate, and he returned home in the summer of 1857 with his health seriously broken. He was unable to accomplish much in his art during the next two years, and in 1859 made another visit to Italy to recover his failing strength, but returned the next year, without improvement. He sailed from Charleston for his home to Philadelphia for the winter, but the change was not beneficial, and he died at thirty-six years of age, with his work, as he said, "just begun." He had much literary ability, and contributed papers on art and artists to the "Atlantic Monthly."

AKIN, Thomas Beamiush, Canadian jurist, b. in Liverpool, Nova Scotia, 1 Feb., 1800; d. in Halifax, 6 May, 1891. He studied law with the late Beamiush Murdoch, author of the "History of Nova Scotia," was admitted to the bar in 1831, and practised as a solicitor at Halifax. He was appointed a commissioner in 1857 for arranging and preserving the ancient records and documents illustrative of the history of the province of Nova Scotia, and was twice elected a governor of King's college, Windsor, Nova Scotia. He was the author of several pamphlets, including "History of Halifax, N. S." (1847); "Rise and Progress of the Church of England in the British North American Provinces" (1849); and "Selections from the Public Documents of the Province of Nova Scotia," next to The National Magazine, the best known American periodical in the States. He was the author of several pamphlets, including "History of Halifax, N. S." (1847); "Rise and Progress of the Church of England in the British North American Provinces" (1849); and "Selections from the Public Documents of the Province of Nova Scotia," next to The National Magazine, the best known American periodical in the States.

ALAMÁN, Lucas (lah-hah-mahn), Mexican statesman, b. in the state of Guanajuato, 18 Oct., 1792; d. in Mexico, 2 June, 1856. He was educated at the college of La Concepcion and at the school of
ALAMINOS

Alexander, Oyden," Albany, plan. first naval officer of the Spanish fleet that discovered the peninsula of Yucatan in 1517. He distinguished himself by his services under the command of Grijalba and Hernán Cortés, and was the first to pass the Bahama channel.

ALARCON, Hernando d' (ah-lahr-kohn'), Spanish navigator, b. in Spain, 1562. He sailed from New Spain in May, 1540, with two ships and a tender along the western coast of America, under instructions from Mendoza, the viceroy, to aid the land expedition of Coronado, which set out at the same time, in search of the seven cities of Cíbola. He made a careful survey of the shore-line of the Californian coast, supplying the map with charts and observations, supplementing those of Ulloa, accurately represented the configuration of California.

ALARCON Y MENDOZA, Juan Ruiz d', Mexican dramatist, b. in Tuxaxo, Mexico, about 1580; d. in Spain, 4 Aug., 1653. He was educated in Spain, and in 1600 became a lawyer in his native country. In 1622 he was appointed auditor of the chancery and, in 1625, alcalde mayor of Mexico. In 1628 he published eight dramas, and in 1634 twelve more, " La verdad sospechosa," of which Corneille's " Menteur" was an adaptation, and "Las paredes oyen," which still keeps the stage in Spain, are his most famous plays. A new edition of his works was printed in Madrid in 1848-52.

ALBA, Fernando d'. See Ixtllilxochitl.

ALBANI, Marie Emma Lajeunesse, singer, b. at Chamby, near Montreal, in 1851. Her parents were French-Canadians. She was educated with her sisters in the convent of the Sacred Heart in Montreal and in the Paris convent of the Sacred Heart, where she made her professed vows in 1868. Her first musical training came from her father, a skilful musician. In 1864 he removed to Albany, N. Y., where her singing in the cathedral attracted much attention. A concert was given for her benefit, and with the proceeds she was sent to Europe to complete her musical education. After studying two years in Paris, where she found a patroness in Baroness Lafitte, under the tuition of Duprez, and then in Milan under Lamperti, she made her début as an opera-singer in Messina in 1870. The name Albani was adopted out of compliment to the city where her musical promise was recognized and generously encouraged. She sang at Malta, and then, during the winter of 1871-72, in the theatre of La Pergola at Florence. Among Thomas's "Mignon," which had been damning in four Italian theatres, became a success with her, as were all the parts with which she identified herself. When War was declared, she at once offered her services for foreign affairs and the chief instrument in the re-actionary policy of fettering the press, the property of the Jesuits and imposing insupportable burdens on the people. He was the author of the famous "Historia de Méjico" (1849-52), in which he pronounced against the tradition of the Conquest and returned to New Spain in 1851, having failed to meet the land expedition according to the plan. He also discovered the Colorado river, ascended that difficult stream for 100 miles, and took possession of the country in the name of Charles V., distributing crosses among the natives as a missionary of the church, telling them that he was "the messenger of the King and the chart and observations, supplementing those of Ulloa, accurately represented the configuration of California.

ALBERT, Jacob, clergyman, b. near Pots- town Pa., 1 May, 1759; d. in 1808. He was of German parentage (the name originally being Albrecht), and was brought up as a tile-burner. Beginning a religious life in 1780, and being successful as an exhorter, he soon became a Methodist minister. He married many converts, all exclusively Germans, and in 1800 a separate church organization was created for them, Albright being their first presiding elder. He was appointed bishop in 1807. His denomination is now known as the "Evangelical Association," but in many places its members are known as "Plain People."
received a military education in Spain, and in 1792 had become a brigadier-general. He wrote a valuable work entitled "Dicionario geográfico histórico de las Indias Occidentales de America" (Madrid, 1789).

ALCIBAR, José, the last of the painters belonging to the old Mexican school. Very little is known about his life, but he executed many works of merit, especially two large paintings in the cathedral of Mexico, dated 1779. He must have lived to an old age, as he was already an artist working with Carrera fifty years before that time.

ALCOCER, Vidal, Mexican philanthropist, b. in the city of Mexico, 8 April, 1801; d. there 22 Nov., 1860. When very young he worked as a bookbinder, and then as a gunsmith, until he entered the army. He fought in the war of independence, at the end of which he became aide-de-camp. He immediately took part in the organization of troops for the war against the French, and then as a soldier in operations to defend his native city from the American army. His chief aim in life was to promote education among destitute children, in pursuit of which he organized, in 1846, an association which had established twenty schools for poor children in the city of Mexico, and from 1854 to 1858 the number of these schools was increased to thirty-three, with 7,000 boys and girls receiving a good elementary education.

ALCORN, James Lusk, statesman, b. near Golconda, Ill., 4 Nov., 1816; d. in Cohoma co., Miss., 29 Dec., 1888. He was educated in the schools of Livingston co., Ky., and in 1843 was elected to the legislature. In 1844 he removed to Mississippi and began the practice of law. From 1846 to 1855 he served in one branch or the other of the legislature. In 1852 he was chosen elector-at-large on the Scott ticket, and in 1853 was nominated as governor by the Whigs. This he declined, and was a candidate for congress in that year, but was defeated by L. Q. C. Lamar. He was the founder of the levee system in his state, and in 1858 he became president of the levee board of the Mississippi-Yazoo Delta. In 1861 he was elected brigadier-general by the state convention, which was a member, but his commission was refused by Jefferson Davis on account of old political differences. He was elected to the U. S. senate in 1865, but was not allowed to take his seat. He was elected governor in 1869 on the republican ticket, from which office he resigned on being elected to the U. S. senate, where he served for six years, from 4 Dec., 1871. In 1873 he was defeated as independent candidate for governor of his state.

ALCOTT, Amos Bronson, educator, b. in Wolcott, Conn., 29 Nov., 1799; d. in Boston, 4 March, 1888. While yet a boy he was provided with a trunk of various merchandise, and set out to make his way in the south. He landed at Norfolk, Va., and went among the plantations, talking with the people and reading their books. They liked him as a companion, and were glad to hold discussions with him on intellectual subjects. They would keep him under their roofs for weeks, reading and conversing, while he forgot all about his commercial duties. But when he returned to the north his employer discovered he had not sold five dollars' worth of his stock. He relinquished his trade in 1825; and established an infant school which immediately attracted attention. His method of teaching was by conversation, not by books. In 1828 he went to Boston and established another school, showing singular skill and sympathy in his methods of teaching young children. His success caused him to be widely known, and a sketch of him and his methods, under the title of "A Record
complexion. He was regarded as a leader in the transcendental style of thought, but in later years was claimed as a convert to orthodox Christianity. He published "Tablets" (1868); "Concord Days," personal reminiscences of the town (1872); "Table Talk" (1877); and "Sonnets and Canzonets" (1877), besides numerous contributions to periodical literature, including papers entitled "Orphic Sayings" in "The Dial" (Boston, 1839-42). After taking up his residence in Concord, he allowed the peculiarities of his mind to find expression in quaint and curious arrangement of his grounds. The fence enclosing them, built entirely by himself, is made wholly of pine boughs, knotted, girded, and twisted in every conceivable shape. His "Walden" (1854), written about two years of age her parents removed to Boston, and in her eighth year to Concord, Mass. At the age of eleven she was brought under the influence of the community that endeavored to establish itself near Harvard, in Worcester co. Thoreau was for a time her teacher; but she was instructed more by her mother than by her teacher. She began to write for publication at the age of sixteen, but with no marked success for fifteen years. During that time she was a volunteer nurse, and for many months labored in the hospital wards. At this time she wrote to her mother and sisters letters containing sketches of hospital life and experience, which on her return were revised and published in book form (Boston, 1863), and attracted much attention. In 1866 she went to Europe to recuperate her health, which had been seriously impaired by her hospital work, and on her return in 1867 she wrote "Little Women," which was published the following year, and made her famous. The sales in less than a year amounted to 87,000 copies. Her characters were drawn from life, and are full of the buoyant, free, hopeful New England spirit which marked her own enthusiastic love for nature, freedom, and life. Her other stories were conceived in the same vein, and have been almost equally popular. They are: "Flower Fairies or Fairy Tales" (Boston, 1855); "Hospital Sketches," 1857; "Aunt Jo's Scrap Bax" (1871-82), containing "My Boys," "Shawl Straps," "Cupid and Chow-Chow," "My Girls," "Jimmy's Cruise in the Pinafore," and "An Old-Fashioned Girl" (1869); "Eight Cousins" (1874); "Rose in Bloom" (1876); "Silver Pitchers" (1876); "Under the Lilacs" (1878); "Jack and Gill" (1880); "My Week with Santa Claus" (1884), reissued in a revised edition (1881); "Petticoat Stories" (1882); "Spinning-Wheel Stories" (1884); "Lulu's Library," the first of a new series (1885).

EDMUND D. CHENEY wrote her life (Boston, 1889). Another daughter, May, artist (Mrs. Ernest Niekratz), b. in Concord, Mass., in 1840; d. in December, 1879. At the school of design in Boston, and in the studios of Krug, Blimmer, Hunt, Vantier, Johnston, and Muller she received the best attainable instruction, and subsequently divided her time between Boston, London, and Paris. After her marriage she lived mainly in Paris. Her strength was as a copyist and as a painter of still life, either in oils or water-colors. Her success as a copist of Turner was such as to command the praise of Mr. Ruskin, and secure the adoption of some of her work for the pupils to copy at the South Kensington schools in London. In these branches of work she had few equals. She published "Concord Sketches" (Boston, 1869).

ALCOTT, Alexander, author, b. in Wolcott, Conn., 6 Aug., 1798; d. in Auburn, Mass., 29 March, 1859. He supported himself in youth by working on a farm in summer and teaching in winter, studied medicine at Yale, and practised for several years. In 1852 he associated himself with William Woodbridge in the preparation of school-books for children, and, in editing the "Annals of Education," he published "Little Rambles," the first weekly periodical for children published in America. His interest in improving the condition of the public schools led to his writing numerous articles on the subject, published in the Hartford and New Haven journals. For his book "On the erection of school-houses," he was awarded a premium from the American Institute of Instruction. About 1852 he removed to Boston, and there published the "Young Man's Guide," a book that exerted great influence by disseminating correct physiological principles. Upward of 100 books and pamphlets were published by him, including "The Life of a Farmer," "The Young Husband," "The Library of Health" (vols.), "Moral Reform," "My Progress in Error," and a "Prize Essay on Tobacco." He spent his winters in travel, visiting school-houses, more than 20,000 of which he is said to have inspected, and lecturing. His name is identified with some of the most valuable reforms in education, morals, and physical training of the present century.

ALDANA, Ignacio, Mexican patriot, b. in San Miguel el Grande, Guanajuato; d. in Monclova, 20 June, 1811. He was a lawyer, but devoted himself to commercial projects with marked success. From the beginning of the revolutionary war he joined Hidalgo, was soon promoted to the rank of general, and was sent as minister to the United States, in hope of obtaining help from this nation. But, on reaching Bejar, he found that some insurgents, led by Zambrano, were preparing a revolt against the revolutionary authorities. These being overpowered by the new insurgents, 1 March, 1811, Aldama was arrested and sent to Monclova, where he was executed.

ALDANA, Ramon, Mexican poet, b. in Mérida de Yucatán, 30 June, 1832; d. in the city of Mexico, 16 Aug., 1882. He studied philosophy and law in his native city, but soon devoted himself to journalism and politics. He produced four dramas, which bear the titles of: "Honor y felicidad," "No hay venganza," "Un amor de venganza," and "La culpa y el corazón," besides lyric poems, sonnets, and numerous literary articles.

VOL. I—4
ALDEN, Ebenezer, physician, b. in Randolph, Mass., 17 March, 1788; d. there 26 Jan., 1881. He was of the seventh generation from John Alden of Mayflower memory, and was graduated at Harvard in 1808. He was the last survivor of his class, which included his friends Richard Henry Dana, and Charles Cotesworth Pinckney, of South Carolina. He studied medicine at Harvard and built up a large practice of the university of Pennsylvania, where he received his degree in 1812, and followed his profession throughout his life in his native town. He published "Historical Sketch of the Massachusetts Medical Society" (Boston, 1838); "Memoir of Mrs. M. A. O. Clark" (Boston, 1844); and the "Alden Memorials" (Boston, 1881). A memorial brochure was published, containing a biographical sketch, with a portrait, of Dr. Alden, together with the funeral addresses.

ALDEN, Henry Mills, editor, b. in Mt. Taor, Vt., 11 Nov., 1830. He was graduated at Williams college in 1857, and at Andover theological seminary in 1858. He delivered before the Lowell institute of Boston a series of twelve lectures on "The Structure of Paganism." In 1869 he became managing editor of "Harper's Magazine." He is the author of "The Ancient Lady of Sorrow," a poem (1872), and, jointly with A. H. Guernsey, "Harper's Pictorial History of the Great Rebellion" (New York, 1862-65). Mr. Guernsey writing the eastern campaigns and Mr. Alden the western.

ALDEN, Ichabod, soldier, b. in Duxbury, Mass., 11 Aug., 1759; d. 10 Nov., 1788. He was a great-grandson of John Alden of the original Plymouth colony. Before the revolution he was lieutenant-colonel of the Plymouth regiment, and he held the rank of colonel with the militia of the city of Boston. Subsequently he was promoted to the colonelcy of the 7th Massachusetts regiment. He was killed by Indians at Cherry Valley, N.Y.

ALDEN, Isabella, author, b. in New York in 1811. Her maiden name was McDonald. She is the author of a popular juvenile series called the "Pansy Books," comprising nearly 60 titles, most of which are adapted to the use of Sunday-school libraries. Among the most popular of these are "An Endless Chain," "The King's Daughter," "Mary Burton Abroad," "Chautauqua Girls at Home," "Four Girls at Chautauqua," "New Year's Tangles," and "Six Little Girls." Mrs. Alden has from the beginning been identified with the Chautauqua system of instruction and has also edited "Pansy," a juvenile publication.

ALDEN, James, naval officer, b. in Portland, Me., 31 March, 1810; d. in San Francisco, Cal., 6 Feb., 1877. He was appointed midshipman in 1828, and in that capacity accompanied the Wilkes exploring expedition around the world in 1838-42. He was present at the capture of Vera Cruz, and sent during the Mexican war, being present at the capture of Vera Cruz, Tuxpan, and Tabasco. In 1855-56 he was actively engaged in the Indian war on Puget's sound. At the outbreak of the civil war he was in command of the steamer "South Carolina," reenforced Port Pickens, Fla., and was in an engagement at Galveston, Texas. He commanded the sloop of war "Richmond" at the passage of forts Jackson and St. Philip and the capture of New Orleans (April, 1862), and was also at Port Hudson. He was made captain in 1863, and commanded the "Brooklyn," participating in the capture of Mobile bay (August, 1864) and in the two engagements at Galveston. He was commissioned commodore in 1866, and two years later was placed in charge of the navy- yard at Mare island, Cal.

In 1869 he was appointed chief of the bureau of navigation and detail in the navy department. He was promoted to the rank of rear admiral in 1871, and assigned command of the European squadron.

ALDEN, John, magistrate of the Plymouth colony, b. in England in 1599; d. in Duxbury, Mass., 12 Sept., 1687. He was hired as a cooper at Southampton, where the "Mayflower" was undergoing repairs, and signed the compact in her cabin in 1620. He married Priscilla Mullens in 1621, and the incident of his courtship has been made the subject of one of Longfellow's longer poems. His wisdom, integrity, and decision won for him the confidence of his associates, and, although the youngest of the Pilgrims, he became one of the important members of the colony. The "Mayflower," shown in the engraving, was a vessel of 180 tons.

ALDEN, Joseph, educator, b. in Cairo, N.Y., 4 Jan., 1807; d. in New York, 30 Aug., 1885. At the age of fourteen he began teaching in a public school and showed great ability in this direction. He was graduated at Union college in 1826, and studied at Princeton theological seminary, where for two years he was tutor. In 1834 he was ordained pastor of the Congregational church in Williamstown, Mass., and subsequently (1855-52) became professor of Latin, and then of rhetoric and political economy, in Williams college. From 1852 to 1857 he was professor of mental and moral philosophy at Lafayette college. In 1857 he became president of Jefferson college, and from 1867 to 1872 he was principal of the Albany, N.Y., normal school. He was a prolific writer, and prepared more than 70 volumes, mostly Sunday-school literature. Among his works are "The Example of Washington," "Citizen's Manual," "Christian Ethics," "The Science of Government," "Elements of Intellectual Philosophy," and "First Steps in Political Economy." He was also a constant contributor to periodical literature and for sometime editor of the New York "Observer," and of the Philadelphia "Christian Librarian." - His son, William Livingston, author, b. in Williams town, Mass., 13 Oct., 1837, was educated at Lafayette and Jefferson colleges, graduating in 1858, and then studied law. He was for several years a contributor to the magazines, but has achieved his reputation principally by humorous editorials, of which those in the New York "Times" are the most famous. In 1885 he was appointed U. S. consul-general at Rome, To earn is due this credit of introducing canoeing as a recreation into the United States, and in 1870 he founded the
ALDEN, Roger, soldier, b. in Lebanon,Conn., 11 Feb., 1754; d. in West Point, N. Y., 5 Nov., 1836. He was graduated at Yale in 1773, and served in the revolutionary war as aide to Gen. Greene. Subsequently he became agent of the Holland Land Company and resided at Meadville, Pa., from 1795 to 1825. He was appointed ordnance storekeeper at West Point, 29 Jan., 1825, and remained as such until his death. He was a great-grandson of John Alden.—His son, Bradford Ripley, soldier, b. in Meadville, Pa., in 1800; d. in Newport, R. I., 10 Sept., 1870. After graduation at West Point in 1833-40, and then served for nearly two years as aide to Gen. Scott. After three years of garrison duty he was appointed commandant at West Point, 14 Dec., 1845, and remained there until 1852. The important ordnance service that followed, he led an important expedition against the Ronge river Indians, was severely wounded in action, 24 Aug., 1853, and resigned in consequence on the 29th of September in the same year. He never fully recovered from his wound, and was unable to serve in the civil war. He was a man of fine literary taste and culture, and passed several years of his civil life in Europe.

ALDEN, Timothy, clergyman, b. in Yarmouth, Mass., 28 Aug., 1771; d. in Pittsburg, 5 July, 1839. He studied at Harvard, distinguishing himself by his knowledge of oriental languages, and was graduated in 1794. From 1799 to 1806 he was pastor of the Congregational church in Portsmouth, N. H., where from 1800 to 1808 he taught school. Subsequently he conducted schools for young ladies in Boston, Newark, Cincinnati, and East Liberty, Pa. In 1817 he founded Alleghany college, Meadville, Pa., and became its first president, retiring in 1831. He published a collection of epistles numbered from 1830 to 1856; he joined the American Sunday Missions among the Senecas" (1827); and other works, and prepared a valuable catalogue of the library of the New York historical society.

ALDEN, Timothy, inventor, b. in Barnstable, Mass., in 1819; d. in New York, 4 Dec., 1878. He was the sixth in descent from John Alden, of "Mayflower" fame. When very young, setting type in his brother's printing office, he said: "If I live, I will invent a machine to do this tiresome work." He labored steadily, devoted his leisure to study, and in 1846 began the construction of a composing and distributing machine. His idea was to arrange the type in cells around the circumference of a horizontal wheel. By the rotation of the wheel, several receivers are also made to rotate, and these pick up the proper types from their respective cells. His brother, Henry W. Alden, made many improvements after the death of the inventor.

ALDRICH, James, poet, b. in Suffolk co., N. Y., 28 July, 1836. He entered early into mercantile life, but at twenty-six years of age, having had some success as a writer, he abandoned business for literature. Several popular periodicals were conducted by him, and in 1849 he established the "Literary Gazette," in which appeared many of his poems, which pleased the popular taste. Of these "A Death-Bed" is the best known, particular attention being called to it by Edgar A. Poe, who pointed out its striking resemblance to a poem by Hood on the same subject. In the latter part of his life he resumed his business pursuits. See Rufus W. Griswold's "Poets and Poetry of America."

ALDRICH, Nelson Wilbraham, senator, b. in Foster, R. I., 6 Nov., 1841. He received an academic education, and engaged in mercantile pursuits. He was president of the Providence common council in 1872-3, a member of the Rhode Island general assembly in 1873-4, 1877-8, serving in 1877 as speaker of the house of representatives, and was elected to congress in 1878 and 1880. He was elected to the U. S. Senate as a republican, to succeed Gen. Burnside, and took his seat 5 Dec., 1881.

ALDRICH, Thomas Bailey, author, b. in Portsmouth, N. H., 11 Nov., 1835. His early youth was passed in Louisiana. He began a course of study preparatory to entering college, but, on the death of his father, he abandoned it to enter the counting-room of his uncle. Was afterward a bank clerk in New York City. Here he remained three years, and here he began to contribute prose and verse to various journals. His "Ballad of Babie Bell" (1856) won immediate and universal favor, and this, with other successes, induced him to enter upon a literary career. When first he was a proof-reader, then a "reader" for a publishing-house. He became a frequent contributor to "Putnam's Magazine," the "Knickerbocker," and the weekly papers, and afterward to the New York "Evening Mirror." In 1856 he joined the staff of the New York "Home Journal," then under the management of Willis and Morris, with whom he remained three years. He was editor of "Every Saturday," Boston, so long as it was published, 1870-74. For several years he had written almost exclusively for the "Atlantic Monthly," then in March, 1881, he became its editor. His published volumes of poetry are "The Dells" (1855); the "Ballad of Babie Bell," and other poems (1856); "The Course of True Love Never did Run Smooth" (1858); "Pam- pinea and other Poems" (1861); two collections of "Poems" (1863 and 1865); "Cloth of Gold and other Poems" (1874); "Flower and Thorn: Later Poems" (1876); an edition de luxe of his Lyrics and Sonnets (1880); and "Friar Jerome's Beautiful Book" (1881). His prose works are "Daisy's Necklace" (1859); "Out of his Head, a Romance in Prose" (1862); "Story of a Bad Boy," which is in some degree autobiographical (1879); "Marjorie Daw and other People," short stories (1879); "Pudd'nhead Wilson," a novel (1874); "The Queen of Sheba," a romance of travel (1877); "The Stillwater Tragedy" (1880); "From Ponkapog to Pesth" (1882); and "Mercedes" (1883). He has translated from the French, Bedeljere's "Story of a Cat." Complete collections of his prose writings
ALDRIDGE, Ira, negro tragedian, known as the "African Roscius," d. in Lodz, Poland, 7 Aug. 1869. The place and date of his birth are unknown. Some biographers say he was born in Belhair, near Baltimore, about 1810; that he was a mulatto, apprenticed to a ship-carpenter; acquired a knowledge of German from German immigrants; accompanied Edmund Kean to England as his servant, where his natural talent for the stage was observed; and subsequently returned to the United States, where, in 1830–31, he appeared on the stage in Baltimore, but was not successful; then returned to England and began a career of fame. Other biographers, claiming to be better informed, say that he was born in New York city about 1865, that his father was a full-blooded negro, and that he was educated in the United States, was converted and educated, and became the pastor of a colored church in New York. He intended that his son Ira should follow the same profession, but the boy had a passion for the stage, and demonstrated his ability in successful amateur performances. His father disapproved of his son's proclivity, and sent him to be taught to be educated for the ministry. The son obeyed for a time, but his fondness for the stage soon took him away from his books. After some time spent in preparation, he made his début at the Royalty theatre in London as Othello, where he met with immediate success. In England he was generally preferred in those plays in which his color appropriately. He was highly appreciated by Edmund Kean, and appeared at Belfast as Othello to Kean's Iago. As an interpreter of Shakespeare he was very generally regarded as one of the best and most faithful. He appeared at Covent Garden as Othello in 1833, and at the Surrey theatre in 1818. In 1852 he visited Germany, where he played three years, and in 1857 the emperor of Sweden invited him to visit Stockholm. On the continent he ranked as one of the ablest tragedians of his time. Honors were showered upon him wherever he appeared. He was presented by the king of Prussia with the first-class medal of arts and sciences, accompanied by an autograph letter from the emperor of Austria; the king of Sweden; a medal from the emperor of Russia; and a magnificent Maltese cross, with the medal of merit, from the city of Berne. Similar honors were conferred on him by other crowned heads of Europe. He was a member of the Prussian academy of arts and sciences, and holder of the large gold medal of member of the imperial and archducal institution of our lady of the Assumption in Vienna and the Royal Swedish academy of sciences in Stockholm. His special attraction was the brilliancy and grace of his delivery, his skill in the management of the plays and his adaptability to them. His various performances are published in England, France, and Germany, and translations of two of his novels and several of his short stories have appeared in the "Revue des deux Mondes."

ALEMANY, Joseph Sadoc, archbishop, b. in Vich, in Catalonia, Spain, in 1814. He entered the Dominican order at the age of fifteen, and studied in the convents of Trumpt and Garona. He was ordained at Viterbo, Italy, in 1837, remained a year and a half at Viterbo as sub-master of novices, was appointed provincial for Spain, became a papal chaplain in the church of Minerva, in Rome, which office he continued to discharge up to 1841, when he volunteered for the American mission. After performing missionary duties in Nashville and Memphis, he was made provincial of the order in the state of Ohio in 1847. He attended the general chapter of the Dominicans in Italy in 1850, when his abilities attracted the attention of the empire, and he was appointed bishop of Monterey the same year, and was consecrated in the church of San Carlo by Cardinal Franzoni. He at once left Rome, bringing with him some members of his order of both sexes, through whose agency he has founded several educational institutions in California. He was installed as bishop of San Francisco in 1852, being its first archbishop. He resigned his archiepiscopal office in 1883, with the object of devoting the rest of his life to the reorganization of his order in Spain, and went to reside in a Dominican convent in Valencia. He is the author of "A Life of Saint Dominic."

ALEXANDER, José Martiniano d' (ah-lane'-sa), Brazil-Jesuit, b. in Ceará in 1829; d. in Río de Janeiro, 12 Dec., 1857. His law studies were pursued at São Paulo, and on their completion he went to Rio, where he became a frequent contributor to the journals of that city. He also wrote dramas and romances, some of which are based upon the Indian legends current in Brazil, and rank among his abilities attracted the attention of the empire. In 1868 he was elected deputy for Ceará to represent the conservative party, and entered the cabinet as minister of justice. Two years later, when a candidate for senator, he was returned as one of the "triple list," but was not confirmed by the emperor. His reputation at the bar is one of the most distinguished in Brazil; and he is a most valuable contributor to the history of his country. His best known works are "Iracema," and his romances of "Guarany" and "Urabigua," are the best known of his literary productions.

ALENCASTRE NOROÑA Y SILVA, Fernando (ah-len-kas'-tra', dukes of Linares, 55th viceroy of Mexico, where he assumed command, 15 Jan., 1711. The same year snow fell for the first time on the rivers of Mexico. The snow is the autogenous snowfall brought about by the heavy rainfall and is not that of any other earthquake. Alencastre showed himself most liberal and charitable toward the sufferers by the earthquake, as well as during the terrible famine and epidemic that scourged the country four years later. He established in Nuevo Leon a colony called San Felipe de Linares, and soon after this he was named viceroy of New Spain, 16 Aug., 1716.

ALEXANDER, Abraham, statesman, b. in North Carolina in 1718; d. near Charlotte, 23 April, 1786. He represented Mecklenburg co. in the colonial legislature prior to 1775, and when, early in 1775, Joseph Martin, the royal governor, attempted to prevent a free expression of opinion, he was one of the patriots who went in triumph to the summons of Col. Thos. Polk, and elected Mr. Alexander permanent chairman. The dates of the preliminary meetings are not known.
On 31 May they unanimously adopted the Mecklenburg declaration of independence, substantially renouncing allegiance to the British crown and providing for a civil government upon a republican basis. This document, antedated by more than a year the formal declaration of 1776, and was itself preceded by several others, notably that of Men- don, Mass. It was in the form signed, was read to mass meetings of the people of North Carolina, and in August, 1775, was transmitted to Philadel- phia by the hand of a special messenger.

ALEXANDER, Archer, freedman, b. near Richmond, Va., about 1810; d. in St. Louis, Mo., 8 Dec., 1879. He was a slave, and fled to St. Louis, then under martial law, in 1863, after the Union forces had cut the timbers of a certain bridge so that it should break down under a train carrying a detachment of national troops about to pass over it. At the risk of his life he conveyed the information to a well-known union man, and the detachment was saved. Archer was suspected as the informant and arrested by a provost-marshal. He made his escape to and secured employment in St. Louis under a provost marshal’s certificate.

Until the emancipation proclamation assured his permanent freedom he was in constant danger from kidnappers. Although almost wholly illiterate, he had a shrewd intelligence and was a skilled and efficient workman. A stone commemorating his capture as a fugitive slave has been raised on the spot where he was taken when making his escape from slavery. See “The Story of Archer Alex- ander” (Boston, 1886).”

ALEXANDER, Archibald, educator, b. in Rockbridge co., Va., 17 April, 1772; d. in Princeton, N. J., 22 Oct., 1851. His grandfather, of Scot- tish descent, came from Scotland to Lexington. At the age of ten Archi- bald was sent to the academy of John Williams at Timber Ridge meeting- house (since de- veloped into Washington and Lee university), near Lexington. At the age of sev- en-teen he became a tutor in the family of Gen. John Posey, of The Wil- derness, twelve miles west of Fred- ericksburg, but after few months resumed his studies with his former teacher. At this time his mind became influenced by a remarkable movement, still spoken of as “the great revival,” and he turned his attention to the study of divinity. In 1791 he was licensed to preach 1 Oct., 1791, ordained by the presbytery of Hanover 9 June, 1794, and for seven years was an itinerant pastor in Charlotte and Prince Edward cos.

In 1796 he became president of Hampden Sydney college, Va., but in 1801 resigned, and settled in New York and New England. During his tour he went to see the Rev. Dr. Waddel, the celebrated blind preacher mentioned by Wirt in his “British Spy.” The result of this visit was his marriage to Dr. Waddel’s daughter Janetta. Immediately after he resumed his presidency, but, owing to misin- dustri-ally among the students, retired, and became in 1807 pastor of the Pine st. Presbyterian church in Philadelphia. The degree of D. D. was conferred on him by the college of New Jersey in 1810, and in the same year he was elected president of Union college in Georgia, a fact which remained unknown even to his family until after his death. On the organization of the theological seminary at Princet- on in 1812 Dr. Alexander was unanimously chosen as the leading professor. As the number of students increased and other professors were added to the faculty, he was enabled to direct his attention more particularly to the department of pastoral and polemic theology, in promoting which, with the geniality and benevolence of his character, he shone with zeal and success till his death, a period of nearly forty years. His powers both for pulpit oratory and polemic disputation were extraordin- ary. He was always busy, and from 1829 to 1850 scarcely a number of the “Princeton Review” appeared without an article from his pen. His style was idiomatic and polished; his occasional sermons and contributions to periodicals, he published nothing until he had entered his fifty-second year. His first work was “Outlines of the Evidences of Christianity” (1823), which has been translated into various foreign languages and is used as a text-book in colleges. It was reprinted in London and Paris, and reissued as a pocket edition in 1833, accompanied with introductory notes by Rev. John Morison, D. D. This was followed by a “Treatise on the Canon of the Old and New Test- aments” (1826); “Lives of the Patriarchs” (1825); “Essays on Religious Experiences” (1840); “His- tory of African Colonization” (1846); “History of the Lch Colonial System” (1849); “The Jewish Nation” (1852), and other works. He also contributed largely to periodicals. He left several works in manuscript, of which the “Outlines of Moral Science” (1852) was pronounced by the “Westmin- ster Review” to be a “calm, clear stream of abstract reasoning, flowing from a thoughtful, well-constructed mind, united with an intuitive simplicity and directness which gives an almost axiomatic force.” Other posthu- monous works were “Duties and Consolations of the Christian”; “Patriarchal Theology”; “History of the Presbyterian Church in Virginia”; “Biographical Sketches of Distinguished American Clergymen and Alumni” of the College of New Jersey”; and “Church Polity and Discipline.” He left five sons, of whom three became ministers, and one daughter. The eldest son wrote the life of his father, and edited his posthumous works (New York, 1854).

—His son, James Waddel, clergyman, b. near Gordonsville, Louisa co., Va., 13 March, 1804; d. at the Red Swell Springs, Va., 17 July, 1879. He re- ceived his academic training at Philadelphia, was graduated at Princeton in 1829, and studied theo- logy in Princeton seminary. In 1824 he was appointed a tutor, and during the same year he was licensed to preach by the Presbytery of New Bruns- wick, N. J. During 1825-28 he was in charge of a church in Orange co., N. J. From 1828 to 1830 was pastor of the first Presbyterian church in Trenton, N. J. His health failing, he resigned this charge and became editor of “The Presbyte-
rion," in Philadelphia. He was professor of rhetoric and belles lettres in Princeton college from 1833 till 1844, when he assumed charge of the Duane st, church in New York city. From 1844 to 1854 he was professor of ecclesiastical history and church government in Princeton theological seminary, and in 1851 he was called to the pastorate of the Fifth ave, Presbyterian church, where he remained until his death. Among his published works are "Consolation": "Thoughts on Family Worship": "Plain Words to a Young Communicant": a series of essays entitled "The American Mechanic and Workingman": "Discourses on Christian Faith and Practice" (New York, 1858); "Gift to the Afflicted": a biography of Dr. Archibald Campbell. He compiled thirty volumes for the American Sunday-school union. He was also a frequent contributor to the "Princeton Review" and the "Biblical Repository." "Forty Years' Familiar Letters of James W. Alexander," was published by the surviving correspondents, the Rev. John Hall, D. D., of Trenton, N. J., 1890. In 1860 he was president of the Workingman's College and City College, New York, and in 1861, was elected professor of divinity at the Philadelphia Seminary, which he had been president of his last years. He was translated "Thoughts;" "Consolation;" and several other essays for various pulpits, and meritorious services in the battle of Bull Run. He continued with the army of the Potomac, rendering important aid at the siege of Yorktown, for which he was brevetted lieutenant-colonel in 1862.

ALEXANDER, Barton Stone, soldier, b. in Kentucky in 1819; d. in San Francisco, Cal., 15 Dec., 1878. He was appointed to the U. S. Military academy from Kentucky, in 1839, and became lieutenant in the corps of engineers. He superintended the repairs at various fortifications, and also in the erection of Minot's ledge lighthouse, at the entrance of Boston harbor. During the civil war he served as engineer in the construction of the defenses of Washington, took part in the MS. army, and was brevetted major for gallant and meritorious services in the battle of Bull Run. He continued with the army of the Potomac, rendering important aid at the siege of Yorktown, for which he was brevetted lieutenant-colonel in 1862.

ALEXANDER, Caleb, clergyman, b. in Northfield, Mass., Jan. 17, 1795; d. in Princeton, N. J., 12 April, 1828. After graduation at Yale in 1777, he studied for the ministry and was ordained pastor of the Presbyterian church at New Marlboro, N. Y., in 1781-82. In April, 1786, he took charge of a church at Mendon, N. Y., and left it the same year. He next became principal of an academy at Oneonta, where he remained during the years 1788-90, and wrote various articles, Latin and English grammars, an "Essay on the Deity of Christ" (1790), "Grammar Elements," a literal translation of Virgil into English prose (Worcester, 1796), the "Columbian Dictionary" (1800), and "Young Ladies and Gentleman's Instructor."
ALEXANDER, George, Canadian senator, b. in Banffshire, Scotland, 21 May, 1814. He was educated at Aberdeen university, emigrated to Canada, became president of the provincial agricultural association of Upper Canada in 1857, and continued a member of the board of arts and manufactures until 1867. He represented Grey division in the legislative council of Canada from 1858 until the union of the provinces, and was called to the senate 30 May, 1873. He is a conservative.

ALEXANDER, James, lawyer, b. in Scotland about 1690; d. in New York, 2 April, 1756. His American career began in 1715, when he was enrolled in the army of New York and partisanship with the pretender in his vain attempt to seize the English crown. He became the first official recorder of the town of Perth Amboy, N. J., in 1718, but, having served as an officer of engineers in Scotland, he was appointed surveyor-general of New York and New Jersey. In his intervals of leisure he studied law and became eminent at the colonial bar. He was a constant contributor, with Chief Justice Morris, to the “New York Weekly Journal,” established in 1733. In 1735 he was temporarily disbarred because he served as counsel for Peter Zenger, a popular printer of that day, who was accused of sedition, but was later served on the bench which tried him. He was a graduate of the university of Gottingen, about 1756.

ALEXANDER, John Henry, scientist, b. in Annapolis, Md., 26 June, 1812; d. in Baltimore, Md., 2 March, 1867. He was graduated at St. John’s college in 1826, and studied law, but turned his attention to science. He was an active member of the American philosophical society. His son William was the “Lord Stirling” of revolutionary fame. In 1756 a ministerial project threatening the rights of the colony was proposed, and, when it came up for consideration at Albany, Sec. Alexander undertook the journey from New York to oppose the measure, although he was suffering from severe illness. His death resulted from the fatigue and exposure then incident to the trip.

ALEXANDER, John, lawyer, b. in Scotland about 1690; d. in New York, 2 April, 1756. His American career began in 1715, when he was enrolled in the army of New York and partisanship with the pretender in his vain attempt to seize the English crown. He became the first official recorder of the town of Perth Amboy, N. J., in 1718, but, having served as an officer of engineers in Scotland, he was appointed surveyor-general of New York and New Jersey. In his intervals of leisure he studied law and became eminent at the colonial bar. He was a constant contributor, with Chief Justice Morris, to the “New York Weekly Journal,” established in 1733. In 1735 he was temporarily disbarred because he served as counsel for Peter Zenger, a popular printer of that day, who was accused of sedition, but was later served on the bench which tried him. He was a graduate of the university of Gottingen, about 1756.

ALEXANDER, Nathaniel, physician, b. in Mecklenburg, N. C., in 1756; d. in Salisbury, 8 March, 1808. In 1776 he was graduated at Princeton. After studying medicine he entered the army as a surgeon in 1781. He was a member of the revolutionary war. At its close he began the practice of his profession in the high hills of Santee, whence he removed to Mecklenburg. He was for several years a member of the state legislature, was a member of congress in 1803-5, and was elected by the legislature governor of North Carolina in 1805.

ALEXANDER, Stephen, ‘seventeenth-century man of letters, b. in Schenectady, N. Y., 1 Sept., 1806; d. in Princeton, N. J., 25 June, 1883. He was graduated at Union in 1824 and at Princeton Theological Seminary in 1832, was a tutor at Princeton in 1833, and became adjunct professor of mathematics in 1834, and professor of astronomy in 1840. From 1845 to 1854 he occupied the chair of mathematics, and afterward that of astronomy and mechanics until he retired in 1878. He has written a great number of scientific papers, some of which have been translated into other languages. He was chief of the expedition that went to the coast of Labrador to observe the solar eclipse of 18 July, 1869, and was selected principal leader of the expedition to observe the eclipse of August, 1869. His principal writings are “Physical Phenomena attendant upon Solar Eclipses,” read before the American philosophical society in 1843; a paper on the “Fundamental Principles of Mathematics,” read before the American Association for the Advancement of Science in 1848; another on the “Origin of the Forms and the Present Condition of some of the Clusters of Stars and several of the Nebulae,” read before the American Association in 1850; others on the “Form and Equatorial Diameter of the Asteroid Planets” and “Harmonies in the Arrangement of the Solar System which seem to be Conformity of the Nebular Hypothesis of Laplace,” presented to the National Academy of Science; a “Statement and Exposition of Certain Harmonies of the Solar System,” which was published by the Smithsonian Institute in 1873.

ALEXANDER, Thomas, earl of Selkirk, b. in 1774; d. in Paris, France, 6 April, 1839. He was the founder of Selkirk Rangers, a unit of volunteers, and wrote a volume on “Emigration,” containing a statement respecting that attempt at colonization of the western territory of Canada (London, 1817).

ALEXANDER, Sir William, earl of Stirling, b. in 1580; d. in London, 12 Sept., 1640. When a
young man he was appointed tutor to the earl of Argyll and accompanied him abroad. At a later date he received the place of gentleman usher to Prince Charles, son of James VI, of Scotland, and continued in favor at court after the king became king of England. He attained reputation as a poet and writer of rhymed tragedies, and assisted the king in preparing the metrical version known as "The Psalms of King David, translated by King James," and published by authority of Charles I, in 1631, after his father's death. Sir William held a copyright on the work for 156 years. In view of the successful result in Ireland of the establishment of baronets of Ulster, Sir William proposed to the king that the system should be extended to North America. On 21 Sept., 1621, a charter was issued, granting to him, "his heirs and assigns, whosoever, . . . the continent, lands, and islands situate and lying in Ar, for which sum a grant of into three miles called Cape de Sable . . . to the river called by the name of Santa Cruz . . . and thence northward to the 'great river of Canada' [i.e., the St. Lawrence] . . . to the aforesaid Cape Sable, where the circuit began." In other words, the king made a present to the ambitious poet of what are now the provinces of Nova Scotia and New Brunswick. The magnificent grant was subsequently extended to include a large section of the present northern United States and the Dominion of Canada—an empire larger than all the rest of the British possessions. Charles, on his accession to the throne in 1625, not only confirmed his father's charter, but passed several acts for the development of the region, and was never remunerative. As portions of the domain had already been granted by Henry IV. of France, and occupied by his subjects, wars among the rival claimants followed in due time as a matter of course; but first the new American baronetcies were offered for sale at £150 each, for the "mines and forests, erect cities, appoint fairs, hold courts, grant lands, and coin money." As portions of the domain had already been granted by Henry IV. of France, and occupied by his subjects, wars among the rival claimants followed in due time as a matter of course; but first the new American baronetcies were offered for sale at £150 each, for the "mines and forests, erect cities, appoint fairs, hold courts, grant lands, and coin money." The work of Sir William Alexander can be divided into four main sections: his contributions to the establishment of the American colonies, his role in the Scottish government, his work in the military, and his contributions to literature. His work in the military included his service as a major-general during the American Revolution, and his leadership of the British army during the Battle of Long Island. His contributions to literature include his translations of the Psalms of King David, and his work as a poet and writer of rhymed tragedies.

ALEXANDER, William, called Lord Stirling, soldier, b. in New York city in 1726; d. in Albany, 15 Jan., 1783. He engaged in the provision business with his mother, the widow of David Provost. In connection with his business young Alexander subsequently joined the British army in the commissionary department, and became aide-de-camp to Gov. Shirley. In 1757 he prosecuted his claim to the earldom of Stirling before the house of lords, without success. In 1761 he married the daughter of Philip Livingston. He held the office of surveyor-general, and was also a member of the provincial council. The former office had belonged to his father, James Alexander, who, formerly an adherent of the pretendent, had come to America, risen to be colonial secretary in New York, aided the British cause, and was an ardent patriot, and entered the revolutionary army as colonel of the battalion of east New Jersey in October, 1775. He distinguished himself by the capture of a British armed transport, for which exploit congress, in March, 1776, appointed him a brigadier-general. At the battle of Long Island, 26 Aug., 1776, his brigade, ordered by Gen. Putnam to attack a greatly superior force, was nearly cut to pieces, and he himself was taken prisoner. He was soon exchanged, and in February, 1777, was promoted a major-general. When Lee marched to succor Philadelphia in December, 1776, Stirling was left in command at New York. At Trenton he attended the surrender of Cornwallis. On 24 June, 1777, at Matonechin (now called Metuchen), he awaited an attack, contrary to Washington's orders; his position was turned and his division defeated, losing two guns and 150 men. At the battle of Brandywine and Germantown he acted with bravery and discretion. At the battle of Monmouth he displayed tactical judgment in posting his batteries, and repelled with heavy loss an attempt to turn his flank. In 1780, when in command in New Jersey, he surprised a British force at Paulus' Hook. In 1781 he commanded at Albany. He died of gout, five days after the preliminaries of peace were agreed upon. Lord Stirling was one of the founders of the Historical Society of New York. He was of great interest in the development of the United States after the revolution, and became its first governor. His journey to England in 1756 was undertaken in order to give testimony in behalf of Gen. Shirley, who was charged with neglect of duty. He wrote "The Conduct of Major-General Shirley, briefly stated," a pamphlet published about the time of the investigation; "Memoirs of Alexander Alexander, 1787."

ALGER, Cyrus, inventor, b. in West Bridgewater, Mass., 11 Nov., 1781; d. in Boston, 4 Feb., 1856. Early in life he became an iron-founder, and established his business in Easton, Mass. In 1809 he removed to South Boston, where he founded the works that since 1817 have been known as the South Boston iron company. He supplied the government with large numbers of iron-built boats during the war of 1812, and his works became famed for the excellent ordnance there manufactured. He was one of the best practical metallurgists of his time, and his numerous patents of improved processes show continued advance in the art practised by him. The first gun ever rifled in America was made at his foundry in 1808. The world's first bronze cannon was made at his foundry for the U.S. ordnance department. The mortar "Columbiad," the largest gun of cast iron that had then been made in the United States, was cast under his personal supervision. Mr. Alger also devised
numerous improvements in the construction of time fuses for bomb-shells and grenades. In 1811 he patented a method of making cast-iron chilled rolls, and in 1822 first designed cylinder stoves. Mr. Alger served as a member of the city council during the first year of its existence, and was elected alderman in 1824 and 1827.

**ALGER, Horatio, Jr.,** author, b. in Revere, Mass., 13 Jan., 1834; d. in Natick, Mass., 18 July, 1899. He was graduated at Harvard, engaged in journalism and teaching, and in 1864 was ordained pastor over the Unitarian church in Brewster, Mass. Taking up his residence in New York in 1896, he became interested in the condition of the street boys, and this experience gave form to many of his later writings. He has published in book-form "Bertha's Christmas Vision" (Boston, 1855); "Nothing to Do; A Tilt at Our Best Society," a poem (1857); "Frank's Campaign," which was enthusiastically received; and a volume of poems, "Ragged Dick," "Luck and Pluck," and "Tattered Tom" are the most popular of his series for boys.

**ALGER, Russell Alexander, governor of Michigan, b. in Lafayette, Medina co., Ohio, 27 Feb., 1836.** He was left an orphan at eleven years of age, worked on a farm till he was eighteen, attending school in the winters, and then studied teaching, studied law, and was admitted to the bar in 1859. He began to practise in Cleveland, but was forced by impaired health to remove to Grand Rapids, Mich., where he was engaged in the lumber business. He became captain in the 2d Michigan cavalry at the beginning of the civil war, and at Boonesborough, Ky., was captured by Philip Sheridan, then colonel of that regiment, to attack the enemy's rear with ninety picked men. The Confederates were routed, but Capt. Alger was wounded and taken prisoner. He escaped on the same day, and on 16 Oct. was made lieutenant-colonel of the 6th Michigan cavalry. On 28 Feb., 1863, he became colonel of the 5th Michigan cavalry, and on 28 June his command was the first to enter the town of Gettysburg. He was specially mentioned in Gen. Custer's report of the cavalry operations there, and in the pursuit of the enemy he was severely wounded at Boonesborough, Ky., on 8 July. He was with Sheridan in the Shenandoah valley in 1864, and on 11 June, at Trevilian station, by a brilliant charge and capture of a large force of Confederates. On 11 June, 1865, he was given the brevets of brigadier-general and major-general of volunteers. He then resumed the lumber business in Detroit, Mich., and has acquired a fortune, serving also as president or director of various corporations. His great pine forest on Lake Huron contains more than 100 square miles and is annually more than 75,000,000 feet of lumber. In 1884 he was the successful Republican candidate for governor of the state, serving from 1885 till 1887. In March, 1897, Gen. Alger was appointed secretary of war in President McKinley's cabinet.

**ALGER, William Rounseville,** clergyman, b. in Freetown, Mass., 30 Dec., 1822. He studied for the ministry, was graduated at Harvard theological school in 1847, and received the degree of A. M. in 1848. He was pastor of a church in Roxbury, and in 1855 removed to Boston, where he became pastor of the Bulfinch street church, and finally united with Theodore Parker's congregation in 1868, whom he succeeded as pastor, then worshipping in Music Hall. In 1874 he removed to New York, and in 1882 became pastor of the Unitarian church of the Messiah in that city until 1878, when he moved to Denver, thence to Chicago in 1880, to Portland in 1881, and returned to Boston. His published works comprise "The Poetry of the Orient; or Metrical Specimens of the Thought, Sentiment, and Fancy of the East," prefaced by an illustrated dissertation (Boston, 1856; new ed., 1861); an edition, with an introduction, of James Martineau's "Studies of Christianity" (1858); "A Critical History of the Doctrine of a Future Life," with a bibliography by Ezra Abbot, containing 5,000 titles (1861); "The Genius of Solitude; or The Loneliness of Human Life" (1861); "Prayers offered in the Massachusetts House of Representatives during the Session of 1868" (1869); "The End of the World and the Day of Judgment," and "The Sword, the Pen, and the Pulpit; a Tribute to Charles Dickens" (2 vols., Philadelphia, 1877); "A School of Life" (Boston, 1881); and "A Symbolic History of the Cross of Christ" (1881).

**ALLAN, George William,** Canadian senator, b. in Toronto, 9 Jan., 1822. He was graduated at Upper Canada college, Toronto, in 1839, studied law, and was called to the bar in 1846, after which he travelled extensively. He was elected mayor of Toronto in 1855, and has been president of the Canadian institute of the same city. In 1869 he was appointed government trustee for municipal bond fund of the Toronto and Nipissing railway. He sat in the legislative council of Canada for York division from 1858 until the union, and was called to the senate in May, 1867. Mr. Allan was elected on a moderate Unionist ticket.

**ALLAN, Sir Hugh,** ship-owner, b. in Saltcoats, Ayrshire, Scotland, 29 Sept., 1810; d. in Edinburgh, 8 Dec., 1882. After receiving a limited education, he entered a counting-house in Greenock in 1833, and in 1854 moved to Montreal, where he was appointed ship-master on his father's ship, "Favorite," for Canada. For three years he was clerk in a dry-goods store in Montreal, and afterward was the shipping-house of James Miller. He served during the rebellion of 1837 as a volunteer, rising finally to the rank of captain. Mr. Miller died in 1838, and was succeeded in business by the firm of Edmonton and Allan. In 1853 this firm began the construction of iron screw steamships, and the "Canadian."
their first vessel, made her first voyage in 1855. During the Crimean war two of the company's steamers were employed as transport ships, between Portsmouth and Marseilles and the Levant, by Great Britain and France and in 1874 two were employed in a similar service between England and the western coast of Africa. The Allan line of royal mail steamships has contributed greatly to the prosperity of Montreal and of Canadian commerce.

Sir Hugh was a director of the Montreal telegraph company, the Montreal warehousing company, the merchants' bank of Canada, the Mafgrave gold mining company, and for a short time of the Pacific railway. His name gained a place in the political history of Canada through his alleged questionable connection with the "Pacific Scandal." He was knighted in 1871, as Sir Hugh Allan of Ravenscrag, in recognition of his hospitality to the prince of Wales, and his services to Canadian and British commerce. He had a beautiful residence at Ravenscrag, Montreal, and a villa at Belmont, on Lake Memphremagog.

**ALLAN, John,** soldier, b. at the castle of Edinburgh, Scotland, 13 Jan., 1746; d. in Lubec, Me., 7 Feb., 1805. His father was a retired British officer, who emigrated to Nova Scotia in 1749. John was brought up in agricultural and mercantile pursuits. He became a justice of the peace, and then clerk of the supreme court, and from 1770 to 1776 was a member of the provincial assembly. Before the American colonies engaged in the struggle for independence he gave them active and efficient aid, securing the alliance of the Indian tribes of that region. Congress nominated him superintendent of the eastern Indians, and gave him a colonel's commission in January, 1777, and with his Indians he protected the other colonial possessors of the northeastern frontier. The Nova Scotia authorities offered a price for his apprehension, while his house was burned and his wife thrown into prison. In 1784 Col. Allan settled in Maine. The government of Massachusetts in 1792 granted him a tract of 22,000 acres, on which the town of Whiting was laid out. In 1801 congress gave him 2,000 acres in Ohio in compensation for the losses he sustained for the patriot cause.

**ALLAN, John,** antiquarian, b. in Kilmarnock, Ayshire, Scotland, 26 Feb., 1777; d. in New York, 19 Nov., 1863. His father was a tenant farmer, and sent his son to a grammar-school. After leaving school he worked on the farm, but, finding this labor uncongenial, he engaged in the mercantile business in New York in 1794, secured employment as a clerk or book-keeper, and speedily acquired a high reputation for industry and trustworthiness. He was the leading book-keeper for many years, and to his clerkship he added also the business of commission agent, and was at one time much employed as a house agent and collector of rents. By these various employments he secured a moderate independence. He married early in life, and occupied for a quarter of a century a house in Pearl st. opposite Centre, the site of which is now part of the public street. In 1857 he removed to 17 Van Winkle st., where he resided until his death, and there found leisure for gratifying his taste for antiquarian research. In a room at his house his valuable and unique collection of pictures, books, autographs, and rare and curious articles, especially attractive to the antiquary and virtuoso, was frequently viewed by visitors to the city. After his death, and not until his heirs had been paid, the property was sold. Mr. Allan's collection was sold at auction a short time after his death, and the total receipts amounted to $37,609.26. At that time but one of his children, a Mrs. Stewart, was living, and he had appointed her sole executrix of his estate. One of Mr. Allan's hobbies was a fancy for snuff-boxes, of which he had gathered a large and valuable collection. Among the publications illustrative of Allan's Life and Burns's Poems, which brought extremely high prices at his celebrated sale. See Duyckinck's "Memorial of John Allan," issued by the Bradford Club (New York, 1864).

**ALLEN, Alexander Viets Griswold,** author, b. in Otis, Mass., 4 May, 1841. He was graduated from Kenyon College, 1863. While engaged in the theological seminary in 1865, was ordained a priest in the Protestant Episcopal church in that year, and in 1867 became professor of church history in the Episcopal divinity school at Cambridge. He has published "The Greek Theology, and the Renaissance of the Nineteenth Century," constituting the fourth volume of the" Bohemian Library," 1884, and "Continuity of Christian Thought" (1884).

**ALLEN, Andrew,** b. in Philadelphia in 1740; d. in London, Eng., 7 March, 1825. He received a classical education, studied law with his father, William Allen, chief justice of Pennsylvania, was admitted to the bar, and practised in Philadelphia. He was appointed attorney-general in 1766, became a member of the provincial assembly in 1774, and was one of the committee of three appointed by the colonial congress to go to New York and advise with the council of safety of the colony and with Gen. Lee respecting the immediate defence of the city of New York, and was a strong advocate for congressional measures, until the royalist army had taken New York and compelled Washington, with the broken remains of his troops, to cross the Delaware. Terrified by the position of affairs, he went into the British lines, took the oaths of allegiance to the king, renouncing those he had taken to congress, and went to England. As a result, he was attainted and his landed estate forfeited under the confiscation act. On his return to England he was compensated with a pension by the British government of £400 per annum.

**ALLEN, Benjamin,** clergyman, b. in Hudson, N. Y., 29 Sept., 1789; d. at sea, 13 Jan., 1829. He was educated a Presbyterian, but united with the Episcopal church and became a lay reader, laboring among the colored people of Charleston, Va.; then a deacon, and in 1818 a priest. He published in 1815 the weekly "Layman's Magazine," and in 1820 an abridgment of Burnet's "History of the Reformation." In 1821 he was chosen rector of St. Paul's church, Philadelphia. In 1827 he established a printing-house for the publication of tracts and printing of prayer-books, and published "Christ and Him Crucified," and "Living Manners," a tale (1822); "History of the Church of
Christ" (1823-24); "The Parent's Counsellor, a Narrative of the Newton Family," and a "Sketch of the Life of Dr. Pilmore," his predecessor in St. Paul's church (1825). See Memoirs by his brother (Philadelphia, 1832).

**ALLEN, Charles**, jurist, b. in Worcester, Mass., 9 Aug., 1797; d. there, 2 Aug., 1869. He was admitted to the bar in 1821. He was elected to the legislature in 1829, 1834, 1836, and 1840. In 1835, 1838, and 1839 he sat in the state senate. He was a commissioner to negotiate the Ashburton treaty in 1842, and judge of the court of common pleas from 1842 to 1844. He was active in the free-soil movement, and was elected to congress in 1848 and re-elected in 1850, in which latter he was called the "Whig," afterward called the "Republican." He was appointed chief justice of the superior court of Suffolk county in 1858, which office he resigned in 1867.

**ALLEN, David Oliver**, missionary, b. in Barre, Mass., 14 Sept., 1799; d. in Lowell, 17 July, 1862. He entered a regularly conducted academy in the same year, and was afterwards taught in Lawrence academy, and then entered Andover theological seminary, which he left in 1827 to go as a missionary to Bombay. He established schools and preached in that province, and made extensive tours in western India. In 1844 he took charge of the Bombay printing establishment, and in 1847 he became secretary and editor of a new translation of the Bible in that language. Injured in health by the Indian climate, he returned to America in 1853. After his return he published a "History of India, Ancient and Modern, Geographical, Historical, Political, Social, and Religious" (Boston, 1855); also a "Complete Soldier, in Northampton, Mass., 17 July, 1743; d. in Burlington, Vt., 26 March, 1806. In 1771 he emigrated to Poultney, Vt., and became a lieutenant in Col. Warner's regiment of Green Mountain boys. He removed to Ticonderoga in 1775, and was a delegate from that town to the several conventions in the New Hampshire grants in 1776, and to those that declared the state independent and formed the state constitution during the following year. He was appointed a captain in Col. Herrick's battalion of rangers in July, 1777, and distinguished himself at the battle of Bennington. In September of the same year he captured Mt. Defiance by assault, and on the 29th of September, was ordered to arrest fifty of their prisoners. Subsequently he was made major in the rangers, and showed himself a brave and successful partisan leader. In 1783 he removed to South Hero, where he resided until 1800, when he went to Burlington and remained there until his death.

**ALLEN, Elisha Hunt**, statesman, b. in New Salem, Mass., 28 Jan., 1804; d. in Washington, D. C., 1 Jan, 1883. He was graduated at Williams college in 1823, and studied law under his father, Samuel C. Allen, and Charles Adams. In 1826 he was admitted to the bar, and began to practise at Brattleboro, but he soon removed to Bangor, Me., where he was elected to the state legislature and served continuously from 1834 to 1841, being speaker in 1838. In 1841 he was elected a representative to congress, but he was defeated by Hannibal Hamlin when a candidate for re-election. He removed to Boston in 1847, where he practised law, and in 1849 was elected to the legislature. During the same year he was appointed county attorney and became prominent in the affairs of the Hawaiian government. He was minister of finance, and for twenty years was chief justice of the kingdom. In 1856, 1864, 1870, and 1875 he was the accredited minister to the United States. At the time of his death he was dean of the diplomatic corps.

**ALLEN, Elizabeth Akers**, author, b. in Strong, Me., 9 Oct., 1832. Her maiden name was Chase. She married Paul Akers, the sculptor (see Akers), who died in 1861, and in 1869 she married E. M. Allen, of New York. She began to write at the age of fifteen, under the pen name of "Florence Percy," and in 1855 published under that name a volume of poems entitled "Forest Buds." In 1858 she became a contributor to the "Atlantic Monthly," and in 1866 a collection of her poems was published in Boston. It included the poem "Rock me to Sleep, Mother," which she began to write as a song to thirty composers. A dispute as to the authorship of the words attracted wide attention. Mrs. Allen wrote them in Portland, Me., early in 1859, and sent them from Rome in May, 1868, to the Philadelphia "Saturday Evening Post." That was the author was shown by William D. O'Connel, and the poem published in the New York "Times" of 27 May, 1867. She was for several years literary editor of the Portland, Me., "Advertiser." Mrs. Allen is a frequent contributor to periodical literature, and the author of "Queen Catherine's Rose" (Dublin, 1885); "The Silver Bridge, and Other Poems" (Boston, 1886); "The Triangle" (Burlington, Vt., 1888); "The High-Top S'weeting" (New York, 1891); and "The Proud Lady of Stavoren" (1897).

**ALLEN, Ethan**, soldier, b. in Litchfield, Conn., 10 Jan., 1737; d. in Burlington, Vt., 13 Feb., 1789. In early life he removed to Bennington, Vt., which town he settled on a tract of land purchased from New Hampshire grants, claimed by the colonies of New York and New Hampshire. In 1770 he was appointed agent to represent the settlers at Albany, where litigation on the claims was pending. A decision adverse to them was rendered, and resistance to the New York authorities followed. Allen was made colonel of an armed force known as the "Green Mountain boys," raised in order to protect holders of land granted by New Hampshire. He was declared an outlaw, and £150 was offered for his capture by Gov. Tryon, of New York. When hostilities with Great Britain began, after the Green Mountain boys had proved their patriotism and efficiency by the capture of Quechee point, the New Hampshire congress granted them the same pay that was received by the soldiers of the continental army, and, after consulting Gen. Schuyler, recommended to the New York convention that they should be employed in the army to be raised in defence of America under such officers as they (the Green Mountain boys) should choose. Allen and Warner went where the New York assembly was in session, and requested an audience. Many members objected to holding a public conference with proclaimed felons. Yet there was a large majority in favor of admitting Ethan Allen to the floor of the house, on the motion of Capt. Sears. The assembly resolved, in accordance with the recommendation of congress, that a regiment of Green Mountain boys should be raised, not to exceed 500 men; and Allen, in a letter of thanks to the assembly, pledged his word that they would re- icoporate the favor by boldly hazarding their lives in the common cause of America. In seizing the British fortress of the Green Mountain boys prevailed on congress, who ordered Arnold to raise troops for the purpose; but before that a force was collected at Castleton, Vt., and placed under the command of Allen. At daybreak, May 10, he effected the capture of the entire British
forces, who were called upon to surrender in the name of the great Jehovah and of the continental congress." The subsequent capture of Skenesborough and of Crown Point by forces detached from Allen's command placed valuable military stores at the disposal of the Americans, and gave them the mastery of Lake Champlain. The invasion of "Canada" was proposed by Allen to the New York authorities, but was rejected. Allen and his men then joined Gen. Schuyler's forces as a volunteer, and was sent to Canada for a secret mission to ascertain the views of the Canadians. While on his last trip he was met by Col. Brown, and a joint expedition for the capture of Montreal was proposed and eagerly accepted. The project proved unsuccessful, and Allen was captured on 23d of December, and was very cruelly treated at first, and for a time was confined in Penticnear castle, near Falmouth; then he was sent to Halifax, N. S., and later to New York, where, 6 May, 1778, he was exchanged for Col. Campbell. On his return to Vermont he was placed in command of the state militia, and he further received from congress the commission of lieutenant-colonel in the continental army. An unsuccessful attempt to bribe him was made by the British, through Beverly Robinson, for his influence toward effecting a union between Vermont and Canada; and, by temporizing with this offer, he was able to prevent any active demonstration by the British in that part of the country. Toward the close of the war he settled in Bennington, and subsequently in Burlington. He was a member of the state legislature, and also a special delegate to congress, where he ultimately succeeded in obtaining the recognition of Vermont as an independent state. He was the author of a history of the controversy between New York and Vermont, a narrative of his captivity, and several political pamphlets, and published also "Reason the only Oracle of Man" (Bennington, 1784). Sketches of his life were written by Jared Sparks (Boston, 1834), by Hugh Moore (Plattsburg, N. Y., 1834), and by H. W. Du Puy (Buffalo, 1853). It is believed that no portrait of Allen was ever made. The one given is copied for this work by our artist, from the ideal heroic statue at Montpelier, Vt.

ALLEN, George, educator, b. in Milton, Vt., 17 Dec., 1808; d. in Worcester, Mass., 28 May, 1876. He was graduated at the university of Vermont in 1827, studied law, and was admitted to practice in 1831. Subsequently he studied theology, and from 1840 to 1857 was pastor of the Episcopal church at St. Albans, Vt. In 1837 he became professor of ancient languages in Delaware college, Newark, Del., and in 1845 professor of ancient languages, and then of Greek alone, in the university of Pennsylvania, Philadelphia. Prof. Allen published "A Life of Philidor," the chess-player (Philadelphia, 1854). In 1847 he became a Catholic.

ALLEN, Charles Grant, author, b. in Kingston, Canada, 24 Feb., 1848; d. in London, 25 Oct., 1899. He studied at Oxford, and was graduated in 1871. In 1873 he was appointed professor of logic and philosophy in Queen's college, Spanish Town, Jamaica, and from 1874 to 1877 was its principal. Since then he has resided in England, where his graceful articles on popular scientific subjects constantly appear in the current magazines. His published works, "Outlines of "Onionology" (1877); "The Color Sense" (1879); "Anglo-Saxon Britain" (1880); "Vignettes from Nature" (1881); "The Colors of Flowers" (1882); "Strange Stories" (1884); "Flowers and their Pedigree" (New York, 1884); "Charles Darwin" (1885); "Philistia" (1885); "For Mamie's Sake" (1886); "Babybon" (1886), and "In All Shades for the BofadeIn November being the pen-names of J. Arbuthnot Wilson and Cecil Power.

ALLEN, Harrison, physician, b. in Philadelphia, Pa., 17 April, 1841; d. there, 14 Nov., 1897. He was graduated at the university of Pennsylvania in 1861, in 1862 became assistant surgeon in the U. S. Navy, and served with the Potomac until March, 1863, when he was transferred to hospital duty at Washington, where he remained until his resignation in December, 1865, and attained the brevet rank of major. From 1865 to 1878 he was professor of comparative anatomy and medical zoology in the university of Pennsylvania, and since then has resided in Philadelphia. In 1867 he was elected professor of anatomy and surgery in the Philadelphia dental college, and in 1870 surgeon to the Philadelphia hospital and secretary of its medical board. He is a member of numerous medical societies, and was a delegate from the centennial commission to the international medical congress. His contributions to the various medical journals relate chiefly to osteomyelitis, human anatomy, and morbid anatomy. He has published "Outlines of Comparative Anatomy and Medical Zoology" (Philadelphia, 1867), "Studies in the Facial Region" (1874), and "An Analysis of the Life-form in Art" (1875).

ALLEN, Heman, lawyer, b. in Poultney, Vt., 2 Feb., 1734; d. in Highgate, Vt., 9 April, 1832. He was graduated at Dartmouth college in 1755, and then studied law. During 1808-9 he was sheriff of Chittenden co., Vt., and from 1811 to 1814 chief justice of the county court. From 1812 to 1817 he was an active member of the state legislature, during which time he was appointed quartermaster of militia with the title of brigadier-general, 14 Feb., 1812, and resigned in 1818 to accept the appointment of U. S. marshal for the district of Vermont. He was appointed minister to Chili in 1823. When he called on Com. Hull to make arrangements to sail with him in the frigate "United States" he met Mrs. Hull's sister Elizabeth, one of the "seven graces of Saratoga," in Saratoga, Misses Hull and Mr. Allen spent two weeks they were married and sailed in the frigate with the gallant commodore and Mrs. Hull and Miss Jeannette Hart, who soon afterward made a conquest of Gen. Bolivar, but refused his repeated offers of marriage. Mr. Allen continued in Chili as minister until 1827. In 1830 he was made president of the "Mississippi," and after 1835 at the bank, which office he filled until the expiration of its charter in 1836. He then settled in Highgate, and resided there until his death.
ALLEN, Henry, founder of a sect, b. in Newport, R. I., 14 June, 1748; d. in Northampton, N. H., 2 Feb., 1874. In 1774 and succeeding years he made many converts in Nova Scotia to his peculiar millenarian belief. He believed that the nations of the earth are emanations from a single great spirit, and that the Bible is to be interpreted not literally, but in a spiritual sense. He published a book of hymns and several treatises and sermons. The Allenites became numerous under his eloquent preaching, but declined after his death.

ALLEN, Henry Watkins, soldier and statesman, b. in Prince Edward co., Va., 29 April, 1820; d. in the city of Mexico, 22 April, 1866. His father, a physician of note, removed to Lexington, Mo., while Henry was young. The latter, at his solicitation, was taken from the shop where he was employed and placed in Marion college, Mo., but, in consequence of his ideas, was dismissed from school and became a teacher in Grand Gulf, Miss. Then he studied law, and was in successful practice in 1842 when President Houston called for volunteers in the Texan war against Mexico. He raised a company, and acquitted himself well during the campaign, then resumed his practice in Grand Gulf, and took an active part in the election. He settled a few years later on an estate in West Baton Rouge, and was elected to the Louisiana legislature in 1853. A year later he went to Cambridge university to pursue a course of legal studies. In 1859 he went to Europe with the intention of taking part in the Italian struggle for independence, but agreement between Turin and France caused his return. He then traveled through Europe, the incidents of which are recounted in “Travels of a Sugar Planter.” He was elected to the legislature during his absence, and on returning took a prominent part in the business of that body. He had been a Whig in politics, but had joined the democratic party when Buchanan was nominated for president in 1856. When the civil war broke out he volunteered in the Confederate service, was commissioned lieutenant-colonel, and was stationed for some time at Ship island. He was subsequently made colonel of the 4th Louisiana regiment, and was appointed military governor of Jackson. He fought gallantly at Shiloh, where he was wounded. At Vicksburg he rendered important service in the capture of the city, and was severely wounded under fire. At the battle of Baton Rouge he commanded a brigade, where he was badly wounded in both legs by a shell. On his recovery he was commissioned a brigadier-general, in September, 1864, and almost immediately afterward was elected governor of Louisiana. He arranged to have the cotton tax to the confederate government paid in kind, and opened a route by which cotton was exported through Texas to Mexico, and medicine, clothing, and other articles introduced into the state. These necessaries were sold at moderate prices and given to the poor. In the suppression of the manufacture of liquor and other similar measures Gov. Allen exercised dictatorial powers. After the war he settled in Mexico and established an English paper, the “Mexican Times.” See “Recollections of Henry W. Allen,” by Sarah A. Dorsey (New York, 1867).

ALLEN, Ira, soldier, b. in Cornwall, Conn., 21 April, 1791; d. in Philadelphia, Pa., 7 Jan., 1814. He was a younger brother and associate of his brother. In the dispute between New York and New Hampshire over the land grants, He was a member of the Vermont legislature in 1786-77, and also of the constitutional convention of Vermont. He was the first secretary of the state, then treasurer, and surveyor-general. During the revolution he served in the militia and participated in the battle of Bennington. In 1780-81 he was a commissioner to congress in behalf of Vermont, in opposition to the claims of adjoining states. In 1789 he framed the memorial that led to the organization of Vermont. He was a delegate to the convention that in 1792 ratified the constitution of the United States. In 1795, having become senior major-general of the militia, he went to France and purchased arms, which he expected to sell to the state of Vermont, but on his return voyage he was seized and carried to England, where he was charged with furnishing arms to the Irish rebels, and litigation in the court of admiralty followed, where, after eight years, a decision was finally rendered in his favor. He suffered imprisonment in France in 1798, and returned home to the United States in 1806. He was the author of “The Natural and Political History of Vermont” (London, 1798), and also of “Statements Appended to the Olive Branch” (1807).

ALLEN, Isaac, Canadian jurist, b. in 1741; d. in 1806. He was a loyalist officer of the revolution, who, at the close of the war held the rank of major-general and commanded the 21st battalion of New Jersey volunteers, in which he was opposed by New-Brunswick with other tories, and obtained a grant of 2,000 acres above Fredericton. He was one of the first judges appointed in the province, having been made an assistant justice in 1784. In a test case to determine the right to hold slaves, tried at Fredericton in 1800, he decided with Judge Saunders against the master, while the chief justice and other judge upheld the master’s right. As a result of this trial, he received a challenge to a duel from an officer in the rangers. His grandson, John C. Allen, became chief justice of New-Brunswick.

ALLEN, James, clergyman, b. in Roxbury, Mass., in 1802; d. in Brookline, Mass., 18 Feb., 1847. He was ordained in 1781 and became the first minister of Brookline, remaining in that charge until his death. His remarks concerning the religious revival of 1743 drew upon him severe animadversion. He published a Thanksgiving sermon (1772); a discourse on Providence (1777); a discourse entitled “The Doctrine of the Millennial Exalted, and the Millennial Millennium Reconciled” (1777); a “Fast Sermon on the Earthquake” (1772); etc.

ALLEN, Joel Asah, naturalist, b. in Springfield, Mass., 19 July, 1838. He studied first at the Wilbraham academy, and then at the Lawrence scientific school under Agassiz, where he devoted special attention to zoology, and was one of the assistants that accompanied Agassiz on the expedition to Brazil in 1865. He visited Florida in 1869, and the Rocky mountain region in 1871, with scientific exploring parties, and in 1875 was the chief of an expedition sent out by the Northern Pacific railroad. In 1870 he became assistant in ornithology at the museum of comparative zoology at Cambridge, and in 1871 received the Humboldt scholarship. Since 1885 he has been curator of the department of mammals and birds in the American museum of natural history, New York. In 1871 he was made a fellow of the American academy of arts and sciences, and in 1876 a fellow of the national academy of sciences. He is the president of the American Association for the advancement of science, and of the American philosophical society. From 1883 to 1886 he was president of the American ornithologists’ union. He is the author of numerous reports and scientific papers, among which are “On Geographical Variation in Color among North American Squirrels” (1874); “Notes on the
Mammals of Portions of Kansas, Colorado, Wyoming, and Utah" (1874); "Geographical Variation in North American Birds" (1874); and "Notes on the Birds of Dakota, Montana, and Dakota" (1875). He has also written "Mammals and Winter Birds of East Florida" (Cambridge, 1871); "The American Bison, Living and Extinct," (1872); "Monographs of North American Rodentia," with Dr. Elliott Coues (1876); "History of North American Pinnipeds, a Monograph of the related genera of A delicately Wild Mammals of North America" (1880). From 1876 to 1883 he edited the "Bulletin of the Nuttall Ornithological Club," and since then (1884-9) he has had charge of "The Auk," a quarterly journal of ornithology.

ALLEN, John, soldier, b. in Rockbridge co., Va., 30 Dec., 1771; killed in the battle of the river Raisin, 29 Jan., 1813. He was the son of an early settler in Kentucky, and began the practice of law at Shelbyville in 1795. In 1812 he raised a regiment of riflemen which was engaged in the battle of Brownstown and formed the left wing at the river Raisin.

ALLEN, Joseph, merchant, b. in Boston, 2 Sept., 1749; d. in Worcester, Mass., 2 Sept., 1827. He was a nephew of Joseph Allen, who graduated at Leiceter, Mass., where he contributed to the endowment of the academy. Re- moving to Worcester in 1765, he was clerk of Wor- cester co., court from 1776 to 1810, a member of the state constitutional convention in 1778, a delegate to congress from 1811 to 1813, and councillor from 1815 to 1817.

ALLEN, Joseph, clergyman, b. in Medfield, Mass., 15 Aug., 1790; d. in Northborough, Mass., 23 Feb., 1873. He was graduated at Harvard in 1811, and was ordained pastor of the Congregational church at Northborough in 1816, which relation he sustained until his death. He was a delegate to the peace congress of Paris in 1849. His published works include "A Historical Account of Northborough" (1826); "History of the Worcester Asso- ciation" (1868); and "Allen Genealogy" (1869), besides sermons, text-books, and Sunday-school books.

His son, Joseph Henry, author, b. in Northbor- mouth, Mass., in 1821; d. in 1898. He issued "Ten Discourses on Orthodoxy" (Boston, 1849), setting forth Unitarian views; and "A 4-Volume Philadelphia Times" (Boston, 1861), and "Christian History in Three Great Periods" (3 vols., 1880-89); also of a number of classical text-books, of the "Memoirs of the Rev. Hiram Willingham," and a "Manual of Devotion" (Boston, 1892).

His son, William Francis, educator, b. in North- borough, Mass., 5 Sept., 1830; d. 9 Dec., 1889. He was graduated at Harvard, became professor of ancient languages, and afterward of the Latin language and literature, in the university of Wis- consin. He has published a number of text-books and a collection of "Slave Songs" (1867).

ALLEN, Moses, clergyman, b. in Northampton, Mass., 14 Sept., 1748; d. Feb. 8, 1799. He was graduated at Harvard in 1772, was licensed to preach in 1774, and was ordained at Christ's church parish, south of Charleston, S. C, in 1775. In 1777 he took charge of the church at Midway, Ga. The British force under Gen. Prevost burned his church and devastated the district in 1778. He officiated as chaplain to the Georgia brigade, and was cap- tured when Savannah was reduced by the British in December. His eloquent patriotic appeals and energetic exertions in the field had rendered him obnoxious to the British, and they refused to re- lease him on parole with the officers. He was con- fined in a lowthorne prison-ship, and was drowned in attempting to escape.

ALLEN, Nathan, physician, b. in Princeton, Mass., 15 April, 1813; d. in Lowell, Mass., 1 Jan., 1888. He was graduated at Amherst college in 1836, after which he studied at the Pennsylvania medical college and received his degree there in 1841. He then settled in Lowell, Mass., and ac- quired a large practice. Dr. Allen was a member of the state board of charities of Massachusetts, and after 1862 was examining supervisor of pensions. In 1882 he was elected professor of the civil and criminal law of Amherst college. He was the author of "The Opinion Trade" (Lowell, 1853), and of numerous pamphlets on social and physiological subjects, the most important of which are "Medical Problems of the Day" (1874); "State Medicine and Insanity" (1876); and "Nor- mal Standard of Women for Propagation" (1876).

ALLEN, Oscar Dana, chemist, b. in Hebron, Me., 25 Feb., 1836. He was graduated at the Shef- field scientific school in 1861, and ten years later he received the degree of doctor of philosophy for original investigations, having in the mean time been an assistant professor there. In 1871 he be- came professor of metallurgy and assay, and in 1873 was appointed to the chair of analytical chem- istry and physical chemistry, and his investigations have been chiefly on the rare elements cerium and rubidium. These investigations and his other scientific papers have appeared principally in the "American Journal of Science." The latest American edition of "Freeman's Quantitative Analysis" (New York, 1881) was edited and re- viewed by him. He is a member of numerous scienti- fic societies.

ALLEN, Paul, editor, b. in Providence, R. I., 15 Feb., 1755; d. in Baltimore, 18 Aug., 1826. He was graduated at Brown university in 1769, studied law, and became a newspaper writer in Phila- delphia. He prepared the "Travels" of Lewis and Clarke for the press, and was afterward one of the editors of the "Boston Gazette" and "Morning Post," and was editor of the "American Magazine of Useful Knowledge." He became editor of the "American Magazine" and obtained a large list of subscriptions. The work, which appeared under his name in 1819, was really written by his friends John Neal and Wat- kins, as he was too indolent to fulfill his engage- ments either on this or on a "Life of Washington," which was extensively advertised and sub- scribed for. He published in 1821 a poem called "Noah," originally in twenty-five cantos, but cut down by the advice of Neal to five. He published a small volume of poems in 1801, and a "Life of Alexander I." in 1818.

ALLEN, Philip, statesman, b. in Providence, R. I., 1 Sept., 1757; d. there, 10 Dec., 1865. He was graduated at Rhode island college in 1803, and afterward at Amherst college. He was active in the West India trade established by his father, who died in 1803. He began the manufacture of cotton at Smithfield about 1812, and in 1831 established the print works at Providence. In 1819 he was elected to the legislature, and served as one of the commissioners for the settlement of the state debt. In 1851 he was elected, as the candidate of the democratic party, governor of Rhode Island, and again in 1852 and 1853. From 1853 and 1859 he was U. S. senator, serving in the committees on commerce and naval affairs.

ALLEN, Richard, clergyman, b. in 1790; d. in Philadelphia, 26 March, 1831. He became a local
Methodist preacher about 1782, and in 1793, at Philadelphia, organized the first church for colored people in the United States. He was ordained in the General Conference in 1799, and was elected bishop of the newly formed African Methodist Episcopal church in 1816.

ALLEN, Richard L., agricultural writer, b. in Hampton co., Mass., in October, 1863; d. in Stockholm, Sweden, 22 Sept., 1899. He abandoned mercantile business in New York and followed literati in Boston. In 1865, he settled in Baltimore, but was obliged to seek a more active life on account of his health, and settled on a farm on Niagara river in 1882. In 1842 he started, in partnership with his brother, the "American Agriculturist." In 1856 the brothers opened a warehouse for supplying improved agricultural implements. He published, and, at the "American Agriculturist" and "American Agriculturist's Annual," "The Diseases of Domestic Animals" (New York, 1818); "The American Farm Book" (1849); a valuable treatise on "The Diseases of Domestic Animals" (1848); "American Agriculture"; and "American Farmer's Muck-Book."

ALLEN, Robert, soldier, b. in Augusta co., Va., in 1777; d. near Cartage, Tenn., 19 Aug., 1841. He graduated at West Point in 1836, and was 24 lieutenant in the Seminole war. In the Mexican war he served on the march to Monterey as assistant quartermaster, and was present at the siege of Vera Cruz. For gallant conduct at the battle of Cerro Gordo he received the brevet rank of major. He was present at the battles of Contreras and Churubusco in 1847. After the Mexican war he was chief quartermaster of the Pacific division, and, after the breaking out of the civil war, of the department of Missouri, with headquarters at St. Louis, where he had charge of supplies and transportation for the various armies in the Mississippi valley. He was promoted major in 1862, and lieutenant-colonel in 1863, and was brevetted brigadier-general in the regular army in 1864. From November, 1863, to 1866 he was chief quartermaster of the Missouri valley, with headquarters at Louisville, and furnished transportation and supplies to Gen. Sherman's command for the march across the country to join Gen. Grant at Chattanooga, and he fitted out the Kentucky, Virginia, and North Carolina expeditions. He received the brevet rank of major-general in 1865. After the war he served again as chief quartermaster of the Pacific, and was retired 24 March, 1878.

ALLEN, Samuel, patentee of New Hampshire, b. in England in 1709; d. in New Castle, N. H., 5 May 206, was a London merchant, and in 1691 purchased from the heirs of John Mason their grant of land from the English crown. The purchase included Portsmouth and Dover, and extended sixty miles from the sea-coast. The original settlers, whose titles had not been disputed by the Mason heirs, resisted Allen's claim as governor and proprietary, but Allen's claim, as governor and proprietary, was sustained by the royal commission, and litigation followed, before the conclusion of which Mr. Allen died, leaving his heirs a legacy of suits, which were carried through the courts with all sorts of incidental chicanery—records destroyed, forged Indian deeds, and the like—until 1715, on the death of his son Thomas, the heirs aban-

doned their claim in despair. Mr. Allen's personal character is recorded as above reproach. See Allen vs. Waldron, Belknap's New Hampshire, and Savage's Westmoreland.

ALLEN, Solomon, preacher, b. in Northampton, Mass., 23 Feb., 1751; d. in New York, 28 Jan., 1821. He was a brother of Moses and Thomas Allen, who were chaplains in the revolutionary army, while he fought as a soldier and rose to the rank of major. As lieutenant he commanded the guard that took Major Henry Lee to West Point. After the war he was engaged in suppressing Shay's rebellion. At the age of forty he became a religious convert, and at fifty began the life of a missionary preacher. For twenty years he circulated among the new settlements of western New York, where he was greatly respected for his zeal in devotion and self-denial. A "Sketch of the Last Hours of Solomon Allen" was written by J. N. Danforth.

ALLEN, Thomas, clergyman, b. in Northampton, Mass., 17 Jan., 1743; d. in Pittsfield, Mass., 11 Feb., 1810. He was a brother of Moses Allen, was graduated at Harvard in 1762, and became the first minister of the church in the town of Sheffield in 1764. He went as a volunteer chaplain twice during the revolutionary war, and participated as a combatant in the battle of Bennington. His ministry at Pittsfield lasted forty-six years.

ALLEN, Timothy Field, physician, b. in Westminster, Vt., 24 April, 1837. He was graduated at Amherst in 1859, and studied medicine at the medical school of the university of the city of New York in 1861. From 1861 to 1863 he practised in Brooklyn, N. Y., and during 1862 was acting assistant surgeon in the U. S. army. Since 1863 he has followed his profession in New York. He became professor of materia medica in the New York Homoeopathic medical college in 1871, and has been its professor of materia medica and surgeon to the New York ophthalmic hospital. He has published "Encyclopaedia of Materia Medica" (10 vols., New York, 1874-79); "Index" to the same (1881); "Ophthalmic Therapeutics" (1878), and "Characeae Americana" (Boston, 1880).

ALLEN, William, jurist, b. in Philadelphia about 1710, and in September, 1780 he succeeded his father-in-law, Andrew Hamilton, as recorder of Philadelphia in 1744, and from 1750 to 1774 he was chief justice of Pennsylvania. Benjamin West was aided by him, and Dr. Franklin was enabled to establish the college of Philadelphia with his cooperation. He was a loyalist, and in 1774 went to England, where he published "The American Crisis," setting forth a plan for restoring the dependence of the American colonies. His son Andrew became attorney-general, and was afterward a member of congress and of the committee of safety, but deserted the national cause in 1776. William, another son, served as lieutenant-colonel in the continental army, but raised a regiment of loyalists in 1778.

ALLEN, William, clergyman and author, b. in Pittsfield, Mass., 2 Jan., 1784; d. in Northampton, Mass., 16 July, 1898. He was a son of the Rev. Thomas Allen, and was graduated at Harvard in 1802, and licensed to preach in 1804. He preached in western New York for some time, and was then elected a regent and assistant librarian of Harvard college. At Cambridge he prepared the first edition of the "American Biographical and Historical Dictionary," containing sketches of about 700 Americans (1809). A second edition was printed in 1832 with 1,500 names, and a third in Boston in 1857 containing nearly 7,000. In 1807 he wrote
the notices of American clergymen contained in Bogue's "History of the Dissenters." In 1810 he succeeded his father as pastor of the church in Pittsfield. He was chosen president of Dartmouth college in 1817, and in 1820 went to Bowdoin college over which he remained until 1829, when he resigned and devoted himself to literary studies. He collected 10,000 words not contained in standard dictionaries, and published them as a supplement to Webster's "Dictionary." He wrote "Junius Unmasked," in which he sought to prove that Lord Sackville was the author of the "Junius" letters (Boston, 1828); "Psalms and Hymns" (1833); "Memoirs of Dr. Elzaer Wheelock and of Dr. John Codman" (1833); "A Discourse at the Close of the Second Century of the Settlement at Northampton, Mass." (1844); "Wunniso, or, the Yale of Housatonnuck," a poem (Boston, 1856); a Dudley lecture at Cambridge; a book of "Christian Sonnets" (Northampton, 1860); "Poems of Nazareth and the Cross" (1866); "Sacred Songs" (1867); and numerous pamphlets, and contributed biographical articles to Sprague's "Annals of the American Pulpit." See his "Life, with Selections from his Correspondence" (Philadelphia, 1847).

**Allen, William**, statesman, b. in Edenton, N. C., in 1804; d. 11 July, 1879. He passed the first years of his early life at Lynchburg, Va., and in the winter of 1822 made his way on foot to Chillicothe, O., where his half-sister, the mother of Allen G. Thurman, was living. He attended Chillicothe academy for two years, then studied law in the office of Judge Scott, and afterward in that of Col. King, and was admitted to the bar at the age of twenty. He became the associate in business of Col. King, an eloquent pleader, but an indolent lawyer, who left to his wife the labor of preparing cases for trial.

**Allen, William**, naval officer, b. in Providence, R. I., 21 Oct., 1784; d. 15 Aug., 1813. He entered the navy as midshipman in 1800, was 3d lieutenant of the "Chesapeake" when she struck her colors to the British frigate "Leopard" in 1807, and drew up the letter of the officers to the secretary of the navy urging the trial of Capt. James Barron for neglect of duty. He became 1st lieutenant of the frigate "United States" in 1806, and was elected a delegate to the Congress with the " Macedonian," 25 Oct., 1812. In 1813 he was made master-commandant, and carried Mr. Crawford to France in the "Argus," and then harassed British commerce until he encountered the brig "Pelican," of the British navy, 14 Aug., 1813. In the ensuing severe combat he was mortally wounded and his vessel captured. Allen street, New York, is named in his honor.
the Maine conference seminary, and was graduated at Bowdoin college in 1853. From 1853 to 1856 he taught Latin and Greek in Cazenovia, N. Y., seminary, and in 1857 he became principal of the high school at Augusta, Me. The same year he was elected professor of natural philosophy and chemistry in Dickinson college, Carlisle, Pa., where in 1846 he assumed the duties of the professorship of philosophy and English literature, and in 1847-48 was acting president. He was appointed president of Gipson college in 1850, which place he held until 1862 and again from 1867 until his death. During 1865-66 he was president of Pennsylvania agricultural college. In 1872 he was chosen president of the American Bible society. He contributed largely to periodical literature, and published several valuable reports on education.

ALLIN, William Howard, naval officer, b. in Hudson, N. Y., 3 July, 1790; killed in action 15 Nov., 1822. He entered the navy as midshipman 1 Jan., 1808, and was promoted lieutenant 24 July, 1813. He was 2d lieutenant of the "Argus," and commanded in the fight with the "Pelican" off the coast of England after Captain Allen and the first officer were disabled. He was killed in attempting to board the captured Spanish schooner "Matezanas," in the island of Cuba. His friend Hallock made his early death the subject of a tender and touching poem.

ALLEN, Zachariah, inventor, b. in Providence, R. I., 15 Sept., 1755; d. 17 March, 1882. He was descended from one of the early settlers of Providence and was born in a house built in 1678. He was graduated at Brown in 1815, was admitted to the bar in 1817, and in 1822 engaged in manufacturing. He did much as a capitalist to promote the industries of Rhode Island, and was the inventor of the automatic cut-off valve for the steam-engine, extension rollers, an improved fire-engine, and a hot-air furnace. He also devised a storage reservoir for water-power, and first suggested the system of mutual insurance adopted by New England mill-owners. He was for many years president of the Rhode Island Historical Society. He published, on returning from Europe in 1825, the "Practical Tourist," a treatise on "Practical Mechanics," a manual of physical science entitled "Philosophy of the Machine" (1851), and "Solar Light and Heat" (1859), and articles on the history of Rhode Island. See "Memorial" of Mr. Allen by Amos Perry (1883).

ALLEND, Ignacio (al-ven-de'), Mexican patriot, b. 29 Jan., 1779; shot at Chihuahua, 1 Aug., 1811. He was a captain in the Spanish army, but joined the rebellion of Hidalgo in 1810, and rendered efficient services by reason of his military knowledge and his influence over the natives, with whose aid he transported heavy artillery across the mountains. When Hidalgo lost the battle with the Spanish troops, Allende conducted the retreat, but was betrayed into the hands of the Spaniards near Saltillo, Mexico, in 1811, when he became a prisoner and was buried in the vault reserved for the viceroys and presidents in the cathedral of Mexico.

ALLERTON, Isaac, pilgrim, b. about 1583; d. in New Haven in 1659. He went from England to Leyden in 1608, and came to America in 1629 in the first voyage of the "Mayflower." He was a wealthy and enterprising member of the company, and took a leading part in its affairs. He treated with Massasoit, and made several trips to England as the agent of the colony to purchase the rights of the adventurers, to secure patents for lands, and to bring over the rest of the congregation at Leyden. In 1651 he had a dispute with the colony and was dismissed from its service. He then took up his residence at Marblehead, and established trading-stations on Kennebec river, at Penobscot, and other places. Two coasting vessels owned by him were wrecked, and two of his trading-houses were destroyed by the French and Indians. In 1653 he was warned by the Plymouth authorities to depart from Marblehead. He was a burgess of New Amsterdam, and was chosen a member of the council in 1645, but resided, after he left Marblehead, at New Haven. His daughter Mary, who died in 1699, was the last survivor of the "Mayflower" company.

ALLIBONE, Samuel Austin, author, b. in Philadelphia, Pa., 17 April, 1816; d. in Lucerne, Switzerland, 2 Sept., 1889. He gained a high reputation in early life. He had acquired a peculiar talent for the familiar knowledge of English and American literature. He applied his learning to the preparation of a great work which he entitled "A Critical Dictionary of English Literature and British and American Authors," the first and second volumes of which appeared in 1854, and the second and third in 1871. This laborious compilation, exhibiting careful exactness and critical judgment, contains notices of 46,400 authors, with 40 classified indexes of subjects. Before the appearance of this "Dictionary of Authors," Dr. Allibone had published "A Review by a Layman of a Work entitled "New Themes for the Protestant Clergy" (Philadelphia, 1852), and "New Themes Condemned" (1853). In 1866 he published "An Alphabetical Index to the New Testament," and in 1871 the "Union Bible Companion," the first part of which was published separately under the title of "The Divine Origin of the Holy Scriptures," and in 1873 appeared his "Poetical Quotations, from Chaucer to Tennyson," with copious indexes, containing 13,000 passages taken from 550 authors, classified under 453 subjects. This was followed by "Prose Quotations, from Socrates to Macaulay," with indexes to the 8,810 quotations, containing the names of 544 authors and 371 subjects (1876). In 1889 he published "Great Authors of All Ages; being Selections from the Prose Works of Eminent Writers from the time of Pericles to the Present Day," with indexes. He published also "Explanatory Questions on the Gospels and the Acts" (1899), and was the author of numerous religious tracts and articles in periodicals. The indexes to Edward Everett's "Orations and Speeches" (1850-59), and Washington Irving's "Life and Letters" (1861-64), were from his hand. He was book editor and corresponding secretary of the American Sunday-school union from 1867 till 1873, and also the librarian of the Lenox library, resigning in 1888.

ALLIN, John, clergyman, b. in England in 1596; d. in Dedham, Mass., 26 Aug., 1671. He was a Puritan scholar, who emigrated from England in 1637 and became the first minister of Dedham. He published a "Defence of the Nine
Propositions" of church discipline, in which he had the assistance of Mr. Shepherd, of Cambridge, and also a "Defence of the Synod of 1602 against President Chauncey," besides a large number of sermons and valuable pamphlets:

ALLISON, Burgess, clergyman, b. in Bordentown, N. J., 17 Aug., 1853; d. in Washington, 29 Feb., 1887. He became a convert to the Baptist faith early in life, and began to preach when he was sixteen years old. He studied at Rhode Island college (now Brown university) in 1777, and subsequently had charge of a small congregation at Bordentown, N. J., where he established a classical boarding-school, which attained great reputation. In 1796 he withdrew from his teaching and devoted his time for several years to inventing. Some improvements in the steam-engine and its application to navigation are due to his efforts. In 1801 he began to study law, and was graduated in 1804, and in 1827, he was elected to the state legislature. He was a member of the Governor's council and was re-elected in 1817. He succeed in his profession, and became a successful lawyer and a valuable citizen. He was elected to the Governor's council in 1821, and in 1827, he was re-elected. He was a member of the Governor's council in 1821, and in 1827, he was re-elected. He was a member of the Governor's council in 1821, and in 1827, he was re-elected. He was a member of the Governor's council in 1821, and in 1827, he was re-elected.

ALLISON, William Boyd, senator, b. in Perry, O., 2 March, 1829. He spent his early years on a farm, and was educated at Alleghany college, Pennsylvania, and Western Reserve college. He continued to practice law until 1857, when he went to Dubuque, Iowa. He was a delegate to the Chicago convention of 1860, a member of the governor's staff in 1861, and rendered valuable service in raising troops for the war. He was elected in 1862 to the 38th congress, as a republican, and returned for the three succeeding congresses, serving in the house of representatives from 7 Dec., 1865, to 3 March, 1871. In 1872, he was elected to the U. S. senate, as a republican, and he has been re-elected four times. His term of service will expire in March, 1903.

ALOCHEZ, Claude Jean, explorer, b. in France, in 1829; d. near St. Joseph's river, in the state of Indiana, 27 Aug., 1889. He went to Quebec from France at the age of 17. As a youth he traversed the regions of Lake Superior and parts of the Mississippi valley, and left interesting records of his experiences and observations. He founded a mission at Cheminienigo, on Lake Superior, in 1663, and in 1676 established permanently at Kaskaskia, Ill., the mission that was begun by Marquette but abandoned on the approach of La Salle. His observations on the Indians were printed in the Jesuit "Relations."

ALLSTON, Robert Francis Withers, statesman, b. in All Saints' parish, S. C., 21 April, 1801; d. near Georgetown, S. C., 7 April, 1864. In 1821 he was graduated at West Point, ranking so high in his class as to be assigned to the artillery; but after a year's service he became a rice-planter, civil engineer, and surveyor in South Carolina. From 1823 to 1827 he was state surveyor-general. In 1828 he was elected to the legislature, and in 1832 to the senate, of which he became successively acting president and president (1843-1846). He was deputy adjutant-general in 1831-38, trustee of South Carolina college, Columbia, 1841-64, and governor of the state in 1856-58. He was a progressive agriculturist, an active member of various societies, and the author of a "Memoir on Rice" (1845); "Report on Public Schools" (1847); and "Essay on Sea-Coast Crops" (1854). In politics he advocated state sovereignty. His study of rice-culture was of much advantage to that industry.

ALLSTON, Washington, painter, b. in Waccamaw, S. C., 5 Nov., 1759; d. in Cambridge, Mass., 9 July, 1843. In early boyhood he removed to Newport, R. I., and there attended school. He then studied at Harvard college, and was graduated in 1800. In the following year he went abroad and became a student at the Royal academy, and three years later he removed to Rome and there studied the works of the old masters, meanwhile gaining for himself a high reputation as a colorist. He returned to the United States in 1809 and married a sister of Dr. William Ellery Channing. His second wife was a sister of R. H. Dana. From 1811 to 1818 he resided in England, and during these years produced some of his best pictures. Of these, "The Dead Man Revived," he named a prize of 100 guineas from the British institute. His "Uriel in the Sun," "Jacob's Feast," and other smaller pictures, now owned in England, were produced at this time. In 1818 he opened a studio in Boston. His best known works in the United States are "Jeremiah," "The Witch of Endor," "Miriam," "Rosalie," "Madonna," "Spanish Girl," "Spyralto's Vision of the Bloody Hand," and "Belshazzar's Feast," an unfinished composition now in the Boston Athenaum. Among the portraits painted by him are those of Benjamin West, Coleridge the poet, and one of himself. His works show a high imaginative power, and his ability as a colorist earned him the name of the American Titian. He was also a member of the American Academy. In 1835 he delivered a poem before the Phi Beta Kappa Society at Cambridge. "The Sylphs of the Seasons," which was published in London in 1813, and later "The Paint King" and "The Two Painters," appeared. In 1841 he published "Monaldi," a romance illustrative of Italian life, and in 1850 a volume of his "Lectures on Art, and Poems." See Ward's "Lectures on the Works and Genius of Washington Allston." (Boston, 1852), and "Artist Biographies, Allston." (1879).

ALLSTON, William, soldier, b. in 1757; d. in Charleston, S. C., 26 June, 1839. He was a captain during the revolutionary war under Marion, the famous partisan leader. After the return of peace he married Rebecca Motte, and became a successful planter and a large slave-owner. He was for many years a member of the South Carolina senate. His son, Joseph, statesman, b. in South Carolina in 1778; d. 10 Sept., 1816. He was for several years a prominent member of the South Carolina state legislature, and governor in 1813-'14. He married Theodosia, daughter of Aaron Burr, and from this fact arose unjust suspicions regarding his patriotism. During his term as governor his wife, a charming and accomplished woman, was lost at sea during a voyage from New York to Charleston.
ALMY

ALMACRO, Diego (al-mah-gro), soldier, b. about 1463; killed in July, 1538. He was one of the Spanish conquerors of Peru, who, in company with Francisco Pizarro, overthrew the magnificent empire of the Incas, which at the time was rent by civil war. His energy in forwarding supplies to Pizarro, who had penetrated to the interior of the country, was such that the latter was enabled to prosecute the campaign to a successful issue. In 1533 he stormed Cuzco, the ancient capital of the Incas. He was extremely severe with his captives. Nevertheless, his habitual manners were so winning and courteous that he was very popular with his own soldiers. He obtained the rich spoils of the Incas' palaces, and Almagro was defeated, captured, and strangled to death. — His son, Diego, was born in 1529, and died in Peru in 1542. His mother was an Indian of Panama, but Charles V, had him legitimated in 1526, and placed him under the care and protection of an old Spanish priest. After his father's death young Almagro was imprisoned for some time, and as soon as liberated he resolved to avenge his father's execution. In company with Herrera and others, he attacked the house of Pizarro and killed him, 25 June, 1541. Then Almagro was proclaimed governor of Peru, and went with troops to suppress the opposition to his authority; but Vaca de Castro routed him in the plain of Chupas and took many prisoners, among them Almagro, with all the principal promoters of the plot, who were court-martialed and executed.

ALMONTE, Juan Nepomuceno (al-maw-nay'-to), Mexican statesman, b. in Valadolid, Mexico, in 1804; d. in Paris, 20 March, 1869. He was the reputed son of the priest Morelos, the famous partisan chief, who was imprisoned in the United States, where he secured an excellent education, supporting himself the while. Returning to Mexico he entered upon a military career, and was chosen by Santa Anna one of his aides-de-camp, in which capacity he served in the Texan campaign against Gen. Houston, being made prisoner with his chief at the battle of San Jacinto (1836). On regaining his liberty he was made secretary of state by the Mexican president, Bustamente. In 1840 he showed great courage in quelling a revolt in the province of Oaxaca, but was deprived of office by a revolution that followed, and forced to support himself by lecturing. He was subsequently appointed minister at Washington; but when the annexation of Texas was resolved upon he demanded his passports, protesting at the same time against that measure. In 1845 he was a candidate for the presidency of Mexico, but failed; and afterward, on the elevation of Paredes to power, he was appointed, first, minister of war, and then ambassador to Paris. He was on his way to France when he heard, at Havana, of the return of Santa Anna to power, upon which he immediately returned to Mexico, and, joining Santa Anna, took part in the war against the United States, distinguishing himself at the battles of Buena Vista, Cerro Gordo, and Chapultepec. After the war he entered the ranks of the liberal opposition, and for the second time became a candidate for the presidency, but again without success. He was, however, appointed Mexican minister at Paris, where he remained after the fall of the government of General Miramon was overthrown by Juarez (1866). He returned to Mexico with the French expedition in 1862. Juarez protested against his presence in the French camp, and demanded that Almonte should be delivered up to him; but the French commander refused, and shortly afterward a provisional government was set up by Gen. Taborda, declaring Juarez deposed, and Almonte invested with supreme power in his place. He found himself, however, unable to organize a government; and Gen. Forey, on his arrival in Mexico, annulled Taborda's decree, and announced to the Mexicans that they were free to choose a new government. After the decisive victory of the French arms, Almonte became one of the triumvirate to whom they intrusted the management of affairs in Mexico, assigning him the foreign department and the finances. He was appointed lieutenant of the empire by Maximilian in April, 1864, and some weeks later marshal of the empire. During the course of the war he was in command of the Mexican navy throughout his short reign, and, when Maximilian was executed, he fled to Europe, spending his last days in exile.

ALMY, John Jay, naval officer, b. in Newport, R. I., 25 April, 1814; d. in Washington, D. C., 16 May, 1865. He entered the navy as a midshipman in 1829, and rose to be commodore, 30 Dec., 1860, and rear-admiral 24 Aug., 1873. He was retired in July, 1876, after fifty-six years and eleven months of service. As midshipman and lieutenant he cruised all over the world in the old sailing navy, was at the surrender of Walker and his filibusters, commanded the "Fulton" in the expedition to Paraguay, was at the siege of Vera Cruz and the capture of Cuzco during the Mexican war, and at the navy-yard, Brooklyn, N. Y., in 1861-'62. As commander he had charge successively of the gunboats "South Carolina," "Connecticut," and "Junípera." While in command of the "Connecticut" he captured four noted blockade-runners with valuable cargoes, and ran ashore a blockade-runner and burned it. In command of the "Junípera" he was in the South Atlantic squadron, until 1867, and then assigned to the Brooklyn navy-yard, then the signal corps, and after a cruise in the Pacific was retired, 24 April, 1877.
ALMY, William, philanthropist, b. in Providence, R. I., 17 Feb., 1761; d. 5 Feb., 1836. He was a teacher and a member of the society of Friends, and became wealthy through marriage with a member of the Swain family and realizing business arrangements for the manufacture of cotton goods. One of his most important charities was the establishment of the New England yearly meeting boarding-house in Providence, where he educated at his own expense eighty young persons selected by him. He devoted large sums to other charitable deeds.

ALOFSEN, Solomon, historian, b. in Amsterdam, Netherlands, 22 Nov., 1808; d. in Arnhem, Holland, 10 Oct., 1876. He was born of a good Dutch family and came to the United States in early manhood as secretary of legation, and, like the country, settled in Jersey City. Here he married and raised a family, serving for a time secretary of the Illinois Central railroad, and dealing largely in investments. His favorite studies were historical and ethnological, and he became a prominent member of the societies of New York and vicinity. He read many papers at the meetings of the New York historical society and made important contributions to its collections. After forty years' residence in the United States he returned to Holland, where he was made a member of the royal antiquarian society. His library consisted mainly of Americana, and was especially full in the department of the civil war. It was carefully catalogued and sold in Utrecht in June, 1885.

ALPUCHÉ É INFANTE, José María, Mexican patriot, b. in Campeche, Yucatan, 9 Oct., 1780. He studied in the Seminario Concilia de Mérida, and became a priest. He was one of the founders and organizers of the "Logias Yorkinas," an advanced section of the liberal party, and helped Guerrero to the presidency of the republic. His opposition to military power and injustice, which in his time pervaded every branch of the administration, was the cause of his banishment to New Orleans. Afterward Alpuche, having returned to Mexico, endured great hardships as a prisoner in the castle of San Juan de Ulúa. The rest of his life was full of disappointment and sufferings, until 1810, when the revolution of Aguerre, was the signal for his return. He died in Mexico City.

ALPUCHÉ, Wenceslao (al-poo'cho), Mexican poet, b. in Tihosuco, Yucatan, 28 Sept., 1804; d. in Tekas, 2 Sept., 1841. He took as models the works of the Spanish playwrights and lyric poets, Calde-rón, Lope de Vega, Moreto, and Quintana, whom he tried to follow. His best poems are "Hidalgo," "La Independencia," and "La Fama."

ALRICKS, Hermann, lawyer, b. at Lost Creek Mill, Juniata co., Pa., in 1804; d. in Harrisburg, Pa., 28 Jan., 1874. In 1814 his parents removed to Harrisburg. He received his early education in the academy of that city, and read law there until he was prepared for admission to the bar. He soon attained a lucrative practice, and gained a high reputation for his contributions to its collections and writings before the orphans' and registrars' courts. He made it a rule not to undertake a cause unless he was satisfied of its justice. As a collector of historical traditions he was well known to cultivated people throughout the state, and his extraordinarily tenacious memory enabled him to hold his store of information with dexterity and authority at the instant service of inquirers. The only public office he ever held was that of deputy attorney-general in 1829, an appointment that involved him in such an unpleasant political fracas that he became very averse to office-seeking.

ALSINA, Adolfo (al-so'na), Argentine statesman, b. in Buenos Ayres in 1820; d. there in 1878. He first attracted public notice by a series of lectures and contributions to the periodical publications of the Argentine Republic, and reading in the provincial chambers, and was highly distinguished for eloquence and general ability. He was governor of the province from 1866 till 1868, and vice-president of the Argentine republic from 1868 to 1874. He several times commanded a body of national guards during civil disturbances.

ALSOP, George, author, b. in England in 1638. He was a London apprentice in his youth, but resided in Maryland in 1658-62. He published a book with this quaint title: "A Character of the Province of Maryland, also a Small Treatise on the Wild and Naked Indians or Susquehanokes of Maryland, their Customs, Manners, Absurdities, and Religion, together with a relation of letters" (London, 1666). This was reprinted, with introduction and notes, by J. G. Shea (New York, 1890), and again in Baltimore in 1890.

ALSOP, John, of the continental congress, b. in Middletown, Conn.; d. in Newtown, Long Island, 22 Nov., 1794. He was a prosperous merchant known as "the Londoner," and became a worthy member of the first American congress in 1774-76. On the occupation of New York by the British forces he withdrew to Middletown, Conn., remaining there until peace was concluded. —His son, Richard, author, b. in Middletown, Conn., 23 Jan., 1761; d. in Flatbush, Long Island, 20 Aug., 1832, studied at Yale college, but did not complete the course, preferring to devote himself exclusively to languages and literature. Although he was brought up to a mercantile life, it proved so irksome that he soon devoted himself to letters, and formed a kind of literary league, popularly known as the "Hartford Wits." These included Theodore Dwight, Lemuel Hopkins, and Benjamin Trumbull, a well-known lawyer who served as the author's model in his "Monody on the Death of Washington," in heroic verse (Hartford, 1809); "The Enchanted Lake of the Fairy Morgana" (1808); "The Natural and Civil History of Chili," from the Italian of Molina, and fugitive pieces. In 1815 he edited the "Captivity and Adventures of J. R., Jewett among the Savages of Nootka Sound," of which he not only had the manuscript but also the languages, as it seemed, by a sort of intuition, and made a distinct impression on the drift of public thought. —Another son, John (poet, b. in Middletown, Conn., 5 Feb., 1776; d. in Middletown, 1 Nov., 1841), was a pupil of Dr. Dwight. He studied in the law school of Judge Reeve at Litchfield, was admitted to the bar in 1803, and began practice in New London. He afterward became a bookseller in Hartford, and still later in New York. The latter part of his life was spent in retirement in Middletown. His poems were never issued in book form, but appeared in various periodicals and collections.
ALSTON, Willis, statesman, b. in Halifax co., N. C. He first appears in the colonial records of the Halifax district, N. C., in 1776, was a member of the house of representatives 1791–92, and member of congress from 1799–1801.—His son, Willis, Jr., d. 10 April, 1837, was a member of the state legislature in 1794 and afterward, and a member of congress in 1803–15 and in 1825–31. During the war of 1812–15 with Great Britain, he was chairman of the ways and means committee of the house of representatives 1814–18, and a member of congress from 1819–25.

ALTAMIRANO, Ignacio M., al-tah-me-rah-no, Mexican jurist, b. of pure Indian parentage, in the state of Guerrero. He studied law under the protection of a Spanish gentleman, was graduated with distinction, devoted himself to politics, and soon became noted for his brilliant and fiery oratory, against his Indian enemies of the conservative party, he belonging to the extreme radical faction. During the French invasion and the empire of Maximilian, Altamirano fought bravely against the foreign troops, but at the end of the war he retired from the army. Since that time he has filled with success many high offices in different departments.3 He has been governor several times. He is considered the first of Mexican orators, and a great Oriental, Greek, German, English, French, and Italian scholar. He has published much, both in prose and verse.

ALTHAM, John, missionary, d. in 1641. He was one of the two Jesuits who accompanied Leonor Calderon in 1633. On landing he obtained a hut from its Indian owner, which he fitted up for religious service, and it was afterward known as "the first chapel in Maryland." He studied the Indian dialects at St. Mary's, and then preached the gospel throughout the commonwealth, travelling as far as the mouth of the Susquehanna. He converted several chiefs, and by his influence with the Indians did much to strengthen the infant settlement.

ALVARADO, Alonzo d', Spanish soldier, b. in Burgos, Spain; d. in 1553. As an officer under Cortés, he participated in the conquest of Mexico (1519), and went thence to Peru, where he served as one of Pizarro's subordinates in the capture of the Inca in 1532. In 1537 he was sent with 500 men to reinforce the Pizzaro who were fighting their brother Spaniards under Almagro in Peru. He was intercepted, defeated, and made prisoner by Almagro before he could join the opposing force. Pizarro and Almagro were soon killed by their soldiers, and the strange warfare proceeded before he joining De Castro to crush Almagro the younger. He was lieutenant-general of the force that suppressed the rebellion of Gonzalo Pizarro in 1548, and was made captain-general of Peru, but was vanquished in 1553, and did not long survive the mortification of his defeat.

ALVARADO, Juan Bautista, governor of California from 1836 till 1842. He was the leader of the Californian revolt against Mexican authority. Figueroa, the legitimate governor of the province, died in September, 1835, and Chico, a very obnoxious person in the eyes of Californians, was appointed in his stead by the Mexican government. His rule was so unpopular that Chico was forced to evacuate, upon which Alvarado, in November, 1836, rallied a force, including sundry adventurers from the United States, and other foreigners, seized Monterey, and sent the deputy, whom Chico had left, to Mexico. Independence was formally declared, and the legislature elected Alvarado governor ad interim. Southern California remained loyal for a time; but Alvarado, partly by a show of force, and partly through shrewd diplomacy, won over Santa Barbara and Los Angeles, and in January, 1837, proclaimed the whole province of California free and united. In June of the same year a Mexican commissioner was sent to negotiate with the revolted provinces, but the self-made governor, with characteristic address, won him over and sent him back to plead his (Alvarado's) cause. In the meantime the Mexican government had appointed somewhat the while-governor for California, without consulting Alvarado, and hostilities forthwith began. A single "battle" took place at San Buenaventura, in which one man was killed, the Mexican forces were routed, and Alvarado was soon recognized by the central government as governor of what was then designated as the "Department of California." For two years his jurisdiction was not seriously disputed, but in 1842 the Mexican government sent a new military representative, and Alvarado was deposed. He appeared subsequently as an intriguer of some ability, but never came to the front again in the character of a successful leader. The conquest by the United States followed, and Alvarado was driven several instances of the local tendency to revolution.
accompanied by a host of adventurers. Guatemala became highly prosperous under his government. Having authority to extend his conquests, he headed an expedition of 280 vessels, and landed near Cape San Francisco, whence he marched into the interior; but among the Andes he met the forces of Pizarro, prepared to resist his advance. Disclaiming any intention to interfere with his countryman’s rights, he received 120,000 pieces of eight as an indemnification for his losses, and returned peacefully to Guatemala. Visiting Spain soon afterward, he appeased the emperor’s displeasure at this affair, obtained the governorship of Honduras, and then fitted out from Guatemala a new expedition of discovery, consisting of 12 large ships, two galleys, 800 soldiers, 150 horses, and a large retinue of Indian colonists, to the Philippine islands. He escaped thence and went to Peru, where he amassed a large fortune, after the manner of the adventurers of the time. But, unlike most of them, he devoted this wealth to charitable objects. He founded the benevolent order of St. Bernardine, and in Mexico, Vera Cruz, Acapulco, and other cities of New Spain, establishments which were conducted by an association named St. Hippolite. His philanthropy made him famous among the people who have been benefited by his gifts.

ALVARENGA, Manoel Ignacio da Silva (al-vay-nya-gah), Brazilian poet. He was professor of rhetoric in Rio Janeiro. His poems, which are graceful and full of local color, were published in Lisbon in 1799.

ALVAREZ, Bernardino (al-vah-reth), Spanish adventurer, b. in Seville in 1514; d. in Mexico in 1554. He joined the army in his boyhood, but was dismissed for misconduct and transported to a penal colony on the Philippine islands. He escaped thence and went to Peru, where he amassed a large fortune, after the manner of the adventurers of the time. But, unlike most of them, he devoted this wealth to charitable objects. He founded the benevolent order of St. Bernardine, and in Mexico, Vera Cruz, Acapulco, and other cities of New Spain, establishments which were conducted by an association named St. Hippolite. His philanthropy made him famous among the people who have been benefited by his gifts.

ALVAREZ, Diego d’, Mexican priest, b. in Guadalajara about 1750; d. in 1824. At the age of sixteen he had finished his studies in philosophy, theology, and canon and civil law, which he then taught in the seminary conciliar of the city of Mexico. He was also learned in medicine, mathematics, oratory, architecture, music, chemistry, and agriculture. He wrote on a wide range of subjects, his works making twenty-three large volumes in manuscript, but only one of them, “Prieten de la hechologa mistica,” was published.

ALVAREZ, Miguel, Mexican adventurer, b. about 1790; d. in 1867. He was of Indian blood, and exercised extraordinary influence over the Indians of southern Mexico. He was governor of Guerrero in 1853, and had little difficulty in rousing his mountaineers to insurrection. The outbreak took place at Acapulco, at the beginning of the following year, in the degree promulgated by Alvarez in March, 1854, which became noted as the plan of Ayutla. Santa Anna’s deposition was officially announced, and republican institutions were proposed. Santa Anna’s power was overthrown in the battle of Saltillo, 22 July, 1855, and Gen. Carrera was intrusted with the government, which he relinquished in September in favor of Alvarez, whose nomination as president of Mexico was ratified by the assembly of Guanajuato, which for that purpose were called together by him. Having secured his object, he made his entry into Mexico, escorted by a body-guard of Indians. His abolition of the privileges of the clergy and the army met with such opposition that he tendered his resignation, substituting in his place his former minister Conenfort, 11 Dec.; and after procuring $200,000 from the national exchequer, and having armed rebellions he could get, he returned to southern Mexico.

ALVARO, or ALBO, Francisco, Spanish sailor, lived in the 16th century. He accompanied Magellan’s expedition that sailed from Spain on 10 Aug., 1519, and kept a log-book, which recounts the fortunes of the fleet from the time they sighted the cape of Santa Agustinne on the coast of Brazil. The original is preserved in Simancas, Spain, and a copy is in the British museum. It was printed in the “Coleccion” of Navarrete, and is included in the documents given in the volume of the Hakluyt society, containing Lord Stanly’s translations of Pigafetta and other records of Magellan’s voyage.

ALVORD, Benjamin, soldier, b. in Rutland, Vt., 18 Aug. 1813; d. in Washington, D. C., 16 Oct., 1884. He was graduated at the U.S. military academy in 1833, served in the Seminole war (1835–7), was instructor in mathematics at West Point until 1839, and was on frontier, garrison, and engineer duty until 1846, when he participated in the military expedition on the Rio Grande. He was brevetted major for his services in the war with Mexico. He received the successive brevets of captain and major for gallantry in several of the more important engagements, and was chief of staff to Maj. Lally’s column on the march from Vera Cruz to Mexico in 1847. He was made paymaster 22 June, 1854, and served as such until 1862, when he became a brigadier-general of volunteers, which grade he resigned 8 Aug., 1865. He was brevetted brigadier in the regular army in April, 1865. From 1872 till his retirement from active service in 1881 he was chief of the pay department with the rank of brigadier-general. He is the author of treatises on mathematics and many essays.

ALVORD, Corydon Alexis, printer, b. in Winchester, Mass., 13 June, and Nov., 1874. He learned his trade in Hartford, and in 1815 removed to New York, where he made a specialty of printing illustrated books, gaining a high reputation. His establishment on Vandewater st. was one of the most extensive in the country. Among its features were fonts of ancient and oriental letter, together with fonts of old-style type, which enabled him to make reprints or fac-similes of old books and newspapers. There were monster vaults deep under ground, and extending under adjacent buildings, forming a series of immense storage-rooms guarded by thick walls and iron doors as thoroughly protected as the treasury of England. He was also a leader in the storage of stereotype plates and valuable engravings. He began a reprint of the old records of the city of New York, but the work was not finished, owing to changes in the recorder’s office. In the reproduction of old books and papers he succeeded in copying the discolored areas made by age, in a remarkable degree of fidelity. He was an active member of the graphic society, and president of the typothepia. He acquired a competence, which was subsequently lost through the misconduct of others. In 1871 he retired from business, went to Hartford, and devoted his remaining years to the preparation of a local history of Hartford and Winchester.
ALVORD, Henry Elijah, educator, b. in Greenfield, Mass., 11 March, 1844. He was educated in the Massachusetts public schools, and subsequently studied in the Norwich university, where in 1863 he received the degree of C. E., and in 1864 was listed as a private in 1862, and passed through every grade to that of major, reaching that rank in the 3d Massachusetts cavalry in 1865. At the close of the war he was appointed to the regular army with the rank of captain of cavalry, and remained as such until 1872, when he became a special Indian courier. He then lectured for a time at Williston seminary, Easthampton, Mass., and later became manager of the Houghton farm, Orange co., N. Y. In 1886 he was elected professor of agriculture at the Massachusetts agricultural college, Amherst. Prof. Alvord has been a frequent contributor to the agricultural journals of this country and Great Britain, and is the author of the American sections of "Dairy Farming" (London, 1881).

ALVORD, Thomas Gold, politician, b. in Onondaga, N. Y., 20 Dec., 1810; d. in Syracuse, N. Y., 26 Oct., 1897. He was graduated at Yale in 1828, in 1832 admitted to the New York bar, and in 1844 sent to the legislature, where he remained for ten consecutive terms, and was several times speaker of the house in 1858 and in 1864, was lieutenant-governor in 1865–6, and a member of the New York state constitutional convention in 1867–8. He was the proprietor of extensive salt mines in central New York, and was popularly known as "Old Salt."

ALZATE Y RAMIREZ, José Antonio, Mexican scientist, b. in Oaxaca in the province of Mexico, 2 Feb., 1790. He was a corresponding member of the French and Spanish academies of science, and one of the earliest trustworthy observers of Mexican meteorology. He attained a high reputation as a zoologist and botanist, and his researches led the way for modern exploration of Mexican antiquities. He published the "Gaceta de Literatura," and an essay entitled "La limite des mieres perpetuelles en Volcan Popocatepeti."

AMERICO (or AMERIGO) VESPUCCI (ves-puch-ee), Italian navigator, b. in Florence, Italy, 9 March, 1451; d. in Seville, Spain, 22 Feb., 1512. He was of a wealthy family of Genoa, and received his education from his uncle, Giorgi Antonio Vespucci, a Dominican friar, a friend and colleague of Savonarola. He engaged in business, first in Florence and afterward in Seville, where he met Columbus, perhaps as early as 1493, and when in 1496 he equipped the fleet with which that navigator sailed on his third voyage, he had previously, in 1496, had charge of fitting out a fleet for Amerigo. He sailed from Spain in 1499 in an expedition that visited the neighborhood of Cape Paria and several hundred miles of coast, and returned in June, 1500. In May, 1501, he entered the service of Emanuel, of Portugal, and participated in an expedition that visited the coast of Brazil. In May, 1500, he com-

manded a caravel in a squadron that sailed for the discovery of Malacca, but parted company from the rest, and finally made his way to the coast of Brazil, where he discovered the bay of All Saints, which he named the "Bay of the Great Santa Maria." He was buried at his residence, eight miles to the westward of Portugal, near Cape Frio, and, leaving a colony there, returned to Lisbon in June, 1504. Early in 1505 he obtained from King Ferdinand of Spain letters of naturalization, and on 22 March, 1508, was appointed pilot-major of the kingdom, an office that he held until his death, taking charge of the prepara-
tion of a general description of coasts and accounts of new discoveries, and also superintending the construction of charts and the examination of pilots. The controversy as to whether Vespucci took precedence both of the Cabots and of Columbus in the discovery of the mainland of America has been for centuries a matter of dispute. None of the original letters of Amerigo bearing on the subject are extant, except in translations, and these differ greatly among themselves and contain inconsistencies of fact and date. It is not even known in what language the letters were written. An account by Amerigo of his voyage of 1499, said to have been written about the 15th of July, 1507, a "Cosmographie Introductio," was published at the little college of St. Dié in Loraine, and to it was appended an account by Amerigo of his voyages, purporting to be addressed to René II., duke of Lor-

aine. Here it is asserted that four voyages were made, the date of the first being fixed at May, 1497. Amerigo would thus have reached the main-

land a week or two earlier than Cabot, and about 14 months earlier than Columbus. It was also suggested in this book that Amerigo should give his name to the continent he had discovered. The best authorities now consider the evidence incon-
trovertible that this date of 1497 is incorrect, and doubt has been thrown on whether Amerigo's narrative. Has been charged with many with deliberate falsification, and most of his apolo-
gists have contented themselves with defending his character, rather than the truth of his narra-
tive, ascribing the inconsistencies of the latter to the errors of translators and copyists. Santaram, in his "Researches," says he could find no mention at all of Vespucci in the royal archives of Portugal, nor in the diplomatic records, where all new discoveries were mentioned, and the fact that his reputed discovery of the mainland was not used as evidence by the Spanish government in an action at law in 1512, where it would have been in their favor, seems to show that it was not genuine evidence of that day. The name of America, how-

ever, suggested by the "Cosmographie Introductio," began soon to be generally used, and it was not until the publication of Schoner's "Opusculum Geographicum" (1533) that doubt began to be thrown on its propriety. See Life and Voyages of Amerigo Vespucci, by C. E. Lester (New York, 1846); Santaram's "Vespuccius und seine Voi-

ges," translated by E. V. Childs (Boston, 1856); and Winsor's "Narrative and Critical History of America" (Boston, 1884).
wounded at the battle of Bull Run and brevetted for gallantry in that action, and was present at the surrender of the city of Petersburg in 1864. He was brevetted major-general of volunteers for his conduct at the capture of Fort Fisher, 13 March, 1865, and brevetted major-general, U.S. army, for "gallant and meritorious conduct in the field during the rebellion," and on 30 April, 1866, mustered out of the volunteer service. On 28 July, 1866, he was promoted to the full rank of lieutenant-colonel, 24th infantry. On 15 July, 1868, he was appointed provost-marshal of Mississippi, under acts of congress providing for such temporary government, and on 17 March, 1869, his command extended to include the 4th military district. The lately insurrectionary states were at the time divided into five such districts, each with a general officer commanding, and a military force at his disposal. Mississippi was among the last of the states to comply with the conditions of reconstruction, and in the interval the community drifted into a state bordering upon anarchy, the provisional government at times interfering in the interest of order. Under his direction an election was held 30 Nov., 1869, and there was elected Gen. Ames, to fill a vacancy in the governorship of the state, and to enforce the laws. In 1870, he was elected U.S. senator for the unexpired term from 1 March, 1869. In 1873 he was chosen governor of Mississippi by a popular vote, and resigned his seat in the Senate. His administration was so repugnant to the democrats—or, in other words, to the white population—that between the two parties the rivalry was carried to extremes, mostly blacks, a feeling of hostility arose so bitter that it culminated in a serious riot in Vicksburg, 7 Dec., 1873, and this was followed by atrocities all over the state, consisting for the most part in the punishment, often in the murder, of obnoxious republicans, white and black. The civil officers were powerless to enforce the law, and Gen. Ames appealed to the general government for aid. Upon this, despatches of the most contradictory character were forwarded to Washington by the opposing parties, and, pending an investigation by congress, affairs were in a deplorable state of disorganization. An election held in November resulted in a general defeat of the Republicans, both branches of the legislature becoming distinctly Democratic. Gov. Ames held that this election was largely carried by intimidation and fraud, and vainly sought to secure congressional interference. Soon after the legislature convened in January, 1876, articles of impeachment were prepared against all the executive officers, and, pending the trials, the machinery of the state was thrown into confusion. Theandident of the state convention for the legislature in 1876, Gen. Ames, seeing that conviction was inevitable, offered through his counsel to resign, provided the articles of impeachment were withdrawn. This was done, and he resigned at once and settled in Minnesota. Later he removed to Lowell, Mass.

AMES, Edward Raymond, bishop, b. in Athens, Ohio, 29 May, 1840; d. in Baltimore, 25 April, 1879. He studied for two years at the Ohio State University, and in 1829 opened a high school at Lebanon, Ill., which in time grew into McKendree College. Here he remained until 1850, when he joined the Indiana Methodist Episcopal conference and became an itinerant minister. At the general conference for 1850 he was chosen corresponding secretary of the missionary society, and rode through the South and West and among the Indian tribes, with more than 23,000 miles. He was a presiding elder from 1844 to 1872, and was then chosen bishop. He was the first Methodist bishop to visit the Pacific coast. During the civil war he rendered important service as a member of several commissions.

AMES, Fisher, statesman, b. in Dedham, Mass., 9 April, 1828; d. there, 4 July, 1898. His father, a physician, died when Fisher was but six years old, but his mother resolved, in spite of her limited income, to give the boy a classical education. At the age of six he began the study of Latin, and at the age of twelve he was sent to Harvard, where he was graduated in 1844. Owing to his extreme youth and the strictness of the English school of the family, he was obliged to spend some years in teaching before studying law, and during this period he devoted himself with indefatigable zeal to self-culture. Often in after-life he spoke of the ravenous appetite with which he had devoured the books within his reach. He read the leading English poets, dwelling for hours on their beauties, and fixing the most striking passages in his memory. He practiced the same pursuit in the classics. The translations of Dryden, of Lord Stanley's, and of other versions of the Iliad and the Odyssey, were in his mind, as well as the finest passages of the Aeneid. He was a profound student of the Scriptures, and declared that no man could become truly eloquent "without being a constant reader of the Bible and an admirer of the purity and sublimity of its language." Mr. Ames practiced law, and could repeat considerable portions of the Eclogues and Georgics, and most of the fine passages of the Aeneid. He was a profound student of the Scriptures, and declared that no man could become truly eloquent "without being a constant reader of the Bible and an admirer of the purity and sublimity of its language." Mr. Ames practiced law, and could repeat considerable portions of the Eclogues and Georgics, and most of the fine passages of the Aeneid.
gressions of France. On the death of Washington he pronounced his eulogy before the legislature of Massachusetts. He was elected president of Harvard University the following year, and during the last few years of his life told his friend at the academy of his health, and spent his last years in retirement. Though not a deliberate artist in words, his diction is highly pictorial, and he abounds in verbal felicities, in condensed, epigrammatic sentences and illuminated sayings that linger long in the memory. He rarely wrote out beforehand any part of his letters, but jotted down a few heads only, on which he studied till he had gained a complete mastery of his theme, and trusted for the rest to the inspiration and resources of the hour. In person Mr. Ames was somewhat above the average stature, well-proportioned, and very erect. His face had none of the strong and rugged features of his brother, was wholly self-taught, and was of the forehand disposition. His works, a collection of his letters, with a life by Rev. J. T. Kirkland, was published by the Literary Club of Boston. Mr. Ames, published an enlarged edition (2 vols., 1854). In 1871 his grandson, Pelham W. Ames, published a selection from his congressional speeches, four of which are not contained in the former collections.

AMES, Joseph, painter, b. in Roxbury, Mass., in 1816; d. in New York, 30 Oct., 1872. He early began portrait and genre painting, and, steadily increasing his success in his own state, opened a studio in Boston, and soon established a reputation, painting the portraits of several prominent citizens. He was wholly self-taught, and it is thought that some of his best work was done in this first period of his career. As soon as he could save the means he went to Rome and studied there, painting a fine portrait of Pius IX. On his return to the United States he settled in Boston, but removed to Baltimore on account of his health in 1870. The change did him no good, and he soon removed to New York. He was elected a member of the national academy of design in 1876. His success in New York in genre work, as well as in portraiture, was extraordinary. This year he published his memoirs, which contain some of his finest work. He died in his studio of a young lady of Baltimore, while in his studio he left a finished picture of Madame Ristori as Medea. He died of brain fever after a brief illness. His widow has executed meritorious busts of Abraham Lincoln and Gov. John A. Andrew, of Massachusetts.

AMES, Mary Clemmer (Mrs. Hynson), author, of Salem, Mass., b. 1869; d. at Dedham, Mass., 21 Aug., 1884. She was educated at Westfield (Mass.) academy, and when very young began to write for the "Springfield Republican." Afterward she became a correspondent of the New York "Independent," to which, under the title of "A Woman's Letter from Washington," she regularly contributed for many years. Through these letters she was best known in the literary world. At an early age she married the Rev. Daniel Ames, from whom she was afterward divorced. She was intimate with Alice and Phoebe Cary, whose biographies she wrote. She also published monographs on Charles Sumner, Margaret Fuller, George Eliot, Emerson, and Longfellow. She wrote three novels, "Victoria" (New York, 1864), "Eirene" (1870), and "His Two Wives" (1874); "Ten Years in Washington" (1871), "Outlines of Men, Women, and Things" (1875), and a volume of poems (Boston, 1882). With the earnings of which she paid for a house in Washington, which was a social as well as a literary centre for many years, and in 1883 she married Edmund Hudson, editor and proprietor of the "Army and Navy Register." She was thrown from a carriage in 1878, and received injuries from which she never wholly recovered. A complete edition of her works in four volumes, was published in Boston in 1885, and a memorial by her husband in 1886. She was an earnest and conscientious writer, and exercised a powerful and healthful influence upon public affairs.

AMES, Nathan Pabody, manufacturer, b. in Chelmsford, Mass., 11 Jan., 1816; d. in Chicopee, Mass., 23 April, 1847. He began business in 1829, and became known as a skillful sword-maker, furnishing large numbers by contract to the U. S. government. His business having increased, he removed to Cabotville, Mass., and with his associates incorporated in 1831 the Ames Mfg. Co. for the manufacture of the common pattern. This was imitated by the addition of a foundery for casting bronze cannon and church-bells. This establishment soon became famous, and furnished most of the brass cannon for the U. S. army. The statues of De Witt Clinton, in Greenwood cemetery, Brooklyn, N. Y., of Washington, in Union sq., New York, and of Franklin in School st., Boston, Mass., were cast at this foundery. In 1840 Mr. Ames visited Europe for the purpose of inspecting the various armories and of acquiring the latest information in regard to improved processes. In 1844 he received an important order from the British government for machines used in the manufacture of muskets and rifles.

AMES, Nathaniel, mathematician, b. in Bridgewater, Mass., in 1708; d. in Dedham, 11 July, 1764. He was a physician, but, inheriting a love of astronomy from his father, he began the publication in 1725 of a series of almanacs that won great success. In 1735 he removed to Dedham and kept a tavern. Here he married Maria Adams, and their sons were born to them—Fisher Ames (q. e.) and Nathaniel, who continued the publication of his father's almanacs until 1775, when he became a surgeon in the patriot army. He made several sea voyages, and published stories of nautical adventure, including "Mariner's Sketches" (1809) and "Nautical Reminiscences" (1832). He died in Providence, R. I., 18 Jan., 1835.

AMES, Oakes, manufacturer, b. in Easton, Mass., 10 Jan., 1804; d. in North Easton, Mass., 8 May, 1873. He was the eldest son of Oliver Ames, a blacksmith, who had acquired considerable reputation in the making of shovels and picks. After obtaining a public school education, he entered his father's workshops and made himself familiar with every step of the manufacture. He became a partner in the business, and with his brother, Oliver, Jr., established the firm of Oliver Ames & Sons. This house carried on an enormous trade during the gold excitement in California, and again a few years later in Australia. During the civil war they furnished extensive supplies of swords and shovels to the government. In the building of the Union Pacific railroad they were directly interested, and obtained large contracts, which were subsequently transferred to the Credit Mobilier of America, a corporation in which Oakes Ames was one of the largest stockholders. In 1869 he was called into the executive council of Massachusetts. He served
continuously in congress from 1862 to 1873 as representative from the 2d Massachusetts district. His relations with the Credit Mobilier led to an investigation before a committee of the Senate, and he was finally succeeded by a vote of the house of representatives. Subsequent to his withdrawal from political life he resided at North Easton, where he died of apoplexy.

—His brother, Oliver, manufacturer, b. in Plymoutb, Mass., 5 Nov., 1807; d. in North Easton, Mass., 9 March, 1877, was a member of the Massachusetts state senate in 1852 and 1857. He was largely interested with his brother in the development of the Union Pacific railroad, and was its president pro tempore, from 1866 until 1868. He was formally elected president of the company on 12 March, 1868, and continued as such until 8 March, 1871. He was connected with the Credit Mobilier the law leading the judge Gough in the case of the railroad. By judicious management he paid debts and about $1,000,000 in legacies under his father's will. He was a member of the state senate in 1880–1, and in 1888 he received the republican nomination for lieutenant-governor, being re-elected in 1884, 1885, and 1885. In 1886 he was governor of Massachusetts, and was re-elected in 1887 and 1888.

AMES, Samuel, jurist, b. in Providence, R. I., 6 Sept., 1806; d. there, 29 Dec., 1865. He was prepared for college at Phillips Andover academy, and was graduated at Brown in 1823. After graduation he held the law lecturership of Amherst College at Litchfield, Conn., and became a member of the Rhode Island bar in 1826. He served in the Providence council, was for many years in the state assembly, and was elected speaker of that body in 1844 and 1845. In 1839 he married Mary Throop Dorr, a niece of Thomas Wilson Dorr, famous as the author of the Dorr Constitution of Rhode Island, which did not prevent Mr. Ames from taking a stand on the side of law and order, and he served as quartermaster of the state troops during the whole period of disturbance. In 1853 he was appointed by the legislature to represent the state in adjusting the boundary between Rhode Island and Massachusetts. In 1853 he was one of the commissioners to revise the statutes of Rhode Island, a work that was completed in 1857 mainly under his supervision. He was elected chief justice of the state supreme court in May, 1856, and resigned the office in November, 1865, because of failing health. He was a delegate to the peace convention in 1861. The later books of which he was author or editor are "Ames's Reports" and "Rhode Island Reports" (vols. iv. to xii.).

AMHERST, Jeffrey, soldier, b. in Riverhead, Kent, England, 29 June, 1717; d. 3 Aug., 1797. His American career began in 1758, when he was commissioned major-general at the instance of William Pitt, and sent to cooperate with Prideaux in wrecking the Spanish treasure vessel, the Rio. Before this he had been a soldier serving in Flanders and winning distinction under the duke of Marlborough. For his services in reducing the French strongholds he received the thanks of the house of commons and the order of the bath. In 1760 he was appointed governor-general of the British possessions in America, but proved unable to deal with the Indians under such a leader as Pontiac. In 1763 he was made governor of Virginia, his last American service. In England, Parlement recognizing his general unknown, and as Amherst was a favorite with the king, honors were heaped upon him, largely because he steadily favored the American war. In 1776 he was raised to the peerage as Lord Amherst, and in 1787 received a patent as Baron Amherst of Melbourne, this being the name of his seat in Kent. His "Amherst's Magazine," for September, 1797; Parkman's "Conspiracy of Pontiac"; and Bancroft's "History of the United States," vol. iii. A fine portrait of Gen. Amherst by Gainsborough is in the national portrait gallery. See AMI, Henry Mark, Canadian scientist, b. in Belle-Riviere, 25 Nov., 1805. He was graduated at McGill college in 1822, and in June of the same year was appointed on the palaeontological staff of the geological survey of Canada. In 1886 he was assistant palaeontologist, and during the same year was engaged in the determination, identification, and classification of the fossil remains of Canada, in connection with the museum and geological survey and the geological survey and the stratigraphic and paleontology of Ottawa and vicinity, and a catalogue of fossils. In June, 1888, he became a permanent civil service officer in the department of the interior, geologist in 1889. He published "Notes on Triarthrus spinosus, Billings," and various reports on the stratigraphy and paleontology of Ottawa and vicinity, and a catalogue of fossils. In June, 1888, he became a permanent civil service officer in the department of the interior, geologist in 1889. He published "Notes on Triarthrus spinosus, Billings," and various reports on the stratigraphy and paleontology of Ottawa and vicinity, and a catalogue of fossils.

AMIDAS, or AMADAS, Philip, navigator, b. in Hull, England, in 1550; d. there in 1618. He was the son of a Breton family who had for a century resided in England. He commanded one of the two ships in Arthur Barlow's voyage of discovery to the coast of North Carolina in 1584, undertaken with a view to establishing a permanent colony. They explored New Inlet, and returned with glowing accounts of the grapes, cedars, and other products of the country and of its people. Amidas was in charge of an expedition to Newfound land a few years later.

AMMEN, Daniel, naval officer, b. in Ohio, 15 May, 1844; d. near Monterey, Cal., 1 July, 1880. He was destined for the navy and was graduated at the United States Naval Academy, and commissioned second lieutenant in 1864. He was appointed midshipman, and served in the Wilkes exploring expedition, in the Mediterranean, in the East India squadron, and on the coast survey. As lieutenant (from 4 Nov., 1849) he was attached to a commission to select a naval station on the Pacific coast, accompanied the expedition to Paraguay river in 1855–56, and was on the steam frigate "Merrimack" in 1858–59. In 1861, at the outbreak of the civil war, he was executive officer of the North Atlantic blockading squadron. At the reduction of Port Royal, 7 Nov., 1861, he commanded the "Seneca," and was sent ashore to hoist the flag over the surrendered forts, and hold them till the army took possession. He was promoted to captain and made commander of the Potomac fleet and -monitor "Patapsco," and participated in the attack on Fort Maclllister, 3 March, 1863. In May, 1864, he was despatched to the Pacific in command of 220 seamen as passengers on board a California steamer. Two days out from New York a well-organized attempt at mutiny was suppressed by him. Ammen and Bessewain Bell aided by Capt. Tinklepaugh, of the steamer, and a few volunteers from among the passengers. He participated in the two attacks on Fort Fisher in the winter of 1864–65, was commissioned captain 26 July, 1866, and was on special and sea service until 11 Dec., 1877, when he was made rear-admiral and was
placed on the retired list after forty-nine years and six months of service. He is the author of "The Atlantic Coast." (New York, 1883) and "The Old Navy and the New." (Philadelphia, 1891).—His brother, Jacob, soldier, b. in Botetourt co., Va., 7 Jan., 1806; d. in Lockland, Ohio, 6 Feb., 1894. He was graduated at West Point in 1831, and served there as assistant instructor until September, 1832. During the threatened "nullification" of South Carolina he was on duty in Charleston harbor. From 4 Oct., 1834, to 5 Nov., 1837, he was again at West Point as an instructor, and he resigned from the army, 30 Nov., 1837, to accept a professorship of mathematics at Bacon college, Georgia, Oct., 1837. He went to Amherst college, Washington, Mass., in 1839, to the university of Indiana in 1840, to Jefferson college again in 1843, and returned to Bacon college in 1848. From 1855 to 1861 he was a civil engineer at Ripley, Ohio, and on April 18 of that year became captain in the 12th Ohio volunteers.

The American Academy, which he joined in 1838, and, in addition to the practice of his profession he has taken a warm interest in town affairs, filling several important positions. He was appointed in 1869 lecturer at Harvard college on the physiological action of drugs, and was afterward professor of physiology in the medical school at Bowdoin college, and later professor of chemistry in the university of Maine, from 1869 to 1872. He was one of the first to advocate the use of nitrous oxide for painless dental surgery and in 1872 wrote a pamphlet on the effects of nitrous oxide.

ARNO, Thomas Isaac Coffin, b. in Boston, 3 Nov., 1850; d. of yellow fever in Beaufort, N. C., 8 Oct., 1864. He was graduated at West Point in 1851, and served on garrison and frontier duty in the Utah expedition (1858-60), and on recruiting service until 1861, when he became colonel of the 17th Massachusetts volunteers. He was stationed at Baltimore with his regiment until March, 1862, when he was ordered to North Carolina and took part in the operations about New Bern, Beaufort, Goldsboro, and Kinston until 1 March, 1864, when he was assigned to a general command of the forces south of the Trent river, and on 5 July to the sub-district of Beaufort. He was promoted to be major 19 September, and was breveted brigadier-general of volunteers 1 October.

APUDIA, Pedro de, Mexican soldier. He was made a captain in the American army in 1840, led a foray on the Texas frontier under the command of Gen. Woll in 1842, took a prominent part in the conflicts with the Texan forces under Summerville, and in December, 1842, commanded the land forces in the siege of Campeachy. He was compelled to retreat by Com. Moore on 26 June, 1843, and was also a convincing demonstration of great indignation by his cruel execution of Gen. Sentmanat, who had attacked the town. He was dismissed from his command, but on 11 April, 1846, appeared before Matamoras as a general in the army under Arista. He was given command of Monterey, but, after a spirited defense, surrendered to Gen. Taylor, 18 April, 1846.

ANACACOA, also called the Golden Flower, was an Indian queen, wife of Cuamaté, one of the five caciques who possessed the island of Santo Domingo when the Spaniards discovered it and settled there in 1492. She was celebrated as a composer of ballads and narrative poems, called avesitas, which the Indians composed in honor of the queen. When the colony was revolted, and made a long war against them; and during a feast organized to honor the queen of Jaragua, who was friendly to the Spaniards, Gov. Nicolas de Ovando ordered the arrest of Anaacoa and her Indian noblemen, all of whom, being suspected of conspiracy, were executed.

AAXASCO, Juan de (an-vas-ko), Spanish traveler, lived in Seville in the first part of the 16th century. He was one of the most active of the officers that accompanied Hernando de Soto during his famous expedition to Florida and the regions along the Mississippi river, from 1539 to 1543, and the successful return of the expedition was largely due to him, who was their guide in descending the Mississippi.

ANAYA, Pedro Maria (ah-nay-yah), Mexican soldier. He took part in the operations against the American army of occupation, and was twice president of Mexico ad interim; while President Santa Anna was absent from the capital (2 April to 30 May, 1842), and also in the absence of President Peña y Peña (12 Nov., 1847, to 8 Jan., 1848).

ANCHIETA, José de (an-chay-ta), Portuguese missionary, b. at Laguna, in Teneriffe, Ca-
ary islands, in 1533; d. in Brazil, 9 June, 1597. He was a relative of Loyola's. In 1534 he went from Coimbra, where he had been stationed, as a missionary to Brazil, where he founded a college for the conversion of natives, was appointed governor of the converted Indians. His life was passed in danger, privation, and arduous labor. He was believed by both whites and Indians to have the power of working miracles, and was commonly called the "Apostle of Brazil." The academy of sciences at Madrid has published a treatise by Navarrete." He acted as agent to Darien and Panama, where he was stationed, and produced the illustrations for a little book entitled "Looking Glass for the Mind." Shortly after, on being informed that Darien, it was possible to engrave on wood, he obtained blocks of box-wood, designed his own tools, and produced the first wood engravings ever made in the United States. About 1798 he abandoned the practice of medicine, and devoted himself forthwith exclusively to engraving.

At first he used both wood and metal as occasion required, but from about 1820 his illustrations were usually cut in wood, and for some time he was the only artist in that line in New York. His best known productions include the illustrations in Webster's "Elementary Spelling-Book," a series of forty plates for Shakespeare's plays, and engravings for "Bible," and of Samuel Bell's "Anatomy." For many years he was employed by the American tract society and engraved the illustrations for their publications. A memorial address on this pioneer engraver, by Benson J. Lossing, was published by the New York Historical Society, with 38 illustrations, many of them engraved by Anderson himself.

ANDERSON, Alexander, senator, b. in Jefferson co., Tenn., 10 Nov., 1794; d. in Knoxville, Tenn., 23 May, 1869. He was elected by the democrats U. S. senator from Tennessee in 1840, and was afterward a legislator and judge in California, and framed the state constitution.

ANDERSON, Carlus G., medical adviser, b. in Bergen, N. Y., 7 March, 1832. He was graduated at Rochester university in 1854, and at the theological seminary in Rochester in 1856. He became distinguished as a preacher of the Baptist denomination, and was called in 1866 from his church in St. Louis to the professorship of homiletics, church polity, and pastoral duties, in Newton theological institute. From 1873 to 1878 he preached in Brooklyn, and then in Chicago, and in the latter year was chosen president of Chicago university, in which post he continued till September, 1885.

ANDERSON, George Burgwin, soldier, b. in Wilmington, N. C., 12 April, 1831; d. in Raleigh, N. C., 16 Oct., 1862. He was graduated at West Point, and was appointed to the 2d dragoons, promoted to be 1st lieutenant in 1855, and in 1858 appointed adjutant of his regiment. He resigned in April, 1861, and entered the Confederate army, where he was soon appointed brigadier-general and given direction of coast defenses in North Carolina. At the battle of Antietam, where he commanded a brigade, he received a wound in the foot, which eventually proved fatal.

ANDERSON, Henry James, educator, b. in New York, 6 Feb., 1799; d. in Lahore, northern Hindostan, 19 Oct., 1875. He was graduated at Columbia college with highest honors in 1818.
ANDERSON studied medicine, and received in 1823 his degree from the college of physicians and surgeons. He devoted his leisure time to mathematical investigations, and in 1825 was appointed professor of mathematics and astronomy in Columbia college. After twenty-five years of the latter position, he resigned his professorship to go abroad in hopes of restoring the health of his wife, but to no avail. While in France he became intimately acquainted with the astronomer Arago, and about the same time he became a convert to the Catholic faith. He studied blogging in Europe, Asia, and Africa, and during a visit to the Holy Land he acted as geologist to the Dead Sea expedition under command of Lieut. Lynch. The results were collected and published by the U. S. government in 1848, with the titles of "Geology of Lieut. Lynch's Expedition to the Dead Sea," and "A Journal of Reconnaissance of Part of the Holy Land." In 1854 he was elected a trustee of Columbia college, and in 1866 emeritus professor of mathematics and astronomy. In 1874 he was one of the band of pilgrims that left the United States on a visit to Lourdes, France, and was received by Pius IX. with special marks of favor. He then joined as a volunteer the American troops sent to New Orleans, observing the transit of Venus, and proceeded to Australia, having procured the necessary instruments at his own expense. On his return, he visited India, and, while exploring the Himalayas, he was stricken with the disease that caused his death. He was active in advancing the interests of the Catholic church in New York, for many years was president of the society of St. Vincent de Paul, was prominent in the originating of the Catholic union of New York, and was also one of the founders of the Catholic Protective in Westchester, N. Y.

ANDERSON, Henry T., clergyman, b. 27 Jan., 1812; d. 19 Sept., 1872. He was a minister of the denomination known as Campbellites or Disciples, and was the author of an interlinear translation of the New Testament, and during the last five years of his life was engaged in its revision, taking for his basis the text of Tischendorf. This work was nearly completed at his death.

ANDERSON, Isaac, clergyman, b. in Rockbridge Co., Va.; d. in Rockford, Ill., 28 Jan., 1857. He studied at liberty hall academy (afterward Washington college), and then fitted himself for a preacher. After his family had removed to Union, Tenn., he was licensed to preach in 1802, and was the Presbyterian pastor in that place for nine years, and subsequently in Maryville, where the southwestern theological seminary was established through his efforts.

ANDERSON, James Patton, soldier, b. in Tennessee about 1820; d. in Memphis in 1873. He served in Mexico, commanding Mississippi volunteers, with the rank of lieutenant-colonel. He afterward settled at Olympia, Washington territory, and sat in the house of representatives as a delegate from that territory. He served in the San Jacinto and in the Mexican war. He held the rank of brigadier-general in the confederate army, distinguished himself at Shiloh and Stone river, and was promoted to major-general 17 Feb., 1864. He was assigned to the command of the district of Florida, and subsequently commanded a division in Polk's corps, Army of the Tennessee. He was born in Henry, juggler, b. in Aberdeenshire, Scotland, about 1810. He appeared on the stage with a travelling dramatic company in 1839, and was known as a conjurer in Scotland before he came to America in 1851. In New York he appeared in drama at the Broadway theatre and at Castle Garden, and then opened an exhibition of sleight-of-hand at Tripler Hall, taking the professional name of "Prof. Anderson, the Wizard of the North." He attained a high reputation as a juggler, and travelled extensively in the United States and other countries.

ANDERSON, John Jacob, educator, b. in New York city in 1821. He was the master of a large public school in New York for twenty years, and is the author of several text-books of history. These include "Introductory School History of the United States" (New York, 1865); "Pictorial School History of the United States" (1846); "Common School History of the United States"; "Grammar School History of the United States"; "A Manual of General History"; "A School History of England" (1870); "The Historical Reader" (1871); "The United States Reader" (1873); "A New Manual of General History" (1869); "A Pictorial School History"; "A School History of France"; "The Historical Reader"; and "A School History of Greece.

ANDERSON, Joseph, statesman, b. near Philadelphia, 5 Nov., 1757; d. in Washington, D. C., 17 April, 1837. He studied law, and at the beginning of the revolution was appointed an ensign in the New Jersey line, but at the battle of Monmouth he served as a captain. He was with Sullivan in the expedition against the Iroquois, and was present at Valley Forge and at the siege of Yorktown, retiring after the war with the brevet rank of major. He began the practice of law in Delaware. Washington appointed him in 1791 territorial judge of the region south of the Ohio river, and he took part in drawing up the constitution of Tennessee. He was U. S. senator from that state from 1797 to 1815, serving on important committees and twice acting as presiding clerk pro tempore. He was first comptroller of the treasury from 1815 till 1836.

ANDERSON, Martin Brewer, educator, b. in Brunswick, Me., 12 Feb., 1817; d. at Lake Helen, Fla., 26 Feb., 1860. He was graduated at Waterville college in 1840, and then studied for a year at Newton, Mass. In the following year he was appointed tutor of Latin, Greek, and mathematics at Waterville, and subsequently professor of rhetoric. He also organized and taught the course in modern history. In 1850 he resigned his professorship and became proprietor and editor of the "New York Recorder," a weekly Baptist journal. In 1853 he accepted the presidency of the University of Rochester, which office he occupied until 1859, teaching the departments of psychology and political economy. He travelled in Europe in 1862-63. He published numerous literary and philosophical articles. He was a powerful public speaker, and during the war rendered notable service in arousing and sustaining the sentiment of loyalty to the government and the determination to carry the struggle through to a successful close. He was a member of the New York state board of charities for thirteen years, also one of the commissioners of the state reservation at Niagara Falls.
ANDERSON, Mary, actress, b. in Sacramento, Cal., 28 July, 1859. She was brought to Louisville, Ky., when an infant, and was left fatherless at three years of age. She was educated in the Ursuline convent of that city, and, when thirteen years old, resolved to enter the dramatic profession. She received a training in music, dancing, and literature to that end, and, after taking a course of didactic lessons in New York, on the advice of Charlotte Cushman, and pursuing elocutionary studies at home for a year longer, she appeared as Juliet at Macaulay's theatre, in Louisville, 27 Nov., 1875, and subsequently in other parts. She played then in St. Louis, and next in New Orleans, where she was received with enthusiasm. She became a favorite actress in the principal cities of the United States, playing Lady Macbeth, Parthenia in "Ingomar," Pauline in "The Lady of Lyons," and various other characters. She played in 1883 and the following seasons in England, where she was greatly admired for her beauty and refined acting. See "The Stage Life of Mary Anderson," by William Winter (New York, 1886). She married in 1890.

ANDERSON, Ophelia Brown, actress, b. in Boston, 24 July, 1845; d. in Jamaica Plain, Mass., 27 Jan., 1852. She was the daughter of Mrs. Polby, an actress, and appeared on the stage in Boston, when two years old, as Cora's child in "Pizarro." She became a favorite with the American public, and was the chief attraction in the Tremont and National theatres, of which successively her father was the manager. Her father, William Pelby, b. in Boston, Mass., 16 March, 1822; d. 29 March, 1850, managed the Tremont, built the Warren theatre, and appeared in London as Hamlet and Brutus in Payne's play.

ANDERSON, Rasmus Björn, author, b. in Albion, Wis., 12 Jan., 1846. His parents were Norwegians, and he was educated at the Norwegian Lutheran college, at Decorah, Iowa. He was professor of Scandinavian languages at the University of Wisconsin from 1875 to 1884. In 1885 he was appointed U. S. minister to Denmark. He has published "Julegraven" (1872); "Den Norske Maasbag" (1874); "America Not Discovered by Christopher Columbus" (Chicago, 1874); "Norse Mythology" (1875); "Viking Tales of the North" (1877); "The Younger Edith" (1880); 3d telling of Horn's "History of the Literature of the Scandinavian North" (1885); and Björn's works.

ANDERSON, Richard Clough, soldier, b. in Hanover co., Va., 12 Jan., 1760; d. near Louisville, Ky., 16 Oct., 1826. As captain in the 5th Virginia continental, he led the advance of the Americans at the battle of Trenton, 27 Dec., 1814, crossing the Delaware river in the first boat, and driving in the Hessian outposts several hours before the main attack was delivered. He was at the battles of Brandywine and Germantown, and was a daring leader wherever dash and resolution were needed. He was at the death-bed of Pulaski, and the dying Pole gave him his sword as a memento. After the war he removed to the wilderness of Kentucky, near Louisville, and led the life of a pioneer and Indian fighter until advancing civilization pushed the frontier so far westward that he was too old to follow. Before the close of the last century he superintended the building of a two-masted vessel, which he sent to London laden with Kentucky produce. See biographical sketch of New York, 1879, by his son, Richard Clough, Jr., lawyer (b. in Louisville, Ky., 4 Aug., 1788; d. in Tabaco, 24 July, 1856), was graduated at William and Mary college in 1804, and studied law with Judge Tucker. He practised with success at the Kentucky bar, and, after sitting in the legislature, was elected to congress in 1817 and again under the following term. In 1822 he was again returned to the legislature, and was chosen speaker. He was appointed minister to Colombia in 1823 and in 1826, when proceeding to the Panama congress as envoy extraordinary, he died on the journey.

ANDERSON, Richard Herron, soldier, b. near Statesburgh, S. C., 7 Oct., 1821; d. in Beaufort, 26 June, 1878. He was graduated at the U. S. military academy in 1842, assigned to the 2d dragoons, and served on frontier duty until 1845, when he joined the expedition for the military occupation of Texas. In the war with Mexico he took part in the siege of Vera Cruz and the various operations preceding and including the capture of the city of Mexico, 15-14 Sept., 1847. In 1857 he was assigned to the 2d dragoons 13 July, 1848, and captain 3 March, 1855, served frequently at the cavalry school for practice at Carlisle barracks, and was on duty in Kansas during the border troubles of 1855-57. He was on duty at Fort Kearney, Nebraska, from 1859 to 1861, when he resigned; 3 March, 1861, to accept a brigadier's commission in the Confederate government. He was promoted to major-general in August, 1862, and given the command of the 5th division of Bragg's army in Tennessee, but was soon ordered to the army of Virginia, and was wounded at Antietam. He commanded a division at Gettysburg 1-3 July, 1863, and was promoted to lieutenant-general in May, 1864. It was his unexpected death in a pursuit of Forrest that led to the entrenchment (a suitable place to encamp) that took the van of Lee's army to the defence of Spottsylvania before Grant could reach that place, and thus prolonged a campaign that might otherwise have ended there with a decisive battle. Gen. Anderson took a prominent part in the defence of Petersburg, and in the closing engagements that preceded the surrender of the 4th corps of the confederate army under Lee. After the war he remained in private life.

ANDERSON, Robert, soldier, b. at "Soldier's Retreat," near Louisville, Ky., 14 June, 1855; d. in Nice, France, 27 Oct., 1871. He graduated at West Point in 1855, and was appointed second lieutenant in the 1st corps of engineers. He served in the Black Hawk war of 1832 as colonel of the Illinois volunteers. In 1835-37 he was instructor of artillery at West Point, and in 1837-38 he served in the Florida war, and was brevetted captain. Subsequently he was attached to the staff of Gen. Scott as assistant adjutant-general, and was promoted major in December, 1861, and in October, 1861, to the rank of colonel, and serving in the Mexican war, and was severely wounded at Molino del Rey. In 1857 he was appointed major of the 1st artillery, and on 20 Nov., 1860, he assumed com-
mand of the troops in Charleston harbor, with headquarters at Fort Moultrie. Owing to threatened assaults, he withdrew his command, on the night of 26 Dec., to Fort Sumter, where he was soon closely invested by the confederate forces. On 13 April, 1861, he evacuated the fort, after a bombardment of nearly thirty-six hours from batteries to which he replied as long as his guns could be worked. He marched out, with his seventy men, with the honor of the flag of the 14th, saluting his flag as it was hauled down, and sailed for New York on the following day. In recognition of this service he was appointed brigadier-general in the U.S. army by President Lincoln, and was assigned to the command of the department of Kentucky, and subsequently to that of the Cumberland. In consequence of his failing health, he was relieved from duty in October, 1861. He was retired from active service 27 Oct., 1863, and on 3 Feb., 1865, he was brevetted major-general. He sailed for Europe in 1869 for his health, but died there. He translated and adapted from the French "Instructions for Field Artillery, Horse and Foot" (1840), and "Art of Assaulting Batteries" (1890), both of which have been used by the war department. It was largely owing to his personal efforts that the initial steps were taken organizing the Soldiers' Home in Washington, which now harbors about 2,000 veterans of the regular army.—His brother, Larz, capitalist, b. near Louisville, Ky., 9 April, 1805; d. in Cincinnati, Ohio, 27 Feb., 1878, was graduated at Harvard in 1822. He was a son-in-law of Nicholas Longworth, of Cincinnati, in which city he resided and was respected for his profuse charities and public spirit.

ANDERSON, Robert Houston, soldier, b. in Savannah, Ga., 1 Oct., 1829; d. there, 8 Feb., 1888. He was graduated at West Point in 1857, and served in the 9th infantry at Fort Columbus, New York harbor, and at Fort Walla-walla, Washington territory, until 1861, when he obtained a leave of absence, but subsequently resigned (5 May, 1861), entered the Confederate service as major, and was commissioned brigadier-general in 1864. In 1867 he became chief of police in Savannah, Ga.

ANDERSON, Rufus, author, b. in North Yarmouth, Me., 17 Aug., 1796; d. 30 May, 1880. He was graduated at Bowdoin college in 1818, and at Andover theological seminary in 1822, and was ordained as a minister in 1823. From 1824 to 1832 he was assistant secretary of the American board of foreign missions, and in 1832 he became secretary, in which office he remained until 1856, receiving on that occasion a testimonial of $20,000 from New York and Boston merchants, most of which he turned over to the board. From 1847 to 1859 he lectured on foreign missions in the American seminary. He visited the Mediterranean missions in 1843, the Indian missions in 1854, and those in the Sandwich islands in 1863. He published "Foreign Missions, their Relations and Claims"; "Memoir of Catharine Brown" (1825); "Observations upon the Peloponnesus and Greek Islands" (Boston, 1839); "The Hawaiian Islands, their Progress and Condition under Missionary Labors" (1864); "A Heathen Nation Civilized," containing a history of the Sandwich island mission (1870); and "History of the Missions of the American Board of Commissioners for Foreign Missions to the Oriental Churches" (1872).

ANDERSON, William, soldier, b. in Chester co., Pa., in 1763; d. there 14 Dec., 1829. He fought through the revolutionary war, served at the battle of Brandywine on the staff of Gen. Lafayette as colonel, and was present at Valley Forge, Germantown, and Yorktown. He was a Jeffersonian democrat and held many public offices. From 1809 to 1815 he sat in congress, and again in 1817-19. He was subsequently county court judge in Delaware co., and after that a collector of customs, His daughter Evelina, who became the wife of Commodore Porter, was author of the popular song "The sailor has prop'd the spirit that loved thee."

ANDRÉ, Édouard Vital, Count (an-drā'-da), Brazilian statesman, b. in Santos, 13 June, 1763; d. near Rio de Janeiro, 6 April, 1838. Under the patronage of the Lisbon royal academy he travelled, studying in Paris under Lavoisier, at the mining school of Friedberg under Werner, and at Pavia under Volta. In 1800 he became president of the national union of the farmers of Coimbra, and soon afterward general intendant of the Portuguese mines. He took an active part in the construction of canals and public works, and in 1812 was named perpetual secretary of the Lisbon academy of sciences. He returned to Brazil in 1819, and became one of the champions of national independence. As chief minister in the junta (24 Dec., 1821) he urged Dom Pedro I. to remain in Brazil, became his minister of the interior (16 Jan., 1822), was removed from his office 25 Oct., but reinstated 30 Oct., at the request of the people, and was finally displaced 17 July, 1823, on account of his liberalism. In the constituent assembly his opposition became so bitter that after its dissolution (12 Nov., 1823) he was banished to France, and lived in Bordeaux till 1829, when he returned to Brazil. Dom Pedro I. abdicating 7 April, 1831, in favor of Dom Pedro II., selected Andrada as the latter's guardian and tutor. In 1835 he was tried on a charge of intrigue and restoration, but Dom Pedro I. was acquitted, but was deprived of his place and restrained of his liberty. He wrote on mineralogy, and published "Poesias d'America Elysea" (Bordeaux, 1825). His brothers, Antonio Carlo and Martin Francisco d'Andrad, were prominent in Brazilian politics and shared his fate. The latter, b. in Santos in 1776, d. there 23 Feb., 1844, left two sons: José Bonifacio, author of "Rosas e goivos" (São Paulo, 1849); and Martin Francisco, author of "Lagrimas e sorrisos" (Rio, 1847), and of the drama "Januário Garcia" (1849).

ANDRÉ, John, soldier, b. in London in 1754, of Swiss parents; d. at Tappan, N. Y., 2 Oct., 1780. In the autumn of 1775 he was taken prisoner at St. John's by Gen. Montgomery. He afterward served on the staff of Gen. Grav, and then on that of Sir Henry Clinton, who, in 1779, made him adjutant-general of the British army in America. Under the name of "John Anderson," he contested the Hessians at Pippins by secret negotiations with Benedict Arnold for the surrender of West Point. On the night of 21 Sept., 1780, he had an interview with Arnold in the woods near Stony Point, and took breakfast with him in the house of Joshua Smith, who was not privy to the plot. On leaving him,
Arnold gave him six papers containing full information as to the state of the defences at West Point, and also pass enabling him to return either by land or by water to New York. Smith persuaded him to take the journey by land, and accompanied him part of the way. Contrary to Clinton's positive instructions, André adopted a disguise, and, contrary to Arnold's positive instructions, Smith left him before he had reached the British lines. Soon after Smith left him he was stopped by three young men, who supposed to be soldiers, and incautiously let them know that he was a British officer. The young men, who were patriots, searched the reasonable documents in his stockings, arrested him. He was tried by a board of six major-generals and eight brigadiers, found guilty of acting as a spy, and condemned to the gallow. His remains were buried on the spot where he suffered, but in 1821 they were taken to England and interred in Westminster Abbey. His hard fate has been often commended for acting upon his suffering personal qualities, but the justice of his sentence is generally conceded by British writers as well as American. Each of André's captors—John Paulding, David Williams, and Isaac Van Wart—received from congress a silver medal and an annuity of $200. His life has been written in Sparks, in his American Biographies, and more fully by Winthrop Sargent, Life and Career of Major John André (Boston, 1861).

ANDREE, Karl Theodor, German geographer, b. in Brunswick, 20 Oct., 1808; d. in Waltham, 10 Aug., 1853. After studying at Jena, Göttingen, and Berlin, he published, in 1829—51, at Brunswick, a work entitled "Nordamerikanische Geschichtlichen Umb. und geschichtlichen Umrissen." Among his other works are "Buenos Ayres und die argentinische Republik" (Leipsic, 1836); "Geographische Wanderungen" (Dresden, 1839); and "Geographie des Welthandels" (Stuttgart, 1856). In 1861 he began the publication of the geographical magazine "Globus." During the American civil war he advocated the cause of the secessionists.

ANDREW, James Osgood, M. E. bishop, b. in Wilkes co., near Washington, Ga., 3 May, 1794; d. in Mobile, Ala., 1 March, 1871. He was the son of a Methodist minister who was a partisan ranger in the revolution. He entered the South Carolina conference in 1812, was ordained deacon in 1814, received full ordination in 1816, and in the ensuing years in Georgia and North Carolina, was stationed at Savannah, Charleston, Greensborough, and Athens, was presiding elder for several years, and in 1822 was chosen bishop by the general conference that met at Philadelphia. After Emory college was established in 1841, he resided at Oxford, Ga. In 1844 he married Leonora Greenwood, of Greensborough, who possessed a few slaves, and after marriage he conveyed to his wife all the rights in her property that the law gave him. He was himself the legal owner of a negro woman, who had been left in his charge by a deceased parishioner, with the request that she might be sent to Liberia or remain with him, at his option, and also of a boy who had been bequeathed to his former wife. At the general conference in New York in 1844, the fact that Bishop Andrew was a slave-holder was the subject of a heated discussion, ending with the adoption of a resolution, by a vote of 111 to 69, requesting him to desist from performing the offices of bishop so long as he remained a slave-owner. When he became aware of the consequence of this request, caused by the fact that the bishops of the church was interested in slave property, he decided to resign his episcopal office, but was deterred by a formal request from the southern delegates to the conference. The representatives of thirteen southern conferences protested against this action and repudiated the jurisdiction of the general conference, and in May, 1846, the Methodist Episcopal church, south, was organized as an independent body, in a general conference held at Petersburg, Va. Bishop Andrew presided as senior bishop over this organization until his death. After a visit to California in 1855, to look after the interests of the struggling southern Methodist church, he took up residence in Ala. The New Orleans conference of 1866 granted him a retired relation at his own request. He published a volume of "Miscellanies" and a work on "Family Government."

ANDREW, John Albion, statesman, b. in Windham, Me., 31 May, 1815; d. in Boston, Mass., 30 Oct., 1867. His father, descended from an early settler in New Hampshire, was a merchant in Windham. John Albion was graduated at Bowdoin in 1837. He was a neglected student, though fond of reading, and in his professional life always felt the lack of training in the habit of close application. He immediately entered on the study of the law in the office of Henry H. Fuller, in Boston, where he was admitted to the bar. Until the outbreak of the war he practised his profession in that city, attaining special distinction in the fugitive-slave cases of Shadrach Burns and Sims, which arose under the fugitive-slave law of 1850. He became interested in the slavery question in early youth, and was attracted toward many of the reform movements of the day. But he took an active interest in politics and frequently spoke on the stump on behalf of the wig party, of which he was an enthusiastic member. From the year 1848 he was closely identified with the anti-slavery party of Massachusetts, but held no office until 1858, when he was elected a member of the state legislature from Boston, and at once took a leading position in that body. In 1860 he was a delegate to the Chicago republican convention, and, after voting for Mr. Seward on the early ballots, announced the change of the vote of part of the Massachusetts delegation to Mr. Lincoln. In the same year he was nominated for governor by a popular impulse. Many feared that the participation of the state in the impeding conflict between the government and the seceded states. He had announced this purpose in his inaugural address in 1861, and, upon
being inducted into office, he sent a confidential message to the governors of Maine and New Hampshire, inviting their cooperation in preparing the militia for service and providing supplies of war material. This course of action was favored with favor at the time by a majority of the legislature, although his opponents refrained from a direct collision. On receiving the president's proclamation of 15 April, 1861, he despatched five regiments of infantry, a battalion of artillery, and a battery of artillery to the defence of the capital. Of these, the Massachusetts 6th was the first to tread southern soil, and the rapid progress of that state were mustering and shedding the first blood of the war in the streets of Baltimore, where it was assailed by the mob. Gov. Andrew sent a telegram to Mayor Brown, praying him to have the bodies of the slain carefully sent forward to him at the expense of the commonwealth of Massachusetts. He was equally active in raising the not regarded contingent of three years' volunteers, and was laborious in his efforts to aid every provision for the comfort of the sick and wounded soldiers. He was four times re-elected governor, holding that office till January, 1866, and was only then released by his positive declination of another renomination, in order to attend to his private business, as the pecuniary sacrifice involved in holding the office was more than he was able to sustain, and his health was seriously affected by his arduous labors. In 1862 he was one of the most urgent of the northern governors in impressing upon the administration at Washington the necessity of adopting the emancipation policy, and of forwarding the several amendments to the Constitution. In September, 1862, he took the most prominent part in the meeting of governors of the northern states, held at Altoona, Penn., to devise ways and means to encourage and strengthen the hands of the government. The address of the governors to the people of the north was prepared by him. Gov. Andrew interfered on various occasions to prevent the federal authorities from making arbitrary arrests among southern sympathizers in Massachusetts previous to the suspension of the habeas-corpus act. In January, 1863, he obtained from the secretary of war the first authorization for raising colored troops, and the first colored regiment (54th Massachusetts infantry) was despatched from Boston in May. Gov. Andrew was particular in selecting the best officers for the black troops and in providing them with the most complete equipment. Though famous as the war governor of Massachusetts, he also bestowed proper attention on the domestic affairs of the commonwealth. In his first message he recommended that the provision in the law preventing a person against whom a decree of divorce has been granted from marrying again, should be modified; but the proposition met with strong opposition in the legislature, especially from clergymen, and it was not till 1864 that an act was passed conferring power upon the supreme court to remove the penalty resting upon divorced persons. He also recommended a reform in the usury laws, such as was finally effected by an act passed in 1867. He was strongly opposed to capital punishment, and recommended its abandonment. A law requiring representatives in congress to be residents of the districts from which they are elected was vetoed by him on the ground that it was both unconstitutional and inexpedient, but was passed over his veto. Of the twelve veto messages sent by Gov. Andrew during his incumbency, only one other, in the case of a resolve to grant additional pay to members, was followed by the passage of the act over the veto. His final term as governor expired 5 Jan., 1866. In a valedictory address to the legislature he advocated a generous and conciliatory policy toward the southern states, "demanding no attitude of humiliation; inflicting no acts of humiliation." Gov. Andrew was modest and simple in his habits and manner of life, emotional and quick in sympathy for the wronged or the unfortunate, exceedingly joyous and mindful in temperament, and companionable with all classes of persons. The distinguished ability that shone out in his administration as governor of Massachusetts, the many glittering quips of his intellect, his personal character, his social address, and the charm of his conversational powers, together with his clear and forcible style as an orator, combined to render him conspicuous among the state governors of the war period, and one of the most influential persons in civil life not connected with the federal administration. So high was the expectation of his labors as governor he was tendered, but declined, the presidency of Antioch college, Ohio. He presided over the first national Unitarian convention, held in 1863, and was a leader of the conservative wing of that denomination—those who believed with Channing and the early Unitarians in the supernaturalism of Christ's birth and mission, as opposed to Theodore Parker and his disciples. After retiring from public life Mr. Andrew entered upon a lucrative legal practice. In January, 1867, he represented before the general court about 30,000 petitioners for a license law, and delivered an argument against the principle of total prohibition. On the 20th of the month he died, much regret was noticed by public meetings in various cities. He married, 25 Dec., 1848, Miss Eliza Jane Hersey, of Hingham, Mass., who with their four children survived him. See "Memoir of Gov. Andrew, with Personal Reminiscences," by Peleg W. Chandler (Boston, 1868), "Discourse on the Life and Character of Gov. Andrew," by Rev. E. Nason (Boston, 1868), and "Men of Our Times," by Harriet Beecher Stowe. A life of Gov. Andrew, by Edwin P. Whipple, was left unfinished at the time of Mr. Whipple's death in 1886.—His son, John F., d. in Boston, 30 May, 1885. He was graduated from Harvard in 1872, and three years later settled in the state in terms as a Massachusetts representative and two terms as state senator. In 1888 he was elected to congress as a democrat, and re-elected two years later, but was defeated in 1892.

ANDREWS, Christopher Columbus, lawyer, b. in Hillsborough, N. H., 27 Oct., 1829. He was a farmer's son, attended school during the winter until 1843, when he went to Boston. Later he attended the Franconia academy, studied law in 1848 at Cambridge, and in 1850 was admitted to the bar. He followed his profession in Newton, and was also a member of the school board during 1851-52. In 1853 he settled in Boston, but in the following year removed to Kansas, and later went
to Washington to further the interests of Kansas during a session of congress. After two years' service in the treasury department as law clerk, he settled in St. Cloud, Minn., and in 1829 was elected state senator in the first constitutional convention of 1829 he actively supported Douglas and was nominated as elector on that ticket. In 1831 he assisted in bringing out the "Minnesota Union" in support of the administration, and for a time edited that paper. Soon after the beginning of the civil war he enlisted as a private, but was commissioned colonel in the Minnesota Volunteers. He was surrendered in a fight near Murfreesboro, and from July to October, 1862, was a prisoner. After his exchange he was appointed lieutenant-colonel of his regiment, and was present in the operations around Vicksburg. He became colonel in July, 1863, and served in the campaign that resulted in the capture of Little Rock, Ark., where he was placed in command with a brigade. Here he was very active in fostering the union element, and his influence went far in the movement that in January, 1864, resulted in the reorganization of Arkansas as a free state, for which he received the thanks of the constitutional convention. During 1865 he commanded the forces near Augusta, Ark., fortified Deesall's Bluff, Gen. Steele's base of supplies, and organized numerous successful scouting parties. He was promoted to brigadier-general, and assigned to the command of the 2d division, 13th corps, and participated in the siege and storming of Fort Blakely, Ala. On 9 March, 1865, he was commissioned brevet major-general. Subsequently he commanded the district of Mobile, and later that of Houston, Texas. In the reconstruction of that state Gen. Andrews showed much interest, and made speeches at Houston and elsewhere which produced a better public opinion. Afterward he was ordered to accompany Gov. A. J. Hamilton to Austin on his reinstatement to the governorship of Texas, and from August 27 to December during the autumn of 1865, and was mustered out of service 13 Jan., 1866. He was appointed minister resident to Sweden and Norway in 1869, and continued there until 1877, furnishing the U. S. government with frequent valuable reports on important subjects, which have been published in the "Record and Laws of the United States" (Boston, 1858); "Hints to Company Officers on their Military Duties" (New York, 1860); "Digest of the Opinions of the Attorneys-General of the United States" (Washington, 1865); and "History of the Campaign of Mobile" (1867).

ANDREWS, Ebenezer Baldwin, geologist, b. in Danbury, Conn., 29 April, 1821; d. in Lancaster, Ohio, 19 Aug., 1899. He was in community of the first at Williams college and then at Marietta college, where he was graduated in 1842. Then, after graduation at Princeton theological seminary in 1844, he became pastor of the Congregational church in Housatonic, Mass., 1846-50, and from 1850 to 1851 he had charge of a parish in New Britain, Conn. From 1851 to 1856 he was professor of chemistry and mineralogy in Williams college, and then became assistant geologist to the Ohio state survey. He contributed papers on geological subjects to the "American Journal of Science," and the record of his work is given in the annual reports of the Ohio survey. He was also the author of a manual-book on "Elementary Geology" (Cincinnati, 1878). In 1870 he was made LL. D. by Marietta college.
ANDREWS, Ethan Allen, educator, b. in New Britain, Conn., 7 April, 1787; d. there, 4 March, 1858. He was graduated at Yale in 1810, studied law in Farmington, was admitted to the bar, and spent several years in practice. In 1822 he was appointed professor of ancient languages in the university of North Carolina at Chapel Hill. He returned in 1828 to teach ancient languages in the New Haven gymnasium, and a year later established the New Haven young ladies' institute. In 1833 he was called to Boston to succeed Jacob Abbott as principal of a young ladies' school, and also became senior editor of the "Religious Magazine," which was then edited by his brother, Abbott. In 1839 he returned to his native town and began the publication of his series of Latin text-books. These include "First Latin Book"; "Latin Reader"; "Viri Romani"; "Latin Lessons"; "Andrews and Stoddard's Latin Grammar"; "Synopsis of Latin Grammar"; "Questions of Latin"; "Key to Latin Exercises"; "Exercises in Latin Syntax"; "Cesar's Commentaries"; "Salust"; "Ovid"; and "Latin Dictionary." His most important work was the "Latin-English Lexicon," which is a condensed translation, with alterations, of Dr. Wilhelm Freund's "Wörterbuch der Lateinischen Sprache." He was engaged in a revised edition of the Latin Lexicon at the time of his death, and it has since been published. For several years he was judge of probate, and in 1851 he was a member of the state legislature.

ANDREWS, George Leonard, soldier, b. in Bridgewater, Mass., 31 Aug., 1828; d. in Brookline, Mass., 4 April, 1880. He was graduated at the U. S. military academy, and became colonel of the 2d Massachusetts regiment in the Shenandoah valley, and conferred the degree of general at the time of his death. He was engaged in the erection of fortifications in Boston harbor, and was assistant professor of engineering at West Point. Resigning 1 Sept., 1855, he was employed as a civil engineer until the beginning of the civil war. He served as lieutenant-colonel, and subsequently as colonel of the 2d Massachusetts regiment in the Shenandoah valley, and was engaged for the service of several weeks. He was engaged in the construction of fortifications at the mouth of the Potomac river. He was killed at the battle of Cedar Mountain. He fought through Pope's campaign, and was at Antietam. For distinguished bravery he was promoted brigadier-general, 10 Nov., 1862, and in Banks's expedition led a brigade. From July, 1863, to 13 Feb., 1865, he commanded the corps d'Afrique. For his services at Vicksburg and Antiota, he was made a brigadier-general of volunteers, 26 March, 1865. On 8 April, 1867, he was appointed U. S. marshal for Massachusetts, and on 27 Feb., 1871, went to West Point as professor of the French language.

ANDREWS, John, clergyman, b. in Cecil co., Md., 4 April, 1746; d. in Philadelphia, 29 March, 1813. He was educated at the Philadelphia academy, and was ordained in London in February, 1767. He left his parish in Queen Anne co., Md., on account of his loyalist sentiments, and taught a school in Yorktown, became principal of the Philadelphia Episcopal academy in 1785, and then professor of moral philosophy in the University of Pennsylvania, of which institution he was vice-president until December, 1810, and after that professed until his death. He was author of "Elements of Logic."

ANDREWS, Joseph, engraver, b. in Hingham, Mass., 17 Aug., 1806; d. there, 9 May, 1873. He was apprenticed to Abel Bowen, a wood-engraver of Boston, in 1821, and learned copper-plate engraving from Hoogland, who was his brother, and printer, at Lancaster, in 1827, but in 1835 went to London and studied under Joseph Godfrey. There he executed the plate of "Annette de l'Arbre," after West, and in Paris engraved the head of Franklin, painted by Duplessis. In 1840 he visited Paris a second time, and engraved six portraits for the historical gallery at Versailles, published under the auspices of Louis Philippe. After that he went to Florence and began the plate of the "Duke of Urbino," after Titian. His best-known engravings made in America are from Stuart's head of Washington and Rothermel's "Plumtree Rock in 1620." He engraved portraits from paintings by Trumball, G. P. A. Healy, and others, of Oliver Wolcott, John Q. Adams, Zachary Taylor, Jared Sparks, Amos Lawrence, and James Graham, and several ideal scenes after representative American landscapes.

ANDREWS, Loren, educator, b. in Ashland co., Ohio, 1 April, 1819; d. in Gambier, Ohio, 18 Sept., 1861. He was educated at Kenyon college, devoted himself to teaching, and the excellence of the present common-school system of Ohio is largely due to his labors. He filled various important educational places in the United States, when he was elected president of Kenyon college. During his administration the affairs of the college flourished greatly; additions were made to the faculty, new buildings were erected, and the number of students increased from thirty to more than two hundred. On the outbreak of the civil war, in 1861, President Andrews raised a company of volunteers, and he was made captain. Later he was elected colonel of the 4th Ohio volunteers, and, after service at Camp Dennison, he was ordered to Virginia. He was in the field a short time, where he was subjected to fatiguing service, and was afterward stationed at Oakland, remaining until he was taken home ill at the end of August; there he died of exposure having brought on an attack of camp fever, from the effects of which he died a few weeks later.

ANDREWS, Lorrin, missionary, b. in East Windsor, Conn., 29 Apr., 1755; d. in Honolulu, Sandy islands, 29 Sept., 1856. He was educated at Jefferson college, Pa., and Princeton theological seminary; sailed for the Hawaiian islands in November, 1827, and preached at Lahaina. In 1831 he established Lahainaduna seminary, which subsequently became the Hawaiian university, in which he was a professor for ten years. He translated a part of the Bible into Hawaiian, resigning his connection with the American Board in 1840, and was awarded by King Kamehameha for such time as the king's chaplain at Lahaina. In 1845 he was appointed judge under the Hawaiian government, and was also secretary of the privy council. These offices he held for ten years. He prepared a Hawaiian dictionary and several works on the literature and antiquities of the Hawaiians.

ANDREWS, Samuel James, clergyman, b. in Danbury, Conn., 21 July, 1817. He was graduated at Williams college in 1839, and became a lawyer. Subsequently he was ordained in the Congregational ministry, was afterward a tutor at Trinity college, Hartford, and at last adopted the Irvingite doctrines, and became, in 1856, a pastor of the Catholic apostles, in Harvard, Conn. He published "The Life of Our Lord Upon Earth." (New York, 1865.)

ANDREWS, Sherlock James, jurist, b. in Wallingford, Conn., 17 Nov., 1801; d. in Cleveland, Ohio, 11 Feb., 1880. He was graduated at Union college in 1821, after which he followed the lectures on science as assistant to Prof. Silliman, and also the lectures on law. In 1825 he removed to Ohio, and from that time devoted himself to the profession of law, and was constantly engaged in important
that for some years before his death he conversed and corresponded in it with several of his pupils, and was preparing a dictionary of Alwato, a portion of which was in type at the time of his decease. The philosophy evolved from universology he called "Integralism." In it he believed would be found the ultimate principle of religion, freedom and political views. Among those associated with him in this were Prof. Louis Elsberg, Rev. Dr. Ryland, Rev. Dr. Newman, Rabbi Gottheil, Rev. Dr. Sampson, Rev. Dr. Colyer, Prof. J. S. Sedgwick, T. B. Wakeman, and Rabbi Hildebr. Mr. Andrews was a prominent member of the Liberal club of New York, and for some time was its president.

His contributions to periodicals are numerous. He was a member of the American academy of Arts and Sciences and of the American Ethnological Society. His works include "Comparison of the Common Law with the Roman, French, or Spanish Civil Law on Estates and other Limited Property in Real Estates" (New York, 1841); "Cost of Government in the United States" (New York, 1851); "The Constitution of Government in the Sovereignty of the Individual" (1851); "Love, Marriage, and Divorce, and the Sovereignty of the Individual: a Discussion by Henry James, Horace Greeley, and Stephen Pearl Andrews," edited by Stephen Pearl Andrews (1853); "Discoveries in Chinese, or the Universal Primitivism of Science," and "A New System of Writing as a Contribution to Philology and Ethnology and a Practical Aid in the Acquisition of the Chinese Language" (1854); "Constitution or Organic Basis of the New Catholic Church" (1860); "The Great American Crisis," a series of papers published in the "Continental Monthly" (1860-63); "The Civil War and the Continental Monthly," (1864); "The Primary Synopsis of Universology and Alwato" (1871); "Primary Grammar of Alwato" (Boston, 1877); "The Labor Dollar" (1881); "Elements of Universology" (New York, 1881); "Ideological Ety- mology" (1881); "Transactions of the Colloquium, with Documents and Exhibits" (vols. 1 and 2, New York, 1884); "The Church and Religion of the Future," a series of tracts (1886); and text-books of phonography. His dictionary of Alwato was published posthumously by his sons.

ANDREWS, Timothy Patrick, soldier, b. in Ireland in 1794; d. 11 March, 1868. During the war of 1812, when Barney's flotilla, in Patuxent river, was confronting the enemy, the services of a naval officer of his father, was employed by the commodore as his aide, and rendered important services. He subsequently was in active service in the field, and in 1822 appointed paymaster in the army. In 1847 he resigned to take command of the regiment of voltigeurs raised for the Mexican war. He was distinguished in the battle of Contreras and as a brigadier-general for gallant and meritorious conduct in the battle of Chapultepec. On the close of the war and the disbandment of the voltigueurs, he was reinstated, by act of congress, as paymaster, and in 1851 was made deputy paymaster-general. During the civil war, on the death of his brother, Andrews succeeded him as paymaster-general of the army. He was retired 29 Nov., 1864.
ANDROS, William Draper, inventor, b. in Grafton, Mass., 25 May, 1818. In 1828 the family removed to New York, where he was a pupil in a country store at Newton Lower Falls for a year. He removed to New York, where he was variously employed until 1840, when he became connected with a wrecking company. While he was thus engaged his attention was directed to pumping apparatus, and in 1844 he invented the pioneer centrifugal pump, which was patented in 1846. By this invention the saving of imperishable goods from abandoned wrecks was made possible. Its mode of action consisted in forming channels through sand-bars and in making earth excavations in and under water. This pump was subsequently introduced and extensively manufactured in England and throughout the world. About nine years later he invented and patented the anti-friiction centrifugal pump, which has been used all over the world. He also invented three other distinct styles and various modifications of centrifugal pumps, of which that known as the “Cataract” is the most valuable. In all, Mr. Andrews has received twenty-five United States and nine foreign patents on pumps, oscillating and differential power-gearing, siphon gang-wells and attachments, balanced valves, safety elevators, and other similar inventions. During the civil war each of the U. S. monitors was provided with centrifugal pumps and engines. These were made to discharge thirty tons of water a minute, and arranged to fill compartments, thereby partly submerging the monitor, so that in case of grounding in dangerous proximity to an enemy they could be lightened by pumping, backed off, and resubmerged in a few minutes. The pumps made by Mr. Andrews have been used in creating channels through the sand-bars at the mouth of St. John’s river, Fla., Cape Fear river, N. C., and the Delaware river. The system of gangs of tube-wells patented by him has been extensively used in cities. During the unprecedented drought of the summer and autumn of 1885, a series of four plants of gang-wells, furnished by Mr. Andrews to the city of Brooklyn, yielded for some time a daily average supply of 25,000,000 gallons, reaching an aggregate of 27,000,000 gallons in a single day, 18,400,000 gallons being their contracted delivery. Mr. Andrews has received numerous medals and diplomas for his inventions, both in this country and abroad.

ANDROS, Sir Edmund, colonial governor, b. in London, England, 6 Dec., 1637; d. there, 24 Feb., 1714. His father was an officer in the royal household, and young Andros was brought up at court. He early became a soldier, and served in the regiment of foot sent to America in 1666. In 1672 he was made major in Rupert’s dragoons, and two years later succeeded his father as bailiff of Guernsey. From 1674 to 1681 he was governor of the province of New York, appointed by Lord Baltimore, and in this capacity he became involved in numerous disputes with the adjoining colonies on account of his extensive claims to jurisdiction. In 1680 he deposed Philip Carteret and seized the government of New Jersey, and in the following year he was recalled and accused of maladministration. He was successful in clearing himself of all charges of unfaithfulness, and retired to Guernsey. In 1686, on the accession of James II., he was appointed governor of the dominion of New England, which included all the English North American settlements between Maryland and Canada, except Pennsylvania. He arrived in Boston on 21 Dec., 1686, and at once put into execution a number of measures that were extremely obnoxious to the colonists. Although proclaiming religious freedom, he restrained the liberty of the press, arbitrarily levied enormous taxes, and compelled land-owners to procure new titles to their property, for which exorbitant charges were made. These and similar actions, performed in accordance with instructions received in England, gave great offence. In October, 1687, at the head of an armed force, he demanded the surrender of the charter of Connecticut, but its sudden removal and concealment in the “charter oak” prevented the accomplishment of this purpose. The occurrence of these events has since been disputed, and historical data have been accumulated to show its imposibility. (See Broadshead’s “History of New York,” vol. ii., p. 472.) By his aggressions on the territory of the Penobscot Indians he brought on the Indian war of 1688. The people of Boston, unable to endure the severity of his administration, revolted, and on 18 April, 1689, he was deposed and imprisoned with fifty of his followers. In the following year he was sent to England, and his charges were preferred against him by a committee of colonists: but the home authorities deemed it unadvisable to bring the matter to a judicial decision, and he was never tried. In 1692 he again returned to America as governor of Virginia, and remained until 1698, gaining the esteem of the people by his efforts to promote manufactures and agriculture there. He was associated in the founding of William and Mary college, which, next to Harvard, is the oldest seat of learning in the United States. His quarrels with the church authorities, and the influence of Dr. Blair, commissary of the bishop of London, led to his recall. From 1704 to 1706 he was governor of the island of Jersey, and subsequently he lived in London. See Whitmore’s “Andros Tracts,” with notes and a memoir of Sir Edmund Andros (Boston, 1868); “A Narrative of the Proceedings of Sir Edmund Andros” (Boston, 1691 and 1773); “Collections of the Boston Historical Society” (3d series, vii., 150); Broadshead’s “Government of Sir Edmund Andros in New England” (Morison, 1868); Sir George Macartney’s “History of New York”; index to “O’Callaghan’s New York Colonial Documents”; Palfrey’s “History of New England” (iii., 127); and Bancroft’s “History of the United States” (vol. i., New York, 1882).

ANDROS, Thomas, clergyman, b. in Norwich, Conn., 1 May, 1730; d. in Berkeley, Mass., 30 Dec., 1845. He joined the revolutionary army at the age of sixteen, and was in the battles of Long Island and White Plains. In 1781 he enlisted on a privateer in New London, but was captured and confined in the Jersey prison-ship in New York. A few months later he escaped, and on the restoration of his health, studied theology with Dr. Benedict in New York. He was ordained at Berkeley in 1788, and for forty-six years remained
in charge of the church at this place. He published sermons, and also a narrative of his imprisonment and escape from the Jersey prison-ship. An account of his life, published in his son's name, given in Enuery's "Ministry of Taunton."—His son, Richard Salter Storrs, b. in Berkeley, Mass., 27 Oct., 1817; d. there, 3 Aug., 1868. He edited several newspapers, was deputy collector in Boston for some years, and subsequently, as special agent of the treasury department, was engaged in re-organizing the custorm-houses in the United States. He was the author of the "Customs Guide," a codification of the revenue laws, contributed poems to the "Democratic Review," and published "Chocoruma and other Sketches" (1838).

ANGEL, Benjamin Franklin, diplomatist, b. in Burlington, Otsego co., N. Y., 28 Nov., 1815; d. in Geneseo, N. Y., 11 Sept., 1894. He was prepared for college by Cornelius C. Felton, but did not enter, owing to trouble with his eyes. He taught school until he recovered their use, studied law, was admitted to the bar, and practiced in Geneseo in partnership with his former preceptor, at the same time writing editorials for the democratic county paper. He was appointed surrogate in 1838, and served in that office for four years, after which he was appointed master in chancery and supreme court commissioner, a judicial office conferring concurrent jurisdiction with the judges of the supreme court sitting in chambers. He was again surrogate from 1844 till 1847. He was a member of the democratic national convention at Baltimore in 1832. In 1835, his health having become impaired, he went to Honolulu, Sandwich islands, as U. S. consul. In 1852 Commodore C. C. Perry proceeded to China as special commissioner to settle a dispute between some American merchants and the Chinese government in regard to the exaction of export duties. This mission was successful, and he returned to the United States by way of the East Indies, Egypt, and Europe. His letters from Asia were published in the newspapers of the time. On his return, against his protest, he was placed in nomination for congress, but was defeated. On the accession of Mr. Buchanan to the presidency he was appointed minister to Norway and Sweden. He returned to the United States in the autumn of 1852, and, with the exception of being a delegate to a soft ingenuity convention that nominated Gen. McClellan for the presidency in 1864, he did not again take an active part in politics, but devoted himself to agriculture at Geneseo, N. Y. He was president of the state agricultural society in 1873-74.

ANGELL, Henry Clay, entomist, b. in Providence, R. I., 30 April, 1794; d. in Boston, 1 May, 1857. He was graduated at Brown university in 1815, was admitted to the bar in 1816, and in 1820 prosecuted in England, but without success, a claim to a large property. From 1829 to 1831 he was editor of the "Law Intelligencer and Review." As reporter to the Rhode Island supreme court, he prepared the first published reports of that state. In association with Samuel Ames, he wrote a "Constitutional Guide" (1834). His other works, most of which were several times revised and reissued, were "Treatise on the Right of Property in Tide Waters" (1826); "Inquiry Relative to an Incorporeal Hereditament" (1827); "A Practical Summary of the Law of Assignment" (1835); "On Adverse Enjoyment" (1837); "Treatise on the Common Law in Relation to Water-Courses" (1840); "Treatise on the Law concerning the Liabilities and Rights of Common Carriers"; "A Treatise on the Law of Fire and Life Insurance"; "Treatise on the Limitations of Actions at Law and Suits in Equity and Admiralty" (2d ed., 1846); and a "Treatise on the Law of Highways" (2d ed., 1858), both of which were edited by Thomas Dwight (2d ed., by Chase, 1868).

ANGERS, Real, Canadian author, b. in 1823; d. in April, 1860. He studied law and was admitted to the bar of Lower Canada. Together with Mr. Aubin he reported and published the proceedings of the lower house in 1856-60. In addition to being the authors of a number of political essays, he wrote and published, "Révélations du Crime," and a treatise on stereography.

ANGHIERA, Pietro Martire d' (called in English Peter Martyr), Italian historian, b. in Aroma, on Lake Maggore, in 1455; d. in the city of Granada, Spain, in 1526. After completing his...
education at Rome he served in the Milaneese army, then accompanied the Spanish ambassador to Spain, and in 1798 fought in the wars against America, afterward entered the church, and opened a school at Madrid. In 1801 he was sent by King Ferdinand as his ambassador to Egypt, and in 1805 he became prior of the church at Granada. His "Opus Epistolarium" recounts all the important events that occurred between 1488 and 1825. He wrote also a history of the New World, entitled "De Rebuis Occidentis et Orbe Novo," based upon original documents supplied by Christopher Columbus, and on the transactions of the council of the Indies, of which he was a member. His other works are an account of newly-discovered islands and their inhabitants, and a narrative of his visit to Egypt and of explorations in the wilds of Africa, written in his own language, the organ of the Roman Catholic Church.

ANGLIN, Timothy Warren, Canadian statesman, b. in Clonakilty co., Cork, Ireland, 31 Aug., 1822. Emigrated to St. John, New Brunswick, in 1849, where the same year he established the "Weekly Freeman." He established the "Morning Freeman," which went into publication in 1851; he was a member of the provincial legislature, the organ of the Roman Catholic Church in New Brunswick, in 1854, and was its editor and proprietor until 1877. On the government permitting a prohibitory liquor bill to pass, Mr. Anglin went into opposition, and he has since been a conservative. In 1860 he was elected to the New Brunswick Provincial Assembly by the county of Saint John, which he represented until 1866, being the first Roman Catholic to represent that constituency. He was a leader of the opponents of confederation. In 1867 he was elected to the Dominion house of commons for Gloucester co., and on 26 March, 1871, was elected speaker of the house. He edited the "Weekly Freeman" during the session of 1877, when he resigned, his seat having been declared vacant through a breach of the independence of parliament act. He was re-elected speaker 7 Feb., 1878, and held the place till parliament was dissolved.

ANGULO Y HEREDIA, Antonio, Cuban author, b. in Havana in 1824. He studied law and was a notary public in 1843. He became the editor of Madrid the "Revista Hispano-Americana." He has published "Estudios sobre los Estados Unidos," embodying the results of his travels through the United States; and "Schiller y Goethe," a series of lectures on German literature delivered in the Ateneo of Madrid with great success. Angulo lost his reason and died a few years ago.

ANGULO, Pedro de, missionary, b. in Burgos, Spain, about 1500; d. in 1562. After finishing his studies he set out for America in 1524, in company with some other young men of noble birth. He rapidly acquired wealth and military fame, but was so much affected by the sight of the enormities with which he was everywhere met with that he resolved to devote himself entirely to the service of the natives. With this object he entered a Dominican convent and took the habit of the order in Mexico in 1528. After studying for some years he was ordained a priest, and was then placed under the direction of Las Casas, whom he accompanied into Peru and other places where the protection of the Indians rendered their presence necessary. In 1541 he was sent to Guatemala to carry on the work among the Indians which had been begun ten years before. He was so successful that ten years afterward the number of Christians was so large, and the convents of the Dominicans so numerous, as to require the establishment of the country into a new province of the order. His next efforts were directed to the conversion of the people that lived north of Guatemala. These Indians were so fierce and warlike that the Spaniards, who had been repelled in every attempt to subdue them, called their country "the land of war." In company with two other missionaries, Father de Angulo went among them, and, although at first received with distrust, finally succeeded in converting the entire nation. He next devoted himself to the task of persuading the Indians to abandon their nomadic life, succeeded in forming them into village communities, and drew up a code of laws suited to their character and needs. The Indians offered to place their country under the protection of the crown of Castile and pay an annual tribute, provided no attempt was made on their liberty, and a treaty to this effect was ratified by the Spanish court, which also expressed a wish that the name of the country should be changed to Verapax, in memory of the event. A city of the same name was built a few years afterward, and Father de Angulo was chosen its first bishop; but before the bells arrived from Rome he died.

ANGUS, Joseph, English clergyman, b. in Bolton, Lancashire, 16 Jan., 1816. He was educated at Edinburgh university, is president of Regent's park college, London (Baptist), author of several hand-books, and editor of Butler's "Analogy" (1855). He was one of the revisers of the English New Testament for the American Bible union, and in 1872 was elected a delegate of the Evangelical alliance.

ANGUS, Samuel, naval officer, b. in Philadelphia in 1784; d. in Geneva, N. Y., 29 May, 1840. He entered the service in 1799 as midshipman, and became lieutenant in 1807, master-commandant in 1813, and captain in 1816. He was severely wounded in the "Enterprise," and his ship "La Vengeance," and the French frigate "La Vengeance," 1 Feb., 1800, and again in the encounter between the "Enterprise" and a French frigate. In the war of 1812 he was badly wounded in the attack on the English at Black Rock, and while commanding a flotilla in Delaware bay, he commanded the ship that carried Adams and Clay to Ghent to arrange peace with Great Britain. On returning he received in the service, his mind became impaired, and he was dismissed, 21 June, 1824.

ANNAND, William, Canadian statesman, b. in Halifax, Nova Scotia, in 1808; d. in London, 13 Oct., 1887. He was elected to the assembly, and allied himself with the old reform party that was led by Joseph Howe, which established responsible government in the province and introduced various other reforms. He was a member of the executive council and financial secretary of Nova Scotia from 1859 to 1863, and was called upon to form an administration for that province in November, 1867, a duty which he accomplished most successfully, and in which he was so ably assisted by the provincial treasurer and president of the council, the latter being held conjointly with the premiership until his resignation in May, 1875. On 11 May, 1875, he was appointed agent in London for the promotion of immigration, and for representing the interests of Nova Scotia and New Brunswick more effectually in the United Kingdom and on the continent of Europe. He was also a repeal delegate to Great Britain with Mr. Howe and others in 1866 and 1868. Mr. Annand was a contributor to the Nova Scotia press, edited the "Speeches and Public Letters of Joseph Howe" (Boston, 1858), and was the author of a pamphlet on confederation (London, 1859). He held the office of queen's printer for several years.
ANSCHÜTZ, Karl, musician, b. in Coblenz, Germany, in February, 1815; d. in New York city, 30 Dec., 1870. His father was an eminent musician, and was in charge of a school for vocal and instrumental instruction. His early musical studies were made under his father, and in 1837 he was sent to study under Frederick Schneider, of Dessau, whose daughter he married. He then returned to Coblenz, where he was made leader of the royal musical institution and of the orchestra at the theatre, with the title of royal musical director. In 1848 he led the orchestra at Nuremberg, and in 1849 was conductor of the German opera at Amsterdam. During the same year he went to London with a German opera troupe, and subsequently he became leader of the orchestra at Drury Lane theatre. He conducted grand feats at Slade hall, at one of which he gave Beethoven’s ninth symphony with an orchestra of 590 musicians and a chorus of 500 singers. He also conducted the Italian opera at Dublin, Edinburgh, Glasgow, and elsewhere in Great Britain. In 1857 he came to the United States with Ulman’s Italian opera troupe, with which he remained until the close of 1862. In 1862 the German opera in New York, and was active in the establishment of the New York conservatory of music. In 1869 he served as musical director of the New York section of the musical charities at the Baltimore singing festival. He was also a composer of some ability, and wrote out four of the minor symphonies of Beethoven, of which two were performed.

ANSELME, Jacques Bernard Modeste d’, French general, b. in Apt, 22 July, 1740; d. in September, 1814. As lieutenant-colonel of the Soissons regiment, he fought through the American revolution. As lieutenant-general he took New Orleans in 1801, and the cities of Montbazon and Villefranche in 1792, but was defeated at Sluys and imprisoned until the revolution of Thermidor.

ANSORGE, Charles, musician, b. in Spiller, Silesia, Germany, in 1817; d. in Chicago, 28 Oct., 1866. He was educated in Breslau, where he received high honors, and also obtained a thorough musical training. For some years after his graduation he devoted himself entirely to music, and was further occupied in editing a public newspaper. Imbued with the liberal ideas prevalent in Germany in 1848-49, he published articles offensive to the authorities, for which he was tried and sentenced to three years’ imprisonment. But he escaped to England, where he was joined by his brother, and settled in Boston. In 1852 he was elected organist and choirmaster of the first church in Dorchester, where he remained for thirteen years. He was also a teacher of music in the asylum for the blind in South Boston for four years. For some time he was a resident editor of the “Massachusetts Teacher,” and took an active part in the state teachers’ association. In 1862 he resigned, and moved to Chicago, where in 1868 he became organist of Trinity church, Utica, where he remained till 1869, when he took charge of St. Stephen’s church, New York. This pastorate he resigned in 1867 and became rector of St. Mark’s in the Bowery, continuing there till his death. All Souls’ church, originally a chapel of St. Mark’s, was completed after his resignation, and was made a memorial by his late congregation. A memorial tablet has been erected near the chancel by the vestry of St. Mark’s. Dr. Anson published “Historical Notices of St. Mark’s Church from 1655 to 1845” (New York, 1845).—Another brother, Charles, educator, b. in New York city, 19 Nov., 1827; d. there, 29 July, 1867, was gradu
ANTHONY, Andrew Varick Stout, artist, b. in New York city in 1835. He studied drawing and engraving under the best teachers in New York, and was one of the original members of the American water-color society. His most conspicuous works are the illustrations of Whitier's "Snow Bound" (1867), "Ballads of New England" (1870), and "Mabel Martin" (1876); Longfellow's "Skeletron in Armor" (1877), and Hawthorne's "Scarlet Letter" (1878). He has passed part of his professional life in New York and California, but settled in Boston in 1889. His memorial and historical addresses were models of composition. A volume of these addresses, printed privately in 1875, contains a tribute to Stephen A. Douglas, delivered 9 July, 1861; one to John R. Thompson, 4 Dec., 1862; one to William P. Fessenden, 14 Dec., 1869; and three different addresses on Charles Sumner—the first on the announcement of his death in the senate; the second when Mr. Anthony, as one of the committee appointed by the senate, gave up the body of Mr. Sumner to the governor of Massachusetts; and the third when Mr. Boutwell presented in the senate resolutions of respect for Mr. Sumner's memory. Mr. Anthony also spoke in the senate on the death of William A. Buckingham, and on 21 Jan., 1876, delivered a short address on the death of...
Henry Wilson, vice-president of the United States, When the statues of Gen. Greene and Roger Williams were presented to congress by the state of Rhode Island, Mr. Anthony made the addresses, and he also made a short address at the presentation of the statues of Trumbull and Sherman. One of his best efforts was when he introduced the bill providing for repairing and protecting the monument erected in Newport, R. I., to the memory of the chevalier de Ternay, commander of the French naval forces stationed here in 1799 to aid the American revolution. Mr. Anthony had a warm and affectionate nature, genial manner, a commanding figure, and was a perfect specimen of a man. In his last days, with manly courage, he calmly waited for the end. As soon as his death was known, Gov. Bourn and Mayor Doyle issued papers calling the people to attend the funeral, which took place from the first Congregational church in Providence on Saturday, 6 Sept. It was the largest funeral ever known in Rhode Island. Mr. Anthony bequeathed a portion of his library, known as the "Harris Collection of American Poetry," to Brown university. In 1848 and later he wrote a few papers on natural history, mostly in books, and many of them exceedingly rare. It was begun half a century ago by the late Albert G. Greene, continued by Caleb Fiske Harris, and, after his death, completed by his kinsman, the late senator. The Rev. Dr. J. C. Stockbridge, a member of the board of trustees of the university, is preparing a annotated catalogue of the collection.

ANTHONY, John Gould, naturalist, b. in Providence, R. I., 17 May, 1804; d. in Cambridge, Mass., 16 Oct., 1877. His school education was slight, and was entirely discontinued when he became twelve years of age. Business pursuits then occupied his attention, and, settling in Cincinnati, he continued there for thirty-five years, actively engaged in commerce, and upon the people to attend the funeral, which took place from the first Congregational church in Providence on Saturday, 6 Sept. It was the largest funeral ever known in Rhode Island. Mr. Anthony bequeathed a portion of his library, known as the "Harris Collection of American Poetry," to Brown university. In 1848 and later he wrote a few papers on natural history, mostly in books, and many of them exceedingly rare. It was begun half a century ago by the late Albert G. Greene, continued by Caleb Fiske Harris, and, after his death, completed by his kinsman, the late senator. The Rev. Dr. J. C. Stockbridge, a member of the board of trustees of the university, is preparing a annotated catalogue of the collection.

ANTHONY, William Arnold, physician, b. in Coventry, R. I., 17 Nov., 1833. He was educated at the Yale (now Sheffield) scientific school, and received his degree in 1860. From 1857 to 1860 he was principal of a graded school in Crompton, R. I. During 1860-61 he taught the sciences in the Prov-
dence Conference Seminary, East Greenwich, R. I., after which, from 1861 to 1863, he followed his profession in various capacities and in different localities. Again, from 1863 to 1867, he taught the science of electricity, and in 1867 he became a professor of physics and chemistry in Antioch College, where he remained until 1870, when he was called to occupy a similar chair in Iowa Agricultural College. During 1872 he accepted the professorship of physics in the then recently established Cornell University, which he still occupies.

Although much of his work has been principally that of teaching, he has found time to gratify his fondness for mechanices. He designed and constructed, during the years 1857-61, two turbines, one of which gave an efficiency of 81 per cent., whose floats were carefully formed to curves deduced from a mathematical investigation of the flow of fluids. In 1857 he constructed an "Elementary Text-book on Physics" (New York, 1855).

ANTONELLI, Juan, engineer, b. in Gaeta, Italy, about the middle of the 16th century; d. in Spain in 1616. He went to Cuba in 1584, where he made the plan and superintended the construction of the Morro Castle and Punta Fortress in Havana, in 1589, before they were finished, he went to Vera Cruz, Mexico, and planned the famous fortress of San Juan de Ulua. He returned to Cuba, and afterward went to Spain, where he died.

ANTONIO DE SEDILLA, better known as "Père Antoine," clergyman, b. in Spain about 1570; d. in New Orleans in 1829. He was sent to Louisiana by the Society of Jesus. In 1796 he published a poem, the power to put it in force in that colony, and arrived there, with five other Capuchin friars, in 1779. The governor, Miro, fearing a revolution if the Spanish laws against heretics were applied, forcibly seized Fra Antonio and the other monks and sent them back to Spain. Four years later Père Antoine, as he came to be called, returned to New Orleans in the capacity of priest of St. Louis cathedral, the only church in the city, and his goodness and charity made him the idol of the French population during his long pastorate. He gave all that he had to the poor and lived a life of the greatest abstinence, sleeping on hard boards in a rude hut that he constructed under a date-palm tree that stood in his garden. When the United States purchased Louisiana, Claiborne wrote to Jefferson that no opposition to the new dominion need be feared if Père Antoine could be won over. The president solicited his interest; but the old priest took no part in the crisis, refusing to meddle with politics. The palm-tree was cut down, and in 1814 it was reported in the "Visit of the good father, a famous landmark in New Orleans. It was said to have been planted by a Turk in 1727; but Sir Charles Lyell, in his "Second Visit to New Orleans," asserts that Père Antoine planted it himself. The tree was made the subject of Aldrich's story of "Père Antoine's Date Palm," and of romances by Dimitry and Lafadro Hearn. Many traditions associated with the tree are given in Gayarre's "History of Louisiana." It bloomed for the last time in 1853, but retained some life and verdure until in July 1855 it was cut down.

ANZOÁTEGUI, José Antonio (an-thoa-at-ge) Venezuela, soldier, b. in Barcelona, Venezuela, in 1798; d. 15 Nov., 1819. When the revolutionary war began he was twenty-one years old, and at once entered the ranks of the revolutionary army. Promotion followed rapidly, and he soon became one of the chief commanders, and as such took part in the victories won against the royal troops in San Felix and Boyacá.

APES, William, author, b. about 1800. He was an Indian preacher of the Pequot tribe, and published "A Son of the Forest" (Boston, 1831); "Experiences of the Christian Indians of the Pequot Tribe" (1833); "A Indian Nullification" (1835); and a "Eulogy on King Philip" (1836).

APODACA, Juan Ruiz (ah-po-dah'-ka), Span.-ish naval officer, b. about 1750; d. in 1835. He entered the service in 1770, and distinguished himself in several encounters with the English. In 1807 he was given the command of a fleet, and the next year his ship was captured by the British. About 1810 he was appointed captain-general of Cuba and Florida, and in 1816 he was transferred to Mexico as viceroy of New Spain. While in Mexico he suppressed several strong bands of insurgents, and for this and other services he was rewarded by his government with the title of Count of Venadito. He was of Spanish birth, 1822, and was subsequently promoted to the rank of captain-general of the navy.

APPEL, Theodore, clergyman, b. in Easton, Pa., 30 April, 1823. He was graduated at Marshall college, Mercersburg, Pa., in 1842, was ordained in the Reformed church, and held pastoral charges in Waynesboro, Pa., and Cuyertown, Md. He became in 1851 professor of mathematics, physics, and astronomy in Marshall college, at the same time acting as pastor of the Reformed church in Mercersburg and editing the "Mercersburg Review," and from 1853 to 1877 he filled the same chair in Franklin and Marshall college, Lancaster, Pa. From 1877 to 1887 he was president of the board of commisions for the eastern part of the Reformed church, and travelled on business connected with that office through Pennsylvania, Maryland, Virginia, and North Carolina. From 1881 to 1886 he edited the "Reformed Missionary Herald." He has published "Recollections of College Life" (Reading, Pa., 1886).

APPLE, Thomas Gilmore, educator, b. in Easton, Pa., 14 Nov., 1829; d. in Lancaster, Pa., 17 Sept., 1898. He was graduated at Marshall college, and was a pastor of the German Reformed church from 1853 to 1855. In the latter year he was chosen president of Mercersburg college, which he left in 1871, and became a professor in the Lancaster theological seminary. In 1878 he was elected president of Franklin and Marshall college. He edited for several years the "Mercersburg Review" and the "Reformed Quarterly Review.

APPLETON, Daniel, founder of the publishing house of D. Appleton & Co., New York, b. in Waterhill, Maine, 1837; d. in Philadelphia, 27 March, 1849. He began business as a dry-goods merchant in his native place, but subsequently went to Boston, and in 1825 removed to New York, where he began the importation of English books in conjunction with his dry-goods business. The book department was placed in charge of William
Henry Appleton, his eldest son (b. 27 Jan., 1814; d. in Riverdale, N. Y., 19 Oct., 1899). He soon abandoned the sale of dry-goods, and removed to Clinton Hall, Beekman street, and there gave his attention solely to publishing books. In 1827, W. H. Appleton was sent to represent the house in London, and in the following year the father visited Europe and founded a permanent agency at 16 Little Britain. His first publishing venture was a collection of religious extracts entitled "Daily Crumbs from the Master's Table," a 32mo volume of which 2,400 copies were sold. This was followed by another book of the same size and character, and in 1832, the cholera year, by "A Refuge in Time of Plague and Pestilence." In January, 1838, W. H. Appleton was taken into partnership, and the firm was removed to 200 Broadway. In 1848 the father retired, and W. H. Appleton then formed a copartnership with his brother, John Adams Appleton (b. in Boston, Mass., 9 Jan., 1817; d. at his residence on Staten Island, 13 July, 1881). Three other sons became partners. Daniel Sidney, the fourth son, b. in Boston, 9 April, 1824, d. in New York, 12 Nov., 1890; George Swett, b. in Andover, Mass., 11 Aug., 1821, d. at Riverdale, N. Y., 7 July, 1878; Samuel Francis, the youngest son, b. in Boston, 26 April, 1826, d. in New York, 25 Oct., 1883. The business was removed from 200 Broadway to the old Society library building, corner of Leonard street and Broadway, and subsequently the growth of the city necessitated many removals farther up-town. In 1881 the retail, jobbing, and importing departments were abandoned, in order that sole attention might be given to the publication of the handbook, and the business was removed subsequently to its present location, 72 Fifth Avenue. In 1853 a printing-office and bindery were established in Franklin street, New York; but the publishing business increased to such an extent that in 1868 the manufacturing department was removed to Brooklyn, where buildings were erected that covered nearly a whole square. The publications of the house extend over the entire field of literature. Its "American Cyclopaedia" is the largest and most widely circulated work of its kind ever produced in this country. The first edition was issued in 1857-1863; and a revised edition, which was practically a re-writing of the entire work, with the insertion of thousands of illustrations and other improvements, in 1875-1876, additions and corrections being added from time to time. The "Annual Cyclopaedia," published in similar style and forming an appropriate continuation of the greater work, is now in its thirty-sixth year. Its illustrated books include "Picturesque America," "Picturesque Europe," and "Picturesque Palestine," besides valuable art collections. Its text-books embrace every subject taught in American schools; medical books form a special department, and books in Spanish for the South and Central American markets form another. Nearly all the noted scientists of Europe and the United States are represented in the list, which also in general literature includes the names of Bancroft, Bryant, Cooper, Dickens, Disraeli, Scott, and other standard authors. The literature of the civil war is represented on both sides, by Generals Sherman, Sheridan, and J. E. Johnston, Admirals Farragut and Porter, Jefferson Davis, William H. Seward, and biographies of Lee, Chase, "Stonewall" Jackson, A. S. Johnston, and other distinguished participants. The business is conducted by the company incorporated in 1897, of which W. H. Appleton, president; Daniel Appleton, 1st vice-president; Edward D. Appleton, 3d vice-president; D. Sidney Appleton, secretary and treasurer. The above, with Charles A. and Robert Appleton, constitute the board of directors of the company.

APPLETON, James, temperance reformer, b. in Ipswich, Mass., 14 Jan., 1819; d. there, 29 Aug., 1862. When a young man he was elected to the legislature of his native state, and during the war with Great Britain he served as a colonel of Massachusetts militia, and after the close of the war was made a brigadier-general. During his subsequent residence at Portland, Me., he was elected to the legislature in 1856-1857, but he returned finally to his native town, where he died. He wrote a large number of publications he exercised great influence upon public sentiment in favor of total abstinence. In his report to the Maine legislature in 1857 he was the first to expound the principle embodied in the Maine law. See his "Life," by Sydney Howard Gay.

APPLETON, Jesse, educator, b. in New Ipswich, N. H., 17 Jan., 1807; d. in Brunswick, Me., 12 Nov., 1819. After graduation at Dartmouth college he spent two years in teaching at Dover and Amherst, then studied theology, and was ordained pastor at Hampton, N. H., in February, 1827, notwithstanding his Armenian tendencies, which were considered heretical at that time. At his suggestion the "Pictureque Evangelical Magazine" was published, and while at Hampton he served as trustee of Phillips Exeter academy, and was a member of the academy of arts and sciences. His daughter married President Franklin Pierce. He was in great demand as a preacher on occasions of importance. A volume of his addresses, with a biographical sketch by the Rev. Dr. Nichols, of Portland, Me., was published in 1835. Last, his lectures and occasional sermons were published, with a memoir by the Rev. B. Tappen. These and other writings were collected in a two-volume edition, entitled "The Works of Jesse Appleton, D. D." (Andover, 1836).

APPLETON, John, lawyer, b. in Beverly, Mass., 11 Feb., 1815; d. in Portland, Me., 22 Aug., 1864. He was graduated at Bowdoin college in 1834, in 1837 began the practice of law in Portland, and soon afterward became editor of the "Eastern Argus." At this time he was registrar of probate for Cumberland co. In 1845 he was appointed chief clerk of the navy department, subsequently chief clerk of the state department of public instruction, and other standard works were published, with a memoir by the Rev. B. Tappen. These and other writings were collected in a two-volume edition, entitled "The Works of Jesse Appleton, D. D." (Andover, 1836).

APPLETON, John Howard, chemist, b. in Portland, Me., 6 Feb., 1844; d. at Brunswick, Me., 22 Aug., 1864. He was graduated at Brown University in 1863, the following year became instructor in chemistry there, and in 1868 was elected professor of chemistry and applied arts. Since 1872 he has filled the chair of chemistry only.
Prof. Appleton has written a series of chemical text-books that have an extensive sale. They are "The Young Chemist" (Philadelphia, 1878); "Qualitative Analysis" (1878); "Quantitative Analysis" (1881); and "Chemistry of Non-Metals" (Providence, 1884).

APPLETON, John James, diplomatist, b. in France about 1789; d. in Rennes, France, 4 March, 1864. His father was John Appleton, some time U. S. consul at Calais. John James studied at Phillips Andover academy, and was graduated at Harvard in 1811. During President Monroe’s administration he was appointed secretary of legation in Brazil, and afterward charged d’affaires for the United States at Madrid and at Stockholm. At the latter post he negotiated the commercial treaty that still serves as the basis of intercourse between the United States and Sweden. He also served as minister in France, 1823. He was at this time literarily a merchant prince, and, with true nobility of character, devoted a large part of his income to charitable purposes. He made it a rule to spend annually his whole income, and to this end often placed large sums for distribution in the hands of those who were likely to meet cases of destitution. At no time did he have a pernicious interest among charities. See memoir, by J. A. Jewett (Boston, 1850).—His brother, Nathan, merchant, b. in New Ipswich, N. H., 20 June, 1766; d. in Boston, 12 July, 1856. His youth was spent on a farm and in teaching. For a time he kept a store in Ipswich, but he removed to Boston in 1794 and went into the importing business in partnership with his brother Nathan. He also established cotton mills at Waltham and Lowell. After 1799 he passed much of his time abroad, until he retired from business in 1823. He was at this time literarily a merchant prince, and, with true nobility of character, devoted a large part of his income to charitable purposes. He made it a rule to spend annually his whole income, and to this end often placed large sums for distribution in the hands of those who were likely to meet cases of destitution. At no time did he have a pernicious interest among charities. See memoir, by J. A. Jewett (Boston, 1850).—His brother, Nathan, merchant, b. in New Ipswich, N. H., 6 Oct., 1767; d. in Boston, 14 July, 1861. He entered Dartmouth college in 1784, but soon left to engage in business with Samuel in Boston. When he became of age he was admitted into partnership, and the firm was known as S. & N. Appleton. In 1813 he was associated with Francis C. Lowell, Patrick T. Jackson, Paul Moody, and others, in establishing the Waltham cotton manufactory, in which the first power loom ever used in the United States was set up. This proving successful, he and others purchased the water-power at Pawtucket Falls, and he was one of the founders of the Merrimac Manufacturing Company. The settlement that grew around these factories developed into the city of Lowell, of which in 1821 Mr. Appleton was one of the three founders. He was also the projector and chief proprietor of the Hamilton Company. He served in the state legislature in 1815, served during several terms, and was elected to congress in 1830 and again in 1842. He was the author of several speeches and essays on currency, banking, and the tariff, of which his "Remarks on Currency and Banking" (enlarged ed., 1858) is the most celebrated. An account of the introduction of the power loom and of the origin of Lowell was published by him. He was a member of the Academy of Science and Arts, and of the Massachusetts Historical Society. He accumulated great wealth, and was noted for his benevolence. A "Memoir of His Life" has been written by Robert C. Winthrop of Boston.

APPLETON, Thomas Gold, author, b. in Boston, Mass., 31 March, 1812; d. in New York, 17 April, 1884. His early training was received at the Boston Latin school, where he was prepared to enter Harvard in the class of 1831. Among his classmates were J. L. Motley, Wendell Phillips, and other distinguished men. Mr. Appleton spent much of his time abroad. He was a liberal patron of the fine arts, and gave efficient aid to various institutions, including the public library, the institute of technology, and the museums at Boston and Cambridge. He was an amateur painter of superior merit, and his water-color sketches of scenes on the river Nile were exceptionally good. He was the author of several books in prose and verse. In poetry his "Faded Leaves" was well received by the reading public. In prose he published his "Nile Journal" (Boston, 1876), "Syrian Sunshine" (1877), "Windfalls," and other works. He was the founder of the Boston literary club, was highly esteemed for his genial temper and courteous manners, and was looked upon by those who knew him as unrivalled for wit and humor. A volume of his "Life and Letters," prepared by Susan Hale, was published in New York in 1885.

APPLETON, William, merchant, b. in Brookfield, Mass., 16 Nov., 1780; d. in Longwood, near Boston, 20 Feb., 1862. He was a son of the Rev. Joseph Appleton, of Brookfield, received an academic education, and at the age of fifteen became a clerk in a country store at Temple. In 1807 he went to Boston, where for over fifty years he was a successful merchant, giving also much attention to banking and financial operations. He was president of the U. S. branch bank from 1822 to 1836, and was also president of the provident institution for savings and the Massachusetts general hospital. He gave $30,000 to the last-named institution, and was noted for his benevolence. He was elected as a whip to congress, serving from 1851 to 1856, and again was a member in the special session from 4 July to 6 Aug., 1861, after which he resigned.

APPLING, Daniel, soldier, b. in Columbia co., Ga., 25 Aug., 1787; d. at Fort Montgomery, Ala., 18 March, 1817. He entered the army as lieutenant in 1808. On 19 May, 1814, being then major, he rendezvous a detachment of 120 rangers on board a flotilla bearing cannon and naval stores from Oswego, N. Y., to the unfinished ship "Superior" at Sackett’s Harbor, then blockaded by the British. Finding it impossible to run the blockade, Woolsey, the commander of the flotilla, landed the stores by night at Sandy creek. Here
the party were attacked by the British, who expected an easy victory, but were completely surprised by Appling and his men, concealed in the bushes on the banks. The British squadron, with 170 officers and men, fell into the hands of the Americans, and the naval stores were delivered safely at Sackett's Harbor. For his conduct in this engagement Appling was brevetted lieutenant-colonel. He distinguished himself afterward at Plattsburg, and was brevetted colonel in 1814.

On 1 June, 1816, he resigned from the army.

ARACENA, Domingo, scholar, b. in Santiago, Chili, in 1819; d. there in 1874. He was educated at the Jesuit schools in Santiago, and entered the novitiate of the order at the age of fifteen. He afterward learned Hebrew, Greek, and the principal modern languages, and attracted so much attention in his public discussions that he was known as the Pío de la Miranda of Chili. During the twenty years that he was professor in his convent he returned to Havana. Here he was one of the chief advocates for the establishment of the Sociedad Patriótica de Amigos del País, which has conferred many benefits upon Cuba. To his exertions were due the opening of the ports of the island to foreign commerce, and also the abolition of the tobacco monopoly. These measures were the origin of the commercial progress and prosperity of the island, which was due largely to the efforts of Arango, who introduced new methods of cultivating the land, and also the Otháití sugar cane, which supplanted the creole cane and has been a source of immense wealth. Arango wrote numerous pamphlets and memoirs, some of which have been translated into French and English. Humboldt called him "one of the first of the Spanish statesmen."

ARANGO, Rafael de, soldado, b. in Havana in 1788; d. there in 1850. He took part in the uprising in Madrid on 2 May, 1808, against the French invasion, under Napoleon I. This was the beginning of the peninsular war for independence, so fatal to the French armies. Arango retired from active military service in 1821 as a colonel of cavalry, went to Cuba, where he wrote on his personal services. His library is one of the richest in Mexico. A volume of poems and the excellent "Ensayo histórico sobre Fray Luis de León" are among his best works. The last named won him membership in both the Royal Spanish academy and the academy of history of Spain.

ARAZU, Juan de Dios (ar-an-thah'-thoo), Colombian statesman, b. in Antioquia near the close of the 18th century; d. in 1845. He began his political career when very young, and filled high offices since 1823 until 1841, then taking charge of the executive. He distinguished himself for his ability, great learning, and spirit of justice in his public dealings.

ARAÚJO Y RÍO, José, Spanish governor of Guatemalas, 3rd Kings Philip V. and Ferdinand VI., from 1742 until 1751. He succeeded Gen. Rivera y Villalón, and was replaced by Gen. Vázquez Priccio.

ARBOLEDA, Julio (ar-bo-lay'-dah), Colombian poet, d. in 1872. He received his education in Europe, and wrote in French, English, and Italian, as well as in his own language. His poems, entitled "Poesías," "Poesía," "Me encuesto," "Te quiero," and the long one called "Gonzalo de Ovón," deserve especial notice. He was assasinated, it is supposed, by political enemies. A collection of his poetry was republished in New York in 1884.

ARBUCKLE, Matthew, soldier, b. in Greenbrier county, in 1776; d. at Fort Smith, Ark., 11 June, 1851. He entered the army as an ensign in 1799, became a captain in 1806, major in 1812, lieutenant-colonel in 1814, colonel of the 7th infantry in 1829, and brevet brigadier-general in 1830. In 1817 he was successful in an expedition against the Fowltown Indians, and in 1846-47 served in the Mexican war. He commanded Fort Gibson, and Fort Smith. During much of his life he was brought constantly in contact with the Indians of the frontier, and, by his knowledge of their character, always kept their confidence.

ARBUTHNOT, Marriot, British admiral, b. in 1711; d. in London, 31 Jan., 1794. He was a nephew of Dr. John Arbuthnot, the poet. He became post captain in 1747, and in 1755 was made naval commissioner at Halifax, where he resided until 1778. He returned to England a rear admiral, and in 1779 was made vice admiral, and commander-in-chief on the American station. Soon after arriving at his destination he was blockaded in New York harbor by the French fleet under D'Eistaing. In December, 1781, Arbuthnot went to New York, saw Henry Clinton to Charleston, and cooperated with him in laying siege to that city. The fleet appeared off the harbor on 9 March, 1780, and entered it on 9 April. After a short siege the city surrendered on 12 May, and was given up to pillage. For this success Arbuthnot received the thanks of parliamnet. On 16 March, 1782, Arbuthnot obtained some advantage over the French fleet in an engagement off the capes of Virginia. In 1783 he was made admiral of the blue. At the time of his service in America, Arbuthnot was old and inefficient, and Sir Henry Clinton complained bitterly to the home government of his incapacity.

ARCE, Francisco, pioneer, b. in Lower California in 1763; d. in 1819. From the age of eleven he lived in Alta California. At the time of the American conquest in 1846 he was a military officer, and was secretary to Gen. José Castro, commander of the Californian forces. His name is known from his connection with a party of men who, in June, 1846, were bringing horses, generally supposed to belong to the 18th century, from San Diego to the south. Capt. John C. Fremont, then in command of an American surveying party in the territory, invited American settlers to assail the
ARCHIBALD, Manuel, Mexican priest, b. in Aguascalientes, 5 April, 1725; d. in Bologna, Italy, 28 June, 1785. He was a Jesuit, was distinguished for his learning, and was in succession rector of the colleges belonging to his order in Puebla, Zacatecas, and Guadalajara, and then took charge of the Jesuit missions among the Chichimecan Indians. When Charles III. of Spain expelled the Jesuits from his dominions, 25 June, 1767, Father Are went to Bologna, Italy, and, with funds furnished mostly by other Jesuits belonging to rich Mexican families, he founded a benevolent institution for the old and needy, called the Hospital for Septuagenarians, where, in whatever concern the care of the inmates, even to cleaning their rooms and cooking their food, until his death.

ARCHIBOLD, George, chemist, b. in Ford Flodden Field, Scotland, 4 May, 1848. He studied chemistry in Berwick-on-Tweed, Edinburgh, London, and Oxford, and wrote papers on chemical subjects. He came to the United States in 1881, and has since devoted his attention principally to the manufacture of starch, in which he has made important investigations. Dr. Archbold is a member of numerous scientific societies.

ARCHDALE, John, English governor of North Carolina, was a member of the family of Archdale of Leaks, in Chipping Wycum, Bucks co., England, and came to New England in 1664 as agent of his brother-in-law, Gov. Gorges of Maine. He visited North Carolina in March, 1686, and was commissioner for Gorges in Maine in 1687-88. He became governor of North Carolina in 1695, and held the office for about two years. He was sagacious, prudent, and moderate, and under his administration the province made great progress in internal improvements. He introduced rice culture into Carolina by distributing among some friends a bag of seed rice brought by the captain of a vessel from Madagascar. Archdale was formerly a member of the society of Friends, and was favored with a monthly letter, which the society continued to send him from London. By his moderation he quieted the troubles between the colonists and their feudal sovereigns, and, by establishing a special board for deciding contests between white men and Indians, he won the friendship of the latter. His conscientious scruples concerning the required oaths prevented his taking a seat in parliament, to which he was elected in 1698. Archdale published "A New Description of the Fertile and Pleasant Province of Carolina, with a Brief Account of its Discovery, Settling, and Government up to this Time, with several Remarkable Passages during My Time" (London, 1707). See Hewett's "Historical Account of the Rise and Progress of the Colonies of South Carolina and Georgia" (London, 1779); Holmes's "Annals of America" (Cambridge, 1829); and Bancroft's "History of the United States" (New York, 1884).

ARCHER, Branch T., Texas revolutionary, b. in Virginia in 1790; d. in Brazoria co., Texas, 29 Sept., 1856. He studied medicine in Philadelphia, and was for many years a physician in the American Settlement, being a member of the legislature several times. In 1831 he removed to Texas, and became a prominent actor in the movements preliminary to the revolution. On 5 Nov., 1835, he presided over the famous "consultation" held by the American settlers, and with Col. Stephen Austin and N. H. Wharton formed a board of three commissioners to solicit aid from the United States in the struggle for Texan independence. He was a member of the first Texan congress in 1836, became speaker of the house of representatives, and was secretary of war of Texas from 1839 to 1842, when by reason of declining health he was compelled to retire to private life.

ARCHER, John, physician, b. in Harford co., Md., 6 June, 1741; d. there in 1810. He was graduated at Princeton in 1760, and studied theology, but relinquished the study of a clergyman and, after studying medicine, received in 1768, from the Philadelphia medical college, the first medical diploma issued on this continent. He raised and commanded a military company at the beginning of the revolution, was for several years a member of the legislature, and was chosen presidential elector in 1801. From 1801 to 1807 he was a member of congress from Maryland. He made several discoveries in medicine, which have been adopted by the profession.—His son, Stevenson, jurist, b. in Harford co., Md.; d. 5 June, 1848, was graduated at Princeton in 1803, and studied law. He became a judge of the court of appeals, and was appointed chief justice of the state in 1831, and held that position until his death. He served in congress from 4 Nov., 1811, to 3 March, 1817, and from 6 Dec., 1819, to 3 March, 1821. During his last term he was a member of the committee on foreign affairs. In the interval from 1817 to 1819 he was U. S. judge for the territory of Mississippi. In politics he was a Whig, and was known as the "Old Farmer" of Virginia. He was appointed to the army from Virginia, 12 March, 1812, as captain in the 2d artillery, and on 27 May, 1813, was brevetted major for gallantry and good conduct in the cannonade and bombardment of Port George, on 26 and 27 May, 1813. He was distinguished at Stony Creek, 6 June, 1813, and, on 10 Nov., 1821, became inspector-general, with the rank of colonel.

ARCHER, William Segar, b. in Amelia county, Va., 5 March, 1792; d. there, 29 March, 1855. His family was of Welsh origin, and his father, John Archare, was in the revolution. The former, Maj. John Archer, was aide to Gen. Wayne, and acquitted himself with gallantry at the capture of Stony Point; the latter, Col. William Archer, died on a British prison-ship. William S. was graduated at William and Mary in 1806, and studied law. He served in the legislature, with the exception of one year, from 1812 to 1819. From 1820 till 1835 he was a representative in congress, where, as chairman of the committee on foreign relations, and member of the committee on the Missouri compromise, he exerted great influence. From 1841 till 1847 he was a member of the U. S. senate, and in this body was at the head of the committee on foreign relations.

ARCHIBALD, Sir Adams George, Canadian jurist, b. in Truro, N. S., 3 May, 1814; d. in Halifax, 14 Dec., 1892. He was the grandson of the late James Archibald, judge of the court of common pleas, N. S. He was educated at Pictou academy, and was called to the bar of Prince Edward island in 1838, until 14 Feb., 1857; secondly, as attorney-general, from 10 Feb., 1899, until 11 June, 1903. He was a delegate to England in 1877 to arrange terms of settlement with the British government, and the general mutiny association in respect to Nova Sco-
tian mines, and also to ascertain the views of the government relative to the projected union of the British-American provinces. He was a delegate to Quebec, on the subject of the Intercolonial railway, in 1859; and the Charlottetown union convention, 1864; and to the final conference, 1865-'67, in London to complete the terms of union. He was sworn of the privy council 1 July, 1867, and was secretary of state for the provinces from 1 July, 1867, until his resignation in 1868; was lieutenant-governor of Manitoba and the northwest territories from 1867 until the date of the union of the provinces when he resigned and was a judge in equity of Nova Scotia from 24 June, 1873, until 4 July of the same year, when he was appointed lieutenant-governor of Nova Scotia. He was one of the directors of the Canadian Pacific railway, under Sir Hugh Allan, in 1873, and in 1885 was knighted. He represented Colchester in the Nova Scotia assembly from 1854 to 1859, and when that county was divided was elected for South Colchester, of which he was the representative until the union of the provinces in 1867; and sat for Colchester in the house of commons until appointed lieutenant-governor of Manitoba.

ARCHIBALD, Thomas Dickson, Canadian senator, b. in Onslow, Nova Scotia, in 1813; d. in 1867. He was a merchant in partnership with his brother in a general business in connection with the Sydney mines. He was consular agent of the United States at Sydney until he was called to the senate, was a member of the executive council of Nova Scotia from 1860 to 1863, and sat in the legislative council of Nova Scotia and in the council of the province in 1867, when he was called to the senate.

ARENAS, José (ah-reh-nah'-les), Argentine geographer, b. in Buenos Ayres about 1790. He entered the army when quite young, was promoted to the rank of lieutenant-colonel of artillery about 1815, and in 1819 took charge of the topographical department of Buenos Ayres, and then travelled through almost every portion of South America. His highly interesting report of some of these travels was published under the title of “Noticias históricas y descriptivas sobre el gran país del Chaco y Río Bermejo, con observaciones relativas a un plan de navegación y de colonización.”

ARENS, Albert, metalurgist, b. in Clausthal, Germany, 14 March, 1840. He was educated at the mining schools in Clausthal and Berlin, studying also at the university of Berlin. After coming to the United States he was variously occupied as mining superintendent and also in charge of metal mining and smelting works in Arizona, California, Colorado, Nevada, and Utah. He has contributed valuable technical papers to the “Transactions of the American Institute of Mining Engineers,” having been elected a member of that society in 1882. Among his inventions are the siphon tap, now everywhere used on lead furnaces, the Enreka lead furnace, extensively employed throughout Colorado and Utah, and the well-known roasting furnaces that bears his name.

ARGALL, Sir Samuel, English deputy governor of Virginia, b. in Bristol, England, in 1572; d. in 1629. He was one of the early adventurers to Virginia, his first public exploit being the abduction of Pocahontas. By the present of a copper kettle, Argall induced the Indian in charge of the girl to entice her on board his vessel, hoping to receive a large ransom from her father; but this Powhatan refused to give. While Sir Thomas Dale was governor of Virginia, in 1613, Argall with his sanction commanded an expedition that destroyed the French settlement of Port Royal in Nova Scotia, and that of St. Saviour on Mount Desert island. As deputy governor of Virginia from 1617 to 1619 he distinguished himself by many acts of tyranny and rapacity, so that he was recalled to England in 1619. He had amassed a fortune by trading in violation of law, but was shielded from punishment by his partner, the Earl of Warwick. He was hated by the colonists for his enactment of severe sumptuary laws, and for his arbitrary conduct in general. Argall took part in the expedition against the Algerines in 1620, was knighted in 1623, and in 1625 joined an expedition against the Spanish. Purchas gives an account of his voyage from Jamestown in 1610, and has also preserved his letter, written in 1618, about his voyage to Virginia. After the death of Lord Delaware, Capt. Argall took charge of his estate, and was accused by Lady Delaware, in letters still in existence, of the grossest peculation. See Beverley’s “History of the Present State of Virginia” (London, 1725); Argall’s “An Account of America” (London, 1689); Marshall’s “Life of Washington”; Bancroft’s “History of the United States” (New York, 1884); and “Virginia Vestuta” (Albany, 1885).

ARGENSON D’, Pierre de Voyer, viscount, French governor of Canada, b. in 1626; d. in France about 1670. He came of a noble family of Touraine, and distinguished himself in several military engagements. He became governor of Canada on 27 Jan., 1657, and held the office until 1661. Under his administration Canada was not only occupied in repelling Indian incursions, but was torn by internal quarrels. He made some progress, however, in discovery in the region on Hudson bay and beyond Lake Superior.

ARGUELLO, Luis Antonio, governor of California, b. in San Francisco, Cal., in 1784; d. there in 1830. He was a member of a large and influential family, was governor of California from November, 1823, till November, 1825, and had been military officer under the Spanish government. He was the first governor under the Mexican rule, and the only one under the Mexicancaption. He was also the first native of California called to serve in this capacity. While in office he was led into numerous dealings with the Russians, who had founded a colony in the northern part of the territory, and
his policy toward them was highly liberal, even dangerously so. Before he became governor he had acquired some note by an exploring expedition into the mountainous heart of California. His sister, Concepcion (b. in San Francisco, Cal., in 1726; d. in Beneica in 1857), was noted for her romance with Rezénf, the first Russian explorer that showed definite designs upon any part of California. In 1806 Rezénf, in the interests of the Russian colony at Sitka, had resolved to open trade with the Californians and to establish a possible Russian colony in the territory. To further his ends, he became betrothed to the young Concepcion, hoping for personal aid from the influential Argüello family. He returned to Russia to get further government approval for his projects, and suddenly died while absent. Concepcion never married, and died, a heroine of her position, gave her story prominence, and it has been used by Bret Harte in one of his best-known poems.

ARISTA, Francisco Gabino, Argentine traveller, b. in Salto, Buenos Ayres; d. about 1808. In 1774, when a colonel in the army, he explored the desert known as "Gran Chaco." On 2 June, 1780, he started upon an expedition having for its object the pacification of the Indians, which lasted until 31 Jan., 1781, and in 1782 he explored the river Bermejo, and proved that it flowed into the Paraguay and not into the Parana, as had formerly been supposed. He also gave valuable information about the navigability of the river and the character of the tribes living in it. His narrative of this expedition was published by his son, Dr. José Antonio Arias, by order of the government.

ARIA DE BENAVIDES, Pedro (ah-rees-a-day behn-ah-veh-dees), Spanish physician of the 16th century, b. in Toro. He travelled extensively in Western America, and made curious and interesting studies about the remedies used by the Indians for the curing of their various diseases. His observations were published in Spain under the title of "Secretos de chirurgia especial de las enfermedades de morbo gállico y amparones, y la manera como se curan los indios de llagas y heridas, con otros secretos hasta agora no escritos." The date of his birth and death are not known.

ARILLAGA, Bautista, Arzobispo de Madrid, b. about 1785; d. in August, 1807. Dr. Arillaga was probably the most erudite scholar that Mexico has ever produced, and at various times had under his tutelage the most eminent men of his country. In 1803 the Abbé Testory, head chaplain of the French forces, wrote a pamphlet in defence of the nationalization of church property, in the course of which he characterized the Mexican clergy as ignorant and corrupt. Dr. Arillaga replied to this attack in three pamphlets, which are masterpieces of learning, statistics, wit, and sarcasm. Dr. Arillaga was superior of the Jesuits in Mexico, and rector of the college of San Ildefonso. He was arrested together with Bishop Ormachea, of Vera Cruz, and thrown into the prison of San Ildefonso, where he died.

ARISMENDI, Juan Bautista, Venezuelan general, b. in the island of Margarita in 1786. He was a captain when the revolution broke out, and took command of the patriots and drove the Spanish General Morillo from the island after a long conflict. He was one of the leaders that assembled a provincial congress at Angostura on 29 July, 1817, and put at the head of the government a triumvirate of which Bolivar was a member. In 1819 he assisted Bolivar and Paez to drive Morillo from New Granada and from the greater part of Venezuela. In Bolivar's absence the Angostura congress forced Zea, whom he had appointed vice-president, to resign, and chose Arismendi in his place. On his return Bolivar restored Zea and exiled Arismendi to Margarita. Notwithstanding this, Arismendi espoused the cause of Bolivar during the insurrection headed by Paez, in 1826, and rendered great service to the nation.

ARISTA, Mariano (ah-rees-a-tay), Mexican general, b. in the state of San Luis Potosi, 26 July, 1802; d. on board the English steamer "Tagus" going from Lisbon to France, 7 Aug., 1855. Having distinguished himself in the successive wars that established first the independence of Mexico and afterward the republican form of government, he attained a high position in the Mexican army, and in 1836 was second in command to Santa Anna, then general-in-chief. By the revolutions that continually agitated Mexico, he was twice deprived of his command; but his military knowledge was indispensable to every dominant party, and he was quickly restored and promoted. In the war with the United States he commanded at Palo Alto and Resaca de la Palma; and after its close was appointed in June, 1848, minister of war under President Herrera. In 1850 he was elected president of Mexico, but he resigned that office 6 Jan., 1853, and retired to his farm, and was banished to the U.S. In 1851 his remains were sent home to Mexico.

ARISTIZABAL, Gabriel de, Spanish admiral, b. in Madrid in 1743; d. in 1805. In 1795 he conceived and carried out the idea of transferring to Havana the remains of Christopher Columbus, which, with those of his son Diego, had been in the cathedral of the city of Santo Domingo, in the island of Santo Domingo, since 1536. Doubt have arisen about the genuineness of these remains through the alleged discovery, in 1877, in the same cathedral, of what have been claimed to be the true remains of Columbus.

ARMAND, Charles Trefin, Marquis de la Romaine, French soldier, b. in Poitou, France, 14 April, 1751; d. near Lambelle, 30 Jan., 1783. At an early age he entered the Garde du Corps in Paris, but fought a duel about an actress, was dismissed from the service, and in consequence left France. Coming to the American colonies, he volunteered in the cause of the revolution, 10 May, 1777, and received from Congress a commission as colonel under the name of Charles Armand. He participated in the engagement at Red Bank, was with Lafayette in New Jersey, and was active in Westchester co., N.Y., opposing the forces of Simcoe, Emmerick, and Barnmore, the latter of whom he captured near Kingsbridge, 8 Nov., 1783. The following year his corps was incorporated with
Pulaski's. In 1781, becoming dissatisfied with the promotions in the army, and seeing no chance of advancement, he returned to France, procured clothing and accoutrements from his own means, and crossed the Atlantic again in time to partici- pate in the victory at Yorktown. March 26, 1783, congress conferred on him the rank of brigadier-general. He was very severe in his denunciation of Gen. Gates on account of the defeat at Camden. In 1789 he returned to France and became an actor in the French revolution, taking part with the royalist of La Vendee. Five years later he arrived in Paris by Brittany to demand the preservation of the privileges of that province, and in 1791 became the leader of a secret organization whose ramifications extended throughout Brittany, Anjou, and Poitou, its purpose being to act with the army of the allies. But the design was betrayed, and he became a major of the 3d artillery, and, remaining in that grade for ten years, was brevetted brigadier. He served in the Flor- ida war, and was appointed on various important boards and commissions, an officer of the 3d artillery at Fort Moultrie, S. C., in 1844, when he was granted sick leave, from which he was never able to return to duty.

ARMITAGE, Thomas, clergyman, b. in Pontefract, England, 2 Aug., 1819; d. in Yonkers, N. Y., 20 Jan., 1866. Coming to New York in 1838, he was ordained a deacon in the ministry of the church. In 1848 he embraced the doctrine of the Baptist church, and as a pastor in New York attained prominence as one of the leading writers and pulpit orators of that denomination. He interested himself in the movement for Bible revision, especially in regard to what he believed to be the correct text. The death of the founder, and was one of the founders of 1850 of the American Bible Union, of which society he afterward became president. After 1848 he was the pastor of the Fifith avenue Baptist church, New York city. He published "Lectures on Preaching, its Ideal and Inner Life" (Philadelphia, 1880), and "A History of the Baptists" (New York, 1885).

ARMITAGE, William,方法, bishop of the Protestant Episcopal diocese of Wisconsin, b. in New York city, 6 Sept., 1830; d. in St. Luke's Hospital, New York, 7 Dec., 1873. He was graduated at Columbia college in 1849, studied in the General Theological Seminary, was ordained in 1852, spent seven years of his ministry in New York, was consecrated Bishop of the Diocese of the Upper Missisipi and of the Iowa Territory of St. John's church, Detroit. In 1866 he went to the Holy Land, and during his absence was elected assistant bishop of Wisconsin, receiving consecration to the office 6 Dec., 1866, soon after his return. He took up his residence in Milwaukee, and began the necessary steps for the founding of a cathedral chapter. The death of the venerable Bishop Kemper in May, 1870, caused his elevation to the vacant see. A tumor at the base of the spinal column gave him much suffering during the latter years of his life, and in 1873 he went to St. Luke's hospital, New York, for relief. An examination by eminent surgeons caused them to inform him that it was impossible for him to survive more than a week with his present disease. But instead of saying they told him that if it should prove unsuccessful, his system would receive such a shock that he would not probably live more than a few hours. The operation was performed on Friday, and he lived till 3 A. M. of Sunday.

ARMITAGE, James Harris, physician, b. in Sutton, N. H., 31 Dec., 1809; d. in Albany, N. Y., 3 Dec., 1875. His early years were spent on his father's farm and in the common school, with a short time in the Worcester and Monson academies. He studied with Dr. Alden March in Albany, and was
graduated in 1833 at the Vermont academy of medicine. He taught for a year in a private medical school, and from 1834 to 1840 was professor of anatomy and physiology in the Vermont academy of medicine. In 1841, he went to found a medical college in Albany, raised $10,000 for the institution, and delivered in that city the first American course of medical lectures illustrated with dissections of the human body. He made two visits to Europe, one in 1839 and one in 1845, for the purpose of inspecting the principal schools of the old world, and went to Paris in 1860 as U. S. consul. He was one of the originators of the Young Men's Christian association, and was also instrumental in founding the Dudley observatory.

ARMSTRONG, David Hartley, senator, b. in Nova Scotia, 21 Oct., 1812; d. in St. Louis, Mo., 18 March, 1886. He received an academic education, and was graduated at McGill college, Montreal, in 1837, opened and taught the first public school in the state, 1 April, 1838. He was comptroller of St. Louis from 1847 to 1856, and member of the board of police commissioners from 1853 to 1875 and again in 1877, serving as its vice-president and filling other local offices. He was chosen U. S. senator from Missouri in 1877, and in October, 1877, to fill the vacancy caused by the death of Lewis V. Boggy, and served until 1879.

ARMSTRONG, David Maillant, artist, b. in Newburg, N. Y., about 1837. He was graduated at Trinity college, Hartford, in 1858, studied law in New York, and practised that profession for a short time. It soon became evident to him that his choice of the law was a mistake, and he turned his attention to art. He studied in Rome and Paris under the best teachers, and divided his time mainly between Italy and New York. For four years he was U. S. consul-general for Italy, resident at Rome, and was director of the American art department at the Paris exposition of 1878, when he was given leave of absence. In 1881 he resigned, having served two years of his leave, to study in Italy.

ARMSTRONG, George Dodd, author, b. in Mendham, N. J., 15 Sept., 1813; d. in Norfolk, Va., 12 May, 1899. He was graduated at Princeton in 1832, was a teacher, and then entered the union theological seminary, Prince Edward co., Va. Two years later he became a lawyer, and was admitted to the bar in Virginia in 1840. He entered Washington college, now Washington and Lee university, Lexington, in 1851 he resigned his professorship and took pastoral charge of a church in Norfolk. The degree of S. T. D. was conferred on him by the college of William and Mary in 1854. He has contributed from an early age to periodicals, and published the "Christian " (New York, 1852); "Scriptural Examination of the Doctrine of Baptism," (1857); "The Summer of the Pestilence: a History of the Rayages of the Yellow Fever in Norfolk, Va., in 1853" (Philadelphia, 1857); "Sacraments of the New Testament" (1859); and "The Books of Nature and Revelation collated" (1866).

ARMSTRONG, James, naval officer, b. in Shelburne, Ky., 17 Jan., 1794; d. 27 Aug., 1868. He joined the navy as midshipman in 1809, and was assigned to the sloop of war " Frolic," which was captured by the British 20 April, 1814, her guns having been thrown overboard during the chase. He rose by the regular steps of promotion to be a captain in 1841. He commanded the East India squadron in 1853, and assisted at the capture of the barrier forts near Canton, China, in 1857. He was in command of the navy-yard at Pensacola, Fla., when that state seceded in 1861, and surrendered without resistance when a greatly superior military force demanded possession. In 1866 he was promoted to be commodore.

ARMSTRONG, James, soldier, b. in Pennsylvania, in the early part of the year; d. in Carlisle, Pa., 3 March, 1795. Of his early life little is known. He served as a colonel in the successful defence of Fort Montrie, Charleston harbor, in the summer of 1776, and commanded the Pennsylvania militia in the defence of Germantown in October, 1777. He was a member of congress from 2 Dec., 1783, till the day of his death.

ARMSTRONG, James, Canadian jurist, b. in Berthier, province of Quebec, 27 April, 1821. He was called to the bar in 1844, became queen's counsel in 1867, was nominated crown prosecutor for the district of Richelieu in 1864, and was appointed chief justice of St. Lucia, West Indies, by the imperial government in 1871. Subsequently he was appointed chief justice of Tobago, West Indies, which office he held conjointly with the chief justiceship of St. Lucia until his resignation in 1882. St. Lucia was one of the French colonies acquired by Great Britain by conquest in 1756, and the French laws were allowed to remain in force. He served some time as a member of the code commission, but as far back as 1843 the chief justice made a report upon the laws, in which he said that no one knew what the law of the colony really was. Such was the state of the law when Mr. Armstrong became judge, partly owing to the appointment of judges who knew nothing of French jurisprudence, and particularly of recently arrived Frenchmen, France. The criminal law of France before the revolution was in force in St. Lucia for many years, portions of the English law being from time to time introduced. Chief justice Armstrong convinced the imperial government of the absolute necessity of introducing the English criminal law into the colony, subject to the enactments of the colonial legislature. A code of civil law, based in great measure upon the civil code of Quebec, was compiled by Mr. Armstrong and the governor of St. Lucia. Mr. Armstrong afterward prepared a code of civil procedure, which the legislature adopted, and passed resolutions thanking him for the great labors of the code. He was chief judge of St. Lucia till 1857. He is the author of a treatise on the law of marriage in the province of Quebec, written before the civil code came into force, and a treatise on the laws of intestacy in the different provinces and northwest territories of the dominion (1886). He is president of the Montreal and Sorel railway.

ARMSTRONG, James F., naval officer, b. in New Jersey, 20 Nov., 1817; d. in New Haven, Conn., 19 April, 1873. He was appointed midshipman from Connecticut in 1832. His first service was on the sailing frigate " Delaware" in the Mediterranean, whence he was transferred to the schooner " Resolute" in the West India squadron, in 1837. He became passed midshipman 23 June, 1838, and lieutenant 8 Dec., 1842, and in this grade was alternately on sea and shore duty until the civil war, when he was placed in command of the steamer " Simpont" on the blockading squadron. As commander, dating from 27 April, 1861, he continued on the blockading service, took part in the capture of Fort Macon, 25 April, 1862; and was subsequently commissioned captain 16 July, 1862. His last cruise was in 1864, after which he was on the reserve list until 1871, when he was reinstated and was detailed for shore duty on the Pacific coast.

ARMSTRONG, John, soldier, b. in the north of Ireland in 1725; d. in Carlisle, Pa., 9 March, 1795.
He served with distinction in the war with France in 1755-6, commanding an expedition against the Indians at Kittanning, destroying their settlement, and capturing a great many of the enemy. For this service the corporation of Philadelphia gave him a vote of thanks, a medal, and a piece of plate. He was commissioned as a brigadier-general in the continental army 1 March, 1776, served at Fort Moultrie, and commanded the Pennsylvania militia at the battles of Brandywine and Germantown, but left the army 4 April. The complaints of dissatisfaction in regard to rank. He was sent to congress in 1778-80, and again in 1787-8, and held many local public offices.—His youngest son, John, soldier, b. in Carlisle, Pa., 25 Nov., 1758; d. in Red Hook, N. Y., 1 April, 1843. He served in the war of the revolution, enlisting in 1775 while yet a student at Princeton. His first training was in the Potter Pennsylvania regiment, from which he went as aide-de-camp to Gen. Mercer, whom, when fatally wounded, he carried in his arms from the Princeton battlefield. He then became an aide on the staff of Gen. Gates, and served with him through the campaign against Burgoyne, which closed at Saratoga. In 1778 he was appointed adjutant-general of the southern army, but, in consequence of illness, retired before the battle of Camden. He afterward resumed his post on Gen. Gates' staff, with the rank of major, which he held until the close of the war. While in camp at Newburg, N. Y., 10 March, 1783, he wrote the first of the two celebrated "Newburg Letters," which was anonymous, set forth the services and destination of the soldiers, and called a meeting of the officers of the army for the consideration of measures to redress the army grievances, being intended to arouse congress to a sense of justice to the army then about to be disbanded. Washington was then camp at the time, met the inflammatory document by issuing general orders forbidding the meeting, when suddenly the second address appeared. This also was anonymous, but Washington overruled the threatened embarrassment by attending the meeting in person. He shrewdly quieted Gates by making him chairman, and then rallied his faithful officers to the calm and dignified to be answered the argument of the "anonymous addresser," but intimated that he "was an insidious foe, some emissary perhaps from New York, sowing the seeds of discord and separation between the civil and military powers of the continent." At the time of making this address Washington did not know the anonymous author, but a private letter afterward written by him expressed his confidence in the good motives that had dictated the letters, "though the means suggested were certainly liable to much misunderstanding and abuse." The "addresses" were pointed and vigorous, written in pure English, and for the purpose for which they were written—"to induce the people of the state to maintain in the public offices, for a period of about eleven years. In 1789 he married a sister of Chancellor Livingston, and, purchasing a farm in New York, devoted himself to agriculture. He was a U. S. senator in 1800-2, and again in 1803-4. In 1804-10 he was minister to France, and filled the position with distinguished ability, also acting after 1806 as minister to Spain. The commission of brigadier-general was conferred on him 6 July, 1812, but he did not accept it. In his subsequent retirement at Red Hook, N. Y., he prepared and published the following works: "Notices of the War of 1812" (New York, 1836; new ed., 1840); "Memoirs of Gen. Montgomery and Wayne"; "Treatise on Agriculture"; "Treatise on Gardening"; and a "Review of Gen. Wilkinson's Memoirs." He also partially prepared a "History of the American Revolution," and several biographical notices.—His son, Henry Beckman, soldier, b. in New York city, 9 May, 1791; d. in Red Hook, N. Y., 10 Nov., 1884. His early years were spent in France, where his father was American minister to the court of the first Napoleon, and his education was received at a French school, where he was taught for years, hats of all kinds being considered effeminate. Before leaving France, in 1811, young Armstrong frequently saw Napoleon and many of his marshals. At the beginning of the second war with Great Britain in 1812, he entered the army as captain in the 15th infantry, and served throughout the war with great gallantry and distinction. He was severely wounded at the assault upon Queenstown heights, 13 Oct., 1812, and shared in the capture of Fort George, 27 May, 1813, the battle of Stony Creek, 5 June, 1813, and the sortie from Fort Erie, 15 Aug., 1814. On the return of peace in 1815 he retired from the army with the rank of lieutenant-colonel of the 1st regiment of rifles. Formerly seventy years, "Armstrong lived the life of a country gentleman on his estate on the banks of the Hudson. His mind was richly stored with reminiscences of the many eminent persons whom he had met during his long life." ARMSTRONG, Moses Kimball, politician, b. in Milan, Ohio, 19 Sept., 1822. He was educated in the public schools of that place, and removed to Ohio, went to Minnesota in 1856, was elected surveyor of Mower county, and in 1858 was appointed surveyor of U. S. lands. On the admission of Minnesota as a state he removed to Yankton, then an Indian village on the Missouri river; and, on the organization of Dakota in 1861, he was elected to the legislature of the territory, being reelected in 1861 and 1862, and acting the last year as speaker. He became editor of the "Dakota Union" in 1864, was elected territorial treasurer, appointed clerk of the supreme court in 1865, elected to the territorial senate in 1866, and in 1867 was chosen its president, publishing the same year his history of Dakota. He acted as secretary of the public works of the territory from 1866 to 1869 in establishing the great meridian and standard lines for U. S. surveys in southern Dakota and the northern Red river valley, detecting the errors of locating the international boundary-line near Pembina since 1823; in 1868 was elected again to the territorial senate, in 1872 he was chosen president of the first national Bank of the territory, and he was elected to the 43d and 45d congresses, as a democrat. He established the first democratic newspaper in the territory. ARMSTRONG, Richard, British soldier, b. about the middle of the 18th century; d. about 1823. He entered the Queen's regiments as cap-
taint, afterward became major, and at all times showed the greatest efficiency as a partisan officer on the royalist side during the war of the revolution. In 1783 he was appointed with Capt. Saunders to prepare a parting address for Col. John G. Simcoe, the intrepid leader of the rangers. He was in active service 29 Jan., 1787, to a vacancy; 25 Sept., 1803, to a major-generalship; and 25 Oct., 1809, to a lieutenant-generalship.

ARMSTRONG, Richard, missionary, b. in Northumberland co., Pa., 19 Sept., 1803; d. in Honolulu, Sandwich islands, 23 Sept., 1860. He was graduated at Dickinson college, Pa., and, after a considerable amount of study, went in 1832 to the Sandwich islands. For eight years he was in charge of the mission at Nukahiva, in the Marquesas group; then went to Wailuka, whence after five years he returned to Honolulu to take the station made vacant by the return of Mr. Bircham to the United States. In December, 1847, the king made him his immediate of instruction and principal of the board of education, and appointed him to a seat in the house of nobles, and to a membership in the privy council. His death was caused by the kick of a vicious horse.

ARMSTRONG, Robert, soldier, b. in east Tennessee in 1790; d. in Washington, D. C., 23 Feb., 1854. He commanded a company of Tennessee artillery under Gen. John A. ADC. In the Creek campaigns of 1813-'14 with distinguished bravery. At the battle of Talladega, Ala., 24 Jan., 1814, he was dangerously wounded, but recovered, and again distinguished himself at the battle of New Orleans, and in 1826, as brigadier-general, commanded the Tennessee mounted volunteers at the battle of Wahoo springs, 23 Nov., 1817, where he was severely wounded and taken prisoner in 1829 to 1845, when he was sent as consul to Liverpool, remaining until 1852. He subsequently became the proprietor and editor of the "Washington Union," and was the confidential adviser of Mr. Polk during his presidency. Gen. Jackson bequeathed to him his sword.

ARMSTRONG, Saunuel Turell, governor of Massachusetts, b. in Dorchester, Mass., 29 April, 1784; d. in Boston, 26 March, 1850. He was a bookseller in Boston, and among other works published a stereotype edition of Scott's family Bible, which was widely circulated. He became mayor of Boston and lieutenant-governor of Massachusetts, and its majority of the legislature made him acting governor for the remainder of the term. He made a fortune in his business, and, as he had no children, it was reported that he intended to leave large amounts to charitable institutions; but if so, his designs were frustrated by his sudden death. Gov. Armstrong served in the state house of representatives, and in the senate in 1839.

ARMSTRONG, William Jessup, clergyman, b. in Mendham, N. J., 29 Oct., 1796; lost at sea, 27 Nov., 1846. He was graduated at Princeton in 1816, and studied in the theological school (Presbyterian) of that college. He was licensed to preach in 1818, and went to Albermarle co., Va., as a missionary, but returned to Trenton to take charge of a congregation. Here he remained three years, and then accepted an invitation from the first Presbyterian church in Richmond, Va., where he remained until 1831. He then became secretary of the Presbyterian board of foreign missions for Virginia and North Carolina, and at the same time agent for the American Board of foreign missions for the same district. In September of the same year he became secretary to the last-named society. After a residence of two years and a half in Boston, he removed to New York. In 1810 he received the degree of S. T. D. from Princeton. He was lost in the wreck of the steamer "Atlantic." A memoir by Henry Read, with a selection of Dr. Armstrong's sermons, was published in 1853.

ARNOLD, Aaron, merchant, b. in the Isle of Wight in 1794; d. in New York city, 18 March, 1836. He was the son of a farmer, but early showed a fondness for mercantile pursuits, and in 1823 emigrated to Philadelphia, where he lived for three years, studying carefully the comparative business advantages of the different cities of the country. He finally selected New York as the most desirable place, and with his nephew, George A. Hearn, established there, in 1827, a wholesale and retail dry-goods store, under the firm name of Arnold & Hearn. In 1842 Mr. Hearn was succeeded by Mr. Arnold's son-in-law, James M. Constable, and the name of the firm was changed to Aaron Arnold & Co. In 1853 Mr. Arnold's son Richard and J. P. Baker were admitted to the firm, which then became known by its present title, Aaron, Constable & Co. In 1857 Mr. Arnold took complete control of the active management of the business, and for some time before his death was confined to his house. His success is ascribed, by those who knew him well, to his sterling honesty, his sagacity, and his steadfast adherence to his friends.

ARNOLD, Albert Nicholas, clergyman, b. in Cranston, R. I., 18 Apr. 1804; d. 11 Oct., 1883. He was graduated at Brown in 1828, studied at Newton theological seminary, and on 14 Sept., 1841, was ordained pastor of the Baptist church at Newburyport, Mass. From 1844 to 1851 he was a missionary to Greece, from 1855 to 1857 he was professor of church history at the Newton seminary, and from 1857 to 1866 was pastor of the Baptist church in Westborough, Mass., where he remained until 1894. He was then chosen professor of biblical interpretation and pastoral theology in the Baptist seminary at Hamilton, N.Y., and from 1860 to 1873 held the professorship of New Testament Greek in Baptist theological seminary at Chicago. Dr. Arnold published, in 1860, "Prerequisites to Communion," and in 1871 "One Woman's Mission."

ARNOLD, Benedict, governor of Rhode Island, b. in England, 21 Dec., 1615; d. 20 June, 1678. He lived for some time in Providence, and in 1657 was one of thirteen who signed a compact agreeing to subject themselves to any agreements made by a majority of the inhabitants of the colony. His knowledge of the native tongues gained him the office of messenger to negotiate with the Indians, and on one occasion they accused him of misrepresentation. In 1653 he moved to Newport, and in 1654 was elected assistant for that town. In 1657 he was one of the purchasers of the island of Conanicut. On 19 May, 1657, Roger Williams having retired from the presidency of the colony, Arnold was elected to the office, and he was again assistant in 1660. On 22 May, 1662, he was again elected president, and under the royal charter given in 1663 he was the first governor of the colony. To this office he was re-elected in May, 1664, and in 1669, 1677, and 1678. Gov. Arnold was instrumental in bringing about the reconciliation and union of the two colonies of Rhode Island and Providence plantations.

ARNOLD, Benedict, soldier, b. in Norwich, Conn., 14 Jan., 1741; d. in London, England, 14 June, 1801. His ancestor, William Arnold (b. 1591) came to Providence in 1636, and was associated with Roger Williams as one of the fifty-four proprietors in the first settlement of Rhode Island. His son Benedict moved to Newport, and was governor of the
ARNOLD

ARNOLD

colony from 1663 to 1666, 1669 to 1672, 1677 to 1678, when he died. His son Benedict was a member of the assembly in 1695. His son Benedict, third of that name, moved to Norwich in 1709; was cooper, ship-owner, and sea-captain, town surveyor, collector, assessor, and selectman. He married, 8 Nov., 1733, Hannah, daughter of John Watson, widower, of Missions. Of their six children, only Benedict and Hannah lived to grow up. Benedict received a respectable school education, including some knowledge of Latin. He was romantic and adventurous, excessively proud and sensitive, governed rather by impulse than by principle. He was noted for physical strength and beauty, and was possessed of immense capacity both for good and for evil, and circumstances developed him in both directions. At the age of fifteen he ran away from home and enlisted in the Connecticut army, marching to Albany and Lake George to resist the French invasion; but, getting weary of discipline, he deserted and made his way home alone through the wilderness.

He was employed in a drug shop at Norwich until 1763, when he removed to New Haven and established himself in business as druggist and haberdasher. He acquired a considerable property, and engaged in the West India trade, sometimes commanding his own ships, as his father had done. He was elected a selectman, carried on the trade with Canada, and often visited Quebec. On 22 Feb., 1767, he married Margaret, daughter of Samuel Mansfield. They had three sons, Benedict, Richard, and Henry. She died 19 January 1775. On one of his voyages, being at Honduras, he fought a duel with a British sea-captain who called him a “4-d Yankee”; the captain was wounded and apologized. He occasionally visited England. At noon of 20 April, 1775, the news of the battle of Lexington reached New Haven, and Arnold, who was captain of the governor’s guards, about 80 in number, assembled them on the common and ordered them to lead them to Boston. Gen. Wooster thought he had better wait for regular orders, and the selectmen refused to supply ammunition; but, upon Arnold’s threatening to break into the magazine, the selectmen yielded and furnished the ammunition, and the company marched to Cambridge. Arnold immediately proposed the name Ticonderoga, and Crown Point, and the plan was approved by Dr. Warren, chairman of the committee of safety. Arnold was commissioned as colonel by the provincial congress of Massachusetts, and directed to raise 400 men in the western counties and surprise the forts. The same scheme had been entertained in Connecticut, and troops from that colony and from Berkshire, with a number of “Green mountain boys,” had already started for the lakes under command of Ethan Allen. On meeting them Arnold claimed the command, but when it was refused he joined the expedition as a volunteer and entered Ticonderoga side by side with Allen. A few days later Arnold captured St. John’s, Massachusetts, asked Connecticut to put him in command of these posts, but Connecticut preferred Allen. Arnold returned to Cambridge early in July, proposed to Washington the expedition against Quebec by way of the Kennebec and Chaudiere rivers, and was placed in command of 1,100 men and started from Cambridge 11 Sept. The enterprise, which was as difficult and dangerous as Hannibal’s crossing of the Alps was conducted with comman- datory and public spirit, however, and succeeded in reaching the banks of the Richelieu, where it had been intended to strike the enemy. The public. At the same time he requested congress to restore to him his relative rank.
The last week in April 3,000 British troops under Gov. Tryon invaded Connecticut and destroyed the military stores at Danbury. They were opposed by a Whig band at Danbury, and Arnold was now promoted in which that general was slain. By this time Arnold, who was at New Haven, on a visit to his family, arrived on the scene with several hundred militia, and there was a desperate flight at Ridgefield, in which Arnold had two horses shot from under him. The British were driven to their ships, and narrowly escaped capture. Arnold was now promoted to the rank of major-general and presented by congress with a fine horse, but his relative rank was not restored. While he was at Philadelphia inquiring into the reasons for the injustice that had been done him, the country was thrown into consternation by the news of Burgoyne's advance and the fall of Ticonderoga. At Washington's suggestion, Arnold again joined the northern army, and by a brilliant stratagem dispersed the army of St. Leger, which, in cooperation with Burgoyne, was coming down the Mohawk valley, and had laid siege to Fort Stanwix. After Schuyler had been superseded by Gates, Arnold was placed in command of the army, and set forth for the heights. In the battle of 19 Sept., at Freeman's farm, he frustrated Burgoyne's attempt to turn the American left, and held the enemy at bay till nightfall. It properly reinforced by Gates, he would probably have inflicted a crushing defeat upon Burgoyne. But Gates, who had already begun to dislike him as a friend of Schuyler, was enraged by his criticisms on the battle of Freeman's farm, and sought to wreak his spite by withdrawing from his division some of his best troops. This gave rise to a fierce quarrel. Arnold asked permission to return to Philadelphia, and Gates granted it. But many officers, knowing that a decisive battle was imminent, and feeling no confidence in the command, Gates contrived to remain, and he did so. Gates issued no order directly superseding him, but took command of the left wing in person, giving the right wing to Lincoln. At the critical moment of the decisive battle of 17 Oct., Arnold rushed upon the field without orders, and in a series of magnificent charges broke through the British lines and put them in flight. The credit of this great victory, which secured for us the alliance with France, is due chiefly to Arnold, and in a lesser degree to Morgan. Gates was not on the field, and deserves no credit whatever. Just at the close of the battle Arnold was severely wounded in the leg that had been hurt at Quebec. He was carried on a litter to Albany, and remained there disabled until spring. On 20 June, 1778, he received from congress an annotated commission restoring him to his original seniority in the army. On 19 June, as he was still too lame for field service, Washington put him in command of Philadelphia, which the British had just evacuated. The tory sentiment in that city was strong, and Arnold, being disgusted at his intercourse with France, a feeling which Arnold seems to have shared. He soon became engaged to a tory lady, Margaret, daughter of Edward Shippen, afterward chief justice of Pennsylvania. She was celebrated for her beauty, wit, and nobility of character. During the next two years Arnold associated much with the Tories, and his views and opinions in public affairs were no doubt influenced by this association. He lived extravagantly, and became involved in debt. He got into quarrels with many persons, especially with Joseph Reed, president of the executive council of the state. These troubles wrought upon him until he made up his mind to resign his commission, obtain a grant of land in central New York, settle it with some of his old soldiers, and end his days in rural seclusion. His request was favorably entertained by the New York legislature, but a long list of charges now brought against him by Reed drove the scheme from his mind. The charges were investigated by a committee of congress, and on all those that affected his integrity he was acquitted. Two charges—first, of having once in a hurry granted a pass in which some due forms were overlooked, and, secondly, of having once used some public waggons, which were standing idle, for saving private property in danger from the enemy—were proved against him; but the committee thought these things too trivial to notice, and recommended an unqualified verdict of acquittal. Arnold then, considering himself vindicated, resigned his command of Philadelphia. But as Reed now represented that further evidence was forthcoming, congress referred the matter to another committee, which shirked the responsibility through fear of offending Pennsylvania, and handed the affair over to a court-martial. Arnold clannered for a speedy trial, but Reed succeeded in delaying it several months under pretense of collecting evidence of the charges. On 29 Sept. of the same year, the court-martial passed its sentence, which in every particular agreed in every particular with that of the committee of congress; but for the two trivial charges proved against Arnold, it was decided that he should receive a reprimand from the chief. Washington, who considered Arnold the victim of persecution, counseled the reprimand in such terms as to convert it into eulogy, and soon afterward offered Arnold the highest command under himself in the northern army for the next campaign. But Arnold in an evil hour had allowed himself to be persuaded into the course that has blackened his name forever. Three years had elapsed since Saratoga, and the fortunes of the Americans, instead of improving, had grown worse and worse. France had as yet done but little for us, our southern army had been annihilated, our paper money had become worthless, our credit abroad had hardly begun to exist. Even Washington wrote that "he had almost ceased to hope." The army, clad in rags, half-starved and unpaid, was nearly ripe for the mutiny that broke out a few months later, and desertions to the British lines averaged more than 100 a month. The spirit of desertion now seized upon Arnold, with whom the British commander had for some time tampered through the mediation of John André and an American loyalist, Beverley Robinson. Stung by the injustice he had suffered, and influenced by his tory surroundings, Arnold made up his mind to play a part like that which Gen. M'Kauk had played in the restoration of Charles II. to the British throne. By putting the British in possession of the Hudson river, he would give them all that they had sought to obtain by the campaigns of
1776–77; and the American cause would thus become so hopeless that an opportunity would be offered for negotiation. Arnold was assured by Lord North that he would renew the liberal terms already offered in 1778, which concealed everything that the Americans had demanded in 1775. By rendering a cardinal service to the British, he might hope to attain a position of such eminence as to conduct these negotiations, end the war, and restore America to her old allegiance, with the liberty and safety promised and guaranteed. In order to realize these ambitious dreams, Arnold resorted to the blackest treachery. In July, 1780, he sought and obtained command of West Point in order to surrender it to the enemy. When his scheme was detected by the timely capture of André, he fled to the British at New York, a disgraced and hated traitor. Instead of getting control of affairs, like Gen. Monk, he had sold himself cheap, receiving a brigadier-general's place in the British army and a paltry sum of money. In the spring of 1781, he conducted a plundering expedition into Virginia; in September of the same year he was sent to attack New London, in order to divert Washington from marching directly toward New York. In the following winter he went with his wife to London, where he was well received by the king and the Tories, but frowned upon by the Whigs. In 1787 he removed to St. John's, New Brunswick, and entered into mercantile business with his sons Richard and Henry. In 1791 he returned to London and settled there permanently and in 1797 he purchased Ballindale, for which he paid about £200, as a remark which the latter had made about him in the house of lords. His last years were embittered by remorse. The illustration on page 95 is a view of Col. Beverley Robinson's house, opposite West Point, which was occupied by Arnold as his headquarters. It is now the property of Hon. Hamilton Fish, of life long business, by Sparks in vol. iii. of his "American Biographies," and more fully by Isaac Newton Arnold, "Life of Benedict Arnold, his Patriotism and his Treason" (Chicago, 1880).—His fifth son, Sir James Robertson, British soldier, b. in Philadelphia in 1780; d. in London, England, 27 Dec., 1834. He entered the English navy, became a lieutenant of the rank of colonel. From 1816 to 1823 he was at the head of the engineers in Nova Scotia and New Brunswick. In 1841 he was transferred from the engineers, and in 1851 was made lieutenant-general. He served with credit in various parts of the world, displaying especial courage in the attack on Surinam, where he received a severe wound. He was aide-de-camp to both William IV. and Victoria. He bore a strong personal resemblance to his father.

—Benedict's seventh son, William Fitch, the only one that left issue, b. 25 June, 1794, was a captain in the British army. His son, Edwin Gladwin, rector of Barrow in Cheshire, inherited the family seat of Little Missenden Abbey, Buckinghamshire, and the views and principles of his father, but with changed views. ARNOLD, George, author, b. in New York city, 24 June, 1834; d. at Strawberry Farms, N. J., 3 Nov., 1865. While he was still an infant his parents removed to Illinois, but in 1819 returned to the east and settled at Strawberry Farms. As he showed a talent for drawing, he was placed in the studio of a portrait painter in New York; but he soon abandoned the idea of becoming an artist, and adopted literature as a profession. He became a contributor to "Vanity Fair," the "Leader," and other periodicals, writing stories, poems, sketches, and art criticisms. Some of his poems are of remarkable sweetness. He was best known during his lifetime as the author of the "McAuley" papers, which established his reputation as a humorist. Arnold was the author of a biography of "Mr. Washington" first published in 1850, and continued there in and other papers until his death. He was also the author of several biographical works. During the civil war Mr. Arnold did military duty for a long time at one of the forts on Staten Island. His poems were collected and edited, with a memoir, by William Winter, M.D., in 1859. The "McAuley" papers were consolidated in one.

—"The Jolly Old Pedagogue" is his best-known poem.

ARNOLD, Isaac Newton, lawyer, b. in Hartwick, Otsego co., N. Y., 30 Nov., 1815; d. in Chicago, 24 April, 1884. His father, Dr. George W. Arnold, was a native of Rhode Island, whence he removed to western New York in 1810. After attending the district and select schools, Isaac Arnold was thrown on his own resources at the age of fifteen. For several years he taught school a part of each year, earning enough to study law, and at the age of twenty was admitted to the bar. In 1836 he removed to Chicago, where he spent the rest of his life, and was prominent as a lawyer and in politics. Of the early history of Chicago in 1837, and, beginning in 1846, served several terms in the legislature. The state was then heavily in debt, and Mr. Arnold became the acknowledged champion of those who were opposed to repudiation. In 1844 he was a presidential elector, and in 1848 was elected to congress as a representative. The last term he served. During Bull Run he acted as volunteer aide to Col. Hunter, and did good service in caring for the wounded. While in congress he was chairman of the committee on the defence and fortifications of the great lakes and rivers, and afterward chairman of the committee on manufactures, serving also as member of the committee on internal improvements. He voted for the bill abolishing slavery in the district of Columbia, and in March, 1862, he introduced a bill prohibiting slavery in every place under national control. This bill was passed on 19 June, 1862, after much resistance, and on 15 Feb., 1864, Mr. Arnold introduced in the house of representatives a resolution, which was passed, declaring that slavery was a sin and affirming that it should be so amended as to abolish slavery. His ablest speech in congress was on the confiscation bill, and was made 2 May, 1862. In 1865 President Johnson appointed him sixth auditor to the U. S. treasury. Mr. Arnold was an admirable public speaker, and delivered addresses before various literary societies, both at home and abroad. He had been intimate with Abraham Lincoln for many years before Mr. Lincoln's election to the presidency, and in 1866 he published a biography of him (new ed., rewritten and enlarged, Chicago, 1885). This was followed in 1879 by a "Life of Benedict Arnold," which, while acknowledging the enormity of Arnold's treason, presents and interprets his life from all aspects. The author claimed no relationship with the subject of his work. His life of Lincoln is valuable for the clearness with which it shows the historical relations of the president to the great events of his administration; and the author's death is said to have been caused, in part, by his persistent labor in completing his last revision of this work. Mr. Arnold was for many years president of the Chicago historical society, and Hon. E. B. Washburne delivered an address on his life before the society, 21 Oct., 1884 (Chicago, 1884).}

ARNOLD, Jonathan, statesman, b. in Providence, R. I., 14 Dec., 1741; d. in St. Johnsbury,
ARNOLD

Vol. 2. Feb. 1798. He studied medicine, and began practice. In 1774 he was a charter member of the Providence sgraniers. He was a member of the government, and director of the army hospital at Providence. After the war he removed to St. Johnsbury, Vt., where in 1782 he was appointed judge of the Orange co. court, an office which he held until his death. From 1782 to 1784 he was a member of the continental congress. His son, Lennel Hastings, statesman, b. in St. Johnsbury, Vt., Jan. 1792; d. in Kingston, R. I., 27 June, 1852, was graduated at Dartmouth in 1811, studied law, and practised in Providence from 1814 to 1821, after which he engaged in manufactures. From 1826 to 1831 he was a member of the general assembly of his state. He was elected governor of Rhode Island in 1831 and again in 1832. During the Dorr rebellion of 1842, he was a member of the executive council. He was a representative in congress from 1 Dec., 1845, till 3 March, 1847. — Richard, son of Lem-

pression on the mind of young Arnold, who denounced the act as unwarranted tyranny, and in after years remembered and acted upon his conceptions. The hostility in his mind against President Jackson. He was admitted to the bar in Knoxville, Tenn., in March, 1822, and, quickly attaining distinction in his profession, was elected to Congress in 1831 on the whig ticket after he had been twice defeated. Taking a prominent stand on the political issues of the day, he was fearless in his criticism, and generally opposed the administration. On 14 May, 1832, he made a speech against Senator Houston and a certain Maj. Morgan A. Heard, who had had some connection with the western army. In this speech he used the expression "capable of any crime," and indulged in severe personalities. On leaving the capitol, and while yet in the midst of more than 200 senators, he was assaulted by Heard, who fired upon him with a horse pistol, wounding him in the arm, and then struck him with a cane. Arnold knocked his assailant down, wrenched away the pistol, and carried it off as a trophy, while Heard was left for several hours where he fell. The admirers of Mr. Arnold presented him the next day with a high wreath of flowers, and the inscription, "Presented to Thomas D. Arnold for his brave defence against the attack of Morgan A. Heard." In 1836 he was elected brigadier-general of Tennessee militia, and in 1841 was returned to Congress, serving from 31 May, 1841, till 3 March, 1845, when he retired from political life and devoted himself to the practice of law. He had a notable controversy with William G. Brownlow.

AROSEMENA. Justo. Colombian jurist, b. in Panama in 1817; d. in Panama, 24 Feb., 1896. He was secretary of state several times, president of the congress, and Colombian minister successively to Venezuela, Peru, Bolivia, Chili, Central America, France, England, and the United States.

ARPIN, Paul, journalist, b. in France in 1811; d. in New York city, 18 May, 1865. He was the oldest French journalist in the United States. For many years he edited the "New Orleans Bee," and after that took charge of the New York "Courrier des Etats-Unis." He wrote largely for the American Cyclopaedia, contributing biographical notices of emigrants from France, including Lavoyer, La Harpe, Necker, Pascal, and Palissy.

ARRASCAETA, Enrique de (ahr-ras-ah-a'-ta), Uruguayan poet, b. in Montevideo in 1819. He has been a journalist, deputy, and minister of the republic of Uruguay; but his highest reputation comes from his numerous elegant poems.

ARRIATE, José Félix de, Cuban author, b. in Havana in 1697; d. in 1765. He studied law in Mexico, where he was admitted to the bar, and returned to his native city, where he filled some important offices. In 1761 wrote a history of Havana, the first historical work on a Cuban subject, to which he gave the title of "Llave del Nuevo Mundo." It was dedicated to the king and incidentally, alluding to the important geographical and strategic situation of the capital of Cuba. This work remained unedited until 1830, when it was published by the real sociedad económica of Havana. A new edition was brought out in 1876, forming part of the collection entitled "Los tres primeros historiadores de Cuba." This volume also contains some poems and a comedy, which are lost.

ARRIAGA, Pablo José (ahr-reh-a-gah), Spanish author, b. in Végara, Spain, in 1562. He was sent to Peru, and there founded several Jesuit colleges, being afterward prefect of Arequipa and Lima. He perished in a shipwreck in 1622. Of the works that he left finished at his death, those entitled "Extracción de la idolatría de los indios del Peru" and "Del supremo directorio espiritual" (1628) are the most important.

ARRILLAGA, José Joaquín, b. in Aye, province of Guipúzcoa, Spain, in 1750; d. at Soledad Mission, California, 24 July, 1818. In his youth Arrillaga was a volunteer in Mexico, rose in the service, became captain in 1783, and in the same year took office as lieutenant-governor of the two Californias. In 1796, when Governor de Romen was assassinated, he was appointed governor, and after an interval passed once more as lieutenant-governor, from 1794 to 1804, he received a permanent appointment as governor of Alta California, 26 March, 1804, and retained the office until his death. Of all the Spanish governors of the newly settled land, he was the one who endeavored to seek the approval of both civilians and the Catholic clergy.

ARRINGTON, Alfred W., lawyer, b. in Fredell co., N. C., 28 Sept., 1810; d. in Chicago, III., 31 Dec., 1867. He was the son of Archibald Arrington, a whig member of Congress from North Carolina from 1841 to 1845. In 1829 young Arrington was elected to the house of representatives of the native state, was received on trial as a Methodist circuit preacher in Indiana, and in 1832-33 he preached as an itinerant in Missouri, his remarkable mental powers and his eloquence everywhere drawing crowds to hear him. In 1834 he abandoned the ministry and studied law, being admitted soon after to the bar. He was made a judge of the Mississippi district court in 1835 or 1836 to Arkansas, attained distinction in his profession, and was sent to the legislature. In 1844 he was nominated an elector on the whig ticket, but withdrew his name, and avowed himself a democrat. Soon afterward he removed to Texas, and in 1850 was elected judge of the 12th district court, over which he presided till 1856. His health failing, he removed to Madison, Wisc., where he remained but a short time. In 1857 he went to Chicago, which thenceforward was his home. In that city he soon won a very high reputation as a constitutional lawyer, practising constantly before the U. S. district and circuit courts and the supreme courts of Wisconsin, which he had often attended on overwork. He wrote much under the signature of "Charles Summerfield," and was the author of an "Apostrophe to Water," which he put into the mouth of an itinerant Methodist preacher, and which was often quoted with great effect by John B. Gough. A volume of his poems, with a sketch of his character and a memoir, was published in Chicago in 1869. His works in book form include "Sketches of the Southwest," and "The Rangers and Regulators of the Tahana" (New York, 1857).

ARTAGUIETE, Diron d', French soldier, came to Louisiana as intendent commissary of the colony in 1798. Until he took charge of affairs and introduced order, the settled country was little more than a colony. He had a part in the government of Louisiana, acting as Bienville's principal coadjutor until 1711, when he returned to France, later becoming a director in Law's Mississippi company.—Diron d'Artaguette, probably the son, was appointed inspector-general of the French troops in Louisiana, and from 1718 to 1724 rendered important service in the wars of the Indians and in civil affairs. He died at Cape Francois, St. Domingo, where he filled the position of king's lieutenant.—Pierre d'Artaguette, a younger brother, distinguished himself in the Natchez war, and as a recognition of his merit was in 1734 appointed governor of the Illinois country, with post at
Fort Chartres. He administered the affairs of this command for two years, when he was ordered to collect troops to lead against the Chickasaws. The expedition, which began in January 1784, and the villages reached in May. The expected forces from Louisiana under Bienville had not appeared, and D'Artagniette attacked the Indians alone. The French were at first successful, but were finally overpowered, and with Vincennes and others he was made prisoner and burnt at the stake.

ARTEAGA, José María (b. May-say-so). Mexican soldier, b. in Aguas Calientes in 1825; d. in Uruapan, 13 Oct., 1886. He had but little education, his parents being very poor, and at once began to learn the trade of a tailor; but when nineteen years old he entered the army as a sergent. He took an active part in military operations during the long struggle, before the French invasion, and then he fought the invaders bravely. By successive promotions he attained the rank of general. The troops of Maximilian captured him in the battle of Amatitlán and took him to Uruapan, where he was executed.

ARTEAGA, Sebastián de, Mexican painter, flourished about 1800. He was born in Mexico, and the smarts of the old and new Mexico school. Among his best works are the "Apostle St. Thomas" and the "Marriage of the Virgin Mary," the former being in the museum of paintings of the city of Mexico. He was a high officer of the inquisition.

ARTHUR, Chester Alan, twenty-first president of the United States, v. in New York city, 18 Nov., 1886. His father was Rev. William Arthur (given below). His mother was Malvina Stone. Her grandfather, Uriah Stone, was a New Hampshire pioneer, who about 1763 migrated from Hampshire to Connecticut river, and made his home in Pemont, where he died in 1810, leaving twelve children. Her father was George Washington Stone, Shedied 16 Jan., 1869, and her husband died 27 Oct., 1875, at Newtownville, N. Y. Their children were three sons and six daughters, all of whom, except one son and one daughter, were alive in 1886.

Chester A. Arthur, the eldest son, prepared for college at Union Village in Greenwich, and at Schaghticoke, N. Y., 1843-1847, and was admitted to the more class of Union. While in his sophomore year he taught school for a term at Schaghticoke, Rensselaer co., and a second term at the same place during his last year in college. He joined the Psi-Upsilon society, the condition of admission being high scholarship. He was graduated at eighteen years of age, in the class of 1848. While at college he decided to become a lawyer, and after graduation attended for several months a law school at Ballston Spa, returned to Lansingburg, where his father then resided, and continued his legal studies. During that period he fitted boys for college, and in 1851 he was principal of an academy at North Pownal, Bennington co., Vt. In 1854, James A. Garfield, then a student in Williams college, taught penmanship in this academy during his winter vacation.

In 1855, Arthur, having accumulated a small sum of money, decided to go to New York city. He there entered the law office of Ennorus D. Culver as a student, was admitted to the bar during the same year, and at once became a member of the firm of Culver, Parker & Arthur. Mr. Culver had been an anti-slavery member of congress from Washington county when Dr. Arthur was pastor of the Baptist church in Greenwich in that county.

Dr. Arthur had also enjoyed the friendship of Gerrit Smith, who had often been his guest and spoken from his pulpit. Together they had taken part in the measures to form a New York anti-slavery society. This meeting was broken up by a committee of pro-slavery citizens; but the members repaired to Mr. Smith's home in Peterborough, and there completed the organization. On the same day in Boston a women's anti-slavery society, while its president was at prayer, was dispersed by a mob, and William Lloyd Garrison was dragged through the streets with a rope around his body, threatened with tar and feathers, and for his protection lodged in jail by the mayor. From these early associations Arthur naturally formed sentiments of hostility to slavery, and he first gave them public expression in the Lemmon slave case.

In 1852 Jonathan Lemmon, a Virginia slave-holder, determined to take eight of the slaves of his wife, Juliet—one man, two women, and five children—to Texas, and brought them by steamer from Norfolk to New York, intending to re-ship them from New York to Texas. On the petition of Louis Napoleon, a free colored man, on 6 Nov., a writ of habeas corpus was issued at the instance of Mr.

Paine, of the superior court of New York city, and after arguments by Mr. Culver and John Jay for the slaves, and H. D. Lapham and Henry L. Clinton for the slave-holder, Judge Paine, on 13 Nov., released the slaves on the ground that they had been made free by being brought by their master to a free state. The decision was made at the bar, and a writ of certiorari was sought by the slave-holder, and the case decided in the court of appeals in the next June, 1854. 1865, in the case of the Supreme Court of New York.

The legislature of New York passed a resolution directing its governor to defend the slaves. In December, 1857, the supreme court, in which a certiorari had been sued out, affirmed the decision of Judge Paine, and reversed the order of the governor. In June, 1858, it decided the case at the bar, and the legislature of Virginia directed its attorney-general to appeal to the higher courts of New York. In June, 1858, it decided the case at the bar, and the legislature of Virginia directed its attorney-general to appeal to the higher courts of New York. The legislature of New York passed a resolution directing its governor to def
him on his staff as engineer-in-chief, with the rank of brigadier-general. He had previously taken part in the organization of the New York militia, and had been judge-advocate of the second brigade. When the civil war began, in April, 1861, his active services were required by Gov. Morgan, and he became acting quartermaster-general, and as such began in New York city the work of preparing and forwarding the state's quota of troops. In December he was called to Albany for special legislation, and concerning the defenses of New York harbor. On 24 Dec. he summoned a board of engineers, of which he became a member; and on 18 Jan., 1862, he submitted an elaborate report on the condition of the national forts both on the sea-coast and on the inland border of the state. On 10 Feb., 1862, he was appointed inspector-general, with the rank of brigadier-general, and in May he inspected the New York troops at Fredericksburg and on the Chickahominy. In June, 1862, Gov. Morgan ordered his return from the Army of the Potomac, and he acted as secretary of the meeting of the governors of the loyal states, which was held at the Astor House, New York city, 29 June. The governors advised President Lincoln to fill the vacancy by a call for 300,000 volunteers. At Gov. Morgan's request, Gen. Arthur resumed his former work, resigned as inspector-general, and 10 July was appointed quartermaster-general. In his annual report, dated 27 Jan., 1863, he said: "Through the single office and clothing department to the state, in the city of New York, from 1 Aug. to 1 Dec., the space of four months, there were completely clothed, uniformed, and equipped, supplied with camp and garrison equipment, and transported from this state to the seat of war, sixty-eight regiments of infantry, two battalions of cavalry, and four battalions of artillery. He was engaged from 31 Dec. 1862, when Horatio Seymour succeeded Gov. Morgan, and his successor, Quartermaster-General S. V. Talcott, in his report of 31 Dec., 1863, spoke of the previous administration as follows: "I found, on entering on the discharge of my duties, a well-organized system of labor and accountability, for which the state is chiefly indebted to my predecessor, Gen. Chester A. Arthur. In his progress and his personal and unremitting exertion, at a period when everything was in confusion, reduced the operations of the department to a matured plan, by which large amounts of money were saved to the government, and great economy of time secured in carrying out the details of the same." Between 1862 and 1872 Gen. Arthur was engaged in continuous and active law practice—in partnership with Henry G. Gardner from 1862 till 1867, then for five years alone, and on 1 Jan., 1872, he formed the firm of Arthur, Phelps & Knevals. He was for a short time counsel for the department of assessments and taxes, but resigned the place on 1 Dec. During all this period he continued to take an active interest in all public affairs, and was a member of the central Grant club of New York; and became chairman of the executive committee of the republican state committee in 1873. On 20 Nov., 1871, he was appointed by President Grant collector of the port of New York, and assumed the office on 1 Dec.; was nominated to the senate 6 Dec., confirmed 12 Dec., and commissioned for four years 16 Dec. On 17 Dec., 1875, he was nominated for another term, and by the senate confirmed the same day, without reference to a committee—a courtesy never before extended to an appointee who had not been a senator. He was commissioned 18 Dec., and retained the office until 11 July, 1878, making his service about six and two-thirds years. During the state convention, held at Syracuse, 22 March, 1876, elected delegates to the national convention in favor of the nomination of Senator Conkling for president. The friends of Mr. Conkling in the state convention were led by Alonzo B. Cornell, then naval officer in the New York custom-house. A minority, calling themselves "Cabinet Republicans," nominated H. Bristow for president, were led by George William Curtis. At the national convention at Cincinnati, 14 June, sixty-nine of the New York delegates, headed by Mr. Cornell, voted for Mr. Conkling, and one delegate, Mr. Curtis, voted for Mr. Bristow. At the critical seventh ballot, however, Mr. Conkling's name was withdrawn, and from New York sixty-one votes were given in favor of Rutherford B. Hayes, against nine for James G. Blaine; and the former's nomination was thus secured. At the New York republican state convention to nominate a governor, held at Saratoga, 23 Aug., Mr. Cornell and ex-Gov. Morgan were candidates, and also William M. Evarts, supported by the reform republicans of the state. On 6 Dec. Gov. Morgan was nominated, and Gov. Morgan was nominated. In the close state and presidential canvass that ensued, Messrs. Arthur and Cornell made greater exertions to carry New York for the republicans than they had ever made in any other campaign; and subsequent Gen. Arthur's activity in connection with the republican nomination. On 6 March, 1877, Gen. Arthur became cabinet-secretary. At the presidential election in 1876, Gen. Arthur was nominated for the office of vice-president. At the presidential election in 1876, Gen. Arthur was nominated for the office of vice-president.
pended from office, and Edwin A. Merritt was designated as collector, and Silas W. Burt as naval officer, and they took possession of the offices. Their nominations were sent to the senate 3 Dec., 1878. On 15 Jan., 1879, Sec. Sherman communi-
cated to the senate a full statement of the facts that led to these suspensions, mainly criticisms of the management of the custom-house, closing with the declaration that the restoration of the suspended officers would create discord and conten-
tion, be unjust to the president, and personally em-
compassing to the secretary, and saying that, as Gen. Garfield, Mr. Sherman's predecessor, on Dec., 1879, his restoration would be temporary, as the president would send in another name, or sus-
pend him again after the adjournment of the senate. On 21 Jan., 1879, Collector Arthur, in a letter to Senator Conkling, chairman of the committee on commerce, before which the nominations were pending, made energy in support of the president's policies. Sherman's criticisms, completely demonstrating the honesty and efficiency with which the custom-house had been managed, and the good faith with which the policy and instructions of the president had been carried out. A fair summary of the merits of the ostensible issue is contained in Collector Ar-
thur's letter of March 31, 1879, from which the fol-
lowing extract is taken: "The essence of a correct civil service I understand to be: first, permanence in office, which of course prevents re-
movals except for cause; second, promotion from the lower to the higher grades, based upon good conduct and efficiency; third, prompt and thor-
ough investigation of all complaints, and prompt prompt and thorough investigations of all complaints, and prompt public relieves; fourth, the right to make challenge comparison with any department of the government under the present, or under any past, national administration. I am prepared to demonstrate the truth of this statement on any fair in-
vestigation." In a table appended to this letter Collector Arthur showed that during the six years he had managed the office the yearly percentage of remov-
als for all causes had been only 21 per cent. as against an annual average of 28 per cent. under his three immediate predecessors, and an annual average of about 24 per cent. since 1857, when Col-
lector Schell took office. Out of 125 persons who held office when he became collector, on 1 Dec., 1861; out of 2,000 in office in March, 1877, having been retained during his entire service, in making promotions, the uniform practice was to advance men from the lower to the higher grades, and all the appointments except two, to the one hundred positions of $2,000 salary, or over, were made in this method. The expense of collecting the revenue was also kept low; it had been, under his predecessors, between 1857 and 1861, $ 1, of one per cent. of the receipts; between 1861 and 1864, $ 15; in 1864 and 1865, $ 171; between 1866 and 1869, $ 171; in 1869 and 1870, $ 15; in 1870 and 1871, $ 171; and under him, from 1871 to 1877, it was $ 15, of one per cent. The influence of the admin-
istration, however, was sufficient to secure the confirmation of Mr. Merritt and Mr. Burt on 3 Feb., 1879, and the controversy was remitted to the republicans of New York for their opinion. Mr. Cornell was nominated for governor of New York 3 Sept., 1879, and elected on 4 Nov.; and Mr. Arthur was considered a candidate for U. S. senator for the term to begin 4 March, 1881.

Mr. Arthur resumed law practice with the firm of Arthur, Phelps, Knevals & Ramson. But he continued to be active in politics, and, in 1880, advocated the nomination of Gen. Grant to succeed President Hayes. He was a delegate at large to the Chicago convention, which met 2 June, and during the heated preliminary contest before the republican national committee, which threatened to result in the organization of two independent conventions, he conducted for his own party the convention with the controlling anti-third term delegates relative to the choice of a temporary presiding officer, and the arrangement of the preliminary roll of dele-
gates in the cases to be contested in the con-
vention. The result of the conferences was an agreement by which all danger was avoided, and the convention, on the opening of the convention, an at-
ttempt was made to secure suspensions of the un-
standing on the part of certain Grant delegates, to violate this agreement, he resolutely adhered to it, and insisted upon and secured its observance.

After the nomination, 10 June, of Gen. Garfield for president, by a combination of the anti-third term delegates, a general desire arose in the con-
vention to nominate for vice-president some advo-
cate of Grant and a resident of New York state. The New York delegation at once indicated their preference for Gen. Arthur, and before the roll-
call began the foregone conclusion was evident: he received 468 votes against 283 for all others, and the nomination was made unanimous. In this letter of Dec., 1877, he emphasized the right and the paramount duty of the nation to protect the colored citizens, who were enfranchised as a result of the southern rebellion, in the full enjoyment of their civil and political rights, including honesty and order, and excluding fraud and force, in popular elections. He also approved such measures as would base original appointments to office upon ascertained fitness, fill positions of responsibility by the promotion of worthy and efficient officers, and make the tenure of office stable, while not allow-
ing the acceptance of public office to impair the liberty or diminish the responsibility of the citizens. He also advocated a sound currency, popu-
lar education, such changes in tariff and taxation as would "relieve any overburdened industry or class, and enable our manufacturers and artisans to compete successfully with those of other lands," national works of internal improvement, and the development of our water-courses and harbors wherever required by the general interests of commerce. During the canvass he was chairman of the New York republican state commit-
tee. The result was a plurality for Garfield and Arthur of 21,000 in the state, against a plurality of 32,000 in 1876 for Tilden and Hendricks, the democratic candidates against Hayes and Wheeler.

Vice-President Arthur took the oath of office 4 March, 1881, and presided over the extra session of the senate that then began, which continued un-
til 20 May. The senate contained 37 republicans and 37 democrats, while Senators Mahone, of Virginia, and Davis, of Illinois, who were rated as independ-
ents, generally voted, the former with the republicans and the latter with the democrats, thus making a tie, and giving the vice-president the right to cast the controlling vote, which he several times had occasion to exercise. The session was exciting, and was prolonged by the efforts of the republicans to elect their nominees for secretary and sergeant-at-arms, against dilatory tactics em-
ployed by the democrats, and by the controversy over President Arthur's nomination for collector of the port of New York, of William H. Robertson, who had been the leader of the New York anti-third term delegates at the Chicago con-
vention. During this controversy the vice-presi-
dent supported Senators Conkling and Platt in their opposition to the confirmation. On 28 March he headed a remonstrance, signed also by the sena
tors and by Postmaster-General James, addressed to the president, condemning the appointment, and asking that the nomination be withdrawn. When the two senators hastily resigned and made their unsuccessful contest for a reflection by the legislature of New York, then in session at Albany, he exerted himself actively in their behalf during May and June. General Garfield was shot 2 July, 1881, and died 19 Sept. His cabinet announced his death to the vice-president, then in New York, and, at their suggestion, he took the oath as president on the 20th, at his residence, 123 Lexington avenue, before Judge John R. Brady, of the New York supreme court. On the 22d the oath was formally admin
distered again in the vice-president’s room in the
club at Washington by Chief-Justice Waite, and
President Arthur delivered the following inaugu
ral address:

“For the fourth time in the history of the re
public its chief magistrate has been removed by
death. All hearts are filled with grief and horror at the hideous crime which has darkened our land; and all are ready to share the protracted sufferings, his unyielding fortitude, the
example and achievements of his life, and the
pathos of his death, will forever illumine the pages
of our history. For the fourth time the officer
who has filled that position, and obedient to the
constitution to fill a vacancy so created is called to assume the
functions of the office. The wise and foreseeing the
most dire possibilities, made
sure that the government should never be imper
iled because of the uncertainty of human life.
Men may die, but the fabrics of our free institu
tions remain unshaken. No higher or more reassur
ing proof could exist of the strength and perma
nence of popular government than the fact that,
the constitutional successor is peacefully installed
without shock or strain, except the sorrow which
mourns the bereavement. All the noble aspirations of
my lamented predecessor which found expres
sion in his life, the measures devised and suggested
during his brief administration to correct abuses and
wrong, to conserve, to promote the general welfare, to
secure domestic security and maintain friendly and honorable rela
tions with the nations of the earth, will be

garned in the hearts of the people, and it will be
my earnest endeavor to profit and to see that the
nation shall profit by his example and experience.
Prosperity blesses our country; our fiscal policy is
fixed by law, is well guarded and generally ap
proved. No threatening issue mars our foreign
intercourse, and the wisdom, integrity, and thrift of
our people may be trusted to continue undisturbed
the present assured career of peace, tranquillity,
and welfare. The gloom and anxiety which have
enshrouded the country must make way for
cheerfulness. No legislative or political measure for speedy legisla
tion has been heard; no adequate occasion is
apparent for an unusual session of congress. The
constitution defines the functions and powers of the
executive as clearly as those of either of the other
two departments of the government, and he must
answer for the just exercise of the discretion it per
mits in the discharge of the duties it imposes.
Summoned to these high duties and responsibili
ties, and profoundly conscious of their magnitude and
gravity, I assume the trust imposed by the
constitution, relying for aid on Divine guidance
and the virtue, patriotism, and intelligence of the
American people.”

He also on the same day appointed Monday, 29
Sept., as a day of mourning for the late president.
On 23 Sept. he issued a proclamation convening
the senate in extraordinary session, to meet 10 Oct.,
in order that a president pro tem, of that body
might be elected. The members of the cabinet
were requested to retain their places until the regu
lar meeting of congress in December, and did re
main until the successor for the late president
Winegar, who, desiring to become a candidate
for senator from Minnesota, resigned from the
treasury 24 Oct. Edwin D. Morgan was nomi
nated and confirmed secretary of the treasury, but
declined the appointment; and Charles J. Folger,
of New York, was then nominated and confirmed,
was commissioned 27 Oct., and qualified 14 Nov.
Shortly after his accession to the presidency he
members of the cabinet of President Arthur, and the
dates of their commissions, were as follows: State
department, Frederick T. Frelinghuysen, of New
Jersey, 12 Dec., 1881; treasury, Walter Q. Gresham,
of Indiana, 23 Sept., 1884; Hugh McCulloch, of
Maryland, 28 Oct., 1884; war, Robert T. Lincoln,
of Illinois; 19 May, 1884; (President Lincoln’s suc
cessor); secretary of the treasury, William E. Chandler, of
New Hampshire, 19 April, 1882; interior, Henry M.
Teller, of Colorado, 6 April, 1882; attorney-gen
eral, Benjamin H. Brewster, of Pennsylvania, 19
Dec., 1881; postmaster-general, Timothy O. Howe,
of Wisconsin, 29 Dec., 1881 (died in office, 25 March,
1882); Walter Q. Gresham, 5 April, 1882; and
Frelinghuysen, McCulloch, Lincoln, Chandler, Teller,
Brewster, and Hatton remained in office until the
day of the presidential term, 4 March, 1885.

The prominent events of President Arthur’s ad
ministration, including his most important recom
mendations to congress, may be here summarized:

On 18 Nov., 1881, an invitation was extended to all the independent countries of North and South America to participate in a
peace congress, to be convened at Washington 22
Nov., 1882. The president, in a special message,
18 April, 1882, asked the opinion of congress as to
the extension of the treaty of friendly relations with
Great Britain and the United States, in the trust and
confidence of peace and good-will between the
countries for all the centuries to come, and espe
cially as a mark of the profound respect entertained
by the American people for the illustrious sovereign and gracious lady who sits upon the
British throne.” On 29 Nov., 1881, an invitation
was extended to all the independent countries of
North and South America to participate in a
peace congress, to be convened at Washington 22
Nov., 1882. The president, in a special message,

}
vastating war between Chili and the allied states of Peru and Bolivia. Its friendly counsel was offered in aid of the settlement of the disputed boundary-line between the two nations, and the disposition of the territory was probably influential in averting a war between those countries. On 29 July, 1882, a convention was made with Mexico for relocating the boundary between that country and the United States from the Rio Grande to the Pacific, and on the same day an agreement was also effected permitting the armies of either country to cross the boundary in pursuit of hostile Indians. A series of reciprocal commercial treaties with the countries of America to foster an unhampered movement of trade was recommended. Such a treaty was made with Mexico, 20 Jan., 1883, Gen. U. S. Grant and Mr. Wm. H. H. Seward being the U. S. commissioners, and was ratified by the senate 11 March, 1884. Similar treaties were made with Santo Domingo 4 Dec., 1884: and 18 Nov., 1884, with Spain, relative to the trade of Cuba and Porto Rico, both of which, before action by the senate, were withdrawn by President Cleveland, who, in his message of 8 Dec., 1885, pronounced them inexpedient. In connection with commercial treaties President Arthur and Mr. Wm. H. Seward urged the United States to extend reciprocity to the American countries to secure the adoption of a uniform currency basis, and as a step toward the general remonetization of silver, provision for increased and improved consular representation in the Central American states was urged, and the recommendation was accepted and acted upon by Congress. A Central American commission was appointed, under the act of congress of 7 July, 1884, and proceeded on its mission, guided by instructions containing a statement of the general policy of the government for enlarging its commercial intercourse with American states. Reports from the commission were submitted to congress in a message of 13 Feb., 1885. Negotiations were conducted with the republic of Colombia for the purpose of renewing and strengthening the obligations of the United States as the sole guarantor of the integrity of Colombian territory, and of the neutrality of any interoceanic canal to be constructed across the isthmus of Panama. By cor- respondence upon this subject, as early as 1880, the British government had shown that the provisions of the Clayton-Bulwer treaty of 19 April, 1850, can not be urged, and do not continue in force in justification of interference by any European power, with the right of the United States to exercise exclusive control over any route of isthmus transit, in accordance with the spirit and purpose of the so-called "Monroe doctrine." As the best and most practicable means of securing a canal, and at the same time protecting the paramount interests of the United States, a treaty was made with the republic of Nicaragua, 1 Dec., 1884, which authorized the United States to construct a canal, railway, and telegraph line across Nicaraguan territory, to be conducted under the auspices of the republic of Nicaragua. This treaty was rejected by the senate, but a motion was made to reconsider the vote. Before final action had been taken it was withdrawn, 12 March, 1885, by President Cleveland, who withheld it from re-submission to the senate, and in his message of 8 Dec., 1885, expressed his unwillingness to assert for the United States any claim of paramount privilege of ownership or control of any canal across the isthmus. Satisfaction was obtained from Spain of the old claim on account of the "Masonic," an American vessel, which had been seized at Manilla unjustly, and under circumstances of peculiar severity. From the same government was also secured a recognition of the conclusiveness of the judgments of the U. S. courts naturalizing citizens of Spanish nativity. From the British government full recognition of the claims and immunities of naturalized American citizens of Irish origin was obtained, and all such that were under arrest in England or Ireland, as suspects, were liberated. Notice was given to England, under the joint resolution of congress of 3 March, 1883, of the termination of the fishery clauses of the treaty of Washington, and a complete scheme for re-organizing the extra-territorial jurisdiction of American consuls in China and Japan, and another for re-organizing the whole consular service, were submitted to congress. The former recommendation was adopted by the senate. The balance of the Japanese indemnity fund was returned to the Senate of the Republic of China by act of 3 March, 1885. A bill that was passed by congress prohibiting the immigration of Chinese laborers for a term of twenty years was vetoed, 4 April, 1882, as being a violation of the treaty of 1880 with China, which permitted the limitation or suspension of immigration, but forbade its absolute prohibition. The treaty with Japan was supplemented by an extension of immigration for ten years, was passed 6 May, 1882, which received executive approval, and also an amendatory act of 5 July, 1884, Outstand- ing claims with China were settled, and additional regulations of the opium traffic established. Friendly and commercial intercourse with Corea was opened under the most favorable auspices, in pursuance of the treaty negotiated on 22 May, 1882, through the agency of Com. R. W. Shufeldt, U. S. N. The friendly offices of the United States were extended to Liberia in aid of a settlement, favorable to that republic, of the dispute concerning its boundary-line, with the British possession of Sierra Leone. On 27 Feb., 1883, commission was appointed by the United States, and the commission was held at Washington, 1 Oct. to 1 Nov., 1883. In response to the appeal of Cardinal John McCloskey, of New York, the Italian government, on 4 March, 1884, was urged to exempt from the sale of the property of the propaganda the American college in Rome, established mainly by contributions from the United States, and in consequence of this interposition the college was opened under the most favorable auspices, in pursuance of the treaty of 1882. On 3 Aug., 1882, a law was passed for returning convicts to Europe, and on 26 Feb., 1885, importation of contract-laborers was forbidden. The suspension of the coining of standard silver dollars, and the redemption of the trade dollars, were repeatedly recommended. The repeal of the stamp taxes on matches, proprietary articles, playing-cards, bank checks and drafts, and of the tax on surplus bank capital and deposits, was recommended. These taxes were repealed by act of congress of 3 March, 1883: and by executive order of 25 June, 1883, the number of internal revenue collection districts was reduced from 120 to 83. The
tax on tobacco was reduced by the same act of con-
gress; and in his last annual message, of 5 Dec.,
1884, the president advised the repeal of all internal
revenue laws except those distilled spirit is-
fermented liquors. Congress was advised to un-
take the revision of the tariff, but “without the
abandonment of the policy of so discriminating in
the adjustment of details as to afford aid and pro-
tection to American labor.” The course advised
was the organization of a tariff commission, which
was authorized by act of congress of 15 May,
1884. The report of the commission submitted to
congress 4 Dec. was made the basis of the tariff re-
vision act of 3 March, 1885. On 12 July, 1882, an act
became a law enabling the national banks, which
were then completing their twenty-year terms, to
extend their corporate existence. Overdue five per
cent, bonds to the amount of $293,573,750, and
six per cent, bonds to the amount of $829,561,050, and
were continued (except about $56,000,000 which
were paid) at the rate of 34 per cent, interest. The
interest-bearing public debt was reduced $478,785,
950, and the annual interest charge $29,834,880
during the presidential term. On 1 July, 1882,
“An act to regulate the carriage of passengers by
sea,” was passed Congress; the act was not accurately
phrased, although the object was admitted to be
meritorious and philanthropic. A modified bill
passed congress, and was approved 2 Aug. The
attention of congress was frequently called to the
decline of the American merchant marine, and
legislation was recommended for its restoration,
and measures to create the opportunity of new steamships under the U. S. flag. In compliance
with these recommendations, the following laws
were enacted: 26 June, 1884, an act to remove
constant barriers from American shipping; 5 July,
1884, an act creating a bureau of navigation, under
charge of a commissioner, in the treasury depart-
ment; and 3 March, 1885, an amendment to the
postal appropriation bill appropriating $800,000
for contracting with American steamship lines for
the transportation of foreign mails. Reasonable
national regulation of the railways of the country
was favored, and the opinion was expressed that
congress should protect the people at large in their
inter-state traffic against acts of injustice that the
separate States might in their localities be disposed
to adopt. The attention of congress was often called to
the necessity of modern provisions for coast de-
fence. By special message of 11 April, 1884, an
annual appropriation of $1,500,000 for the arma-
ment of fortifications was recommended. In the last
annual message an expenditure of $690,000,000, one
tenth to be appropriated annually, was recommend-
ed. In consequence, the fortifications board was
created by act of 3 March, 1885, which made an
elaborate report to the 49th congress, recommend-
ing a complete system of coast defence at an ul-
timate cost estimated at $193,577,800. The gun-
boat yard, consisting of army and navy officers,
appointed under the act of 3 March, 1885, visited
the coast and made contracts for terms of years with American manu-
facters to produce the steel necessary for heavy can-
non, and recommending the establishment of one
army and one navy gun factory for the fabrication of modern ordnance. This plan was commended
to congress in a special message 30 March, 1884, and
in the above-mentioned message of 11 April;
also in the annual message of that year. In the
annual message of 1881 the improvement of Missis-
sippi river was recommended. On 17 April, 1882,
by special message, congress was urged to provide for
“closing existing gaps in levees,” and to adopt
a system for the permanent improvement of the
navigation of the river and for the security of the
valley. Special messages on this subject were also
sent 8 Jan. and 2 April, 1884. Appropriations were
made of $88,500,000 for permanent work; and in
1882 of $855,000, and in 1884 of over $150,000, for
the relief of the sufferers from floods, the amount in
the latter year being the balance left from $500,000
appropriated on account of the floods in the Ohio.
These relief appropriations were expended under the
presidential supervision of the secretary of war. On
Aug., 1882, the president vetoed a river-and-harbor
bill making appropriations of $18,743,875, on the
ground that the amount greatly exceeded “the
needs of the country” for the then current fiscal
year, and because it contained “appropriations for
purposes not for the common defence or general
welfare,” which did not “promote commerce
among the states, but were, on the contrary, entire-
ly for the benefit of the particular localities” where it was “proposed to make the improvements.”
The bill, on 2 Aug., passed Congress over the veto
by 122 years to 59 in the house, and 41 years to
16 in the senate. In connection with this
subject it was suggested to congress, in the annual
message, the creation of a board of general super-
vision to be authorized by the president, to adopt
appropriate means for the purpose of locating on
land selected for the Indians and other purposes;
appropriations were made for the purpose of calling
Lake Michigan by way of Illinois river with the
Mississippi. Unlawful intrusions of armed settlers
into the Indian territory for the purpose of locat-
ing upon lands set apart for the Indians were pre-
vented, or the intruders were expelled by the army.
On 2 July, 1884, the president vetoed the bill to
restore to the national park on the retired list
Mag. Gen. Fitz- John Porter, who, on the sentence
of a court-martial, approved by President Lincoln
27 Jan., 1863, had been dismissed for disobedience
of orders to march to attack the enemy in his
front during the second battle of Bull Run. The
reasons assigned for the veto were, (1) that the con-
gress had no right “ to impose upon the president
the duty of disannulling an act of Congress;
(2) that the bill was in effect an annulment of a
final judgment of a court of last resort, after the lapse of many years, and on insufficient evidence. The
veto was overruled in the house by 168 yes to 78
nays, but was sustained in the senate by 27 to 25.
A new naval policy was adopted prescribing a
reduction in the number of officers, the elimina-
tion of drunkards, great strictness and impartiality
in discipline, the discontinuance of extensive re-
pairs of old wooden ships, the diminution of navy-
yard expenses, and the beginning of the construc-
tion of a new navy of modern steel ships and guns
according to the plans of Captain Preble. The
building of such vessels, the cruisers "Chicago," "Boston," and "Atlanta," and a
despatch-boat, "Dolphin," with their armaments,
were designed in this country and built in
American workshops. The gun foundry board
referred to above was originated, and its reports
were printed with that of the department for 1885.
An urgent call for progress in the reconstruction of the navy, the granting of authority for at least three additional
steel cruisers and four gun-boats, and the finishing of
the four double-turreted monitors. Two cruis-
ers and two gun-boats were authorized by the act
of 3 March, 1885. An Arctic expedition, consisting of the steam whalers "Thetis" and "Bear," together with the ship "Alert," given by the British admiralty, was fitted out and despatched under the command of Commander Winfield Scott Schley for the purpose of Lieut. A. W. Greely, of the United States army, with his party had been engaged since 1881 in scientific exploration at Lady Franklin bay, in Grinnell land: and that officer and the few other survivors were rescued at Cape Sabine 22 June, 1884. On recommendation of the president, an act of congress was passed directing the reduction of the troops of the department of the frontier and political rights. The subject of reform in the methods of the public service, which had been discussed by the president in his letter of 23 Nov., 1877, while collector, to Sec. Sherman, and in his letter of 15 July, 1889, accepting the nomination for vice-president, was fully treated in all his annual messages, and that of the several departments. The final dissolution of the confederacy, and the entrance of the several states into the Union, caused the war service at the west was increased at reduced cost. The foreign mail service was improved, the appropriation of $800,000, already alluded to, was made, and various postal conventions were negotiated.

Recomm mended were made for the revision of the laws fixing the fees of jurors and witnesses, and for empowering the attorney-general to fix the compensation of district attorneys and marshals. The prosecution of persons charged with frauds in connection with the star-route mail service was pressed with vigor (the attorney-general appearing in person at the principal trial), and resulted in completely breaking up the vicious and corrupt practices that had previously flourished in connection with that service. Two vacancies on the bench of the supreme court were filled—one on the death of Nathan Clifford, of Maine, by Horace Gray, of Massachusetts, commissioned on 20 Dec., 1881. For the vacancy occasioned by the retirement of Ward Hunt, of New York, Roscoe Conkling was nominated 24 Feb., 1883, and instructed by the department; but on 3 March he declined the office, and Samuel Blatchford, of New York, was appointed and commissioned 23 March, 1882.

Measures were recommended for breaking up tribal relations of the Indians by allotting to them land in severalty, and by extending to them the laws applicable to other citizens; and liberal propensions for the education of Indian children were advised. Peace with all the tribes was preserved during the whole term of the administration. Stringent legislation against polygamy in Utah was recommended, and under the law enacted 22 March, 1882, many polygamists were indicted, convicted, and punished. The Utah commission, to aid in the better government of the territory, was appointed under the same act. The final recommendation of the president in his messages of 1883 and 1884 was, that congress should assume the entire political control of the territory, and govern it through commissioners. Legislation was urged for the preservation of the valuable star-route mail service, and for the support of the main. National aid to education was repeatedly urged, preferably through setting apart the proceeds of the sales of public lands.

A law for the adjudication of the French spolia-
to the republican cause and candidates. The national convention, in its resolutions, declared that "in the administration of President Arthur we recognize a wise, conservative, and patriotic policy, under which the country has been blessed with remarkable prosperity, and we believe his eminent services are entitled to and will receive the hearty approval of every citizen." The conventions in all the states had also unanimously passed resolutions commending the administration. 

Mr. Arthur, b. 29 Nov., 1830, and Ellen Herndon of Fredericksburg, Va., who died 12 Jan., 1880, leaving two children, Chester Alan Arthur, b. 25 July, 1863, and Ellen Herndon Arthur, b. 21 Nov., 1871. Their first child, William L. H. Arthur, was b. 10 Dec., 1860, and d. 8 July, 1863. Mrs. Arthur was the daughter of Commander William Lewis Herndon, of the U. S. navy, who, in 1817-22, explored the Mississippi river under orders of the government. He perished in a gale at sea, 12 Sept., 1857, on the way from Havana to New York, while in command of the merchant-steamer, "Central America." (See Herndon.)

In person, Mr. Arthur was tall, large, well-proportioned, and of distinguished presence. His manners were easy and dignified. He had a well-developed body, large and strong, and was robust in health and social life, and warmly beloved by his personal friends. He conducted his official intercourse with unvarying courtesy, and dispensed the liberal hospities of the executive mansion with ease and dignity, and in such a way as to meet universal commendation from citizens and foreigners alike. He had a full and strong mind, literary taste and erudition, and a remarkable memory, illustrated by analogy and anecdote. He reasoned coolly and logically, and was never one-sided. The style of his state papers is simple and direct. He was eminently conscientious, wise, and just in purpose and act as a public official: had always the courage to follow his deliberate convictions, and remain unmoved by impertinence or attack. He succeeded to the presidency under peculiarly distressing circumstances. The factional feeling in the Republican party, which the year before had resulted in the nomination of Gen. Garfield for president as the representative of one faction, and of himself for vice-president as the representative of the other, had measurably subsided during the canvass. The new administration was never immediately after the inauguration of the new administration, and a fierce controversy was raging when the assassination of President Garfield convulsed the nation and created the gravest apprehensions. Cruel misjudgments were formed and expressed by men who would now hesitate to admit them. The long weeks of alternating hope and fear that preceded the president's death left the public mind perturbed and restless. Doubt and uneasiness were everywhere apparent. The delicacy and discretion displayed by the vice-president had compelled approval, but had not served wholly to disarm prejudice, and when he took the murdered president's place the whole people were in the hands of a faction which they themselves had stood oath toward exalting the disloyalty of which, doubtless, he was most painfully conscious. All fears, however, were speedily and happily dispelled. The new president's inaugural was explicit, judicious, and reassuring, and his purpose not to administer his high office in the spirit of former faction, although by it he lost some friends and much toward healing the dissension, was within the dominant party. His conservative administration of the government commanded universal confidence, preserved public order, and promoted business activity. If his conduct of affairs be criticised as lacking aggressiveness, it may confidently be replied that aggressiveness would have been unfortunate, if not disastrous. Rarely has there been a time when an indirect president could have wrought more mischief. It was not a time for showy exploits or brilliant experiment. Above all else, the people needed rest from the strain and excitement into which the assassination of their president had plunged them. The course chosen by President Arthur had the approval of the majority of the country. If apparently negative in itself, it was positive, far-reaching, and most salutary in its results. The service which at this crisis in public affairs he thus rendered to the country must be accounted the greatest of his personal achievements, and the most important result of his administration. As such, it should be placed in its true light before the reader of the future, and in this spirit, for the purpose of historical accuracy only, it is here given the prominence it deserves. His administration, considered as a whole, was responsive to every national demand, and stands in all its departments substantially without assault or criticism.

He died suddenly, of apoplexy, at his residence, No. 128 Broad avenue, New York, on the morning, 18 Nov., 1886. The funeral services were held on the following Monday, at the Church of the Heavenly Rest. President Cleveland and his cabinet, Chief-Justice Waite, ex-President Hayes, James G. Blaine, Gen. Sherman, Sheridan, and Schofield, and the surviving members of President Arthur's cabinet, were in attendance. On the 24th day of December, the body was conveyed to Albany, where they were placed by the side of his wife in the family burial-place in Rural cemetery.

**ARTHUR, Sir George,** Bart., British statesman, b. in Plymouth, England, 21 June, 1784; d. 19 Sept., 1854. He entered the army in 1804, and served in Sir James Craig's expedition to Italy in 1805. The following year, while in Egypt, he was severely wounded in the attack upon Rosetta. He served as a captain under Sir James Kempt in Sicily in 1808, and in the Walcheren expedition in 1809, in which latter he so greatly distinguished himself that he was thanked in general orders, was appointed a deputy assistant adjutant-general on the field, and upon his return to England had the honor of being the first officer to be breveted major-general. He was also appointed and received a sword of honor. He was afterward military secretary to Sir George Don, governor of Jersey, and in 1812, having attained his majority in the 7th West India regiment, he joined it in Jamaica, and within a short time was appointed assistant quartermaster-general of the forces in that island. In 1814 he was appointed lieutenant-governor of British Honduras, holding at the same time the rank of colonel on the staff, thus exercising the military command as well as the civil government. While acting in this capacity Col. Arthur suppressed a serious outbreak of the slave population of Honduras. His despatches relative to the revolt and the subjugation of the附件, the attention of Mr. Wilberforce and other philanthropists, and contributed in no slight degree to the subsequent abolition of slavery within the British empire. In 1829 he left Honduras for England, and in 1828 was appointed lieutenant-governor of Van Diemen's Land (then the principal British penal colony), having the command of the military forces as well as his remaining to his other duties. His attempts at introducing reforms in the transportation system were not successful, as the colonists and their friends at home, who were determined to put an end to the system altogether, never allowed his
plans a fair trial. He returned to England in March, 1857, was knighted, and at the close of that year was appointed lieutenant-governor of Upper Canada, having anticipate in the interim. The invasion was no more successful than the preceding attempts at revolt, and much credit was awarded to Sir George Arthur for his successful arrangements for the defence of the colony. The union of Upper and Lower Canada took place in 1841, Lord Sydenham being the first governor-general, and at his request Sir George Arthur conferred; and gave his hearty support to the project of a railway line from Bombay to Callian, which may be regarded as the germ of the great Indian peninsula railway, while during his administration the reclamation of the shore of the island of Bombay was projected. On his return to England in 1846 he was made a privy counsellor and the colonel of the 50th Queen’s own regiment.

ARTHUR, Timothy Shay, author, b. near Newburg, N. Y., in 1809; d. in Philadelphia, 6 March, 1885. When he was about eight years of age his parents moved to Baltimore, Md., where he received a little education, was apprenticed to a trade, and was a clerk for several years. In 1836 he visited the west as the agent of a banking concern. He had meantime educated himself by reading and study, and when he returned to Baltimore he became editor of “The Athenaeum.” In 1831 he removed to Philadelphia, where the rest of his life was passed, and where, in 1832, he founded “Arthur’s Home Magazine,” of which he was editor to the very week of his death. He was a voluminous writer of tales of domestic life, and also prepared, with the aid of W. H. Carpenter, a series of histories of the different states of the union. The entire number of volumes of Mr. Arthur’s works exceeds one hundred, and of these more than half have been published in England, where they have had a large circulation. Among his books are “Lights and Shadows of Real Life,” “Tales for Rich and Poor” (6 vols.), “Library for the Household” (12 vols.), “Ten Nights in a Bar-Room,” and “Steps to Heaven.” His stories all have some moral end in view, many of them being devoted to the support of the temperance cause. Although they do not possess great merit as literature, they have been widely read and gained him much popularity. His book, “The Leather Time-Upon-Time” (1853), was sometimes verging on spiritualism and Swedenborgianism.

ARTHUR, William, clergyman, b. in Antrim, Ireland, in 1796; d. in Newtonville, near Albany, N. Y., 27 Oct., 1875. He was graduated at Belfast college, came to the United States, studied law for a short time, and was then called to the Baptist ministry. After preaching in Vermont and western New York, he was settled as pastor of the Calvary Baptist church of Albany, N. Y., where he remained from 1855 to 1863. He afterward removed to Schenectady, where he published a magazine called the “Antiquarian,” to whose pages he contributed much curious learning on a variety of topics. He published an “Etymological Dictionary of Family and Christian Names” (New York, 1857), which was favorably received both in this country and in Europe. During the last ten years of his life he lived in retirement, preaching occasionally, and giving much time to literary pursuits. Dr. Arthur was noted for his attainments in the classics and in history, both sacred and profane. His son, CHARLES A. ARTHUR, was twenty-first president of the United States.

ARTIGAS, José (ar-tie-gas), a South American soldier, b. in Montevideo, 19 June, 1764; d. in Paraguay, 23 Sept., 1850. He was the son of a wealthy landed proprietor, and for a time led an adventurous life as a smuggler and in the light cavalry of the provinces, but on account of some difficulty with the governor passed in 1811 into the service of the junta of Buenos Ayres, then in insurrection against Spain. At the head of a band of gauchos he defeated the Spaniards in several encounters, and vigorously supported the republican cause. He was besieged by Portuguese troops from Brazil, who then occupied Montevideo. But, being passionate and scheming, he soon acted independently, and finally detached his men from the besieging army, whereupon Posadas, director of the junta, outlawed him and set a price upon his head. But the gauchos flocked to his standard, and Artigas, having defeated the besieging forces, obligingly wrote to cede to him the whole of Uruguay (1814). He then compelled the Portuguese to abandon their attempt to regain possession of Montevideo, which had surrendered. He now acted as dictator in Uruguay, and in 1815 made an unsuccessful attempt against Buenos Ayres. After various contests he was twice defeated, in 1819 and 1830, and fled to Paraguay, where Dr. Francia, the dictator, banished him to Candelaria. Here he devoted himself to husbandry and philanthropic work.

ARVEJO, Rafael (ar-ra'welo), Venezuelan statesman, b. in Valencia, 1 June, 1784; d. 16 Oct., 1892. While quite young he went to Bogotá, where he finished his education. In his own country he soon became noted for his political and literary abilities. He was provincial governor, minister of foreign affairs, and president of the republic of Venezuela, ad interim. But his greatest fame in that country he owed to his satirical poems and epigrams, which are very popular.

ARZAO, Antonio Rodriguez (ar-thah'-o), Brazilian traveler, who in company with Antonio Suarez explored in 1714 the deserts of Sào Paulo, where they discovered a large region rich in gold and diamonds, which the Indians called Hyvii-turuy (“place beaten by winds”), but the discoverers gave it the name of Cerro do Frío. Several other members of Arzao’s family made similar expeditions and discoveries in the interior of Brazil.
ASBOTH, Alexander Sandor, soldier, b. in Keszthely, Hungary, 18 Dec., 1811; d. in Buenos Ayres, S. A., 21 Jan., 1868. He was educated in Oldenburg, and served for some time as a courier in the Austrian army. Subsequently he studied law at Presburg, and then, turning his attention to engineering, was employed upon various important works in the Banat. He served with Kossuth in the Hungarian war of 1848-9, and participated in the battles of Tomasovaci, Kapolna, and Nagy Sarlo. He followed Kossuth to Turkey, shared his fortunes, and on Kossuth’s release came with him to the United States in 1851, where he soon became a citizen. He pursued various occupations, and on the outbreak of the civil war in 1861 offered his services to the government. In July he was sent to Missouri as chief of staff to Gen. Fremont, and on 20 Sept. was appointed brigadier-general and commanded the Whley, in Fremont’s western campaign. He was next assigned to the command of a division in Gen. Curtis’s army, and during the Arkansas campaign occupied Bentonville and Fayetteville. He participated in the battles of Pea Ridge, and was severely wounded. In 1863 he was placed in command of Columbus, Ky., and in August of the same year was assigned to the district of west Florida, with headquarters at Fort Pickens. He was badly wounded in the battle of Marianna, 27 Sept., 1864, his left cheek-bone being broken and his left arm fractured in two places. For his services in Florida he was brevetted major-general 13 March, 1865, and resigned in the following August. In 1866 he was sent as U.S. minister to the Argentine Republic and Uruguay, where he died in consequence of the wounds in his face.

ASBURY, Francis, M. E. missionary bishop, b. in Handsworth, Staffordshire, England, 20 Aug., 1743; d. in Spottsylvania, Va., 21 March, 1816. His parents, devout Methodists, must have been among the earlier disciples of Wesley.

This was in 1767, almost before the spirit of political discontent was making itself felt in the American colonies, where Wesleyanism had already been planted in a congenial soil. In 1771, Asbury by that time had begun to show his qualities as an executive as well as a preacher, was designated by Wesley as a missionary to America, and, with the Rev. Richard Wright as his companion, he landed at Philadelphia 27 Oct., 1771. The first Methodist meeting-house in America was only three years old, and Wesley and Asbury together would have about 300 communicants in the country, these being mainly in New York and Philadelphia. During the following year Asbury was appointed “general assistant in America,” with power of supervision over all the preachers and societies, but was superseded in 1773 by an older minister, Mr. Thomas Rankin. By this time the spirit of revolution was abroad, and Asbury, however, with the true spirit of an apostle, remained at his post. With prophetic vision he recognized the opportunity of his chosen church, and determined to stand by it during a period that threatened its foundations. His political sympathies were fully with the patriots, and when most of his contemporaries, and other Methodists, fell under suspicion of toryism, because of their refusal to take the prescribed oath of allegiance, they were conscientiously opposed to all oaths. Several writs were served upon Methodist preachers; but Mr. Asbury’s prudence and address were such that he avoided trouble until 1776, when he was compelled to leave the country. On 3 March, 1778, he considered himself in such danger that he took refuge in the house of Judge Thomas White, of Delaware, and there remained practically a prisoner for two years before he ventured freely to resume his labors. To use his own words, it was “a season of the most active, the most useful, and the most suffering part of my life.” At the authority of the Ohio conference, the “non-jurors,” as they called themselves, were acting from religious, not political, motives, and the itinerants were permitted to resume their circuits.

On the restoration of peace it became evident to the American Methodists that the organization of an independent church was necessary. Until this time Wesley and the members of the Church of England, which was owned by the state, had firmly maintained its ecclesiastical relations and recognized only the bishops of the “establishment” as authorized to administer the sacraments. He became convinced, however, that his American disciples would not long submit to such leading-strings, and proceeded wisely to study the question of presbyter and bishop, reaching the conclusion that in the primitive church the two offices were identical. He therefore assumed the office of bishop, formally consecrated the Rev. Thomas Coke, LL.D., of Oxford, and sent him to America to perpetuate the apostolic succession in its Wesleyan aspect on this side of the water. At a conference held in 1784, Dr. Coke, with the advice and consent of Wesley’s instructions, consecrated Francis Asbury joint bishop with himself over the American church, which forthwith adopted as its official designation “The Methodist Episcopai Church in the United States of America.” From this time until he was no longer able to travel, Bishop Asbury’s work was most complete, and he deserves to rank with the great evangelists of all time. The civil history of the United States might have been very different had Asbury failed to be on the ground to assume the office. Like a good general, he even kept his skirmishers—that is, his “circuit riders”—abreast with the leading
pioneers, and he himself, frequently under escort of a score or two of frontiersmen to guard against Indians, rode to and fro, often in the advance and always near enough to see what was going on. The first ordained by the Methodist church by the power exercised by him, rude, unlettered men, many of these itinerants were, and the bishop himself had but a slender equipment of scholastic knowledge. Nevertheless, they largely shaped the destiny of the west. There is nothing authentic in frontier literature more romanti.c than "Asbury's Journals" (3 vols., New York, 1852), with their unconscious record of a zeal and self-sacrifice that rivals anything in history. In spite of his defective early education, he managed to acquire a knowledge of Greek and Hebrew, and, contrary to the usual impression, laid during the first year of his episcopate the foundation of the first Methodist college, that at Abingdon, Md. Annually he rode on horseback or by conveyances about 6,000 miles, and this for the most part, over the rough roads and through the nearly trackless forests that covered the continent beyond the narrow belt of sea-coast settlements. In character and temperament he was bold, aggressive, enthusiastic, gentle in manners, but of unflinching firmness. His native wis.dom, combined with the approach of artificial training, and lent him an insight that was well-nigh infallible. Wesley could never have done what Asbury did. Indeed, he tried to do it, and failed, not comprehending the spirit of freedom that was abroad in the American air. Asbury was instantly in sympathy with that spirit, and he succeeded. He knew the ability with which he fulfilled his mission. The noblest monument to his memory is the great church, which grew under his personal leadership from a scattered band of 316 members and four preachers to a powerful denomination 244,000 strong, controlled by bishops, 2,000 local preachers, and 700 missionaries. See "Asbury's Journals" (New York, 1851); Bangs's "History of the Methodist Episcopal Church" (1839); Strickland's "Life of Asbury" (1838); Wakely's "Heroes of Methodism" (1859); Stevens's "Memorials of Methodism"; "Centenary of Methodism" (1866); and Larabee's "Asbury and his Co-laborers" (2 vols., Cincinnati, 1853).

ASGILL, Sir Charles, soldier, b. in England, July 13, 1755; d. in London, March 10, 1812. He was the son of Sir Charles Asgill, a London alderman, first baronet of that name. When sixteen years of age he entered the 1st foot guards, and in 1781 became a captain. He served in the United States under Cornwallis, and was included in the surrender at Yorktown. Particular interest is attached to this young officer on account of his narrow escape from death. Capt. Joseph Huddy, of the New Jersey line, had been captured, falsely charged with having been concerned in the death of Philip White, a desperate Tory, who was killed while trying to escape from his guard, and then hanged by the British troops. In retaliation, Washington was authorized by congress to select by lot from among his prisoners an officer of equal rank to be executed immediately, and Asgill was chosen, but his death was postponed while an investigation as to the exact cause of Capt. Huddy's execution was being made in the British army. Meanwhile six months elapsed, and, in response to an appeal made by the queen, Marie Antoinette of Austria, his wife, the great tragedian of this age, Kate Asgill, was placed in liberty. After his return to England, he served in Flanders, and later was in command of the garrison in Dublin during the rebellion in Ireland. He became colonel of the 11th regiment, and in 1807 was made general in the British army. On the death of his father he succeeded to the estate and the baronetcy. His story was made the ground-work of a tragic drama by Madame de Sevigné.

ASHBERNE, Charles Arthur, geologist, b. in Philadelphia, Pa., 9 Feb., 1851; d. in Pittsburgh, Pa., 24 Dec., 1889. He was graduated at the University of Pennsylvania in 1874. During the summer of 1872 he was engaged on the survey of Delaware river, and on his graduation he accepted a place in the light-house survey service. In 1874 the geological survey of Pennsylvania was reorganized and, with the appointment of Prof. P. L. Meade, geologist, and Mr. Ashburner at once resigned from the U. S. service to become an assistant on the survey. He was actively employed during the latter part of 1874 in the surveys of Mifflin and Juniata cos., and in 1875 was appointed assistant geologist, with charge of the surveys in Meckan, Elk, Forest, and Cameron cos., and in 1880 he was appointed geologist in charge of the survey of the anthracite coal fields, where he originated a method for surveying and representing the geology of this great coal-bed which has received the approbation of mining engineers and geologists both in the United States and in Europe. The ability and skill with which this undertaking was performed led to his being appointed in 1885 geologist in charge of all the office and field work of the survey. Mr. Ashburner was a member of the American Philosophical Society, the American Institute of Mining Engineers, and other scientific societies, to whose proceedings he contributed valuable papers. He also contributed to the scientific and technical journals, and presented papers before the academy of Philadelphia and the geological survey. In 1889 he was made Sc. D.

ASHBURTON, Lord, Alexander Baring, statesman, b. in England, 27 Oct., 1774; d. at Longleat, the seat of the marquis of Bath, 13 May, 1848. He was the second son of Sir Francis Baring, described by Lord Erskine as "the first merchant in the world," and was educated with a view to succeeding his father in the great mercantile house of Baring Brothers & Co. Sir Francis, foreseeing the vast commercial interests involved, sent Alexander to America to study the commercial outlook and enlarge the business relations of the house. In 1798 he married the daughter of senator Wil.liam Bingham, of Pennsylvania, and shortly afterward returned to England and became the head of the house when his father died, in 1810. Two years before this he had published a tract entitled "An Inquiry into the Causes and Consequences of the Orders in Council, and an Examination of the Conduct of Great Britain toward the Neutral Com- mercial Commerce of America." This was the first great political pamphlet. After the British, Asgill be set at liberty. After his return to England, he served in Flanders, and later was in command of the garrison in Dublin during the rebellion in Ireland. He became colonel of the 11th regiment, and in 1807 was
ASHBY

ASHLEY

fitions. Mr. Baring was raised to the peerage as Lord Ashburnon in 1835, and in 1812 he was sent as special minister to the United States to negotiate a treaty adjusting the northeastern boundary. Daniel Webster was at that time secretary of state. The two countries were on the verge of war, but through the friendly consultations of these two statesmen an amicable arrangement was reached, which was ratified 9 Aug., 1812, and is known as the "Ashbury Treaty." See Brougham's "Speech in the House of Lords on the Ashburton Treaty" (London, 1843); Featherstonhaugh's "The War between the United States and England" (London, 1843); and Lord Palmerston's "Speech in the House of Commons on the Ashbury Treaty," quoted in Daniel Webster's works.

ASHBY, Turner, soldier, b. at Rose Hill, Fauquier co., Va., in 1824; killed in action near Harrisonburg, 6 June, 1862. He was a grandson of Capt. Jack Ashby, who commanded a company in the 3d Virginia regiment in the Revolutionary war. During early life he was a grain-dealer in Markham, Va., and afterward a planter and local politician. On the breaking out of the civil war he raised a regiment of cavalry, and, being a fine horseman, a soldier by nature, and possessed of remarkable personal durance, he soon distinguished himself. He was one of the first to offer the Confederate provisional army in 1862, but met his death shortly afterward in a skirmish preceding the battle of Cross Keys, Va.

ASHIE, John, soldier, b. in Grovelly, Brunswick co., N. C., in 1729; d. in Sampson co., 24 Oct., 1781. He was a member of the colonial assembly for several years, and its speaker from 1766 to 1768. He was early compelled by the aid of an armed force to compel the stamp-master to resign. In 1771 he assisted Gov. Tryon in suppressing the outbreak of the regulators, although afterward he became a zealous wig. He warmly espoused the cause of the colonists at the beginning of the war, and in 1753, at the head of 500 men, participated in the attack and destruction of Port Johnson, for which he was publicly denounced as a rebel. He was a member of the first provincial congress of North Carolina, and subsequently raised and equipped a regiment at his own expense. On 23 April, 1776, he was appointed brigadier-general of the Wilmington district, and in the latter part of 1778, joined Gen. Lincoln and the Carolinas. Early in the following year he was sent to drive the British from Augusta, but on 4 March, at Brier creek, he was surprised and totally defeated by the enemy under Gen. Prevost. He then returned to Wilmington, but was captured by the British when, in 1781, that town fell into their hands. Both he and his family were cruelly treated, and he died a few days after their imprisonment.

ASHLEY, James Monroe, congressman, b. near Pittsburg, Pa., 14 Nov., 1824; d. in Aluma, Mich., 16 Sept., 1896. His education was acquired while a clerk on boats. Later he worked in printing-offices, and became editor of the "Dispatch," and afterward of the "Democrat," at Portsmouth, Ohio. He was the first clerk of the Ohio Senate, and the first chief clerk of the bar of Ohio in 1849, but never practised. Subsequently he settled in Toledo, where he became interested in the wholesale drug business. He was elected to congress as a republican in 1859, and was relected four times, serving continuously from 5 Dec., 1859, till 3 March, 1869. He was for four terms chairman of the committee on territories, and was under his supervision that the territories of Arizona, Idaho, and Montana were organized. He was nominated for the 41st congress, but was defeated, and in 1869 was appointed governor of Montana. In 1866 he was a delegate to the loyalist convention held in Philadelphia.

ASHLEY, William H., congressman, b. in Pemberton, N. C., 24 Nov., 1778; d. near Booneville, Mo., 26 March, 1838. He received a public-school education, and in 1808 migrated to Upper Louisiana (now Missouri), where he became a brigadier-general of militia. He was an enterprising fur-trader, and in 1822 organized a company, 300 strong, which penetrated into the Rocky mountains and formed relations with the Indian tribes. He realized a handsome fortune from this venture. He was lieutenant-governor of Illinois in 1820, and represented Missouri in congresses in 1831-7.
ASHMEAD, Isaac, printer, b. in Germantown, Pa., 22 Dec., 1769; d. in Philadelphia, 1 March, 1850. He was apprenticed to William Bradford, and in 1821 founded what is now the oldest printing establishment in Philadelphia. He set up the first power-presses ever used in that city, and introduced composition rollers. He was one of the founders of the American Board of Commissioners on Foreign Missions, and published its publications. He also aided in establishing the "American Presbyterian" and the "Presbyterian Quarterly."

ASHMUN, Eli Porter, senator, b. in Blandford, Mass., 24 June, 1770; d. in Northampton, Mass., 10 May, 1819. He received a classical education, and the honorary degree of A. M. was conferred upon him by Middlebury college (1807) and by Harvard (1810). He studied law at Blandford several years. For some time he was a member of the state legislature, serving on various occasions in the upper and lower branches. He was U. S. senator from Massachusetts from December, 1816, till May, 1818, when he resigned.

ASHMUN, George, statesman, b. in Blandford, Mass., 25 Dec., 1801; d. in Springfield, Mass., 7 July, 1870. He was graduated from Dartmouth in 1821 studied law, and was admitted to the bar in 1828 at Springfield, Mass. In 1833, 1835, 1836, and 1841 he was elected a member of the lower branch of the Massachusetts legislature, and during the last term he was speaker of the house. He was a state senator in 1833-1834. He was elected to congress in 1843, and served continuously until 1851, being a member of the committees on the judiciary, Indian affairs, and rules. He was a great admirer of Daniel Webster, and although he did not follow the latter in his abandonment of the Wil- not proriso, defended him in the ensuing quarrels; his replies to Charles J. Ingersoll, of Pennsylvania, and Charles Allen, of Massachusetts, when they assailed Webster with personal and political bitterness, were among the strongest efforts of his career in Congress. Subsequent to his retirement from political life he devoted his attention to the practice of his profession. In 1860 he was president of the Chicago convention that nominated Abraham Lincoln for president. It is said to have been through his influence that in 1861 Senator Douglas, of Illinois, was won over to the support of the administration, and the results of a subsequent interview at the White house between Lincoln, Douglas, and Ashmun, were of great importance to the country. In 1865 he was present during the national union convention, held in Philadelphia, but he took no part in its deliberations. He was also for some time a director of the Union Pacific railroad.

ASHMUN, Jehudi, missionary, b. in Champlain, N. Y., in April, 1794; d. in Boston, Mass., 25 Aug., 1828. He was graduated at the university of Vermont in 1816, taught for a short time in the Maine charity school, prepared for the congregational ministry, and became a professor in the Bangor theological seminary. Removing to the District of Columbia, he united with the Protestant Episcopal church and became editor of the "Theological Repertory," a monthly magazine published in the interest of that church. His true mission was inaugurated when he became agent of the colonization society, and took charge of a reinforcement for the colony of Liberia, on the western coast of Africa. He sailed 19 June, 1822, and found the colony in a wretched state of disorder and demoralization, and apparently on the point of extinction through incursions of the neighboring savages. With extraordinary energy and ability he undertook the task of reorganization. In November he was attacked by a force of savages, whose numbers he estimated at 800. With only 35 men and boys to help him, he repelled the attack, which was renewed by still greater numbers a few days later, with a like result. He displayed remarkable personal valor throughout these encounters, and when, six years later, his health compelled him to desert America, he left a comparatively prosperous colony 1,200 strong. He died almost immediately after his arrival in the United States. He was the author of "Memoirs of Samuel Bacon" (Washington, 1822), and of many contributions to the "African Repository."

His life was written by R. R. Gurley (New York, 1839).

ASHMUN, John Hooker, jurist, b. in Blandford, Mass., 3 July, 1757; d. in Springfield, Massachusetts, April, 1833. He was the son of Senator Eli P. Ashmun, was graduated at Harvard in 1818, and, on the establishment of the law department of that university, appointed its first professor, under the endowment of Isaac Royall. Prior to this he was associated with Judge Howe and Elijah J. Mills in devoting his time to legal studies. Judge Story pronounced his funeral discourse, and spoke highly of his professional attainments.

ASPER, Joel F., journalist, b. in Adams co., Pa., 20 April, 1822; d. in Chillicothe, Mo., 1 Oct., 1872. He was admitted to the bar in 1844, elected a justice of the peace in 1846, and prosecuting attorney for the county in 1847. He was a contributor to the "Western Reserve Chronicle," and in 1850 became editor of the "Chardon Democrat." In 1861 he raised a company and was commissioned a captain. He was wounded in the battle of Winchester, and, after being promoted lieutenant-colonel in 1862, was mustered out in 1863 on account of wounds. He was a contributor to the "Spectator." He was elected to congress in 1868, and served on the committee on military affairs.

ASPINWALL, Thomas, soldier, b. in Brookline, Mass., 23 May, 1786; d. 11 Aug., 1876. He was graduated at Harvard in 1804, and studied law with William Bacon, and in 1815 was admitted to the bar. In 1812, while serving in the war as a major in the 8th infantry, he was the first officer to organize the 92nd, and was promoted to colonel. He was in command of the forces at Fort Moultrie, in 1861, and surrendered Fort Sumter.

He was graduated at Harvard in 1764, studied medicine in Philadelphia, and practised in Brookline. He fought as a volunteer at Lexington, and afterward became a surgeon in the revolutionary army, and had personal charge of a military hospital at Jamaica Plain. After the war he interested himself in various institutions, in particular the hospital at Brookline, and succeeded in establishing that remedy into American practice.
was a prominent Jeffersonian republican, and a member of the Massachusetts legislature, and also of the executive council.

ASPINWALL, William Henry, merchant, b. in New York city, 16 Dec., 1807; d. there, 18 Jan., 1875. He was trained in the house of G. G. & S. Howland, his uncles, and taken into the firm in 1829. In 1837 the new firm of Howland & Aspinwall was established. This house had the largest Pacific trade of any firm in New York, besides doing an extensive business with the East and West Indies, England, and the Mediterranean. In 1850 he retired from the active management of the firm, and secured the contract for a line of mail steamers from the isthmus of Panama to the China coast, and a concession from the government of New Granada for the construction of a railroad across the isthmus. The road was completed after many difficulties, and opened on 17 Feb., 1855, the eastern terminus being named Aspinwall. Mr. Aspinwall was president of the Pacific mail steamship company until 1856. He travelled much in the last twenty years of his life, and amassed an important collection of paintings, which were sold by his family.—His son, Lloyd, b. in New York city, 12 Dec., 1834; d. in Bristol, R. I., 4 Sept., 1886, commanded the 23d N. Y. militia in its three months' service before Gettysburg, had charge of the purchase of vessels for the Newbern expedition, was president of a bank to receive the navy heritance, was connected with Burnaside's side at Fredericksburg, and after the war was a brigadier-general in the national guard.

ASTOR, John Jacob, merchant, b. in Waldorf, near Heidelberg, Germany, 17 July, 1763; d. in New York, 29 March, 1848. He was the fourth son of a butcher in Waldorf, and until he was sixteen worked with his father. He then joined an elder brother in London, who was employed in the tea trade, and Stephens and Company, the factory of their uncle, of the firm of Astor & Broadway, widely known afterward as Broadway & Co. Formerly Henry had settled in New York, and his intention was to emigrate to the United States as soon as he could save enough money. In 1783 he sailed for Baltimore with a small invoice of musical instruments to sell on commission. On shipboard he met with a furrier, who told him of the profits to be made in buying furs from the Indians and frontiersmen and selling them to the large dealers, and, in order to become familiar with the fur business, he entered into the employ of a Quaker furrier in New York and, when he had mastered the numerous details of the trade, began business on his own account, opening a shop in Water street, in which he worked early and late, except when absent on his purchasing trips. Soon after he established himself in New York he visited London, formed connections with houses in the fur trade, and made arrangements with Astor & Broadway to become their agent in America. After his return to New York he opened a ware room for the sale of musical instruments, becoming the first regular dealer in such articles in the United States. He married Sarah Todd, who brought him a dowry of only $300, but who possessed a frugal mind and a business judgment that he declared to be better than that of most merchants, and she assisted him in the practical details of his business. Before the close of the century Astor possessed, as the result of fifteen years of constant work, a fortune of $250,000. He then for the first time took a house separate from his store. With sagacious management, the business prospered to such an extent that he was able to ship furs in his own vessels and bring back European goods on his voyages to and from the close of the month of the Columbia river, but the war of 1812 interfered with Astor's gigantic enterprise and caused its abandonment. The story of this far-reaching scheme has been well told in Irving's "Astoria." At this time Astor bought American government securities at 50 or 70 cents, which after the war had doubled in value. After some years of peace he carried on his operations without government support, and established a trade with many countries, particularly China, but never realized the project of founding settlements in the northwest. He invested his gains in real estate outside the compact portion of the city of New York, and as the city extended he bought more land. His judgment in business was remarkably sagacious; his habits industrious and methodical, and his memory exceedingly tenacious, retaining the slightest details. For the last twenty-five years of his life he lived in quiet retirement. In this period, in consultation with literary and practical men, he matured a plan for establishing a public library in New York; the first suggestion of which had come from Washington Irving. He left $400,000 for founding the Astor library, which was carried out by his son, William B. Astor. He made other bequests for benevolent objects, in addition to his best gifts to the library. He left a lifetime endowment of which was $50,000 to found the Astor House in Waldorf, his birthplace, an institute for the edu-
cution of poor children, combined with an asylum for the aged and needy. His fortune at the time of his death was estimated at $280,000,000 to the Greene Halleck, the poet, who was his secretary for seventeen years, expressed the opinion that Mr. Astor would have been eminently successful in any profession.—His eldest son, William Backhouse, capitalist, b. in New York, 19 Sept., 1792; d. in that city, 24 Nov., 1875. Until he was sixteen he went to the public schools, employing his spare hours and vacations in assisting his father in the store. He was then sent to Heidelberg, and after two years went to Göttingen in 1810, and chose as his tutor a student, afterward known as the Chevalier Bunsen, with whom he also travelled. On his return he was divided in the business, which for several years yielded large profits. Finally the elder Astor withdrew, and was soon followed by his son, and from that time forth neither of them engaged again in commerce. When John Jacob Astor died in 1848, he made his eldest son his sole heir, although he provided for his relatives. William was already rich, having been successful in business, and having received from his uncle, Henry, a fortune of $500,000, and from his father the title to the Astor House property as a gift. William B. Astor, then fifty-six years of age, gave himself to the preservation and growth of the vast property. He added to the bequest of his father for the Astor Library the sum of $250,000, of which he paid during his lifetime $201,000 in land, books, and money. The edifice was completed under his directions in May, 1853. In 1853 he presented to the trustees the adjoining lot, and erected thereon a similar structure, which was completed in 1860. He next gave $50,000 for libraries. He gave much patient attention for many years to the administration of the library. Following the example of his father, he invested in real estate, principally situated below Central park, between 4th and 7th avenues, which rapidly increased in value. For about thirteen years prior to 1872 he was largely engaged in building the residences of houses. He gave much of his unencumbered land was covered by houses, mostly of the first class. He was said to own in 1867 as many as 220 houses, and he was also heavily interested in railroad, coal, and insurance companies. Besides other charitable gifts, he gave $50,000 to St. Luke's hospital, and in his will he left $380,000 to the Astor library, in addition to $49,000, the unexpended balance of his earlier donation. His estate, estimated at $100,000,000, was divided by his will between his two sons, John Jacob, and William Astor, who were given only a life interest in the residuary estate, which descends to their children. The gifts and bequests of William B. Astor to the Astor library amounted altogether to about $550,000. In 1879 his eldest son, John Jacob, presented three lots adjoining the library building, and erected on them a third structure, and William Astor, who was engaged in the central building. The edifice is represented on page 112. His outlay, exclusive of land, was about $250,000, making the entire gift of the Astor family more than $1,000,000.—William Waldorf, son of John Jacob, was graduated at Columbia law school in 1875. He served one term in the New York state senate, and was an unsuccessful candidate for congress. He was U. S. minister to Italy from 1882 till 1885, and has published “Valentino,” an Italian romance (New York, 1886), and “Sforza, a Story of Milan” (1889).

ATAHUALPA, or ATBALIPA (ah'-ta-o-o-al'pa), lined of Peru at the time of the invasion of the Spaniards, d. Aug., 1533. He was the son of Huayna Capac. The laws of Peru required that the principal wives of the incas should be blood relatives, and that no children of other parentage should be legitimate. Atahualpa's mother had been a princess of Quito; nevertheless, at the request of his father, the heir to the throne, Huascar, he was presented to the Inca, represented to his father to death in the most atrocious tortures. Such is the story told by Spanish annalists, whose testimony is doubtful, seeing that the murder of Huascar, their predecessor, and the tyranny of Atahualpa were among the causes of his own execution. Pizarro and his followers were now in Peru, and Atahualpa opened negotiations with them. His proposals were received in a friendly manner by Pizarro, and an interview was arranged (1532), which Atahualpa attended, followed by a large number of unarmed subjects. Father Vicente de Valverde explained to him, through an interpreter, the mysteries of religion, and that, on account of their heathenism, the pope had granted his kingdom to the Spaniards. Atahualpa professed not to understand the tenor of this discourse, and would not resign his kingdom, whereupon a massacre of the assembled crowd was at once begun by the Spanish soldiers, who seized Atahualpa and threw him into prison. On the arrival of Almagro the duplicity of the adventurers was excited by the magnificent proposals that Atahualpa made for his ransom, and with a desire of seizing the whole it was
determined to put him to death. During his imprisonment Atahualpa gave orders for the execution of his relatives, who were all cut off. This was one of the charges against him on the court martial by which he was tried, and, being found guilty, was sentenced to be burned, a penalty commuted for strangulation by the garrote on his accepting baptism at the hands of the priests accompanying the invaders.

ATHERTON, David R., senator, b. in Freetown, Ky., 11 Aug., 1807; d. in Clinton co., Mo., 26 Jan., 1886. He studied law and began practice in Liberty co., Mo. In 1834 and 1838 he sat in the Missouri legislature. In 1841 he was appointed judge of the Platte county circuit court, and in 1843 appointed U. S. senator in the place of Lewis E. Linn, deceased, and was subsequently elected and re-elected, sitting until 1855. He was prominent in the legislation on the organization of the territories of Kansas and Nebraska, and was a leader of the pro-slavery faction in the Kansas troubles of 1856-7.

ATEMPEANECATL (ah-tem-pah-nay-katl), one of the two famous generals and advisers of Montezer, war leader of Chichimeca. While the latter was attending to the wants of his people during a great famine, Atempeanecatl and Chihuanecatl continued the pending wars with the utmost success.

ATHERTON, Charles Gordon, senator, b. in Amherst, N. H., 4 July, 1804; d. in Manchester, N. H., 15 Nov., 1863. He was graduated at Harvard in 1823, and entered on the practice of the law in 1827. He practised at first in Nashua and then in Dunstable. After being a democratic member of the legislature for five years, and for four years speaker of the house, he was elected to congress in 1837 and sat in the lower house until 1843. He introduced in 1838 the resolution, which remained in force, authorizing the returning of fugitives otherwise than at the request of the state of their own choice, of whatever kind, on the subject of slavery, should be tabled without debate, and should not be taken again from the table. This was called the "Atherton gag." From 1843 to 1849 he was a senator from New Hampshire, and in 1852 he was again elected to the senate and served as chairman of the finance committee.

ATHERTON, Charles Humphrey, lawyer, b. in Amherst, N. H., 14 Aug., 1773; d. in Amherst, 8 Jan., 1853. He was graduated at Harvard in 1794, studied law, admitted to the bar, and entered on the practice of his profession in his native town. His reputation for solid attainments and exact habits of investigation kept him at the head of the Hillsborough co. bar for years. He filled the office of register of probate for thirty-nine years (1798-1837), served in congress from 15 Dec., 1815, to 3 March, 1817, and was a representative in the legislature in 1823, 1838, and 1839. He prepared various papers for the state historical society.

ATHERTON, Humphrey, soldier, b. in Boston, 17 Sept., 1661. He emigrated from England about 1636, and on the death of his brother, Joshua, took his place as a deputy to the general court. In 1654 he succeeded Robert Seilwick as commander of the military forces, with the title of major-general, and was much employed in negotiations with the Indians. He was killed by falling from his horse while he was reviewing the militia on Boston common.

ATHERTON, Joshua, lawyer, b. in Harvard, Mass., 20 June, 1737; d. in Amherst, N. H., 3 April, 1809. He was graduated at Harvard in 1762, studied law, and began practice in Petersham. Shortly afterward he removed to Litchfield, and in 1773, having been appointed register of probate in Hillsborough co., he settled in Amherst. Here he accumulated much property and was successful in his profession. During the revolutionary war he served as a captain in the Local Troops, and was both from loss of property and from cruel indignities. In 1779 he took the oath of allegiance to New Hampshire, and was admitted to practice in the supreme court. Later he became a member of the convention appointed to consider the federal constitution, and opposed its adoption on account of the provisions for the preservation of slavery. Subsequently he was elected to the New Hampshire legislature, and in 1789 he was made attorney-general of the state. He was also for a time commissioner for the U. S. direct tax.

ATKINS, Henry, navigator of the 18th century. He made numerous trading voyages to Davis straits, and also explored much of the coast of Labrador between the years 1729 and 1738. An account of his experiences has been published in the "Massachusetts Historical Collections."

ATKINSON, Edward, economist, b. in Brookline, Mass., 10 Feb., 1827. His education was obtained principally at private schools, and his reputation has been established by the pamphlets and papers that he has contributed to current literature on economic topics. The subjects treated embrace such general topics as banking, competition, cotton, free trade, mechanical arts, and protection. The most important of his addresses are "Banking," delivered at Saratoga in 1889 before the American Bankers' Association; "Insufficiency of Economic Legislation," delivered at the American Social Science Association; "What makes the Rate of Wages," before the British Association for the Advancement of Science; address to the chief of the Bureau of Labor Statistics at their convention in Boston in 1885; vice-presidential address on the "Application of Science to the Production of Goods," before the American association for the advancement of science, in 1885; and "Prevention of Loss by Fire," before the millers of the west, in 1885. His pamphlets and books include the following: "Cheap Cotton by Free Labor" (Boston, 1861); "The Collection of Revenue" (1866); "Argument for the Conditional Adoption of the Legal-Tender National Domain" (1859); "Labor and Capital—Allies, not Enemies" (New York, 1880); "The Fire Engineer, the Architect, and the Underwriter" (Boston, 1880); "The Railroads of the United States" (1890); "Cotton Manufacturers of the United States" (1880); "Addresses at Atlanta, Ga., on the International Exposition" (New York, 1881); "What is a Bank?" (1881); "Right Methods of Preventing Fires in Mills" (Boston, 1881); "The Railway and the Farmer" (New York, 1881); "The Influence of Boston Capital upon Manufactures," in "Memorial History of Boston" (Boston, 1882); and "The Distribution of Products" (New York, 1885). In 1886 he began the preparation of a series of pamphlets, "Monetary Legislation," delivered before the American political publication. Through his efforts was established the Boston manufacturers' mutual fire insurance company, an association consisting of a number of manufacturers who, for their mutual protection, adopted rules and regulations for the economical and judicious management of their plants. He is the inventor of an improved cooking-stove, called the "Aladdin Cooker."

ATKINSON, Henry, soldier, b. in 1782; d. at Jefferson Barracks, Mo., 14 June, 1842. At the age of twenty-six he was appointed, from North Carolina, captain in the 3d infantry. On 25 April, 1813, he was made inspector-general, and during the following year he became colonel of the 45th infantry.
He was advanced to the grade of brigadier-general 13 May, 1821, and was made adjutant-general 21 June. He served with distinction in the Black Hawk war, and was the headquarters observer in the engagements on Bad Axe river, 1 and 2 Aug., 1832, where the Indians were defeated.

**ATKINSON, John**, clergyman, b. in Deerfield, N. J., 6 Sept., 1835; d. in Haverstraw, N. Y., 8 Dec., 1897. He was admitted to the ministry in the New Jersey Methodist Episcopal conference in 1853, and was pasted pastor in Paterson, Newark, and Jersey City, N. J.; in Chicago, Ill.; Bay City and Adrian, Mich.; and in Haverstraw, Illinois Wesleyan university gave him the degree of D. D. in 1878. He was the author of the well-known hymn “We Shall Meet Beyond the River.” Dr. Atkinson for more than thirty years contributed to the periodical press, especially that not of his own denomination. He published “The Living Way” (New York, 1856); "Memorials of Methodism in New Jersey” (Philadelphia, 1890); “The Garden of Sorrows” (New York, 1869); “The Class Leader”(1874); “The Centennial History of American Methodism” (New York, 1884); and “The Wesleyan Movement in America.”

**THOMAS, W.**, bishop of the Episcopalian church, b. in Mansfield, Va., 6 Aug., 1807; d. in Wilmington, N. C., 4 Jan., 1881.

He entered Yale college, but left before completing the course, and went to Hampden-Sidney college, Virginia, where he graduated in 1825. He studied law, was admitted to the bar, and practised for nine years in various places. In 1834 he was ordained deacon in Norfolk, 18 Nov., 1836, and priest in the following year. Dr. Atkinson held several rectorships, and was rector of St. Peter’s church, Baltimore, Md., at the time of his election to the episcopate of North Carolina, 29 May, 1853. He was consecrated bishop in St. John’s chapel, New York, 17 Oct., 1853. Bishop Atkinson was an able and efficient administrator of his diocese and prominent in the councils of the church. In 1875 he was given an assistant, Dr. Theodore Benedict Lyman, who succeeded him in 1881.

**ATLEE, John Light**, physician, b. in Lancaster, Pa., 2 Nov., 1799; d. there, 1 Oct., 1885. He was a son of Col. W. P. Atlee, and grandson of Judge W. A. Atlee. He entered Dr. Samuel Humes in Philadelphia, and was graduated at the university of Pennsylvania in 1820. He returned to his native city, began practice, and soon became successful, especially in surgical cases. Dr. Atlee’s operation for double ovariotomy, in 1843, was the first in the history of medicine. He was one of the founders of the Pennsylvania county medical society in 1843, and twice served as its president. He assisted in organizing the Pennsylvania medical society in 1848, and became its president in 1857, and was also one of the organizers of the American medical association in Philadelphia, and was elected vice-president in 1855, and president in 1882. At the union of Franklin and Marshall colleges, in 1853, he became professor of anatomy and physiology, and continued there for forty years. He was a school director for forty years, was president of the board of trustees of the Pennsylvania state lunatic asylum at Harrisburg, was elected honorary fellow of the American gynaecological society in 1877, and was a trustee of numerous public institutions.—His brother, Washington Lenulle, surgeon and author, b. in Burlington, N. J., 28 Feb., 1836; d. in Sept., 1878. At the age of fourteen he was placed in a store, where he remained but eighteen months, when he entered the office of his brother. After studying there and with Dr. George McClellan, of Philadelphia, he received his diploma, in 1829, from the Jefferson medical college, in that city. Besides his practice, which became very large, he was president of the Philadelphia county medical association in 1874, and of the state association in 1873, and was also vice-president of the American medical association. Dr. Atlee was noted for his advocacy of the difficult operation of ovariotomy, which he was one of the first to practise. He ably defended its propriety when it was in universal disrepute, and, by his great skill in over 300 cases, he aided in making it one of the legitimate operations of surgery. When he first performed this operation in Philadelphia he was denounced by medical men on all sides as a dangerous man. Few surgeons dared to be present at his operations, and there was even talk of having him arrested. Dr. Atlee was also noted for his skill in the removal of uterine fibroid tumors. He was a brilliant speaker and debater, and a copious writer on medical and chemical subjects. He published over eighty articles in various journals. Among his writings are “Ovarian Tumors” (Philadelphia, 1853); an address before the Philadelphia county medical association, 1 Feb., 1875, on “Struggles and Triumphs of Ovariotomy”; a paper on “Fibroid Tumors of the Uterus,” read before the international medical congress, in Philadelphia in September, 1876; and a prize essay on the same subject.

**ATONDO Y ANTILLÓN, Isidoro,** Spanish navigator, lived in the latter part of the 17th century. He was placed in charge of an expedition sent to California, in 1678, to establish colonies in that part of the continent. In 1679, the next year, he founded the town of San Bruno, and took possession of Lower California in the name of the king of Spain.

**ATTA-CULLA-CULLA**, Indian chief, lived in the 18th century. About 1735 he was chosen vice-king under Oconostota, their archimagnus. In 1755, three years after the outbreak of those wars between the English, he was party to a treaty that ceded to the English a site for fort. The tribe, having been attacked by white settlers in retaliation for thefts committed in the Fort Duquesne expedition, made war upon the English, and reduced to famine, and finally massacred, the garrison of Fort Loudon. Capt. Stuart was saved by
ATTUKS, Crispus, a mulatto, or half-breed Indian, killed 5 March, 1770, in what is known as the Boston massacre. He was a resident of Framingham. On the day of the massacre he was prominent in a crowd of people who were jeering at the soldiers, threatening them with clubs. Finally Preston, the captain of the day, ordered his men to fire, and Attucks was the first to fall. Preston and six of his men were tried and acquitted by a Boston jury. John Adams, who defended them, charged Attucks with having "undertaken to be the hero of the night," and with having precipitated a conflict by his "mad behavior." He is praised by others for his courage, and is said to have been leaning quietly on a stick at the moment he was killed. He was about fifty years of age at the time of the affair. His body, together with those of the other victims, was borne in great pomp through the streets of Boston, and all were deposed in one common vault. All the shops were closed, and the bells of the neighboring towns were tolled. See Bancroft's "History of the United States," and also an article on Attucks in the "American Historical Record" for 1872.

ATWATER, Caleb, lawyer, b. in North Adams, Mass., 25 Dec., 1778; d. in Circleville, Ohio, 13 March, 1867. He was graduated at Williams college in 1801, and removed to Ohio, 1810, and became a practitioner. He moved to Ohio in 1811, where for some years he was a member of the state legislature, and postmaster of Circleville. He was also Indian commissioner under Jackson. He published "A Tour to Prairie du Chien" (1831); "Western Antiquities" (1850); "Writings of Caleb Atwater" (1850); "History of Ohio" (1850); and an "Essay on Education" (1841). An article on the "Writings of Caleb Atwater" is to be found in the Cincinnati "Western Monthly Magazine" for 1834.

ATWATER, Lyman Botchess, scholar, b. in New Haven, Conn., 20 Feb., 1813; d. in Princeton, N. J., 17 Feb., 1883. He was graduated at Yale in 1834, and at the theological seminary in 1838. He was a tutor at Western college, and in 1858 became pastor of the Congregational church at Fairfield, Conn., where he remained until 1854, contributing meanwhile to various religious periodicals. In 1854 he was appointed professor of mental and moral philosophy in Princeton, and in 1869 he became professor of logic and of moral and political science, and editor of the "Princeton Review." He was also acting president of the college for several years. He published a "Manual of Elementary Logic" (1867).

ATWATER, Wilbur Olin, chemist, b. in Johnstown, N. Y., 3 May, 1844. He was graduated at Wesleyan university, Middletown, Conn., in 1867, then studied chemistry at New Haven, and returned to Wesleyan for his final course of study, and after which he spent some time at the universities of Leipsic and Berlin, Germany. Subsequent to his return to the United States, during 1871-2, he held the chair of chemistry in East Tennessee university, and in 1873 he was called to fill a similar appointment in the Maine state college. In the same year he returned to Wesleyan university, and was professor of chemistry. From 1875 to 1877 he was director of the Connecticut agricultural experimental station. His published papers are very numerous, and have appeared in the scientific journals of Germany and France, as well as in those of the United States. In conjunction with G. B. Goode he is the author of The American Monograph (New York, 1879). He has made a special study of the composition of food, and has constructed charts to show the relative values. See "Annual Cyclopaedia" for 1883.

AUBER, Pierre Alexandre, French naturalist, b. in Havre in 1784; d. in Cuba in 1843. He went to Cuba in 1853, and was appointed professor of botany in the university of Havana and is credited with the first railway in Cuba, which was built in 1855, the first in any Spanish-speaking country.

AUBER, Virginia Felicia, Cuban author, b. in Coruña, Spain, in 1825. She went to Cuba in 1853 and resided there until 1873, when she returned to Europe. She wrote much under the pen name "Felicia," and published several novels, the best of which are "Perseverancia," "Otras tiempas," "Un amor misterioso," and "Una habanera.

AUBREY, Lady Letitia, of Wimingham, Sussex, England, was the daughter of William Penn, and was made owner and ruler of the "Barony of Nazareth," a tract of 5,000 acres in the heart of Northampton co., Pa. Her title was confirmed by独自 decided by a court of chivalry, where she was acquitted of the charge of murder in 1731, "on yielding and paying therefor, to the said John Penn, Thomas Penn, and Richard Penn, their heirs and assigns. One Red Rose, on the 24th day of June yearly, if the same shall be demanded, in full for all services, customs, and rents." Authentic copies of the deed are in existence, and according to tradition the possession of the barony is revocable at the will of the present owner, the Countess of Exeter. The "Red Rose Tavern" was until 1783 the principal inn of the barony. The land was sold to the Moravians in 1741.

AUBREY, Capt. d., knight of St. Louis, d. 24 Feb., 1770. He was an officer in the French army. On 14 Sept., 1758, he defeated Maj. Grant at Port Duquesne. In 1759 he was sent prisoner by Sir William Johnson at Niagara. In New Orleans he was commander, and on 4 Feb., 1765, succeeded to the government. He surrendered the colony to Ulen in March, 1760, but, after the expulsion of that governor in 1768, he resumed the administration until Gen. O'Reilly came in July, 1769. On his return voyage to France he was wrecked and drowned on the Bermudas.

AUCHMUTY, Robert (ok-mu'-te), lawyer, b. in Scotland; d. in Boston, Mass., in April, 1750. He was descended from a family settled in Fife, Scotland, in the 14th century. His father removed to Ireland in 1699, and the son emigrated to America and settled in Boston, where he practised law with success. He was counsel for the court of admiralty in 1703, which office he resigned shortly afterward; but he was reappointed in 1733. He was in England in 1741 as agent for the colony, and in that year published in London a pamphlet entitled "The Importance of Cape Breton to the British Nation, and a Plan for Taking the Place."—His son, Robert, b. in Boston; d. in Maryland. England, Dec. 24, 1784. An eloquent and successful advocate in Boston, was one of the counsel for the soldiers engaged in the Boston massacre, and became a judge of admiralty in 1763, but in 1776, being a zealous loyalist, withdrew to England. His and Hutchinson's letters from Boston, sent over by Franklin, in 1773, caused great excitement.—Another son, Samuel, b. in Boston, 16 Jan., 1722; d. in New York, 6 March, 1777, was graduated at Harvard in 1742, studied theology in England, and was appointed assistant minister of Trinity church in New York. In 1764 he became
ATOR, and had charge of all the churches in the city. He continued to read prayers for the king during the revolution, until Lord Stirling, in command at New York, compelled him to desist; whereupon he offered himself to serve in New Jersey, ordering that no services should be held until the prayers could be read without abridgment. When the British captured New York he passed the American lines amid great hardships. He found his church and parsonage burned and the church records destroyed. The exposure that he had undergone in order to evade the conquerors caused his death.—Sir Samuel, British general, son of the Rev. Dr. Samuel, b. in New York, 22 June, 1758; d. in Dublin, Ireland, 11 Aug., 1822, was graduated at King's college in 1775, and volunteered in the British army in August, 1776; was commissioned for garrison duty at the battle of Gen. Sumner, commanding 2d cavalry corps, and acted in this capacity until the death of Gen. Sumner in March, 1863. He was wounded at Antietam, and breveted captain. He reported as aide-de-camp to Gen. Tyler, and served with the 2d artillery till March, 1862. During the periodical campaign he was acting assistant adjutant-general to Gen. Emory's cavalry command. In July, 1862, he became aide-de-camp to Gen. Grant, and served with the corps in Virginia, and acted in this capacity until the death of Gen. Sumner in March, 1863. He was wounded at Antietam, and breveted captain. He reported as aide-de-camp to Gen. Grant in June, 1863, and witnessed the surrender of Vicksburg. He joined the staff of Gen. Sherman at Memphis on 1 Oct., 1863, and served as aide-de-camp to Gen. Sherman during the Atlanta campaign, that to Meridian, the Atlanta campaign, the march to the sea, and that through the Carolinas. He accompanied Gen. Sherman during his several tours through the great west, among the Indians, and through Europe, and continued to discharge the duties of aide-de-camp to the general of the army until his death.

AUDUBON, John James, naturalist, b. near New Orleans, La., 4 May, 1780; d. near New York city, 27 Jan., 1851. His grandfather was a fisherman of La Vendee, in France, and his father, who had worked his way up to the command of a French man-of-war, and had acquired a plantation in Louisiana, married there a lady of Spanish descent named Anne Moynet. When very young, Audubon lived for a short time on a plantation belonging to his father in Santo Domingo, and, after his mother's death in a negro insurrection, was taken to France to be educated. His parents had encouraged him in a love of nature almost before he was able to walk, and he had long since a somewhat jejunum, if not a healthy delight, in looking through the graceful forms of the tropical birds with which he was familiar. Although his efforts fell so far short of his ideal that he was accustomed to make a bonfire of them on each birthday, they nevertheless showed talent, and his father placed him in the studio of the celebrated painter David. Here he was set to drawing horses' heads and the limbs of giants, instead of his favorite birds. He persevered, however, in this one study, while he neglected all the others, preferring to spend his time in excursions through the woods, gathering specimens and making drawings of birds. Seeing his tastes, his father, who had designed him for the navy, gave up his plan, and sent the boy, then seventeen years old, to a farm belonging to him at Mill Grove, near Philadelphia. Here young Audubon spent his time in painting, fishing, drawing, and collecting specimens of natural history. A visit to France, made to lay before his father some grievances against the agent who had charge of the property, enabled Audubon to add largely to his collections. His house at Mill Grove became a museum, filled with stuffed animals, and decorated with fowls of all kinds, eggs, and with drawings of birds and beasts. He became an excellent marksman, and was also at this time quite a dandy, if we may credit his own account. While at Mill Grove he fell in love with Lucy Bakewell, daughter of an Englishman who had come to America a few years before, and whose property adjoined that of Audubon. At the desire of Mr. Bakewell, who thought him somewhat unpractical, he entered the employ of a firm in New York, where he soon demonstrated his lack of interest in anything but natural history, collecting specimens with his usual earnestness, and letting business take care of itself. It is related that his neighbors at one time made a legal complaint against him on account of the disagreeable odor from the drying skins in his room. He soon returned to his home, and, thinking he might be more successful in the west, formed a partnership with Ferdinand Rosier, a friend, and, having sold his farm, started, in 1808, for Louisville, Ky., with a stock of goods bought with the proceeds. Before setting out he married Miss Bakewell, and the journey to Louisville, part of which was made in a flat-boat, was their bridal tour. In Louisville, Audubon left business to Rosier, and spent his time in the more congenial occupation of tramping the woods in search of birds and in drawing pictures of them. In his store at Louisville he met Alexander Wilson, the celebrated entomologist who had come to solicit Audubon's subscription to his book on American birds, and was naturally astonished when he was shown drawings superior to his own, some of them representing birds he had never seen. Audubon relates that he gave Wilson considerable aid in his search for specimens, but the latter seems to have been somewhat jealous of the rival he had so unexpectedly discovered, and afterward wrote disparagingly of his visit to Louisville. Audubon's business did not prosper, and, after two removals in vain search for better success, the partnership was dissolved in 1812, and Audubon settled with his wife and their son Victor at Hendersonville, where his second son,
John, was afterward born. He embarked in a business venture with his brother-in-law at New Orleans, and was again unsuccessful. During this time he was still devoting himself completely to natural history, making long excursions into the surrounding country, sometimes tramping for days through pathless thickets with only dog and gun for companions, and all the time adding new drawings to his collection. Some birds he was obliged to shoot, afterward ingeniously supporting them in nature, while he painted them; others he drew with the aid of a telescope, representing them amid their natural surroundings.

Audubon’s appearance was now very different from that of the young proprietor of Mill Grove. After some of his long tramps through the forests, unshaven and unshorn, his rifle on his shoulder and his color-box strapped on his back, he looked the very "American wood puncher" he was afterward so fond of styling himself. He seems to have done all this with no incentive but the love of nature; the idea of publication had not yet entered his mind. About this time his father died, leaving him an estate in France and the sum of $17,000. The latter was held in trust by a friend in Richmond, who invested it shrewdly, and Audubon received not a penny. His devotion to his favorite pursuit continued to bring him into financial trouble, and he was obliged to earn money by giving drawing lessons and taking crayon portraits in Louisville and Cincinnati. His friends not unnaturally looked on him as a madman, but his wife encouraged and assisted him in every way she could. To maintain his family, he, the eldest son, who had been a governess in New Orleans, whither her husband went in 1820, and where she joined him a year later, and again in Natchez, where they went in 1822. She afterward established a school at Bayou Sara, to help him in the publication of his work, and in this school he aided her, for some time.

The idea of giving his collection of drawings to the world was first suggested to him by Prince Canino, son of Lucien Bonaparte, whom he met in Philadelphia. Audubon had gone to that city in 1824, after earning the necessary money in various ways, on one occasion by painting the interior of a steamboat. After this time he was forced to earn his living by drawing, the labor of years, were destroyed by a single night by rats, and the fact that, after a day or two of natural despondency, he went bravely to work to replace his loss, illustrates Audubon’s energy and perseverance. In Philadelphia he met several noted artists, but the idea of publication seems to have had little encouragement. After returning to Bayou Sara, where he had left his wife, he sailed from New Orleans, in 1826, for England, intending to seek aid there, though he had not a friend in the country. On his arrival he began to exhibit his drawings in public, and, though at first he met with discouragements, the value and merit of his work was soon recognized by European naturalists. The frequently expressed wish of the artist himself to publish his work was realized in 1829, when his friend Mr. Thomas H. Kirkland obtained for him the assistance of the Rev. Joseph L. van der Hoeve, who published in 1831 his "Ornithological Biographies," consisting of a letter-press of the "Birds," together with reminiscences of personal adventure and descriptions of scenery and character. The work consisted of five octavo volumes (Edinburgh, 1831-9). During this time Audubon continued the collection of material in the United States, and, although suffering from a severe illness, returned to his home town, Natchez, Mississippi, where he wrote much of the text of his work. On two of these journeys he was accompanied by his wife, and she frequently travelled with him while he obtained subscribers. In 1840 he left England for the last time, and thenceforward lived with his two sons and their families at his last home, Audubon, a village named Minnieisland, is now within the New York city limits, in what is known as "Audubon Park." From 1840 to 1844 he was occupied with the publication of a smaller edition of his work, which was completed in seven octavo volumes. The classification of the matter in this edition adds to its scientific value. In the folio edition the method of publication was altered, and the work was published in ten volumes, and the order of arrangement, and the effort had been to make the numbers uniform in interest. Before the publication of the last volume of the "Birds," Audubon had projected a similar work on the "Science of America," and with the help of his sons, Victor Gifford and John Woodhouse, and his nephew, Robert, he laid the foundations of a work that was planned to be even more extensive and complete. In 1844 he left England, and in 1846, after Audubon’s death, the superintendence of his son John. After he had reached his sixty-seventh year Audubon’s mind began to weaken, and during the last four years of his life he was able to do little work. He was buried in Trinity Churchyard, the burial place of New York, in a vault that had been prepared for his father and mother, John, Woodhouse, died 21 Feb., 1862, while preparing a third edition of the "Birds of America." Mrs. Audubon survived her husband many years, and prepared from his diary a biography, which was published in New York in 1868.
were showered upon him. At the time of his death he was a fellow of the Linnæan and zoological societies of London, of the natural history society of Paris, of the Wernerian society of Edinburgh, of the lyceum of natural history of New York, and honorary member of the society of natural history at Manchester, of the royal Scottish academy of painting, sculpture, and architecture, and of many other scientific bodies. See, besides works already mentioned, Dunlap’s “History of the Rise and Progress of the Arts of Design” (New York, 1874); Griswold’s “Prose-Writers of America” (Philadelphia, 1847); Mrs. Horace St. John’s “Audubon, the Naturalist, in the New World” (New York, 1856); Samuel Smiles’s “Brief Biographies” (Boston, 1861); and “Audubon and his Journals,” by Maria R. Audubon (2 vols., New York, 1887).

AUGUR, John Gottlieb, missionary bishop of the Protestant Episcopal church, b. in Wurttemberg, Germany, 18 Nov., 1852; d. 16 Feb., 1874. He was a Lutheranism minister, but applied for and took orders in the Episcopal church, being ordained at Cavalla, Africa, in 1862. At a special meeting of the general convention, in October, 1872, Dr. Auer was elected missionary bishop of Cape Palmas, in Africa. He was consecrated 17 April, 1873, and was stricken down with fever, and his term of service was less than one year.

AUGUR, Christopher Colon, soldier, b. in New York, 28 Dec., 1821; d. in Washington, D. C., 16 Jan., 1898. He was graduated at the U.S. military academy in 1843. During the Mexican war he was aide-de-camp to Gen. Eustis B. Hapgood, and after his death, to Gen. Caleb Cushing. He was promoted in 1852, and served with distinction in a campaign against the Indians in Oregon in 1856. On 14 May, 1861, he was appointed major in the 13th infantry, and was for a time commanding cadets at West Point. In November of that year he was commissioned a brigadier-general of volunteers, and joined McDowell’s corps. In July, 1862, he was assigned to a division under Gen. Banks, and in the battle of Cedar Mountain, 9 Aug., was severely wounded. He sat on the military court that investigated the surrender of Harper’s Ferry. He was promoted major-general 9 Aug., 1862, and in November joined his corps and took part in the Louisiana campaign. At the siege of Port Hudson he commanded the left wing of the army, and for meritorious services on that occasion he was brevetted brigadier-general in the U. S. army, 13 March, 1863, received on the same date the brevet of major-general for services in the field during the rebellion. From 13 Oct., 1863, to 13 Aug., 1866, he was commandant of the Department of Washington; from 15 Jan., 1867, to 13 Nov., 1871, of the Department of the Platte; then of the Department of Texas until March, 1875; of the Department of the Gulf until 1 July, 1878, and subsequently of the Department of the South and the Department of the Missouri, and in 1885 was retired. On 15 Aug., 1886, he was shot and dangerously wounded by a negro whom he attempted to chastise for stealing a horse which was lodged in front of his house in Washington. His son, Jacob Arnold, is a major in the 5th U. S. cavalry.

AUGUR, Hezekiah, sculptor, b. in New Haven, Conn., 21 Feb., 1791; d. there, 10 Jan., 1858. He was unsuccessful in business, and turned his attention to sculpture and mechanical inventions. He was among the most wholly self-taught, but was possessed of considerable native talent. His best work, “Jephtha and his Daughter,” is in the Trumbull gallery, Yale college. His most important invention was a machine for carving wood, which came into general use. He was given the degree of A. M. by Yale in 1856, though he was not a graduate.

AUGUSTUS, John, philanthropist, b. in 1785; d. in Boston, 21 June, 1859. He was a shoemaker, doing business in Boston, and devoted his means and his labors to aiding and reclaiming the poor and the vicious. For more than twenty years he was a constant visitor to the police courts, seeking subjects for his charitable efforts.

AULNAY DE CHARNISÉ. See Charnisé.

AURELIO I., Antonio, the name assumed by M. de Fournes, a French adventurer, b. about 1830. He lived among the Araucanians, in Chili, and was elected king by them. He formed a constitution, and his movements at first created much excitement in Chili, but he grew weary of his grant, and was necessary to get rid of him. Early in 1862 disguised Chilians were sent to Araucania, and, when they reached the place where the so-called king held his court, a policeman seized him, put him upon his horse, and succeeded in escaping with him from the pursuing Indians. The adventurer was imprisoned for some time.

AURY, Louis de, New Grenadian naval officer, b. about 1780. He became a lieutenant in the navy of his native country in 1813, and commanded the naval force of New Grenada at the siege of Cartagena. In 1816 he went to Texas with Herrero as commander of the united fleets, and was appointed governor of Texas and Galveston island. In July, 1817, he took part in McRae’s expedition to Florida, and afterward he was engaged in the campaigns of the revolted South American republics. He resided some time in New Orleans, and subsequently went to Havana.

AUSTEN, Peter Townsend, chemist, b. in Clifton, Staten Island, N. Y., 10 Sept., 1829. He was graduated at Columbia school of mines, in the course in analytical and applied chemistry, in 1853. He then studied for three years under Prof. Hofmann in the university of Berlin, and received the degree of Ph. D., for original work, from the university of Zurich. On his return from Europe he became in 1856 instructor in chemistry at Dart-
AUSTIN, Benjamin, merchant, b. in Boston, 18 Nov., 1752; d. there, 4 May, 1820. He was a merchant in Boston, and was a political writer before the revolution. In the controversy that raged during the administration of John Adams he wrote fierce newspaper articles, filled with personalities, in advocacy of republican views, and was for a time in the train of the party President Jefferson appointed him commissioner of loans for Massachusetts. He was a member at different times of both houses of the Massachusetts legislature. He wrote a series of articles for the "Independent Chronicle," under the name of "Honestus," and another series signed "Old South." The latter were printed in a volume in 1803. His son, Charles Austin, in 1806 assailed Thomas O. Selfridge in State street, Boston, for slandering his father, and was killed by Selfridge, who was tried and acquitted. A report of the trial was published in Boston in 1807.

AUSTIN, Coé Finch, botanist, b. in Fitchville, Orange co., N. Y., 29 June, 1844; d. in Clifton, N. J., 21 Mar., 1879. He was educated chiefly at Rankin's academy, Deckertown, N. J. Subsequent to his graduation he devoted some time to lecturing on chemistry and botany, but afterward settled in Clifton, where he resided during the latter part of his life. For many years he was curator of the herbarium at Columbia college. He was recognized as an authority on mosses, both in this country and in Europe. His published work includes "Musci Appalachiiani" (1870), a valuable description of American mosses, for the preparation of which he made numerous journeys through the eastern, middle, and southern states.

AUSTIN, David, clergyman, b. in New Haven, Conn., in 1780; d. in Norwich, Conn., 5 Feb., 1851. He was graduated at Yale in 1799, and in 1788 was settled as the Presbyterian minister in Elizabethtown, N. J. In 1795, after his recovery from a fever, he began to preach the second advent of Christ, which he prophesied would occur in May, 1796. When the day passed he renewed his predictions, which created great excitement, and in 1797 he removed to Philadelphia, covering from his delusion he was installed, in 1815, as pastor at Bozrah, Conn., where he officiated until his death. He published "The American Preacher," by various ministers: "The Downfall of Babylon"); a "Commentary on the Bible," and several millennial pamphlets and sermons.

AUSTIN, James Trochich, lawyer, b. in Boston, 7 Jan., 1784; d. there, 8 May, 1870. He was the son of Jonathan Austin and was educated at Harvard in 1802. In 1806 he married the daughter of Elbridge Gerry. He was town advocate in 1809, member of the state legislature and attorney for the county of Suffolk in 1812-32, and attorney-general of Massachusetts in 1832-43. He delivered an oration at Lexington on the 4th of July, 1824, and was a member of the college of Massachusetts while he was the ATA of the University. Many of these orations were published, and he published a "Life of Elbridge Gerry" (Boston, 1828). In politics he was an anti-federalist, and was a pronounced opponent of the abolition movement.

AUSTIN, Jonathan Loring, patriot, b. in Boston, 2 Jan., 1748; d. there, 10 May, 1826. He was graduated at Harvard college in 1766, and became a merchant in Portsmouth, N. H. When Langdon's regiment was raised he became its major, and subsequently was aide to Gen. Sullivan. He was secretary to the Massachusetts board of war until October, 1777, and was sent to France with despatches to Dr. Franklin announcing the defeat of Burgoyne and asking for money to be spent in the army. He remained with Dr. Franklin as his private secretary, being sent as his agent to London. In May, 1779, he arrived in Philadelphia with despatches from the commissioners to congress, was sent to Europe again in January, 1780, to negotiate a loan for the state of Massachusetts, and was in the latter capacity a member of the treaty of peace with England. He failed to secure the loan, and returned in the autumn of 1781. In 1786 he delivered the 4th of July oration in Boston. He was a state senator for several terms, and elected state treasurer, and subsequently secretary of state.

AUSTIN, Jonathan Williams, soldier, b. in Boston, 18 Apr., 1751; d. in the south in the summer of 1778. He was graduated at Harvard in 1790, studied law in the office of John Adams, and admitted to the bar in 1772. In the Middlesex convention in 1774 he was chairman of the committee that drew up the resolutions. He served as a major in the revolutionary war, and was a commandant at Castle William in 1776.

AUSTIN, Nathaniel, soldier, b. in Newburgh, Conn.; d. in Louisiana, 10 June, 1821. He removed to the west in 1798, and engaged in lead-mining. In 1820 he went to Texas, and from Texar forwarded to the Mexican commandant at Monterey a petition for permission to colonize 300 American families in that section. Returning to Missouri in search of emigrants, he was robbed and exposed to hardships that caused his death. The Mexican authorities granted a tract of land for a colony, and his son, Stephen F. Austin, founded the settlement.

AUSTIN, Samuel, clergyman, b. in New Haven, Conn., 7 Oct., 1790; d. in Glastonbury, Conn., 4 Dec., 1830. He was graduated at Yale in 1789, studied theology at Yale, and for three years in Fair Haven, Conn. He was dismissed 19 Jan., 1793, and became pastor of the First Congregational church in Worcester, Mass., where he remained until 1815. In 1807 he received the degree of S. T. D. from Williams college. After leaving Worcester he was chosen president of the University of Alfred, and reigned there for until 1821, when he resigned on account of ill health and removed to Newport, and there preached for several years. His published writings include
AUSTIN, Stephen F., pioneer, b. about 1790; d. Nov. 26, 1856. He was one of the sons of Moses Austin, an enterprising pioneer from Connecticut, who in 1820 obtained from Mexico authority to colonize 300 families in Texas, but died before the project could be accomplished. Stephen obtained a confirmation of the grant, and, having already selected the present site of Austin, he helped to settle what was soon made into an important settlement. He was entitled to a large tract for each 200 families induced to settle, and proved himself an able diplomatist by inducing unmarried young men to pair off together and call themselves families. In this way he soon acquired a large tract of fertile land, and, being clothed with almost absolute authority as a practical and enterprising politician, was so successful in the management of the public affairs of the frontier that the inhabitants of Texas, in 1836, elected him as governor. He was re-elected in 1837 and 1838, but died in office on Aug. 30, 1838. He was the father of Mirabeau B. Lamar.

AVERELL, William Woods, soldier, b. in Cameron, N. Y., 3 Nov., 1822; d. in Bath, N. Y., 3 Feb., 1860. His grandfather was a captain in the revolutionary army under Sullivan. Young Averell was graduated at the U. S. Military Academy in June, 1845, and assigned to the mounted rifles. He served in garrison and at the school for practice at Carlisle, Pa., until 1857, when he was ordered to frontier duty, and saw a great deal of Indian fighting, mainly against the Kiowas and Navajos. He was severely wounded in a night attack by the Navajos, April 14, 1859, and was on sick leave until the outbreak of the civil war in 1861. He was promoted to be first lieutenant of the mounted rifles 14 May, 1861, and was on staff duty in the neighborhood of Washington, participating in the battle of Bull Run and other engagements until 23 Aug., 1861, when he was appointed colonel of the 24th Pennsylvania cavalry, and commanded the cavalry defences in front of Washington. He engaged with the army of the Potomac in its most important campaigns. In March, 1863, he began the series of cavalry raids in western Virginia that made his name famous. The first notable one was on the 16th, 17th, and 18th of March, and included the battle of Kelly's Ford, on the upper Rappahannock. In August he drove a confederate force over the Warm Spring mountains, passed through several southern counties, and near White Sulphur Springs attacked a force posted in Rocky Gap, for the possession of which a fight ensued, lasting two days (26 and 27 Aug.). Averell was repulsed with heavy loss, and made his way back to the union lines with 150 prisoners. On 5 Nov., he started with a force of 5,000 men and drove the confederates out of Greenbrier co., capturing three guns and about 100 prisoners. In December he was again in motion, advancing with a strong force into southwestern Virginia. On 16 Dec., he struck the railroad near the Virginia and Great George rail road at a place known as Gen. Longstreet's base of supplies. He destroyed the railroad, severing an important line of communication between the confederate generals Lee and Bragg, and burned a large quantity of provisions, clothing, and military equipments. When he began his retreat the alarm had been given, and all
the mountain passes were held by the confederates. He captured a bearer of despatches, learned the enemy's plans, and forced the position defended by Gen. W. S. Jackson ("Madwall," as he was called, the distinguishing badge for lasting eight months from his friend's sake). A second line concentrated to cut off his retreat, but he led his command over a road supposed to be impassable, and reached the federal lines with 290 prisoners and 150 horses, having lost 11 men killed or drowned and 90 missing.

My command," he said in his report (21 Dec., 1864), "began to find a way to a new place and climbed three hundred and forty miles since the 8th inst. After the exposure and hardships of this raid he was obliged to ask for sick-leave, extending to February. On his return to duty he was placed in command of the 2d cavalry division, and from that time until September, 1864, the fighting was almost continuous. He was wounded in a skirmish near Wytheville, but was in the saddle and under fire again two days afterward, destroying a section of the Tennessee railroad. In June he crossed the Alleghany mountains, in July he was fighting in the Shenandoah valley and at Winchester. In August he was in fights at Mookfield, Bunker Hill, Martinsburg, and elsewhere, and ended the year with the successful capture of Fish-er's Hill (22 Sept.), and Mount Jackson (3 Sept.). In the meantime he had been brevetted through the different grades of his regular army rank until he was brevet major-general. On 18 May, 1865, he resigned. He was consi-genral of the United States in the British provinces of North America from 1863 till 1869, when he became president of a large manufacturing company. He discovered a process for the manufacture of cast-steel directly from the ore in one operation (1869-70), invented the American asphalt pavement (Jan., 1870), and the Averill insulating conduits for wires and conductors (1884-5), and also a machine for laying electric cables. He was also a member of a large military council.

AVERILL, John Thomas, b. in Alma, Maine, 1 March, 1825; d. in St. Paul, Minn., 4 Oct., 1880. He was educated at Maine Wesleyan university, settled in St. Paul, Minn., and engaged in manufacturing. In August, 1862, he entered the army as lieutenant-colonel of the 6th Minnesota infantry. The battle of brigadier-general was conferred on him. He served with distinction, and when he had served his term of service was elected to congress as a representative in 1874, by a close vote, and reelected by a large majority.

AVERY, Benjamin Park, journalist, b. in New York city in 1829; d. in Pekin, China, 8 Nov., 1875. After receiving a good English education and learning wood-engraving, he went to California with the "Argonauts of '49" and engaged for a time in gold-mining. In 1856 he established at North San Juan a weekly paper called the "Hy- draulic Press." In 1859 he became assistant editor on the "Marysville Appeal," in 1861 was chosen state printer, afterward served on the staff of the "San Francisco Bulletin," and in 1872 undertook the editorship of the "Overland Monthly." He was appointed minister to China in 1874.

AVERY, Waightstill or Waitstill, lawyer, b. in Groton, Conn, 3 May, 1745; d. in Burke co., N. C., in 1821. He was graduated at Princeton in 1776, and went to Mecklenburg, N. C., where he became a lawyer. In 1775 he took part in the convocation of 1775 and 1776, where he was a member of the state congress, and in 1777 the first attorney-general of the state. In 1779 he was a colonel of militia in active service.
Italy. He was absent just a year, and only returned to America after he had fought the Austrians and Sardinians at Genoa, and with a few thousand followers had defended Rome for two months against the allied armies, 100,000 strong. Once he sought refuge on board an American frigate, a British man-of-war, and at last, when the cause of freedom was hopelessly crushed, escaped with his usual good luck to America and resumed his mercantile life in New York.

AYRES, Pedro Menéndez de (ah-vee-ay-nes’), Spanish sailor, b. in 1529; d. in 1574. He rendered good services to Emperors Maximilian and Charles V. when fighting under letters of marque against the French fleets. He was appointed captain-general of the route to the West Indies, and conquered Florida, on which he became both military and civil governor. He died while making preparations to join the armada that was sent by Philip II. to Central America after the fall of the Mexican empire of Tula, about 1532. Avoxil was an able chiefman, who extended the limits of his nation and promoted its civilization and prosperity. In his old age he divided his dominions, giving the Cakchiquel kingdom to his son Jintemal, and that of Zutuhil, or Atitén, to his son Avoxil, keeping for himself what he had conquered.

AYALA, Juan Bautista de, explorer, known only in connection with the early exploration of San Francisco bay in 1775. The bay had been discovered only six years before. Ayala was a Spanish lieutenant, in command of the transport “San Carlos,” and his was the first European vessel to enter the Golden Gate. He remained about forty days, making surveys, and on his return to Monterey reported concerning the excellent character of the harbor. The visit of Sir Francis Drake in the 16th century cannot have been actually made to the bay of San Francisco, hence the assured priority of Ayala as explorer in this place.

AYER, James Cook, manufacturer, b. in Groton, Conn., Nov. 11, 1823; d. in Waltham, Mass., 3 July, 1878. At the age of thirteen he removed to Lowell, and there resided with his uncle. His education was obtained at the public schools, where at one time he was a classmate of Gen. Butler, and subsequently at the Westford academy, after which he was apprenticed to James C. Robinson, a grocer, in Waltham. While he served his term he became interested in medicine, and later he was graduated at the medical department of the university of Pennsylvania. He never practised, but devoted his principal attention to pharmaceutical chemistry and the compounding of medicines. His success in this line was very great, and soon led him to establish in Lowell a factory for the manufacture of his medicinal preparations, which became one of the largest of its kind in the world, and was magnificently equipped. He was worth $20,000,000. Much of his success was due to his advertising, and he published annually an almanac, 5,000,000 copies of which were gratuitously distributed each year. Editions in English, French, German, Portuguese, and Spanish, were regularly issued. In 1874 he accepted the republican nomination for congress in the 7th Massachusetts district, but was defeated.

AYLLON, Lucas Vázquez de (ah-yay-yon’), Spanish adventurer, d. in Virginia, 18 Oct., 1526. He was appointed a member of the superior court of the colony. Cortés sent him to negotiate an agreement with Velazquez, but he did not succeed in effecting it either with Velazquez or with Narvaez, who commanded the fleet of the latter. Ayllón sent an expedition to Florida in 1529, under Gordillo, who, in 1531, landed in lat. 33° 30', and carried off into slavery seventy Indians. Ayllón was of a new and more liberal nature, and, in seeking to establish a settlement, instead of returning with his twelve thousand captives, as it was proposed by Velazquez, he sought to please them; and with this object he purchased some twenty thousand dollars worth of arms, and, by their aid, became a Magnificent. He thus united the two kingdoms, began a campaign against the inhabitants of the Tolocin and Tlaxiacaue valleys, but it was ended by his death.

AXICOATL (ah-sha-yah-kah’-tl), the eighth Mexican king, d. in 1477. He effected the conquest of Teotitlanpec as far as Huautleco. The Tlaltecolans and other people attacked the Mexicans again, but were repulsed, their king, Moquihuix, was killed, and the Tlaltecoy people, after a great battle, were forced to submit. He thus united the two kingdoms, began a campaign against the inhabitants of the Tolocin and Tlaxiacaue valleys, but it was ended by his death.

AXOPIL, son and successor of Nima-Quiché (or Great-Quiché), king of the Quiché tribes that went to Central America after the fall of the Mexican empire of Tula, about 1532. Avoxil was an able chiefman, who extended the limits of his nation and promoted its civilization and prosperity. In his old age he divided his dominions, giving the Cakchiquel kingdom to his son Jintemal, and that of Zutuhil, or Atitén, to his son Avoxil, keeping for himself what he had conquered.

AVAILAS, Juan de (ay-ay-las’), Spanish governor of Paraguay, d. in 1538. He was a companion of Pedro de Mendoza in the conquests along the borders of Plata river. He ascended the Parana and Paraguay rivers, routed the Indians, and founded both the colony and the city of Asunción. Then he crossed the continent with 200 men, as far as to the borders of Peru, and was killed by savages.

AYRES, Romemy Beck, soldier, b. at East Creek, N. Y., 20 Dec., 1825; d. in Fort Hamilton, N. Y., 4 Dec., 1888. He was graduated at West Point in 1847, going at once to Mexico as lieutenant in the 3d artillery, and remaining in garrison at Fort Preble, Mexico, until 1850. From that time till the outbreak of the civil war he was on frontier and garrison duty in various parts of the country. In 1859-’61 he was at the artillery school for practice at Fortress Monroe. In May, 1861, he was promoted to be captain in the 3d artillery, and he was present at all the early engagements of the war about the defenses of Washington. After the evacuation of the Smith’s division and of the 6th army corps, he accompanied the army of the Potomac in the Peninsula campaign of 1862, and thence to the Maryland campaign, ending with the battle of Antietam. He was obliged to take a sick-leave of nearly three
months, but was in the saddle again in December and engaging in the winter campaign on the Rapapannonk. He was at Fredericksburg, Chancellorsville, and the intervening engagements of less moment. As brigadier-general of volunteers from 29 Nov., 1863, he commanded a division of the 5th corps at Gettysburg, and was then ordered to New York city to suppress the draft riots. In 1864 he was with his command in the movement against Richmond, beginning with the battles of the Wilderness (May, 1864). He was wounded at the siege of Petersburg in June, returned to duty in August, and was present at all the major engagements, ending with the surrender of Lee's army at Appomattox, 9 April, 1865. During this period he received successive promotions and brevets in his regular army grade until he was lieutenant-colonel of the 28th infantry and brevet major-general. He was mustered out of the volunteer service as major-general 30 April, 1866. Since the war he has served on the executive and judicial boards. He was promoted in regular course to the colonelcy of the 3rd artillery, 18 July, 1879.

AZANZA, Miguel José (ah-than-thahl), the 54th viceroy of Mexico, b. in Navarre in 1746; d. in 1826. After service to Spain as a diplomatist and soldier, he was appointed viceroy of New Spain and took up residence in Mexico in 1819. He destroyed Mexican commerce and industries, especially silk, cotton, and woollen manufacturing, were very much promoted, notwithstanding several public calamities like the hurricane that almost destroyed the city of Acapulco in July, 1799, and the terrible earthquake of March, 1800. In November of next year a year later, the boundary between the Spanish and Portuguese possessions was discovered, Azanza was recalled to Spain in May, 1800.

AZARA, Felix de (ath'-a-ra), Spanish naturalist, b. in Aragon, 18 May, 1746; d. there in 1811. He became a brigadier-general in the Spanish army, and was wounded in the war against the Algerine pirates (1775). In 1781 he went to South America as a member of an expedition sent to the coast of Paraguay and the Plata region. His "Essai sur l'histoire naturelle des quadrupedes de la province du Paraguay" was first published in Paris, 1803, and in Spanish in Caracas (Madrid, 1802), under the auspices of his brother, the Chevalier José Nicolas de Azara (b. in 1731, d. in Paris in 1804). Spanish ambassador to France, who made a Spanish translation of Middleton's Ceylon, Felix de Azara's masterpiece, "Voyage dans l'Amérique méridionale depuis 1781 jusqu'en 1801" (4 vols., Paris, 1809), translated by Sonmini, with additions by Benrath, whose commentators, as well as those of Somnini and Cuvier, give additional value to the work. It contains a narrative of the discovery and conquest of Paraguay and the Plata river, and ornithological descriptions. A Spanish translation by Varela was published in Montevidoe.

AZPILCUETA, Juan (ah-thay-ve-doh), count of Barca, Portuguese statesman, b. in 1784; died in 1817. After co-operating in the establishment of the academy of sciences at Lisbon, he represented his government in Holland, France, Prussia, and Russia. He was first minister of John VI, whom he followed to Brazil in 1807. There he was one of the chief men in Brazilian affairs, and took great interest in promoting education and industry. He taught the Brazilians how to manufacture porcelain, made special studies and experiments in his own splendid botanical garden, as well as the first trials for the acclimatization and culture of the tea-plant in Brazil, and was the founder of a school of fine arts. His works include two tragedies and a translation of Virgil's pastoral.
BABBITT, Edwin Burr, soldier, b. in Connecticut about 1802; d. at Fort Monroe, 10 Dec., 1881. He was appointed to West Point from Indiana, and was graduated in 1826. He became first lieutenant, 3d infantry, 31 March, 1834, assistant quartermaster, 10 March, 1836, and captain, 3d infantry, 1 July, 1839. He served in the Florida war of 1837–8, and in the Mexican war during 1847–8. On 30 May, 1848, he was brevetted major "for meritorious conduct while serving in the enemy's country." He was made chief quartermaster of the department of Oregon 14 Nov., 1860, and of the department of the Pacific in 1864. He was lieutenant-colonel in 1865, when he was retired from active service, being over sixty-two years old. He was brevetted brigadier-general for his services on 13 March, 1865. Gen. Babbit, notwithstanding his retirement, served as chief quartermaster of the department of the Columbia from 1866 till 1867, and had charge of the clothing depot of the division of the Pacific from 1867 till 1869.

BABBITT, Isaac, inventor, b. in Taunton, Mass., 26 July, 1799; d. in Somerville, Mass., 26 May, 1862. He was a goldsmith by trade, and early turned his attention to the production of alloys, and in 1824 made in Taunton the first Britannia ware manufactured in the United States. As this proved financially unsuccessful, he withdrew, and in 1834 removed to Boston, where he engaged with the South Boston Iron Company, better known as Alger's foundries. While there employed, in 1839, he discovered the now well-known anti-friction metal that bears his name and is so extensively used in lining boxes for axles and guides. For this invention he was rewarded in 1841, a gold medal from the Massachusetts charitable mechanical association, and afterward congress granted him $29,000. He subsequently patented this material in England (1844) and in Russia (1847). For some time he devoted his attention to the production of the metal, and he was also engaged in the manufacture of soap.

BABCOCK, Charles A., naval officer, b. in New York city, 12 June, 1831; d. in New Orleans, 29 June, 1876. He was appointed from Michigan, as a midshipman, 8 April, 1850, became passed midshipman in 1856, lieutenant in 1859, lieutenant-commander in 1862, and commander in 1869. From 1862 to 1864 he commanded the steamer "Norse" of the North Atlantic blockading squadron. While co-operating with the army on the James, York, and Pamunkey rivers, he defeated the confederates in several actions, and was highly commended by Rear-Admiral Lee, who, in 1864, when commanding the Mississippi squadron, selected Babcock as his fleet-commander. In June, 1864, he was the erection of an ordnance depot at Jefferson barracks, Missouri. He was afterward attached to the Pensacola navy-yard, and in 1868–9 commanded the steamer "Nyack," of the South Pacific squadron.

BABCOCK, Henry, soldier, b. in Rhode Island in 1756; d. in 1800. He was a son of Chief Justice Babcock of Rhode Island. He entered Yale in 1752, entered the army, became a captain at seventeen years of age, and at nineteen served under Col. Williams at Lake George. He was major in 1756, lieutenant-colonel in 1757, and in 1758 colonel of a Rhode Island regiment that took part in the unsuccessful attempt to capture Ticonderoga. Ga. Here he was wounded in the knee. He was afterward present at the capture of the place by Sir Jeffrey Amherst, in 1759. He settled at Stonington, Conn., and in February, 1776, was made commander of the troops at Newport, R. I., but in May was removed on account of insanity.

BABCOCK, James P., journalist, b. in New York in 1809; d. in New Haven, Conn., 18 June, 1874. He began newspaper work at an early age, and in 1830 became editor of the New Haven "Palladium," which soon began to issue a daily edition and which he conducted for thirty-one years. He controlled the nominations of the whig party for many years, and, though hostile to the free-soil party at its inception, he finally gave it a hearty welcome in 1854. He retained his prestige with the republican party for some years, took an active part in furthering the national cause during the war, and, shortly after his resignation as editor of the "Palladium," was appointed, by President Lincoln, collector of the port of New Haven. He subsequently maintained that he has always sustained the policy he supported; and, after the rupture between the president and the republicans, Mr. Babcock acted with the democratic party, and, after an angry and excited contest, was nominated by them for congress, but was defeated by the republican nominee. He was elected by the democrats to the state legislature in 1870. The following year he was elected judge of the police court of New Haven.

BABCOCK, James Francis, chemist, b. in Boston, 23 Feb., 1844; d. in Dorchester, Mass., 19 July, 1897. He was educated at Lawrence scientific school, studying chemistry. Subsequently he opened a laboratory in Boston, and he has since been occupied as an analytical chemist, also testifying as a chemical expert in important capital and patent cases. For five years he was professor of chemistry in the Boston university, and in 1881 he accepted that chair in the Massachusetts college of pharmacy. In 1870 he was inspector of milk in the city of Boston, and for ten years he filled the place of state assayer. The reports he has been principally official reports relating to the chemistry of food and on sanitary topics. He is well known as the inventor of a fire-extinguisher.

BABCOCK, Orville Elias, soldier, b. in Franklin, Vt., 25 Dec., 1855; drowned in Mosquito Inlet, Fla., 2 June, 1884. He graduated at West Point, and entered the engineer corps as 2d lieutenant on 6 May, 1881. Promoted, 17 Nov., 1881, to a first lieutenant, he constructed, in February, 1882, a pontoon bridge at Harper's Ferry for Banks's movement to Winchester. He was made a captain in the engineer corps on 1 June, 1883, and was with the 9th corps at the surrender of Vicksburg. In the first Tennessee campaign, taking part in the battle of Blue Lick Springs and subsequent actions, and at the siege of Knoxville. On 29 March, 1864, he was promoted lieutenant-colonel and appointed aide-de-camp to Gen. Grant, in which capacity he served in the battles of the Wilderness and subsequent operations of the army of the Potomac. On 13 March, 1865, he was brevetted brigadier-general of volunteers. At the surrender of Lee at Appomattox he selected the place where the generals met. He was promoted a colonel in the regular army on 25 July, 1866, and served as aide-de-camp to the general-in-chief until Gen. Grant was inaugurated president, when he was assigned to duty with the president and acted as his
secretary. He was appointed superintending engineer of public buildings and grounds in 1871, and supervised the construction of Washington aqueduct, the chain bridge across the Potomac, Ana- costa bridge, and the east wing of the department office, and also the plans for the improvement of Washington and Georgetown harbors. In January, 1876, he was indicted by the grand jury of St. Louis for complicity in revenue frauds. He de-
mended a court martial, but was brought to trial in Missouri, and acquitted, with the aid of a deposition by President Grant.

BABCOCK, Rufus, clergyman, b. in North Colebrook, Conn., 18 Sept., 1798; d. in Salem, Mass., 4 May, 1857. He was graduated at Brown in 1821, and acted as tutor in Columbia college (now university), D. C., for two years. He was ordained pastor of the Baptist church in Poughkeepsie in 1823, and became a associate pastor in Poughkeepsie. He was pastor of the first Baptist church in Salem, Mass., in 1826. He was elected president of Waterville college, Me. (now Colby university), in 1833; but in 1836, his health failing, he resigned and soon returned to ministerial duties, first as pastor of the Spruce street church in Philadelphia, where he remained three years, and then, on leaving his former charge in Poughkeepsie, and finally as pastor of the first Baptist church in Paterson, N. J. For many years he took a leading part in the great movements of the Baptist denomination in the United States. He was three times elected corresponding secretary of the American and Foreign Bible Society. He was elected a director of the Sunday-school union of Philadelphia, and of the American colonization society, and district secretary of the Baptist publication society, Philadelphia. Dr. Babcock founded, and for five years edited, the "Baptist Memorial," a monthly magazine of biography and current religious intelligence. He published "Claims of Education Societies" (1829), and became a leading voice in Baptism" (1828); "Making Light of Christ" (1830); "Memoirs" of Andrew Fuller (1830), George Learned (1832), Abraham Booth, and Isaac Back-

BACHE, François, Canadian engineer, d. 5 Aug., 1864. He did much toward improving the navigation of the lower St. Lawrence by building wharves, providing for a new system of light-houses, and introducing steam tugs. He was a member of the executive and legislative council, and adjutant-general for the province of Quebec.—His grandson, Louis François George, Canadian statesman, b. in Montreal, 26 Aug., 1834. He is descended from Jacques Baby de Rauville, an officer in the celebrated regiment Carignan Salières, which came to Canada in 1662. He was educated at St. Sulpice college, Montreal, and at the college of Jolliette; served for a time with a company of the 4th regiment in Canada in 1857. He was elected a representative for Jolliete in 1872, re-elected in 1874, and again in 1878, and on 28 Oct. of the latter year was sworn of the privy council as minister of inland revenue. He is a conservative in politics.

BACA, Luis (bahi-eh), Mexican composer, b. in Durango, 15 Dec., 1826; d. in 1855. He received his first education in Mexico, and then went to Paris to study medicine, but devoted himself entirely to music. In Paris, where he made the ac-

BACHE, Theophylact (baitch), merchant, b. in Settle, in the West Riding of Yorkshire, England, 17 Jan., 1734; d. in New York, 30 Oct., 1807. He landed in New York 17 Sept., 1751, took charge of the business of Paul Richard, who died in 1756, be
came the owner of merchant vessels, and engaged in privateering. He was identified with the resis-
tance to the crown in 1765, and in 1770 was one of the committee appointed to report the resolutions of non-

lished himself as his brother's agent, engaged in
Advertizer," afterward known as the "Aurora," which violently opposed the administrations of both Washington and Adams, and was one of the ablest and most influential journals of the day.

—Alexander Dallas, grandson of Richard, b. in Philadelphia, Pa., 19 July, 1806: d. in Newport, R. I., 17 Feb., 1867. He early showed an unusual aptitude for learning, and his first instruction was received at a classical school in Philadelphia. At the age of fourteen he was appointed to the U. S. military academy, where, though the youngest member of his class, he was at its head when graduated in 1825. His failure to receive a demerit during the four years is cited as one of the few instances of that character in the history of the academy, so noted for its rigid discipline. On his graduation he was appointed lieutenant in the corps of engineers, but was retained at the academy as assistant professor of engineering during 1826, when, until 1829, he served as assistant engineer in the construction of Fort Adams, at Newport, R. I., under Col. J. G. Totten. Here he met Miss Nancy Charke Fowler, who afterward became his wife and also his associate in the preparation of much of his published material. In 1829 he was called to the chair of philosophy and chemistry at the University of Pennsylvania, which he occupied until 1841. His resignation from the army is dated Feb. 14, 1829.

Soon after his arrival in Philadelphia he became a member of the Franklin Institute, and at once actively participated in its work, as its "Journal" between 1829 and 1836 abundantly testifies. His labor at this time was undoubtedly the investigations relating to the bursting of steam boilers. His valuable researches in various branches of physics and chemistry, published in the "Transactions of the American Philosophical Society," of which he was a prominent member, belong to these years, and his first meteorological investigations date from this period. In 1836 he was intrusted with the organization of Girard College, Philadelphia, became its first president, and was sent to Europe to study the systems of education and methods of instruction and discipline adopted there. On his return in 1839 the results were embodied in a report made to the trustees, which did much to improve the theory and practice of education in the city, in the unfinished condition of the college, and in consequence of some delay in the adjustment of its funds, it was not deemed advisable to organize it at once for active operations; therefore Prof. Bache offered his services to the municipal government. He became principal of the high school, and in 1841 was called to his class in 1829 he was superintendent of the public schools. The system developed by him while in office has since been generally regarded as a model, and has been introduced in several cities of the union. While in Philadelphia he established, and for some years directed, a magnetic and meteorological observatory, which was largely supported by the American Philosophical Society. In 1842, having satisfactorily completed his labors in the cause of public instruction, he returned to his civil profession, where he remained until November, 1843, when he was appointed to succeed the late F. R. Hassler as superintendent of the coast survey, which place he held until his death. The survey originally recommended to congress by President Jefferson in 1807 was not definitely established until ten years later, when, by the appointment of Mr. Hassler as superintendent, its actual existence began. Under his direction it flourished at times and the work, though limited in scope, continued until his death; but with the advent of Prof. Bache the undertaking assumed larger proportions, and improved plans for extended operations were put into execution. During his administration the practical value of the survey was thoroughly demonstrated. In the accomplishment of his designs he was not only aided by congress, but his efforts were likewise greatly encouraged by the approval of scientific societies and their leaders. During the civil war he greatly assisted the naval and military forces by placing the resources of the coast survey at their disposal. From January to December, 1863, he was chief engineer for devising and constructing the defences of Philadelphia, when it was threatened by the invasion of Pennsylvania. In addition to his work on the coast survey, he was ex-officio superintendent of weights and measures, and served, until his death, on the light-house board. He was elected a member of the Smithsonian Institute, 1846, and annually during his life was reflected by congress. He was active in its direction and in the shaping of its policy. During the civil war he was elected a vice-president of the U. S. Sanitary Commission, and rendered efficient aid in its work. The University of New York in 1856, the University of Pennsylvania in 1837, and Harvard in 1851, conferred upon him the degree of L.L.D. He served as president of the American Philosophical Society, and of the American Association for the Advancement of Science, and was the first presiding officer of the National Academy of Sciences, as well as the incorporator and first president of the Royal Society of London, the Institute of France, the Royal Academy of Turin, the Imperial Geographical Society of Vienna, and many similar organizations, included him among their honorary members. The excellence of his work on the coast survey was acknowledged by different foreign governments, and he was the recipient of several foreign letters of the Royal Society of London, to the National Academy of Sciences; the income is to be devoted to physical research. See the "Memoir of Alexander Dallas Bache," by Joseph Henry, with a list of his papers published in Volume I. of the "Biographical Memoirs" of the National Academy of Sciences. This memoir appears in the Smithsonian Reports for 1870, and is also a special value in the publications of the Smithsonian Institute. —Franklin, son of Benjamin Franklin Bache, physician, b. in Philadelphia, 25 Oct., 1792; d. there, 19 March, 1864. He was graduated at the University of Pennsylvania in 1810, and received his medical diploma from the same university in 1814. In 1819 he entered
the army as assistant surgeon, and in 1814 was appointed surgeon. In 1816 he resigned, and began the practice of his profession in Philadelphia. From 1824 to 1836 he was physician to the Walnut Street prison; from 1826 to 1832, professor of chemistry in the Franklin Institute; from 1829 to 1836, physician to the Eastern penitentiary; from 1831 to 1841, professor of chemistry in the Philadelphia College of Pharmacy; and from 1841 to his death was professor of chemistry in Jefferson Medical College. In 1854 and 1855 he was a member of the American Philosophical Society, and at the time of his death president of the deaf and dumb asylum corporation. In 1818 he published a "System of Chemistry for the Use of Students of Medicine," and in connection with Dr. George Wood he prepared, in 1830, a "Pharmacopoeia" that was adopted by a national convention of physicians, and became the basis of the present U. S. Pharmacopoeia and U. S. Dispensatory. Of the latter work he was the editor, with Dr. Wood, from 1833 till his death. He published a "Supplement to Henry's Chemistry" (1823); "Letters on Separate Confinement of Prisoners" (1829–30); and "Introductory Lectures on Chemistry." He also edited several works, from 1823 to 1832 was one of the editors of the "North American Medical and Surgical Journal," and contributed largely to scientific journals. A memoir of him was published by Dr. George B. Wood (Philadelphia, 1865).—Hartman, another son of Benjamin Franklin Bache, engineer, b. in Philadelphia, Pa., in 1797; d. there, 8 Oct., 1872. He was West Pointer; brevet captain of staff, and assistant topographical engineer. For forty-seven years he was constantly employed on topographical surveys and works of hydrographic and civil engineering, under the direction of the war department, till 7 March, 1867, when he was placed on the retired list. He became brevet major of engineers, 24 Oct., 1828; and 3, 7 July, 1838; lieutenant-colonel, 6 Aug., 1841; colonel, 3 March, 1863; and on 13 March, 1865, he received the brevet of brigadier-general, the highest grade in the engineer corps, for long, faithful, and meritorious services. Among his engineering works of conspicuous merit were the construction of the Delaware breakwater and the successful application of coral-reefs to the construction of light-houses upon sandy shoals and coral-reefs. He was engineer of the 4th light-house district from 1850, and a member of the light-house board from 1862 to 1870.—Benjamin Franklin, great-grandson of Benjamin Franklin, surgeon, b. in Monticello, Va., 7 Feb., 1891; d. in New York city, 2 Nov., 1881. He was graduated at Princeton in 1819, and at the medical department of the University of Pennsylvania in 1823, entered the navy as assistant surgeon in 1824, and became surgeon in 1828. From 1832 to 1836 he was stationed at Pensacola navy-yard, and, while on leave from 1836 to 1841, he was professor of natural science and natural religion at Knox College, Ohio. He was first Lieuten-ant of the Mediterranean squadron in 1841–4, and of the Brazil squadron in 1847–50. From 1850 to 1854 he was at the New York naval hospital, and then organized at New York the laboratory that furnishes all medical supplies to the navy. He was director of this from 1853 to 1871, and in 1861 did great service to the government by restocking the laboratory on his own re-

and retired from active service.—Henry W., engineer, b. in 1839; d. in Bristol, R. I., 7 Nov., 1878. He was a descendant of Sarah Baché, and a son of Prof. Henry Bache, of the U. S. coast survey. He was professor of science for the same work, and on duty in Florida contracted a malarial fever which resulted in his death.

BACH, Pietro, educator, b. in Sicily in 1787; d. in Boston, Mass., 22 Aug., 1853. He was a graduate of the university of Padua and a lawyer by profession, was implicated in Murat's attempt to seize the throne of Sicily, and in consequence was obliged to fly to Italy in 1815. He resided in England till 1825, and then came to the United States. From 1836 to 1846 he was teacher of Italian and Spanish in Harvard college. He was the author of several grammars and phrase-books and a book of fables for learning Italian, and of "A Comparative View of Spanish and Portuguese Languages." (Cambridge).

BACHILO Y MORALES, Antonio (bache'-el-yo-mo-ral'es), Cuban ant toasted, b. in Havana in 1812. He was admitted to the bar in 1839. He edited various newspapers and reviews, filled successively several chairs in the university of Havana, has been director of the institute of higher education, and is one of the correspondents of the American Philosophical Society, and a corresponding member of the Society of Antiquaries of northern Europe, and of the historical societies of New York and Pennsylvania. His principal works are "Prontuario General de Agricultura," "Filosofia del Derecho," "Tradiciones Americanas" (1855); "Antigüedades Americanas," "Apuntes para la Historia de las Letras en la Isla de Cuba" (3 vols., 1862); "Cuba Primitiva," on the origin, languages, traditions, and history of the Greater Antilles and the Bahamas islands; and "Cuba: Monografía Histórica."

BACHMAN, John, naturalist, b. in Dutchess co., N. Y., 4 Feb., 1790; d. in Charleston, S. C., 25 Feb., 1874. He was associated with Audubon in the preparation of his work on ornithology, and was the principal author of the "Quadrapeds of North America," which the Audobon's illustrated. He also wrote "Two Letters on Hybridity" (1850); "Defence of Luther and the Reformation" (Charleston, 1853); "Characteristics of Genera and Species, as Applicable to the Botany of the United States" (1854); "Notes on the Use of Mankind by Nott and Glidion" (1854); and "Examination of Prof. Agassiz's Sketch of the Natural Provinces of the Animal World," etc. (1855), and was a contributor to the "Medical Journal" of South Carolina. In 1813 he was licened to preach, and from 1815 until his death was pastor of the Lutheran church in Charleston.

BACK, Sir George, explorer, b. in Stockport, England, 6 Nov., 1796; d. in London, 23 June, 1878. He entered the British navy in 1808, and in 1817 accompanied the Buchanan expedition to Spitzbergen. In 1819 he accompanied Sir John Franklin's expedition to the Arctic region, and again in 1825. In 1823 he commanded a search party sent out for Sir John Ross, then in the polar seas, and in 1836 he made his final voyage to the north in command of the "Terror." He showed great sagacity in his management, and the ultimate return of the first two expeditions was credited to his ability with which he directed his charge. He received a gold medal from the geographical society in 1837, and two years later was knighted. He was made rear-admiral in 1857, and admiral in 1867. He is the author of a "Narrative of the Arctic Land Expedition," etc. (London,
BACON, Franklin Thomas, lawyer, b. in Lee, Mass., 6 May, 1813; d. in Cleveland, Ohio, 14 May, 1870. He lived on a farm near Lansing, N. Y., was graduated at Yale in 1836, studied law in Cleveland, and was admitted to the bar in 1839. He was elected prosecuting attorney of the county in 1841, and was sent to the Ohio house of representatives in 1846, and to the state senate in 1848. He was a delegate to the peace congress at Washington in 1861. He supported McClellan for president in 1864, and was a delegate at Philadelphia in 1866 to form a new party. He gained especial distinction in the early part of his career as prosecuting attorney at the trial of Brooks, who was sentenced to life-long imprisonment for wrecking a train, and as attorney for the Oberlin rescuers, who had assisted in the escape of a slave. In his latter years he was much consulted in railroad cases, and was influential in settling the principles governing the Ohio courts regarding railroads.

BACON, David, missionary, b. in Woodstock, Conn., 24 Aug., 1862. His labors and sufferings as missionary to the Ojibbews Indians in the territory of Michigan, and afterward as founder of a Christian town at Tallmadge, Ohio, have been narrated in a "Sketch of the Rev. David Bacon," by Rev. Leonard Bacon, D. D. (Boston, 1876).—His son, Leonard, clergyman, b. in Detroit, Mich., 19 Feb., 1822; d. 25 Aug., 1872. His labors and sufferings as missionary to the Ojibbews Indians in the territory of Michigan, and afterward as founder of a Christian town at Tallmadge, Ohio, have been narrated in a "Sketch of the Rev. David Bacon," by Rev. Leonard Bacon, D. D. (Boston, 1876).—His son, Leonard, clergyman, b. in Detroit, Mich., 19 Feb., 1822; d. 25 Aug., 1872. His labors and sufferings as missionary to the Ojibbews Indians in the territory of Michigan, and afterward as founder of a Christian town at Tallmadge, Ohio, have been narrated in a "Sketch of the Rev. David Bacon," by Rev. Leonard Bacon, D. D. (Boston, 1876).—His son, Leonard, clergyman, b. in Detroit, Mich., 19 Feb., 1822; d. 25 Aug., 1872. His labors and sufferings as missionary to the Ojibbews Indians in the territory of Michigan, and afterward as founder of a Christian town at Tallmadge, Ohio, have been narrated in a "Sketch of the Rev. David Bacon," by Rev. Leonard Bacon, D. D. (Boston, 1876).—His son, Leonard, clergyman, b. in Detroit, Mich., 19 Feb., 1822; d. 25 Aug., 1872. His labors and sufferings as missionary to the Ojibbews Indians in the territory of Michigan, and afterward as founder of a Christian town at Tallmadge, Ohio, have been narrated in a "Sketch of the Rev. David Bacon," by Rev. Leonard Bacon, D. D. (Boston, 1876).
pastoral work, he occupied the chair of didactic theology in Yale until 1871, and thereafter was lecturer on ecclesiastical polity and American church history. He was a representative of the liberal orthodox and historic polity of the ancient New England churches. His life was incessantly occupied in the discussion of questions bearing on the interests of humanity and religion. Probably no subject of serious importance that came into general notice during his long career escaped his earnest and active attention. A public question which absorbed much of his thought after 1829 was that of slavery. His subsequent position that of resistance to slavery on the one hand, and of resistance to the extravagances of certain abolitionists on the other; and he thought himself well rewarded for forty years of debate, in which, as he was wont to say of himself, quoting the language of Baxter, that, "where others had had one enemy he had had two," when he learned that Abraham Lincoln referred to his volume on slavery as the source of his own clear and sober convictions on that subject. He was a strong supporter of the union throughout the civil war, and took active part in the various constitutional, economic, and political discussions to which it gave rise. He was influential in securing the repeal of the "omnibus" by his discussions in the Connecticut divorce law. In March, 1874, he was moderator of the council that rebuked Henry Ward Beecher's society for irregularly expelling Theodore Tilton, and in February, 1876, of the advisory council called by the Plymouth society. During his later years he was, by general consent, regarded as the foremost man among American Congregationalists. He became known in oratorical debate, in which he excelled, by his books, and pre-eminently by his contributions to the periodical press. From 1826 till 1838 he was one of the editors of the "Christian Spectator." In 1843 he aided in establishing "The New Englander" review, to which he continued to contribute copiously until his death. In that publication appeared many articles from his pen denouncing, on religious and political grounds, the policy of the government in respect to slavery. With Drs. Storr and Thompson he founded the "Independent" in 1847, and continued with them in the editorship of it for sixteen years. He had great delight in historical studies, especially in the history of the Puritans, both in England and America. Besides innumerable pamphlets and reviews, he published "Select Works of Richard Baxter," with a biography (1830); "Manual for Young Church-Members" (1835); "Thirteen Historical Discourses" on the 200th anniversary of the beginning of the 1st church in New Haven (1829); "Views and Reviews of American Law" (1840); "Sovereignly Discussed in Occasional Essays" (1841); "Christian Self-Culture" (1862); "Four Commemorative Discourses" (1866); "Genesis of the New England Churches" (1874); "Sketch of Rev. David Bacon" (1876); and "Three Civic Orations for New Haven" (1879).—Delia, daughter of David, author, b. in Tallmadge, Ohio, 2 Feb., 1811; d. in Hartford, Conn., 2 Sept., 1859. She was a teacher, regarded for some years as a model. In 1846 she delivered a course of lectures. She published anonymously "Tales of the Puritans" (New Haven), and "The Bride of Fort Edward," a drama (New York, 1839). Later she published in London and Boston "Philosophy of the Plays of Shakespeare Unfolded" (1857), with a preface by Nathaniel Hawthorne, besides several works of her husband. David Bacon, conjointly with other writers, was the author of the Shakespearean plays. See Hawthorne's "Recollections of a Gifted Woman" in his "Our Old Home," and Mrs. Farrar's "Recollections of Seventy Years."—Leonard's son, Leonard Woolsey, clergyman, b. in New Haven, Conn., 1 Jan., 1830. He was graduated at Yale in 1850, then studied theology at Andover and Yale, and medicine at Yale, receiving his degree in 1855. He served as pastor of Congregational or Presbyterian churches in Rochester, N. Y., Litchfield and St. Paul, Conn., Brooklyn, N. Y., and Baltimore, Md., and then spent five years in Europe, chiefly England. Returning in 1877, he served as pastor in New Haven, and in 1889 was called to Yale. He was much noticed for the periodical press, and published, besides pamphlets and musical compositions, "The Vatican Council" (1872); "Church Papers" (1876); "A Life worth Living; Life of Emily Bliss Gould" (1878); "Sunday Observance and Sunday Law," including six sermons on the Sabbath (1879); besides "Black Bourbons" (New Haven, 1842); "The Simplicity that is in Christ." (1886); and sundry translations from the French and German, and compilations of psalmody. Another son, Theodore, lawyer, and his five brothers, have won professional and literary distinction,—A daughter, Rebecca Taylor, became distinguished by her philanthropic labors in the founding of the Hampton, Va., institute and the New Haven school of nursing.

BACON, David Francis, physician, b. in Prospect, Conn., 30 Nov., 1813; d. in New York, 23 Jan., 1866. He was graduated at Yale in 1831, and at the medical school in 1836. Soon after the completion of his studies he was sent as principal medical officer to the ethnological and colonization society. During the greater part of his life he resided in New York, and was actively interested in politics. He was a frequent contributor to periodical literature, and published "Lives of the Apostles" (New York, 1835), and also "Wanderings on the Seas and Shores of Africa" (1843). David William, Catholic bishop, b. in Brooklyn, N. Y., in 1814; d. in New York, 5 Nov., 1874. He received a classical training in the New York Roman Catholic schools, where he proceeded to Mount St. Mary's college and seminary, Emmetsburg, Md., and having completed his course returned to New York, where he was ordained in 1848. And so afterward became pastor of the church of the Assumption in Brooklyn. He was unwaried in his efforts for the extension of the Roman Catholic church in that city, and, though his own congregation was the largest in Brooklyn, he was not satisfied until he had purchased the land and erected the church of St. Mary, Star of the Sea, at the corner of Lafayette and Third streets, where he was pastor during the last years of his residence in Brooklyn. In 1855 he was consecrated bishop of the newly created diocese of Portland, Me., which
embrace the states of Maine and New Hampshire. His labors here were unremitting, and were attended with great success. In August, 1874, he made a voyage to Europe for his health, which had been impaired by his illness and his labors. He expected to be benefited.

On his arrival in France he was obliged to go immediately into the hospital at Brest, where he remained until he was carried on board ship to return, and, on his arrival in New York, was carried to St. Vincent's hospital, where he died the next evening. He was a man of fine personal presence and an accomplished scholar, ben tened to be benefited.

BACON, Edmund, lawyer, b. in Virginia in January, 1776; d. in Edgefield, S. C., Feb., 1826. While quite young he was chosen by the citizens of Augusta, Ga., where he was at school, to welcome Washington, then on an official tour through the south as president. This delicate and honorable task," says a contemporary historian, Judge O'Neall, "he accomplished in an address so fortunate as not to have attracted not only the attention of that great man, but to have procured from him, for the orator, a present of several law books." He was graduated at the Litchfield, Conn., law school and settled in Savannah, where he acquired a fortune at the age of thirty. He was retained in the settlement of the estate of Gen. Nathaniel Greene, near Savannah, and it is a curious coincidence that a quotation from one of the law books presented to Mr. Bacon by Gen. Washington enabled him to gain a mooted point for the succession to the estate of the second general. In 1813 he was removed in search of a more healthful location to Edgefield, where he soon became a leading practitioner. He is the "Ned Brace" of Judge Longstreet's "Georgia Scenes," and as a wit and humorist was conspicuous among his contemporaries. He displayed a lavish hospitality, and was the acknowledged autocrat of the table, insomuch that on a certain occasion, when the learned Dr. Jonathan Maxey, president of South Carolina college, was present as a guest, no sooner had Mr. Bacon left the room than Dr. Maxey enthusiastically exclaimed, "A perfect Garrick, sir! A living breathing, acting Garrick!"

BACON, Edward Manuoe, journalist, b. in Providence, R. I., Nov. 29, 1844. He was educated in private schools, finishing his studies in the academy at Foxboro, Mass. At the age of nineteen he was appointed on the staff of the Boston "Advertiser," and has since been connected as reporter, correspondent, managing editor, and editor-in-chief with various journals. He was chief editor of the Boston "Globe" during its career as an independent paper. In May, 1866, he assumed the editorial control of the Boston "Post." The degree of A.M. was conferred on him by Dartmouth in 1879. He has edited several works, among them "King's Hand-Book of Boston" and "Boston Illustrated," and written a "Dictionary of Wrecks," Boston, 1879.

BACON, Ezekiel, jurist, b. in Boston, Mass., 1 Sept., 1716; d. in Utica, N. Y., 18 Oct., 1870. He was educated at Yale college in 1734, studied law in the Litchfield, Conn., law school, and began practice at Stockbridge, Mass. He was a member of the legislature in 1800-7; a representative in congress from 1807 to 1813; chief justice of the court of common pleas for the western district of Massachusetts in 1813, and from that year till 1815 first comptroller of the U. S. treasury. He removed to Utica, N. Y., 1816; was a member of the legislature of that state, judge of the court of common pleas, and a member of the state constitutional convention of 1821. In 1824 he was a democratic candidate for congress, but was defeated.

He published "Recollections of Fifty Years" (1843), "Being the Story of a Life," but it was the story of a long career, and ended in 1840. He volunteered in the 13th Massachusetts infantry for the civil war, and was wounded. In 1864 he went to Paris and entered the École des beaux arts, studying also under Cabanel and Edward Fricre. His best-known work is "Boston Boys and General Gage," which was first exhibited in Paris, and was shown in the Berlin exhibition of 1873 and at the Philadelphia centennial in 1876. His favorite subjects are figures so treated as to tell a story, historical or imaginative, in the most effective manner. His professional residence is for the most part in Paris, and he is a frequent exhibitor at the salon. The titles of some of his more important pictures are "Paying the Bills," a Paris street scene, (1876); "Les Auteurs" and "Land! Land!!" (1878); "In Normandy" (Paris salon, 1878); "The Luck of Roaring Camp" (1881); and "Lover's Quarrel" (1892); "Le Planairese.

BACON, John Edmund, lawyer, b. in Edgefield, C. H., S. C., March, 1822. He was a grandson of Edmund Bacon, was graduated at South Carolina college and entered the theological seminary at Leipzig, Germany. He read law at Litchfield, Conn., and soon won distinction at the bar. His aptitude for the languages, ancient and modern, led to his appointment as secretary of legation to St. Petersburg in 1858, and he acted as charge d'affaires until the arrival of the Hon. F. W. Pickens as U. S. minister. In 1859 he married at St. Petersburg Rebecca Calhoun, youngest daughter of Gov. Pickens. While on his wedding tour he heard of the election of Mr. Lincoln and sent his resignation to the department of state. In 1861 he returned to South Carolina, entered the confederate army as a private, and rose to the rank of major. In 1866 he was sent with Gov. Jones to Frankfort, and later with President Johnson for the restoration of South Carolina to the union. In 1867 he was elected district judge, but was soon afterward deposed by the federal general then in command of that department. In 1872 he was a democratic nominee for congress, but was defeated by R. B. Elliott, the incumbent negro politician. In 1889 he married at St. Petersburg Rebecca Calhoun, youngest daughter of Gov. Pickens.

BACON, Nathaniel, "the Virginia rebel," a colonial leader, b. Suffolk, Va., 1 Jan., 1647; d. in October, 1676. He was educated in the inns of court, London, and settled on a large estate near the head of James river in Virginia. He became a member of the council in 1672, and gained great popularity by his winning manners and eloquent speech. The Virginians were dissatisfied with the measures taken by Gov. Berkeley for defense against the Indians, and chose Bacon, on the outbreak of a fresh Indian war, to lead the colonial military forces. Although the governor refused to commission him, a force collected and defeated the Indians. On 29 May, 1676, Gov. Berkeley proclaimed Bacon a rebel, and sent a force against him. He was captured and tried before the court on 10 June. After the governor was acquitted, restored to his seat in the council, and promised a commission as general for the Indian war. But the governor refused to issue the promised commission. The high rates of taxation, the attempts of the governor to curtail the franchise, and other unpopular measures, in conjunction with
his inefficient Indian policy, fed the popular discontent. Upon compulsion of the rebels, Gov. Berkeley in July dismantled the obnoxious forts, dissolved the assembly, and issued writs for a new election. When he failed to carry out his promises, Bacon returned at the head of 500 men and compelled Berkeley to issue the promised commission. He then prosecuted the operations against the Indians with vigor; but, being again proclaimed a rebel, he issued a counter-manifesto, 6 Aug., and, marching upon Williamsburg, drove the governor from the city. He again routed the governor's forces and burned Jamestown, while Gov. Berkeley was obliged to take refuge on board an English ship. A number of women, wives of the governor's adherents, were seized and held as hostages by the rebels. Bacon died before carrying out his plans for attacking the governor at Acocoma, and Ingrum, who succumbed in the fight, and 1st in declining health, was won over by the governor, and, after the execution of a number of Bacon's principal adherents, the rebellion was extinguished. His career furnished the subject for a novel by William Car ruthers, of Virginia. See Fore's "Tracts Relating to the Origin, Settlement, and Progress of the Col onization Movement of the American Colonists in Africa."

**BAJONE, Samuel**, clergyman, b. in Sturbridge, Mass., 22 July, 1781; d. in Kent, Cape Shilling, Africa, 3 May, 1820. He was graduated at Harvard in 1808, and then studied law, which he subsequently practised in Pennsylvania. For a time he edited the "Worcester Eagle," and later the Lancaster "Gazette," which was at the same time a mission paper in the Protestant Episcopal ministry. In 1819 he was appointed by the U. S. government one of three agents to colonize Africa with negroes, under the auspices of the American colonization society. The expedition sailed for Sierra Leone, reaching that port on 9 March, 1820, and a settlement was made at Campelar, on the Sherbro river. Here his life was saved, and in 1821 he was removed to Kent, where his last days were spent. See "Memoirs of Rev. Samuel Bacon," by Jehudi Ashmun (1812).

**BAKONE, William Thompson**, clergyman, b. in Woodbury, Conn., 24 Aug., 1814; d. in Derby, Conn., 18 May, 1881. He was graduated at Yale in 1833, and studied for a time in the Presbyterian ministry. He studied at the Yale divinity school, and from 1843 to 1845 was pastor of the Congregational church in Trumbull, Conn. For some time he was one of the editors of the "New Englander," and during several years editor and proprietor of the "Journal and Courier," of New Haven. He then resumed his ministerial labors, and was in charge of parishes in Kent and in Derby, Conn. Two volumes of poems written by him were published in Cambridge, the first in 1837 and the second in 1848.

**BADEAU, Adam**, author, b. in New York city, 29 Dec., 1831; d. in Ridgewood, N. J., 20 March, 1865. His education was received at a boarding-school in Tarrytown, N. Y. He volunteered in the military service during the war, and was appointed aide on the staff of Brig.-Gen. Thomas W. Sherman. In that capacity he served in Louisiana until 27 May, 1863, when he was severely wounded, almost at the same time with his commanding officer, in leading an assault on the Confederate works at Port Hudson. In March, 1864, he was appointed Adjutant General with the rank of first of lieutenant-colonel and afterward of colonel. On this duty he accompanied the general in the Wilderness and Appomattox campaigns, and remained on his staff until March, 1869, when he was retired from the army with the full rank of captain and the brevet rank of brigadier-general, U. S. A. He also received a similar brevet in the volunteer service. From May to December, 1868, he was secretary of legation in London, 1883. In August, 1868, he was sent to Madrid as a bearer of government despatches, and in May returned to London as consul-general, retaining that office until September, 1881. In 1877 and 1878 he was given leave of absence by the state department to accompany Gen. Grant on his tour round the world. He was consul-general of the U. S. at London, 1881, and then resigned because he was not permitted by the state department to substantiate charges of corruption which he accused its administration. He had been appointed U. S. minister to Brussels in 1877, and to Copenhagen in 1881, but declined both appointments. He published "The Vagabond," a collection of essays (New York, 1856); "Military History of Ulysses S. Grant" (3 vols., 1867-81); "Conspiracy; a Cuban Romance" (1885); "Aristocracy in England" (1886); and "Grant in Peace" (1886).

**BADGER, George Edmund**, statesman, b. in Newbern, N. C., 13 April, 1795; d. in Raleigh, N. C., 11 May, 1866. He was graduated at the University of Pennsylvania in 1815. In 1816 he was elected to the state legislature, and devoted the next four years of his life to law and legislation. From 1820 to 1825 he was judge of the North Carolina superior court at Raleigh. In 1840 he was a prominent advocate of the election of Gen. Harrison to the presidency; and in March, 1841, he was appointed chief justice of the state. On the death of President Harrison, and the separation of Mr. Tyler from the whig party, Mr. Badger resigned, giving the veto of President Tyler on the second bank bill as his reason. The whigs of North Carolina returned him at the first opportunity to the senate. He was elected to fill a vacancy in 1846 and the seat was elected to a full term. In 1853 President Fillmore nominated him as a judge of the U. S. supreme court, but the senate refused to confirm the nomination. At the expiration of his senatorial term he retired from public life and devoted himself wholly to his profession. In February, 1861, when the proposition to hold a convention for the purpose of seceding from the union was made in the state, he consented to serve as a union candidate if the convention should be called. The proposition was defeated by the people; but when, in May, 1861, the convention was finally called, he served in it as a representative from Wake co. He spoke ably in defence of the union, and after the ordinance of secession was passed, was known as a member of the conservative party. Mr. Badger was a vigorous speaker, but wrote little. He excelled in debate and was a man of profound research.

**BADGER, Joseph**, soldier, b. in Havre ville, Mass., 11 Jan., 1722; d. 4 April, 1806. He held several civil and military offices in his native place, but removed to Gilmanton, N. H., in 1753. He became a colonel in the revolutionary army in 1771, and was mustering officer of troops in his part of the state, and a member of the provincial congress. He was appointed brigadier-general in 1789, was judge of probate from 1784 to 1797, and in 1788 was a member of the convention that adopted the federal constitution. In 1797 he was a member of the state council. He was one of the founders of Gilmanton academy.

**BADGER, Joseph**, missionary, b. in Wilbraham, Mass., 28 Feb., 1757; d. in Perryburg, Ohio, 5 May, 1846. His early education was obtained
entirely from his parents. At eighteen years of age he joined the revolutionary army. Four years later he entered the family of Rev. Mr. Day, father of President Day of Yale, and began study with him. In the spring of the following year he was determined to become a clergyman, and entered Yale college in 1781. He at first supported himself by manual labor and afterward by teaching school, the sum of $200, in continental money, which he had saved, scarcely serving to buy him a coat. He was graduated in 1785, studied divinity, and in 1787 was ordained to the ministry in Massachusetts, where he remained until 1800. In that year the missionary society sent him to the unsettled part of the country northwest of the Ohio river. Here he endured great hardships for thirty years, going from settlement to settlement, over a country where there were neither roads nor bridges, and often passing the night in the branches of a tree. This mode of life gave him great familiarity with the country, which was of use to the American army during the war of 1812, when he served as chaplain. He became an intimate friend of Gen. Harrison, who gave him his appointment. In 1835 he retired and lived with a daughter until his death. See an autobiographical letter, "Letters of Rev. Mr. Badger," edited by the Andover."

BADGER, Joseph, clergyman, b. in Gilmanton, N. H., 16 Aug., 1792; d. 12 May, 1852. His father, revolting against the Calvinism in which he had been educated, had become a deist, and Joseph was given no religious training. When he was ten years old his family removed to Crompton, Canada, where he found almost a wilderness. He was converted in 1811 while visiting his native place, and in 1812 was baptized and began preaching without connecting himself with any regular church. He travelled for a time with a young man named Adams, who shortly afterward united with the Methodists; but Badger determined to "go forth and preach the free salvation to all who would hear." After laboring for two years in Lower Canada with great success, Badger received ordination at the hands of the Free-will Baptists, but maintained his independent position. In 1814 he returned to New Hampshire and preached with remarkable success, though his methods made him unpopular with the Calvinists. In 1817 he was appointed a missionary in the state of New York, and the churches that he founded joined the denomination known as Christians. After a preaching tour through the west in 1825 and a visit to Boston, Mr. Badger returned to New York, where he edited the "Palladium," at that time the organ of the Christian denomination. A stroke of paralysis forced him to give up work, but he preached again for some time before the final shock. See "Life of Joseph Badger," by E. G. Holland (New York, 1854).

BADGER, Milton, clergyman, b. in Coventry, Conn., 6 May, 1800; d. in Madison, Conn., 1 March, 1873. He was graduated at Yale with honor in 1823. After spending a year in teaching in New Canaan, Conn., he began his theological studies at Andover theological seminary, but in 1826 removed to New Haven to become a tutor in Yale college, and finished his preparation for the ministry there. He was ordained 3 Jan., 1828, as pastor of the South Congregational church in Andover, Mass., and remained there until 1855, when he became librarian of Andover theological seminary. He was a constant contributor to the Harvard theological review. He was soon, by the resignation of Dr. Peters, placed in the position of senior secretary, and for thirty-four years he performed the duties of his office with great faithfulness and skill. He possessed a vigorous constitution, but the constant pressure of his work proved too much for him, and in 1869 he was compelled, by the manifestations of the disease that finally ended his life, to withdraw from active duties.

BADGER, Simon, the youngest of the nine children of the Rev. Dr. Badger, of Concord, N. H., was born 12 Aug., 1823; d. in Concord, Mass., 20 June, 1899. He entered the navy as a midshipman, served on the steamer "Mississippi" on the eastern coast of Mexico during the war with that country, and participated in the attack on Alvarado in 1846. He was made midshipman 10 Aug., 1847, and was placed on the frigate Constitution, and in 1850 was detailed for the Pacific squadron, and in 1853-4 as the naval observatory. On 15 Sept., 1855, he was made lieutenant, and, while attached to the sloops "John Adams" in 1855-6, he commanded a party that attacked and destroyed the village of Vutia, Fleece Islands. In 1861-2 he commanded the steamer "Pamunkey," and, in 1862, he took command of the sloops "Mystic," "Cherry," and "Diana," as acting captain, when he was severely wounded in the leg by a metallic splinter. After this he was on shore duty until 1866, and on 23 July of that year was made commander. From 1866 to 1867 he commanded the "Peoria," of the North Atlantic squadron, and received a vote of thanks from the legislature of the islands of Antigua and St. Kitts for services rendered to the authorities. From 1868 to 1870 he was at the Portsmouth navy-yard. In 1872 he was made captain, and on 15 Nov., 1881, commodore. In 1885 he was placed on the retired list.

BADGER, William, governor of New Hampshire, b. in Gilmanton, N. H., 15 Jan., 1779; d. there, 21 Sept., 1852. In his youth he devoted himself to business. He was in the lower house of the state legislature from 1810 to 1812, and from 1814 to 1816 in the state senate, of which he was the president in 1816. He was associate justice of the court of common pleas from 1816 to 1821, and from 1822 to 1832 judge of the superior court of Strafford co. He was governor from 1824 to 1828.

BADIN, Etienne Théodore, clergyman, b. in Orleans, France, in 1768; d. in Cincinnati in 1853. His parents regarded the mental qualities that he developed in his boyhood as extraordinary, and, although very poor, gave him a classical education. He was sent for three years to the college Montaguar in Paris, where he acquired a thorough classical training, and entered the Sulpician seminary at Tours in 1789, with the object of becoming a priest. He immigrated to the United States in 1792 and was ordained by Bishop Carroll in the old cathedral of Baltimore in 1793, being the first priest ordained in the United States. He went to Georgetown college soon afterward to perfect himself in the knowledge of the English language, and was then appointed to do missionary work in Kentucky, which at that period formed a part of the diocese of Baltimore. He took up his residence in Scott co., occasionally making excursions to the Catholic settlements in other parts of the territory. His mission engaged him in traveling through the interior of the Northwest Territory. He was obliged to be almost constantly on horseback, in which way he travelled more than 100,000 miles. In 1796, when his sufferings and hardships were greatest, he was offered the rectorship of St. Genevieve by the Spanish governor of the town,
but did not even return an answer. Father Badin
was for about three years the only priest in Ken-
tucky. In 1797 Bishop Carroll appointed him vicar-general, and sent him an assistant, who died
in the following year. The death or withdrawal of
other priests, who had been assigned to the same
mission, left Father Badin alone again in Kentucky
in 1803, and as, through emigration from Mary-
land, the Catholic population was rapidly increas-
ing, his missionary duties were of a very exhaust-
ing nature. In 1805 he published his "Principles of
Catholics," the first Catholic work printed in the
western United States, in the press of Hallsville in
Indiana, and in 1811 built the church of St. Louis in that
city. In 1812 he erected the church of St. Peter in
Lexington, principally through the aid of his Pro-
estant friends. Owing to a misunderstanding
between him and Bishop Flaget as to the settle-
ment of title to certain properties that had been
acquired by Father Badin and the church before
the creation of the diocese of Bardstown, the latter
left Kentucky in 1819, and spent nine years travel-
ing through Europe. On his return he took charge
of the Monroe mission, Michigan territory, for a
year and a half. From 1830 to 1836 he was connected
with the Pottawattamie Indians on St. Mary's Res-
inuate, which was in Michigan; he was successful
only in converting them to Christianity, but in
forming them to the habits of civilized life. He
established schools among them, and in a few years
all the young people of the tribe had learned to
read English. The last three years of Father Ba-
din's life were spent in Cincinnati as the guest of
Archbishop Purcell. Father Badin was the author
of several poems in English and Latin. The two
principal are "Carmen Sacrum," a translation of
which was printed at Frankfort; the "Epice-
dium," written on the death of Col. Joe Davies at
the battle of Tippecanoe, translated by Dr. Mitch-
ell, of New York; and "Sanctissime Trinitatis
Landes et Invocatis" (Louisville, 1843).

BADIN, Ezra, soldier, b. in Milton, Mass., 25
May, 1746; d. in Dorchester, Mass., 5 April, 1788.
He was a brother of Gen. Stephen Badlam, was
a captain in Grilley's artillery regiment at the site
of Boston in 1775, was in L. Baldwin's regi-
ment in 1776, was present at Trenton and Prince-
ton, and from 7 July, 1777, to 31 Dec., 1780,
was lieutenant-colonel of Baldwin's regiment; the 2d
Massachusetts Regiment was in Badin's regiment
from 1780 to 1782, and was taken prisoner by the
He afterward served as a colonel in the suppression
of Shays's rebellion.—His brother, Stephen, sol-
dier, b. in Milton, Mass., 25 March, 1748; d. in
Dorchester, Mass., 25 Aug., 1815. He entered the
army in 1765, became lieutenant of artillery, and
soon rose to the rank of major, commanding the
artillery in the department of Canada. In July,
1776, he took possession of the eminence opposite
Ticonderoga, naming it Mount Independence on the
18th of that month, on receipt of the news that
the declaration had been adopted by congress. In
August, 1777, he was promoted to the rank of Gen.
Waller of Vermont; in 1779 was made brigadier-gen-
eral of militia. When a captain in New York he
became acquainted with Alexander Hamilton, who
frequently asked his advice in matters of tactics.
He was throughout his life a great admirer and
supporter of Gen. Washington, by whom he was
much esteemed. His later years were passed in Dor-
chester, Mass., where he was prominent in local af-
airs and in the church.

BAENA. Antonio Ladiaslao Monteiro (bahi-
ay'-na), Portuguese historian, d. about 1851. He
gave to Brazil, and was for many years in the mil-
itary service of that empire. He made explora-
tions in the province of Para, and published a full
description of it, in a book entitled "Ensai Coro-
grafico sobre a Província do Para" (1809), and
other valuable works.

BAERLE, or BARLEUS, Gaspard van,
Dutch author, b. in Antwerp in 1584; d. in 1648.
He was professor of philosophy and theology in Ley-
den (1617) and Amsterdam (1631). His works are:
"Poemata Epistolas" (2 vols.), and "Reurn in Brasi-
lian Historie" (Amsterdam, 1800).

BAEZ, Buenaventura (bah-oh-van-tur'-ah), presi-
dent of the Dominican republic, b. in Azua, Santo
Domingo, early in the 19th century. He inherited
a large fortune from his father, a mulatto, who was
prominent in the revolution of 1808; cooperated
with Santana in the establishment of Dominican
independence; and was president from 1849 till
1852, when he was supplanted by Santana, 11 June,
1858, and obliged to remain abroad till after the evacu-
ation of Dominica by the Span-
iards in 1858, when he was elected for a third term.
This was interrupted in March, 1866, by an insurrection led by Gen. Pimen-
tel in favor of Cabral, in consequence of which
Baez was banished to St. Thomas. A new revolu-
tion in December, 1867, drove Cabral from power
and restored Baez. After various direct and indi-
rect negotiations, he signed, 28 Nov., 1862, a treaty
between Great Britain and the United States for the
cession of the bay of Samanía, and the other for the
annexation of the Dominican republic to the United
States, subject to the approval of the people of the
republic, which was ostensively obtained in an ele-
ction (decreed by Baez, 16 Feb., 1870) held under the
protection of American men-of-war. The U. S.
navy, however, refused to ratify the treaty, and
Baez, after having entered the service of the Meso-
american, became chief pilot of seven vessels, and
visited the Spitzbergen coast for fishing. Purchas
also preserved an account of this voyage, written by
Bauin. Again, in 1614, he made a similar trip. In
1615 he piloted the "Discovery," commanded by
Robert Brol, in her search for the northwest pas-
sgage. In 1620 he commanded the "Perseverance".
This voyage, containing much valuable information,
is preserved in the British museum. In 1616 he
again sailed with the "Discovery," passed up through
Davis strait, reaching as far as 78° N. latitude, and
cruised around the open sea now known as Baffin's
bay. His narrative of this voyage was published
later; his opinions on the possible opening of this
great passage are there recorded against the exist-
ence of a northwest passage. He then joined the East
India Company and made voyages to the east un-
der Capt. Shilling in 1617 and 1620. His final
voyage was made as master of the "London" in 1821, and, under the pre-arranged purpose of driving the Portugese whores from Ormuz. During the siege, while engaged in making measurements, he was shot, and died almost immediately. Ballin was the first to determine longitude by observing the time of the moon's culmination. See "The Voyages of William Ballin, 1612-32," edited, with notes and an introduction, by Clements R. Markham, C. B., F. R. S., published by the Royal Geographical Society (London, 1881).

BAGBY, Arthur Pendleton, governor of Alabama, b. in Virginia in 1794; d. in Mobile, Ala., 21 Sept., 1858. He received a liberal education, and settled in Alabama in 1818. He soon gained a reputation as a criminal lawyer, and in 1829-32 was sent to the legislature, where he made a claim to the speakership of the house. He was governor from 1837 to 1841, when he was sent as a democrat to the U. S. Senate to fill the vacancy caused by the resignation of Clement C. Clay. Here he served until 16 June, 1848, when he accepted the office of minister to Russia. On 14 May, 1849, he withdrew and returned home. He was afterward one of the counselors of the state.

BAGBY, George William, author, b. in Buckingham co., Va., 13 Aug., 1828; d. in Richmond, Va., 29 Nov., 1883. He was educated at Edgehill school, Princeton, N. J., and at Delaware college, Newark, Del., leaving the latter at the end of his sophomore year. Subsequently he studied medicine in New York city, and practiced medicine a short time in the vicinity of the University of Pennsylvania. In 1853 he became editor of the Lynchburg (Va.) daily "Express," and was for some time the Washington correspondent of the New Orleans "Creole," Charleston "Mercury," and Richmond "Dispatch." From 1859 he was, until its suspension near the end of the war, the editor of the "Lynchburg Whig." He was a frequent contributor to the "Southern Illustrated News." From 1 Jan., 1870, to 1 July, 1878, he was state librarian of Virginia. He lectured frequently, and met with success as a humorist in many parts of Virginia and Maryland. He was the author of many humorous stories, and wrote several books, the best known of which was "Mozzi's Addums." His sketches were collected and published by Mrs. Bagby, as "The Writings of Dr. Bagby." (3 vols. Richmond, 1884-6.)

BAGIOLI, Antonio, musician, b. in Bologna, Italy, in 1765; d. in New York, 11 Feb., 1871. He began the study of music early in life, and, after a preparatory course in several schools, entered the conservatory at Naples, and remained there for several years under Zingarelli. In 1832 he arrived in New York as musical director of the Montrosé troupe, the first Italian opera company that ever visited the United States. After a successful season the opera troupe went to Havana; but Bagioli remained, married a young lady, and became a teacher of music, attaining a success probably unsurpassed by any professor in this country. He published "One Hour of Daily Study for the Acquisition of a Correct Punctuation of the Words, which is the only Method to become a Perfect Vocalist." (New York, 1864).—His only daughter, Theresa, married Gen. Daniel E. Sickles, F. S. A.

BAGLEY, John Judson, politician, b. in Medina, N. Y., 24 July, 1832; d. in San Francisco, Cal., 27 July, 1881. He received a common-school education in Lockport, N. Y., and in early life emigrated with his father, settling in Constantine, Mich. At the age of fifteen he went to Detroit and secured employment in a tobacco factory. On attaining his majority he began a business of his own in the same line, and was continuously engaged with it until his death, accumulating a large property. He held numerous positions of public trust in the Detroit city government, and in 1868-'9 was chairman of the republican state central committee, gaining great credit for the ability with which he conducted the presidential canvass of 1868. In 1872 he was the republican candidate for governor, and was defeated by a majority exceeding that of the Grant electors. He was relected in 1874. His administrations were marked by his interest in all measures tending to the public good. The educational and charitable institutions were benefited by the judicious legislation urged by him, and the status of the liquor traffic owes its improved condition to his recommendations. He was prominently mentioned as a candidate for the U. S. senate, but lost the nomination in the republican caucuses by a single vote. He was actively identified with the Unitarian church in Detroit, and his donations to various charitable institutions were large and numerous.

BAGOY, Sir Charles, British diplomatist, b. in Birchfield, Staffs, England, 23 Sept., 1781; d. in Kingston, Canada, 18 May, 1843. He was the second son of William, first Lord BagoY. In 1807 he was made under foreign secretary of state; in 1814 was sent on a special mission to Paris; was minister-plenipotentiary at Washington from 1816 to 1819; in 1829 was appointed ambassador to Russia, and in 1834 was sent on a similar mission to Holland; and in 1834 was sent as a special ambassador to Austria. On 10 June, 1842, after the death of Lord Sydenham, he became governor-general of British North America, which office he retained until his death.

BAHNSON, George Frederick, Moravian bishop, b. in Hamburg, Denmark, 16 Sept., 1805; d. in Salem, N. C., 11 Sept., 1869. He was educated at the Moravian college and the theological seminary in Germany, and in 1829 emigrated to the United States and entered the boarding-school at Nazareth, Pa., as a tutor. Five years later he began his ministerial career. The two churches in which he labored longest were those at Nazareth, Pa., and Salem, N. C. He was consecrated to the episcopacy at Bethlehem, 13 May, 1860, and presided over the southern district. In 1869 he went to Europe to attend the general synod of the Moravian church, and in the course of the journey his health failed, and he died a few weeks after his return. Bishop Bahnson was a man of commanding presence, a powerful preacher, and a ripe scholar.

BAILEY, Ann, scout, d. in Harrison township, Gallia co., Ohio, 23 Nov., 1825. She was reputed to have been born in Liverpool, England, about 1735, to have been kidnapped at the age of nineteen, carried off to Virginia and sold, and to have been married a number of times before the age of thirty. Trotter was a member of Col. Lewis's regiment, and was killed by the Indians in the battle of Point Pleasant on 10 Oct., 1774. His widow, moved by revenge, assumed male clothing and adopted the life of a scout and spy, and was often employed to convey information to the commandants of forts. In 1790 she married a soldier named John Bailey, stationed at Fort Clendennin, on Kanawha river. She was exceedingly expert with the rifle, possessed a black horse of remarkable intelligence, and made many perilous journeys from the settlements on the James and Potomac rivers to Fort Clendennin and other distant outposts. On one occasion she rescued the garrison of the fort from destruction by bringing a supply of ammu-
nition from Fort Union, now Lewisburg. After the Indian war, during which her second husband was killed, she lived with her son, William Trotter, on Kanawha river, and removed with him in 1818 to Ohio, where, in old age, she taught school, displaying great mental and physical vigor.

**BAILEY, Anna Warner**, known as "Mother Bailey," patriot, b. in Groton, Conn., 11 Oct., 1758; d. there in 1856, was the wife of Capt. Elijah Bailey, of Groton. She witnessed the massacre at Fort Griswold on 6 Sept., 1781, and on 7 Sept. walked to the scene of carnage, three miles, to search for an uncle, whom she found fatally wounded. At his request to see his wife and child she ran home, saddled a horse for the feeble man, and conducted the child and his wife to the fort. She was the first female in the United States to serve as a nurse during the War of the Revolution. In July, 1813, when the British threatened to attack New London, Mother Bailey rendered great aid to its defenders by tearing up flannel garments for cartridges.

**BAILEY, Ebenezer**, educator, b. in West Newbury, Mass., 25 June, 1795; d. in Lynn, Mass., 5 Aug., 1836. He was graduated at Yale in 1817, and in 1818 was elected a tutor of the college, a name he retained as a law student. Afterward he became a tutor in Virginia, but in 1819 returned to Newburyport, and there opened a private school for young ladies. In 1823 he was appointed master of the Franklin grammar school, and in 1825 teacher of the Boston high school for girls. This school proved unsuccessful, and on the Quinley town, then mayor, pronounced it an entire failure. Mr. Bailey at once replied with vigor in a "Review of the Mayor's Report on the High School for Girls." (Boston, 1828). Subsequently he had charge of the young ladies' high school, and in 1830 was active in the establishment of the American Institute of Education, afterward filling various offices in that body. In 1834 he established a boys' school at Roxbury, which, in 1839, was moved to Lynn. Mr. Bailey was the successful competitor for the prize odes delivered at the Boston theatre in commemoration of Washington's death. Afterward he was on several occasions poet at the Boston anniversary of Harvard. Mr. Bailey was at various times president of the Boston Mechanics' Institute, rector of the home of reform, president of the Boston lyceum, and director of the Boston mechanics' institute. He was a frequent contributor to the "Boston Courier" and other periodicals, and edited the "Young Ladies' Class-Book" (Boston, 1831); "Blakewell's Philosophical Conversations" (1832); and "First Lessons on Algebra" (1833).

**BAILEY, Gamaliel**, journalist, b. in Mount Holly, N. J., 3 Dec., 1807; d. at sea, 5 June, 1859. He studied medicine in Philadelphia, and after obtaining his degree in 1828 sailed as a ship's doctor to China. He began his editorial career in the office of the "Methodist Protestant" in Baltimore, but in 1831 he removed to Cincinnati, where he lived in connection with the Cincinnati Enquirer during the epidemic. His sympathies being excited on the occasion of the expenses of a number of students on account of anti-slavery views from Lane seminary, he became an active agitator against slavery, and in 1836 he associated himself with James G. Birney in the conduct of the "Cincinnati Philanthropist," the earliest anti-slavery newspaper in the west, of which in 1837 he became sole editor. Twice in that year, and again in 1841, the printing-office was sacked by a mob. He issued the paper regularly until after the presidential election of 1844, when he was selected to direct the publication of a new abolitionist organ at Washington. The first number of the "National Era," published under the auspices of the American and foreign anti-slavery society, appeared 1 Jan., 1847. In 1848 an angry mob laid siege to the office for three days, and finally separated under the influence of an eloquent harangue by the editor. The "Era," in which "Uncle Tom's Cabin" originally appeared, ably presented the opinions of the anti-slavery party. Dr. Bailey died while on a voyage to Europe for his health.

**BAILEY, Gilbert Stephen**, clergyman, b. in Fulton, Pa., 17 Oct., 1822. He was educated at Oberlin, and, after studying theology, became a Baptist clergyman, holding pastorates in various places in New York and Illinois till 1863, when he was made superintendent of the Baptist missions in Minnesota and Wisconsin, and presided over the Baptist Theological Union in Chicago. The system of "minister's institutes," now prevalent in the Baptist denomination, was originated by him in 1864, and they were subsequently conducted by him in Chicago, Upper Alton, and Bloomington, Ill. He resumed his preaching and had charge of churches in Pennsylvania, Michigan, and Iowa, and in 1872 took charge of the Harrisburg Baptist school mission in 1880-1, and missionary in southern California in 1885-6. Besides numerous tracts and uncollected poems, he has published a "History of the Illinois River Baptist Association" (New York, 1857); "Caverns of Kentucky" (Chicago, 1866); "Manual of Baptism" (Philadelphia, 1881); "The Baptists in the University of Liberty in America" (1876); "Three Discourses on the History, Wonders, and Excellencies of the Bible" (Otterburn, 1882); "The Word and Works of God" (Philadelphia, 1883); "Prize Discourse on Slander" (Washington, 1884); and "Ingersollism Exposed" (Otterburn, 1884).

**BAILEY, Guildford Dudley**, soldier, b. in Martinsburg, Va., 4 June, 1814; killed in action, 31 May, 1862. He was graduated at West Point in 1856, and assigned to the 2d artillery. He served on frontier and garrison duty, was at Fort Leavenworth during the Kansas disturbances of 1857-9, and at West Point as instructor for a short time in 1859. When the civil war began he was stationed at Fort Meigs, but was ordered to the 1st Bn., Capt. Hunt, superintend, refused to surrender when Gen. Twiggs attempted to give up his entire command to the confederates, and effect his escape into Mexico. Reporting for duty as soon as he could reach the north, he was sent with Hunt's battery to the relief of Fort Pickens, Fla. Returning on account of sickness, he organized and was appointed colonel of the 1st N. Y. light artillery volunteers (25 Sept., 1861), joined the Army of the Potomac, was detailed as chief of artillery in Gen. Casey's division during the Peninsular campaign, and was killed among his guns at the battle of Seven Pines. A monument has been raised to his memory in the cemetery at Ponghkeepsie.

**BAILEY, J. Jacob**, b. in Newbury, N. H., 2 July, 1728; d. in Newbury, Vt., 1 March, 1816. He settled in Hampstead in 1745, and served as a captain during the French war in 1756. He was with Col. Monroe in the siege of Fort William Henry, and was among those who escaped the subsequent massacre on 2 Aug., 1757. He was also militia captain of the volunteers and captured Crown Point in 1759. In 1764 he removed to Vermont, and there obtained a township. Later he was appointed brigadier-general of militia by the state of New York. During the revolutionary war he was commissary-general of the northern department, and in that capacity did much in benefiting the cause of the Americans.
BAILEY, Jacob, clergyman, b. in Rowley, Mass., 16 April, 1731; d. in Amboy, N. S., 26 July, 1808. He was graduated at Harvard in 1753, after which he was ordained, and in 1756 he was called to the church of England, and became a missionary in Pownalborough, now Wiscasset, Maine. During the revolutionary war he was a loyalist, and in 1779 he retired to Nova Scotia. He was called to the rectory of St. Luke's church in Amboy, where he remained until his death. See "Memoir of the life of the Rev. Dr. Bailey, A. M."

BAILEY, Jacob Whiting, naturalist, b. in Ward (now Auburn), Mass., 29 April, 1811; d. in West Point, N. Y., 26 Feb., 1857. He received a common-school education at Providence, R. I., and then studied at West Point, where he was graduated in 1833. He was president of the Artillery and during the following six years served at various military stations in South Carolina and Virginia. From 1834 until his death he was successively assistant, acting, and full professor of chemistry, mineralogy, and geology, at the military academy. His scientific reputation was achieved principally through his papers, generally regarded as the pioneer in this means of investigating the United States. The indicator bearing his name, and other improvements in the construction of the microscope, were devised by him. He made numerous collections, that of microscopic objects containing over 3,000 slides, and his collection of algae about 4,500. Many of his books and papers, were bequeathed to the Boston society of natural history. In 1856 he was elected president of the American association of the advancement of science, and he was a member of many other scientific bodies both in this country and Europe. He was the author of over twenty papers, which appeared in the American Journal of Science and Arts. The following are some of his titles: "Transactions of the Association of Geologists and Naturalists," "The Smithsonian Contributions to Knowledge," and "Journal of Microscopic Science," and also of a volume of "Microscopic Sketches," which contained about 3,000 original figures, and a paper on fossil inorganic objects in California in the reports of the American geological survey. He was a member of the geological survey of his life and scientific labors given in the "American Journal of Science and Arts." 24 (1853, 1865, 1867) - His son, Loring Waort, chemist and geologist, b. in West Point, N. Y., 28 Sept., 1839, studied at Brown university and then at Harvard, where he graduated in 1859. In 1861 he was appointed assistant professor of chemistry and natural history in the university of New Brunswick, at Fredericton. For many years he has been connected with the geological survey of Canada, to whose reports he has regularly contributed accounts of his work. He has written scientific papers for the Canadian Naturalist and "Canadian Record," and has published "Mines of Southern New Brunswick" (1864), and the "Geology of Southern New Brunswick" (1866). Another son, William Whiting, botanist, b. in West Point, N. Y., 22 Feb., 1843, was graduated at Brown in 1864, after which he devoted special attention to botany at Harvard under the direction of Prof. Asa Gray and Prof. G. L. Goodale. In 1867 he served as botanist to the U. S. geological survey of the 40th parallel, and from 1869 to 1871 was assistant librarian of the Providence Athenaeum. In 1877 he became instructor of botany at Brown, and in 1881 professor. He is a contributor of prose and verse to periodicals, and has published a "Botanical Collector's Handy-Book" (Boston, 1881).
BAILLEY

vance suffered a defeat at Sabine Cross Roads on 8 April, and retreated to Alexandria, where it was found that the water had fallen so much that it was impossible for the fleet to pass below the falls. Rear-Admiral Porter, commanding the squadron, was reluctantly making preparations to save what stores he could and to destroy his gunboats, preparatory to retreating with the army, as he was advised that the land position was not tenable, when Lieut.-Col. Bailey proposed to build a dam across the water in the middle of the gunboats so that the gunboats could pass. The regular engineers condemned the project as impracticable; but Lieut.-Col. Bailey persevered, and, in the face of discouraging opposition and indifference on the part of the navy, finally, on 30 April, procured the necessary authority from Gen. Banks. When the work was actually begun, there was no lack of men or of zeal. Gen. Jas. Grant Wilson, then a member of Gen. Banks' staff, strongly advocated the scheme, and aided in the construction of the dam. Details of 3,000 soldiers were kept at work night and day, and several hundred lumbermen from Maine regiments did good service in felling and moving trees. The fatigue parties relieved one another, but the soldiers also felled trees along with their work. The dam took about twelve hours to complete, and was under a semi-tropical sun. The rapidity with which they were able to do the work was a source of wonder to those who had not seen it. It was long a matter of national glory.

On the north bank a tree dam was built, while on the south side, there being no available material for the required work, expedients were resorted to in the construction of dams. Several old mills were thus utilized for the purpose, and the work was pushed so that on the morning of 12 May the whole fleet passed safely down the falls without loss. The Mississippi squadron was saved through the native engineering skill of a Wisconsin farmer. His services were prompt recognition, and on 7 June he was brevetted brigadier-general, and on 30 June was promoted to the full grade of major-general, and subsequently received the formal thanks of Congress.

The officers of the fleet presented him with a sword and a purse of $3,000. After this feat Gen. Bailey's military record was highly creditable. In November, 1864, he was promoted brigadier-general of volunteers, and had command of the engineer brigade of the military division of the west Mississippi and of different cavalry brigades until he resigned, 7 July, 1865. After leaving the army he settled as a farmer in Newton co., Mo., and was elected sheriff, an office which he filled with his accustomed firmness and daring. He met his death at the hands of two desperadoes, upon whom he had personally served warrants, and who attempted to murder him while he was escorting to the county-seat without assistance. It is interesting to know that the main portion of the dam, constructed under such haste, was in place twenty-two years afterward, and bade fair to last indefinitely. It is still known as "Bailey's Dam."

BAILLEY, Joseph Mead, jurist, b. in Middlebury, Vt., Nov. 18, 1826. In Freepor, Ill., He was a member of the Illinois legislature in 1866-70 and presidential elector of the same state in 1876. He was chosen a judge in the 13th judi-
cial circuit, Illinois, in 1877, judge of the first division appellate court in 1878, and chief justice of that court in 1879. He became a trustee of the university of Chicago in 1879.

BAILLEY, Rufus William, educator, b. in North Yarmouth, Me., 13 April, 1796; d. in Huntsville, Tex., 25 April, 1866. He was graduated at Dartmouth college in 1813, and taught in the academies at Salisbury, N. H., and Blue Hill, Me., then studied law with Daniel Webster, but at the end of a year left it for theological semi-

ary, and on the completion of his studies was li-

censed, and began teaching at Norwich Plain, at the same time filling the place of teacher of moral philosophy in the military school. In 1824 he was installed pastor of the church in Pittsfield, Mass., where he remained four years. He was then obliged to remove to the south for the sake of his health, and remained forty years. He became president of twenty years in North Carolina, South Carolina, and Virginia, in the latter state travelling at one time extensively as agent of the colonization so-

ciety. In 1854 he was elected professor of languages in Austin college, at Huntsville, Texas, and in 1858 became its president. He was the author of several sermons and other writings, and frequently published a volume under the title of "The Issue"; also of a volume of sermons entitled "The Family Preacher"; of letters to daughters, entitled "The Mother's Request"; of a "Primary Grammar," and of a "Manual of English Gram-

mar," used extensively in southern schools.

BAILLEY, Silas, clergyman, b. in Massachusetts about 1828; d. in Paris, France, 11 June, 1874. He was graduated at Brown in 1854, studied at Newton theological seminary, and was for a time a pastor in Massachusetts. He became principal of Worcester academy about 1840, and, after several years, was elected president of Granville college, afterward Dennison university, Granville, Ohio, where he remained for twenty years. He then became president of the newly established college at Frank-

lin, Ind., where he remained until his health failed. After filling a pastorate at Lafayette for three years he accepted the professorship of theology at Kalamazoo college, Mich. He bequeathed his library to Franklin college. Dr. Bailey published some essays on Genesis and Hebrew.

BAILLEY, Theodorus, senator, b. in Dutchess co., N. Y., 12 Oct., 1758; d. in New York city, 6 Sept., 1828. He was a representative in congress from New York from 1793 to 1797, and from 1799 to 1803. In 1803 he was chosen a senator from New York, but resigned in the following year and accepted the postmastership of New York city, which office he held until his death.—His nephew,

Theodorus, naval officer, b. in Chateaugay, N. Y., 12 April, 1805; d. in Washington, D. C., 10 Feb., 1875, was appointed a midshipman from New York, 1 Jan., 1818, and received his commission as lieutenant 3 March, 1827. His first cruise was on board the "Cyane." Capt. Trenchard, which cap-

tured the "L'Heureux," he was ordered to escort the "Cape Horn, which sailed in 1820-21. He then made a three years' cruise in the Pacific on the "Franklin." In 1835-5 he sailed on a cruise round the world on board the "Vincennes." After serving on the frigate "Con-

stellation," in which he again sailed round the world, he was placed in command of the store-

ship "Olivebranch." In 1838, off the coast of France, on the break-

ing out of the Mexican war, he was ordered to Cali-

fornia, by way of Cape Horn, an artillery company and several officers who afterward became famous, including Henry W. HALLECK, William T. SHERMAN, and E. O. C. Ord. Lieut. Bailey rendered efficient
aid to the Pacific squadron by fitting out and leading numerous expeditions. He made use of his vessel, an old frigate, as an armed cruiser, and, after landing at Fort Sumter May 14th and capturing San Blas, was actively employed with the land forces in the conquest of California. He was commissioned as commander 6 March, 1849, and as captain 15 Dec., 1853. On 6 Sept., 1853, he was assigned to the command of the "St. Mary's," of the Pacific squadron, and cruised for the next year. Arriving opportunistly at Panama during the riots, he took steps to suppress them that were culminating friendly relations with the inhabitants of the Fiji islands. At the beginning of the civil war he was placed in command of the frigate "Colorado," of the western Gulf blockading squadron, and on 2 May, 1861, cooperated with Gen. Harvey Brown in the operations before Pensacola. He reconnoitred the position of the "Judah," going up to her side in his gig on the night of 13 Sept., 1861, and matured the plan by which Lient. Russell cut out and burned that confederate privateer a few hours later. Joining Farragut's squadron at New Orleans, as second in command, he led the attack in April, 1862, commanding the right column of the fleet in the passage of the forts St. Philip and Jackson, and leading the fleet in the capture of the Chalmette batteries and of the city. He led the attack in the gunboat "Conga," provoking up, ahead of the fire of five or six forts, sustaining unaided the attack of the confederate vessels, rams, and fire, and passed through them to the city. Admiral Farragut sent Bailey to demand the surrender of New Orleans, accompanied by Lient. George H. Perkins, he passed through the streets in the midst of a howling mob, who threatened the officers with drawn pistols and other weapons. In his official report of the victory, dated 24 April, 1862, Capt. Bailey used the famous phrase: "It was a contest of iron hearts in wooden ships against iron-clads with iron beaks—and the iron hearts won." The important part actually taken by Bailey was not adequately recognized in the first official account, but Farragut commended his gallantry and ability in the official report, and sent him to Washington with the despatches announcing the victory. The mistake was afterward rectified by Admiral Farragut, and the correction appended to the report of the secretary of the navy for 1869. He was promoted commodore after the capture of New Orleans, receiving his commission 16 July, 1862, and was assigned to the command of the eastern Gulf blockading squadron. Although his health was impaired, he displayed energy and perseverance in breaking up blockade-running on the Florida coast, and within eighteen months more than 150 blockade-runners were captured through his vigilance. After the war he was commandant of the Portsmouth navy-yard from 1863 to 1867. On 25 July, 1866, he was commissioned a rear-admiral, and on 10 Oct., 1866, he was placed on the retired list.

**BAILEY, George Frederick, Canadian engineer, b. in Quebec, 16 Oct., 1824. He was educated at the seminary of Quebec, and in 1844 entered the civil service of Canada in the department of engineering. In 1871 he was appointed assistant chief of the department of public works. He was superintending engineer of the Ottawa and St. Lawrence canals in 1877–8, and in 1879 became deputy minister of public works.**

**BAILEY, George France, archbishop of Quebec, b. at Crane Island, District of Quebec, 26 April, 1788; d. 13 Oct., 1870. He was a member of the Boston medical association, a visiting physician to the Quebec general hospital, and president of the dental association of Quebec. He was called to the senate on 26 March, 1874.**

**BAILLY, Joseph A., sculptor, b. in Paris, France, in 1825; d. 13 June, 1883. He began his career as a wood-carver, came to Philadelphia, and after several years he pursued his profession there. He improved himself to marble sculpture, and became a professor in the Pennsylvania academy of fine arts. He has produced a statue of Washington, which was placed in front of the Philadelphia state-house in 1869; a colossal statue of Witherspoon; the companion groups called "The First Prayer" and "Paradise Lost"; portrait busts of Gen. Grant and Gen. Meade; an equestrian statue of President Bianco of Venezuela, and "Spring."**

**BAILLY, John, clergyman, b. near Blackburn, Lancashire, England, 21 Feb., 1614; d. in Boston, Mass., 12 Dec., 1697. He began preaching at the age of twenty-two at Chester, but was thrown into jail on account of his congregationalist doctrines. After his release he went to Waterford, where he lived and continued his ministry in Limerick, where at the end of fourteen years he was again imprisoned for nonconformity. Set free on the condition of leaving the country, and prohibited even from preaching a farewell discourse to his church, he came to New England about 1684 and was ordained minister of the church at Watertown, 6 Oct., 1685. Bishop of Connecticut was invited to Boston, and in July of the following year became assistant minister of the first church in that city. A volume, issued in Boston in 1689, contains sketches of a series of his sermons and a reprint of a letter of farewell, addressed to his congregation at Limerick in lieu of a parting sermon.**
BAINBRIDGE, Henry, soldier, b. in New York in 1803; d. at sea near Galveston, 31 May, 1857. He was appointed to West Point from Massachusetts, was graduated in 1821, served as lieutenant on frontier duty, became a captain 15 June, 1836, and served in the Florida war, in the military occupation of Texas, and in the war with Mexico. For gallantry at Monterey, where he was severely wounded in storming the enemy's works, he was brevetted major, 23 Sept., 1846. He became major in the 7th infantry 16 Feb., 1847, and was engaged in Contreras and Churubusco, gaining the brevet of lieutenant-colonel for gallant conduct, and in the assault and capture of Mexico. In 1849 and 1850 he served in the Seminole war. He was promoted to a lieutenant-colonel 11 June, 1851, and served in Texas until his death on board the steamer "Louisiana," burned in Galveston bay.

BAINBRIDGE, William, naval officer, b. in Princeton, N. J., 7 May, 1774; d. in Philadelphia, 28 July, 1833. His ancestor, who in 1700 settled in New Jersey, was the son of Sir Arthur Bainbridge, of Durham co., England. Capt. Bainbridge's father was a descendant in the fifth generation from Sir Arthur. William, his fourth son, was distinguished for his adventurous disposition in early youth, and, with a good education, was fitted to follow the sea. He entered the merchant marine at the age of fifteen, and at nineteen became commander of a merchant ship. In 1796, while commanding the ship "Hope," on his passage from Bordeaux to the back of St. Thomas, he was attacked by a British schooner of eight guns and thirty-two men. Bainbridge returned the fire and kept it up until the schooner struck her colors. The armament of the "Hope" consisted of four 9-pounders and nine men. He could have retained the schooner as a prize, but he merely hailed the captain and told him "to go about his business and report to his masters that if they wanted his ship they must send a greater force to take her, and a more skilful commander." This performance gave him a reputation in Philadelphia, and he could have had command of any ship sailing from that port. On one occasion, when the English raaze "Indefatigable," under the command of Commodore Bainbridge, was outward bound, impressed a seaman from on board the "Hope," Bainbridge boarded the first English merchantman he encountered at sea and took out of her the best seaman she had on board; he then told the British captain that he might report that William Bainbridge had taken one of his majesty's subjects in retaliation for the capture of the American ship "Hope," by Lieut. Norton, of the "Indefatigable." Though this afforded no redress for the original injury, it was designed to show British naval officers that the rights of American citizens, as far as they were entrusted to Capt. Bainbridge's care, were not to be molested with impunity. In 1798 Bainbridge married, at the island of St. Bartholomew, Miss Susan Hylieger, daughter of a respectable merchant, and granddaughter of John Hylieger, of Holland, for many years governor of St. Eustatia.

On the organization of a navy in 1798, to protect American commerce against French cruisers, his character for bravery and intelligence secured for Bainbridge the command of the schooner "Volontier," a vessel of twenty guns, as lieutenant-commander. He was soon afterward captured by the French frigates "Volontier" and "Insurgent," but the schooner was returned to Bainbridge by the governor of Guadaloupe, and he proceeded with her to the United States, carrying many American prisoners, for whom, by his fact, he had obtained their liberty. For his services, Bainbridge was promoted to the rank of captain, and the American government ordered him to command the brig "Norfolk," of eighteen guns. The "retaliation act" against French citizens captured on the ocean, in the quasi war with France, passed at that time (1798), was due to Bainbridge's report of the outrages committed on American prisoners in the island of Guadaloupe. The "Norfolk" was rearmed, and Capt. Christopher R. Perry, and performed most important service, capturing the French lugger "Republican" and destroying other vessels. As an acknowledgment of these services, the merchants of Havana presented him with a most complimentary letter when he left the station. In May, 1800, Bainbridge was ordered in the brig "Norfolk" to carry the frigate "George Washington," to carry tribute to the Dey of Algiers. On his arrival at Algiers, much to his disgust, Bainbridge felt obliged to accede to a demand of the Dey to carry presents to Constantineople, and also an ambassador to the Ottoman porte. A refusal to comply with this demand would have resulted in depredations by the Algerines on American commerce; the American government not having realized the degradation entailed on it by paying tribute so that its merchant ships might pursue their vocations without being boarded by pirates. At Constantineople Bainbridge was received very kindly, and while there he paved the way to the first treaty between the United States and the Ottoman empire. The Dey of Algiers 21 Jan., 1801, and the Dey did all he could to entice him into his power and force him to return to Constantineople with presents, etc.; but the "George Washington" was anchored beyond reach of the guns of the forts, and there remained until the Dey had given a solemn promise (after Moslem fashion) that he would not require Bainbridge to return. On this occasion Bainbridge had the pleasure of bringing an order from the sultan for the liberation of 400 Maltese, Venetians, and Sicilians, and, on his presenting a firman from the Capudan pacha at Constantineople (a great friend of Bainbridge), the Dey from that moment treated him with great consideration.

On 30 Nov., 1801, Bainbridge was appointed to command the "Essex," forming part of the squadron under Com. Richard Dale, to cruise against the Barbary powers. In 1803 he was employed in superintending the construction of the "Syren" and "Vixen," after which, on 20 May, 1805, he was ordered to command the "Philadelphia," of 44 guns, of Com. Perry's squadron, fitted out to cruise against Tripolitan corsairs. Bainbridge sailed before the rest of the fleet, and, on his arrival in the Mediterranean, captured the Moorish ship-of-war "Moshbanna," of 22 guns, for molesting an American
vessel. He also recaptured the American brig "Celtic," and this seasonable check to Moorish ra-

BAINBRIDGE

pacity prevented further depredations upon Amer-

BAINBRIDGE

ican commerce by the Moors. On Bainbridge's

141

arrival off Tripoli he gave chase to a Tripolitan

corvette and struck up a rock, by which the "Phi-

la-delphia" was wrecked, and she was then sur-

rounded by Tripolitan gun-boats and forced to sur-

render, not being able to use her guns. This

happened on 1 Nov., 1804. The "Philadelphia" was

float off the rock by the Tripolitans and carried

into the port of Tripoli, where she was afterward burned by Bainbridge. On examining the de-

structing of the "Philadelphia" is said to have been sent to

Com. Preble in a letter from Bainbridge while he was a prisoner, Bainbridge and his officers and

crew remained prisoners for nineteen months during the

Tripolitan war, suffering many privations, and

being subjected to all the dangers of the fire from the

British fleet, the government at Washington sub-

tended to recover his liberty, a court of inquiry was

held on Bainbridge, and he was acquitted of all

blame for the loss of the "Philadelphia."

A short time after his return to the United

States Bainbridge was ordered to command the

navy-yard at New York; but his embarrassed cir-

cumstances, owing to his long imprisonment, obliged

him to obtain a fur-lough and once more enter the

merchant service, where he continued until 1808.

In anticipation of a war with England he was or-

dered back to the service in March, 1808, and in

December was placed in command of the frigate "Presi-

dent," in which he sailed on a cruise in the fol-

lowing year. No war occurring, he again obtained a

fur-lough, and sailed on a voyage in a merchant

ship to St. Petersburg. He continued in the mer-

chant service until 1811, when, hearing that an en-

gagement had taken place between the "President"

and the British ship-of-war "Little Belt," he left

his ship at St. Petersburg and returned to the

United States. In anticipation of the war with Great

Britain the government had determined to lay up all the ships of the navy in ordinary; but,

owing to the representations of Capt. Bainbridge and

Stewart, this idea was abandoned. Bainbridge

was now ordered to command the Charlestown

navy-yard; but on the declaration of war, 8 June, 1812,

he solicited the command of a frigate, and his re-

quest was acceded to, and the government gave him

not only the "Constitution," but of the frigate

"Essex," Capt. David Porter, and the sloop "Hor-

net," Capt. James Lawrence. Bainbridge took the

"Constitution" immediately after Hull arrived in

her from his victory over the "Guerriere."

The "Constitution" parted company with the

"Hornet" off St. Salvador on 26 Dec., 1812, and

three days later fell in with the British frigate

"Java," of 49 guns and upward of 400 men. After

an action of one hour and fifty-five minutes the

"Java" surrendered, having been completely dis-

mantled and not having a single spar standing.

Her loss was 60 killed and 101 wounded, while the

"Constitution" lost but 9 killed and 25 wounded.

Among the latter was his lieutenent, who was struck
during the engagement. The "Java" was blown up after the prisoners were removed. In

his treatment of the prisoners Bainbridge was most

magnanimous, and he received many acknowledg-

ments for his kindness. On his return to the

United States he was received with high honors

and salutes, acted as aide-de-camp at the navy yard, where he led the kedge of the line-of-battle
ship "Independence." No squadron of equal

strength ever sailed from any country and accom-

plished the results that the three historic vessels

of Com. Bainbridge's command, the "Constitu-

While Bainbridge was in command at Charle-

town the British blockaded Boston harbor, and his

views for the defence of that port encountered

great opposition. Policies ran high, and the opera-

tion party was indifferent with regard to the pub-

clic property, which they said belonged to the ad-

ministration, while the commodore insisted that it

belonged to the nation and should be protected at

all hazards. The governor and council of Massa-

chusetts appointed a committee to consult with

him, he informed it that he should defend his com-

mand to the last extremity, let the consequences be

what they might, and that if the citizens of Bos-

ton chose to make their interests separate from

those of the nation, the terrible consequences might

fall where they deserved; to him, duty and honor

dictated the course he must pursue. Great weight-

s of opinion existed in Massachusetts with re-

gard to defending the harbors along the coast, and

even Boston itself; but, owing to Bainbridge's pa-

triotic importunities and devoted zeal as an officer,

sustained as he was by many eminent citizens of

Boston, a proper system of defence was adopted

and the danger was averted.

Com. Bainbridge was the first that advocated a

board of commissioners for the navy. His long ex-

perience in naval concerns satisfied him that the

administration of the navy could never be wisely

conducted without a preponderance of professional

men in connection and working in accord with the
civil element. Shortly after the beginning of the

cruise Commodore Bainbridge proceeded to Algiers

the United States by Algiers, and on the conclu-

sion of peace with Great Britain congress declared war

against the regency of Algiers and fitted out a large

squadron under the command of Bainbridge, in

1815, to protect American commerce in the Medi-

terranean. Peace was soon settled honorably by

Decatur, and at the same time Bainbridge brought

the Bashaw of Tripoli to a sense of the resources

of the United States, and exhibited his large force

in all the ports. The only way in which peace

could be maintained with these people, so faithless

in regard to political obligations, was by operating

on their fears. After making the necessary ar-

rangements with the Bashaw, the commodore

made a visit to Algiers, and with the Bashaw made

a treaty of peace and commerce. On his return to

the United States by Algiers, Bainbridge returned

to the United States on 15 Nov., 1815. A month

later the commodore established the first naval

school (in the Boston yard) for officers, and in 1817

he was appointed one of a board to locate navy-

yards. In October, 1819, the first board convened

for the examination of young officers for promo-

tion that had ever been assembled in the United

States, under Bainbridge as president officer.

In November of the same year he was ordered to

the command of the new line-of-battle-ship "Colum-

bus," and appointed to command the Mediterranean

squadron. On his return to the United States af-

ter his cruise in 1821, he was ordered to the Phila-

delphia station where his professional abilities were

brought into play in fitting out the ship-of-the-line

"North Carolina." In 1823 he was changed to

the command of the Boston station, and soon

afterward was appointed naval commissioner.

At the time of the difficulty between Decatur

and Barron, Bainbridge was in Washington city,

where he acted as aide-de-camp to the president,

until to his death and to Barron's being severely wounded.

After severing his connection with the board of

commissioners, Com. Bainbridge commanded sev-

eral navy-yards, until in the latter part of his life
he became a great sufferer from physical troubles. In 1853 he was attacked by pneumonia, and died on 28 July of that year. His remains were interred in Christ church burying-ground in Philadelphia. Dr. Bainbridge was a model of a naval officer. He was six feet in height and had a finely moulded and muscular frame, which enabled him to endure any amount of fatigue. His complexion was rather fair, his beard dark and strong, his eyes black, animated, and expressive. His deportment was commanding, his dress always neat; his temperament was ardent and somewhat impetuous, intolerably strict in his duties, with the greatest courtesy and the most attractive amenity.

**BAINES, Allen Mackenzie**, Canadian physician, b. in Toronto, 12 May, 1853. He was educated at Cobourg, and at Upper Canada college, Toronto, studied medicine, received degrees from both Trinity college, Toronto, and Toronto university, and afterward attended medical lectures and hospitals in London, England, where he took the degree of L. R. C. P. He returned to Canada in 1882 and settled as a physician in Toronto. Dr. Baines is examiner in toxicology and medical jurisprudence in Trinity college, and likewise physician for the home for incurables, Toronto, and the infirmary in the same city.

**BAIRD, William**, soldier, b. in Washington, Pa., 20 Aug., 1824. He was graduated at Washington college in 1841 and studied law. In 1845 he entered the West Point academy, was graduated in 1849, and served as second lieutenant in the Florida hostilities from 1850 to 1855. He was promoted first lieutenant 24 Dec., 1853, and from 1854 to 1861 served as professor at West Point as assistant professor of mathematics. In March, 1861, he took command of the light battery for the defence of Washington, and on 11 May was brevetted captain and appointed assistant in the adjutant-general's department. In July, 1861, he served as adjutant-general of Tyler's division in the defence of Washington and in the Manassas campaign, being present at Blackburn's Ford and at Bull Run. He was promoted captain 3 Aug., 1861, served as assistant adjutant-general and was promoted major 12 Nov., 1861, and served as assistant inspector-general and chief of staff of the fourth army corps in the peninsular campaign, where he was engaged in the siege of Yorktown and the battle of Fair Oaks. He commanded a brigade of the Army of the Ohio from May to September, 1862, and was engaged in the capture of Cumberland Gap. From October, 1862, to June, 1863, he commanded the 3d division of the Army of Kentucky about Lexington and Danville and in the operations of Gen. Rosecrans in Tennessee, being engaged at Tullahoma, the capture of Shelbyville, Dutch Gap, Pigeon Mountain, and Chickamauga. For gallant and meritorious services in the last action he received the brevet of lieutenant-colonel. In operations about Chattanooga he commanded a division of the 14th army corps and gained the brevet rank of colonel. He was engaged in the battle of Missionary Ridge, was in many engagements, but was still present at the conclusion of the battle of Missionary Ridge, and was present at the surrender of Atlanta. He was brevetted major-general of volunteers for services in the capture of Atlanta, in the pursuit of Hood's army and the march to the sea, and the capture of Savannah. He participated in the march through the Carolinas in 1865, and was present at the surrender of Johnston's army at Durham station. For his services in the Atlanta campaign he received the brevet rank of brigadier-general in the regular army on 13 March, 1865, with that of major-general for services during the rebellion. He served as inspector-general of the department of the lakes from 1866 to 1868, of the department of Dakota till 1870, of the division of the south till 1873, and subsequently as assistant inspector-general of the division of the Missouri.

**BAIRD, Henry Carey**, author, b. in Bridesburg, Pa., 10 Sept., 1825. In 1845 he became a partner in the publishing house of Carey & Hart, of Philadelphia, and in 1849 established the new house of Henry Carey Baird & Co., which has published a large number of technical industrial works and various economical treatises. He was at first a Whig, and subsequently a Republican in politics, but in 1875 he joined the national greenback party and became one of its leaders. He has written on economical questions, advocating views similar to those of Henry C. Carey, his uncle. He published a collection of his works in Philadelphia in 1873.

**BAIRD, Robert**, clergyman, b. in Fayette co., Pa., 6 Oct., 1798; d. in Youkens, N. Y., 15 March, 1863. He was graduated at Jefferson college, Pa., in 1818, and taught a year at Bellefont, where he began his career as a newspaper writer. He studied theology at Princeton, 1818-22, and taught an academy for five years, preaching occasionally. In 1827 he became agent in New Jersey for the American Bible society, engaged in the distribution of Bibles among the poor, and also labored among the destitute churches of the Presbyterian denomination as an agent of the Jersey missionary society. In 1829 he became agent for the American Sunday-school union, and traveled extensively in northwestern society. In 1835 he went to Europe, where he remained eight years, devoting himself to the promotion of Protestant Christianity in southern Europe, and subsequently to the advocacy of temperance reform in northern Europe. On the formation of the foreign evangelical society, since merged in the American and Foreign Christian union, he became its agent and corresponding secretary. In 1842 he published “A View of Religion in America” in Glasgow. In 1843 he returned home, and for three years engaged in promoting the spread of Protestantism in Europe. In 1846 he visited Europe to attend the world's temperance convention in Stockholm and the meeting of the evangelical alliance in London, and on his return he delivered a series of lectures on the “Continent of Europe.” In 1862 he was invited to London before large audiences the cause of the union against secession with vigorous eloquence. Among his other published works are a “View of the Valley of the Mississippi River, and a Discourse on the Mississippi Peril” (1836); “Visit to Northern Europe” (1841); “Protestantism in Italy” (Boston, 1845); “Impressions and Experiences of the West Indies and North America in 1849” (Philada-
delphia, 1850, revised, with a supplement, in 1857; “History of the Aborigines, Waldenses, and Van-
dols.” French, Dutch, German, Swedish, Finnish, and Russian translations were made of the
History of the Review of the Church: the Story of the Unitarian Church in New York, the
German, and Dutch, and Swedish translations of the “View of Religion in America.” See “Life of the

10 Feb., 1887. He was graduated at the univer-
sity in the city of New York in 1848, and he
read theology at the Union theological school in 1852. He officiated as American chaplain at Rome till 1853, was sub-
sequently settled over the Dutch Reformed church of
Bergen Hill, Brooklyn, and after 1861 over the
Presbyterian church at Rye, N. Y. A translation
of Malou’s “Romannism” (New York, 1844), and
Theological Discourses and Esse-
(1846), were his first literary productions. He
published anonymously “Entaxia, or the Presby-
tarian Liturgies” (New York, 1855), revised and
reprinted under the title “A Chapter of Liturgies”
(London, 1856); “A Book of Public Prayer, com-
piled from the Authorized Formularies of the
Presbyterian Church” (1857). Mr. Baird was rec-
ognized as a scholar in the study of the
Presbyterian Liturgies. He afterward gave his
attention to other subjects, and published “Chro-
nicles of a Border Town, a History of Rye, N. Y.”
(New York, 1871); “History of Bedford Church”
(New York, 1885); “History of the Huguenot Emi-
gation to America” (1855), a French version of
which was subsequently issued in Toulouse, France.
—Henry Martyn Baird, another son, b. in Phila-
delphia, Pa., 17 Jan., 1832; after graduation at the
university of the city of New York in 1850, studied
in Greece, and, after pursuing a course of theology in
Union and Princeton seminaries, became a tutor in
1855, and in 1859 professor of Greek at Princeton
college. He published “Narrative of a Residence
and Travels in Modern Greece” (New York, 1859);
“Life of Robert Baird, D. D.” (1865); a “History of
the Rise of the Hugenots” (1879); and “The
Huguenots and Henry of Navarre” (2 vols., 1886).
BAIRD, Samuel John, author, b. in Newark,
Ohio, in 1817; d. in Clifton Forge, Va., 10 April,
1877. He was educated at the academy at Col-
bra, in which he was educated, and at Williams
College. When he was fourteen years of age, he
preached in various pulpits until, in 1835, he re-
tired from the ministry, owing to declining health.
He made a special study of Presbyterian ecclesi-
asical polity, and published “The Assembly’s
Digest”; “The Church of Christ, its Constitution and
Order” ; “A History of the Early Polity of
the Presbyterian Church in the Training of Minis-
ters”; “A History of the New School and of the
Questions involved in the Disruption”; “The
Socinian Apostasy of the English Presbyterian
Church”; “The First Adam and the Second”; “The
Elohim revealed in the Creation and Redemp-
tion of Man” (Philadelphia); “Collection of the
Acts, Deliverances, and Testimonies of the
Supreme in the History of the Presbyterian
Church, from its Origin in America to the Present Time”
(1855); and “History of the New School” (1868).
BAIRD, Spencer Fullerton, naturalist, b. in Reading, Pa., 3 Feb., 1829; d. in Wood’s Hall,
Mass., 19 Aug., 1887. He was graduated at Dick-
inson college in 1840, and in 1841 was appointed
as assistant physician and surgeon in New York.
In 1845 he became professor of natural sciences in Dickinson College, and a few years later
assumed also the chair of chemistry. At the age
of twenty-seven he was appointed assistant secre-
tary of the Smithsonian Institution, and after the
death of Prof. Henry in May, 1878, he succeeded to
the full secretariacy. In 1871 he was nominated
U. S. commissioner of fish and fisheries, and after
his appointment very much of his time was devoted
to the duties of that office, and in 1882 he re-
ceived the appointment of Commissioner of Fishes
and Fisheries. In 1872 he received the degree of
D. L. L. D. from the University of Maryland, and
in 1885 he was elected to the academic degree of
D. S. H. D. from the University of Virginia. He
was president of the National Academy of Sciences
in 1885. He was a member of the American
American Institute of Arts and Sciences, and the
American Association for the Advancement of Science.

assumed also the chair of chemistry. At the age
of twenty-seven he was appointed assistant secre-
tary of the Smithsonian Institution, and after the
BAKER, Benjamin Franklin, musician, b. in Wenham, Mass., 10 July, 1811; d. in Boston, 11 March, 1889. He studied music, for eight years, was musical director in Dr. Channing's church in Boston; he inaugurated a series of successful musical conventions. From 1832 to 1848 he was superintendent of musical instruction in the grammar schools, and met 8,000 pupils a week. He introduced music into the public schools of Lowell and Lawrence, became editor of the Boston "Musical Journal," and, from its foundation in 1857, was principal of the Boston music school.

BAKER, Daniel, elder, b. about 1735; d. in Detroit, Mich., 10 Oct., 1836. He was appointed ensign of the 16th infantry 8 Jan., 1799, was made adjutant in 1802, captain in 1812, and the same year was brevetted major for gallantry in the disastrous affair at Brownstown, Mich. (5 Aug., 1812), known as Van Horn's defeat. Recovering from the wounds inflicted by this explosion, his wound was promoted to be major 15 April, 1814, and was in the engagement at Lyon's Creek, 19 Oct., 1814. After the war of 1812 he was promoted lieutenant-colonel of the 6th infantry, and commanded that regiment at the battle of the Bad Axe river, in the Black Hawk war, 1 Aug., 1832.

BAKER, David, clergyman, b. in Midway, Liberty co., Ga., 17 Aug., 1791; d. in Austin, Texas, 10 Dec., 1857. He was graduated at Princeton in 1815, studied theology in Winchester, and on 5 March, 1818, was ordained pastor of the Presbyterian church in Harrisburg, Va. This charge he resigned in 1821, and soon afterward went to Washington, D. C., where he remained until 1828. He gained such a reputation as an effective preacher that his services were in demand as a revivalist. After 1830 he continued as an evangelist, traveling in the south, and at last settled in Austin, Texas, where he founded a college and became its first president. Among his published works are "A Scriptural View of Baptism"; "An Affectionate Address to the young and tender ages"; "Historic and Gallant in a Nutshell," and "Revival Sermons." His memoirs, prepared by his son, were published in Philadelphia in 1859.

BAKER, David Jewett, lawyer, b. in East Haddam, Conn., 7 Sept., 1792; d. in Alton, Ill., 6 Aug., 1869. In his boyhood he worked on a farm, but secured a classical education, was graduated at Hamilton college in 1816, and was admitted to the bar in 1819. He began practice in Kaskaskia, Ill., attained a high position in the state bar, and was made probate judge of Randolph co., although he so strenuously opposed the introduction of slavery into the state that his life was threatened. In 1839-41 he was U. S. senator, and carried the state into that session with a resolution of soliciting the public lands to actual settlers in tracts of forty acres. He was U. S. district attorney for Illinois from 1833 to 1841, and afterward resumed the practice of law.

BAKER, Edward Dickenson, soldier, b. in London, England, 24 Feb., 1811; killed at the battle of Balls Bluff, 21 Oct., 1861. He came to the United States in the age of five, with his father, who died in Philadelphia while Edward was yet a youth. The boy supported himself and his younger brother by working as a weaver, and occupied his leisure hours in study. Impelled to seek his fortune in the far west, he removed with his brother to Springfield, Ill., where he studied and soon began the practice of law. His genius for oratory rapidly gained him distinction and popularity, and, entering the political field as which he was regarded a member of the legislature in 1837, of the state senate in 1840, and representative in congress in 1844. When the Mexican war began he raised a regiment in Illinois and marched to the Rio Grande. Taking a farouling to speak, he was voted in favor of the war in the house of representatives, he returned and overtook his regiment on the march from Veragua. He was brevetted captain of the brigade and led it during the rest of the war.

On his return to Galena, Ill., he was again elected to congress serving 3 Dec., 1849, till 3 March, 1851; but, becoming interested in the Panama railroad, he declined a renomination in 1850. In 1851 he settled in San Francisco, where he took rank as the leader of the California bar and the most eloquent orator in the state. The death of Senator Broderick, who fell in a duel in 1859, was the occasion of a fiery oration in the public square of San Francisco. He received a republican nomination to congress, but failed of election. Removing to Oregon, he was elected to the U. S. senate in 1860 by a coalition of republicans and Douglas democrats. The firing upon Fort Sumter prompted him to deliver a passionate address in Union square, New York, in which he pledged his life and his blood for the maintenance of the Union. He raised the California regiment in New York and Philadelphia, but declined a commission as general of brigade. In the disastrous assault at Ball's Bluff he commanded a brigade, and, exposing himself to the hottest fire, fell mortally wounded while leading a charge.

BAKER, George Augustus, painter, b. in New York city in 1821; d. there, 2 April, 1889. His artistic education was begun by his father, an artist of merit, and his first professional years were devoted to the then popular miniatures on ivory; but he soon became a portrait painter of rare excellence, his favorite subjects being women and children, to 1844, and spent two years in study. Returning to New York, he opened a studio, and soon ranked among the best portrait painters of the time. He was elected a member of the national academy of design in 1851. During the last twenty-five years of his life he had few rivals. His portraits are characterized by a wonderful richness of coloring and a life-like rendering of draperies. They are chiefly in private collections. The best known of his ideal works are "Love at First Sight," "Wild Flowers," "Children of the Wool," "Faith," and "The May Queen."—His son, George...
Augustus, was graduated at the College of the City of New York, and from the Columbia College law school, in 1850, at present practising in New York. He was elected to the bar in 1851. He published "Diamonds," a volume of vers de société (New York, 1875), and "Bad Habits of Good Society" (1876).

BAKER, George Bernard, Canadian statesman, b. in Dunham, province of Quebec, 29 Jan., 1834. He was graduated at the university of Bishop's college, Lennoxville, in 1855, studied law, and was admitted to the bar in 1860. He resided in the State of Missouri in the house of commons from 1850 until 1874, when he retired, elected by an acclamation to the Quebec legislature in 1875, and in 1876 was appointed a member of the executive council and solicitor-general. In 1878 he was elected to the dominion parliament. He is a liberal-conservative.

BAKER, Henry Brooks, surgeon, b. in Batteborough, Vt., 29 Dec., 1837. He received a common-school education, and studied medicine at the University of Michigan in 1861-2. He served through the civil war with the 29th Michigan infantry, and from July, 1864, was his assistant surgeon. He was graduated at Bellevue Hospital Medical College, New York, and then engaged in practice in Lansing, Mich., where he has performed important operations. In 1870 he took charge of the vital statistics of Michigan, and in 1873 he became secretary of the State Board of Health. In his official capacity he has edited and published "Statistics of Michigan" (Lansing, 1870), "Vital Statistics of Michigan," registration reports (1870-9), "Reports of the State Board of Health" (1872-85). His own papers, which are quite numerous, principally on sanitary subjects, have appeared in various medical journals, chiefly those of Detroit. Dr. Baker has devoted much time to studies relative to the causation of diphtheria, typhoid fever, cholera, and pneumonia. The results thus far obtained have appeared in the "Transactions of the American Public Health Association" and "Transactions of the American Climatological Association," 1886. He is a member of the American Climatological Association, the Royal Meteorological Society of England, and the French Society of Hygiene.

Baker, Louis J., b. in Monroe, Butler co., Ohio, 6 May, 1829. He was educated at the Wesleyan university of Ohio. Subsequently he became a teacher, and took charge of a female academy at Richmond, Ind. In 1853 he purchased the "Scioto Gazatte," and became its editor. He was elected secretary of state for Ohio in 1855, and became afterward secretary of state for Minnesota. He served as a colonel in the army in 1862-3, was appointed provost-marshal for the department of Missouri, and served in this capacity until the close of the war, receiving the brevet of brigadier-general of volunteers. After he was appointed register of public lands at Booneville, Missouri, and retained the office two years, after which he retired to private life. From 1871 to 1875 he was commissioner of pensions.

BAKER, Lafayette Charles, of the U.S. secret service, b. in Stafford, Genesee co., N. Y., 13 Oct., 1826; d. in Philadelphia, 2 July, 1868. His grandfather, Remember Baker, was one of Ethan Allen's captains. Baker's father inherited the curious baptismal name of the Green Mountain Boy, as well as his adventurous spirit, and in 1839 removed to Michigan and settled where Lansing, the capital, now stands. Young Baker took part in the work of making a home in the wilderness, but in 1848 went to New York and Philadelphia, and in 1853 to San Francisco, in each of these cities working as a mechanic. When the lawless element became dominant in San Francisco in 1856, Mr. Baker joined the vigilance committee and took an active part in the resulting somewhat stormy order in the city. He went to New York on business in 1861, expecting to return at once, but the civil war intervened, and he went to Washington and offered his services. At the suggestion of Gen. Hiram Ballbridge, of New York, he was introduced to Gen. Scott, and, as a result of the interview, he was offered a post for Richmond, where, in spite of arrest, imprisonment, and several interviews with Jefferson Davis, while under suspicion as a spy, he succeeded in collecting much information and returning to Washington after an absence of three weeks. This was but the first of a series of adventures involving high executive ability and a wonderful talent for unravelling conspiracy and frustrating the designs of confederate spies and agents. As soon as his abilities were demonstrated to the satisfaction of the government, he was placed at the head of the bureau of secret service, with almost unlimited resources at his command, and in February, 1862, the bureau was transferred to the war department. Mr. Baker was commissioned a colonel, and, with his duties naturally made him enemies in influential quarters, and charges of a serious nature were several times preferred against him, but were never substantiated. When President Lincoln was assassinated, Col. Baker organized the pursuit of the murderer, and was present at his capture and death. His agents effected the capture of the interviewers in the plot. Gen. Baker published a "History of the United States Secret Service" (Philadelphia, 1868), which is necessarily semi-biographical, and touches authoritatively many disputed passages in the secret history of the civil war.

BAKER, Marcus, explorer, b. in Ostego, Kalamazoo co., Mich., 29 Sept., 1819. He was educated at Kalamazoo College and the University of Michigan, graduating in 1870; in 1870-1 was made professor of mathematics in Albion College, and in 1871-23 tutor of mathematics in the University of Michigan. In 1873 he became connected with the U.S. Coast and Geodetic Survey, attaining in 1886 the degree of assistant geographer. During the time he spent several years in exploring and surveys in Alaska, and traversed the entire Pacific coast from southern California to the Arctic ocean. From July, 1882, to August, 1884, he was in charge of the Los Angeles magnetic observatory, established by the U.S. signal service. He has devoted much time, with William H. Dall, to the compilation of material for a Coast Pilot of Alaska, and also to the "Alaska Coast Pilot, Appendix I., Meteorology and Bibliography" (Washington, 1879). Mr. Baker has contributed mathematical papers to the scientific journals, and has been one of the secretaries of the Philosophical society, Washington.

BAKER, Nathaniel Bradley, governor of New Hampshire, b. in Merrimack co., N. H., 29 Sept., 1818; d. in Des Moines, Iowa, 11 Sept., 1876. He was educated at Phillips Exeter academy and Harvard college, being graduated in 1839, studied law in the office of Franklin Pierce, and admitted to the bar in 1842. For three years he was joint proprietor and editor of the New Hampshire Patriot. In 1846 he was appointed clerk of the court of common pleas, and in 1846 clerk of the superior court of judicature for Merrimac co. He was elected to the legislature in 1851, was chosen speaker of the house, and served two terms. He was a presidential elector in 1852, and in 1854 was elected governor of the state on the
democratic ticket. His term expired in 1855, and in 1856 he removed to Clinton, Iowa, and engaged in the practice of law. He was elected to the legislature in 1859, and acted with the republicans in the session of 1860 and the extra session of 1861. In July, 1861, he was appointed adjutant-general of Iowa, which office he held until the time of his death. In this capacity he was noted for his efficiency during the war, and was very popular with the soldiers, to whose comfort and welfare he greatly contributed. He was ordered to the command of large portions of the northwest, and many families were threatened with starvation, Gen. Baker's measures for their relief were energetic and effective.

BAKER, Osmon Cleander, clergyman, b. in Marlow, N. H., 30 July, 1812; d. in Concord, N. H., 20 Dec., 1871. Having received good preliminary training, Mr. Baker, at the age of fifteen, entered the academy at Wilbraham, Mass., and remained there as a student for three years. At that time (1831) the Rev. Willard Fisk was principal of the academy, and, as one of the leading educators of the Methodist church, was invited to become president of Wesleyan university, newly chartered, at Middletown, by the state of Connecticut. Mr. Baker was appointed one of the professors of the school and studied for three years, failing, through ill health, to complete the full course. Such was his proficiency, however, that he received the usual degree. In 1834 he accepted an invitation to teach in the seminary at Newbury, Vt., and from 1839 till 1844 was its principal. During this period he became first a local and afterwards an itinerant preacher, and, under the conviction that his duty lay in this direction, he resigned the charge of the seminary, and for the next three years was engaged in pastoral work in the neighborhood of Rochester and Manchester, N. H. In 1847 he was appointed presiding elder, and the same year was chosen a professor in the general biblical institute in Concord, N. H., which has since become the school of theology of Boston university. This chair he accepted with great reluctance, such was his devotion to pastoral work, but filled it so acceptably that he was elected president of the school, and remained there until 1852, when he was elected bishop by the quadrennial general conference of the Methodist Episcopal church. He was a man of strong mind, a master of the English language, a large and fertile original thinker, but an excellent presiding and administrative officer, and proved himself highly efficient. As a preacher he was able, though not impassioned, and was an earnest advocate of thorough theological training for all ministers. He published "Guide-Book in the Administration of Discipline of the Methodist Episcopal Church" (New York, 1855).

BAKER, Remember, pioneer, b. in Woodbury, Conn., about 1740; d. near Isle aux Noix, Lake Champlain, in August, 1775. He served in the French war of 1757-9, and was in the bloody attack on Ticonderoga in 1758. He went to Arlington, in the New Hampshire grants, in 1764, settled there, and was a schoolmaster. He was a man of large mind, and was an excellent officer in the army, and a brave and capable man of war. He was a strong representative of the "Ticonderoga Boys," aiding Ethan Allen in his struggles against the claims of New York to that part of the country. He was outlawed by Gov. Tryon, of New York, a price being set upon his head, and on one occasion he was actually captured, but was rescued on the same day, after he had been cruelly maltreated. He was with Ethan Allen at the capture of Ticonderoga, 10 May, 1775, and with Seth Warner at Crown Point two days afterward. He met his death at the hands of the Indians when on a scouting expedition on Richelieu river, the outlet of Lake Champlain.

BAKER, William Bliss, artist, b. in New York city in 1858; d. in Hoosic Falls, N. Y., 20 Nov., 1886. He studied art at the national academy of design from 1876 till 1880. He took the first prize in the annual antique school of the academy in 1879, and was awarded the third Haultain-pot, prize of $100, in 1881 for his "Woodland Brook." Among his recent paintings exhibited at the National Academy are "In the Old Pasture"; "Peaceful Day at Lake George" (1886); "October Morning" (1884); "Soli- tudine" (1886); "Baker's Mill" (1886); "From the Far South" (1886). BAKER, William H., artist, b. in 1825; d. in Brooklyn, N. Y., 29 May, 1875. He was brought up to mercantile pursuits in New Orleans, afterward studied art, and became a portrait painter there. He removed in 1865 to New York, where he painted portraits and ideal subjects. Mr. Baker exhibited in the national academy of "Cupid Dis- armed" (1869); "A Floral Offering" (1869); and "Cupid Reprimanded" (1871). In 1889 he removed to Brooklyn and became principal of the free school of design of the Brooklyn art association. He exhibited there "May Flowers" (1870); "Red Riding-Hood" (1871); "Morning Glory," "Home Regalia," and "The Big Patch, May's Field" (1873); and "Tramps from School" (1875). One of his best portraits is that of Bishop Quintard, of Tennessee, painted for the Episcopal general convention. Mr. Baker was a successful art teacher. As a painter he was painstaking, but never achieved greatness.

BAKER, William Munford, author, b. in Washington, D. C.; d. in South Boston, Mass., 20 Aug., 1883. He was graduated at Princeton in 1846, studied theology for two years with his father, the Rev. Daniel Baker, and spent one year in the Princeton seminary. He then joined his father in Texas, and was a pastor in Galveston, and subsequently in Austin, from 1849 to 1855. After fifteen years of service in Texas, Mr. Baker accepted a charge at Zanesville, Ohio, where he was transferred to Newburyport, Mass. In 1874 he became pastor of a Presbyterian church in South Boston. His most important work was "Inside: A Chronicle of Secession" (New York, 1869), written secretly during the war, while he lived in Austin, and giving a peculiarly vivid picture of southern life. It was published without his consent under the name of "G. F. Harrington." He also wrote the "Life and Labors" of his father (Philadelphia, 1858), which had a large circulation. His other books are mostly tales, including "Oak Mot" (Philadelphia, 1868); "Mose Evans" (Boston, 1874); "Carter Quarterman" (New York, 1876); "A Year with Living" (Boston, 1878); "Colonel Dun- woodie" (New York, 1878); "The Virginians in Texas" (New York, 1878); "Thirlmore," and "The New Timothy" (New York, 1870); "His Majesty Myself" (Boston, 1879); and "Blessed Saint Certainty." (Boston, 1881). Many of these were published as serials, "The Ten Theopelians; or, The Manifestations of the Christ" (New York, 1883), was completed shortly before his death, and is regarded by those who knew him as in some sort a record of the writer's own religious experiences and struggles. His death has appeared "The Making of a Man." (Boston, 1884).

BALBOA, Vasco Núñez de, Spanish discoverer, b. in Nieves de los Caballeros, Extremadura, Spain, in 1475; d. in Cartilla de Oro, Darien, in 1517. He was a bankrupt nobleman who escaped from his creditors to Hispaniola and afterward joined an expedition under Martin Fernández de Enciso, one of Ojeda's lieutenants, to the latter's
Darien colony of San Sebastián. After meeting with misfortune through shipwreck and hostile natives, and learning of the destruction and abandonment of the colony, they finally founded a town, which they called Santa María de la Aturigua de Pedrarias. Enciso forbade his men to trade with the natives, and was deposed by Balboa, who claimed that they were no longer within the boundaries of Ojeda’s province, and hence owed his lieutenant no obedience. The settlement split into factions, and finally Enciso and Zafundo, the latter as Balboa’s representative, were banished from Spain to live out their days before the king. In the meanwhile Balboa explored the country, gained the good will of the natives by his treatment of them, and was told of a sea that lay southward, and of a land where gold abounded (Peru). He was now commissioned as governor of Antigua by Admiral Diego Columbus; but, hearing from Spain that the king intended to side with Chiriquí, he determined to discover the new sea of which he had heard, and so alone for his faults. He left Antigua for this purpose on 1 Sept., 1513, and after laboring on for many days amid tangled forests, up rugged heights, fighting the natives continually, until the explorers were exhausted, foot-sore, and famished, they ascended a mountain of great height, and found a beautiful bay, which they called “San Juan,” at the mouth of the new sea. Balboa named it “Mar del Sur,” and took possession of it and all its coasts in the name of his royal master and mistress. Three days later he reached the beach at a place still known by the name he gave it, the gulf of San Miguel. After a short voyage of exploration and the collection of tribute, he set out for home, and reached Antigua in safety in January, 1514, after what must be considered a wonderful exploit when we take into account his small force and the almost insurmountable difficulties of the route. But Balboa’s exploit was in vain. A new governor, Pedrarias, arrived at Antigua in the following June, and his predecessor was put on trial on various charges. He was acquitted of the most serious, but was sentenced to pay a large fine. Soon after the new king of Spain, hearing of Balboa’s great discovery, gave him a special commission to explore the shore of the “southern sea,” and made him governor of Panama and Coyba. Pedrarias withheld this commission at first, but, becoming removed by his friend, the v. Prov. Madrid, 1 March, 1515, he undertook preparations for his voyage, and promised him his daughter in marriage. Vessels were built, though with difficulty, on the Pacific side of the isthmus, and Balboa, after making a few unimportant discoveries, sent his friend Garabito to investigate a rumor that Pedrarias had been superseded. The rumor was untrue, and Garabito was a false friend, told the governor that Balboa had no idea of marrying his daughter, but intended to found for himself a government on the shores of the Pacific. Pedrarias was enraged at this, enticed Balboa within his grasp, and secured his conviction on a charge of treason, together with charges on which he had previously been acquitted. The next day Balboa with four of his companions was executed, protesting to the last his innocence and loyalty. See Quintana’s “Vidas de Españoles célebres” (3 vols., 1807–24); Irving’s “Voyages and Discoveries of the Companions of Columbus” (New York, 1831); and Winsor’s “Narrative and Critical History of America,” vols. 9–11.

BALBUENA, Bernardo de (bahl-bw’-nya), Spanish poet, b. in Valdépeñas in 1568; d. in Porto Rico in 1827. He was educated in Mexico, became provost in Jamaica, and in 1820 bishop of Porto Rico. He wrote “El Siglo de Oro” (“The Age of Gold”), a pastoral romance, the scene of which is laid in the new world: “La Gran Deza Mejicana” (new ed., 1821); and “El Bernardo” (3 vols., Madrid, 1824; new ed., 1808), an epic, which is one of his most finished productions. He had a fine library, which was lost when the Dutch sacked Porto Rico in 1825.

BALCARRES, Alexander Lindsay, earl of, British soldier, b. in 1752; d. in London, 27 March, 1825. He was the eldest son of the fifth earl of Balcarres, whom he succeeded in 1767. He became a captain of dragoons before the king. In this country he saw three years of service under Carleton and Burgoyne. He was present at the defeat of the Americans under Gen. Thomson at Three Rivers, 1 June, 1776, and commanded the light infantry at Ticonderoga and at Hubbardton, Vt., 7 July, 1777. At the latter place he was wounded, thirteen balls passing through his clothes. On 19 Sept. he commanded the advanced corps of the army on the heights of Saratoga, and on the death of Gen. Fraser, 8 Oct., at Stillwater, was made lieutenant-colonel of the 24th foot. He became major-general in 1783, commander at Jamaica, lieutenant-governor of that island in 1794, lieutenant-general in 1798, and general in 1803.

BALCH, Thaddeus, b. in Virginia, 3 Jan., 1821. He was appointed a midshipman from Alabama, 30 Dec., 1837, and was assigned to the sloops “Cray,” of the Pacific squadron. He was promoted to passed midshipman, 29 June, 1843, and remained on special duty until the war with Mexico, when he was assigned to active duty, and engaged in the first war with China, under Com. Conner, 1 Nov., 1846. Throughout this war he was with the naval squadron, serving at the successful attack upon Vera Cruz and in the “mosquito fleet” under Com. Tatnall. In 1849–50 he was at the naval observatory, Washington, and was promoted lieutenant, 16 Aug., 1850. While with the sloops “Plymouth,” in the Pacific squadron, he was wounded during a fight between Chinese imperialists and rebels, and from this date until the outbreak of the civil war he was on duty with the various home and foreign squadrons. In 1860, while in command of the frigate “Sabine,” he fell in with the U. S. transport “Governor” in a sinking condition, and rescued nearly 400 marines under Gen. Mason at Fort Sumter. In 1864 he was in command of the “Pocahontas,” in the south Atlantic squadron, and volunteered to command boats taking possession of Tybee Island. Commissioned as commander, 16 July, 1862, he was actively engaged along the South Atlantic coast, and effectively cooperated with the land forces on various occasions, especially on 16 July, 1862, when, in command of the “Pawnee,” he repelled an attack by two batteries of artillery. In this affair the “Pawnee” was struck forty-six times. While in command of this vessel, Commander Balch captured two confederate guns, and was engaged in the combined operations of the navy under Rear Admiral Dahlgren and the army under Gen. Foster in Stone river, and on 9 Feb., 1865, with two other vessels ascended Tegoda creek, S. C., and silenced three batteries. On 25 July, 1866, he was promoted captain. He was with the North Atlantic squadron in 1868–9, and on shore duty at Washington until 1872. He commanded commodore 13 Aug., 1872, rear admiral 5 June, 1878, and was superintendent of the naval academy until 1880, when he went on his last cruise, terminating in January, 1883, and was placed on the retired list, having attained the limit of age for active service.
BALDWIN, Abraham, statesman, b. in Guilford, Conn., 6 Nov., 1754; d. in Washington, D. C., 4 March, 1807. He was graduated at Yale in 1772, and held a tutorship there from 1775 to 1779. From 1777 until the close of the war he was a chaplain in the army. At Gen. Greene's request, he removed in 1784 to Savannah, where he was admitted to the Georgia bar, and in the same year sent to the state legislature. Here he originated the plan of the university of Georgia, drew up the charter by which it was endowed with 40,000 acres of land, and, notwithstanding the prejudices of many members of the assembly against the project, secured its success. He was afterward president of the university for several years. He was a delegate to the continental congress from 1785 to 1788, and was a member of the constitutional convention, 25 May to 17 Sept., 1787, taking an active part in its discussions. He was a representative in congress from 1795 until 1799, and was then sent to the senate, where he remained until his death, serving again as its president pro tempore in 1801 and in 1802. While in congress he voted in favor of locating the seat of government on the Potomac. After the death of his father, in 1787, he took charge of his six half-brothers and sisters and educated them. One of these was Henry Baldwin, noticed below; another was the wife of Joel Barlow, the poet. A large number of needy young men owed to him the means of obtaining an education.

BALDWIN, Ashbel, clergyman, b. in Litchfield, Conn., 7 March, 1757; d. in Rochester, N. Y., 8 Feb., 1846. He was graduated at Yale college in 1775, and was a quartermaster in the revolutionary army, and was ordained to the diaconate by Bishop Seabury in Middletown. This was the first Episcopal ordination in the United States. He was ordained priest in September following, and became rector of St. Michael's church, Litchfield, where he remained till 1793. From 1793 to 1824 he was rector of Christ church, Stratford. He then held parishes in Wallingford, Meriden, North Haven, and Oxford, and in 1824 became chaplain of the U. S. Navy. In 1822 he became disabled by age. His records show that he had preached 10,000 times, and baptized 3,010 persons. He was secretary of the general convention, and also of the diocesan convention of Connecticut.

BALDWIN, Charles H., naval officer, b. in New York city, 3 Sept., 1822; d. there, 17 Nov., 1888. He entered the navy in 1839, and was ordered to the midshipman 2 July, 1845. In the war with Mexico he served on the frigate "Congress," and was in two shore engagements near Mazatlan while that place was occupied by the U. S. forces. In November, 1853, he was made lieutenant, and on 28 Feb., 1854, he resigned. He re-entered the service in 1861, and commanded the steamer Oronoko, the mortar flotilla, at the passage of forts Jackson and St. Philip, 24 April, 1862, and at the first attack on Vicksburg, 28 June, 1862. On 18 Nov., 1862, he became commander, and in 1868 and 1869 was fleet-captain of the North Pacific squadron. He was made captain in 1869, and in 1871 and 1872 was ordnance inspector at Mare Island, Cal. On 8 Aug., 1873, he was made commodore, and from 1875 to 1879 was a member of the board of examiners. On 31 Jan., 1883, he was raised to the rank of rear admiral, and assigned to the command of the Mediterranean squadron. He attended officially the coronation of the emperor of Russia, and in 1884 was placed on the retired list.

BALDWIN, George Colfax, clergyman, b. in Pennsylvania, 8 March, 1834; d. at Madison University, Hamilton, N. Y., 19 April, 1889. He has been for many years pastor of the First Baptist church in Troy, N. Y. He is author of "Representative Women of the Bible" (New York, 1855); "Representative Men of the New Testament" (1859); "The Model Prayer"; a volume of lectures (Boston, 1879), and other works.

BALDWIN, Henry, jurist, b. in New Haven, Conn., 14 Jan., 1780; d. in Philadelphia, Pa., 21 April, 1844. He was graduated at Yale college in 1797, studied law, and became a prominent member of the bar. Removing to Pennsylvania, he settled at Pittsburg, and in 1817 was sent to congress as a federalist, and was twice re-elected. He returned to Philadelphia, and was appointed by Chief Justice Marshall to the U. S. supreme court. In the same year Yale college gave him the degree of LL. D. He was the author of "A General View of the Origin and Nature of the Constitution and Government of the United States" (Philadelphia, 1837).

BALDWIN, Henry Porter, governor of Michigan, 1817-24; d. in Detroit, Mich., 31 Dec., 1892. He became a clerk in Pawtucket, where he remained eight years, and on becoming of age engaged in business on his own account in Woonsocket. In 1838 he moved to Detroit, where he became a prominent merchant and president of the second national bank, and in 1841 and 1842 a member of the state senate. He was governor from 1850 to 1851, and in 1872 was appointed to the U. S. senate to fill the vacancy caused by the death of Senator Zachariah Chandler, serving until 1881. While governor he secured an appropriation for the enlargement of the University of Michigan, and projected the state capital at Lansing. Mr. Baldwin was a prominent member of the Republican convention for the nomination of Mr. Lincoln for his many acts of liberality and public spirit.

BALDWIN, Jeduthan, soldier, b. in Woburn, Mass., 13 Jan., 1792; d. in Brookfield, Mass., 4 June, 1878. He commanded a company during the French and Indian war, and served in the expedition against Crown Point during the autumn of 1775. In the siege of Boston he displayed extraordinary activity in the defense of the American forces, and on 16 March, 1776, was made assistant engineer, with the rank of captain, to the continental troops. He was subsequently ordered to New York and became lieutenant-colonel 26 April, 1776. In September, 1776, he was sent to Canada, and later was made engineer, with the rank of brigadier-general, and served at Ticonderoga in 1777, and with his regiment was at West Point in 1780. He resigned from the army on 26 April, 1782. He was a member of the Massachusetts provincial congress in 1774-5. He bequeathed £100 to Leicester (Mass.) academy.

BALDWIN, John Denison, journalist, b. in Waltham, Mass., 11 March, 1807; d. in Worcester, Mass., 8 July, 1888. He supported himself from the age of fourteen, pursued academical, legal, and theological studies in New Haven.
and received the honorary degree of master of arts from Yale college. He was licensed to preach in 1833, was pastor of a church in North Branford, Conn., and scholar, and professor of geology and natural history. He became editor of the "Repub-
lican," an anti-slavery journal, published in Hartford, and subsequently of the "Commonwealth," published in Boston. From 1839 he owned and edited the "Worcester Spy." He was elected to congress in 1863, and re-elected twice. He pub-
lished "Raymond Hill," a collection of poems (Boston, 1847); "Prehistoric Nations" (New York, 1869); and "Ancient America" (1872).

BALDWIN, Joseph G., jurist, b. in Sumter, Ala.; d. in San Francisco, Calif., 30 Sept., 1864. From 1857 to 1863 he was a judge of the supreme court of California, and he was chief justice from January, 1863, until January, 1864. He was the author of "Flash Times in Alabama and Missis-
sippi" (New York, 1853), a popular book, "Party Leaders" (1854), and a volume of humorous local skitches (San Francisco, 1859).

BALDWIN, Loammi, engineer, b. in Woburn, Mass., 21 Jan., 1747; d. there, 20 Oct., 1807. He received a common-school education, and was quick to devote his attention to mathematics, studied at Harvard under Prof. Winthrop, after which he became a surveyor and engineer. He was a member of the Middlesex co. convention held in August, 1774. During the revolutionary war he entered the service as a major, and was in the battle at Lexington, in the battle of Long Island, and to the death of the war. He became the architect of the town of Woburn; but after reaching the rank of colonel he was compelled, in 1777, to retire in consequence of failing health. From 1780 to 1794 he was sheriff of Middlesex co. He was a member of the Massa-
chusetts state legislature from 1784 to 1777, and again in 1780. From 1794 to 1804 he was superin-
tendent of the Middlesex canal, and toward its principal owners. He was also a member of the American Academy of Sciences.—His son, Loammi, b. in Woburn, 16 May, 1780; d. in Charlestown, Mass., 30 June, 1838, was graduated at Harvard in 1800, studied law, and became a civil engineer. The dry docks at Charlestown and at Newport were constructed under his superintendence, and a portion of his father, has appeared from the pen of a grandson.—Another son, James Fowle, engineer, b. in Woburn, Mass., 29 April, 1782; d. in Boston, 20 May, 1862, was educated at the academies in Billerica and Westford, after which he entered on mercantile pursuits in Boston, but later joined his brother in the construction of the dry dock at the Charlestown navy-yard. In 1828 he was appointed one of the commissioners to make a survey for a railroad from Boston to Albany, and from 1830 to 1835 he was engaged in the construction of the Boston and Lowell rail-
road. He was appointed in 1837 one of the com-
mis-sioners to examine and report upon the means of improving the government. Baldwin was appointed master of the lyceum in 1854, and recommended Long Pond. His plan was adopted in 1846, and the work was completed in 1848. He was at one time state senator from Suffolk co., and also for some years water commissioner.

BALDWIN, Matthias William, manufactur-
er, b. in Elizabethtown, X. J., 10 Dec., 1785; d. in Philadelphia, 7 Sept., 1864. Having a natural inclina-
tion for mechanical contrivances, he was ap-
pointed at the age of sixteen to a firm of jewel-
Iers in Frankford, Pa. On the expiration of his service he became a journeyman, and in 1819 he established his own business. While thus occupied he devised and patented a process for platting with gold, which has since been universally adopted. He then undertook the manufacture of 'book-bind-
ers' tools and calico-printers' rolls, and his factory was the first concern of its kind in this foreign supply. About 1828 his attention was di-
rected to the manufacture of steam-engines, and at this time he constructed a five-horse-power engine, which was employed in his own works. The commen-
tations that the new engine received induced him to enter into the manufacture of stationary engines, and his business became extensive and profitable. In the latter part of 1830 he was per-
mittted to see a locomotive which had just been received from England, and after four months' labor he succeeded in producing a beautiful model, which was exhibited in Philadelphia. His first loco-
motive, called the "Iron sides," was made for the city, will depart daily, when the weather is fair, with a train of passenger-cars. On rainy days horses will be attached." He at the same time received orders for nine or ten locomotives, and in 1835 he moved to the corner of Broad and Hamilton streets. His inventions and improvements in the construction of locomotives are very numerous, and among these perhaps the most important was the flexible truck locomotive, patented in August, 1842. His works have acquired a world-wide reputation, and his locomotives have been sent to nearly every foreign country. It is estimated that over 1,500 locomotives left these works completed prior to his death. Mr. Baldwin was a member of the constitutional convention of 1857, and in 1854 of the state legislature. He was also for several years president of the Horticultural Society of Philadelp-hia. A new Geil sketch of his life, by Rev. Wolfe Calkins, has been privately printed.

BALDWIN, Robert, Canadian statesman, b. in Toronto, 12 May, 1804; d. at Spadina, near To-
ronto, 9 Dec., 1858. He entered upon the practice of law in 1825, and continued this profession during his political career; was elected to the Upper Cana-
dian assembly as a liberal, and to the Canadian assembly in 1836 in the interests of responsible government, and while there endeavored to impress upon Lord Glenelg the need there was of applying the English principle of responsibility to the Canadian executive. Though he found an able advocate in Lord Durham, his mission was a failure, as it was many years before Canada was granted responsible gov-
ernment. On 18 Feb., 1836, Mr. Baldwin was first sworn in as an executive councillor; in 1840 he became solicitor-general, and in 1842 premier and attorney-general of Upper Canada in the Hincks-Baldwin administration, which portfolio he re-
tained until the following year. In 1848 he re-
sumed office under the Baldwin-Lafontaine minis-
tery, and his influence was powerful in securing the life in 1851. Though regarded as the father of the reform party in Canada, he was not an extremist, and his politi-
cal views were more nearly in accord with those of the present liberal-conservatives than with those that were held by the successors of the reform par-
try in Canada.

BALDWIN, Roger Sherman, jurist, b. in New Haven, Conn. 4 Jan., 1793; d. there, 19 Feb., 1863. He affords an admirable instance of all that is best in the intellectual and moral life of New England. By descent and education he was of genuine Puritan stock. His father, Simeon Baldwin, was descended from one of the original New Haven colonists, and
his mother was the daughter of Roger Sherman, a signer of the declaration of independence, both families being from the earliest times identified with the cause of civil and religious liberty. Roger Sherman Baldwin entered Yale at the age of fourteen, and was graduated with high honors in 1811. Beginning his legal studies in his father's office, he finished them in the then famous law school of Judges Reeve and Gould, at Litchfield, Conn. By the time that he was ready for admission to the bar, in 1814, he had developed a mastery of the principles of law that was considered very remarkable in so young a man. His habits of concentration, his command of pure and elegant English, the precision and definiteness of his methods, soon brought him into prominence in his profession, and at a comparatively early age he attained distinction at the bar. His preference was for cases involving the great principles of jurisprudence rather than those that depended upon appeals to the feelings of jurymen. Nevertheless, he commanded rare success as a jury lawyer, being gifted with a certain dignified and lofty eloquence that carried conviction and sustained the current belief that he would not undertake the defence of a cause of whose justice he was not personally convinced. One of the most famous cases in which he was engaged was that of the "Anastasia captives" (1839), now well-nigh forgotten, but which assumed international importance at the time. A shipload of slaves, bound to Cuba, had gained possession of the vessel. They were encountered and driven out to sea by an American vessel and brought into New York, where they were cared for. The Spanish authorities claimed them as the property of Spanish subjects, and the anti-slavery party at the north, then becoming a formidable element in national politics, interested itself in their behalf. The case was first tried in a Connecticut district court, decided against the Spanish claim, and carried to the supreme court of the United States. The venerable John Quincy Adams and Mr. Baldwin were associated as counsel, the latter practically conducting the case. His plea on this occasion showed such a grasp of the legal technicalities involved, that such men as Chancellor Kent rated him with the leading jurists of the time. After serving his own state in assembly and senate (1837-41), he was elected governor in 1844, and reelected for the following term. In 1847 he was appointed to fill the unexpired term of Jabez W. Huntington as U. S. senator. He at once took a leading place among the statesmen of the period, was reelected for a second term, and always advocated the cause of equal rights for all during the heated controversies preceding the outbreak of the civil war. In 1860 he was one of the two electors "at large" for the choice of Mr. Lincoln, and in 1860 was appointed by Gov. Buckingham a member of the "peace congress" of 1861, consisting of five delegates from each state, who, it was hoped, would devise a basis of amicable settlement of the differences between North and South. In his opening address, John Tyler, of Virginia, president of the congress, said: "Connecticut is here, and she comes, I doubt not, in the spirit of Roger Sherman, whose name, with our very children, has become a household word, and who was in life the embodiment of that sound, practical sense which built the frame of the constitution. The labors of the congress came to naught, owing mainly to the precipitancy with which some of the southern states passed ordinances of secession. This was the last public service undertaken by Mr. Baldwin other than the personal assistance which every patriotic citizen lent to his country during the early years of civil war.

BALDWIN, Theron, clergyman, b. in Goshen, Conn., 21 July, 1801; d. in Orange, N. J., 10 April, 1870. After graduation at Yale in 1827, he studied for two years in the theological school of that college, and was ordained as a home missionary in 1829. He was settled for two years at Vandalia, Ill., as a Congregational minister, and became known as a promoter of education. Largely through his efforts the charter of Illinois college was procured. In 1831 he was appointed agent of the home missionary society for Illinois. He organized in 1838, and for five years conducted, the female seminary near Alton, Ill., at the same time serving as pastor of the Congregational church, and became noted for the formation of the "American collegiate and theological education in the west," popularly known as the "western college society," was the result of his labors, and he became its corresponding secretary, performing the duties of the office until shortly before his death. To him chiefly are due the higher educational facilities attainable in every part of the west.

BALDWIN, Thomas, clergyman, b. in Bozrah, Conn., 23 Dec., 1753; d. in Waterville, Me., 29 Aug., 1825. He removed to Canaan, N. H., which town he represented in the legislature, united with the Baptist church in 1780, was ordained as an evangelist in June, 1783, and was a travelling minister among the scattered colonies of New England. In 1786, when he was installed pastor of the second Baptist church in Boston. In 1808 he began the publication of the "Massachusetts Baptist Missionary Magazine," afterward the "American Baptist Missionary Magazine," which he edited until his death. He published "Open Communion Examined" (1789), and other writings on the subject of communion and baptism, the chief of which was a "Series of Friendly Letters in which the Distinguishing Sentiments of the Baptists are Explained and Vindicated" (Boston, 1810), besides numerous sermons.

RALESTIER, Wolfeott, author, b. in Rochester, N. Y., 13 Dec., 1801; d. in Dresden, Germany, 6 Dec., 1891. His school life was passed in various parts of the country, with one year at Cornell, and his first production was entitled "A Patent Philter," published serially in the New York "Tribune" in 1844, "A Fair Device" and a "Life of James G. Blaine" (New York, 1884). "A Victorious Defeat" (1886), "A Common Story" (1891), with Rudyard Kipling, "The Naulahka" (1892), and "Benefits Forest" (1894).

BALFOUR, Nisbet, soldier, b. in Dunboy, county Fife, Scotland, in 1743; d. there in October, 1823. As one of Cornwallis's most trusted officers, he won high distinction in the British service during the revolution. He was the third son
of Lord Balfour of Burleigh, was a lieutenant in the 4th regiment of foot at the battle of Dunker Hill, and was wounded in that engagement. He also participated in the engagements preceding the capture and occupation of New York, and in the battles of Elizabethtown, Brandywine, and Germantown, and was made lieutenant-colonel of the 23rd regiment in 1778. He accompanied Cornwallis to Charleston, and as commandant of that city rendered himself very obnoxious to the inhabitants by the severity of his treatment. He was promoted major-general in 1783, served in the war with France, and in Flanders in 1794, and when he died was sixth in the list of major-generals in the British army.

**BALLIF, Walter,** clergyman, b. in St. Ninian's, Scotland, in 1773; d. in Charlestown, Mass., 3 Jan., 1852. In early youth he was befriended by Robert Haldane, and at his expense was educated for the ministry of the church of Scotland. After several years of service there as a preacher he came to the United States, and became a Baptist about 1806. He remained in that denomination for some years, and was a member of several Baptist institutions, and there seems to have found a congenial sphere, for he became prominent as a preacher and writer in that sect. His best-known book is entitled “Essays on the Intermediate State of the Dead” (Charlestown, 1828). A memoir by A. Whittimore, was published in Boston in 1839.

**BALL, Dunlop,** tailor, b. in Scotland, 1758; d. in Charlestown, Mass., 3 Jan., 1852. Mr. Ball devoted his attention principally to the manufacture of his “New American Harvester,” which attained great popularity. In 1865 it was estimated that 10,000 of these machines were produced annually. During the later years of his life, although his inventions were used extensively, Mr. Ball was financially embarrassed, while the owners of his patents acquired great wealth.

**BALL, Thomas,** machinist, b. in Charlestown, Mass., 3 June, 1819. In early life he was a singer of basso parts in oratorios, and a portrait painter in Boston. About 1852 he devoted himself to modelling, and made a miniature bust of Jenny Lind, another of Daniel Webster, and a life-size statue of the statesman. He studied in Europe for several years preceding the Boston Exposition, and there completed a group called “Emancipation,” the original of which is in Washington, and a replica in Boston. His statue of Webster, in the Central Park, is his noblest work. It was placed there at an expense of about $90,000, through the munificence of a New York merchant.

**BALLARD, John H.,** Bent, b. in Fredericksburg, Va., 16 Oct., 1761; d. in Shelby co., Ky., 5 Sept., 1853. When eighteen years old he joined a band of emigrants to Kentucky, then the battleground of advancing civilization, and was prominent in the Indian warfare of the time. As a major of Kentucky volunteers he led an expedition against the British and Indians at the river Raisin, in Michigan, in 1812, on whose body was found a plan of the town and a prisoner. He was for several terms a member of the Kentucky legislature. Ballard co., Ky., and Blandville, its capital, commemorate his services during the early history of the state.

**BALLARD, Harlan Hoge,** educator, b. in Athens, Ohio, 26 May, 1853. He was graduated at the Cleveland College and at the Lenox (Mass.) high school. In 1880 he was appointed principal of the Lenox academy. During 1875 he organized, in connection with the high school, where he was then teaching, the “Agassiz Association” for the observation and study of natural objects, and in 1880 a general invitation was issued to all interested to unite in the work and to form local branches of the association. The membership has since increased to more than 10,000, distributed in nearly 1,000 chapters, located in nearly every state and territory, as well as in Canada, Great Britain, South America, and Japan.

**BALLARD, Henry E.,** naval officer, b. in Maryland, in 1816. Enlisted at Annapolis, 23 May, 1838. He was the first of Maj. Balfour of the revolutionary army; was appointed midshipman 2 Nov., 1840; lieutenant, 26 April, 1819; master, 27 April, 1816, and captain, 3 March, 1825. He was a lieutenant on board the U. S. frigate “Constitution” in her famous action with the British cruisers “Cyane” and “Levant” in the bay of Biscay, 20 Feb., 1815. After the capture of both vessels by the “Constitution,” he was placed with a prize crew on board the “Levant,” and took her to the Cape Verde islands, but was captured by a British squadron in Porto Praya, in defiance of the neutral flag, whose protection he claimed.

**BALLIVIAN, Adolfo** (bal-lyay'-ve-an), president of Bolivia, d. in Oruro, 14 Feb., 1854. After
BALLOU, Hosea, clergyman, b. in Richmond, N. H., 30 April, 1771; d. in Boston, Mass., 7 June, 1852. Maturin BalloU, father of Hosea, was a Baptist minister with a large family, two of whom, by some of his notables in the New England Universalists. Mr. BalloU, Sr., received no salary for his services as preacher, and was so poor that he could neither send his children to school nor furnish them with materials wherewith to learn to write. Hosea, the future author of numerous books, learned to make his letters with a bit of charcoal on a piece of birch-bark. He united with his father's church at the age of eighteen, but never attended school until he was twenty, and for this last privilege he seems to have been indebted to an accident that temporarily incapacitated him for physical labor. Hardly had he become a Baptist when his inquiring mind suggested questions and doubts to which no satisfactory answers were found in his book. Doubt, and even open doubt, as is usually said, a Universalist, a sect then gaining a foothold in this country. He began to preach as soon as he came of age, supporting himself by teaching school, and in 1794 became pastor of a congregation in Dunm, Mass., where he remained until 1802, when he removed to Barnard, Vt., to ordain the founder of the new church there, and remain there till 1810. He then went to Woodstock, Hartland, and Bethel. Here he wrote and published the first of his numerous works on theological topics, "Notes on the Parables" (1804). Other works on kindred topics followed at short intervals, and in 1807 he became pastor of the Universalist society in Portsmouth, N. H. Here he remained until 1815, when, after a short stay in South Boston, he went to the pulpit of the second Universalist society of Boston, and the period of his greatest activity and usefulness began. For more than thirty-five years, beginning 17 Dec., 1817, he remained pastor of this church, founding the "Universalist Magazine" (afterward the "Trumpet"), later the "Universalist Expositor," and still later "The American Quarterly Review." During these undertakings he was assisted by his grand-nephew, Hosea Ballou, second grandson of his elder brother Benjamin. He was strongly impressed with the necessity of providing a denominational literature to meet the growing demands of the sect, which he had already done so much to establish in America, and to this end he contributed hymns, essays, and controversial papers to the magazines and other publications. His "Examination of the Doctrine of Future Retribution" (1834) was among the most noteworthy of his books, which, counting sermons, lectures, and verses, most of them included in the "Universalist Collection," number many volumes. His life has been written by his son Benjamin T. Ballou, "Hosea Ballou, an American Universalist" (Boston, 1893). — His grand-nephew, Hosea, clergyman (b. in Halifax, Vt., 18 Oct., 1796; d. in Somerville, Mass., 27 May, 1861), was educated in his native town, prepared for the Universalist ministry, and was settled as pastor of a society in Stafford, Conn., about 1815. Thence, in 1821, he removed to Roxbury, where he remained till June, 1828, as pastor of a church. During this time he was associated with his uncle in the editorship of the "Universalist Magazine" and other denominational publications. In 1859 he published "The Ancient History of Universalism" (reprinted in 1852). In 1853 he edited an edition of Simond's "History of the Crusades." His editorialship of the periodicals referred to continued during most of his active life. Hosea Ballou, Jr., was for a time a non-resident professor in the Unitarian divinity school, Meadville, Pa. Removing from Roxbury in answer to an invitation from Medford, Mass., he became pastor of the society in that place, and in 1853 was elected first president of Tufts college, which he was largely instrumental in founding. After a visit to Europe under the auspices of the Universalist Foreign Missionary Society, he assumed the active duties of his office, and performed them acceptably until just before his death. In 1844 he received the degree of S. T. D. from Harvard. — His son, Maturin Murray, b. in Boston, Mass., 14 April, 1820; d. in Cairo, Egypt, 27 March, 1883, went to the Boston high school, and passed his entrance examination at Harvard, but did not join his class, and for five years a clerk in the Boston post-office, and subsequently for five years in the U. S. Treasury department. In 1838 he became connected with the "Olive Branch," a weekly publication, and was remarkably successful in this and other literary undertakings. He was editor and proprietor of "The American Christian" (1834) and "The Universalist" (1836). He became largely engaged in building operations in the business quarter of Boston. These undertakings included the St. James hotel, at the time one of the most costly structures in Boston, and several of the finest stores on Winter street. He travelled extensively in both of the American continents, and in both of the continents, and in several, and the Pacific islands, and the summer of 1886 undertook a voyage to the polar regions. In the intervals of his literary and journalistic labors he has been unremitting. He became in 1872 one of the original proprietors, and was for many years chief editor, of the "Boston Daily Globe." He edited and owned, either in part or altogether, "Ballou's Pictorial," "The Flag of the Union," the "Boston Sunday Bulletin," and the "Boston Sunday Budget." His connection with the Boston press lasted more than forty years. He is the author of "Due West," "Due South." "The History of Cuba" (Boston, 1854); "Biography of the Rev. Hosea Ballou," and "Life Story of Hosea Ballou." He edited and compiled "Psychological Research" (1850), "Maturin Murray's "Notable Thoughts about Women"; and "Edge of a Tool's Speech" (1886). — Moses, clergyman, grandson of Hosea the elder, b. in Monroe, Mass., 24 March, 1811; d. in Atco, N. J., 19 May, 1879. Educated at the Brattleboro (Vt.) academy, he was ordained to the Universalist ministry in 1835. His pastoral engagements were, in youth, at Portsmouth, N. H., and Newport, Conn., New Haven, Conn., New York city, Philadelphia, Pa., and Atco, N. J. In 1837 he was married to Almena D. Giddings. He wrote "A Memoir of the Rev. Merritt Sandford" (New York, 1850), and "The Divine Character of Vindicato," a review of Dr. Edward Beecher's "Conflict of Ages" (Cambridge, 1859).
Lincoln ticket in 1860, delegate to the republican convention that nominated Grant and Wilson in 1872, and was a representative of North Island, in the forty-fourth and forty-fifth congresses.

BALMACEDA, José Manuel (bal-mah-thay'-da), Chilian statesman, b. in 1840; d. by his own hand, in Santiago, Chili, 19 Sept., 1891. He received a good education, and early distinguished himself as a political orator, his speeches favoring radical reforms in the constitution, and he was deputy in five consecutive legislatures, was elected senator in 1883, and was from 12 April, 1882, minister of the Interior, appointed by President Santa Maria. He was in 1868 one of the founders, together with the brothers Mata, Idiordro Enarruzur, and other liberal Chilians, of the reform club, and in 1874 boldly but unsuccessfully advocated in congress the separation of church and state. In 1884, Balmaceda succeeded, however, in introducing civil marriage and other liberal laws. As Chilian minister at Buenos Ayres, Balmaceda rendered his country a great service by gaining the good will of the Argentine Republic during the war between Chili and Peru. He was nominated at the convention of 18 Jan., 1891, and subsequently elected president, 18 Sept., 1886. In Jan., 1891, he proclaimed himself dictator.

BALMACEDA, Francisco J. (bahl-mah-say'-da), Cuban writer, b. in Remedios, Cuba, in 1853. In 1846 he published, at Havana, "Rimas Chilianas"; in 1861, "Relatos Morales." Some years later he printed "Misterios y Misterios," a novel; a work on political economy, and another on agriculture. In 1869 Balmaceda was banished and sent to Fernando Po with many other revolutionists, and in 1871 he published a narrative under the title of "Los Confinados a Fernando Po.

BALMES, Francisco Javier (bahl-mess), Spanish surgeon. In 1803 he sailed from Corunna and visited the West Indian islands and China, where he studied the indigenous plants, and made valuable colored drawings, which he gave to the library of the Museum of natural sciences in Madrid.

BALTA, José, president of Peru, d. in Lima, Peru, 26 July, 1872. At the beginning of his public career he took part in the military operations consequent on the invasion of Peru by President Santo Cruz of Bolivia, in 1836. He was an actor in the various Peruvian revolutions, was distinguished in the defeat of the Spanish force on 2 May, 1866, and in 1867 led a revolt against the dictator, President, Prado, and drove him into temporary exile in Chili. Col. Balta was elected president for four years by a large majority in April, 1868, and inaugurated on 2 Aug. His administration was on the whole prosperous and popular; but he burdened the country with immense loans for the purpose of building railroads. In the presidential contest of 1872 the vote was so close that the election was thrown into the congress, and when it became evident that Dr. Armas, the ad ministration candidate, would be defeated, Balta was strongly urged by Gen. Gutiérrez, his minister of war, to declare himself dictator. But the president refused to do this, and made public his intention of resigning his office, on the expiration of his term, to the successor appointed by congress. This did not suit Gutiérrez, and he immediately seized and imprisoned Balta, and proclaimed himself supreme chief of the republic. This usurpation was of brief duration. The new dictator had few sympathizers, and four days after his coup d'état a disturbance took place in which Silvestre Gutiérrez, his brother and minister of war, was killed. In revenge, the usurper gave orders to kill Balta, and the latter was shot in his prison as he lay ill, July 22 (others say 26), 1872. That night the populace of Lima rose in insurrection. Gutiérrez, after a vain attempt to escape, was killed, and the legal president, Pardo, was inaugurated soon afterward.

BALTIES, Robert Gregory, b. in Enfield, Rhenish Bavaria, 7 April, 1827; d. in Alton, Ill., 15 Feb., 1886. He studied at the college of the Holy Cross, Worcester, Mass., at St. Ignatius college, Chicago, and at LaSalle university, Montreal, and was ordained priest in 1853, and consecrated bishop of Alton in 1870. He was the author of "Pastoral Instruction" (New York, 1875; 3d ed., enlarged, 1880).

Baltimore, Lords, proprietors of the province of Maryland.—Sir George Calvert, first Baron Baltimore, b. in Kipling, Yorkshire, England, about 1625; d. in London, 15 April, 1632. He graduated at Oxford in 1597, and was sent abroad to travel. On his return he became secretary to Robert Cecil, after which he acquired for him a clerkship of the privy council. In 1617 he was knighted by James I., who esteemed him highly, and gave him a pension in 1620. He had previously been made a secretary of state, but resigned the office in 1624, having become a Roman Catholic. He did not, however, lose the king's favor, but continued at court in the capacity of privy councillor, and from this fact, in connection with James's hatred of apostasy, some have concluded that he was always a Roman Catholic, but there are many evidences that he was actually converted. In 1625 the king made him a peer of Ireland. He had for some time been interested in the colonization of the New World, having been a member of the great company for Virginia, and in 1621 obtained from the king a patent for the southern promontory of Newfoundland, which he named Avalon. Here he spent money lavishly in building warehouses and a splendid mansion. He visited his colony
after the death of James, and again in 1629, when he captured some French ships that had been harassing the colonists. He was much disappointed, however, to find the climate so severe, and wrote to Charles L, desiring another grant farther south. In 1628 he visited Virginia and explored Chesapeake bay. His reception in Virginia was unfavorable, on account of his religion, for church-of-England men had full control there. Notwithstanding this, he was delighted with the country, and, although the king tried to dissuade him from founding another colony, he was persistent in his enterprise. Charles finally granted him another grant in 1633, and a new patent was drawn up, giving Baltimore that part of the country now included in the states of Maryland and Delaware. But before the papers were completed Lord Baltimore died, leaving his son to reap the benefit of the grant. The first Lord Baltimore seems to have been a man of much wisdom and moderation. He was liked by all parties, and, although a strong supporter of royal prerogative in England, he favored popular institutions and liberty of conscience in the colonies. It is supposed that many of the provisions of the Maryland charter were due to him, and it is even thought that he may have drawn up the entire paper, as is shown by the charter. He seems to have found a state where there should be, on the one hand, a hereditary landed aristocracy and many features of the feudal system, and, on the other, an assembly of freemen whose consent should be necessary to all laws. For a list of books relating to George Calvert, see "Proceedings of the Maryland Historical Society," 1888. See also Winson's "Private Parkes of the First and Second Calvert;" (Boston, 1886).—Cecilius (or Cecil) Calvert, second Lord Baltimore, b. about 1605; d. in London, 29 Nov., 1673. Little is known of his early life. About 1623 he married Anne Arundel, whose name is still borne by one of the counties of Maryland. On 20 June, 1632, the charter that had been indenied to Leonard Calvert was granted to him, as lord proprietor, many of the rights of a feudal sovereign, but provided for popular government, and exempted the colonists from taxation. In November, 1633, Cecil sent an expedition under his brother Leonard (see Calvert, Leonard) to his new domain. He never visited it himself, but governed it by deputies for forty-three years, and his administration, as is shown by the charter, was well adapted to the feudal system, and, on the other, an assembly of freemen whose consent should be necessary to all laws. For a list of books relating to George Calvert, see "Proceedings of the Maryland Historical Society," 1888. BALUFI, Gaetano, Italian ecclesiastic, b. in Ancona, 29 March, 1798; d. in London, 11 Nov., 1866. He was papal nuncio in New Granada, and discovered incised documents at Bogota, which he incorporated in a "Religious History of America," Rome, 1819. He afterward became bishop of Imperialo in Patagonia, and then archbishop of Buenos Aires.

BANCROFT, Aaron, clergyman, b. in Reading, Mass., 10 Nov., 1755; d. in Worcester, Mass., 10 Aug., 1839. While pursuing his studies during the revolutionary struggle he frequently served as a minute-man, and was present at both Lexington and Bunker Hill. In 1778 he was graduated at Harvard college. He taught school, studied theology, was licensed to preach, and spent three years as a missionary at Yarmouth, Nova Scotia. He was settled in Worcester as pastor of the Congregational church, and remained in the same post until his death. He was prominent in church councils and conventions. In middle life his theological views underwent a change in the direction of Arminianism. By his effective advocacy of liberal measures and voluntary associations in England, he held a prominent place in the period of the Unitarian schism. He published sermons in defence of religious liberty; a eulogy of Washington (1800); a "Life of Washington" (1807, reprinted in England in 1808); and a volume of sermons directed against the doctrine of election (1822). Although he was president of the American Bible Society, he adhered to the name and the system of Congregationalism to the close of his life.

BANCROFT, Edward, author, b. in Westfield, Mass., 9 Jan., 1744; d. in England, 8 Sept., 1829. He had but little schooling, and was apprenticed to a trade. Running away while in debt to his master, he went to Paris, France, and in his return paid what he owed. After going to sea, he settled in Guiana, and practised medicine there in 1763. He then removed to England and published a "Natural History of Guiana" (London, 1769), containing some new information, particularly about the arrow-roots, or vegetable poison, used by the Indians on their arrows. He afterward wrote a novel called "Harriet" (1783). About this time he began to question the orthodoxy of his religion. He became intimate with Priestley and Benjamin Franklin, and the latter obtained for him a place on the "Monthly Review," for which he wrote reviews of publications relating to America. In 1777, suspected of complicity in an attempt to burn the Portsmouth dock-yard, he fled to Passy, France, and then went to Paris, where he was placed in the continental congress. Deane confided to him an account of the intercourse between France and the congress in relation to the furnishing of supplies, and Bancroft communicated the whole to the British ministry, thus enabling the British ambassador to hinder the shipment. It is impossible to tell how large a part Bancroft was in this transaction, but it is certain that he had previously received money as an American spy. After the close of the war he obtained patents in France and England giving him the exclusive right to import yellow oak- bark, used in dyeing, which made him rich. He published "Experimental Researches concerning Permanent Colors" (1754; 2d ed., with additional volume, 1815). This work was translated into German. He also wrote articles on the relations between France and America, which were translated into French. Bancroft was a fellow of the royal society and a member of the royal college of physicians in London.

BANCROFT, George, historian, b. in Worces ter, Mass., 18 Oct., 1800; d. in Washington, D. C., 17 Jan., 1891. He was prepared for college at Exeter, N. H., was graduated at Harvard in 1817, and went to Germany. At Göttingen, where he resided for two years, he studied German literature under Benecke; French and Italian literature under Artaud and Bunsen; Arabic, Hebrew, and Scripture interpretation under Eichhorn; and the Roman history under Blumenbach; and the antiquities and literature of Greece and Rome under Dissen, with whom he took a course of Greek philosophy. In writing from Leipzig, 28
Aug., 1819, to Mrs. Prescott, of Boston, Dr. Joseph G. Cogswell remarks: "It was sad parting, too, from little Bancroft. He is a most interesting young man." In 1820 Bancroft was given the degree of Ph. D. by the university of Göttingen. At this time he selected history as his special branch, having as one of his reasons the desire to see if the observation of masses of men in action would not lead by the inductive method to the establishment of the laws of morality in the sciences. Bancroft became intimate with Schleiermacher, William von Humboldt, Savigny, Lappenberg, and Varnhagen von Ense, and at Jena he made the acquaintance of Goethe. He studied at Heidelberg with the historian Schlosser. In 1822 he returned to the United States and accepted for one year the office of tutor in the grammar school of Springfield, Mass., where in 1823 he published the first volume of his "History of the United States." In 1830, without his knowledge, he was elected to the legislature, but refused to take his seat, and the next year he declined a nomination, though certain to have been elected, for the state senate. In 1834 he published the first volume of his "History of the United States." In 1835 he drafted an address to the people of Massachusetts at the request of the young men's democratic convention, and in the same year he removed to Springfield, Mass., where he resided for three years, and completed the second volume of his history. In 1838 he was appointed by President Van Buren collector of the port of Boston. In 1844 he was nominated by the democratic party for governor of Massachusetts, and received a very large vote, though not sufficient for election. After the accession of President Polk, Mr. Bancroft became secretary of the navy, and signalized his administration by the establishment of Annapolis, and other reforms and improvements. This institution was devised and completely set at work by Mr. Bancroft alone, who received for the purpose all the appropriations for which he asked. Congress had never been willing to establish a naval academy. He studied the law to ascertain the powers of the secretary, and found that he could order the place where midshipmen should wait for orders; he could also direct the instructors to give lessons to them at sea, and by law had power to follow them to the place of their common residence on shore. With a close economy, the appropriation of the year for the naval service would meet the expense, and the secretary of war could cede all the expense of the schools to the navy department. When Congress came together they found the midshipmen that were not at sea comfortably housed at Annapolis, protected from the dangers of idleness and city life, and busy at a regular course of study. Seeing what had been done, they accepted the school, which was in full operation, and granted money for the repairs of the buildings. Mr. Bancroft was also influential in obtaining additional appropriations for the Washington observatory and in introducing some new professors of great merit into the corps of instructors, and he suggested a method by which promotion should depend, not on age alone, but also on experience and capacity; but this scheme was never fully developed or applied. While secretary of the navy Mr. Bancroft gave the order, in the event of war with Mexico, to renounce the immediate possession of California, and constantly renewed the order, sending a possible channel to the commander of the American squadron in the Pacific; and it was fully carried into effect before he left the navy department. No order, so far as is known, was issued from any other department to take possession of California, where "Life of James Buchanan," by G. T. Curtis, vol. i. During his term of office he also acted as secretary of war pro tem, for a month, and gave the order to march into Texas, which caused the first occupation of Texas by the United States. From 1846 to 1849 Mr. Bancroft was minister to Great Britain, where he successfully urged upon the British ministry the adoption of more liberal laws of navigation and allegiance. In May, 1847, he was appointed minister to Prussia; in 1848 he was accredited to the North German confederation, and in 1871 to the German empire, from which he was recalled at his own request in 1874. While still minister at Berlin he rendered important services in the settlement with Great Britain of the claim of the United States to the navigation of the Rhine. In the reference to the king of Prussia, which was proposed by Mr. Bancroft, the argument of the United States, and the reply to the argument of Great Britain, were written, every word of them, by Mr. Bancroft. Great Britain had long refused to concede that her emigrants to the United States, whether issued from Great Britain or Ireland, might throw off allegiance to their mother country and become citizens of the United States. The principle involved in this question Mr. Bancroft discussed with the government of Prussia, and in a treaty obtained the formal recognition of the right of expatriation at the will of the individual emigrant, and negotiated with the several German states a corresponding treaty. England watched the course of negotiation, resolving to conform herself to the principles that Bismarck might adopt for Prussia, and followed him in abandoning the claims to perpetual allegiance. After the expiration of the English mission in 1849, Mr. Bancroft took up his residence in Berlin, and continued work on his history. The third volume had appeared in 1840, and volumes 4 to 10 at intervals from 1852 to 1874. In 1876 the work was revised and issued in a centenary edition (6 vols., 12mo, Boston). Volumes 11 and 12 were published first under the title "History of the Formation of the Constitution of the United States" (New York, 1889). The last revised edition of the whole work appeared in six volumes (New York, 1884-85). Mr. Bancroft had been correspondent of the royal academy of Berlin, and also of the French institute; was made D. C. L. at Oxford in 1849, and Doctor Juris by the university of Bonn in 1868, and in September, 1870, celebrated at Berlin the fiftieth anniversary of his birth. His history of the United States was translated into French, German, and Russian. His minor publications include "An Oration delivered on the 4th of July, 1826, at Northampton, Mass." (Northampton, 1826); "History of the Political System of Europe," translated from Heeren (1829); "An Oration delivered before the Democracy of Springfield and Neighboring Towns, July 4, 1836." (2d ed., with prefatory remarks, Springfield, 1836); "History of the Colonization of the United States" (Boston, 1841, 12mo, abridged); "An Oration delivered at the Commemoration, in Washington, of the Death of Andrew Jackson, June 27, 1845"; "The Necessity, the Reality, and the Promise of the Progress of the Human Race": "An
Oration delivered before the New York Historical Society, November 20, 1854 (New York, 1854); "Proceedings of the First Assembly of Virginia, 1619; Communicated, with an Introductory Note, by George Bancroft."); "Calendar of the New York Historical Society," second series, vol. iii., part i. (New York, 1857); "Literary and Historical Miscellanies" (New York, 1855); "Memorial Address on the Life and Character of Abraham Lincoln, delivered at the request of both Houses of the Congress of America, before them, in the House of Representatives, at Washington, February 12, 1866" (Washington, 1866); and "A Plea for the Constitution of the United States of America, Wounded in the House of its Guardians," by George Bancroft, Veritatis Unice Litarem (New York, 1856). Among his other speeches and addresses may be mentioned a lecture on "The Culture, the Support, and the Object of Art in a Republic," in the course of the New York historical society in 1852; one on "The Office, Appropriate Culture, and Duty of the Mechanic"; and to the "American Cyclopedia" Mr. Bancroft contributed a biography of Jonathan Edwards. Among these the least satisfied with the historian have been some of the descendants of eminent patriots (Greene, Rush, Rush, et al.), who have not, in the opinions of his censors, been duly recognized by Mr. Bancroft. That there should be entire agreement as regards the accuracy and candor of the narrator of the events of so many years, and those years full of the excitement of party faction, is not to be expected. The merits of the work are common; the defects are in a biographer by the present writer (see Allibone's "Dictionary of Authors"), where the following opinions of eminent critics are quoted: Edward Everett says: "A history of the United States by an American writer possesses a claim upon our attention of the strongest character. It would do so under any circumstances: but when we add that the work of Mr. Bancroft is one of the ablest of that class which has for years appeared in the English language; that it compares advantageously with the standard British historians; that as far as it goes it does such justice to its noble subject as to supersede the necessity of any future work of the same kind, and, if completed as commenced, will be a monument over the tombs of both American and as an English classic, our readers would justly think us unpardonable if we failed to offer our humble tribute to its merit." Prof. Heeren writes: "We know few modern historic works in which the author has reached so high an elevation at once as an historical inquirer and an historical writer. The great concernlessness with which he refers to his authorities, and his careful criticism, give the most decisive proofs of his comprehensive studies. He has founded his narrative on contemporary documents, yet without neglecting works of later times and of other countries. His narrative is everywhere worthy of the subject. The reader is always instructed, often more deeply impressed with the greatness of the world or of the country is the muse which inspires the author, but this inspiration is that of the severe historian, which springs from the heart." William H. Prescott says: "We must confess our satisfaction that the favorable notice we took of Mr. Bancroft's labors on his first appearance has been fully ratified by his countrymen, and his latest work establishes his title to a place among the great historical writers of the age. The reader will find the pages of the present volume filled with matter not less interesting and important than the preceding.

He will meet with the same brilliant and daring style, the same picturesque sketches of character and incident, the same acute reasoning and compass of erudition." George Ripley writes: "Mr. Bancroft is eminently a philosophical and historical writer. He brings the wealth of a most varied learning in systems of thought and in the political and moral history of mankind to illustrate the early experiences of his country. He catalogues events in a manner which shows the possession of ideas, and not only describes popular movements picturesque, but also suggests some philosophical significance." Baron Bunsen says: "I read last month Bancroft with increasing admiration. What a glorious and interesting history has he given to his nation of the centuries before the independence!" Von Ranmer remarks: "Bancroft, Prescott, and Sparks have effectually in history composition that to the living European historian can take precedence of them, but rather might be proud and grateful to be admitted as a companion." Mr. Bancroft's last address was given at the opening of the third meeting of the American historical association, of which he was president, at Washington, 27 April, 1886. It was printed in the "Magazine of American History" for June, 1886. A letter from Mr. Bancroft to his friend, Judge Washington, D. C., 30 May, 1882, he wrote: "I was trained to look upon life here as a season for labor. Being more than fourscore years old, I know the time for my release will soon come. Conscious of being near the shore of eternity, I await without impatience and without dread the beckoning of the beyond land."

BANCROFT, Hubert Howe, historian, b. in Granville, Ohio, 5 May, 1832. He entered the book-store of his brother-in-law, in Buffalo, N. Y., in 1848, and in 1852 was sent to California to establish a branch of the business there. He soon began to collect and preserve all available books and documents relating to the history of the Pacific states. As his affairs prospered, Mr. Bancroft's library increased, and in 1868, resigning to his brother, A. L. Bancroft, the management of his business, he devoted himself to the arrangement and publication of the material he had gathered. This consisted of books, maps, and printed and manuscript documents, including a large number of rare and original papers. He was assisted in his work by his assistants by pioneers, settlers, and statesmen. The indexing of this vast collection employed six persons for ten years. The library was removed in 1881 to a fire-proof building, and now numbers about 45,000 volumes. Mr. Bancroft's plan is to publish thirty-nine volumes, embracing the history of the whole Pacific coast, from Central America to Alaska, and about one third of these have already appeared. The last volume published is the fifth of the history of California (San Francisco, 1886). Mr. Bancroft employs collaborators for the preliminary work, revising it all, and writing the most important chapters himself. In 1886 the publishing establishment of A. L. Bancroft & Company was founded, and sales of seven volumes of the history were destroyed.

BANDELIER, Adolph Francés Alphonse, archaeologist, b. in Bern, Switzerland, 6 Aug., 1840. His early education was very slight, and he never attended school after his eighth year. After settling in the United States, he became interested in several kinds of business, but without much success. His attention was then turned to archaeological pursuits, and his principal work has been performed under the direction of the Archaeological Institute of America. From 1880 to 1885 he
was engaged in examining the ruins of the ancient Pueblos, and in studying the sedentary Indians of New Mexico. He visited Central America in 1881, and for a time during 1883-'84 was in charge of the Methodist Episcopal mission in Central America. His papers and reports of progress have been published in the "Proceedings of the American Association for the Advancement of Science," and among the "Papers of the Archaeological Institute of America." He is the author of "Art of War and Mode of Warfare (Boston, 1877); "Tenure of Lands, and Inheritance of the ancient Mexicans" (1878); "Social Organization and Government of Ancient Mexicans" (1878); and "An Archaeological Tour into Mexico" (1880).

BANDINI, Juan, politician, b. in Lima, Peru, in 1800; d. in Los Angeles, Cal., in 1859. In 1831 he took part in a revolution against Gov. Victoria. In 1834 he was connected with a famous and disastrous wagon scheme for a new colony in California, and in 1836-38 he was leader of the southern opposition to Alvarado. These latter years were the culmination of his political activity, and with his failure in the conflict with Alvarado he retired from party leadership. But he continued to hold various minor offices, and early espoused the cause of Catholicism.

BANGS, Francis Cannon, actor, b. in Alexandria, Va., 13 Oct., 1833. His first appearance on the stage was in 1852, in the Old National theatre, Washington, D. C. He played in New York for the first time, at Laura Keene's theatre, in the spring of 1858, at Wallack's in December of that year. He entered the English and German theatres from which he retired from the stage until 1865, when he appeared as William Tell at the National theatre, Washington. He played Old Tom in "After Dark" at Niblo's Garden in November, 1868, and in 1869 appeared as the Duke of Alva in "Patrie" at the Grand Opera-House. He took part in the Shakespearean revival at Booth's theatre in 1875, and in 1883, with Charles Thorne in the "Corsican Brothers." In 1884 he appeared in the rôle of Willie Denver in "The Silver King."

BANGS, Nathaniel, clergyman, b. in Stratford, Conn., 2 May, 1778; d. in New York city, 3 May, 1862. He received a limited education, taught school, and in 1799 went to Canada, where he spent one of the happiest years of his life. Uniting with the Methodist church, he labored for six years as an itinerant minister in the Canadian provinces, and, on returning to New York, took a prominent part in the councils of the denomination. In 1829 he was transferred from a pastorate in New York to the head of the Methodist book concern. Under his management debts were paid off and the business much extended. He was also editor of the "Methodist Magazine." In 1828 he was appointed editor of the "Christian Advocate." When the "Methodist Quarterly Review" replaced the "Methodist Magazine" in 1832, the general conference continued Dr. Bangs in the editorship. He was the principal founder of the Methodist Literature Society. Besides his editorial labors he exercised the censorship over all the publications of the book concern. When appointed secretary of the missionary society in 1886, he devoted his chief energies to its service, until appointed president of the Wesleyan university, at Middletown, Conn., in 1841. In 1844 he resigned pastoral work in New York and settled with the latter. In 1852 he retired and employed himself during his remaining years chiefly in literary labors. His most important work was a "History of the Methodist Episcopal Church from its Origin in 1776 to the General Conference of 1810" (4 vols., New York, 1839-42). His other published works were a volume directed against "Christianism, a new sect in New England" (1809); "Errors of Hopkintanism" (1815); "Predestination as Examined in the History of the Methodist Episcopal Church" (1818); "Methodist Episcopacy" (1829); "Life of the Rev. Freeborn Garettson" (1832); "Authentic History of the Missions Under the Care of the Methodist Episcopal Church" (1833); "Letters to a Young Preacher" (1835); "The Original Church of Christ" (1836); "Essay on Emancipation" (1849); "Tracts and Responsibilities of the Methodist Episcopal Church" (1856); "Letters on Sanctioning" (1851); "Life of Arminius"; "Scriptural Vindication of the Ordinances and Powers of the Ministry of the Methodist Episcopal Church"; and numerous occasional sermons. See "Life and Times of Nathan Bangs, D. D." by Abel Stevens (New York, 1863).—His son, Francis Nehemiah, lawyer, b. in New York city, 22 Feb., 1828; d. in Ocala, Florida, 30 Nov., 1885. He was educated at Wesleyan university, Middletown, Conn., and at the university of the City of New York, where he was graduated in 1845. He then studied at Yale, was admitted to the bar in New York in 1850, formed a partnership with John Sedgwick, and soon became prominent in his profession both with bankruptcy cases. On his elevation to the bench in 1871, Judge Sedgwick retired from the firm, which was afterward known as a railroad law firm, in charge of several important international cases. Mr. Bangs was active in the Cresola suits, the Havemeyer estate suits, and various phases of the litigation growing out of the Granger and railroad bankruptcies. He displayed great activity in his professional career from its beginning to its close, and it is believed his death resulted from overwork. He was one of the original members of the Bar Association of New York, and was its president in 1880 and 1881. He was active in the proceedings leading up to the battle against Judge Barnard and Cardozo in 1872, and was a witness at the trial of Barnard, who was convicted on every charge in regard to which Mr. Bangs testified. Interesting anecdotes are related of his courage and address in resisting some of the acts of Judge Barnard and Judge McCunn during the period of ring rule. Mr. Bangs was a republican in politics, and was a member of some of the Union League Clubs in New York city.

BANISTER, John, botanist, b. in England; d. in Virginia in 1692. He is said to have been an English clergyman, who, after spending some years in the West Indies, emigrated to America, and settled near Jamestown, Va. Here he devoted himself almost exclusively to botanical pursuits, and wrote a natural history of Virginia. He was killed by a fall while on a botanical expedition. To the second volume of Ray's "History of Plants" he contributed a catalogue of plants discovered by him in Virginia. Among his other publications are "Observations on the Natural Productions of America"; "Observations on the Musca lupus"; "On Several Sorts of Snails"; and "A Description of the Snaekerot, Pistolechia or Serpentaria Virginian."—His son, John, soldier, b. in Virginia; d. near Hatcher's Run, Dinwiddie co., Va., in 1787, received a classical education in England, studied law at the university of Edinburgh; returned to America he was prominent in the patriotic movements just before the revolution, and during the war a colonel in the Virginia line. He was a member of the state assembly, and of the continental congress from 16 March, 1778, to 24 Sept., 1779. In 1781, as lieutenant-colonel of Vir-
BANKHEAD adjutant-general was "Sept., 1894. The Bankhead military genealogy of the Marylanders, confiscated in the Blair papers (Petersburg, Va., 1840), and in Sparks's "Revolutionary Correspondence." See also Campbell's "History of Virginia" (Philadelphia, 1860).

BANKHEAD, James, soldier, b. in Virginia in 1783; d. in Baltimore, Md., 11 Nov., 1856. He was a son of James Bankhead, of Port Royal, an officer in the Revolution. He was appointed captain in the 5th infantry on 18 June, 1808; was brigade major to Gen. Symth in 1812; became assistant adjutant-general, 5 March, 1813; major 4th infantry, 15 Aug., 1813; adjutant-general, 9 Sept., 1813; and lieutenant-colonel, 3d artillery, 25 April, 1832. On 7 July, 1838, he was brevetted colonel for meritorious conduct in the Florida campaign, and on 16 Sept. commanded the 2d artillery. He distinguished himself at the siege of Vera Cruz, and in return for his services on that occasion was brevetted brigadier-general on 29 March, 1847. In January, 1848, he was commander of the department of Orizaba, Mexico, and at the time of his death commanded the military department of the district, and was a member of the state legislature. He entered the navy as a midshipman 6 Aug., 1838, and became lieutenant in 1852. During the civil war he was on duty on the "Susquehanna," and at the capture of Port Royal, 7 Nov., 1861, he commanded the "Virginia," and scored the "Fernandina, 3 May, 1862. In the same year was made commander, and commanded the famous "Monitor" when she foundered off Cape Hatteras on the morning of 31 Dec., 1862, on which occasion he displayed much courage. The vessel was filling rapidly, and Bankhead ordered the crew to leave on the Rhode Island's "boat, which was approaching. While the sea was breaking over the "Monitor's" deck, already partially submerged, Bankhead held the painter until the boat was full of men, and did not leave the vessel so long as he could do anything for the safety of the crew. He was made captain in 1866, and after the war commanded the "Wyoming," of the East India squadron. In ill-health compelled him to resign, and he died on board the steamer that was bringing him home.

BANKS, David, publisher, b. in Newark, N. J., in 1786; d. in New York city, 13 Oct., 1871. He began the study of law in New York in 1806, in the office of Charles Brainard, whose partner he afterward became. In 1809 he began the business of publishing law books with Stephen Gould, and the establishment of Banks & Gould was soon known as the most extensive of the kind in the country. The business is still continued by sons of Mr. Banks. For nearly ten years he held the offices of alderman and assistant alderman, being president of the board of aldermen part of that time. In later years of his life he was president of the East river bank.

BANKS, Nathaniel Prentice, statesman, b. in Waltham, Mass., 30 Jan., 1816; d. there, 1 Sept., 1884. He was early employed in a cotton factory, of which his father was superintendent, and learned the trade of a machinist. He was ambitious to become a writer, and studied diligently during his leisure hours, securing engagements to lecture before meetings and assemblies at an early age. He became editor of the local paper at Waltham, studied law, was admitted to the bar, and in 1849 was selected to represent his native town in the legislature of Massachusetts. At this time the ancient power of the whig party was waning in New England, and the free-soil party was making its influence felt. Mr. Banks advocated a coalition between the democrats and the new party, and was elected speaker of the New Hampshire legislature. He was re-elected in 1851 and re-elected in 1852. In 1853 he was a delegate to the Massachusetts constitutional convention, and was selected to be its chairman. On the tide of success that attended this political combination, he was in 1855 nominated to congress as a coalicion-democrat. During this term of service he withdrew from the democratic party and identified himself with the American or "know nothing" party, and by an overwhelming vote, as against the whig and democratic candidates in his district, he was re-elected to congress. In the preceding congress he had demonstrated his ability, and he was now nominated for speaker of the house of representatives. A contest lasting more than two months followed, and he was elected by a small majority on the 133d ballot, when the dead-lock had been broken by the adoption of the plurality rule. The American party went out of existence, and Mr. Banks was elected to the 35th congress as a republican by a larger majority than before, and served until 4 Dec., 1857, when, having been elected governor of Massachusetts, he resigned his seat in congress. He was re-elected governor in 1858 and 1859. In 1860 he accepted the presidency of the Illinois central railroad. Commodore General (then Captain) B. M. Scullin in that capacity, but gave up the office when the civil war began in the following year, and was commissioned a major-general of volunteers and assigned to the command of the 5th corps in the Army of the Potomac. For this duty he was in a degree qualified by experience in the state militia. His first active service was on the upper Potomac and in the Shenandoah valley, where a part of his corps acquitted itself well at the battle of Winchester, 23 March, 1862. He was left in April and May to guard the Shenandoah with two divisions. The exigencies of the service caused the withdrawal of one of these (Shields's), and Gen. Banks was left with about 8,000 men. Upon this force "Stone wall" Jackson made one of his sudden onslaughts with his whole corps, and the command only escaped capture by rapid and well-ordered marching and stubborn fighting. Through good generalship the bulk of the army crossed the Potomac at Front Royal on 26 May, and the confederate leader failed to realize his apparently reasonable expectation of capturing the entire corps. He was placed in command of the army of Virginia, 27 June, 1862, and concentrated his forces in the neighborhood of Culpepper Court-House early in August. Gen. Banks's corps was ordered to the front on 9 Aug., and late in the afternoon of that.
day a severe fight took place, known as the battle of Cedar mountain, which lasted well into the night. Bank's corps held the position against a large body of troops that was vastly outnumbering the night, and before the morning of Aug. 11th the confederates retreated to the Rapidan. After participating in Gen. Sigel's campaigns in September, Gen. Banks was placed in command of the defenses of Washington while preparations were secretly made to despatch a strong expedition by sea to New Orleans. He was signed for the command of this expedition, which sailed from New York in November and December, and on reaching New Orleans he succeeded Gen. B. F. Butler in command of the department. Baton Rouge was occupied with a strong force, and during the winter reconnoissances were made toward Port Hudson and other points in the vicinity. Early in April of 1863 he led the army up the Tchec country, encountering no very formidable opposition, as far as the Red river. Thence he crossed the Mississippi and invested Port Hudson in connection with the fleet under Farragut. Several unsuccessful attempts were made to storm the works, involving heavy losses to the assaulting columns. In July the assault was renewed with decided success, and on the 9th of that month the garrison of Port Hudson, 6,000 strong, capitulated, and the Mississippi river was once more open to the sea. No military movements of great importance were undertaken in the department until the succeeding spring, when Gen. Banks's army, supported by a powerful fleet, was sent up the Red river with the intention of regaining control of western Louisiana. At the same time Gen. A. J. Smith with 10,000 men descended the Mississippi, reaching the rendezvous first, and was joined by Gen. Banks, who assumed command of the whole force at Alexandria. The army advanced along the south bank of the Red river as far as Sulphur Cross-roads, when it suffered a defeat by the confederates under Gen. Richard Taylor, and was obliged to fall back to Pleasant Hill, having sustained heavy losses in men and material. Here on the following day the confederates renewed the attack, but were repelled with great loss, and the national army retreated without further loss. At Alexandria, where a new complication arose in consequence of the subsidence of the Red river after the spring freshets. The gun-boats were unable to descend the river owing to shoal water, and were only saved by the engineering skill of Lieut.-Col. Joseph Bailey (q. e.). The whole force then retreated to the Mississippi. Gen. Banks has been censured for the failure of this expedition, but it was undertaken contrary to his advice and in spite of his protest. During his command of the department of the Gulf he endeavored to reorganize the civil government of Louisiana, but did not accomplish it in a manner satisfactory to the inhabitants. He was relieved of his command in May, 1863. Upon covering the Gulf coast of Texas, he was elected to Congress from his old district. He was reelected to the successive congresses until 1877, failing only in 1872, when he was active in behalf of Horace Greeley, the liberal-democratic candidate for president. He served for a long time as chairman of the committee on foreign relations. He was again elected to Congress in 1888, and in 1891 he received a pension.—His daughter, Mand, after a course of study and training at the New York school of acting, went upon the stage in 1886, making her first appearance at Portsmouth, N. H., in the character of Parthenia in "Ingomar."—His brother, Gardner, soldier, b. in Waltham, Mass.; d. there, 9 July, 1871. At the beginning of the civil war he raised a company for the 16th Massachusetts regiment, in which he rose to the rank of captain. In 1861, as a Lieut. Col. Banks contracted an inflammatory rheumatism, which completely disabled him for active service. The battle of Fredericksburg was the last he shared with his comrades of the 16th. In 1864, after an illness of several months at Waltham, he went as a planter to Louisiana, where he remained until his return home four days before his death.
BARAGA

BARAGA

was the author of about 1,700 poems, more than 200 of which have appeared in magazines in this country and Great Britain, and he was preparing to publish, with the aid of his friends, the "Description of the Mississippi River" (London, 1849); "Pilgrimage to the Holy Land" (New York, 1852); "Anasiss or, the Last of the Pharohs." (Boston, 1864); "The Private Life of a King" (New York, 1856); and "The Tradition of the Temple," a poem (New York, 1858). He also published several dramas of which have been阙 certain of very useful to philologists. He visited Grand river in the spring of

1883, and baptized more than 100 of the natives; but his efforts were counteracted by the white liquor-dealers and the Indians whom they have been able to convert. His enemies petitioned the government for his removal, and, although he was sustained by the governor of Michigan, he was forced to seek other fields. He began his labors among the Chippewas at Lapointe in 1835, and continued them successfully for eighteen years. His success was mainly due to his persevering efforts in the Leopoldine society in his native country. He next visited the Indians of Fond du Lac, seventy miles from Lapointe, and the Indians of Bad river, seventeen miles to the south, both of whom led a roving life. During the winter of 1836-37 he travelled six miles every day to instruct them, on their return to their wigwams, until he had them all ready to receive baptism. During this period he also wrote the "Jubilway Prayer- and Hymn-Book and Catechism"; the "Extracts of the History of the Old and New Testaments, with the Gospels of the Year," in the same dialect; "The History, Character, Manners, and Customs of the North American Indians," in German; and a devotional work for the instruction of his countrymen. In 1837 he went to Europe in 1837 to collect money for his mission, and was so successful that he was also enabled to have his Indian books printed in Paris. On his return to the United States he was able, with the means in hand, to conduct his operations more systematically. In 1843, as the mission he had established no longer met his expectations, he prevailed to make the "Ance"—an old trading-post of the American Fur Company, between Pointe Abbaye and Keewanon Point—the centre of his labors. The Indians here were steeped in idolatry and intemperance. But, though threats were made against his life, he succeeded in converting some of their medicine men, and his was followed by the conversion of many others. He built a church and parsonage, erected thirty houses for his converts, and purchased a large tract of land, on which he located them. In 1850 all the Indians had become Christians, and so prosperous that numerous families came to settle on the Ance. Here he wrote his grammar and dictionary of the Chippewa (Chippeway) language, which is the first interval contribution to Indian philology made hitherto. The demand for his Indian books in the United States and Canada contributed materially to his resources, and enabled him to increase still further the village on the Ance. The discovery of the copper mines on the upper peninsula of Michigan in 1845 added to Father Baraga's difficulties. A large native population from all parts of the world was scattered among his Indian villages, and he found it necessary to obtain more priests. For this purpose, as well as to secure the publication of his works, he went to Cincinnati in 1853, where he lectured on the mining resources of the upper peninsula, and on the harvest that was in its element. In the interval, the same year he was made vicar-apostolic of upper Michigan. In 1854 he went to Europe to procure missionaries, and returned with twelve priests. He also introduced the brothers and sisters of Saint Francis, and intrusted them with the education of the Indians. In 1856 Saint St. Mary was erected into an independent See, and Father Baraga was appointed bishop in the following year. The see having been transferred to Marquette in 1865, he was created bishop of Marquette and Saint St. Mary. His health began to fail, but his brethren could not prevail on him to moderate his austerity or slacken his labors. He slept on the ground, and
often walked forty miles a day on snow-shoes when visiting his Indians. He was stricken with apoplexy while in attendance on the council of Baltimore in 1866, and returned to his diocese broken in health, but continued to perform his ministerial duties till a few days before his death.

BARALT, Rafael Maria (bar-alt), Spanish American poet, b. in Maracaibo, Venezuela, Feb. 2, 1810. He studied in Bogota and Caracas, took part in politics, and entered the Venezuelan army, in which he served with distinction. In 1843 he went to Spain, where he held several important public offices, and won literary fame. His most important works are "Historia antigua y moderna de la corona de los reyes de Galicia"; and several masterly poems, specially the odes to Columbus and to Spain.

BARANDA, Pedro Saiz de (bah-rahn-deh), Mexican naval officer, b. in Campeche, 13 March, 1787; d. in Merida, Yucatan, 16 Sept., 1845. He studied in Ferrol, Spain, and served in the Spanish navy during the war with England, being present at Trafalgar and other battles. During the revolutionary war of Mexico, Baranda left the service of Spain, was appointed chief of the Mexican naval forces, and besieged the castle of San Juan de Ulúa, still held by the Spaniards, until they surrendered to the military chief Barragán. After this he went from the naval service and filled several important civil offices.

BARANOFF, Alexander Andreivitch, governor of Russian America, b. in 1756; d. at sea, near Java, 28 April, 1819. In early life he was a merchant in Siberia, but in August, 1790, he went to the island of Kodiak and opened trade there with the natives. In 1799 he traded at Magdalen post at Bering strait. In 1799 the Russian Company was formed, by the consolidation of all the companies in the territory, and established a line of forts and trading-posts on the coast. With its assistance, Baranoff, overcoming many natural obstacles, took possession of the largest of the Sitka group of islands, now known by his name, and the Empire gave him the title of nobility. After losing, and again recovering, in October, 1804, the fortress at Sitka, he built a factory there, and traded with Canton, Manila, the Sandwich islands, New York, Boston, and California; and even founded a colony (of which no traces remain) near San Francisco, then a Spanish mission. As his life was several times saved by his timely address to the government for leave to return to Russia; but this was not granted him until 1818, and he died in the vessel that was carrying him home.

BARBA, Pedro, the first governor of Havana when Hernán Cortés undertook the conquest of Mexico in 1519. He refused to arrest Cortés, notwithstanding the strict orders of Diego Velázquez; but he went to Mexico to help Pánfilo Narváez, and was made a prisoner by an officer of Cortés, who intrusted Barba with the command of a company and afterward of a brigantine, in which he took part in the famous fight of the four thousand Indian canoes. He died of a wound received in the storming of the city of Mexico.

BARBACENA, Feliberto Caldeira Brand (bar-bah-thay-rah), marquis of, Brazilian statesman, b. in Sabora in 1782; d. in Rio Janeiro, Brazil, 13 June, 1841. He was already distinguished in both the land and sea service of Portugal, when Pedro, the prince-regent of Brazil, on becoming emperor, appointed him to negotiate with the mother country for the annexation of the province. His success gained him the title of marquis. When Pedro gave up the crown of Portugal to his infant daughter, Barbacena accompanied the young queen to Lisbon. He was twice Brazilian minister of finance, and was a zealous defender of the interests of Dom Pedro II. During the latter's minority, Barbacena promoted many improvements in Brazil, and introduced into the country the printing-press, steamboats, and cotton and sugar industries.

BARBEE, William J., author, b. in Winchester, Ky., in 1816; d. there, 27 Oct., 1892. He removed to Paris, Ky., where he lived until his twentieth year. He was educated at Miami university, Oxford, Ohio, and studied medicine with Dr. Drake, of Cincinnati, where he practised from 1836 to 1846. He afterwards taught school in Kentucky, Tennessee, and Missouri, and also became a preacher of the Christian or Campbellite denomination. He has published "Physical and Moral Aspects of Geology," (Philadelphia, 1858); "The Cotton Question" (New York, 1867); "The Scriptural Doctrine of Confirmation"; "Life of the Apostle Peter," etc.

BARBER, Francis, soldier, b. in Princeton, N. J., in 1751; d. in Newburg, N. Y., 11 Feb., 1783. He was of Irish parentage, was graduated at Princeton in 1767, and in 1769 became principal of the academy in Elizabeth-town, where he had among his pupils Alexander Hamilton and others who became distinguished. In January, 1777, he was commissioned a major in the 3d New Jersey artillery, and in November of that year a lieutenant-colonel. In 1777 he became assistant inspector-general under Baron Steuben. He served with his regiment under Gen. Philip Schuyler in the northern army, and fought in the battles of Trenton, Princeton, and Germantown, and was wounded severely at Monmouth. During his recovery he performed valuable service in obtaining intelligence of the enemy's movements, the importance of which was acknowledged in letters of Gen. Washington that are still preserved. He accompanied Sullivan's Indian expedition in 1779 as adjutant-general, and in 1781 commanded a severe wound at Newtown. He also took part in the action at Springfield. In 1780 Gen. Washington intrusted to him the task of enforcing a requisition for grain and cattle in Gloucester co., N. J., and in 1781 selected him for the delicate duty of quelling the mutiny of the New Jersey and Pennsylvania troops. In Lafayette's Virginia campaign of 1781 he performed effective service at the head of a battalion of light infantry. He was present at the battle of Yorktown, and was killed at the close of the war by a falling tree.

BARBER, John Jay, painter, b. in Sandusky, Ohio, 21 Sept., 1840. He studied law, was admitted to the bar in 1862, joined the volunteer army in 1863, returned sick, and upon recovery determined to devote himself to painting. He received no instruction in art, but settled in Columbus, Ohio, in
BARBER

BARBOUR, Newman Barner, historian, b. in Windsor, Conn., 2 Feb., 1798; d. in New Haven in June, 1868. He published "Historical Scenes in the United States" (1827); "History and Antiquities of New Haven" (1831); "Religious Events" (1832); "Historical Collections" of Connecticut (1899) and of Massachusetts (Worcester, 1839); "History and Antiquities of New England, New York, and New Jersey" (1841): "Elements of General History" (New Haven, 1841); "Incidents in American History" (New York, 1847); "Religious Emblems and Allegories" (1848): "European Historical Collections" (1853); and "Our Whole Country, Historical and Descriptive" (Cincinnati, 1861). With Dr. George T. Bachrach of New Haven, he also published "Historical Collections" of New York, New Jersey (1844), Virginia (1845), and Ohio (1847) and, with Elizabeth G. Barber, "Historical, Poetical, and Pictorial American Scenes" (1850). See the "Picture Preacher," by Henry Howe (Philadelphia).

BARBER, Mary Augustine, educator, b. in Newtown, Conn., in 1789; d. in Mobile, Ala., in 1860. She entered the Pennsylvania Catholic Seminary, a daughter of the Rev. Mr. Barber, who had been an Episcopalian clergyman, and in 1817, shortly afterward, determined to become a nun, while her husband was anxious to enter the society of Jesus. They had five children; but Mr. Barber visited Rome, promised to make suitable provision for them, and so succeeded in his purpose. Mrs. Barber entered the visitation convent of Georgetown in 1818 with four daughters. She was a woman of superior education, and the convent and school progressed rapidly during her residence. In 1836 she founded a convent of the visitation in Kaskaskia, Ill., where she remained until 1844. She was peculiarly successful in training the younger sisters to be accomplished teachers, and she gave to the one occupation in the convent of St. Louis from 1844 till 1848, and in Mobile up to the time of her death.

BARBOUR, James, statesman, b. in Orange co., Va., 10 June, 1775; d. there, 8 June, 1832. He was a son of Col. Thomas Barbour. While serving as a deputy sheriff he acquired a knowledge of the law, and was admitted to practice at the age of nineteen. He sat in the Virginia house of delegates from 1796 until 1812, when he was elected governor. He was the author of the anti-duelling act, and bore a prominent part in all important legislation, occupying for the latter part of the period the speaker's chair. After a term in the governorship he was elected in 1815 to the U.S. Senate, and in 1828 presided over the Whig convention at Harrisburg, which nominated Gen. Harrison for president.—His brother, Philip Pendleton, jurist, b. in Orange co., Va., 25 May, 1783; d. in Washington, D. C., 24 Feb., 1841. He attended the schools of his native county until sixteen years of age, when he read law at home. In October, 1800, being sent by his father to Kentucky on business connected with some land-claims, and finding with great difficulty a lawyer to act for him, he left off and left to take care of himself. He was admitted to the bar, and, after practising successfully for some months, he borrowed money and entered William and Mary college as a law student. In 1802 he practised in Orange co., Va., and soon made a wide reputation. From 1812 till 1814 he was a member of the convention which decided the fate of the war party. He was elected in 1814 to congress, where in 1821 he was speaker of the house. In February, 1825, he resigned and became a judge of the Virginia general court. At the foundation of the university of Virginia in 1824 he was offered the professorship of law, but declined it. He was sent again to congress in 1827, and in 1829 was president of the Virginia constitutional convention. In 1830, while making a speech in congress, he was attacked by a hemorrhage that nearly ended his life, and he resigned on 31 May of that year. He was appointed by Jackson judge of the U. S. circuit court for the eastern district of Virginia, and on 15 March, 1836, was made a judge of the U. S. supreme court, where he remained till his death. In 1831 he was president of the Philadelphia free-trade convention. Judge Barbour was noted for his solidity of character and his powers of analysis and argument. In congress he opposed all appropriations for public improvements and all import duties, and strongly took the southern side in the Missouri question. At the constitutional convention at Baltimore in 1832 he received forty-six votes for vice-president.

BARBOUR, John Merrett, jurist, b. in Cambridge, Washington co., N. Y., 5 Sept., 1807; d. in New York city, 8 Dec., 1881. He studied law in New York and went to Michigan when a very young man; was first elected a justice of the peace, was made commissioner of internal improvements, and after the expiration of his term was elected county judge, in which capacity he served eight years. He subsequently moved to Saratoga Springs, N. Y., and then to Washington, D. C., where he was clerk in the office of the solicitor of the treasury. In 1850 he removed to New York, where he was elected judge of the 8th circuit, in which capacity he served for some years. In 1861 he was elected judge of the superior court, and in 1867 was re-elected by a heavy majority. On the death of Chief Justice Robertson, Judge Barbour was unanimously chosen to preside in his place. He was an able and well-read lawyer, often excelling in the more quiet branches of the law than in the active contests that come before a jury.—His brother, Oliver Lorenzo, lawyer, b. in Cambridge, Washington co., N. Y., 12 July, 1811; d. in Saratoga Springs, N. Y., 18 Dec., 1889. In 1827 he studied law, and was admitted to the bar in 1832. He was reporter of the New York court of chancery from 1847 to 1849, and of the state supreme court from 1849 to 1878. He was chairman of the board of chancellors of I. L. D. in 1856. He published "Equity Digest," (4 vols., Springfield, Mass., 1836-41); "Treatise on Criminal Law" (Albany and New York, 1841; 3d ed., 2 vols., 1885); "Treatise on the Law of Set-Off" (Albany and New York, 1841); "Treatise on the Practice of the Court of Chancery" (2 vols., 1843; 2d ed., 2 vols., 1872); "Digests of Cases decided in the Court of Chancery of the State of New York" (3 vols., 1847-9); "Reports of Cases decided in the Supreme Court of the State of New York" (67 vols., 1848-76, Digest in 3 vols., 1880); "A Summary of the Law of Parties to Actions at Law"
BALBOA, John Strode, b. in Culpeper county, Va., 8 Aug., 1790; d. there, 12 Jan., 1855. He was the son of a revolutionary officer, and was at Washington, D.C., and afterward lived with Gov. James Barbour. In the war of 1812 he was aide to Gen. Madison. He afterward became a member of the state legislature, and, as chairman of the committee on courts and justice, received the unusual honor of a vote of thanks. He was elected to congress in 1823, and was re-elected four times, serving until 3 March, 1833. Here, as in the legislature, he was known as an able debater. Although a strong states-rights man, he spoke in congress in defence of McDuffie's proposition to break up the system of voting for president by states and in its place to establish the method of voting for chief magistrate by districts. He was an active member of the Virginia constitutional convention. He was a member of the House of Delegates and of the Senate. He was a member of the House committee on accounts, and chairman of the joint committee of both branches of the legislature, with Gov. Henry A. Wise. He was an active member of the Virginia agricultural society, and served as its president and editor of its annual report. He was a member of the Virginia bar and served as a member of the board of education, and filled the chairmanship of its medical committee, and was prominent in the Virginia midland railroad company.

BARCA, Francisco, Spanish statesman, b. in Puerto Real, near Cádiz, in 1831; d. by his own hand in New York, 29 July, 1883. He had filled several public offices when elected deputy to the Cortes, in 1858. He took high rank as a parliamentary orator, and in 1868 was appointed director-general of public works and head of the state government. When Alfonso XII. was proclaimed king, Barca took the office of sub-secretary of the interior, which he resigned a year and a half later on account of his sympathies with the liberal opposition. He accepted, in 1881, the office of Spanish minister at Washington. His published works include a "Diccionario de Política y Administración." He was a member of the Paraguayan and Spanish diplomatic missions, and was appointed minister plenipotentiary to France, Spain, and other countries.

BARCена, Mariano de la (bár-ché-n'a), Mexican engineer, b. in Guadalajara, Mexico, 26 July, 1853. From early youth he has been devoted to study and research in natural sciences. Many of his works have been translated into German and French. Béreana is a member of several European and American scientific associations, and is director of the meteorological observatory of Mexico. He has discovered and classified many Mexican plants, and published an excellent book on the natural products of the state of Jalisco, and a treatise on geology. Béreana represented his nation at the New Orleans exhibition in 1885.

BARCIA, Andrés González de, Spanish historian, d. in 1743. He published "General History of Florida" (Madrid, 1739), and "First Historians of the West Indies," published collectively after his death (3 vols., folio, 1749). He also edited works by Herrera, de la Vega, and Torquemada.

BARCLAY, Robert II., British naval officer, b. in Scotland; d. in Edinburgh, 8 May, 1837. He served under Nelson at Trafalgar, where he lost an arm, and in 1813 had charge of fitting out the British fleet under Lord Collingwood, in the war against America. In 1881 he joined the British army under Sir William Howe, with the rank of captain in the royal American regiment, and became a major in 1777. He continued in active service until the peace, when he fled with his family to Nova Scotia. In that province he was for some time speaker of the house of assembly, and adjutant-general of militia. Subsequently he was a member of the House of Lords under his father's title, and commissioner for the northern and eastern states, and commissary for the care and exchange of prisoners. At the close of the war of 1812, between the United States and Great Britain, he was appointed commissioner under the 4th and 5th articles of the treaty of Ghent.

BARCO CENTENERA, Martín del, Spanish poet, b. in Extremadura in Utracities of Spain; d. in Lisbon in 1605. He took an active part in the conquest of South America from 1572 to 1596, the history of which he wrote in an epic entitled "Argentina y conquista del Rio de la Plata, Tucumán y otros sucesos del Peru" (Lisbon, 1602). He also left another work called "Desengaños del Mundo."
BARD, John, physician, b. in Burlington, N. J., 1 Feb., 1716; d. in Hyde Park, N. Y., 30 March, 1799. He was the son of a New Jersey magistrate of Huguenot origin, and after attending the village school was apprenticed to a surgeon of Philadelphia. Establishing himself in New York in 1746, he soon took rank as one of the ablest of American medical men. In 1759, when an epidemic of malignant fever threatened New York, having been commissioned to devise means to check the spread of the disease, he first confined it to New Island for the isolation of cases of infectious disease, and was placed in charge of the hospital that was built in accordance with his suggestion. He was the first president of the New York medical society. He left a paper on malignant pleurisy, and several treating of yellow fever, all of which were published in the "American Medical Register."—His son, Samuel, physician, b. in Philadelphia, 1 April, 1742; d. in Hyde Park, N. Y., 24 May, 1821. He was graduated at King's (now Columbia) college in 1768, and studied medicine in Edinburgh. After receiving his doctor's degree in 1765 he travelled in Europe extensively. In 1767 he was called to New York to assist his father. Through his exertions a medical school in connection with King's, now Columbia, college was established the year after his return. In 1769 a hospital was built, but its loss by fire caused a delay in its establishment until 1791. He was professor of the practice of medicine in the medical college and, subsequently dean of the faculty. With the seat of government of New York he was Gen. Washington's physician. In 1798 he retired to Hyde Park, where he occupied himself with agricultural and scientific pursuits during the remainder of his life, returning, however, to render charitable services during the prevalence of yellow fever, on which occasion he contracted the disease. When the Columbia college medical school was organized as a separate institution, under the name of the college of physicians and surgeons, in 1813, Dr. Bard became its first president, and he held that station during the rest of his life. He was the author of a treatise, "De Viribus Opini" (1765); one on "Angina Suffocativa," printed in the "Transactions of the American Philosophical Society"; one on "A Course of Cold in Fever"; "Manual of Midwifery" (1807); and "The Shephard's Guide." He entered into the speculation of raising merino sheep, introduced into the United States by his friends Chancellor Livingston and Col. Humphrey, and in the last-mentioned book he gave the fruits of his knowledge and experience regarding the prevention of the infectious diseases to which they were subject. A biography of him was written by John McVickar (New York, 1822).

William, son of Samuel, b. in New York in October, 1777; d. 17 Oct., 1853, was a pioneer in life insurance in the United States, and for twelve years from its foundation in 1839 the president of the New York Life Insurance and Trust Company. Another son, John, b. in Hyde Park, N. Y., 2 June, 1819, was the founder of St. Stephen's college, at Annandale, N. Y., a diocesan training-school for students for the ministry of the Protestant Episcopal church, preparatory to entrance in the general theological seminary in New York city. His wife, Margaret, a sister of John Taylor Johnston, co-operated zealously with him in his religious benefactions. She died in Rome, Italy, 10 April, 1855. Mr. Bard died in Washington, D. C., 12 Feb., 1899.

BARKER, Fordyce, physician, b. in Wilton, Me., 2 May, 1819; d. in New York city, 30 May, 1891. He was graduated at Bowdoin, and studied medicine at Harvard and in Edinburg and Paris, finishing his studies in the latter city in 1844. He began the practice of his profession in New York in 1846, occupying a consulting-clinic at the New York Hospital, and was appointed associate professor of midwifery in the medical department of Bowdoin College. From 1850 till 1857 he filled a similar place in the New York Medical College, and from 1859 in Bellevue Hospital Medical College. In 1856 he was made president of the New York State Medical Society, and in 1885 president of the New York Academy of Medicine. He was the author of several works, including a series of clinical lectures "On Puerperal Diseases" (New York, 1872), and "On Sea-Sickness" (1870).

Barker, George Frederic, physicist, b. in Charleston, Mass., 14 July, 1855. He received an academical education and was apprenticed to a manufacturer of philosophical apparatus in Boston, with whom he remained until he became of age. In 1866 he entered the Yale, now Sheffield, Scientific School, and was graduated two years later. While in his final year he was made assistant in chemistry under Prof. Silliman, and during the winters of 1858-9 and in 1860-1 he was assistant to Prof. Silliman in the department of chemistry in Harvard Medical College. In 1866 he became professor of natural sciences in Wheaton (Ill.) College. A year later he was acting professor of chemistry in Albany Medical College, where he remained for several years, and at the same time pursued a course of medical studies, being graduated in 1863. He was then called to the chair of natural sciences in the Western University of Pennsylvania, and in 1867 was placed in charge of the department of physiological chemistry and toxicology at the same institution. Since 1875 he has been professor of physics at the University of Pennsylvania, Philadelphia. He was one of the commissioners of the United States to the International Electrical Exhibition in Paris in 1881, and a delegate to the International Congress of Electricians held at that time. The French government conferred on him the decorations of the Legion of Honor, with the rank of commander. In 1884 he was granted an appropriation for the purchase of the U. S. Electrical Commission. Prof. Barker has frequently been called upon to testify in important patent cases, and he was requested by the department of justice to act as one of the government experts in the suit against the American Bell Telephone Company. The toxicological and chemical evidence given by him in the Lydia Sherman poisoning case in 1872 was remarkable for its clearness, and has been inserted as a typical case in Wharton's and Stille's "Medical Jurisprudence." During the winter of 1859 he gave a series of public lectures in Pittsburgh, Pa., and his "Lecture on the Forces of Nature," delivered in 1863 before the chemical society of the University of Pittsburgh, has been published. In December, 1871, his lecture "On the Correlation of Vital and Physical Forces," before the American Institute of New York, attracted universal attention, and it was afterward republished in France. In 1859 Prof. Barker was elected a member of the American Association for the Advancement of Science, and he has filled the offices of vice-president (1872) and president (1875). In 1876 he was elected a member of the National Academy of Sciences. His published papers have appeared principally in the "American Journal of Science and Arts," the "American Chemist," and more recently in the "Proceedings of the American...
can Philosophical Society." Besides the lectures mentioned, his two presidential addresses before the American Association for the Advancement of Science are valuable contributions to the literature of the subject. For many years he has been one of the editors of the "American Journal of Science," and in 1874-5 he was editor of the "Journal of the Franklin Institute." For several years he also has edited the annual record of progress in physics published in the Smithsonian reports. Prof. Barker is the author of a work on "The Kent Family" (New Haven, 1870), which has passed through eight editions, and has been translated into French and Japanese.

BARKER, Jacob, financier, b. on Swan island, Me., 7 Dec., 1779; d. in Philadelphia, 26 Dec., 1871. He was of Quaker parentage. He began his business career in the employ of Isaac Hicks and a company chiefly engaged in New York, and before he was twenty-one years of age he possessed five trading vessels and controlled a large credit. In 1801 he lost his fortune by a succession of mishaps. Obtaining a contract for supplying the government with oil, he made large gains, and, on the breaking out of the war of 1812, undertook to raise an army in the state of New York. He was one of the original members of the society of Tammany Hall, and was elected a state senator. A legal opinion in an insurance case, delivered by him when sitting in the court of errors, was sustained on appeal, though opposed to that of Chancellor Kent. He founded the "Union" newspaper for the purpose of the centennial celebration of Gov. Clinton. In 1815 he established the Exchange bank in Wall street, and entered into stock speculations. His bank failed in 1819; but he was sustained in his extensive speculations by other financial institutions in different states. His financial methods provoked intense ill-will among rival operators. When the life and fire insurance company of New York and other directors for fraud, and conducted his own defence with great ability. He was convicted, but a new trial was granted, and subsequently the indictment was quashed. In 1834 he established himself in New Orleans. He was admitted to the bar, and took a prominent part in business and political affairs. In 1840 he was an ardent supporter of Henry Clay. There was not only swept away through the civil war. His later years were passed with his son, Wharton Barker, in Philadelphia. See "Incidents in the Life of Jacob Barker from the year 1800 to 1855" (New York, 1855).

BARKER, James Nelson, author, b. in Philadelphia, Pa., 17 June, 1874; d. in Washington, D. C., 9 March, 1858. In the war of 1812 he rose to the rank of major in the army. In 1814 he was severely wounded in a duel. From 1814 till 1817 he was assistant adjutant-general of the 4th military district. He then entered civil life, was chosen alderman, and in 1820 was mayor of Philadelphia. From 1829 till 1838 he was collector of Philadelphia, and in 1838 comptroller of the U. S. treasury. During his active life he contributed largely to the public journals, and some of his poems attracted general attention, notably "The Sisters" and "Little Red Riding Hood." His dramatic writings include "Marmion," "The Indian Princess," "Superstition," a tragedy, and "Summer and Tevers," a comedy. He also published "A Sketch of the Primitive Settlement on Delaware River" (1827).

BARKER, James William, merchant, b. in White Plains, N. Y., 5 Dec., 1815; d. in Rahway, N. J., 26 June, 1869. He began his business career in 1828 as a clerk in a large mercantile house, and subsequently entered into business for himself, where his energy and good management soon made him wealthy. In 1850 Mr. Barker was merchant in Pittsburg, and transacted annually a very large business. Mr. Barker took an interest in politics as an earnest and zealous Whig until the disorganization of that party. In 1854 he was the "Know-Nothings" candidate for mayor of New York city, but was defeated in a closely contested election by Franklin Wood. He was appointed in the founding of the "Order of the Star Spangled Banner," a secret organization, having for its object the prevention of the political ascendancy of the foreign-born inhabitants of the United States, and was its principal officer in 1854. In 1860 he united with the supporters of Mr. Lincoln, and was ever after a member of the Republican party. From 1867 till his death he was president of the Eclectic Life Insurance company, New York.

BARKER, Josiah, ship-builder, b. in Marshfield, Mass., 16 Nov., 1763; d. in Charlestown, Mass., 25 Sept., 1846. He enlisted in the revolutionary army when only thirteen years old, and served at intervals until 1831. In 1782-3 he served nine months in the fleet under the command of Commodore Barry in the West India islands. Mr. Barker learned ship-building on the North river, near Pembroke, Mass., where his father's home was, and built his first ships at St. Andrews and St. Johns in 1786-7. In 1795 he opened a ship-yard in Charlestown, on the site of the present U. S. navy-yard, removed it in 1799, and a few years afterward to the foot of Washington street, where he built many fine merchant vessels. He was appointed U. S. naval constructor about 1810, and built the "Virginia" in 1818, the "Warren" in 1826, the "Cumberland" in 1842, and other men-of-war. He also rebuilt the "Constitution" in 1844, and furnished the plans for the "Portsmouth." He was ordered to Portsmouth, N. H., in 1843, and retired 9 July, 1846. A "Memorial of Josiah Barker," by Harry P. Edes, was printed privately in Boston in 1871.

BARKSDALE, William, soldier, b. in Rutherford co., Tenn., 21 Aug., 1821; d. at Gettysburg, Pa., 2 July, 1863. He was educated at Nashville university, studied law in Columbus, Miss., and was admitted to the bar in 1845. After the outbreak of the war he soon became a successful practitioner, and was prominent as an advocate of state rights. He became editor of the Columbus "Democrat," and ably set forth his political views in its columns. His first military experience was as a member of the non-commissioned staff of the 2d Mississippi volunteers in the Mexican war. In 1861 he served as a member of the state convention held to consider the compromise measures then before the country. Two years afterward he was elected to congress, and at once became prominent among the pro-slavery democrats. When Preston S. Brooks made his assault upon Charles Sumner in the Senate on 29 Jan., 1856, Mr. Barksdale protected Mr. Sumner and prevented the interference of bystanders. When his state seceded he left his seat in congress and accepted the command of the 13th regiment of Mississippi volunteers, participated in the campaigns of Virginia, and rose to the rank of brigadier in the confederate service. He commanded the 3d brigading Ewell's division during the Mayday's fight at Gettysburg, and fell while leading his men in the assault on the national left.

BARLOW, Arthur, navigator, b. about 1550; d. about 1620. He was sent out by Sir Walter Raleigh in 1584 in command of an expedition bound upon a voyage of discovery for the purpose of colo-
BARLOW, Francis Channing, soldier, b. in Bridgewater, Oct. 18, 1844; d. in New York city, 11 Jan., 1896. He was graduated at Harvard, studied law in the office of William Curtis Noyes, New York, and began practice in that city. For a time he was on the editorial staff of the "Tribune." In 1861 he enlisted as a private in the 12th regiment New York state national guard, and went to the west with the first call for troops to defend the capital. At the end of the three months' term of service he had been promoted lieutenant. He at once reentered the service as lieutenant-colonel of the 61st New York volunteers, was promoted colonel during the siege of Yorktown, and distinguished himself at the battle of Fair Oaks or Seven Pines (31 May and 1 June, 1862), for which he was afterward (19 Sept.) promoted brigadier-general. He brought his regiment in good form through the trying "change of base" from the Chickahominy to the James river. At Antietam (17 Sept.) his command captured two sets of confederate colors and 300 prisoners, but he was severely wounded, and carried apparently dead from the field. At Chancellorsville, May, 1863, he commanded a brigade in the 11th corps, but was not involved in the discreditable surprise of its commanding officer, having been detained early in the day to harass "Stonewall" Jackson in his flank movement on the national right. At the battle of Gettysburg (1 July, 1863) he was severely wounded and taken prisoner during the first day's fight; but he was exchanged, was paroled, and was allowed to take the line of retreat again the following spring. At Spottsylvania Court-House, 12 May, 1864, the 2d corps (Gen. Hancock's) was ordered to storm the confederate works at dawn. Gen. Barlow commanded the 1st division, which, with the 3d, formed the advance line. The works were carried with a rush, and 3,000 prisoners were taken. Barlow and the other division, with two general officers, Ed. Johnson and G. H. StUART, opened one of the most sanguinary and stubbornly contested engagements of the civil war, and was the first substantial success won during the campaign. Gen. Barlow participated in the final campaigns of the Potomac army, and, being present at the assault on Petersburg, and at the surrender of the confederate forces in April, 1865, was mustered out of the military service on the conclusion of peace. He was elected secretary of the state of New York in 1865, and served until 1868, when president Grant appointed him U. S. marshal of the southern district of the state. He resigned in October, 1869. In November, 1871, he was elected attorney-general of the state, serving through 1872-3. Since that date he has practised in New York city. Gen. Barlow married Miss Arabella Griffith, who, while her husband was in the field, was highly efficient in the hospitals as a member of the U. S. sanitary commission. She died 27 July, 1864, of fever contracted in the hospitals of Washington. His second wife is a daughter of Francis G. Shattuck.

BARLOW, Joel, author, b. in Redding, Conn., 23 March, 1754; d. near Cracow, Poland, 24 Dec., 1812. He entered Dartmouth college in 1774, but soon removed to Yale, where he was graduated in 1778, delivering the commencement poem, "Prose of Peace" (published in "American Poems," Litchfield, Conn., 1793). In 1789 he became chaplain of Poor's brigade of the Massachusetts line, having previously spent his 1804-5 in Florida, and served with the army, and fought at White Plains. On the disbandment of the army, in 1783, Barlow, of Portland, Me., having just completed his course at Dartmouth, studied law, and was admitted to the bar in 1786. He founded with Elisha Babcock the "American Mercury," a political and literary weekly, and, joining the Hartford wits, wrote much satirical verse. In 1785 he edited and imposed the "Book of Psalmody" then in use in the Congregational churches of Connecticut, contributing general versions of psalms never before attempted. Two years later he published at Hartford his epic poem, "The Vision of Columbus," which made him famous. As a result he was offered the agency of the Seioto Land Company, which, under cover of the Ohio Land Company, had purchased the right of redemption to nearly 3,000,000 acres of government land in Ohio, which it now desired to sell abroad. Barlow accepted, and sailed for France in May, 1788, was appointed general agent, and devoted himself with the utmost industry to promoting his client's interests. He turned to politics and letters. As a Girondist he contributed largely to the political literature of France in 1789-91. Becoming interested in English politics, he crossed over to England in 1791, and resided for nearly two years in London, one of a circle of artists, poets, wits, journalists, and pamphleteers who formed the so-called literary and political circle, consisting of most of the British government press, taking refuge in France, Barlow in 1792-3 accompanied a deputation of the national convention into Savoy for the purpose of creating it.
into the 84th department of France, and was there nominated for deputy, but was defeated. In Chambéry, in this province, he wrote his "Hasty Padding," his most popular poem. Returning to Paris, he exerted himself to save his country from the advancing private fortunes, and by mercantile pursuits and speculations soon became wealthy. He was appointed U. S. consul at Algiers in 1795, and spent a year and a half at the capital battling with the plague and the caprices of the day, and succeeding in effecting the object of his mission, the liberation of American citizens and the signing of a treaty. Returning to Paris, he lived for eight years the life of a man of letters, writing his poem "The Columbiad," and making extensive preparations for a history of the American revolution and one work on the French revolution. During this period, too, he exerted himself to heal the rupture commenced by Captain Jarras and France caused by the mutual jealousy and suspicion of the federal party and the French directory. In the heated political campaign of 1798-1800, in America, he addressed to his countrymen two forcible and dignified epistles on the measures of the party in power, which had their due effect in determining the result. Returning to America, he lived himself a Kalorama near Washington, and, declining all political honors, devoted himself to literary and pastoral pursuits and the society of eminent men. In 1807 his epic, "The Columbiad"—the "Vision of Columbus" enlarged—was issued at Philadelphia. Of this book an impartial critic has said: "It abounds in beautiful passages, but is overburdened with political and philosophical disquisitions, and disfigured by singularities of expression." In 1811, his country being apparently on the verge of war with France, Barlow was prevailed on to accept the post of minister to the French court in the hope of preserving peace, and went there in the U. S. frigate "Constitution," bound for England. He was, however, at his residence at Wilna, Poland, when the treaty, whose provisions had been agreed on, would be signed. Barlow set out, but on reaching Wilna found the treaty had been signed at Kowel, near Moscow. Becoming involved in the retreat, he was overcome by cold and privation, and died at Yarmisch, in Poland. See "Life and Letters of Joel Barlow," by Charles Barr Todd (New York, 1886).

BARNOW, Samuel Latham Mitchell, lawyer, b. in Granville, Mass., 5 June, 1826; d. in Glen Cove, N. Y., 10 July, 1889. He was educated in New York city, where he practised law for forty years. He gave much time to the collection of rare and curious books. His library of Americana was among the largest in the country, and only surpassed by the Brinley, Carter-Brown, and Lenox collections. In connection with Henry Harrisse he edited "Notes on Columbus," an invaluable work for the biographer of the discoverer of the new world (New York, privately printed, 1866).

BARNOW, Thomas Harris, inventor, b. in Nicholas co., Ky., 5 Aug., 1789; d. in Cincinnati, Ohio, in 1863. He settled in Lexington, Ky., in 1853, and in 1851 finished his first planetarium which is now in Transylvania university in that town. This instrument is now in every school and institution in the United States. It is now in use at West Point, the Washington observatory, and other institutions.

BARNOW, Charles, author, b. in Boston, Mass., 13 Feb., 1836. He attended the common schools until he was sixteen years of age, devoting his leisure hours to the assistance of his father, the Rev. C. F. Barnard, then in charge of the Warren street mission chapel, Boston. Then turning his attention to business, for a while he was employed as a clerk, but finding the situation not congenial, he began to study for the ministry, when ill-health compelled him to relinquish this intention, and he became a florist. At the age of twenty-one he undertook by private studies to educate himself, and has since devoted his attention almost exclusively to writing. As a journalist, he has filled at various times the place of assistant editor of the Boston "Journal of Commerce," editor of "Vox Humana," musical editor of the Boston "Post," editor of "World's Work Department" in the "Century" magazine, and its only contributor for nine years. His short stories and articles, exceeding one hundred and fifty in number, have appeared in various periodicals. His principal books are: "My Ten-Rod Farm," "Farming by Inches," "The Strawberry Garden," and "A Simple Flower Garden" (Boston, 1839-71); "The Tone Masters" (3 vols., 1871); "The Soprano" (1872); "Legenda Romantica" (1880); "Knights of To-day" (New York, 1881); "Co-operation as a Business Sign of the Times" (1851); and "A Day in the Life of a Private Secretary." Barnard is superintendent of instruction to the Chautauqua town and county club, a branch of the Chautauqua university, and as such has published "Talks about the Weather" (1855), "Talks about the Soil" (1866), and "Talks about Our Useful Plants" (1886), all issued by the Chautauquan Press, New York. He has also written many plays for amateurs, among which are "The Triple Wedding," "Too Soon," "Eugenea," "The Dream-Land Tree," and "Katy Neal" (New York, 1884-5). He was also associated in the authorship of the play "We, Us, and Co."

BARNOW, Daniel Dewey, lawyer, b. in Sheffield, Mass., 16 July, 1797; d. in Albany, N. Y., 24 April, 1861. He was graduated at Williams college in 1818, studied law, and in 1821 was admitted to the bar, and began its practice in Rochester, N. Y. In 1826 he was elected district attorney for Monroe co., N. Y., and in 1827 was elected representative to congress. After travelling for some time abroad, he settled in Albany, N. Y., and lived there in the practice of law and business. In 1839 he was elected to congress from 1839 to 1845, when he was chairman of the judiciary committee. From 1850 to 1853 he was U. S. minister to Prussia. He was the author of numerous reviews and speeches.

BARNOW, Edward Emerson, astronomer, b. in Nashville, Tenn., 16 Dec., 1857. He was graduated at Vanderbilt university in 1886. His discoveries in astronomy include the following: Comet (Barnard), VI, 1881; Comet (Barnard), III, 1882; the duplicity of the companion to 6 Capricorni (6 Nov., 1883); Comet (Barnard), II, 1884; Comet (Barnard), II, 1883; Comet (Barnard), 3, 1886, and also independently Comet V, 1886. Up to June, 1886, he discovered 30 comets. Since 1863 he has had charge of the astronomical observatory, and he is also assistant in practical astronomy at Vanderbilt university. His publications consist of astronomical contributions to the "Sidereal Messenger," "Observatory," "Science Observer," "Astronomische Nachrichten," and other technical journals.

BARNOW, Frederick Augustus Porter, educator, b. in Sheffield, Mass., 5 May, 1809; d. in New York, 27 April, 1889. He was graduated at Yale in 1828, in 1821 teacher in the asylum for the deaf and dumb at Hartford, and in 1832 in that of New York. From 1837 to 1848 he was professor of
mathematics and natural philosophy in the university of Alabama, and afterward of chemistry till 1854. The same year he took orders in the Episcopal church. He then became professor of mathematics and astronomy in the university of Mississippi, of which institution he was elected president in 1856. In 1861 Dr. Barnard left Mississippi, and in 1864 he became president of Colby University, New York. He was U.S. commissioner to the universal exposition at Paris in 1867, and published an elaborate "Report on Machinery and Industrial Arts" (New York, 1869); and was also U.S. assistant commissioner-general to the Paris exposition of 1878. His other principal works are: "Treatise on Arithmetic" (1839); "Analytic Grammar with Symbolic Illustration" (1836), originating a system still used in the principal institutions of the United States; "Reports on the machine schools, engineer schools, etc., on collegiate and university education, including a volume of "Letters on Collegiate Government" (1855); "History of the United States Coast Survey" (1857); "Recent Progress of Science" (1869); "The Metric System" (1871); and "Imaginary Metrical System of the Great Pyramid" (1884). In 1890 he was a member of the expedition to observe the eclipse of the sun in Equador; in 1892 he was engaged in reducing observations of stars in the southern hemisphere; and in 1893 he had charge of the publication of charts and maps of the U.S. coast survey. In 1890 he was elected president of the American association for the advancement of science, in 1895 of the board of experts of the American bureau of mines, and in 1872 of the American institute. He was one of the original corporators named in the charter of the national academy of sciences, and from 1874 to 1880 was foreign secretary of that body. In 1855 he received the degree of LL. D., from Jefferson college, Miss., and in 1859 from Yale; in 1861 that of D. D., from the university of Mississippi; and in 1872 that of doctor of literature from the regents of the university of the state of New York. He contributed to the "American Journal of education" from its beginning, and to "Silliman's Journal" since 1837. The engraving gives a partial view of the old and the new buildings of Columbia college.

BARNARD, Henry, educator, b. in Hartford, Conn., 24 Jan., 1811. He was graduated at Yale in 1830, was admitted to the bar in 1835, and from 1837 to 1840 sat in the Connecticut legislature, where he advocated reforms in prisons, insane asylums, and the common schools. He effected a reorganization of the public-school system, introducing the system of high and low schools, teachers' institutes, a normal academy, and new methods of instruction. He also secured the adoption of similar reforms in other states. From 1838 to 1842 he was secretary of the board of school commissioners in Connecticut; from 1843 to 1849 school commissioner of Rhode Island; from 1850 to 1854 superintendent of the Connecticut state schools; from 1857 to 1858 president of the state university of Wisconsin; from 1862 to 1866 of St. John's college in Annapolis; and from 1867 till 1870 U. S. commissioner of education. In Rhode Island, where the right of taxation for school purposes had been denied for 200 years, he revolutionized public opinion so completely that a system of public education as complete as in any other state in the Union was established by the vote of two-thirds of the tax-payers in each town. While secretary of the school board he established the "Connecticut Common School Journal," and while in Rhode Island he issued the "Rhode Island School Journal." In 1853 he began the publication of the "American Journal of Education." His published works are "School Architecture," "Cheesy, and Notes on the Free Schools of New England," "American Journal of Education" (1856-'86); "Kindergarten and Child Culture Papers," "Object-Teaching and Oral Lessons on Social Science and Common Things" (New York, 1881); "Pestalozzi and Pestalozianism" (1861); "Primary Schools and Elementary Instruc- tion," "School Cycles in New England," "Superior Instruction in Different Countries," From 1873 till 1886 Mr. Barnard devoted himself to revising his special treatises and completing others begun and developed in the "Journal of Education." In 1886 he announced a collected edition of his publications, under the title "The American Library of Schools and Education," containing over 1000 titles, and three of which is also published separately.

BARNARD, Isaac Darlington, senator, b. in Aston, Pa., 18 July, 1791; d. in Westchester, Pa., 28 Feb., 1834. He began to study law in Chester, Pa., after receiving a common-school education; but the war of 1812 intervening before he was qualified for the bar. He was commissioned captain in the 14th infantry, 12 March, 1812. He served with distinction at the capture of Fort George, Canada (27 May, 1813), and at Lyon's creek (19 Oct., 1814), after which engagement he was promoted major. In 1815 he resumed his legal studies, was admitted to the bar in 1816, and appointed deputy attorney-general of the State. Three years later he was elected to the state senate. In 1826 he became secretary of state for Pennsylvania, and in 1827 was chosen U. S. senator, resigning in 1831.
BARNARD

BARNARD, John, clergyman, b. in Boston, 6 Nov., 1681; d. 24 Jan., 1770. He was baptized on the day of his birth, and was from the very first destined for the pulpit by his parents. He entered the college which Harvard, then so graduated in due course. His biographers guardedly intimate that he was "thoughtless" during his college career; but he was converted before graduating, and began at once to study theology. He preached his first sermon within a year of receiving his degree, and became temporarily the assistant of Dr. John Calvinist, and became a member of the Massachusetts congregation of Trinitarian Methodism. He began a course of study at Harvard, and then became the assistant of Dr. John Harvard, and then was made the assistant of the Rev. Samuel Cheever, at Marblehead. There he remained during the rest of his life. In the bitter ecclesiastical controversy that arose throughout New England about 1712, mainly in consequence of Whitefield's powerful advocacy of Calvinistic Methodism, Mr. Barnard took a middle course, and he is by some authorities credited with being the first of the Trinitarian Congregationalists to deviate from Calvinism. He published a large number of sermons; "A History of the Strange Adventures of Philip Stedman" (1729); "A Version of the Psalms" (1732); and an edition of the first Dudleian (Harvard) lecture ever published (1756). He is described in the funeral discourse as a man of extraordinary impressiveness. "His presence," said the speaker, "restrained every impudent sally of youth, and when the aged saw him they arose and stood up." By all accounts he was a brave and influential man, who was looked up to by all his neighbors, who exacted and received all the pungentities respect then so generally accorded to the clergy.

BARNARD, John Gross, soldier, b. in Sheffield, Mass., 19 May, 1815; d. in Detroit, Mich., 14 May, 1852. He was graduated at West Point in 1835, standing second in a class of forty-three members, was ordered to duty at Newport, R. I., as brevet second-lieutenant of the corps of engineers, and was soon sent to the gulf coast, where, as assistant and principal engineer, he was engaged on the fortifications of Pensacola and New Orleans. He was also employed on various harbor improvements, and had reached the grade of captain of engineers before the war with Mexico called him to active service. He superintended the construction of the defences of Tampa, and surveyed the battle-fields about the city of Mexico. For these services he was brevetted major 30 May, 1848. Two years afterward he was appointed by the president chief of a scientific commission to survey the isthmus of Tehuantepec, with a view to the construction of a railroad from ocean to ocean. His report of this commission, edited by J. T. Williams, was the first full topographical account of the isthmus. In 1852 he was engaged in surveying the mouth of the Mississippi river with a view to their permanent improvement. He was superintendent of the U. S. military academy from 1855 to 1856, and was then placed in charge of the fortifications of New York harbor. He was promoted major-general of engineers 13 Dec. 1858. The foregoing list of his services before the civil war was not only the most prominent; he was constantly detailed on minor works of importance—too many for enumeration here. At the outbreak of the war Gen. Barnard served as chief engineer of the department of Washington from April to July, 1861, and then as chief engineer of the Island of Manhattan in the first Bull Run campaign. Next, with the rank of brigadier-general, he acted as chief engineer to the Army of the Potomac in the Virginia peninsular campaign of 1862. When the confederate army advanced into eastern Virginia, he was appointed chief engineer of the defences of Washington, and was promoted lieutenant-colonel of engineers 31 March, 1863. In January, 1866, he was promoted colonel of engineers, and in April, 1864; but, at Gen. Barnard's request, the nomination was withdrawn before it came up for confirmation by the senate. He was made a member of the joint board of army and navy officers on harbor defences, torpedoes, etc., and served as secretary of the members of the board, and engaged in the permanent fortifications, as a member of the U. S. lighthouse board, and on other important duties connected with the engineering branch of the service, until shortly before his death. Gen. Barnard was not only a brave soldier, but, like his brother, the president of Columbia college, an accomplished mathematician and author. The university of Alabama, in January, 1849, conferred on him the degree of A. M., and in 1858, and in 1864 he received that of L. L. D. from Yale. He was one of the original corporators of the national academy of sciences appointed by act of congress, 3 March, 1863. His works include "Survey of the Isthmus of Tehuantepec" (1852); "Phenomena of the Gyroscope" (1858); "Dangers and Defences of the Great Gulf in relation to Sea-coast Defence" (1856); "The Confederate States of America and the Battle of Bull Run" (1862); "Reports of the Engineer and Artillery Operations of the Army of the Potomac" (1865); "An epoch in General Totten" (1866); and many scientific and military memoirs and reports.

BARNARD, William Stedman, naturalist, b. in Canton, Ill., 28 Feb., 1849. He studied at the Canton high school, university of Michigan, Cornell university (B. S., 1871), university of Leipzig, and at the university of Jena (Ph. D., 1873). In 1870 he accompanied the scientific exploring expedition to Brazil as assistant geologist. On his return from Europe he lectured in 1874 at Cornell university, and during the summer at the school on Penikese island. Since then he has lectured on natural history at Mississippi agricultural college (1874—5); Illinois teachers' summer school (1875); Wisconsin state normal school (1875); Osakoosa college (1876—8); Cornell university (1878—80); Drake College (1881—2); and during the summer during 1880—5 he was entomologist at the U. S. department of agriculture, Washington. Dr. Barnard has made investigations in his specialties, and papers by him have appeared in scientific journals. His reports as entomologist have been published by VOL. 1.—12
the government, and he has contributed to the proceedings and transactions of the scientific societies of which he is a member. He has made inventions of harvesters, both for corn and cotton, and also of means and appliances for the destruction of injurious insects. He also devised the Harvard book-rack, improved paper-file holders, and similar articles. Dr. Barnard has made several hundred plates and figures, some on stone, for the illustration of his papers.

BARNES, Albert, theologian, b. in Rome, N. Y., 1 Dec., 1798; d. in Philadelphia, 24 Dec., 1870. He was graduated at Princeton in 1817. He studied theology at Princeton seminary, was licensed to preach in 1823, and became pastor of the first Presbyterian church in Philadelphia in 1830, where he remained until 1867, when poor health and partial blindness caused him to resign. His annotations on various parts of the Scriptures, originally prepared as lectures to his congregation, were published and attained a wide circulation, being adapted for the use of Sunday-schools. He was tried for heresy on a count of certain passages in his commentary on the Epistle to the Romans, and was acquitted; but was advised to alter the phraseology of his notes, which was accordingly done. He was a leader of the new-school Presbyterians, when, soon after his trial, a definitive rupture occurred in the denomination. Of Barnes's "Notes" more than 1,000,000 volumes were sold before the last revised edition, in six volumes, was issued (New York, 1872). His other writings were "Scriptural Views of Slavery" (Philadelphia, 1846); "The Way of Salvation" (1856); "Manual of Prayers"; "The Atonement and Episcopacy"; "Church Manual"; "Practical Sermons for Vacant Congregations and Families"; "Closset Companion" (New York, 1854); "How shall Man be Just with God?" (1856); "The Church and Slavery" (1856); "Miscellaneous Essays and Reviews" (1856); "Way of Salvation Illustrated" (1856); "Queries and Suggestions in regard to the Foundation of Faith in the Word of God"; "Life at Three Score" (1858); "The Atonement"; "Lectures on the Evidences of Christianity in the Nineteenth Century" (1868); and "Prayers for Family Worship." The "Defence" that he made at his trial on charges of heresy has also been published (New York), and a report of the trial (Philadelphia). He published besides several volumes of sermons and a series of question-books for Sunday-schools. A collection of his "Theological Works" was published in New York in 1875.

BARNES, Daniel Henry, educator, b. in Canandaigua, N. Y., 4 April, 1827; d. in New York city, 1 May, 1888. His education was acquired at the public schools until he was fifteen, when he became a clerk in a country store, and subsequently began business from wholesalers in New York city, where he followed the wholesale drug business, in which he made a large fortune. Mr. Barnes crossed the United States in a wagon, examining the mineral resources of Colorado, Nevada, and California, and described his experiences in a series of letters to the newspapers. Later he was an active advocate of the Union Pacific Railroad. In 1866 he was elected a democrat to congress, and served from 4 March, 1867, till 3 March, 1869. During his career in Washington he was a member of the committee on banking and currency, and education and labor, and secured legislation for the construction of the Brooklyn bridge, the New York post-office, and thehality for the Pacific Railroad. He was a member of the Brooklyn Board of Education, one of the founders of the Brooklyn bridge, member of the art association, and director in various institutions. He established and edited the Brooklyn "Argus," a journal devoted to the interests of municipal reform. Besides numerous contributions to the daily press, he published "From the Atlantic to the Pacific" (New York, 1865).
and St. Louis, and the Potsdam and Watertown railroads, between 1848 and 1857. During the civil war he was colonel of the 18th Massachusetts volunteers from 29 July, 1861, to 29 Nov., 1862, participating in most of the battles and skirmishes before the Battle of South Mountain and the Pottomac during that period. He was promoted to brigadier-general of volunteers 20 Nov., 1862, and was at Fredericksburg, Chancellorsville, the skirmishes of Aldie and Upperville, and the battle of Gettysburg, where he commanded a division and was severely wounded. Subsequently he was on court-martial duty or in command of posts until the close of the war, and was brevetted major-general of volunteers 13 March, 1865. He was mustered out of the service 15 Jan., 1866. His health was permanently impaired by wounds and exposure, and, though he interested himself somewhat in railroad affairs, he was never able to engage regularly in any business.

BARNES, Joseph K., surgeon-general U.S.A., b. in Philadelphia, 21 July, 1817; d. in Washington, D. C., 5 April, 1883. After preliminary schooling at Dr. Cogswell's "Round Hill" school at Northampton, Mass., he entered the academic department at Harvard, but was obliged, on account of his health, to leave college, although he had already begun his medical studies under Surgeon-General Harris, U. S. N., and was graduated in the medical department of the University of Pennsylvania in 1838, practising for two years in his native city. In 1840 he was appointed an assistant surgeon in the army, and was stationed at West Point. At the close of the year he was transferred to Florida, where for two years he was engaged in the field under General Harney's expedition against the Seminoles. Thence, in 1842, he went to Fort Jessup, La., where he served four years. When the Mexican war began, Surgeon Barnes was appointed chief medical officer of the cavalry brigade, and he was in active service throughout the war. He was assigned to duty again at West Point in 1854, and remained there for several years. At the beginning of the civil war he was in Oregon, and was among the first summoned to Washington. In 1861 he was assigned to duty in the office of the surgeon-general, where his experience in field and hospital service was of great value. Two years later he was appointed to a medical board with the rank of colonel, and in September, 1863, he was promoted to the rank of brigadier-general. In 1865 he was brevetted major-general. For the position of chief medical officer of the army he had been fitted by twenty years' service under all the conditions afforded by our military service. Under his care the medical department, then organized on a gigantic scale, attained an admirable degree of efficiency and discipline. It was at his suggestion and through his influence that the army medical museum and the library of the surgeon-general's office were established, and the medical and surgical history of the war was compiled. He was present at the death-bed of Lincoln, attended Secretary Seward's wound, and the deathbed of a confederate assassin, and attended Mr. Garfield through his long confinement. He was a trustee of Peabody educational fund, a commissioner for the Soldiers' Home, and the custodian of other important public trusts. The Royal medical societies of London and Paris and Moscow made him an honorary member, as did many of the other important European schools. He was buried at Oak-Hill cemetery, Georgetown, D. C., with the military honors befitting his rank. He was placed on the retired list the year before his death.

BARNES, Phinehas, politician, b. in Orland, Me., 11 Jan., 1811; d. in Portland, Me., 21 Aug., 1884. He studied at the Lawrence Scientific School, Cambridge, Mass. (1835), and at the Rensselaer Polytechnic Institute, Troy, N. Y. (1836). Mr. Barnes has made a specialty of the construction of iron and steel works, and for some time has been associated with the American Iron and Steel Works in Pittsburg, Pa. He is a member of the American Institute of Mining Engineers, to whose transactions he has frequently contributed papers of technical value.

BARNES, Thurlow Weed, author, b. in Albany, N. Y., 28 June, 1833. He was graduated at Harvard in 1856; was chairman of the Albany general committee in 1886; travelled in Europe in 1882; and made the tour round the world in 1884-5. He is a grandson of Thurlow Weed, and is the author of the second volume of the "Life of Thurlow Weed" (2 vols., Boston, 1884), and of "Souvenir of Albany Bicentennial" (Albany, 1886).

BARNEY, Joshua, naval officer, b. in Baltimore, Md., 6 July 1759; d. in Pittsburg, Pa., 1 Dec., 1818. He left his father's farm while yet a child to go to sea. He navigated as well when but sixteen years old. He was made master's mate of the "Hornet," one of the first cruisers fitted out by the continental congress, and took part in Com. Hopkins's descent upon New Providence and capture of British stores, in February, 1776. He was made a lieutenant for gallantry in the action between the British brig "Tender" in Delaware bay, and was assigned to the sloop "Sachem," which captured a British privateer. While prize-master on board a captured vessel he was taken prisoner, but was soon exchanged. In the spring of 1777 he took
part on board the "Andrea Doria" in the defence of the "Delaware." He was lieutenant of the frigate "Virginia," which, before she got to sea, ran aground in Chesapeake bay and was captured by the enemy on 30 March, 1778. After having been again exchanged in August, 1778, he joined a privateer which brought into Philadelphia a valuable prize in 1779. He was again exchanged and exchanged in 1779, and afterward served on board the sloop-of-war "Saratoga," and, in the capture of the ship "Charming Molly" with two brigs, he led the boarding-party. The duty after which he was in charge of one of the prizes, the three vessels were re-taken by the "Intrepid," of 74 guns. He was confined in Portsmouth prison until May, 1781, when he made his escape. He was re-taken, but again escaped, and reached Philadelphia in March, 1782. He was placed in command of the "Hybor Ally," of 16 guns, fitted out by a society of Pennsylvania, for the purpose of clearing the Delaware of British privateers. On 8 April, 1782, he captured a British sloop of war, the "General Monk," of 18 guns, off Cape May, after a severe engagement. For this exploit Capt. Barney was voted a sword by the Pennsylvania legislature. He was made commander of the captured ship. He sailed for France in 1782, with the "General Monk," in November, 1782, with despatches for Dr. Franklin, and returned with the information that preliminaries of peace had been signed, and bringing a large sum lent by the French government. After the war he engaged in commerce and travelled in the west. In 1793 he was captured by an English brig and imprisoned as a pirate. Till declined to come to an acquit and was exchanged and returned to America. In the first year of the war of 1812-15 he engaged in privateering. On 24 April, 1814, he was commissioned a captain in the navy and appointed to the command of the flotilla for the defence of Chesapeake bay. He was ordered to the defence of Washington in July, and severely wounded and taken prisoner in the battle of Bladensburg. For his gallant conduct in the defence of the capital he received a sword from the city of Washington and a vote of thanks from the Georgia legislature. The ball in his thigh was never extracted, and the distress from the wound obliged him to return from a mission to Europe in October, 1815. He resided on his farm at Elkridge until 1818, when, after a visit to the west, he purchased a large tract in Kentucky, and was on the way thither when he was taken ill at Pittsburg and died. See "Memoirs of Commodore Barney" by Mary Barney (Boston, 1832).—His son, John, member of congress from Baltimore from 1825 to 1829, d. in Washington, D. C., 26 Jan., 1856, aged seventy-two years. He left unfinished a record of "Personal Reminiscences of Men and Things" in America and Europe.

BARNUM, William, clergyman, b. near Cookstown, county Tyrone, Ireland, about 1795; d. in Philadelphia, Pa., 25 Nov., 1865. He received his early education from excellent schools in his native country, but before he attained his majority he came to the United States and settled in Baltimore. He studied art and became a painter. At the age of nineteen he united with the Methodist church, and, believing it to be his duty to preach, studied under the Rev. George Roszel, presiding elder of the Baltimore district, and in 1817 waslicensed to preach. His ministry for the first eight years was in the bounds of the Baltimore convention. He afterwards served the Methodist church in the capacity of presiding elder, and was for a time the direct agent of the Committee of Baptists, and a member of the largest in Philadelphia and Harrisburg.

BARNUM, Henry A., soldier, b. in Jamesville, Onondaga co., N. Y., 24 Sept., 1833; d. in New York city, 29 Jan., 1892. In 1856 he became a tutor in the Syracuse institute. He then studied law and was admitted to the bar. He enlisted as a private in the 13th New York volunteers in April, 1861, was elected captain of the regiment, and served in front with his regiment, which was the first under fire at Blackburn's Ford in the fighting preliminary to the battle of Bull Run. He was promoted to major in October, 1861, and, after being for a short time on Gen. Wadsworth's staff, rejoined his regiment and served through the peninsular campaign. When on Gen. Butler's staff at Murfand Hill, he received a wound from which he has never fully recovered, and was left for dead on the field. A body, supposed to be his was buried, and a funeral oration was delivered at his home. He was taken to Libby prison, where he remained till 18 July, 1862. He was on leave till the following December, when he was commissioned colonel, and led his regiment at Gettysburg and at Lookout Mountain, where he was wounded again, and where his regiment captured eleven battle-flags. He was again wounded in the Atlanta campaign, commanded a brigade on Sherman's march to the sea, and was the first officer to enter Savannah. He was brevetted major-general on 13 March, 1865. On 9 March, 1866, he was appointed colonel in the regular army, and became inspector of prisons in New York. He was deputy tax commissioner from 1869 till 1872, and was for five years harbor-master of New York. In 1885 he was elected as a Republican to the state assembly.

BARNE Phineas Taylor, exhibitor, b. in Bethel, Conn., 5 April, 1818. His father was an innkeeper, who died in 1825, and from the age of thirteen to eighteen the son was in business in various places, part of the time in Brooklyn and New York city. Having accumulated a little money, he returned to Bethel and opened a small store. Having been very successful in connection with the Agency for a year of a lottery chartered by the state for building the Groton Monument, oppo-
site New London. When the lottery charter expired, he built a larger store in Bethel, but through bad debts the enterprise proved a failure. After his marriage in 1839 he established and edited a weekly newspaper entitled "The Herald of Freedom," and for the free expression of his opinions he was imprisoned sixty days for libel. In 1834 he removed to New York, his property having become much reduced. He soon afterward visited Philadelphia, and saw there on exhibition a colored slave woman named Jenny Heth, advertised as the nurse of George Washington, one hundred and sixty-one years old. Her owner exhibited an ancient-looking, time-colored bill of sale, dated 1727. Mr. Barnum bought her for $1,000, advertised her extensively, and his receipts soon reached $1,500 a week. Within a year Joyce Heth died, and a post-mortem examination proved that the Virginia planter Barnum had in his possession a very valuable relic. Having thus acquired a taste for the show business, Mr. Barnum travelled through the south with small shows, which were generally unsuccessful. In 1841, although without a dollar of his own, he purchased Scudder's American Museum, named it Barnum's Museum, and, by adding novel curiosities and magnificent management of dramatic scenes, made it the first, and in 1848 he had added to it two other extensive collections, besides several minor ones. In 1842 he first heard of Charles S. Stratton, of Bridgeport, Conn., then less than two feet high and weighing only sixteen pounds, who soon became known to the world, under Mr. Barnum's direction. He had also been educated in the United States and Europe with great success. In 1849 Mr. Barnum, after long negotiations, engaged Jenny Lind to sing in America for 150 nights at $1,000 a night, and a concert company was formed to support her. Only ninety-five concerts were given; but the gross receipts of the tour in nine months of 1850 and 1851 were $712,161, upon which Mr. Barnum made a large yearly profit. In 1854, after being connected with many enterprises besides those named, he retired to an oriental villa in Bridgeport, which he had built in 1846. He expended large sums in improving that city, built up the city of East Bridgeport, made miles of streets, and therein planted thousands of trees. He also built a large and beautiful depot for trains in the new city, which has since been united with Bridgeport. But in 1856-7, to encourage a large manufacturing company to remove there, he became so impressed with confidence in their wealth and certain success that he endorsed their notes for nearly $1,000,000. The company went into bankruptcy, wiping out Mr. Barnum's property; but he had settled a fortune upon his wife. He went to England again with Tom Thumb, and lectured with success in London and other English cities, returning in 1857. His earnings and his wife's assistance enabled him to emerge from his financial misfortunes, and he once more took charge of the old museum on the corner of Prince and Bond streets, and conducted it with success till it was burned on 13 July, 1865. Another museum which he opened was also burned. He then, in the spring of 1871, established a great travelling museum and menagerie, introducing rare equestrian and athletic performances, which, after the addition of a representation of the ancient Roman hippodrome races, the great elephant Jumbo, and other novelties, he called "P. T. Barnum's Greatest Show on Earth." Mr. Barnum has been four times a member of the Connecticut legislature, and mayor of Bridgeport, to which city he presented a public park. His other benefactions have been large and numerous, among them a stone museum building presented to Tufts college near Boston, Mass., filled with specimens of natural history. He has delivered hundreds of lectures on temperance and the perils of life. He has published his autobiography (New York, 1855; enlarged ed., Hartford, 1869, with yearly appendices, "Humbugs of the World") (New York, 1865); and "Lion Jack," a story (1876).

BARNUM, William H., senator, b. in Boston Corners, N. Y., 17 Sept., 1818; d. in Lime Rock, Conn., 30 April, 1889. He was educated at the public schools, and was for many years engaged in the manufacture of car-wheels, and in the production of iron from the ore. He was elected to the state legislature in 1852, was a delegate to the union national convention at Philadelphia in 1860, was sent to congress as a democrat in 1866, and retained his seat by successive re-elections till 1876, in which year he was elected to the U. S. senate to fill the term of Orris S. Ferry, deceased, ending 4 March, 1879.

BARNUM, Zenas, capitalist, b. near Wilkesbarre, Pa., 9 Dec., 1810; d. in Baltimore, Md., 5 April, 1865. He was a civil engineer, but became proprietor of Barnum's Hotel in Baltimore, in the 1830's. He held various offices in the city of Baltimore, and in 1848 became mayor. Later he became president of the Baltimore central railroad, and devoted his entire energies to its reorganization, a task in which he was thoroughly successful. Mr. Barnum was largely interested in the development of the telegraph, and was the first president of the American Telegraph Company. He was also one of the originators of the American Railway Union and was prominent in the activities of this organization. He died in 1865.

BARNWELL, John, soldier, b. in Ireland about 1671; d. about June, 1724, in Beaufort, S. C. In 1712 a formidable conspiracy was formed by the Tuscarora Indians in North Carolina against the white settlers of the colony. In the neighborhood of Roanoke alone 137 whites were killed in one night. Col. Barnwell was sent by Gov. Craven, of South Carolina, with a regiment of 600 Carolinians and several hundred friendly Indians to punish the offenders. He marched through an unbroken wilderness without provision trains or any regular source of supplies. The advance was conducted with great expedition and skill. Barnwell's force was not large enough to drive the enemy back, so the engagement. The survivors were driven into their fortified town, besieged, and finally reduced to submission. Nearly 1,000 of them were killed or captured, and the remnant abandoned their hereditary lands and joined the Five Nations of New York. This was the first crushing blow dealt against the Indians by the white settlers in the Carolinas, and Barnwell is to this day known to his descendants as "Tuscarora John." In 1722 he was sent to England as agent for the colony of South Carolina.—His grandson, Robert, b. in Beaufort, S.C., in 1762; d. in 1814. He volunteered for the revolutionary war when sixteen years old, and was dangerously wounded. He was elected a member of the South Carolina legislature shortly afterward. He was taken prisoner and confined in a prison ship in Cape Fear river, N. C., but with his fellow prisoners organized a revolt, overpowered the guards, captured the ship and made their escape. Mr. Barnwell was afterward a member of the convention in South Carolina on the adoption of the federal constitution, and a member of congress from 1791 till 1802. He declined re-election, but was a member of the state legislature for many years afterward. He was speaker of the house of representatives of South Carolina in 1795, and president of the senate in 1805.—His son, Robert Woodward, statesman,
b. in Beaufort, S. C., 10 Aug., 1801; d. in Columbia, S. C., 25 Nov., 1882. After graduation at Harvard in 1821, he studied law, and practised in his native state. He was a representative in congress from 1829 till 1833. In 1834 he was elected president of the South Carolina college. He resigned, on account of his health, in 1841. He declined re-election, but was appointed U. S. senator in place of F. H. Elmore, deceased, and in this capacity he served in 1850–51. In December, 1860, after the passage of the ordinance of secession by South Carolina, and his appointment commissioned officers to go to Washington to treat with the national government for U. S. property within the state. He was a delegate to the convention of the seceding states at Montgomery, Ala., and was the casting vote that made Jefferson Davis president of the southern confederacy. He was also a member of the confederate senate (1861).

BARR, Amelia Edith, author, b. in Ulverstone, Lancashire, England, 29 March, 1831. She was the daughter of the Rev. William Huddleston, and was educated in Glasgow high school. In 1850 she married Robert Barr, son of the Rev. John Barr, of the Scottish Free Kirk. She came to the United States in 1854, and, after a residence of several years in Augusta, Ga., and in Galveston, Texas, removed to New York, where in 1867 her husband and three sons died of yellow fever. She came to New York in 1869 with her three daughters, and, after teaching for two years, began to write for publication, producing chiefly sketches and miscellaneous articles for the magazines and newspapers. Her first book was "Reminiscences of a Reality" (1882); "Young People of Shakespeare's Time" (1882); "Cluny McPherson" and "Scottish Sketches" (1883); "The Hallam Succession" (1884); "The Lost Silver of Aquitaine" and "Jan Vedler's Wife" (1885); "A Daughter of Fife," "The Last of the McAllisters," and "A Bow of Orange Ribbon" (1886); and "Remember the Alamo" (1888).

BARRAGÁN, Isidro (bar-ra-gah'n), Spanish soldier. On 27 July, 1829, he landed on the coast of Tamaulipas with 3,300 men and invaded that section of Mexico by order of King Ferdinand VII, in revenue for the expulsion of Spaniards by Pres. Guerra. Barragán took Tampico and other places, where he resisted the attacks of Mexican troops until the day following, after which he bravely for twelve hours against the Mexican army commanded by Generals Santa Anna and Terán, the Spaniards capitulated. Barragán departed for the United States and his soldiers were sent to Havana. This was the end of the Spanish invasion.

BARRAGÁN, Miguel (bar-ra-gah'n), tenth president of Mexico, b. in the state of San Luis Potosí in 1789; d. in Mexico, 1 March, 1855. He entered the army, and soon won several promotions. In 1821 he was under the command of Hurbide, but was opposed to his coronation. Being appointed commander of Vera Cruz in 1824, he held the Spaniards entirely isolated in the San Juan de Ulúa castle until famine and epidemics forced them to the French army, after which he compelled Barragán to leave the country; but afterward he was recalled by Santa Anna, and in the absence of this general he was intrusted with the presidency of the republic, which he filled with remarkable ability until his death.

BARRAS, Charles M., actor, b. in 1826; d. in Columbus, Ohio, 31 March, 1837. He made a reputation by his various impersonations on the stage. His delineations of the character of the "Hypochondriac," an adaptation from Molière, being especially noteworthy, He was the author of a well-known spectacular play called "The Black Crook," from which he derived a large income. His eccentric character and unconscious drapery made him extremely popular.

BARRAS, Louis, French naval officer, b. in Arles, Provence, France; d. near Arles in 1789. He was lieutenant-general of marine at the time of his retirement from active service in 1781, a grade corresponding to that of admiral in modern navies. He was with Ternay in command of the French relief squadron in 1781, and with Chastellux in command of the French squadron after Ternay's death. De Barras was chosen to represent the navy at the conference between Washington and Rochambeau at Wethersfield, Conn., 25 May, 1781, but was prevented from attending by the appearance of the British squadron off Block island. He participated in the encounters and disasters that befell the two fleets during a terrible gale that followed. Later in the season he was left in command at Newport, and he sailed thence in September to effect a junction with De Grasse in the Chesapeake. The French fleet, thus strengthened, lay in the mouth of the Chesapeake during the siege of Yorktown by the allied forces of Washington and Rochambeau. But for its presence there, the British may have been able to retake the city and to the rescue of Cornwallis, and the final surrender might have been indefinitely postponed. Count de Barras was afterward engaged in active operations in the West Indies, and especially distinguished himself in 1782 by capturing the Island of Montserrat from the British.

BARRAZA, José Loreto (bar-ra-tho'), Mexican Jesuit, b. in Santiago Papasquiaro, Durango, 24 June, 1787; d. there early in October, 1843. He was a profound scholar and a brilliant orator, and obtained a professorship of theology and the rectorship of the seminary of Durango. He was also a senator in the general congress from 1824 till 1826, and a representative of his state from 1836 till 1842. Barranza's very great influence among the clergy, and also among the leading men of every political party, enabled him to render many important services to his country.

BARRÉ, Antoine Joseph Le Fevre de la (del-la-bar'), naval officer, b. in Picardy about 1625; d. in Paris, 3 May, 1688. His American name is Le Fevre. He commanded the fleet of Guiana in 1663. In 1664 he retook Cayenne, the capital, from the Dutch, and in 1667 he defeated the English in the Antilles and compelled them to raise the blockade of St. Christopher. In 1682 he was appointed governor of Canada, succeeding Frontenac, and led a military expedition up the Ottawa river to intimidate and compel the tribes to trade with Montreal rather than with New York. He was forced to sue for peace. For this failure he was recalled to France. He published "Description de la France équinoxiale, ci-devant appelée la Guiane et, par les Espagnols, El Dorado" (Paris, 1699); "Journal d'un voyage à Cayenne," which was read at the end of a "Relation de ce que nous avons passé dans les îles et la terre ferme de l'Aмерique pendant la dernière guerre avec l'Angleterre en 1666-'67" (Paris, 1671).

BARRÉ, Isaac, soldier, b. in Dublin, Ireland, in 1726; d. in London, 20 July, 1802. He was graduated at Trinity college, Dublin, in 1745, and joined the army as an ensign the following year. His American experience began with the expedition against Louisburg in 1755, and he attracted the attention of Gen. Wolfe, who promoted him major of brigade in 1758 and adjutant-general of the army in 1759. He was at Wolfe's side when
that officer fell on the heights of Abraham, and his figure is conspicuous in Benjamin West’s famous painting. At this time he severely
wounded in the cheek. He received further promotion under Lord Amherst in 1796, carried to
England the news of the capture of Montreal, and
there remained, entering parliament and becoming
the terror of all opponents through his frightful
powers of invective. In 1848 John Britton pub-
lished a volume to prove that Barrett wrote the
“Letters of Junius.” He, however, solemnly de-
nied the authorship to his friend Samuel Bayard.

BARREDA, Gabino (bar-ray-dah), Mexican
physician, b. in Puebla in February, 1829; d. in
the city of Mexico in March, 1881. In 1843 he
became a medical student, and won special honors at
the University of Mexico. In 1857 he was elected a
member of the house of representa-
tives in 1861, and again in 1867. The national
preparatory school being established to unify the
studies necessary to enter any of the professional
schools, Barreda was appointed its director. He
also filled its chair of natural history, and that of
his only block in his course of chemistry.

The government also appointed him professor of general
pathology when this branch was for the first time
taught in the national school of medicine. For
ten years he devoted himself to introducing his
new philosophical teachings in opposition to the
old doctrines, and he was for some time president
of the “Sociedad Medico-Filosofica de Mexico.” In
1867 he represented his government at the postal union con-
ference in France, was also appointed minister to
Germany. Most of his writings are to be found in the
“Gaceta de Medicina de Mexico,” to whose editorial
staff he belonged; in the “Periódico de la Sociedad
Humboldt”; in the “Periódico de la Sociedad de
Ciencias de la Patagonia;” and in the “Gaceta de
Ciencias Medicas,” and in various other scientific journals. He separately published his
“Carta al Sr. E. Mariano Riva Palacio,” in which are
treated all subjects relating to public instruction,
and a method for scientific education.

BARRETT, Benjamin Fisk, clergyman, b. in
Dresden, Me., 24 June, 1808; d. in Germantown, Pa.,
6 Aug., 1882. He was graduated at Bowdoin, and
entered at the Cambridge Unitarian seminary. He adopted the
Swedishbrogian doctrines. From 1840 to 1848
he officiated as pastor of the new church society
in New York, and then in Cincinnati until 1850,
when he retired from the pulpit, owing to poor
health. He pursued a mechanical trade in Chicago,
and for a time spent a year in New Mexico, as
a property. He then took charge of the first Swe-
denbrogian church in Philadelphia, at the same time
editing the “New Church Monthly.” He is the author of “A Life of Swedenborg”; “Lectures on the Doctrines of the New Jerusalem Church” (New
York, 1842); “Lectures on the New Dispensation”;
Reed” (New York, 1855); “Catholicity of the New
Church”; “The Visible Church”; “Beauty for
Ashes” (1856); “Episcopalianism” (1871); “On
Future Life” (Philadelphia, 1872); “The Golden
City”; “The New Church, its Nature and Where-
about”; “Swedenborg and Channing”; “A New
View of Hell” (1872); “Report of the Inquiry into
the Allegations against D. P. Barrett” (1886);
about fifty pamphlets and smaller treatises, and
volumes of the New Swedenborgian Magazine. His collected works
were issued in Philadelphia (1873). He has edited the
“Swedenborg Library,” in twelve volumes, containing
the substance of Swedenborg’s teachings in extracts (Philadelphia, 1876, et seq.).

BARRETT, Edward, naval officer, b. in Louisi-
a in 1828; d. in March, 1880. When thirteen
years old he became a midshipman, and
received a complete education at the
naval academy, and served on foreign stations until Feb-
uary, 1846, when he was ordered to the naval
academy at Annapolis (established in 1845), and
was graduated in August of the same year, in time
to participate in the war with Mexico as a passed
midshipman. He was present at the operations
about Vera Cruz, took part in the expedition to
Puebla, and was soon connected with a valuable
prize to New Orleans. In 1848 he was placed in command of the sloop “Jamestown” and sent to
the African coast. In 1854 he acted as flag lieu-
tenant to Com. Breeze, was promoted lieutenant
14 Sept., 1855, and after further service on the
African coast and in the East Indies was appointed
instructor of artillery. In 1859 he was raised to
lieutenant, and in 1861 he was elected to the court-
martial for disloyalty, but was fully exoner-
ated alike by the court and the reviewing
authorities. In July, 1862, he was promoted lieu-
tenant-commander, and in 1863–4 commanded the
man-of-war “Massasoit.” In 1864–5 he commanded the
monitor “Catskill,” and captured the “Deer,”
which was the only block in the coasting trade.
He was in the first expedition that ascended the
Yang-te-Kiang river as far as Hangkow, and took
the first man-of-war through the Eads jetties at
the mouth of the Mississippi.

BARRETT, George Hooker, comedian, b. in
Exeter, England, 9 June, 1794; d. in New York
city, 5 Sept., 1859. His father, first appeared on the American stage at the
Haymarket, Boston, 28 Dec., 1796, as “Ranger.”
His mother was an actress. In 1806 he played
“Young Norval” in the Park theatre, New York.
He became manager in 1826, jointly with E. Gil-
fort, of the Bowery theatre, New York. From
1830 to 1851 he was manager of the Tremont
theatre, which he in 1831 purchased, and opened the Drury Lane theatre in London. In 1847 he opened the
Broadway theatre, New York, which had then
recently been built, and for a time was stage man-
ger, during 1852–3, in Charleston, S. C. In
1855 he retired from the stage. His forte was in genteel
comedy, though he succeeded in low comedy and
farces. By his elegance and stateliness he became
known as “Gentleman George.” His wife, an act-
ress, died in Boston, Mass., 22 Dec., 1853.

BARRETT, Lawrence, actor, b. in Paterson,
N. J., 4 April, 1858; d. in New York city, 20
March, 1891. His first appearance was in 1853.
After a year’s experience in playing minor parts,
he acted in 1855 at the Union theatre, New York, where he
acted in St. Louis, Chicago, and elsewhere, until
December, 1856, when he was engaged at the Cham-
ers Street theatre, New York, where he appeared as Sir Thomas Clifford in “The Hunchback.”
He was engaged by Mr. Barton early in 1857, and
acted under his management for nearly two years,
supporting Charlotte Cushman, Edwin Booth, and
other prominent actors. In 1858 he was engaged for
leading parts at the Boston museum, and later at
the Howard Athenaeum of that city, where he
played with Miss Cushman, Barry Sullivan, and E. L.
Davenport. On the outbreak of the civil war in
1861, Mr. Barrett accepted a captaincy in the 28th
Massachusetts infantry and served with distinction.
Afterward he acted at Philadelphia, at Washin-
ton, and then at the Winter Garden in New York, where he was engaged by Mr. Booth to play Othello to his Iago. The elder Wallack considered his impersonation of this character the most striking performance he had seen in twenty years. Mr. Barrett then became associated in the management of the Varieties theatre in New Orleans, playing leading parts, and, for the first time acting as Richelieu, Hamlet, and Shylock. About this time he met Edwin Forrest, and was led to make a careful study of the history and literature of the stage, a circumstance which afterward was of great value to him. In 1864 he purchased "Rosemary" from Lester Wallack, and, after acting the leading character in it at New Orleans, made his first tour as a star actor. In 1867 he played with great success at Maguire's opera-house in San Francisco, where he remained as manager of the California theatre until 1870, when he again appeared in New York. Late in 1870 he played with Mr. Booth in opposite characters at Booth's theatre. In 1871–72 he managed the New Varieties theatre in New Orleans, and in December, 1872, he played Cassius to Booth's Brutus in New York. During 1873-74 he made successful tours through the United States, visiting the leading cities. The season of 1875 began with a magnificent revival of "Julius Caesar" at Booth's theatre, where he again appeared as Cassius and later as King Lear. He took the part of Daniel Druce, and was the first actor to appear in Mr. Gilbert's play of that name in the United States. Later he produced "York and Love" at the Park theatre in New York. His latest success was in George H. Boker's "Francesca di Rimini," which he brought out in 1882 at the Chestnut street theatre, Philadelphia. He acted the Marchbanks, Lanciotto, with great intelligence and rare power. In the autumn of 1883 this play ran for nine weeks at the Star theatre, New York, where it was presented on a very complete scale and attracted much enthusiasm. In 1887, 1881, 1883, and 1884, Mr. Barrett visited England, and during his last visit appeared in many of his prominent roles, which were favorably received. He was the author of a life of Edwin Forrest (Boston, 1881).

BARRIGER, John Walker, soldier, b. in Shelby co., Ky., 9 July, 1832. He was graduated at West Point in 1856, and was commissioned second lieutenant of artillery. He participated in the Manassas campaign in 1861, receiving the brevet of captain for gallantry at Bull Run, and subsequently served as chief of commissariat for Indiana and for West Virginia, and from 17 Nov., 1863, to 15 Aug., 1865, as chief commissary of the Army of the Ohio, with the rank of lieutenant-colonel, in the staff of the volunteer army. On 13 March, 1865, he was brevetted brigadier-general for faithful and meritorious services. From 1867 to 1873 he served as chief of commissariat in the department of the Platte, and subsequently as assistant commissary-general in Washington, with the rank of major. He is the author of "Legislative History of the Subsistence Department of the United States Army from June 16, 1875, to August 15, 1876."

BARRIGER, Daniel Moreau, diplomatist, b. in Cabarrus co., N. C., in 1807; d. at White Sulphur Springs, Va., 1 Sept., 1873. He was graduated at the university of North Carolina in 1826, and admitted to the bar in 1828. The same year he was elected to the state house of commons, and returned for several successive terms. He was a member of the state constitutional convention in 1835, and elected for three successive terms to congress, 1843–3. He received the appointment of minister to Spain from President Taylor in 1849, and served until 4 Sept., 1853, when he returned home and was relected to the state legislature. In 1855 he declined renomination and retired to private life until chosen to represent his state at the peace congress in Washington (1861). After the war he was sent as a delegate to the national union convention in Philadelphia, August, 1866.

BARRIONUEVO, Francisco de (bah-rio-noo-ay-vo), Spanish officer, b. in Madrid, in the 16th century. He went to Santo Domingo when the population of that island were in rebellion in 1552. With only thirty Spaniards and the same number of faithful Indians, he restored order and entirely subdued the rebels in a few days.

BARROS, Gerardo (bah-re-os), president of Salvador, b. in San Salvador. He was educated for the bar, being graduated in 1862; but during the revolutionary movements of 1867 he gathered a band of mounted warriors at Los Altos, near Quezaltenango. Beginning in a small way, taking one town and another, though defeated several times and driven across the frontier into Mexico or forced to hide in his native mountains, he always came back with re-doubled energy. In May, 1871, Gen. Miguel Gar-

177

eña Granados joined him against the government of Víctor Cerna, and on 3 July they issued the "Plan de Patzcuaro." After the encounters in Tacaná, Retalhuleu, Chiché, Tierra Blanca, Cochin, and San Lucas, in which he showed great courage and military ability, Barrios entered the capital and put an end to the régime established by Carrera in 1840, called "the Thirty years." Gen. García Granados filled the presidential office, and Barrios remained in the army at Los Altos. But a revolution against the new government soon broke out, and Barrios defeated the insurgents in the battles of Cerro Coro and Santa Rosa. On 11 Dec., 1872, began another revolution headed by Gen. José María Medina, president of Honduras, who intended to reinstate the reactionary party. The government of 1872-1877 was without an original plan; there was another insurrection headed by Enrique Palacios, accompanied by other revolutionary movements in the mountains; but in four weeks peace was reestablished, which lasted till 1876, when President González, of Salvador, and President Leiva, of Honduras, cooperated with the reactionary party of Guatemala against Vicente Granados, who was presiding, and his successor, Andrés Valle, in a conference held at Chingo, agreed to leave the questions at issue to be arranged by Dr. Marco Aurelio Soto with the aid of Salvador and Guatemala. Owing to the influence of Gonzalez the agreement was not fulfilled. Barrios went in person to attack Salvador, and the crisis came at Chalchauapa, Apuracá, and Pasquina, the Salvadorians, having resisted for two months without success, capitulated. In 1876 the national assembly approved the acts of Barrios. An attempt was made to assassinate him in 1877 while he was visiting at San Pedro Jacópolis, near the Mexican frontier. The conspirators called themselves "the society of death," and their purpose was to kill Barrios and several of his ministers, and even women and children; but the whole plot was discovered, 1 Nov., 1877, and the chief instigators were shot. Another assembly met in Guatemala in 1879 and decreed (11 Dec.) the first constitution of the republic, a very liberal one, which was put in operation in 1881 against Barrios' government, which was again brought forward, and Barrios proposed the intervention of the United States in 1881. On seeing that González, president of Mexico, insisted upon agitating the subject, Mr. Romero, Mexican minister at Washington, agreed to that proposal, leaving the final determination of limits between Mexico and Guatemala to the president of the United States. The negotiations were far advanced, conducted by Secretary Frelinghuysen and Ministers Romero and Montúfar, when Gen. Barrios came specially authorized by the assembly of Guatemala to settle the question at issue; but some misunderstanding, chiefly between Barrios and Montúfar, brought the negotiations to an end here, and the question was arranged in accordance with the original conditions, by which Guatemala ceded the Chichapás and Sosolinci districts to Mexico. After travelling through the United States and in Europe, Barrios returned to Guatemala, and on 13 April, 1884, there was another attempt to kill him, a bomb being exploded near him. On 28 Feb., 1885, with the assent of the national assembly, his ministers, President Zaldívar, of Salvador, and President Cerna, of Honduras, published his proclamation intended to effect the union of all the Central American nations in one republic, and on 6 March issued a decree with directions as to the way of effecting said union. The people and the army congratulated Gen. Barrios and offered him their support, and the proclamation of the union was approved by the people. The week afterward confusion began, and troops were sent against Salvador; Barrios himself went to the front, but for several days no hostilities occurred. Salvador and Honduras had agreed to the union months before, while Costa Rica and Nicaragua held back from dread of Barrios. But Zaldívar, of Salvador, now revolted against Barrios, and revealed himself as the foe of Barrios and the union. Barrios did not begin the war until Zaldívar, made bold by the help he fancied Mexico would give him, ordered his troops to cross the frontier and attack the Guatemalan forces. Zaldívar was deceived as to assistance from the Mexicans. They protested against Barrios's tyrannical action in attempting to annex the other Central American states to Guatemala, but did nothing. When Barrios heard that Gen. Díaz was opposed to a Central American union he said: "I want for my country the union that gives strength and leads to progress and prosperity. I made a revolution in 1871 to deliver my country from these Guatemalan tyrants, and from some that came to this part of the world and wish now to consummate the work of the immortal Morazán. I did not expect Díaz, who imbued with blood the Mexican soil, to find fault with me as a revolutionist when I try to effect, peacefully if possible, the union of these small countries. The Salvadoran troops were speedily repelled, as Barrios entered the enemy's country and proceeded to attack Santa Ana, by that time garrisoned by about 7,000 men and defended by earthworks. The actual fighting began on 30 March, the day when the Salvadoran troops crossed the frontier; but by 2 April Barrios had taken the fortress, and all Zaldívar's troops had fled into the interior. There was nothing now preventing the whole of Salvador, and Honduras was already despatching a force to join them. As they approached the village a timid officer was afraid to lead his regiment in first, dreading an ambuscade. Barrios accordingly put himself at their head and was the first to enter the streets. The main body of the garri- son had fled, but some sharpshooters were left in the church-tower and on the roofs of the houses. A bullet from one of these struck Barrios down, and at the same moment his son was killed by his side. This happened at Chalchauapa between nine and ten in the morning. When the foremost Gua- temalan troops saw Barrios fall they were seized with panic and fled, meeting the rest of the advance-
ing army and throwing them too into confusion; and though the officers fired among them to com-
ply this order, the crew had already spread, and soon the whole army was in disordered flight and the greater part of it scattered. The day his body was brought into Guatemala all the road for miles out was lined with people, mostly of the lower classes, weeping and sorrowful. His widow left Guatemala directly after the funeral for New York, where Barrios owned a fine house in Fifth avenue. He had been for some time put-
ing his money into American securities and mortgaging all his property in the country. His son, by a special act of congress, is a cadet at the U. S. military academy. No doubt some of Barrios’s measures were harsh and at times even cruel, but they attained their end as no other measures could. His merits have been enor-
mously exaggerated and the wildest tales have been invented about him; and in those cases where cruelty can be clearly proved it can generally be traced rather to his lieutenants than directly to himself. Still, he probably did not care to exam-
mine too closely into the manner in which his orders were carried into effect. When long suf-
moutry was the end was gained. He took the keenest interest in all that concerned his army, and his troops were better dressed, better equipped, and better discipl-
ined than is usually the case in Spanish-American states. There were many barracks in the capi-
tal, most of them in the immediate neighborhood of his palace, and these were usually from three to four thousand troops in the city. He organized a system of militia throughout the country, so that every man was drilled except the pure Indians, and these local militia were called out once or twice a month for exercise and drill on Sunday mornings. By this means he had a force of from 20,000 to 30,000 men ready. He made the city of Guatemala one of the cleanest, pleasantest, and most habitable cities in Spanish America, and fur-
nished it with a good and efficient police, bringing an inspector from New York to organize it. He sent men to the United States to study post-office and telegraph management, and reorganized those services thoroughly with the experience thus gained. Barrios’s ability is well known in Guat-

mograph in Guatemala. He built the first railway in the country, and also began the northern railroad to establish communication with the Atlantic coast. In order to make this enterprise national he de-
creed that every Guatemalan earning over $8 a month must be a stockholder. He built safe bridges, made and improved many of the chief roads, and did innumerable things of the kind. He spoke no language but Spanish, but he fully appreciated the value of various kinds of knowledge in others. He took great interest in the colleges and schools, and did much for education all over the country. One of his latest decrees was to the effect that no one should be admitted to practise as an attorney who had not passed a sufficient examination in English and French. He owned estates all over the country, cattle haciendas, coffee plantations, houses, and every sort of property worth having, and was proud of their condition, trying to set an example of proper cultivation and management to other people. He established the institutions of Quezaltenango and Chiquimula and a normal school department in that of the capital, founded the industrial and agriculture schools, built street railways in the city of Guatemala, a penitentiary in the capital and another in Queza-
tenango according to the modern system, and made many improvements in the national theatre and other public buildings. Personally he was a man of simple tastes and habits, rising early, dining simply, living the most ascetic life. His extravagances were in horses and estates. He was of mixed Spanish and Indian blood, and the Indian rather predominated in his countenance. He was short, with dark complexion.

BARRITTE, Frances Fuller, poet, b. in Rome, N. Y., in 1826. Under her maiden name, Frances Barlette, she married a fine, upstanding young man to whom she gave her love and devoted herself with her parents, moving westward from her birth-
place successively to western Pennsylvania, Ohio, and Michigan. In the latter state she married. In 1855 she went farther west with her husband, but subsequently returned to New York city. When only fourteen years old, she began writing for publication, and at twenty-two was a favorite contri-
butor of the “Home Journal,” under the manage-
ment of N. P. Willis. “Azlea,” a tragedy, was written about this time, and published in 1851 in a volume entitled “Poems of Imagination and Sentiment,” by herself and her sister Metta (Mrs. Victor), edited by Rufus W. Griswold.

BARROXYA Y ANTEL, Pedro Antonio (baptized in 1709; d. in Granada, Spain, 22 May, 1759. He studied theology at Cuena, and soon became noted for his learning. After filling sev-

eral high offices at Coria and Malagca he was ap-

pointed archbishop of Lima, and consecrated 25 June, 1751. He at once began to promote reforms in the administration of the finances and the general instruc-
tion, devoting himself entirely to that purpose and
to charity. Barroxya distributed all his revenues among the needy, and when transferred to the see of Granada, in 1758, he was so poor that his brother had to pay the expenses of the voyage.

BARRON, James, naval officer, b. in Virginia in 1729; d. in Norfolk, Va., 21 April, 1815. Com. Barron is chiefly known to the present generation from his encounter when in command of the “Chesapeake” with the British frigate “Leopard” in time of peace, and the duel in which he killed Com. Decatur. He was a seaman from early boy-

hood, entered the navy in 1738 as a lieutenant, was promoted captain in 1799, and was commodore of the British navy (28 guns) in June, 1806. War with France was immin-

ent, and the frigate had been undergoing hasty repairs at the Washington navy-yard. Her men and stores were hurried on board, and she sailed on 22 June, the intention being to clear the decks and drill the crew during the voyage across the At-

lantic. As soon as she was fairly at sea the British frigate “Leopard” (50 guns), which had been wait-
ing for her, ranged alongside, with her crew at quarters, and her captain demanded certain alleged British deserters said to be among the “Chesapeake’s” crew. Com. Barron declined to surren-
der the men, whereupon the “Leopard” opened fire. By great exertion, a single American gun was enough to stop the fire, so that the “Chesapeake” was saved from the galley fire; but in the meantime the shot of the “Leopard” had killed three and wounded eighteen of the “Chesapeake’s” crew. As the one shot was discharged the American ensign was hauled down, and after some further parley the alleged deserters were carried off. The action of the British department was repudiated by his govern-
ment, the “deserters” were formally restored on board the “Chesapeake,” and a money indemnity was paid. Popular indignation ran very high. Com. Barron was tried by court-martial, and sus-
pended from rank and pay for five years, though, in point of fact, the blame belonged to the navy.
department rather than to him. On his return to duty he was refused an active command, and in 1820, Com. Decatur having been instrumental in keeping him from a commission to a first-rate, killed him, and was at the same time himself severely wounded. The remainder of his life he passed on shore duty and waiting orders. He became senior officer of the navy in 1839.

BARRON, Samuel, naval officer, b. in Hampton, Va., about 1763; d. there, 29 Oct., 1810. In 1788 he was placed in command of the schooner "Aurora," which was equipped by the people of Norfolk, Va., to resist French aggressions. In 1805 he was in command of the squadron of ten vessels operating against Tripoli. He sent three small vessels to aid Hamet, the deposed bashaw; but, after the capture of Derne by Gen. Eaton and Capt. Hull, 27 April, 1805, he refused further direct aid, for fear that the usurping bashaw would retaliate with the massacre of Capt. Bainbridge and his men, then held in captivity. He soon afterward returned to the United States, owing to declining health, being succeeded in the command of the fleet by Com. Rodgers. He was appointed to the command of the navy-yard at Charlestown, Mass., was released to private life. His son, Samuel, b. in Hampton, Va., in 1802; d. in Essex co., Va., 26 Feb., 1888. He entered the navy in 1812, attained the rank of lieutenant 3 March, 1837, of commander 15 July, 1847, and of captain in 1855. He was appointed chief of the bureau of detail in the navy department when the southern states were in rebellion, and was equipped by the government as commodore in the confederate navy. He superintended the defenses of North Carolina and Virginia. Being present at the attack upon Forts Clark and Hatteras, 28 Aug., 1861, he assumed direction of the defense by request of the officers of the forts, and, after the surrender, was a prisoner of war in New York until exchanged in 1862. He then went to England, where he engaged in fitting out blockade-runners and privateers. After the war he became a farmer in Virginia.

BARROW, Alexander, senator, b. near Nashville, Tenn., in 1801; d. in Baltimore, Md., 29 Dec., 1846. He entered West Point in 1816, but was not graduated; studied law at Nashville, and after subse- quently removing to Louisville, Ky., he practiced a few years and then became a planter. He served for several years in the legislature, and was chosen to the U. S. senate as a whig, serving from 31 May, 1841, till his death.

BARROW, Frances Elizabeth, author, b. in Charleston, S. C., 22 Feb., 1823; d. in New York city, 2 May, 1894. "Aunt Fanny" was the daughter of Charles Benton Mease, of Charleston, and Sarah Matilda Graham, of Boston. She was educated in New York city, where the greater part of her life was passed. She married, 7 Dec., 1841, James Barrow, jr., of New York. In 1855 she began to write and publish books, and during the remainder of her life, she published volumes bearing her name were brought out by different publishers. The most popular of these are "Aunt Fanny's Story Book"; "Six Nightcaps"; "Six Mittens"; "Six Popguns"; "Four good little Hearts"; "Life among the Children"; "Take Heed"; and a novel, "The Wife's Struggle." The companies by whose permission success among English readers, and some of them, notably "Six Nightcaps," were translated into French, German, and Swedish. Her miscellaneous literary productions have appeared in numerous periodicals. Her work is characterized by a peculiarly bright and captivating way of presenting homely, every-day scenes and sayings. Perhaps her most famous story is "The Letter G," published in a leading magazine in 1864. The story was very cleverly dressed up, and brought the author reputation through the manufacturers of a certain sewing-machine, then recently placed on the market and known by a trade-mark identical with the title of the story. These enterprising dealers took advantage of the gratuitous advertisement, and scattered the story broadcast over the world.

BARROWS, Elijah Porter, clergyman, b. in Mansfield, Conn., 5 Jan., 1807; d. in Oberlin, Ohio, 14 Sept., 1888. He was graduated at Yale, and, after teaching, was ordained, and in 1833 he became pastor of the first free Presbyterian church in Oberlin, Ohio; was released from that charge in 1837, when he accepted the professorship of sacred literature in Western Reserve college (1837–52). In 1853 he was appointed professor of Hebrew language and literature in Andover theological seminary, remaining the office until 1866. In 1872 he accepted a like appointment in Oberlin, Ohio, theological seminary. Besides twenty-five articles in the "Bibliotheca Sacra," he has published "A Memoir of Evertin Judson" (1862); "Companion to the Bible" (1869); and "Sacred Geography and Antiquities" (1872). He has also been one of the editors of the American Tract Society's "Bible with Notes.

BARROWS, Willard, civil engineer, b. in Monroe, Mass., in 1806; d. in Davenport, Iowa, 3 Jan., 1868. His early youth was spent in New England, after which he became a teacher in Elizabeth, N. J., but this occupation he soon relinquished for the profession of civil engineering. He accomplished the government survey of the Choctaw purchase, in Mississippi, finishing that work in 1855. Later he explored Cedar river, which at that time was scarcely known, and in 1857 was engaged on the first surveys of Iowa. In 1840 he surveyed the islands in Mississippi river between Rock Island and Quincy, during the suspension of the surveys he settled in Rockingham; but in 1857, when the surveys were re- renewed, he came to New York city. From 1845 till 1850 he was engaged in government work and on county surveys in Iowa. During the latter year he made a journey to the Rocky mountains, and afterward was connected with a banking firm in Davenport. He published several accounts of his experiences, including "Barrow's New Map of Iowa," (1844), and "Historical Sketch of Scott County." (1859).

BARRUNDIA, José Francisco (bar-roo'-nya), Central American statesman, b. in Guatemala about 1789; d. in New York, 4 Aug., 1854. Many members of his family were eminent in the service of Spain, but he early opposed the mother
country, and in 1813 was sentenced to death for treason. He and his fellow-conspirators hid themselves in the mountains for six years, when Barry placed himself at the head of the revolutionary party of Guatemala. He was conspicuous in the struggle for independence, and was a member of the first republican constituent assembly. On 10 April, 1824, he introduced and carried a decree for the immediate abolition of slavery throughout the republic, and he subsequently procured the adoption of a code modeled after the code of Louisian—an English title—introduced for the state of Louisiana, which he had translated into Spanish. In 1825 he declined the office of vice-president, but in 1829 accepted that of president, and devoted himself to educational and other reforms. When in 1832 three of the five states that had composed the old republic again united, he was unanimously chosen president; but, as two of the states seceded, he resigned, and employed himself in preparing a narrative of Central American events. In the hope of regaining his ascendancy in Guatemala through American influence, he set out in 1834 for Washington as minister of Honduras, with the alleged design of negotiating for its annexation to the United States.

**BARRY, Henry W.,** soldier, b. in New York city; d. in Washington, D. C., 7 June, 1875. He was self-educated in the city of his birth, and so improved his opportunities that in early manhood he became principal of the Locust Grove academy, Kentucky. He then studied law and was admitted to the bar in Washington, D. C. He entered the union army as a private early in the civil war, and organized the first regiment of colored troops raised in Kentucky. He commanded a brigade, and for a time a division, and was brevetted major-general of volunteers. As a member of the state constitutional convention of Mississippi in 1867, he was active during the reconstruction period and was chosen state senator in 1868, and elected to congress the same year. Relected for successive terms by the votes of the colored republicans of Mississippi, he retained his seat in congress until his death. During his last term he was chairman of the committee on postal expenditure.

**BARRY, John,** naval officer, b. in Tacumshane, county Wexford, Ireland, in 1745; d. in Philadelphia, 13 Sept., 1803. He followed the sea from childhood, and, making his home in Philadelphia at the age of fifteen, acquired wealth as the master of a vessel. He offered his services to congress at the opening of the revolutionary war, “abandoning the finest ship and the first employ in America” (his own words), and, in February, 1776, was given the command of the “Lexington,” in which he made the first capture of a British war vessel accomplished by an American cruiser, that of the tender “Edward.” He was then transferred to the frigate “Effingham.” During the winter of 1776-7, while this vessel was on the coast of Pennsylvania, when her masts were cut down, he commanded a company of volunteers and assisted in the operations at Trenton with some heavy artillery. In 1777, with four boats, he captured a British war-schooner in the Delaware without losing a man. For some time he acted as aide-de-camp to Gen. Cadwalader, and when the British fleet was driven to Philadephia in the latter part of 1777, he took the “Effingham” up the Delaware to save her from capture. The enemy offered him a heavy bribe to deliver up the ship, and finally succeeded in destroying her by fire. In 1778 he was assigned to the command of the “Raleigh,” which was pursued and driven on shore by a British squadron, after making a gallant resistance. In February, 1781, in the “Alliance” he conveyed Col. Laurens on a special mission to France, and cruised with success until he put in for repairs in October. In a desperate combat he captured the “Atlanta” and the “Trespass,” and was severely wounded. After carrying Lafayette and Noailles to France, he crossed the Atlantic. During the period of 1782 fought a sharp battle with an English ship, until the appearance of a superior force compelled him to desist, to avoid capture. On the establishment of the new navy in 1794, he was named the senior officer, with the rank of commodore. He commanded the frigate “United States,” the building of which he assisted, and in 1803 he was made a rear-admiral of the United States, and appointed to the command of the fleet in the West Indies, where he was engaged until 1812.

**BARRY, John, R. C.,** bishop, b. in the county Wexford, Ireland, in 1799; d. in Paris, France, 21 Nov., 1859. While yet an ecclesiastical student he emigrated to America and finished his studies in the theological seminary of Charleston, S. C., under Bishop England. He was ordained in 1825, and appointed pastor of the church of the Holy Trinity in Augusta, Ga. During the cholera epidemic of 1832 he turned his house into a hospital, and afterward into an asylum for the orphans made by the pestilence. Bishop England made him his vicar in Georgia in 1839, and he was promoted to the vicar-generalship of the diocese of Charleston, and appointed superior of the theological seminary in 1844. He was the first to establish a classical school in Georgia. He was present at the council of Baltimore as theologian in 1846, and was appointed vicar-general of the diocese of Savannah in 1853, where he volunteered to nurse the victims of the yellow fever. On the death of Bishop Gartland from the epidemic, he was appointed administrato of the see, and in 1857 was created bishop. He had never fully recovered from the exhaustion brought on by his labors in the epidemics of 1853 and 1855, and he visited Europe for the benefit of his health in 1859.

**BARRY, John Stewart,** governor of Michigan, b. in Amherst, N. H., 29 Jan., 1802; d. in Constantine, Mich., 14 Jan., 1870. He was one of the earliest pioneers of Michigan, and, after coming to that state with a young man, went to Atlanta, Ga., where he lived until 1832, and then removed to Michigan. He had studied law, but became a merchant at Constantine, Mich., and was active in politics there. On the admission of Michigan into the union, in 1836, he was a member of the constitutional convention, and was also elected as a member of the state senate, an office which he again held in 1840. In the latter year he became interested in the cultivation of the sugar-beet, and went to Europe to study the best methods of preparing the sugar. He was elected governor in 1841, and was twice relected, serving from 1842 to 1846 and
from 1850 to 1852. He was again a candidate in 1860, but was defeated. In his successful campaign he sustained the "Wilmot Proviso," in line with the geographical party, and during the civil war he was in sympathy with the ultra-democratic party, and was a member of the Chicago convention of August, 1864, which nominated Gen. McClellan to the presidency.

BARRY, Patrick, horticulturist, b. near Belfast, Ireland, in May, 1816; d. in Rochester, N. Y., 25 June, 1890. He was employed as a teacher in Ireland, and on his arrival in America in 1836 became a clerk for Prince & Co., nurserymen, of Flushing, L. I. In 1840 he entered into the nursery business in partnership with George Ellwanger, at Rochester, N. Y. The firm took the lead in the importation of the dwarf varieties of pears, grafted on quince roots. It took charge of the business until their nurseries were the largest in the country. Through their enterprise, various wild species of shade-trees have been introduced into cultivation, hardy exotics acclimatized, and improved varieties of fruits and flowering plants developed by culture or introduced from abroad. Mr. Barry edited the "Mount Morris Horticulturist," from 1852 to 1854, and the "Horticultural," a "Treatise on the Fruit Garden" (New York, 1851; new ed., 1872), and wrote extensively on subjects connected with botany and flower-gardening. He also prepared the complete and valuable "Catalogue of the American Horticultural Society."  

BARRY, William, author, b. in Boston, Mass., 10 Jan., 1865; d. in Chicago, Ill., 17 Jan., 1885. He was graduated at Brown in 1882 and studied law, but entered Cambridge divinity school in 1826, and after two years there spent two more in study in Göttingen and Paris. He was ordained pastor of the South Congregational church, Lowell, Mass., in 1839, and took charge of the church at Framingham. Failing health forced him to give up his charge in 1844, and he travelled in Europe and Asia till 1847, when he returned and took charge of another church in Lowell. In 1853 his health compelled him to cease work again, and he removed to Chicago. Here he organized the Chicago Sunday school union, and was a key figure in religious, educational, and charitable work. He was librarian till 1868. Mr. Barry was one of the most accomplished scholars and ablest writers in the west. It was in his office that President Lincoln obtained the data for his memorable address in Cooper institute, New York. Among his publications are "Rights and Duties of Neighborhood Churches," "Thoughts on Christian Doctrine" (Lowell, Mass., 1849); "History of Framingham" (Boston, 1847); "Antiquities of Wisconsin" (in Wisconsin Historical Collections, vol. iii.); and "Letters from the East."—His brother, John Stetson, author, b. in Boston, Mass., 26 March, 1819, d. in St. Louis, Mo., 11 Dec., 1872, was educated in his native city, and was ordained pastor of the Presbyterian church at West Amherst, Mass., in 1838. He preached at Weymouth, Mass., from 1839 to 1841, at West Souticate, Mass., from 1841 to 1844, and subsequently, for a brief period, until the failure of his health, at Pawtucket, R. I. He published "Stetson Genealogy" (Boston, 1847); "History of Hanover, Mass.," (1855); and "History of Massachusetts" (3 vols., 1857). From 1858 till 1890 he was pastor of the church at Needham, Mass., and editor of "The Universalist," in Boston.

BARRY, William Farquhar, soldier, b. in New York city, 8 Aug., 1818; d. in Fort McHenry, Baltimore, Md., 18 July, 1879. He was graduated at West Point in 1838, and in that year assisted Maj. Ringgold to organize the first battery of light artillery formed in the U. S. army. After doing garrison duty at different stations, he went with the army to the California war in 1846, and during the Kansas disturbances of 1848. He was in the battle of Tampa, and served in Gen. Patterson's division, and also as aide-de-camp to Gen. Worth. From 1849 to 1851 he was stationed at Fort McHenry, and was made a captain in the 2d artillery on 1 July, 1852. He served in the war against the Seminoles in Florida in 1852-3, and during the Kansas disturbances of 1857-8 was stationed at Fort Leavenworth. During 1858 he was a member of the board to revise the system of light artillery practice, and the revision was adopted on 6 March, 1860. On the breaking out of the civil war, he went into active service, assisting in the defence of Fort Pickens, Fla., as major of the 18th Illinois Artillery. On 1 Sept., 1861, he was made brevet major-general of volunteers, and colonel by brevet for gallant conduct at Rocky-Faced Ridge. On 13 March, 1865, he was made brevet brigadier-general, U. S. army, for his services in the campaign ending with the surrender of the army under Gen. J. E. Johnston, and on the same day was appointed lieutenant-colonel of the 1st artillery on 1 Aug., 1866. He was assigned to the command at Fort Pickens, Fla., and then commanded the artillery school of practice in the Army of the Potomac from 27 July, 1861, to 27 Aug., 1862, and organized its artillery. On 20 Aug., 1861, he was appointed brigadier-general of volunteers, took a leading part in the Virginia peninsular campaign until August, 1862, being in the siege of Yorktown, at the battle of Gaines's Mill, and, the subsequent operations, including the Charles City Cross-Roads, the Malvern Hill contest, and at Harrison's Landing. From the end of that campaign until 1864 he was chief of artillery of the defences of Washington, D. C., having been appointed lieutenant-colonel of the 1st artillery on 1 Aug., 1863. He was assigned to the command at Fort Pickens, Fla., and then commanded the artillery school of practice at Fortress Monroe to 5 March, 1877, when he was appointed to the command at Fort McHenry. During the labor riots of 1877 he rendered valuable service at Camden Station. He was the author, in conjunction with Gen. Barnard, of "Reports of the Engineer and Artillery Operations of the Army of the Potomac from its Organization to the Close of the Peninsular Campaign" (New York, 1863).  

BARRY, William Taylor, statesman, b. in Lunenburg, Va., 5 Feb., 1785; d. in Liverpool, England, 30 Aug., 1855. He went to Kentucky in 1796, was graduated at William and Mary college in 1807, studied law, was admitted to the bar, and practised at Lexington, Ky., where his eloquence soon brought him into notice. He served in both branches of the Kentucky legislature and, in Dec., 1810, was elected to congress to fill a vacancy, serving until 3 March, 1811. In the war of 1812 he was aide to Gov. Shelby, and was present at the battle of the Thames, 5 Oct., 1813. He was appointed to the U. S. senate, in February, 1815, to
fill a vacancy, and resigned, in 1816, to become a judge of the Kentucky supreme court. He was afterward lieutenant-governor, state secretary, and chief justice of the state. On 9 March, 1829, he was appointed postmaster—general. The incumbent of this office was not then a cabinet minister, and President Jackson, when the Senate, in order to gratify his friend Maj. Barry, much dissatisfaction was expressed with his management of the department, and he was severely denounced on the floor of the house by William Cost Johnson, of Maryland, and others. A son of Maj. Barry, then a lieutenant in the army, challenged Jackson, but the challenge was withdrawn after its acceptance. On 10 April, 1835, he resigned, to accept the office of minister to Spain, and died on his way to that country. His remains were brought home by order of the Kentucky legislature, and buried at Frankfort, 8 Nov., 1835.

BARRY, William Taylor Sullivan, lawyer, was born in Columbus, Miss., 10 Dec., 1821; d. there, 29 Jan., 1868. He was graduated at Yale in 1841, then studied law, and practised in Columbus for a few years. From 1849 to 1851 he was a member of the legislature. He owned plantations in Okfuskee and Sunflower counties, and in 1853 removed to the latter place. He was elected to Congress as a democrat, serving from 5 Dec., 1853, to 3 March, 1855. On 18 Dec., 1854, he made an effective speech against the "Know-Nothing" party. After the expiration of his term he devoted himself to his law practice in Columbus, and was again sent to the legislature, being speaker of the house in 1855. He was a member of the Charleston democratic national convention in April, 1860, and was one of the secession committee. The convention did not expressly deny in its platform the power of the federal government to legislate against slavery. In 1861 he presided over the Mississippi secession convention, and was a member of the provisional confederate congress until 1862, when he resigned to enter the army. In the spring of that year he raised the 35th Mississippi regiment, which he led until captured at Mobile, 9 April, 1865. Col. Barry's regiment took an active part in the defence of Vicksburg, where it was surrendered, and afterward in the Georgia campaign. After the war he practised law in Columbus until his death. See Lynch's "Bench and Bar of Mississippi." (New York: 1864.)

BARRYMORE, William, actor, d. in Boston, Mass., in 1847. His first appearance was at Drury Lane theatre, London, 19 Nov., 1827. He came to the United States in 1836, and was stage manager of the Bowery theatre. His first appearance here as an actor was 28 Jan., 1832, at the Walnut street theatre, Philadelphia, in the pantomime of "Mother Goose."—His wife, whose maiden name was Adams, made her début in America, 29 Aug., 1831, as the Dumb Savoyard and Miss Jane Tran- sit, at the Park theatre, New York. She died in England, 30 Dec., 1892.

BARTHOI&, Frederick Augustus, French sculptor, b. in Colmar, Alsace, 3 April, 1834. He studied painting with Ary Scheffer in Paris, but afterward turned his attention to sculpture, which has since exclusively occupied him. Among his works are "Francesca da Rimini" (1852); "Memento to Martin Schongauer" (1863); "Le Vigne- ron" (1870); and "Vercingetorix" (1872). His statue of "Lafayette arriving in America" was executed in 1872, and in 1876 was placed in Union Square, New York. He was one of the commissioners in 1876 to the Philadelphia centen- nial exhibition, and there exhibited bronze statues of "The Young Vine-Grower"; "Génie Pumèbre"; "Peace"; and "Genius in the Grasp of Misery," for which he received a bronze medal. "Liberty enlightening the World," the colossal statue on Bufflethorpe island, in New York harbor, is his work. Soon after the establishment of the present form of government in France, the project of building some suitable memorial to show the fraternal feeling existing between the two great republics was sug- gested, and in 1874 the "French-American Union"
was established. Among its members were Laboulaye, de Rémusat, Waddington, Henri Martin, De Lesseps, De Rochambeau, Lafayette, and Bartholomew. The plan of Bartholomew having been approved, more than $120,000 francs were raised by subscription throughout France for the building of the statue. On 4 July, 1880, it was formally delivered to the American minister in Paris, the event being celebrated by a great banquet. Meanwhile the United States had set apart Belleau's island as a site for the monument, and funds were collected throughout this country for the building of the pedestal, about $300,000 being raised. In October, 1886, the structure was presented to the nation. The pedestal, rising on a colossus of 305 feet 11 inches from mean low-water mark, is the largest work of its kind that has ever been erected by the French.

The famous "Colossus of Rhodes," according to the proportions which the legends attribute to it, was but a miniature in comparison. The "Lion of Belfort," a colossal statue, erected in commemoration of the siege sustained by that city during the Franco-Prussian war of 1870-1, was made by Bartholomew and exhibited in plaster at the salon of 1878. His "Gibeauval," exhibited in the same year, is the property of the French nation, from whom he has received the cross of the legion of honor. See "Bartholomew and the Great Statue" (New York, 1886).

BARTHOLOMEW, Edward, b. in Middletown, Conn., in 1822; d. in Naples, Italy, 2 May, 1858. As a child he evinced a taste for art, but qualified himself to be a dentist and began to practise that profession in Hartford. He soon abandoned it, however, first for painting and afterward for sculpture, in which latter branch he attained eminence. He had charge of the Wadsworth gallery, Hartford, from 1845 till 1848. After studying for a year in the national academy of design, New York, he went to Italy, and after 1850 made Rome his home. Among his best-known works are "Blind Homer led by his Daughter"; "Eve"; "Campana Shepherd Boy"; "Genius of Painting"; "Youth and Old Age"; "Evening Star"; "Eve Receiving the Serpent and Flora"; "A Monument to Charles Carroll"; "Heliasaurus at the Porta Pinciana" and "Galaxymede." The Wadsworth gallery, Hartford, Conn., contains a large number of his works.

BARTHOLOMEW, Roberts, physician, b. in Howard co., Md., 18 Nov., 1831. He was graduated at Capital College in 1850, and received his medical degree from the University of Maryland in 1852. Shortly after graduation he entered the regular army, where he remained until 1884. He served at the different army stations in the west, and during the civil war was in charge of general hospitals in Baltimore, Washington, and elsewhere. After his resignation he settled in Cincinnati, where he practiced, and also filled various chairs in the medical college of Ohio from 1849. In 1878 he became professor of materia medica and therapeutics in Jefferson medical college, Philadelphia. He is a member of various medical societies, among which are the American medical association, the Ohio state medical society, and the Cincinnati academy of medicine. Dr. Bartholomew's "Materia Medica and Therapeutics" (New York, 1874); "Practice of Medicine" (1879); "Hypodermatic Medication" (1882); "Medical Electricity" (1881); and "Antagonism between Medicines and between Remedies and Diseases" (1881).
house of Little, Brown & Co. in 1865, and he became senior partner in 1857. He received the degree of A. M. from Harvard in 1871. His best known and most valuable literary work is "Familiar Quotations" (Boston, 1854; 8th ed., 1883). This has been enlarged in each successive edition, and is one of the most valuable of reference-books. His "New Method of Chess Notation" was published in Cambridge in 1857, appearing in connection with the annals of the chess tournament in New York City. His other works are attached to the latter (1886).

BARTLETT, John Russell, author, b. in Providence, R. I., 23 Oct., 1855; d. there, 28 May, 1886. He was educated for a mercantile career, entered the banking business at an early age, and was for six years cashier of the Globe bank in Providence. His natural bent appears to have been in the direction of science and belles-lettres, for he was prominent in founding the Providence Athenaeum, and an active member of the Franklin Institute. In 1887 he engaged in business with a New York house, but was not successful, and entered the book-keeping trade under the style of Bartlett & Welford. He became a member, and was for several years corresponding secretary, of the New York ethnological society, and was a member of the American ethnographical society. In 1850 President Taylor appointed him one of the commissioners to fix the boundary between the United States and Mexico, under the treaty of Guadaloupe Hidalgo. This service occupied him until 1855, when he was obliged to leave the work incomplete, owing to the failure of the appropriation. He became secretary of state for Rhode Island in May, 1855, and held the office until 1872. The titles of his published works are: "The Progress of Ethnology" (New York, 1847); "A Dictionary of Americanisms" (Boston, 1850; revised ed., 1859 and 1877); "Records of the Colony of Rhode Island and the Providence Plantations" (10 vols., Providence, 1856-65); "Bibliography of Rhode Island" (1864); "Index to the Acts, etc., of the General Assembly of Rhode Island," 1758-1862 (1863); "Literature of the Rebellion" (Boston, 1866); "Memories of Rhode Island Officers in the War of the Rebellion" (1867); "Pim- neal Man" (1868); "History of the Wanton Family of Newport, R. I." (1878); and "Genealogy of the Russell Family" (1879). He had charge of the John Carter Brown Library in Providence for several years, and prepared a four-volume catalogue of it, of which one hundred copies were printed in the highest style of the art.—His son, John Russell, b. 26 Sept., 1843, was appointed to the naval academy from Rhode Island in 1859, and in 1861 was attached to the steam sloop "Mississippi," in which he served at the passage of Forts Jackson and St. Phillip, the capture of New Orleans, and the attack on Vicksburg in June, 1862. He became captain 8 Sept., 1863, and lieutenant 22 Feb., 1864. While attached to the steam sloop "Susquehanna" he took part in both attacks on Fort Fisher, was one of the assaulting party of 15 Jan., 1865, and was specially mentioned in the reports of Com. Godon L. P. Bowen, sailing out at the command of Com. Godon L. P. Bowen, as the head of the Union and Confederate navies, he was commissioned as lieut.-commander 25 July, 1866, and went through the same services, being made commander 28 Jan., 1867 to 1869. He became commander on 25 April, 1877, and was afterward attached as hydrographer to the bureau of navigation in Washington, D. C.

BARTLETT, John Sherren, journalist, b. in Dorsetshire, England, in 1790; d. in New Jersey, 21 Aug., 1863. He received a medical education in London, and was appointed surgeon in the British navy in 1812. During his passage to the West Indies in the "Swallow" he was captured by the U. S. frigates "President" and "Congress" under Commodore Rodgers, and was taken as prisoner to Boston, where he was under surveillance until his discharge in 1815. At the close of the war he married a lady of Boston, and began the practice of his profession. In 1822 he moved to New York, and, on 22 June, 1829, established "The Albion," widely known as an organ of English conservative politics. After conducting this journal with great ability, he relinquished the editorship in 1848, and in 1853 established a paper of similar character in Boston, "The Anglocorn," which he conducted for twenty years. It was subsequently published at Liverpool "The European," designed to furnish a weekly summary of foreign news for American circulation. In 1857 he became British consul in Baltimore.

BARTLETT, Joseph, adventurer, b. in Plymouth, Mass., 10 June, 1762; d. in Boston, 20 Oct., 1827. He was graduated at Harvard in 1782, and took the master's degree four years later. After studying law in Salem, Mass., he went to England. It is related that, while attending one of Gen. Burgoyne's plays, in which the former occupations of some American officers are ridiculed, Bartlett, rising from his seat, cried out, "Hurrah! Great Britain beaten by barbers, tailors, and tinkers!" This was taken in good earnest by the actor, and many of the young bloods of the day. Bartlett now gambled and spent his money until he brought up in a debtor's prison. He made money enough for his release by writing a play, and afterward, taking the name of Maitland, went upon the stage at Edinburgh. After this he embarked for the United States with a quantity of goods which he had bought on credit, and was shipwrecked on Cape Cod. In Boston he became a merchant, but failed, and then figured for a while as a captain of volunteers in Shays's rebellion without seeing any active service. He then opened a law office in Woburn, Mass., where, as an advertisement, he painted his house black and called it the "House of Shays." In 1822 Bartlett delivered a fourth-of-July oration at Boston, and recited a poem entitled "The New Vicar of Bray," which became celebrated. He next went to Maine, where he was sent to the legislature, and became a candidate for congress.
BARTLETT, Josiah, signer of the declaration of independence, b. in Amesbury, Mass., 21 Nov., 1729; d. in New Hampshire, 19 May, 1795. He received the rudiments of a classical education, and when only sixteen began the study of medicine with his relative, Dr. Ordway, of Amesbury. Young Bartlett worked so earnestly that he soon exhausted the scanty library of his instructor, and was obliged to have recourse to that of a neighboring clergyman. In 1740 he began to practise at Kingston, N. H. When prostrated by a fever in 1752 he was cured by treatment of his own, when that of the local physicians had failed, and, learning from this experience the value of freedom from the arbitrary rules in practice, he soon became eminent in his profession. During the prevalence of an alarming throat disease in 1754 he used Peruvian bark with great success, although this course was opposed to usage. Dr. Bartlett began to讲究 as a delegate to the legislature, an office which he filled annually until the revo-

cution, and at one time frequently opposed the royal policy; and Gov. Wentworth, hoping to gain his support, appointed him a magistrate, and later, in 1770, to the command of a militia regiment. He continued a zealous Whig, however, and in February, 1775, was deprived for this reason of both offices. In 1774 the loss of his house by fire compelled him to decline an election to the proposed general congress. In 1775, Gov. Wentworth having left the province, Dr. Bartlett became a member of the committee of safety, upon which for some time the government practically devolved, and in September of that year he accepted a commission as colonel of the 7th regiment. He was chosen to the continental congress on 23 Aug., 1775, and again on 23 Jan., 1776. He was the first to give his vote for the declaration of independence, and was the second to sign it. In June, 1776, he was appointed general naval agent, and resigned from congress soon after. New York recognized Bennington, engaged as agent of the state in providing the New Hampshire troops with medical supplies. In March, 1778, Dr. Bartlett was again elected to congress, and still again in the following August. In October he obtained leave of absence to attend to his private business, and from that time was prominent in state rather than national affairs. He became chief justice of the court of common pleas in 1779, master of troops in 1781, justice of the superior court in 1782, and chief justice in 1788. In the last-named year he was an active member of the state convention that adopted the federal constitution. In 1789 the death of his wife greatly depressed his spirits, and he declined an election to the U. S. senate, pleading his advanced age. He was, however, chosen in 1790 president of the last-named body, and in 1791 and 1792 by popular election. In 1793 he became the first governor of New Hampshire under the new state constitution, which office he held till 1794.

BARTLETT, Samuel Colcord, educator, b. in Salisbury, N. H., 25 Nov., 1817; d. in Hanover, N. H., 16 Nov., 1888. His early life was spent on a farm, where he worked hard. He was graduated in 1836 at Dartmouth, acting as a tutor in 1836-1837, and then studied at Andover theological seminary, graduating in 1842. He was ordained on 2 Aug., 1843, and was pastor of the Congregational church, Monson, Mass., until 1846, when he became professor of intellectual philosophy and rhetoric in Western Reserve College. In 1847-1851 he was in charge of the Franklin street church, Manchester, N. H., and from 1857 to 1859 pastor of the New England church in Chicago. Meanwhile, in 1858, he had become professor of biblical literature in Chicago theological seminary, where he continued until 1857, when he was elected president of Dartmouth college. He crossed to Palestine in 1874, with a view to comparing in detail all the circumstances and conditions of the region with the narrative of the journey of the children of Israel. Besides numerous articles in periodicals, orations at the centennial of the battle of Bennington, the quarterly celebration of Webster's death, and the dedication of the Webster statue at Concord, and at literary anniversaries, he has published "Life and Death Eternal, a Refutation of the Doctrine of Annihilation" (Boston, 1866; 2 ed., 1878); "Sketches of the Missions of the A. B. C. F. M." (1872); "Future Punishment" (1875); "From Egypt to Palestine, Observations on a Journey in the Holy Land" (1871); "Reminiscences of History in the Pentateuch" (1885). His son, Edwin Julius, b. in Hudson, Ohio, 16 Feb., 1851, was graduated at Lake Forest academy in 1868, and at Dartmouth in 1872, after which he studied at Rush medical college, receiving his degree in 1879. From 1879 till 1883 he was associate professor of chemistry in Dartmouth college, and in 1883 he became full professor.

BARTLETT, Washington Allen, California official, b. about 1820; d. in 1871. He was the first alcalde at San Francisco after the American conquest in 1846. He had been lieutenant on board one of the vessels of the American fleet, and was selected for his new office because of his knowledge of Spanish. His position was extremely difficult, but he succeeded in giving general satisfaction. During a revolt of the native Californians in the early months of 1847, he was captured by an irregular party and held for some time as prisoner. After his release he served once more for some years in the navy, and after 1855 lived in New York. In 1860 he crossed to St. Thomas, in 1863 to Oviedo, a rich Cuban, in 1859, and the ceremony was celebrated with such magnificence that it was popularly known as the "Diamond Wedding." Under this title a poem descriptive and satirical was written by Edmund C. Stedman, which had a
BARTLETT, William, philanthropist, b. in Newburyport, Mass., 31 Jan., 1785; d. there, 8 Feb., 1861. He had little education in youth, but his deficiencies in this respect were supplied by shrewdness and caution. Entering on a mercantile career, before the revolution, he succeeded, with economy, in amassing a fortune, which he largely spent in charity, and for the advancement of religion and morals. At the foundation of Andover Theological Seminary, in 1854, he endowed with $200,000 a professorship, and built a house for the use of the incumbent. He afterward built another professor's house, a hall, and a chapel, and paid the president's salary for five or six years. His gifts to this institution reached $500,000, and he also gave largely toward temperance work, missions, and the education of Negroes.

BARTLETT, William Francis, soldier, b. in Haverhill, Mass., 6 Jan., 1810; d. in Pittsfield, Mass., 17 Dec., 1876. Mr. Bartlett was a student at Harvard when the first call of the president came for troops in 1861. He at once left college, enlisted in the 4th battalion of Massachusetts volunteers, and learned his manual of arms and commands under Col. John Betton. Returning to college for a brief period, he was offered a captaincy in the 26th Massachusetts volunteers. In September the regiment was in camp in front of Washington, and on 21 Oct., the young captain was for the first time under fire at Bull's Bluff. His aptitude for military service was so evident that he was soon made a brigadier officer. In the spring of 1862 he was severely wounded at Yorktown, and suffered amputation of his leg. He recovered sufficiently to be present with his class when it graduated, and received a degree. In Sept., 1862, he accepted the duty of organizing the 98th Massachusetts volunteers recruiting at Pittsfield, and was soon made its colonel in spite of his physical disability. The regiment was ordered to Louisiana with Gen. Banks's expedition. Col. Bartlett was obliged, owing to the loss of his leg, to remain mounted whenever his regiment needed his presence, and exposed himself on all occasions with the most reckless daring. It is even said that the confiscate officers, in admiration of his bravery, would often come on the field to meet him. He was, nevertheless, twice wounded in the assault on Port Hudson, 27 May. Returning to the north, he organized the 57th Massachusetts volunteers in time to lead it in the Wilderness campaign, where he was again wounded. He was promoted brigadier-general, and was in the field again as soon as he could sit his horse, but, exposing himself with his usual recklessness, was taken prisoner after the explosion of the mine before Petersburg, 30 July, 1864. After several weeks of suffering in Libby prison and elsewhere, he was exchanged in September, placed in command of the 1st division of the 9th corps, and in 1865 was brevetted major-general. His military career is a record of unceasing devotion to duty, both in the field and at home. His wounds testified to his bravery, and the success with which he managed his men so long as he remained unhurt marked him as a born leader. After the war he engaged for a time in business with the Tredegar Iron Works at Richmond, Va., but eventually returned to the north, and married in 1870. He maintained his connection with the city of Pittsfield, Mass., in that city he engaged in business, and made his residence. In 1875 he won a sudden and deserved reputation as an orator by an address delivered at the battle-field of Lexington, on the centennial anniversary of the fight. See "Memoir of William Francis Bartlett," by F. W. Palfrey (Boston, 1878).
istinguished himself as a scholar. He also became known as a famous athlete, and represented his college in the contests against Cambridge. Later he became a member of parliament from Ely, and in 1856 was re-elected to parliament as a conserva-
tive and subsequently appointed to office in the admiralty under the Salisbury government.

BARTLETT, William Pitt Greenwood, mathematician, b. in Boston, Mass., 27 Oct., 1817; d. in Cambridge, Mass., 13 Jan., 1895. He was graduated at Harvard in 1838, and was one of the proctors of the college from 1837 to 1869. In 1858 he was elected president of the college, and in 1864 became president of the corps of computers for the "Nautical Almanac," and the character of his work is shown by the fact that, owing to the condition in which it was left at his death, another computer was able to take it up without the loss of any of Mr. Bartlett's labor. He published several papers on the elements of quaternions in the "American Journal of Science" and An autobiography in the "Memoirs of the American Academy."

BARTLEY, Elias Hudson, chemist, b. in Bartlettsville, N. J., 6 Dec., 1849. His early life was spent on a farm in Illinois, and after attending the high school in Princeton, Ill., he was graduated at Cornell in 1873. During 1874-1875 he was instructor in chemistry, and from 1876 to 1878 professor of chemistry at Swarthmore College. In the winter of 1877-1878 he lectured before the Franklin institute, Philadelphia, and in 1879 he removed to Brooklyn. He was graduated at Long Island college in 1879, and from 1880 till 1885 was lecturer on physiological and practical chemistry in that college. He became professor of chemistry and toxicology in 1882. He was appointed chief chemist to the health department, Brooklyn. He is also consulting sanitarian to the hospital for nervous diseases, and visiting physician to the sheltering arms nursery. Dr. Bartley is a member of numerous medical and other scientific societies, and president of the New York Society. He has contributed several articles to Wood's "Household Practice of Medicine" (New York, 1885), and is the author of "A Text-book of Medical Chemistry" (Philadelphia, 1885).

BARTLEY, Mordecai, governor of Ohio, b. in Fayette co., Pa., 16 Dec., 1783; d. in Mansfield, Ohio, 21 Oct., 1865. His father, church and school teacher, worked on his father's farm until 1809, when he moved to Ohio. In the war of 1812 he served in the northwest, under Gen. Harrison, as captain and adjutant. He settled in Richland co. in 1814, and remained there till 1834, when he removed to Mansfield and engaged in mercantile pursuits. Mr. Bartley was elected to the Ohio senate in 1817, and in 1818 was chosen, by the legislature, registrar of the land-office of Virginia military district school lands. He resigned his registrarship in 1823, having been elected member of congress, where he remained until 3 March, 1831. In 1844 he was elected governor of Ohio on the whig ticket. During the Mexican war, when the president issued his call for troops, Mr. Bartley, though opposed to the war, promptly responded, superintending their organization in person. In 1846 he retired to private life, declining a renomination. He remained a whig until the disruption of that party, and subsequently acted with the republicans.

BARTOL, Cyrus Augustus, clergyman, b. in Frederick co., Md., 8 Nov., 1818; d. at Bowdoin in 1883, and at Cambridge divinity school in 1853. In 1837 he was settled as colleague pastor with the Rev. Charles Lowell, D. D., of the West church (Unitarian) in Boston. He became sole pastor in 1861, and has been active in philanthropic movements. Dr. Bartol has published "Discourses on the Christian Spirit and Life" (Boston, 1858; 2d ed., revised, 1854); "Discourses on Christian Body and Form" (1854); "Pictures of Europe Framed in Ideas" (1855), a work combining graphic sketches with philosophical reflections; "History of the West Church and its Ministers" (1858); "Church and Congregation" (1858); "Word of the Spirit to the Church" (1859); "Radical Problems" (1872); "The Rising Faith" (1874); and "Theology of the Church" (1880). He has also published many occasional essays, and some poetry. Dr. Bartol's writings are full of rich and quaint imagery, and deeply religious, but more ethical and social than theological.

BARTOLACHE, José Ignacio (bar-ol-ah-
chay), Mexican mathematician, b. in Guanajuato, Mexico, 30 March, 1799; d. 9 June, 1860. Among his works are: "Lecceiones de Matemáticas," "Observaciones astronomicos del Paso de Venus por el Disco del Sol" (written by Bartolache and Alzate); and "Instrucción para la Curia de las Virtuas.

BARTON, Clara, philanthropist, b. in Oxford, Mass., about 1830. She is the daughter of Capt. Stephen Barton, and was educated in Clinton, Mass., and in 1848, Y. E., Early the same year, she founded a free school in Bordentown, N. J. When this was opened it was attended by only six pupils; but when Miss Barton left it the attendance numbered more than 600. She entered the patent office as a clerk in 1854, and remained there until the war began, when she determined to devote herself to the care of wounded soldiers on the battlefield. In 1864 she was appointed by Gen. Butler "lady in charge" of the hospitals at the front of the Army of the James. In 1865 she went to Andersonville, Ga., to identify and mark the graves of the union prisoners buried there, and in the same year was placed by President Lincoln in charge of the search for the missing men of the union armies. She lectured during the years 1866 and 1867 on her war experiences, and afterward went to Switzerland for her health. At the beginning of the Franco-German war, in 1870, she assisted the grand duchess of Baden in the preparation of military hospitals, and gave the red cross society much aid during the war. At the joint request of the German authorities and the St. Louis "Comité de Secours," shesuperintended the supplying of work to the poor of that city in 1871, after the siege, and in 1872 had charge of the public distribution of supplies to the destitute people of Paris. At the close of the war she was decorated with the golden cross of Baden and the iron cross of Germany. In 1881, on the organization of the American Red Cross society, she became president. The treaty granting protection to red cross agents was signed 16 March, 1882. The American society is modelled after its European namesake, and its object is stated by the constitution to be "to organize a system of national relief,
and apply the same in mitigating suffering caused by war, pestilence, famine, and other calamities."

In 1834, as official head of the society, Miss Barton had charge of the expedition for the relief of the sufferers from the flood in the Ohio and Mississippi rivers, and in the same year she was the representative of the government at the University conference in Geneva, Switzerland. In 1883 Gov. Butler appointed her superintendent, treasurer, and steward of the reformatory prison for women at Sherborn, Mass. Miss Barton was also delegate to the international peace convention at Geneva in 1884, and was special commissioner for foreign exhibits at the World's Fair in St. Louis in 1893. At the request of the senate committee on foreign relations, she prepared a "History of the Red Cross," which was published at the government printing-office, Washington.

BARTON, David, senator, b. about 1785; d. near Booneville, Mo., 28 Sept., 1837. Of his early age nothing is known, except that he went from Waukesha, Wis., to the earliest grants to the territory of Missouri. He was president of the convention that met 10 July, 1820, to frame the state constitution of Missouri. He was U. S. senator from Missouri in 1821-31, serving as chairman of the committee on public lands.

BARTON, Thomas, clergyman, b. in county Meath, Ireland, May 25, 1780. His family was of English descent, who, having obtained extensive grants of land in Ireland, settled there during the commonwealth. Mr. Barton was graduated at the University of Dublin, and in 1751 settled in Philadelphia and became tutor in the academy, afterward the College of Physicians and Surgeons! of that city. In 1754 he went to England, and was there ordained in the established church. He returned to America the next year, and was for nearly twenty years rector of St. James church, Lancaster, Pa. His death occurred in New York, where he had returned on account of his unwillingness to take the oath of allegiance, and he was interred in the chancel of St. George's chapel in that city. He married the sister of the celebrated mathematician and astronomer, David Rittenhouse. - His son, Benjamin Smith, physician, b. in Lancaster, Pa., 10 Feb., 1766; d. in Philadelphia, Pa., 19 Dec., 1815. After a course of general studies under Dr. Andrew K. Yorke, he followed the instruction given at the Philadelphia college in that University of Pennsylvania. Then during 1786-8 he studied medicine and the natural sciences in Edinburgh and London, and received his medical degree from the University of Göttingen, Germany. On his return he settled in Philadelphia, where he soon acquired an extensive and lucrative practice. In 1789 he was appointed professor of natural history and botany, and in 1795 of materia medica in the College of Philadelphia. In 1813 he succeeded Dr. Benjamin Rush as professor of the theory and practice of medicine in the University of Pennsylvania. He was elected president of the Philadelphia Medical Society in 1809, and was some time vice-president of the American Philosophical Society, and also a member of many other American and European societies. He contributed numerous papers to the "Transactions of the American Philosophical Society," and to the "Medical and Physical Journal," which was published by him. His most important works are: "Observations on Some Part of Virginia" (1796); "New Views on the Origin of the Tribes of America" (1797); "Elements of Botany" (Philadelphia, 1803; 2d ed., 1812-14); an edition of Culeny's "Materia Medica," "Eulogy on Dr. Priestley," "Discourse on the Principal Desiderata of Natural History" (Philadelphia, 1807); and "Collections toward a Materia Medica of the United States" (3d ed., Philadelphia, 1810). See "Biography of Benjamin F. Barton," by his nephew, W. P. C. Barton (Philadelphia, 1815). - Thomas Pennington, son of Benjamin Smith, b. in Philadelphia in 1803; d. there, 5 April, 1869. He married in 1833 Cora, daughter of Edward Livingston, and in June of that year was appointed secretary of legation at Paris. He was a man of cultivated literary taste, and gathered a Shakespearean library of great value, containing forming, with about 10,000 miscellaneous books, one of the most important private collections in America. He provided by will that this should be sold after his death to some institution that could prevent its dispersion. His widow carried out his wishes in a liberal spirit, and the collection was acquired by the public library of Boston, which has set apart a special room for its accommodation. A catalogue of the Shakespearean has been issued, and is one in preparation of the whole collection, prefaced by a memoir of Mr. Barton. - William Paul Crillon, nephew of Thomas Pennant, botanist, b. in Philadelphia, Pa., 17 Nov., 1786; d. there, 29 Feb., 1856. He was graduated at Princeton in 1806. While there he was introduced to the name of some celebrated man; that which he took was Count Paul Crillon, and the initials P. C. were retained by him through life. He studied medicine at the University of Pennsylvania under the direction of his uncle, Dr. Benjamin Smith Barton, and received his degree in 1808. His thesis was on the "Vegetable History of St. Augustine's Hospital," a work of publication, and for many years was accepted as the standard treatise on that subject. After practising medicine in Philadelphia, he became surgeon to the Pennsylvania hospital, and soon afterward he was appointed surgeon in the navy. The U. S. naval bureau of medicine and surgery was organized by him, and he was the first chief of that bureau. He was stationed at various places on shore, several times at the Philadelphia navy-yard, and he also saw a great deal of sea duty. At the time of his death he was senior surgeon of the navy. On the death of his uncle, Dr. B. S. Barton, he became professor of botany at the University of Pennsylvania, and was for several years professor of materia medica and botany at the Jefferson Medical College. Dr. Barton was a fellow of the college of physicians in Philadelphia, president of the Linnean society, and a member of the American philosophical society, and other scientific societies. His published works include: "The Influence of a Change in Climate in curing Consumption," 2d ed., 1823; "Flora Philadelphica" (2 vols., 1815); "Flora Philadelphica Prodrumns" (1815); "Vegetable Matter Medica of the United States" (2 vols., 1817-18); "Plans for Marine Hospitals in the United States" (1817); "Compendium Flora Philadelphica" (2 vols., 1818); "Flora of North America" (2 vols., 1821-23); "Outlines of Lectures on Materia Medica and Botany" (2 vols., 1828); "Letter to the Trustees of the University of Pennsylvania relative to introducing the Professorship of Botany into the Medical Faculty" (1825); "Hints to Naval Officers cruising in the West Indies" (1830); and "Medical Botany" (2 vols.).
ing at his trade, that of a hatter. On hearing of the battle of Bunker Hill, he shouldered a musket and joined the army. In 1777 he conceived the exploit that made him famous, that of capturing the British general, Robert Prescott, who had made himself offensive to the Rhode Island whigs by his overbearing conduct. On the night of 10 July, with thirty-eight men in four whale-boats, Barton crossed Narragansett bay, passed unobserved three British frigates, and, landing about half way between Newport and Bristol ferry, went to the farmer's house, over the engraving, where Prescott had his headquarters. The guards were surprised, the door of Prescott's room was broken in by a negro in the party, who used his head as a battering-ram, and the general was hurried away half dressed and taken to Warwick point, and afterward to Warwick, New York. For this exploit congress gave Barton a sword, and he was brevetted colonel. He was very proud of his deed, and it is said that at the retreat of the British from Warren, in 1778, he called after one of the enemy's officers, challenging him to single combat, and announcing himself as "the man who took Prescott." During this same retreat Barton was wounded and disabled for some time. He was afterward a member of the state convention that adopted the federal constitution. Some time later Barton's right to a piece of land in Vermont was contested, and, as he refused to pay a judgment, he was detained in Danville, Vt., for fourteen years. Lafayette, on his visit in 1835, paid the claim without the usual Barton's knowledge and set him free. It is said by some writers that the land in question was granted to Barton by congress; but Mrs. Catharine R. Williams, in her life of Barton ("Biographies of Revolutionary Heroes," Providence, 1839, says that he purchased it.

BARTRAM, John, botanist, b. near Darby, Pa., 23 March, 1699; d. at Kingsessing, Pa., 22 Sept., 1777. He acquired a knowledge of medicine and surgery, became interested in the study of plants, and was finally cited by Linnaeus as the greatest natural botanist in the world. In 1728 he founded the first botanical garden in the United States, at Kingsessing, on the banks of the Schuylkill, not far from Philadelphia. His enthusiasm for collecting led him to make numerous excursions through the then little explored regions of North America. In 1743 he visited the shores of Lake Ontario, and wrote "Observations on the Inhabitants, Climate, Soil, Rivers, Productions, Animals, and other Matters Worthy of Notice, made by Mr. John Bartram during his Travels from Pennslyvania to Onondaga, Oswego, and the Lake Ontario, in Canada" (London, 1751). During the winter of 1765-6 he visited East Florida, and an account of this trip was published with his journal (London, 1766). He made extensive collections, and sent specimens of new and curious American plants to foreign botanists, who in return supplied him with books and apparatus. He secured the appointment of American botanist to George III., and was a member of the foreign scientific societies, as well as a contributor of papers to the "Philosophical Transactions," London. See "Memoirs of John Bartram," by William Bartram. See "Memoirs of John Bartram and Humphry Marshall," by William Darlington (Philadelphia, 1849).—His son, William, botanist, b. in Kingsessing, Pa., 9 Feb., 1739; d. there, 22 July, 1823. He removed to North Carolina and there became engaged in business. This he abandoned before reaching the age of thirty, and, accompanying his father to Florida, settled on the banks of St. John's river, where for several years he cultivated indigo. In 1771 he returned to the botanical gardens, and subsequently devoted his attention almost entirely to botany. From 1773 till 1778 he travelled extensively through the southern states, in order to examine the natural products of the country. An account of his experiences, under the title of "Travels through North and South Carolina, Georgia, East and West Florida, the Cherokee Country, the extensive Territories of the Miccosuckees, Creeks, and Choctaws," was published (Philadelphia, 1791, and London, 1792-4). In 1782 he was elected professor of botany in the University of Pennsylvania, but declined the place on account of his health. In 1786 he became a member of the American philosophical society, and he was also connected with other scientific bodies. Mr. Bartram was the author of "Anecdotes of a Crow," "Description of Certisia," and "Memoirs of John Bartram." In 1789 he wrote "Observations on the Creek and Cherokee Indians," which was published in 1851 ("Transactions American Ethnological Society," vol. iii.). He drew the illustrations in Barton's "Elements of Botany," and many of the most curious and beautiful plants of North America were illustrated and first made known by him. He also published the most complete list of American birds previous to Alexander Wilson, whom he greatly assisted at the outset of his career. The engraving shows the Bartram homestead, on the Schuylkill.

BASCOM, Henry Bidleman, M. E., bishop, b. in Hancock, Delaware co., N. Y., 27 May, 1796; d. in Louisville, Ky., 8 Sept., 1850. He was descended from a Huguenot family. He had but little education, but before the age of eighteen he was licensed to preach, and admitted to the Ohio conference, where he did hard work on the frontier preaching over one year, 400 times, and receiving a salary of $12.10. His style being too florid to suit the taste of those to whom he preached, he was transferred, in 1816, to Tennessee; but, after filling appointments there and in Kentucky, he returned to Ohio in 1822, and in 1823 Henry Clay obtained
for him the appointment of chaplain to congress. At the close of the session of that body he visited Baltimore, where his oratorial power made a great sensation. He was first president of Madison college, and librarian from 1832 to 1855, when he resigned, and was principal of the college from 1855 to 1887. He was a member of the general conference of 1844, which suspended Bishop Andrew because he refused to manumit his slaves; and the protest of the southern members against the action of the majority was drawn up by him. In 1845 he was a member of the Louisville convention, which organized the Methodist Church South, and was that church at North Pannell, Ala., from 1856 to 1864. In 1846 he became editor of the "Southern Methodist Quarterly Review," and in 1849 he was chosen bishop, being ordained in May, 1850, only a few months before his death. Dr. Bascom was a powerful and effective prelate, with strong personal force and rather extravagant metaphors. He published the following works: "Sermons from the Pulpit," "Lectures on Indulgence," "Lectures on Moral and Mental Science," and "Methodism and Slavery." A posthumous edition of his works was edited by Rev. T. N. Ralston (Nashville, Tenn., 1850 and 1856). See "Life of Bishop Bascom," by Rev. Dr. M. M. Henkle (Nashville, 1853).

**BASCOM, John**, educator, b. in Genoa, N. Y., 1 May, 1827. He was graduated at Williams in 1849, and at Andover theological seminary in 1855. He was a tutor in Williams college from 1852 to 1853, and from 1855 to 1874 held the professorship of rhetoric there, also acting as pastor of the church at North Pannell, Ala., from 1856 to 1864. In 1874 he became president of the university of Wisconsin, holding also the professorship of mental and moral philosophy, and on 23 June, 1886, handed in his resignation, to take effect at the end of the college year in 1887. Dr. Bascom has contributed much to periodical literature, and is the author of the following works: "Political Economy" (New York, 1859); "Aesthetics" (1862); "Philosophy of Rhetoric" (1863); "Principles of Psychology" (1869); "Science, Philosophy, and Religion" (1871); "Philosophy and English Literature" (1874); "A Philosophy of Religion" (1876); "Comparative Psychology" (1878); "Ethics" (1879); "Natural Theology" (1880); "Science of Mind" (1881); "The Words of Christ" (1884); "Problems in Philosophy" (1885).

**BASHFORD, Coles**, governor of Wisconsin, b. near Cold Spring, Putnam co., N. Y., 24 Jan., 1816; d. 25 April, 1878. He was educated at the Wesleyan seminary (now Genesee college), Lima, N. Y., and at the university of Michigan; and was admitted to the bar in 1841. He was elected district attorney for Wayne co., in 1847, and in 1850 resigned and removed to Oshkosh, Wis. He was a member of the whig state convention in 1854, and in 1852 was chosen for the state senate, from which he resigned in 1855. He was the first republican governor of the state, serving from 1858 to 1862, and declining a renomination. He practised law in Oshkosh till 1863, when he removed to Tucson, Arizona. He was attorney-general of the territory from 1864 till 1867, president of the first territorial convention, and in 1866 was elected delegate to congress, serving from March, 1867, to March, 1869. He was appointed secretary of the territory in 1869, and served till 1876, when he resigned, and resumed the practice of his profession.

**BASHFORD, Ebenzer Don Carlos**, diplomatist, b. in Litchfield, Conn., in 1853. He was educated at the Connecticut normal school, and served for fourteen years as a teacher in Philadelphia. He was U. S. minister to Haiti (1889-92), and since 1899 has been Haytian consul in New York city.

**BASSETT, James**, missionary, b. near Hamilton, Canada, 31 Jan., 1834. He was graduated at Willamette in 1856, and at Lane theological seminary in 1859. He served as chaplain in the U. S. volunteer army in 1862-3. From 1863 until 1871 Mr. Bassfield pastored the Presbyterian churches of Newark, N. Y., and Whitefield, Pa., and in 1871 became a missionary for the Presbyterian board. He travelled extensively in Europe, passed many years in Turkey and Persia, and was the first American to settle in Teheran, and the first known to have travelled as far east as the alleged tomb of Haroun-al-Raschid at Mashhad. As a pioneer of missionary work, he gained a wide acquaintance with the manners and customs of central and eastern Persia. He is the author of "Hymns in Persian" (Teheran, 1875 and 1884); "A Grammatical Note on the Simunni Dialects of the Persians," from the "Journal of the Royal Asiatic Society" (London, 1884); "Among the Tartars" ("Leisure Hour," London, 1879-80); "Note of his Observations" (New York, 1880); and a translation of the gospel according to Matthew into Gaghatti Tartar (London, 1880).
John Adams; from 1798 till 1801 he was governor of his state. In 1801 and 1802 he was a U. S. circuit court judge, and he began practice in the law, eventually becoming the judge of James A. Bayard, signer of the treaty of Ghent. BASSINI, Carlo, musician, b. in Cuneo, Piedmont, Italy, in 1812; d. in Irvington, N. J., 26 Nov., 1870. His parents being musicians, he was placed at an early age under the best masters in training for a violinist, and in his twentieth year had already attained a great distinction as an instrumentalist. Soon afterward he went with a Geneoese operatic company to South America, and was elected director of the troupe shortly after their arrival abroad. With the money earned in South America he came to New York city and undertook to give a concert, which proved a failure and exhausted his resources. In this dilemma he set about giving lessons in vocal music, thereby relinquishing his prospects as a brilliant orchestral leader. For years he worked untiringly, often beginning at seven in the morning and working until ten at night. He had not a rich voice, but was an admirable trainer. Among his works are: "Art of Singing" (Boston, 1857); "Melodic Exercises" (1858); "Cone of Art" (1860); "Method for the Baritone" (1868); and New Method "(1869). Some of the best of his compositions are "A te Accanto," a love song, dedicated to his wife shortly before his marriage; "O Salutaris," a prayer for a soprano voice, and "There is Light in the Sky," composed shortly before his death.

BASTIDE, John Henry, British soldier, b. about 1710. He was employed as chief engineer in Nova Scotia and Newfoundland in 1742, and in April, 1745, Massachusetts granted him £140 for services in the repair and construction of the forts in that province, particularly Castle William and Governor's island in Boston harbor, Marblehead, Cape Ann, and Falmouth (now Portland, Me.). He superintended the construction of roads and bridges, the fortifications of the towns, the planning and the means for the capture of Louisburg in 1745, and were acknowledged by Gov. Shirley, of Massachusetts, in a message to the house of representatives. He was afterward employed in the reduction of Canada from 1756 to 1760, and in 1761-2 fortified the harbor of Halifax and improved its dockyard. He had been the most prominent general in the British army, 3 April, 1770.

BATCHELDER, John Putnam, physician, b. in Wilton, N. H., 6 Aug., 1784; d. in New York city, 8 April, 1868. He was a great-nephew of Gen. Israel Putnam. After an academical education, he began the study of medicine, and in 1807 was licensed to practice. He did not receive the degree of M. D., however, until 1815, after attendance on the lectures of Harvard medical school. He then began practice in New York, and in 1817 was appointed professor of anatomy in Castleton college, Vt., and in 1817, and soon afterward professor of surgical anatomy in the Berkshire medical institution at Pittsfield. He was a successful surgeon, and performed many operations of great importance, and requiring extraordinary skill and daring. For many years he made the treatment of diseases of the eye a specialty. He was president of the Academy of Medicine, and of the New York medical association in 1855. He published "Thoughts on the Connection of Life, Mind, and Matter" (Utica, N. Y., 1842), he was the author of "Responsibilities of the North in Relation to Slavery " (Cambridge, 1856), and "Introduction and Early Progress of the Cotton Manufacture in the United States" (Boston, 1863). A sketch of his life was published in pamphlet form (Lowell, 1886).

BATEMAN, Ephraim, U. S. senator, b. in Charlestown, Cumberland, N. J., in 1770; d. there, 29 Jan., 1829. After receiving a public-school education he became a mechanic's apprentice, but leaving his employment, studied medicine, and afterward was noted in his profession. He was for many years a member of the state legislature, and was elected to congress as a democrat. He was three re-elected, serving altogether from 4 Dec., 1815, to 3 March, 1823, and was a member of the committees on post-offices and accounts. In 1826, as president of the council of the state legislature, he gave the casting vote that elected him to the U. S. senate over Theodore Frelinghynsen. A committee of the senate afterward reported that this action was perfectly legal, and he remained in the senate until he resigned in January, 1829.
BATEMAN, Kate Josephine, actress, b. in Baltimore, Md., 7 Oct., 1822. Her father, H. L. Bateman, was a bank director, manager of the Tennessee and Ohio Canal, and her mother, Frances, an actress, manager, and the author of several dramas. Kate and her sister Ellen (Mrs. Greppon) were educated for the stage from childhood. The two girls made their first appearance, when Kate was only three years old, at Louisville, Ky., in "The Babes in the Wood," and for ten years played together as "The Bateman Children." Miss Bateman retired from the stage in 1856, but reappeared on 19 March, 1860, as Evangeline in her mother's drama of that name at Winter Garden, New York. In December, 1862, she appeared in Boston as Leah, a part in which she has made her reputation, and which she played in all the large cities of the United States and, with one exception, her first appearance abroad was made on 1 Oct., 1863, at the Adelphi theatre, London, where "Leah" had a run of 211 nights. After a provincial tour and a reappearance at the Adelphi as Julia in the "Hunchback," Miss Bateman took a farewell of the English public at her Majesty's theatre, in the character of Juliet, 22 Dec., 1869. In October, 1874, she returned to New York for a short engagement at the "London News." She returned to the stage in 1868, and in 1872 made a success in "Medea." In March, 1875, Miss Bateman's father, who had been for some years manager of the Lyceum theatre, died, and her mother continued the management, opening the season with a revival of "Macbeth," in which Miss Bateman and Henry Irving took the principal parts. In April, 1876, she took the title role in Tennyson's "Queen Mary," which, though an artistic success, proved a failure financially. Some time after this Miss Bateman became lessee of the Sadler's Wells theatre. Her sisters, Isabel and Virginia Frances, are also actresses.—Isabel, who was born in Louisville, was graduated in 1854, and educated in England, appeared on the stage in Liverpool when fifteen years of age, and has played Juliet, Lady Tenzle, Portia, and Pauline.

BATEMAN, Newton, educator, b. in Fairfield, N. J., 27 July, 1822; d. in Galesburg, Ill., 22 Oct., 1857, was graduated at Illinois college, Jacksonville, Ill., in 1843, and while studying for a time in Boston theological seminary, he travelled extensively in the United States and then became principal of a St. Louis school. He was professor of mathematics at St. Charles college, Missouri, from 1847 to 1851, and then became the head of the Jacksonville, Ill., public free school, acting at the same time as Superintendent of the city schools and commissioner for the county. In 1858 he was principal of the Jacksonville female academy, and in the same year was chosen state Superintendent of public instruction. Here he served altogether ten years, publishing five valuable reports and being active in establishing the state normal university. He had charge of the correspondence of the state provost-marshal general, a position he maintained for the remainder of his life as state Superintendent. In 1875 he became president of Knox college, Galesburg, Ill., Dr. Bateman was a member of the state board of health for more than twenty years, and he served three terms as its president.

BATES, Arlo, author, b. in East Machias, Me., 16 Nov., 1858. He was graduated at Bowdoin in 1876, after which he removed to Boston and engaged in literary work. In January, 1878, he became secretary of the young men's republican committee, of Massachusetts, and editor of the "Broadside," a paper devoted to civil-service reform. In August, 1884, he became editor of the Boston "Sunday Courier." Besides numerous magazine articles he has published "Patty's Perversities" (Boston, 1881); "F. Seymour Hayden and Engraving" (a valuable contribution in the "American Architect") and "The Gorgias" (New York, 1884); "A Wheel of Fire" (1885); "Old Salem," edited (Boston, 1886); and "Berries of the Briar," poems (1886).

BATES, Barnabas, postoffice reformer, b. in Edenton, England, in 1783; d. in Boston, 11 Oct., 1853. While yet a child he came to the United States, and became a Baptist preacher in Rhode Island, where he was also for some time collector of the port of Bristol under President Adams. He became a Unitarian, and established in New York in 1825 a weekly paper called the "Christian Inquirer." During the administration of President Jackson he received an appointment in the New State, and became a Baptist preacher in Rhode Island, where he became interested in the cheapening of letter postage, and advocated it in every way for many years, first investigating the subject thoroughly and then writing and speaking on it continually. He finally succeeded in reducing the rate of land postage, and at the time of his death was laboring for a corresponding reduction in regular mail.

BATES, Charlotte Fiske, author, b. in New York city, 30 Nov., 1828. Her father died in her infancy, and after 1847 she lived in Cambridge, Mass. Miss Bates was educated in the public schools of that city, began to write poetry early in life, contributing to "Young Folks" and other magazines, and published a volume of collected verses, entitled "Risk, and other Poems" (Boston, 1879). She edited the "Longfellow Birth-day-Book" and "The Seven Voices of Sympathy" (1881), compilations of Longfellow's prose and poetry, and the "Cambridge Book of Poetry and Song" (1882), a volume of poetical selections from the best English and American authors. She also wrote some prose, which has not yet been published in a collected form. Miss Bates assisted Longfellow in compiling his "Poems of Places," making ten translations expressly for the work. In 1891 she married Adolphe Rogé, who died in 1896.

BATES, David, author, b. in Philadelphia, Pa., and 1st Oct., 1812, was the author of numerous meritorious poems, many of which were published in book form under the title "The Eolian" (Philadelphia, 1848). He was the author of the well-known poem "Speak Gently," about which, shortly after its publication, there was a notable controversy and counter-claims as to its authorship. "Childhood is another of his best-known pieces. A complete edition of his poems was edited by his son (Philadelphia, 1870).

BATES, David Stanhope, engineer, b. near Morristown, N. J., 10 June, 1777; d. in Rochester, N. Y., 28 Nov., 1839. He was the son of a revolution-ary officer, and was trained under the tuition of Dr. Witherspoon, being intended for the ministry. He became a clerk, then agent for the Scotchman George Scriba, proprietor of the settlement at Rotterdam, in Oneida co., N. Y., afterward superintendent of the iron-mills established there by eastern capitalists, judge of common pleas of Oneida co., and in 1819-24 was assistant engineer on the middle division of the New canal. The first aqueduct was under his superintendence, N. Y., was designed and superintended by him, though the red sandstone of which it was built was adopted contrary to the advice of all the engineers, who recommended limestone, the material of the present structure, which was erected after the first aqueduct had been carried away. He was afterward employed by the state of Ohio to survey
route for a canal from Lake Erie to the Ohio river, and was made principal engineer of the canal system of Ohio, holding that office from 1825 till 1829. At the same time he surveyed the Louisville and Portland canal. In 1829 he was appointed chief engineer of the surveys and location of the Chenango canal from Utica to Binghamton, and in 1830 was commissioned to survey the route of the Genesee valley canal. The line of the Auburn and Rochester railroad, afterward a part of the New York Central, was surveyed by him in 1830. For the next four years he was engaged in surveys with reference to utilizing the water-power of Niagara river, and in 1834 he was engaged to make surveys for the Erie and Kalamazoo railroad in Michigan, but in 1835 returned to his home in Rochester with broken health.

BATES, Edward, statesman, b. in Belmont, Goochland co., Va., 4 Sept., 1793; d. in St. Louis, Mo., 25 March, 1869. He was of Quaker descent, and received most of his education at Charlotte Hall, Maryland, finishing under the care of a private tutor. In 1812 he received a midshipman's warrant, and was only prevented from going to sea by his mother's influence. From Feb. till October, 1813, he served in the Virginia militia at Norfolk. His elder brother, Frederick Bates, having been appointed secretary of the new territory of Missouri, Edward emigrated thither in 1814, and soon entered upon the practice of law. As early as 1816 he was appointed prosecuting attorney for the St. Louis circuit, and in 1820 was elected a delegate to the state constitutional convention. Toward the close of the same year he was appointed attorney-general of the new state of Missouri, which office he held for two years. He was elected to the legislature in 1822, and in 1824 became state attorney for the Missouri district. About this time he became the political friend of Henry Clay. In 1826, while yet quite a young man, he was elected a representative in congress as an anti-democratic, and served in that capacity for one term. For the next twenty-five years he devoted himself to his profession, but served in the legislature again in 1830 and 1834. In 1847 Mr. Bates was a delegate to the convention for internal improvement, held in Chicago, and there made a favorable impression upon the country at large. In 1850 President Fillmore offered him the position of secretary of war, which he declined. Three years later he accepted the office of judge of the St. Louis land court. In 1856 he presided over the whig convention held in Baltimore. When the question of the repeal of the Missouri compromise was agitated, he earnestly opposed it, and thus became identified with the "free-labor" party in Missouri, opposing with them the admission of Kansas under the Lecompton constitution. Mr. Bates became more and more prominent as an anti-slavery man, until in 1859 he was mentioned as a candidate for the presidential chair. Several addresses were publicly read in his favor, and he was also supported by his own state, and for a time it seemed that the opposition to Gov. Seward might concentrate upon him. In the National republican convention of 1860 he received 48 votes on the 1st ballot; but when it became apparent that Mr. Lincoln was the favorite, he withdrew, and Mr. Bates, after his election, decided upon selecting for his cabinet the leading men of the republican party, including those who had been his principal competitors. Mr. Bates was appointed attorney-general. In the cabinet he played a dignified, safe, and faithful, but not conspicuous, part. In 1863 he resigned on the advice of Mr. Lincoln, and returned home in St. Louis. From this time he never again entered into active politics.—His brother, Frederick Bates, was appointed by President Jefferson, in 1805, first U. S. judge for the territory of Michigan, was afterward secretary of the territory of Missouri, and was governor of the state from 1824 to 1826. BATES, Henry, editor and English naturalist, b. in Leicester, England, 8 Feb., 1824. He was educated for a commercial career at private schools in Leicestershire, and in May, 1848, undertook, in company with Alfred R. Wallace, a natural history exploration of the valley of the Amazonas. Mr. Wallace left in 1852, but Mr. Bates remained and explored the upper Amazonas until June, 1859. In a paper read to the Linnean society on 21 Nov., 1861, he described the phenomena of "minutest resemblances" in animals, and suggested an explanation. This was printed in the transactions of the society (vol. xxiii., p. 435). He has been assistant secretary of the Royal Geographical Society, London, since April, 1864, and has edited the journal and proceedings of that society. In 1863, he was a fellow of the Royal Society in 1881. Mr. Bates has published "The Naturalist on the River Amazonas" (London, 1863); "Illustrated Travels" (6 vols., London, 1866-72); "The German Arctic Expedition of 1868-70" (English translation, London, 1874); "Central America, West Indies, and other works on natural history and geography.

BATES, Isaac Chapman, statesman, b. in Granville, Mass., 14 May, 1789; d. in Washington, D. C., 16 March, 1845. He was graduated at Yale in 1802, studied law, and practised in Northampton, Mass. While here he was a member at different times of the executive council of the state, and of both branches of the legislature. He was chosen to congress as an anti-Jackson man, and was re-elected three times, serving altogether from 3 Dec., 1827, till 3 March, 1835. In 1836 and 1840 he was a presidential elector, and in January, 1841, he was elected to the senate to fill the vacancy caused by the resignation of Gov. John Davis, where he remained until his death, filling the place of chairman of the committee of pensions. A few days before his death he made an able speech, opposing the admission of Texas to the union. Throughout his public life he was a champion of the protective system, and in February, 1843, made a defence of it in the senate. He published several addresses and speeches.—His son, Isaac Chapman, b. 22 Oct., 1817; d. 24 Sept., 1875, was a prominent Boston merchant, and secretary of the board of trade.

BATES, Joshua, educator, b. in Cohasset, Mass., 20 March, 1776; d. in Dudley, Mass., 14 Jan., 1864. His father was a farmer and storekeeper, and Bates's early life was spent on the farm and as
clerk in the store. He had little regular schooling, but, with the assistance of the Congregational minister in his native town, prepared himself for Harvard, entering as a sophomore in 1739. At college, although a born orator, and having made a high figure in his classes, he took a high stand and was graduated with honor in 1806. He then became a teacher in Phillips Andover academy, studying theology meanwhile with the Rev. Jonathan French. On 16 March, 1803, he was ordained pastor of the church at Dedham, Mass. Early in his ministry here he began, in the Rev. John Colman, who had become involved in difficulty for refusing to exchange pulpit with clergyman of liberal views. In March, 1818, he accepted the presidency of Middlebury college, Vt., and in the same year he received the degree of S. T. D. from Yale. He resigned on action with their most complicated affairs. When twenty-one years of age he entered into partnership with a Mr. Beckford, but, on account of the war of 1812, he was unsuccessful, and returned to the Grays, who sent him to Europe as their agent. Here he developed into intimate relations with the Hopes and Barings and other great commercial houses retained by his control of Mr. Grays affairs throughout Europe. After years of peace, these houses became impressed with his business abilities. In 1826 he formed a partnership in London with John Baring, and two years later they both were received into the firm of Baring Brothers & Co., of which Mr. Bates in due time became senior partner. In 1851, when a joint commission was appointed to make a final settlement of claims between citizens of Great Britain and the United States, arising from the war of 1812, Mr. Bates was appointed umpire between the British and American commissioners in all cases where they could not agree. The justice of his numerous decisions has never been called in question. In 1888, when making measures for the establishment of a free public library, he immediately offered $50,000 toward such a library, on the sole condition that the interest of the money should be spent in the purchase of books of permanent value and authority, and that the city should always provide comfortable accommodations for its use day and night by at least one hundred readers. He afterward gave to the library about 30,000 volumes, raising the value of the entire gift to fully $100,000. The day of his death the large hall of the library was called, in his honor, Bates Hall. His interest in his native country continued to the close of his life, and during the civil war his sympathies with the government were freely manifested. See "Memorial of Joshua Bates," (Boston, 1804); "Joshua Bates," (Philadelphia, 1817); "Lives of the Governors of Pennsylvania" (1873); "Battle of Gettysburg" (1878); "Life of Gen. O. B. Knowles" (1878); and "Battle of Chancellorsville" (1883).

BATES, Martin, senator, b. in Salisbury, Litchfield co., Conn., 24 Feb., 1757; d. in Dover, Del., 1 Jan., 1869. He was educated for a physician, and taught school for a time, but afterward studied law and removed to Dover, where he practised in Dover. He served several terms in the legislature, and was a member of the state constitutional convention of 1850. After the death of John M. Clayton he was chosen to the U. S. Senate as a democrit, and served from 6 Dec., 1858, until 3 March, 1859, acting as a member of the committee of ways and means.

BATES, Samuel Penniman, educator, b. in Mendon, Worcester co., Mass., 29 Jan., 1827. He taught school in Milford, Mass., when only sixteen years of age, was graduated at Brown in 1851, and, after acting for a time as tutor in a private family, became, in 1852, principal of the Meadville, Pa., academy. Here he organized, in 1853, the Meadville Teachers Seminary, and in 1855, the Meadville University, on the theory and practice of teaching, which was continued until 1857, and gave the first impulse toward establishing normal schools in that part of the state. In the latter year he was chosen superintendent of schools in Crawford co., Pa., and in 1860 became deputy state superintendent. While he held this office, he gave the delicate task of visiting the colleges of the state and reporting on their condition. His reports appeared in the journals of the day, but have not been published in book form. In 1866 he was appointed by Gov. Curtin state historian of Pennsylvania. His publications include "Lectures on Moral and Mental Culture" (New York, 1850); "Literary Education," an address before the National Teachers Association (1861); "History of Pennsylvania Volunteers" (5 vols., 1866-73); "Lives of the Governors of Pennsylvania" (1873); "Battle of Gettysburg" (1878); "Life of Gen. O. B. Knowles" (1878); and "Battle of Chancellorsville" (1883).
tained a long struggle against the conservatives, until an arrangement was effected, in January, 1872, by which he left the executive power in the hands of the president of the Uruguayan senate.

**BAUTISTA, Joseph, eldest son of Bautista de Sierra, was born in New- York, Oct. 14, 1814: d. in camp, 7 Jan., 1862. He was graduated at Alleghany college in 1840, and licensed as a Methodist preacher in 1842. From 1843 to 1851 he was principal of the academy at Clarksburg, Va. During this time he was, in 1847, ordained deacon, and in 1849 elder, in the Methodist church. As such he occupied most of his time from 1851 to 1869, and was a member of the general conference of 1856 and 1860. His influence in western Virginia was very great, and at the beginning of the civil war in 1861 he was appointed an official visitor to the military camps. The needs of the time demanding attention to the political situation, he became a member of the convention that met 24 Nov., 1861, and framed the constitution of the new state of West Virginia. To him, more largely probably than to any other man, was due the abolition of slavery in that region. In Nov., 1861, he was chosen chaplain of the 1st Virginia regiment, and so continued till his death of typhoid fever at Staunton, Va., in October, 1862.**

**BATTERSHALL, Jesse Park, chemist, b. in Troy, N. Y., 26 May, 1854: d. in Poughkeepsie, N. Y., 12 Jan., 1894. His chemical studies were begun in 1867, and continued in Germany, where for a year he worked in the chemical laboratory in Göttingen under Wöhler, then in 1870-1 under Kekulé in Munich. Ten years later he received the degree of doctor of natural sciences from the University of Tübingen, and subsequently he attended the chemical course of lectures by Marignac at Geneva. On his return to this country he was engaged for some time as analytical and consulting chemist to various firms in New York. In 1875 he entered the government service, and afterward had charge of the analytical department of the U. S. laboratory at New York. Dr. Battershall was a fellow of the London chemical society, a member of the American chemical society, and of other scientific bodies. He contributed papers to chemical journals, was the translator of Naquet’s "Legal Chemistry" (New York, 1859), "Von der Operation von Lebr und Drink" (New York, 1886), and numerous papers to scientific associations.**

**BATTELY, Robert, physician, b. in Augusta, Ga., 26 Nov., 1828: d. in Rome, Ga., 8 Nov., 1891. He was educated at Phillips Andover academy, and studied in Booth’s laboratory, Philadelphia, and in the Philadelphia college of pharmacy, graduating in 1856 at the University of Pennsylvania and at the Jefferson medical college, from which he received his medical degree in 1857. He entered upon the practice of medicine at Rome, Ga., where he long resided. During the civil war he served as a surgeon in the confederate army, at first in the field, and later in charge of various hospitals. In August, 1862, he originated and successfully performed what is known as Battey’s operation for the removal of the ovaries, with a view to effect the change of life in women, thereby remedying certain otherwise incurable maladies. He has been successful in the execution of a number of difficult surgical operations on the urinary organs of both sexes, with the method which he invented himself. From 1873 to 1875 he was professor of obstetrics in the Atlanta medical college, and from 1875 to 1876 he edited the "Atlanta Medical and Surgical Journal." He was a member of the Georgia medical association, and was its president in 1876; also a member of the Atlanta academy of medicine, the American gynecological society, and the American medical association. He has written numerous papers and reports of cases, which have been contributed to the medical press.**

**BATTLE, William Horn, jurist, b. in Edgecombe co., N. C., 17 Oct., 1802; d. at Chapel Hill, N. C., 17 March, 1879. He was graduated at the university of North Carolina in 1829, with high honors, studied law under Chief-Justice Henderson, and after admission to the bar opened an office in Louisburg. He represented Franklin co. in the house of commons in 1833-4. In 1835 he was associated with Gov. Iredell and Judge Nash in preparing a revision of the statutes of North Carolina, and personally superintended the printing of the work in Boston. In 1838 he was a delegate to the convention that nominated William Henry Harrison for the presidency. He received the appointment of associate judge of the superior court, was elected to the professorship of law in the state university in 1845, and held the chair until the failure of the institution in 1871. In 1852 he became associate judge of the supreme court of his state, and so remained until 1868. In 1872-3 he made a second revision of the statutes, but it failed to attain to the rank of the previous one.**

**Baugher, Henry Louis, educator, b. in Abbotstown, Pa., about 1805; d. in Gettysburg, Pa., 14 April, 1868. He was graduated at Dickinson college, Carlisle; studied theology at Princeton and Göttingen, licentiate to preach at the Maryland Lutheran synod; was chosen pastor at Boonesboro, Md., in 1829, and took charge of a classical school in Gettysburg in 1830. The school expanded into a college in 1832, and Mr. Baugher became professor of the Greek language and belles-lettres, was elected to the presidency of the college in 1859, and continued in that office until his death. He was an able executive, a strict disciplinarian, an eloquent preacher, and a graceful writer. He contributed to the "Evangelical Review" and Lutheran papers, and published addresses and essays.**

**Baum, Friedrich, soldier, d. of wounds in Bennington, Vt., 18 Aug., 1777. He arrived in Canada in 1776, was a lieutenant-colonel of the Brunswick dragon regiment, and was sent out with 800 men and two pieces of artillery to procure cattle and horses to mount Riedesel’s dragoons, and complete his corps of loyalists. Approaching Bennington, Vt., he cast up intrenchments, but was attacked by Col. Stark, commanding the New Hampshire militia. In the engagement that followed, Baum attempted to cut through the encircling lines of the Americans, when his command was defeated and he mortally wounded. He died two days later.**

**Bausa, or Bautza, Felipe (bah-soh-sah), Spanish navigator, b. in Spain about 1579; d. in England in 1653. He began his naval career in 1598, went to Peru with the expedition of the corvettes "Atrevida" and "Descubierto" in 1790, made many charts and plans, and corrected others. His charts of the South American seas and coasts were recognized as the best in existence, and officially adopted by several European nations. Bautsa was director of the hydrographic depot of Madrid, but had to emigrate to England for political reasons, and died there.**

**Bautista, José (bow-tees-tah), Mexican monk, lived in the latter half of the 16th century. He belonged to the Franciscan order, was superior of the convent of Texcoco, and taught theology. He wrote the following works: "Informa-
tiones Confessorum in India vel America," "De Miseria et Brevitate Vitae," and "Pláticas Morales de los Indios."

**BAUTISTA, Juan**, Mexican linguist, b. in the city of Mexico in 1855; d. about 1912. He entered the Franciscan order soon after mastering philosophy and theology, and became superior of the convents of Texcoco and Tlaltelolco. Bautista, being of Spanish parentage, did not know the Mexican language; but he undertook its study, and, having become thoroughly acquainted with it, wrote many books in Mexican, and translated others from the Spanish. Among his works may be especially noticed volumes, all intended to enlighten the Indians and teach them religion and moral philosophy. Bautista is considered as having no equal as a writer in Mexican for elegance and purity of style.

**BAXTER, Elias**, governor, b. in Rutherford co., N. C., 1 Sept., 1827; d. in Batesville, Ark., 2 June, 1899. He was elected to the state legislature and became mayor of Batesville in 1855. He was a member of the legislature in 1854 and 1858, and in 1863 served as colonel of the 4th Arkansas mounted infantry in the national army. He was elected U. S. senator in 1864, but not allowed to take his seat, on the ground that the state had not been legally reconstructed. From 1868 till 1872 he was judge of the third judicial district court of Arkansas. In the spring of 1872 Mr. Baxter was nominated for governor by the wing of the republican party that approved President Grant's administration, the liberal, or Greeley wing, nominating Joseph Brooks. The democrats made no nomination, but favored Brooks, although in 1866, the year before the general assembly, and Baxter was declared elected. Meanwhile Brooks had alleged fraud at the polls, and after unsuccessfully applying to the U. S. circuit court, the legislature, and the state supreme court, brought suit against Baxter in a state circuit court, and on 15 April, 1874, Baxter's counsel being absent, stated in his own court, and proceeded at once forcibly to eject Baxter from office. It was claimed by Baxter that the taking up of the case in the absence of his counsel was in violation of an express agreement. Both Brooks and Baxter now issued proclamations and each had armed adherents. There was some bloodshed before the presence of federal troops. Both parties appealed to the president, but he refused to interfere until 15 May, when, acting on an elaborate opinion of Attorney-General Williams, he recognized Baxter as governor, and Brooks immediately disbanded his forces. In a message to congress on 8 Feb., 1875, however, President Grant expressed the opinion that Brooks had been legally elected. Baxter continued to hold the governorship until the adoption of a new state constitution in the autumn of 1874. By this the term of office was reduced from four to two years, and the Republicans condemned Baxter for giving up his office before the expiration of the term for which he had been elected. His not being legally returned as judge of the U. S. circuit court for the sixth judicial circuit, died in Hot Springs, Ark., 2 March, 1896.

**BAXTER, Henry**, soldier, b. in Sidney Plains, Delaware co., N. Y., 8 Sept., 1821; d. in Jonesville, Hillsdale co., Mich., 30 Dec., 1873. He received an academic education, and in 1849 went to California with many of the companies of the U. S. army, and was chosen as their captain. He volunteered as a private early in 1861, and was active in raising a company, of which he was elected captain, and which was mustered into the 7th Michi-
BAYARD

Asheton Bayard, and nephew of Col. John Bayard, into whose family he was adopted after his father's death, which occurred on 8 June, 1770. He was graduated at Princeton in 1784, studied law under Gen. Joseph Reed and Jared Ingersoll, was admitted to the bar in 1787, and settled in Wilmington, Del., where he acquired a high reputation. In 1796 he was elected a representative in congress as a federalist. He was distinguished as an orator and constitutional lawyer and became the leader of the party in the house. In 1797 he distinguished himself by his management of the impeachment of William Blount, of Tennessee, who was expelled from the senate for instigating the Creeks and Cherokee to assist the English in their invasion of the Spanish possessions in Louisiana. In 1801, when the choice between Barrand Jefferson in the undecided presidential election of 1800 devolved upon the house of representatives, Bayard stood at the head of the federalists, and his influence, combined with that of Alexander Hamilton, contributed chiefly to bring about the election of Jefferson. President Adams appointed him minister to France before the accession of the new administration in 1801, and the senate confirmed the nomination, but the appointment was declined. In the 8th congress, which met 7 Dec., 1801, he opposed, with great force, on constitutional grounds, the repeal of the judiciary bill, enacted by federalist votes in the preceding session. He served in the house of representatives from 15 May, 1797, till 3 March, 1803. In 1804 he was chosen the successor of William Hill Wells when the latter resigned his seat as representative of Delaware in the U.S. congress, and in 1805, from 15 Jan., 1805, to 3 March, 1813, and opposed the declaration of war against Great Britain in 1812. In 1813 he was selected by President Madison joint commissioner with Albert Gallatin (who was afterward rejected by the senate), and John Quincy Adams, to conclude a peace with Great Britain, through the mediation of Russia. He left Philadelphia 8 May, 1813, and met his fellow-commissioner, Mr. Adams, at that time en voyage to Russia, at St. Petersburg in July of that year. After the refusal of Great Britain to treat at St. Petersburg, he was included in the new commission, constituted 18 Jan., consisting, besides himself and John Q. Adams, of Henry Clay and James Madison. Albert Gallatin being added in the following month. Going to Holland, he took a prominent part in the negotiations that resulted in the treaty of peace signed at Ghent, 21 Dec., 1814. He received the appointment of minister to the court of St. Petersburg, but declined the mission, declaring that he considered the services necessary for the good of the country. When about to proceed to London to continue the work of the commission which included the negotiation of a treaty of commerce, he was taken alarmingly ill and returned home, only to die immediately after his arrival. His wife, daughter of Gov. Richard Bassett, of Delaware, died 10 Dec., 1834, aged seventy-six. Senator Bayard's speech on the foreign intercourse bill was published in 1798, and another on the judiciary bill in a volume of the speeches of 1802.

BAYARD, James Asheton, statesman, b. in Wilmington, Del., 15 Nov., 1799; d. there, 13 June, 1860. He was a son of the preceding, and the younger brother of Richard Henry Bayard. He received a highly esteemed education, studied law, and practised in Wilmington, taking a high rank in his profession. During the administration of President Van Buren was U.S. attorney for Delaware. In 1851 he was elected by the democrats a U.S. senator to succeed John Wales, a whig, and was re-elected in 1857, and again in 1862. In 1863, on taking his seat in the senate, when required to take the oath, he refused to do so, being averse to taking the oath. He was a prominent member of the Democratic party. In 1869 his son, Thomas P. Bayard, succeeded him as senator from Delaware. After his retirement from public life he resided in Wilmington. Mr. Bayard was for a long time chairman of the committee on the judiciary in the senate. He was eminent as a constitutional lawyer, and was highly esteemed by the best disposed of his contemporaries. He received public honors, which was manifested in a noted instance upon his receiving an offer of stock of the Crédit Mobilier in 1868, in reply to which he wrote: "I take it for granted that the corporation has no application to make to congress on which I should be called upon to act officially, as I could not, consistently with my views of duty, vote upon a question in which I had a pecuniary interest, and at the same time another senator from the state of New Jersey, having been a member of the corporation, I should not have been able to vote upon the question." Mr. Bayard was a private citizen in 1870, when he was elected a member of the U.S. congress for the state of New Jersey, and was re-elected in 1872. He died 7 Jan., 1871.

BAYARD, John, patriot, b. at Bohemia Manor, Cecil co., Md., 11 Aug., 1738; d. in New Brunswick, N. J., 7 Jan., 1807. He was the great-grandson of Samuel Bayard, a rich merchant of Amsterdam, of French Huguenot extraction, who married a sister of Peter Stuyvesant, the last governor of New Netherland, 1630. Peter Bayard, his father, was a wealthy merchant, with his three sons and a daughter, accompanied Stuyvesant, who was himself married to Judith Bayard, a sister of Samuel, to the new world in 1647. His grandson Samuel, son of Peter, one of the three brothers who came to New York with their uncle Stuyvesant, lived in New York and alienated his relatives by joining the sect of the labadists, removed in 1688 to Bohemia Manor, Md. His grandson, John, was christened John Bubenheim, but afterward dropped the middle name. James Asheton, twin brother of the latter, became a physician and died 8 Jan., 1770, leaving James Asheton negotiator of the treaty of Ghent, and three other children who were adopted and educated by their uncle. John Bayard went with his brother to Philadelphia at the age of eighteen, entered the counting-house of John Rhea, a merchant, and, in the course of a few years, became one of the leading merchants in the city. He was among the signers of the non-importation agreement of 1774. After the convention held in July, 1774, and in January, 1775, of the convention of the province, which had for its object the care of the conduct of the assembly, he early joined the Sons of Liberty, organized in 1766, and was a leader of the movement for in-
dependence in Philadelphia. His firm, Hodge & Bayard, was engaged in furnishing arms to congress, and the privaterach that took one of the first valuable prizes was fitted out by him and a friend. In the winter of 1776 he was appointed member of the council of safety by the constitutional convention, and was continued in that place by the assembly the following year. When three regiments of infantry were raised in Philadelphia in 1775, he was chosen colonel of the second. In the winter of 1776-7 he was in the field. He was present at the battle of Brandywine, September 11, 1777, at Germantown on October 4, 1777, at Princeton, and for his gallantry in the last action was personally complimented by Gen. Washington. On 13 March, 1777, Col. Bayard was appointed a member of the state board of war, and on 17 March was elected speaker of the house of assembly, to which office he was re-elected the year following. He removed his family for safety to a farm at Plymouth, on the Schuylkill, before the capture of Philadelphia by the British in September, 1777. When Princeton college was broken up, his son, James Asheton (b. 5 May, 1760; d. at sea in June, 1788), was arrested while returning home and committed to prison in Philadelphia, but was released as being a non-combatant. When a British detachment overtook him at Saddle's Ford, they plundered Bayard's house at Plymouth. In 1780 Col. Bayard was appointed on a committee to inquire into the causes of the falling off in the revenue of the state. In 1781 he was a member of the supreme executive council, and in 1785 he was elected to the continental congress, then held its sessions in New York. In 1780 he lost his wife, Margaret Hodge, and in 1781 married the widow of John Hodgson, of South Carolina. His second wife died suddenly in 1785, and two years later he married Johannah White, sister of Gen. Anthony W. White, of New Brunswick, N. J. In 1788, having retired from active business in Philadelphia, and having been compelled to part with his estate in Cecil co., Md., in consequence of his patriotic sacrifices during the war, he removed to New Brunswick, and built there a handsome house, in which he entertained many distinguished guests. In 1790 the citizens elected him mayor of New Brunswick. A few years later he was appointed presiding judge of the court of common pleas. He established with his friend Alexander Hamilton, Judge Patterson, his brother-in-law, and others, in a company organized in 1790 to manufacture cotton in Paterson, but it was dissolved in 1795. Col. Bayard was a firm federalist, with strong aristocratic predilections. Bancroft says that he was "a patriot of singular purity of character." See Col. John Bayard and the Bayard Family of America," by Gen. Jas. Grant Wilson (New York, 1885).

BAYARD, Nicholas, colonial official, b. in Alphen, Holland, about 1644; d. in New York city in 1707. He accompanied his widowed mother, sister of Gov. Stuyvesant, to America, landing in New Amsterdam on 11 May, 1647. His friend, Samuel Bayard, of Amsterdam, who died a wealthy merchant in that city, was the grandson of a Huguenot clergyman, Nicholas Bayard, who signed the articles of the Walloon synod in 1569, and fled from France to escape religious persecution. Mrs. Bayard, who was highly accomplished, practised the useful branches of education. The old Bayard mansion stood on the west side of the Bowery, and, with the surrounding premises, was, in 1798, converted by a Frenchman named Delacroix into a popular resort, known as "Vauxhall Garden." The Astor Library is built on a part of the estate, originally consisting of some two hundred acres. The only other residences within sight in pre-revolutionary days were the DeLancey home, on the west side of the Bowery, and the residences of the Stuyvesants, to the north. Not far distant rose "Bayard's Mount," or, as it was called after 1776, "Bunker's Hill," from the fortifications on its summit. It was the highest elevation near the city, and afforded an extensive prospect. In its neighborhood were also groves, the relics of which at Madame Bayard's, in Bayard Square, were the Dutch family Bible, a massive folio with clasp and corner-pieces brought from Holland, is in the possession of her descendant, Mrs. Jas. Grant Wilson, of New York. In 1664 Nicholas was appointed to the clerkship of the common council, and soon afterward he became private secretary to Gov. Stuyvesant, and received the additional appointment of surveyor of the province. On 23 May, 1666, he married Judith Verlet, who in 1663 had suffered imprisonment as a witch at the hands of the Puritans of Hartford, Conn., and whose brother was married to his mother, widow of Samuel Bayard. After the re-conquest of New York by the British in 1667, Nicholas was re-elected of the province. Under the second English regime, in 1685, when Dongan was governor, Bayard was mayor of New York and a member of the governor's council, and drew up the Dongan charter that was granted in that year. In 1688 he received, at the head of the regiment of militia of which he was colonel, the restored Gov. Andros. As one of the three resident in the council of the governor's council, and commander-in-chief of the militia of the province, he was the object of Leisler's hatred, and when the insurrection headed by the latter was in progress he fled to Albany to escape assassination. Returning to attend an only son on his sick-bed, he was arrested and thrown into prison. He was nominated, with Nicholas Anderson of Gov. Stuyvesant, and received the additional appointment of Chief-Justice Atwood and sentenced to death; but after the death of King William and the flight of the vindictive judge who had sentenced him, the proceedings were annulled by an order in council, and he was reinstated in his property and honors. A rare brochure, of which but two copies are known—one in the British Museum, the other included in the valuable Americana of Mrs. John Carter Brown, of Providence—was published in London in 1693. It is a "Journal of the Late Actions of the French at Canada," Col. Bayard and his friend Col. John White, his agent and one of his authors. This work was reprinted in New York in 1896.

BAYARD, Richard Henry, statesman, b. in Wilmington, Del., in 1796; d. in Philadelphia, Pa., 4 March, 1868. He was the eldest son of James A. Bayard, the federalist leader, was graduated at Princeton in 1814, studied law, was admitted to the bar, and practised law in Wilmington, Del., from 1816 to 1824, when he entered the U. S. Senate as a whig, having been elected to supply the vacancy caused by the resignation of Arnold Naudain. He served till September, 1839, when he resigned to accept the office of chief justice of Delaware, but was
BAYARD, Samuel, jurist, b. in Philadelphia, Pa., 11 Jan., 1767; d. in Princeton, N. J., 12 May, 1849. He was the fourth son of Colonel Bayard, and was graduated at Princeton in 1784, delivering the valedictory oration. He studied law with William Bradford, whose law-partner he became, and practised for seven years in Philadelphia. In 1791 he was appointed clerk of the U. S. supreme court. After the ratification of Jay's treaty with Great Britain, signed 19 Nov., 1794, he was appointed by Washington agent of the United States to prosecute American claims before the British admiralty courts, and in that capacity he lived in London four years. After his return he resided several years at New Rochelle, N. Y., and while there was appointed by Gov. Jay presiding judge of Westchester co. In 1803 he removed to New York city, and resumed the practice of his profession. He was one of the founders of the New York historical society, organized in 1801. In 1806 he purchased an estate at Princeton, N. J. For several years he was a member of the New Jersey legislature, and for a long period presiding judge of the court of common pleas of Somerset co. He was interested in religious enterprises, was one of the subscribers to Princeton theological seminary, and joined with Elias Boudinot in establishing the American Bible society and the New Jersey Bible society. In 1814 he was nominated by the federalists for congress, but was defeated. He published a funeral oration on Gen. Washington (New Brunswick, 1800); "A Digest of American Cases on the Law of Evidence" (Philadelphia, 1819); "An Abstract of the Laws of the United States which relate to the Duties and Authority of Judges of Inferior State Courts and Justices of the Peace" (New York, 1834); and "Letters on the Conduct of the Lord's Supper" (Philadelphia, 1825; 2d ed., 1840). See Samuel Bayard, by Col. DeLavotha McEvers, in "The Historical Register and Magazine of New York", Vol. 4, p. 94-114," by Gen. Jas. Grant Wilson (Newark, 1885).

BAYARD, Thomas Francis, statesman, b. in Wilmington, Del., 29 Oct., 1828; d. in Dedham, Mass., 28 Sept., 1888. He was educated in the common schools and later in the grammar school established by the Rev. Dr. F. L. Hawks, and, being intended for mercantile life, was placed in the house of business in New York city. After the death of his elder brother in 1848, he returned to Wilmington, studied law, and was admitted to the bar in 1851. He was appointed U. S. district attorney for Delaware, but resigned in the following year. In 1855 he removed to Philadelphia, where he became the partner of William Shippen and practised for two years, but then returned to Wilmington and continued in the practice of law until he was elected by the people in 1868 to the U. S. senate. In 1861, at a public meeting in Dover, he delivered a memorable speech in favor of peace with the south. He took his seat 4 March, 1869, and, being re-elected for a second term in January, 1875, and again in 1881, served continuously until he became secretary of state, 4 March, 1883. On the day on which he was elected to the senate for a full term his father was also re-elected a senator from Delaware to serve for the unexpired part of his original term. This is the only case of a father and son being voted for by the same legislature to fill the senatorial office. In the senate he served on the committees on finance, judiciary, prime land claims, library, and revision of laws. In October, 1881, he was elected president pro tempore of the senate. He was a member of the electoral commission of 1876-7, and a conspicuous upholder in congress of democratic doctrines and state rights, and was voted for in national convention as a candidate for the presidency in 1880 and vice-president in 1884. In 1885, Mr. Cleveland selected Mr. Bayard for the post of secretary of state. Including his great-grandfather, Gov. Bassett, he is the fifth member of his family who have occupied seats in the U. S. senate. In 1895 he was appointed by Mr. Cleveland first ambassador to Great Britain.

BAYARD, William, merchant, b. in New York, 1 June, 1729; d. in Southampton, England, in 1804. He joined the Sons of Liberty, but his principles would not permit him to aid the movement for independence, and he sailed for England, residing near Southampton. At the period of his departure Col. Bayard was among the most prominent and opulent merchants of New York. His principal country-seats at Castle Point included nearly all the land on which the present city of Hoboken is built. The estate was confiscated and sold, but by marriage has again passed into the possession of a Bayard. Two of his four sons entered the British army—Lient.-Col. John Bayard, and Maj. Samuel Vetch Bayard, who was by the king of this house of New York in the early part of the present century, the firm being Bayard, Leroy & McEvers.

BAYFIELD, Henry Wolsey, English naval officer, b. in Hull, 21 Jan., 1797; d. in Prince Edward island, 10 Feb., 1883. He entered the British navy in 1806, and during the war of 1812 had command of an English gun-boat on the lakes. In 1815 he made a survey of Lake Ontario, and from 1817 till 1833 was engaged similarly on Lakes Erie and Huron. In 1827 he surveyed the river and gulf of St. Lawrence; and his charts are of great value. In 1834 he was made captain, in 1860 rear-admiral, and in 1877 admiral on the retired list. He died near Sydenham, Ont. in 1885.

BAYLES, James Copper, journalist, b. in New York city, 3 July, 1845. He pursued a course of technical studies until 1862, when, shortly after the beginning of the civil war, he entered the U. S. service as a lieutenant of artillery. His health having been impaired by exposure and injuries, he resigned in 1863 and turned his attention to journalism. He was editor of the New York "Citizen" in 1855-7, of the New York "Commercial Bulletin" in 1868-9. In 1870 he became editor of "The Iron Age," and in 1874 established "The Metal Worker," of which he also became editor. Mr. Bayles has devoted much time and careful study to the special topics of which his journals treat, and has made numerous varied and success-
ful experiments in electro-metallurgy, and also in the microscopic analysis of metals, the results of which have appeared in different technical journals, notably in a paper on "Microscopic Analysis," which he published in the Proceedings of the American Institute of Mining Engineers. He was among the first to examine health problems from an American standpoint, and his study of sanitary conditions in New Jersey, where he resides, made him prominent as an authority on such subjects. He has delivered lectures on sanitary topics in New Jersey and other portions of his city, and has addressed the medical profession in New York, the Jerseys, and New York, suicides, sickness, and the like, and has written on the mechanics of hygiene, "House Drainage and Water Service" (New York, 1876), of which seven editions have been issued. In 1883 he was president of the New Jersey State Sanitary Association, and was appointed a commissioner to devise a system of sanitary and sanitary improvements for the city of Trenton. He is an active member of the American Institute of Mining Engineers, and, besides other offices, his twice filled that of president (1884 and 1885). His addresses before this body have been well-considered and thoughtful essays on "The Story of Iron and Steel" (1883); "Industrial Competition" (1885); "Iron Manufacture in the Southern States" (1885); "The Engineer and the Wage-Earner" (1885); "Professional Ethics" (1886). He was also active in the founding of the American Institute of Mechanical Engineers, and was one of its original members. In 1886 he became a nonresident lecturer at the Slade School of Engineering in Philadelphia, and he delivered a series of lectures on "The Labor Problem" before that institution. In connection with that subject he has published "The Shop Council" (New York, 1886), in which he strives to reconcile the views of the employer and the wage-earner.

SMALL, James Roosevelt, R. C., archbishop, b. in New York city, 23 Aug., 1814; d. in Newark, N. J., 3 Oct., 1877. He received his early education in Mount Pleasant school near Ambert, and then entered Trinity college, Hartford, where he graduated in 1835. As his father and grandfather had been eminent members of the medical profession, he resigned from that call, but afterward resumed it in their footsteps. But after studying medicine and legal science in New York, he abandoned it for theology, with the intention of entering the ministry of the Protestant Episcopal church. His theological studies were pursued under the direction of the Rev. Samuel F. Jarvis at Middletown, Conn., and on their conclusion he was appointed rector of the Episcopal church in New York, where he remained during 1840-1. At this time the cholera was raging the city, and Mr. Bayley's devotion to its victims excited much admiration. He had become dissatisfied with some of the doctrines of the Episcopal church, and toward the end of 1841 resigned his charge and visited Europe. He was received into the Catholic church at Rome in 1842, and entered the seminary of St. Sulpice, Paris, the same year, to prepare himself for the priesthood. He was recalled by Bishop Hughes and ordained in 1844, and then sent to St. John's college, Fordham, and became vice-president of that institution until 1845, and acting president in 1846. He was next appointed pastor of St. John's, in 1848, and entered the seminary of St. Sulpice, and also chaplain to the ship-hospital. Bishop Hughes made him his private secretary in December, 1846, and he did much to secure the success of the bishop's plans for the progress of the Catholic church in New York. He also collected a mass of valuable information in regard to the early history of the Catholic church in New York, much of which would have perished but for his researches. In 1853, on the recommendation of Archbishop Bayley, he was appointed the bishop of the Diocese of New Jersey. He was consecrated bishop of the diocese of Newark by Bishop Hughes on 23 Nov., 1853, and created the first bishop of Newark. He took possession of his diocese on 1 Nov. of the same year, and found it was a poorly cultivated missionary district, with few priests and no Catholic institutions; but he soon made it one of the most prosperous dioceses in the United States. One of his first efforts for the benefit of the Church was to establish an academy on South Orange, in 1856. A theological seminary was next attached to the college, from which a large number of graduates have entered the ministry. He brought a colony of nuns from Europe, by whose aid he founded the convent at Madison, N. J., for the instruction of young girls. He introduced throughout the diocese the religious orders of Passionists, Dominicans, Augustinians, and others. He was an extensive traveller, and made several journeys to Europe and the Holy Land; visited Rome officially in 1862 for the canonization of the Japanese martyrs, and in 1867 for the centenary of the apostles. In 1869 he took part in the deliberations of the international congress of medical jurisprudence. His observations during his travels took the form of lectures delivered in his diocese and elsewhere. By a papal brief he was translated to the see of Baltimore in 1872, which is the highest in rank in the United States. His health steadily declined; but he worked as earnestly as ever, and through his exertions the cathedral of Baltimore was erected, and he was thus enabled to consecrate it after his installation. He was created apostolic delegate in 1875, and in this capacity imposed the benedict on Cardinal McCloskey. He went to Europe in April, 1877, hoping to derive benefit from the Vichy waters; but grew worse, and returned to America to die. He published a "Sketch of the History of the Catholic Church on the Island of New York" (New York, 1853; revised ed., 1869); "Memoirs of Simon Gabriel Brûlé, First Bishop of Vincennes" (1869); and "Pastoral for the People."
BAYLIES, William, physician, b. in Uxbridge, Mass., 3 Dec., 1748; d. in Dighton, Mass., 17 June, 1826. He was graduated at Harvard in 1769, studied medicine, and settled in Dighton, where he practised with success. He was a member of the provincial council of Massachusetts in 1775, and also a member of the state convention that adopted the federal constitution. In 1783 he was a state senator, and in 1801 was a member of the electoral college. From 1803 till 1809 he served as a representative from Massachusetts in congress. Dr. Baylies was one of the founders of the Massachusetts Medical Society and a member of the court of frames of the state Historical Society. His two sons, William and Francis Baylies, were distinguished lawyers.

Francis, b. in Taunton, Mass., 16 Oct., 1783; d. there, 28 Oct., 1852, studied law in the office of his brother, and was admitted to the bar. From 1812 till 1829 he was register of probate in Bristol co., Mass., and in 1827, 1829, and 1833, he was a member of the Massachusetts state legislature. He was elected to congress and served continuously for three terms, from 1824 till 1837. In 1832 he was appointed charge d'affaires to the Argentine Republic, but soon returned home. He was the author of a valuable "Historical Memoir of the Colony of New Plymouth" (2 vols., Boston, 1830), which has been reprinted, with notes and additions, by S. G. Drake (Boston, 1866).

BAYLIES, Frances Courtenay, author, b. in Fayetteville, Ark., 20 Jan., 1848. Her home has been in the south, with the exception of a residence in England during the years 1865-7 and 1873-4. Her writings have been principally for publication in the United States. She contributed to the "Perfect Treasure" and "On This Side"—attracted wide attention, and were published in book form as one narrative, "On Both Sides" (Philadelphia, 1886; reprinted in Edinburgh). Miss Baylor has travelled extensively both at home and abroad.

BAYLOR, George, soldier, b. in Newmarket, Va., 12 Jan., 1772; d. in Brington, Barbadoes, W. L., in March, 1784. He served continuously throughout the revolutionary war, beginning with his appointment, 15 Aug., 1775, as aide-de-camp to Gen. Washington. He participated in the surprise of the Hessians at Trenton, carried the news of the victory to congress, and was presented by that body with a horse, and advanced to the rank of major, 8 Jan., 1777. During the following year (17 Sept., 1778) his command was surprised near Tappan at midnight by a British force under Gen. Grey, who killed sixty-seven of his men and captured the remainder, including Col. Baylor. Later he rejoined the colonial forces, and served with them until the close of the war, after which he continued for some time in command of the Virginia cavalry. The winter of 1783-4 he spent in the West Indies on account of his health, being a great sufferer from a bayonet-wound through the lungs, received at Tappan.

BAYLOR, Robert Emmett Bleidsoe, jurist, b. in Lincoln co., Ky., 10 May, 1783; d. at Gay Hill, Texas, 6 Jan., 1874. He was the son of Walker Baylor, who commanded Washington's life guards of the battle of Bladensburg, and was nephew of Col. George Baylor. He studied law with his maternal uncle, the Hon. Jesse Bleidsoe. He served in the war of 1812 under Col. Boswell, and was in the fight near Fort Meigs. When peace was restored he returned to Kentucky, was admitted to the bar, and soon acquired a large practice. In 1841 he was elected to the state legislature, but during the following year removed to Alabama, where he became prominent in the legal profession. He was elected to the state legislature in 1824, and in 1829 was sent as a representative from Alabama to the 21st congress, serving till 3 March, 1831. During the Creek war he commanded a regiment of Alabama volunteers, and rendered efficient service in terminating the war on the borders of that state. Subsequent to his career in congress he emigrated to the republic of Texas, where he was immediately elected a judge of the district and of the supreme court, Judge Baylor, being a warm friend of annexation, after the change of government was elected a member of the convention that formed the constitution of the state of Texas, and he was again appointed one of the district judges, and held the office for twenty-five years. He was a devoted Baptist, and at one time a licensed preacher of that denomination. In 1845 a charter for a Baptist college, to be located at Independence, was granted by the congress of Texas, and it received the name of Baylor University from the congress, and was warranted by the gifts of land and money made by Judge Baylor. One of the counties of Texas was also named for him.

BAYNAM, William, surgeon, b. in Caroline co., Va., in December, 1749; d. in Essex, Va., 8 Dec., 1814. He studied medicine under Dr. Walker, Aldr. and in 1799 went to London, where he became very proficient in anatomy and surgery. For several years he was assistant demonstrator in St. Thomas's hospital, London. After fifteen years' residence in England he returned in 1785 to the United States and settled in Essex. He was very successful as a surgeon, and as an anatomist he had no superior. The best preparations in the museum of the college of physicians of London were made by him. He contributed to the medical journals.

BAYNE, Herbert Andrew, educator, b. in Londonderry, Nova Scotia, 16 Aug., 1816; d. in Picton, 16 Sept., 1886. He was principal of Picton academy from 1865 till 1867, and from 1885 till 1883. Meanwhile he was graduated at Dalhousie college in 1866. He received the degree of doctor of philosophy. During 1876-7 he studied at Berlin and Paris. On his return to Nova Scotia he became professor of mathematics at the Halifax high school, and at the same time professor of organic chemistry at Dalhousie college. In 1899 he was appointed professor of physics and chemistry in the Royal military college of Canada, in Kingston. He was appointed, in 1883, a member of the cartridge commission appointed by the Dominion government, and has performed much chemical work in connection with the investigations of that board. Dr. Bayne is a member of the Royal Society of Canada, of the American Association for the Advancement of Science, and other scientific societies.

BAYNE, John, Canadian clergyman, b. in Greenock, Scotland, 16 Nov., 1806; d. in Galt, On-
tario, 3 Nov., 1859. He entered the university of Glasgow in November, 1839, and completed his theological studies at Edinburgh university. He removed to Canada about 1855, and was pastor of the church in Hamilton until the time of his death. He was one of the leaders in the disruption from the church of Scotland in 1843, and in the formation of the free church of Canada. In July, 1846, he was appointed moderator of the synod that met at Hamilton. As a preacher he was singularly eloquent and effective. He was the author of a little book entitled "A Plan of the Synod of Canada in Connection with the Church of Scotland called for?" and also of an essay entitled "Is Man Responsible for his Belief?"

**BAYNES, Edward,** British soldier, d. in Sidmouth, England, 2 Feb., 1829. He was made ensign of the 82d regiment on 13 May, 1853, was aide-de-camp to Sir James Craig from 1794 till 1806, became adjutant-general of the forces in North America, 29 Aug., 1806, and was conspicuous in the campaign on the Niagara frontier in the war of 1812. He had served in the West Indies, at the capture of the Cape of Good Hope in 1795, at the capture of a Dutch force in Saldanha bay in September, 1796, in the East Indies, in Malta, and at the battle of Sielch.

**BAZAIN, Francois Achille,** French soldier, b. in Versailles, 13 Feb., 1811; d. in exile in Madrid, Spain, 23 Sept., 1888. He became lieutenant in Algeria in 1853, captain after two years service with the foreign legion against the Carlists in Spain, lieutenant-colonel in 1848 after nine years service as a colonel of the foreign legion in 1850, and general of brigade in the Crimean war, acting as commander of Sebastopol after its capture. He became general of division in 1853, and participated in the capture of Kinvurn. Subsequently he was military inspector in France. In the Italian campaign he was wounded 8 June, 1859, while commanding a division in the attack upon Melegnano, and he took a conspicuous part in the battle of Solferino. In 1862 he commanded in Mexico the first division of the French army, and by defeating Comonfort compelled the surrender of Puebla, 18 May, 1863, shortly after which the French entered the capital. On 1 Oct., 1863, he surrendered the capital of Mexico, was appointed as civil administrator of the occupied districts; and the rank of marshal was conferred on him in 1864. In February, 1865, he captured the town of Oaxaca, together with a Mexican army of 7,000 men under Diaz. Though he persuaded Maximilian to issue the most rigorous decrees against the Juarists, and himself repeatedly executed them, he generally believed to be engaged in secret plottings with the enemies of the emperor, in pursuance of ambitious personal schemes. He married a rich Mexican lady, whose family espoused the cause of Juarez. In February, 1867, he withdrew with his forces from the capital, declaring Maximilian's position to be untenable, and soon afterward embarked at Vera Cruz. On his arrival in France, though exposed to violent public denunciations, he took his seat in the senate, and was appointed commander of the 3d army corps; and in October, 1869, after the death of St. Jean d'Angely, he became commander-in-chief of the imperial guard at Paris. As commander-in-chief, the emperor was murdered, and in November 1870 he was placed in command, near Metz, of the 3d corps. After the defeat of Wörth and Forbach he assumed, on 8 Aug., command of the main French armies, in place of the Emperor Napoleon, and began his retreat from Metz, 14 Aug., hoping to effect a junction with the army near Chalons and with the new forces gathering under MacMahon. But he was attacked on the same day, while still in front of the fortress, and after the bloody battles of Mars-la-Trobe (16 Aug.) and Gravelotte (18 Aug.), he was forced to retire within the fortifications, and was soon shut in by Prince Frederick Charles. He made several futile attempts to break through the investing army, that of 31 Aug. to 7 Sept. proving very disastrous. After the capitulation of Sedan he renewed these attempts (7, 8 Oct.) to escape from the enemy's jaws, and on 14 Oct. was captured at the battle of Beaune-la-Rolande. The Germans at Versailles through his adjutant, Gen. Boyer, and in the interest, it was thought, of the deposed dynasty; but he was compelled, on 27 Oct., to surrender to Prince Frederick Charles his entire force of 173,900 men, who by the terms of the capitulation all became prisoners of war, Bazine himself being afterwards stationed at Metz.

**BEACH,** John Stephen, b. in France in 1736; d. in Vincennes in 1847. He was educated and ordained in France, and came to America about 1813. He himself being afterwards stationed at Mobile, Ala., where he gained the affection of all classes and creeds. He was appointed vicar-general of Mobile, and gave most of his time to the creation of charitable institutions, one of which, a Catholic orphan asylum society, was especially successful. He visited France in 1846 for the purpose of obtaining the foundation of a college at Spring Hill, and also securing the services of the brothers of the Christian schools for a male orphan asylum, in both of which he succeeded. In 1847 the council of Baltimore recommended his appointment to the see of Vincennes, but he died a few days after his consecration.

**BEACH,** Abraham, clergyman, b. in Cheshire, Conn., 9 Sept., 1740; d. near New Brunswick, N. J., 14 Sept. 1828. He was graduated at Yale in 1767 with the honors of the valedictory, became a convert to the Episopcal faith, and studied theology under Dr. Samuel Johnson and his relative, John Beach. In 1767 he went to England, and there received ordination to the priesthood. He was appointed Unviersity, and after the efforts of his wife, he effected his escape at midnight, 9 Aug., 1874. He took refuge in Spain, where he ever after resided, in very reduced circumstances.

**BEACH,** Edward, British soldier, d. in Sidmouth, England, 2 Feb., 1829. He was made ensign of the 82d regiment on 13 May, 1853, was aide-de-camp to Sir James Craig from 1794 till 1806, became adjutant-general of the forces in North America, 29 Aug., 1806, and was conspicuous in the campaign on the Niagara frontier in the war of 1812. He had served in the West Indies, at the capture of the Cape of Good Hope in 1795, at the capture of a Dutch force in Saldanha bay in September, 1796, in the East Indies, in Malta, and at the battle of Sielch.
to the general conventions, and in 1801, 1804, and 1810 was president of the house of lay and clerical delegates. Of Rutgers college, established in 1770 at New Brunswick, he was an early trustee. In 1786 he was elected a regent of the university of the state of New York, and in 1787 a trustee of Columbia college, from which institution he received the honorary degree of D. D. in 1789. He was likewise actively associated with many of the benevolent institutions of New York. Subsequent to his resignation from Trinity parish he retired to his farm on Harriet river, near New Brunswick, where he resided until his death. His only published work was a sermon, "The Eucharist," published in 1820.

BEACH, Henry Harris Aubrey, physician, b. in Middletown, Conn., 16 Dec., 1843. He was educated at Cambridge, and was graduated at Harvard medical school in July, 1868, settling in Boston soon afterward. He is a member of many medical associations, and in 1873 was president of the Boylston medical society. He became assistant of the medical department of the institution in 1880; was for a time a demonstrator of the authorities, interested from their success. In 1881 he was for a year in the mines of Mexico, and in 1882 he was appointed surveyor-general of Dakota. Since then he has devoted his attention to the development of the resources of that territory. From 1879 to 1885 he was superintendent of public instruction of Dakota, and under his direction the entire school system was organized.

BEAKMAN, John Frederick, b. in New Jersey about 1759; d. in Sandusky, N. Y., 5 April, 1869. He was the last surviving soldier of the revolution on the pension list. His early life was spent in the Mohawk valley, whither his parents had removed shortly after his birth. In 1778 he was enrolled in the militia, and then served in the war. After he reached sixteen he resided in Scipio co., where the remainder of his life was spent. His married life extended over eighty-five years, and his wife reached the age of one hundred and five. In 1867 congress passed a special act giving him a pension of $500 during the remainder of his life. He was an active member of the Lutheran church.

BEAL, Abraham, philanthropist, b. in Middletown, Conn., 1854; d. in Brooklyn, N. Y., 25 Feb., 1872. Early in life he became interested in the condition of the unfortunate, and while in London noticed the great injury caused by intermittent among workingmen. For a time he devoted himself to the cause of total abstinence, but encountered much opposition and persecution. He was subsequently appointed by an act of Congress to advocate those who, by intemperance, had become criminals, and in this manner became known as "the prisoner's friend." In 1848 he emigrated to the United States, and for some years engaged in business; but his interest continued with the unfortunate prisoners. He became very familiar with the criminal laws of New York, and in 1859 and in 1863 assumed the general agency of the New York Prison Association. He was for many years an efficient officer of the New York Port Society.

BEAL, Foster Ellenborough Lascelles, naturalist, b. in South Groton (now Ayer), Mass., 9 Jan., 1840. He was graduated at the Massachusetts Institute of Technology in 1863. During 1874-5 he was assistant professor of mathematics in the U. S. Naval Academy at Annapolis, Md., and from 1876 till 1882 professor of civil engineering in Iowa Agricultural College, where from 1879 till 1882 he was also acting professor of zoology and comparative anatomy, and in 1885 professor of geology. His writings, principally on topics of natural history, include the articles "Birds of Iowa" (1881-2); "Value of the Seed-eating Birds" (1882).

BEAL, George Lafayette, soldier, b. in Nor- way, Me., 21 May, 1825; d. there, 11 Dec., 1866. He left Portland, on 6 Oct., 1861, as colonel of the 10th Maine regiment. He was appointed by the president brigadier-general, and in 1864, and was mustered out of the service on 15 Jan., 1866. He was adjutant-general of Maine in 1880-5, and state treasurer in 1888-94.
BEALL, William James, botanist, b. in Adrian, Mich., 11 March, 1853. He was graduated at the University of Michigan in 1850, and at Lawrence scientific school in 1855 with the degree of B. S. From 1860 till 1863 he taught in the Friends' academy and in the Howland school in Union Springs. During 1860-'70 he was professor of natural sciences in Cinnaminson university, and in 1870 he became professor of botany in the State agricultural college of Michigan and lectured on forestry and horticulture. Prof. Beall is a member of numerous societies, and was vice-president of the section on biology of the American association for the advancement of science in 1883; he was also president of the Michigan state teachers' association in 1881 and 1882. He is a co-founder of the society of agricultural science in 1880 and 1881. He has contributed numerous original papers to the "American Naturalist," "American Journal of Science," and to the reports of the State board of agriculture, State horticultural society, and American botanical society. He is the author of "The New England Flora," "The Philadelphia Flora," and "The Grasses of North America" (Lansing, 1886 et seq.).

BEALE, Richard Lee Tarberrville, soldier, b. in Hickory Hill, Va., 22 May, 1819; d. in Hague, Va., 18 April, 1893. He was educated at Dickinson college, was graduated at the law school of the university of Virginia, and admitted to the bar in 1842. On 6 Dec., 1842, he was commissioned lieutenant-colonel and commanded until 16 Dec., 1847, but declined a re-election. He was a delegate to the state reform convention of 1859, and in 1861 a member of the state senate. At the beginning of the civil war he entered the confederate army, and in 1863 was colonel of the 9th Virginia cavalry. In February, 1865, Gen. Beall commanded a brigade in Lee's cavalry division, Army of northern Virginia.

BEALL, Benjamin Lloyd, soldier, b. in the District of Columbia, about 1800; d. in Baltimore, Md., 16 Aug., 1863. He was a son of Maj. Beall of Maryland, and appointed a cadet at West Point in 1814, but did not graduate. He was made captain of the city rangers in June, 1836, in a regiment raised for the Florida Indian war; captain of 2d U. S. dragoons 8 June, 1836; brevetted major 15 March, 1837, for gallantry in the Florida campaign; and appointed major 1st U. S. dragoons 16 Feb., 1847. He took part in the Mexican war, and on 16 March, 1848, was brevettet lieutenant-colonel for bravery at the battle of Santa Cruz de Royales. He became lieutenant-colonel of the 1st U. S. dragoons 3 March, 1853, and served for several years on the western frontier. He was in command as general in California after its annexation to the United States, and while so serving built all the forts from the western frontier of Texas to the Pacific. He also served for two years at Vancouver's island. When the civil war began he was ordered to Baltimore as provost marshal; he resigned, was brevettet major of the 2d U. S. dragoons in May, 1861, and was placed on the retired list 15 Feb., 1862, because of his long and meritorious service. He had two sons in the national army and one in the confederate.

BEALL, John Young, guerrilla, b. in Virginia, 1 Jan., 1815; d. on Governor's island, New York harbor, 24 Feb., 1865. He was of good family and received a classical education. Joining the navy of the confederate states, he was appointed acting master, 3 March, 1863. On 16 Dec., 1864, he was arrested in the railroad station at Suspension Bridge, N. Y. Charges and specifications were drawn up, reciting in substance that he was acting in the twofold capacity of a spy and guerrilla, and demanding his trial. A proclamation was issued by Jefferson Davis under date of 24 Dec., 1864, certifying that the confederate government assumed "the responsibility of answering for the acts and conduct of any of its officers engaged in said expedition," namely, that in which Beall was concerned. It was proved that he had perpetrated such acts of war within the territory of the United States, and at the time no visible badge of military service. Among civilized nations the penalty for such acts is death, and Beall was hanged in accordance with the finding of the court.

BEALL, Reazin, soldier, b. in Pennsylvania 10 Aug., 1770; d. in Wooster, Ohio, 29 Feb., 1843. He was appointed ensign in the U. S. 7th infantry, 1798, and lieutenant-colonel and quarter master in 1799, and was an officer under Gen. Anthony Wayne in his campaign against the Indians. In September, 1812, he was made brigadier-general of Ohio volunteers. He also filled many important civil offices, and from 1813 till 1815 was representative from Ohio in congress.

BEALL, Samuel Wootten, lawyer, b. in Montgomery, Md., 26 Sept., 1807; d. in Helena, Montana...
na, 26 Sept., 1868. He was graduated at Union in 1827, and studied law at Litchfield. During the same year he married Miss Elizabeth Fenimore, and located at Vicksburg. On 8 Jan., Justice Taney, a personal friend of the family, was appointed, in 1857, receiver for the sale of public lands in the northwest, having his office in Green Bay, Wis. He returned to Cooperstown in 1854, and lived for some years in a beautiful residence called "Woodside," gathering around him a brilliant circle of students and reformers among whom were J. Fenimore Cooper, Washington Irving, James Watson Webb, and the English ballad-singer Henry Russell. Later he returned to Wisconsin, and was engaged in agriculture, being the first to introduce blooded cattle into the northwest. About this time his mother died in Maryland, leaving him a thirty-slab and some slight property. Southerner though he was, and stratified in circumstances in comparison with his earlier life, the spirit of the free west led him to liberate his slaves. He further devoted the entire proceeds obtained from the sale of the property to the support of these slaves as long as the means lasted, or until they were able to earn a living for themselves. In 1860 he attended the national convention from the county of Marquette, and was prominent in the organization of the state government. Again, in 1847-48, he served similarly in the convention then assembled, and in 1850 became lieutenant-governor of the state, serving for two years. He then became Indian agent, and was among the first to introduce tribes under his care to Washington. Among these were the sachems of Munsee and Stockbridge tribes. One chief of the latter tribe, John Quiney, created much interest and wonder by the delivery of an eloquent speech, now recorded in history as a sample of remarkable power and pathos. This speech was written by Mr. Beall, and taught word by word to the chief, even to the questions, who proved an apt scholar to so able a teacher. The original manuscript is still carefully preserved among the family possessions. In 1859 he led a party to Pike's Peak, and while on this expedition with others located the city of Denver. This place immediately started into rapid growth, and during the same year Beall was sent to Washington to obtain a charter for the city. He resided in Denver until 1861, when he returned to Wisconsin. At the beginning of the civil war he was appointed lieutenant-colonel of the 18th Wisconsin regiment, and he was in the various engagements from Shiloh to Vicksburg. Having been severely wounded, he was then transferred to the invalid corps. Shortly after the war he settled at Helena, where he was shot during an altercation.

BEALL, William Dent, soldier, b. in Maryland in 1755; d. in Prince George co., Md., 24 Sept., 1829. He was a major in the revolutionary army, and was distinguished for his services both at Yorktown and at Saratoga. In 1799, he was appointed major of the 9th infantry, and in the following year deputy-adjutant-general and depot-inspector-general. He was made lieutenant-colonel of the 5th infantry 12 Dec., 1808, and on 30 Nov., 1810, colonel of the 3rd infantry, from which he was transferred in April, 1812, back to the 5th. He resided in Aug., 1812, but commanded a regiment of militia at the battle of Bladensburg in 1814. He was afterward sheriff of Prince George county.

BEAN, William, the first white settler west of the Alleghenies. He was a companion of Daniel Boone in his visit to Kentucky in 1760, and returned in 1768 and settled with his family on Boone's creek, a small tributary of the Watauga.
BEARD, James Henry, painter, b. in Buffalo, N. Y., in 1814; d. in Flushing, L. I., 4 April, 1893. He was descended from Sir James Beard, of England, and on his mother's side from the Macleans, of Scotland. His father moved from Vermont to Ohio when he was a boy, and the family ultimately settled in Cincinnati, where he devoted himself for many years to portrait painting, Henry Clay, John Quincy Adams, and other distinguished persons being among his sitters. He went to New York in 1846 and exhibited his "Carolina Emigrants" at the national academy of which he became a member in 1848. In 1870 he settled permanently in New York, and in 1872 was elected a full member of the academy. Of late years he devoted himself chiefly to animal painting, in which branch of art he achieved success. Among his best-known works are "Peep at Growing Danger" (1871); "The Widow" (1872); "Mutual Friend," "Parson's Pets" (1873); "Attorney and Clients," "Out All Night," "There's many a Slip" (1876); "Consultation," "Blood will Tell" (1877); "Don Quixote and Sancho Panza" (1878); "Don't you know Me?" (1879); "Heirs at Law" (1880); "Which has Preëmption?" (1881); "You can't have this Pup" (1882); "My Easter's all Spent," "I heard before one Word of It" (1883); "Spotted Porcher" (1884); "Don't you come Here," "The Mississippi Flood" (1885); "Barn Yard," and "I'll yer gimme some? Say!" (1886).—His brother, William Holbrook, painter, b. in Painesville, Ohio, 13 April, 1825; d. in New York city, 20 Feb., 1900, began his professional career in 1846, and after traveling five years settled in Buffalo. In 1856 he visited Europe, studied one summer in Düsseldorf, and painted in Italy, Switzerland, and France. On his return home he worked for a time at the foot of Horseshoe creek, and there married Miss Johnson, who died within a year. He settled in 1860 in New York city, and was elected a member of the Academy in 1862. Several years afterward he married the daughter of Thomas Le Clear, the portrait-painter. He has painted some genre and allegorical pictures, but of late years has devoted himself almost exclusively to the painting of animals, whose habits he humanizes in a pleasing, satirical manner with much success. He has made many studies for decorative art, gaining great originality of composition. Among his best and most characteristic works are: "Kittens and Guiney Pig," "Power of Death" (1859); "Susanna and the Elders," "Swan and Owls" (1860); "Beast on a Bender" (1862); "Bear-Dance" (1865); "March of Siyuem" (1866); "Flaw in the Title," "Fallen Landmark" (1867); "Whale" (1868); "Whale, Fish, Bird, and Man" (1869); "Diana and her Nymphs"—deer; "Darwin expounding his Theories"—monkeys; "Morning and Evening"—cranes; "Rain- ing Cats and Dogs"; "Dickens and his Characters"—portrait (1871); "Lost Balloon," "Deer in Wood," "Runaway Match" (1876); "Divorce Court" (1877); "Bulls and Bears in Wall Street" (1878); "Voices of the Night" (1880); "Spreading the Alarm" (1881); "In the Glen" (1882); "Cattle on a Penny in His Yard" (1882); "Wine Tasters," "Who's Afraid?" (1884); "His Majesty receives," and "Office-Seekers" (1886). He published "Humor in Animals," a collection of his sketches (New York, 1886).—James Henry has four sons, all of them artists; James Carter, artist and author, has made spirited drawings of English birds and animals to be found in the best illustrated books and periodicals of the day.

Henry, the second son, b. in Ohio in 1841, d. in New York city, 19 Nov., 1889, was a captain in the 50th Missouri volunteers at twenty-one years of age. He painted genre subjects in oils and water-colors, and made the designs for many of Prang's publications.—Frank, the third son, was a special artist for Harper & Brothers during the civil war. He devotes himself particularly to character-sketches, in the production of which he has attained remarkable facility. He lectures on various topics, accompanying himself with crayon sketches on the blackboard. He was for a time professor of the fine arts at Le Moyne College, and since 1883 has been professor of drawing at "The Blackboard and the Sunday School" (New York, 1889).—Daniel, the fourth son, was educated for a civil engineer, but, like the rest of the family, became an artist. He has an extraordinary talent for allegory as applied to decoration, and introduces animals and natural objects in singularly quaint and suggestive combinations. He has published "American Boys' Handy Book" (New York, 1882).

BEARD, Richard, educator, b. in Sumner co., Tenn., 27 Nov., 1799; d. in Lebanon, Tenn., 2 Dec., 1849. He was graduated at Cumberland university, Tennessee, in 1832, was professor of languages in the college from 1832 to 1838, when he went to Marian college, Mis., as professor of languages, but returned to Cumberland and became president of the university in 1843. On the founding of the theological school of the university in 1853, he resigned the presidency of the university and took the chair of systematic theology, being in reality for the next twenty-five years both principal and professor, was elected president of the Cumberland Presbyterian organization, and published "Systematic Theology," also "Biographical Sketches," and "Why I am a Cumberland Presbyterian.

BEARDSLEY, Arthur, engineer, b. in Esopus, Ulster co., N. Y., 1 Nov., 1843. Early in life he learned the bookbinder's trade at Poughkeepsie, and also began his studies at the Dutchess county academy in the same town. After a year's study at Bowdoin college (1862-3) he entered the Rensselaer polytechnic institute, and was graduated in 1867 with the degree of C. E. During 1867-8 he was assistant engineer at the Hoosac tunnel, Mass., and from 1863 till 1872 professor of civil engineering and industrial mechanics at the University of Minnesota, 1872 being the professor of civil and mechanical engineering in Swarthmore college, where he organized a manual training department, of which he is director.

BEARDSLEY, Eben Edwards, clergyman, b. in Stepney, Conn., in 1808; d. in New Haven, Conn., 22 Dec., 1891. The son of a farmer, he was graduated at Trinitie college, Hartford, in the highest honors in his class. He studied theology, was ordained 10 Aug., 1835, and took charge of St. Peter's church, Cheshire, Conn. On the death of the rector and principal of the Cheshire Episcopal academy, Mr. Beardsley accepted a temporary ap-
pointment, which continued, however, for several years. During this time a new church edifice was erected, and after its completion he retired from the rectorship of the parish and confined himself exclusively to the academic duties of his college, and in 1874 Columbia gave him that of LL. D., Dr. Beardsley devoted much time to historical research, especially in Episcopal church matters in Connecticut. He published "The History of the Episcopal Church in Connecticut from the Settlement of the Colony to the Death of Bishop Brownell in 1916." "Memoir of Rev. John Eaton Smith" (1871); "Life and Correspondence of Samuel Johnson, D. D., Missionary of the Church in England in Connecticut, and First President of King's College, New York" (1874); "Life and Times of William Samuel Johnson, LL. D., First Senator in Congress from Connecticut, and Wife of Gen. Rufus King" (Boston, 1876); and "Life and Correspondence of the Rt. Rev. Samuel Seabury, D. D., First Bishop of Connecticut, and of the Episcopal Church in the United States of America." (1881).

BEARDSLEY, John, clergyman, b. in 1730; d. in Kingston, New Brunswick, in 1810. During the Revolutionary war he was chaplain of Col. Beverley Robinson's regiment of New York loyalists. He emigrated with the loyalists to New Brunswick, received a lot in Part Town, now St. John's, became rector of Mangerville in 1784, and resided in Kingston after 1802, receiving a pension from the British government. His grand-nephew, Levi, lawyer, b. in Hoosic, Rensselaer co., N. Y., 17 Nov., 1795; d. in New York, 19 March, 1857. He received a common-school education, studied law, and in 1812 was admitted to practice. In 1825 he was elected to the state assembly that passed the first railroad charter in the United States. He was elected to the state senate in 1829, served in 1831, and was president of the senate. He served on the supreme court of errors of New York. He removed to Oswego, N. Y., in 1839, to Columbus, Ohio, in 1842, and returned to New York in 1846. Mr. Beardsley's influence was always on the side of liberal legislation. Besides his legal opinions, he published an autobiographical volume entitled "Reminiscences," New York, 1852.—Samuel, brother of Col. Beverley, b. in Hoosic, Rensselaer co., N. Y., 9 Feb., 1790; d. in Utica, 6 May, 1860. He received a common-school education, and began to study medicine, but soon relinquished it and studied law. In 1813 he joined the militia that went to the defense of Sackett's Harbor. He was admitted to the bar in 1815, and practiced law for the next 30 years, went to Watertown, and at the end of a year returned to Rome. In February, 1821, he was appointed district attorney of Oneida county. At the first election held under the constitution of 1822 he was chosen senator from the fifth district, but in the arrangement of classes by lot he was unlucky, and failed to get a seat till the elections of 1823. During this year he transferred his residence to Utica. President Jackson appointed him U. S. attorney for the northern district of New York, which office he held till 1839, when he was elected as a Democrat to congress, and relected in 1832 and 1834, and again elected in 1842. In April, 1844, during the United States Bank excitement, he delivered a speech on the currency question which by its vehemence attracted attention throughout the country, and at the same time he opposed successfully a measure to restrain the freedom of the reporters of congress. A vacancy occurring in the judgeship of the fifth New York circuit, Mr. Beardsley was nominated by Gov. Marcy, and signified his intention of resigning his seat in congress and accepting the place; but, as President Jackson sent for him, and in the presence of his cabinet and various eminent members of both houses urged him to decline, he decided to remain in congress. In 1836, on the expiration of his congressional term, he accepted the office of attorney-general of the state of New York, his term closing with the year 1838, when he retired to the asylum for the insane in 1838. He was again elected to congress in 1842, but withdrew in February, 1844, to become an associate judge of the supreme court of New York, and in June, 1847, was appointed chief justice on the retirement of Judge Bronson. The degree of LL. D. was conferred on him in 1849 by Hamilton college. Returning to private life he devoted himself to practice, and maintained a political influence and carried the delegation that, in the Cincinnati convention of 1856, controlled the choice of that body and made James Buchanan the candidate.—Samuel Raymond, lawyer, eldest son of Levi, b. in Cherry Valley, Oswego co., N. Y., 31 Dec., 1814; d. in Stevensburg, Va., 1863. He was graduated at Union in 1836, studied law, and practised in Albany and in Oswego, N. Y. He afterward engaged in milling, owning the Premium Mills in Oswego. He was appointed lieutenant-colonel of the 4th N. Y. militia in 1851, and colonel in 1854. He was elected mayor of Oswego in 1852; appointed post master in 1853, and was defeated as a candidate for the asylum principal in 1853. He was commissioned lieutenant-colonel of the 24th New York volunteers in 1861, was wounded at Chancellorsville, and was promoted to the colonelcy in 1863. When the regiment was mustered out in 1865, he was appointed adjutant-general on Gen. Meade's staff. He died of disease contracted in service. Beardsley, John, clergyman, b. near Edenton, N. C., in 1777; d. in Elizabethtown, N. J., 2 Nov., 1845. His father was a planter, and sent the son to Nassau Hall, afterward Princeton, where he was graduated in 1797. For three years he was tutor in the college, and at the same time studied theology. He was ordained in the Episcopal church in 1802, and became pastor of St. John's church, Elizabeth town, in 1803, rector of St. Peter's, Albany, in 1804, and co-rector in St. Paul's, Baltimore, in 1809. From 1813 till 1828 he was professor of the University of Pennsylvania, and also professor of mental and moral philosophy, and became favorably known by his metaphysical views in defence of the philosophy of Locke. In 1815 the degree of D. D. was conferred on him by both Columbia college and the university of Pennsylvania. He retired from the college in 1829, and took charge of a church in Trenton, where he remained until 1836. His health failing, he removed to Elizabeth, and conducted the church and the town in literary and theological studies. His principal published writings are: "American Dialogues of the Dead" (1815): "An Examination of the Oxford Divinity," published during the Tractarian controversy; "A Search of Truth in the Science of the Human Mind" (vol. i., 1827; vol. ii., left complete in MS.); "Vin-
dication of the Argument a priori in Proof of the Being and Attributes of God, from the Objection of Dr. Waterland" (1825); "Review of Brown's Philosophy of the Human Mind" (1825); "A Vindication of the Fundamental Principles of Truth and Order in the Church of Christ," in reply to the views of Dr. Manning (1830); "An Examination of No. 90 of the Tracts for the Times" (1841). He also contributed to periodical literature on moral and metaphysical sciences.

BEASLEY, Nathaniel, pioneer, b. in 1751; d. in Knox co., Ohio, 27 March, 1855. He was a lawyer in Pennsylvania and in the United States Senate, and performed valuable services in the St. Clair and Wayne campaigns. He afterward settled in Chillicothe, Ohio, was a member of the general assembly in 1819-20 from Adams co., and senator from Brown in 1820-2. He was also canal commissioner and major-general of militia.

BEATTY, Charles, clergyman, b. in county Antrim, Ireland, in 1715; d. in Bridgeton, Barbadoes, 13 Aug., 1772. While very young he sailed for America, and, with other passengers, was landed on Cape Cod in a very famished condition, the ship having run short of provisions. Making his way to the neighborhood of Philadelphia, he began peddling in the vicinity. He was, on one of his excursions, killed by a shot from the Maclay's gun on Neshaminy, and fell into conversation with its founder, the Rev. William Tennent, who, discovering that the young peddler had a classical education, and possessed the true missionary spirit, persuaded him to study for the ministry, and he was ordained on 13 Oct., 1742. He became pastor of the church at Lexington, Pa., 26 May, 1743. The Presbyterians were at that time divided into two factions, the "Strict" or "Old Side" and the "New Side," and Mr. Beatty joined the former. He was associated with Dr. Brainerd in some of his missionary labors among the Indians, and accompanied Franklin as chaplain on a military expedition to establish a frontier post in the northwest, in 1755. Franklin relates, in his account of the expedition, that, noting the punctual attendance of the soldiers when the daily allowance of grog was served out, and contrasting it with their dilatory attendance at the regular religious services, he suggested to the chaplain the expediency of serving this popula tion with a more substantial article of diet. The chap lain thought the idea good, accepted the task, and, adds Franklin, "never were prayers more generally and punctually attended, so that I think this method preferable to punishment inflicted by severe military laws for non-attendance on divine services." In 1760 Mr. Beatty made a prolonged missionary tour through the frontier settlements of Pennsylvania. Some of his sermons were printed, and he published the "Journal of a Two Months' Tour among the Frontier Inhabitants of Pennsylvania" (London, 1768), also a letter to the Rev. John Erskine, advocating the theory that the American Indians are the descendants of the lost Hebrew tribes. He was much interested in raising money for the support of the Free School of New Jersey (Princeton), and died of yellow fever while on board Barbadoes with this object in view.

Beatty, or Beattie, Erkuries, soldier, b. 9 Oct., 1759; d. in Princeton, N. J., 23 Feb., 1823. He was the son of Charles Beatty, chaplain, to whom he owed his singular name, compounded from the first names of his parents. He was apprenticed to a resident of Elizabethtown, N. J., when the war for independence began, and enlisted at once. He served at the battle of Long Island under Lord Stirling, was acting sergeant at White Plains, and ensign in the 4th regiment of the Pennsylvania line, 3 Jan., 1777. He was promoted 1st lieutenant 2 May, and was in the battles of Brandywine, Germantown (where he was wounded) and the hardships of Valley Forge and the campaigns of Van Schaick and Sullivan. When the Pennsylvania line was reorganized after the mutiny in 1781, he went south with Gen. Wayne, joined Lafayette on the Rappahannock, fought at Cowpens, and was present at Yorktown. In Nov., 1783, he was on duty guarding prisoners at Lancaster, Pa., and was then mustered out of service. After serving for a time as clerk in the war department, he was appointed 1st lieutenant in the regular army, 24 July, 1784. From 1786 until 1788 he was acting paymaster of the western army, and during the two years succeeding was in command at Fort St. Vincent (now Vineyard, Ind.). He was a major under Gen. St. Clair, but escaped the defeat of that officer 4 Nov., 1791, having been sent to Fort Jefferson with a detachment. He resigned from the army during Wayne's western campaign in 1793, and went to Princeton, N. J. His journal as paymaster of the western army was published in 1825, together with a memoir of Major Beatty, by Gen. Schuyler, vol. i., from the original manuscript in the possession of the New York Historical Society. Maj. Beatty had three brothers, all of whom were officers in the revolutionary army,—his son, Charles Clinton Beatty, D. D., was the founder of the Steubenville, Ohio, female seminary, and president of the beard of trustees of the Western Theological Seminary at Allegheny, Pa.

Beatty, John, physician, b. in Bucks co., Pa., 19 Dec., 1749; d. in Trenton, N. J., 30 April, 1826. He was a son of Charles Beatty, was graduated at Princeton in 1763, studied medicine with the celebrated Dr. Rush, of Philadelphia, joined the army early in the war for independence, and in September, 1776, held the rank of lieutenant-colonel in the Pennsylvania contingent. He was taken prisoner by the British at the capture of Washington, N. Y., 17 Nov., 1776, and during his confinement suffered greatly in health, owing to harsh treatment. Having been exchanged early in 1778, he was appointed 24 May, 1778, commissioner of pensions after the war. On 31 March, 1780, he resigned and settled as a physician at Princeton, N. J. He was a delegate to the continental congress in 1783—5, served in both branches of the state legislature, was a delegate to the constitutional convention, and a member of congress in 1733—5. From 1785 till 1805 he was secretary of state for New Jersey, and he was present at the Trenton bank in 1815—6.

Beatty, John, soldier, b. near Sandusky, Ohio, 16 Sept., 1828. He received a common-school education and entered on a business career in a banking-house at an early age. He took an active part in public affairs, and was identified with the free-soil party until it was merged in the republ icans. In the fall of 1861 he was made a private by a Lincoln elector. In 1861 he enlisted as a private in the 3d Ohio infantry, and was appointed successively captain and lieutenant-colonel. He took part in the early western Virginia campaigns, became colonel in 1862, and commanded a brigade in the three days' fight at Stone river, 31 Dec., 1862, to 2 Jan., 1863. In 1864 he was major-general and served through the Tennessee and Chattanooga campaigns. He was elected to the fortieth congress for the unexpired term of a de-
ceased member, and was twice re-elected. In 1884 he was republican presidential elector at large. In 1885-5 he was a member of the board of state charities. In 1887 he published "The Citizen Soldier" (Cincinnati, 1876) and "The Belle o' Bocket's Lane" (Philadelphia, 1882). BEATTY, Samuel, soldier, b. in Mifflin co., Pa., 16 Dec., 1820; d. in Jackson, Stark co., Ohio, 26 May, 1885. He removed with his father, a native of Ireland, to Jackson, Ohio, in 1827, received a limited education, and after having worked as a farmer. He served nearly two years in the Mexican war as 1st lieutenant in the 3rd Ohio volunteers, was elected sheriff of his county in 1857, re-elected in 1858, and on 16 Nov., 1861, became colonel of the 9th Ohio volunteers. He was made brigadier-general of volunteers on 29 Nov., 1862, commanded a division in the battle of Boston, Ohio, and was brevetted major-general on 13 March, 1865. In 1866 he returned to his farm in Jackson, where he spent the rest of his life. BEAUCHAMP, William, clergyman, b. in Kent co., Del., 26 April, 1772; d. in Paoli, Ind., 7 Oct., 1824. He was the son of a Methodist circuit-rider, his boyhood was spent in the western part of Virginia. He entered college at the age of eighteen, began preaching at nineteen, and at twenty-one was travelling under the direction of the presiding elder. Impressed with the importance of reading and study for a minister of the gospel, he devoted all possible time to intellectual improvement, studied law, and in 1798 became an accomplished classical and Hebrew scholar. In 1794 he joined the itinerants, his circuit lying between the south branches of the Potomac. In 1796 he was ordained deacon, the next year elder, and stationed in New York, and from this time he had the varied experiences of a Methodist preacher, being stationed in Boston, Ohio, Niantucket, Virginia, Illinois, Indiana, and elsewhere. In 1801 he married Mrs. Frances Russell of Niantucket, a widow, who thereafter became an important help to him in his ministerial work. Everywhere he preached with great success, and, being a man of wonderful versatility, he turned his hand to every useful work that could bring him in contact with the people. In 1815 he took editorial charge of the "Western Christian Monitor," then the only Methodist Episcopal publication issued in the country; and in this, as in everything that he undertook, he achieved a decided success. In 1817 he began to build up the town of Mount Carmel, Ill., and during its early days acted as pastor, teacher, and civil engineer, lawyer, and master mechanic. In 1823 he was appointed presiding elder of the Indiana district, then embracing nearly the whole state. He exerted a marked influence wherever he went, and always proved himself a natural leader of men. In 1811 he published "Essays on the Christian Religion," and a sermons, and a series of "Letters on the Hierarchy," with an introduction by Bishop Soulé, appeared after his death. BEAUGRAND, Honoré, Canadian journalist, b. in Lamonie, county Berthier, province Quebec, 24 March, 1848. He was educated at Joliette college, and at the military school, entering the latter in 1863, joined the French force under Gen. Gallop in Mexico, and, after the unfortunate termination of the attempt to install Maximilian as emperor of that country, returned with the French troops to their own country. After remaining nine months in France he went to New Orleans in 1868 and became a journalist. Subsequently he was connected with the press in St. Louis, Boston, Chicago, Lowell, and Fall River. In 1878 he returned to Canada and founded "La Patrie" in Montreal, in place of "Le National," which had recently been suppressed. Since then he has worked as a magazine and political writer, has been decorated by the academy of France, and in 1885 received the cross of the legion of honor from President Grévy of the French republic. M. Beaugrand has been mayor of Montreal for several years, and has been conspicuous by his prohibition of the Orange procession in that city in December. BEAUMARCHAIS, Alexandre de (bo-mar-nay), soldier, b. in Martinique in 1709; d. in Paris, 23 July, 1794. This officer, a viscount of France, held a major's commission under Rochambeau in the French contingent during the revolutionary war. Returning to France, he married Josephine d'Adhemar, and was elected to the States-general from the city of Blois, joined the tiers-état, became president of the national assembly, general of division in the army of the Rhine in 1793, and minister of war in 1793. During the reign of terror he fell under the suspicion of the revolutionary tribunal, was falsely accused of having treacherously diverted the army, and was subsequently promoted to the rank of major-general, and "guillotined." His widow became the mother of the great Napoleon Bonaparte, then a general in the French army, and with him ascended the throne of France. BEAUMARCHAIS, Charles de la Bolsche, soldier, b. about 1679; d. 12 June, 1749. He entered the navy as a boy, and was rapidly promoted to the rank of commodore. He was made a marquis of France, governor and lieutenant-general of New France, 11 Jan., 1729; commander of the order of St. Louis, 21 April, 1732; chevalier, lieutenant-general des armées navales, 1 Jan., 1748, at which time he was also governor of Quebec. He was thus for more than twenty years military commander of the French possessions in America, and was ordered the construction of the fort, afterward famous, at Crown Point. BEAUJEU, Hyacinthe Marie L. de (bo-zhoo), soldier, b. in Montreal, 9 Aug., 1711; killed during an action, 9 July, 1757, at the siege of Fort Carillon. His service was in the French navy, where he attained the rank of captain and was awarded the cross of St. Louis for distinguished services. He obtained the seigniory of La Colle on Champlain river, Canada, in 1753, succeeded Contrecour in command at Fort Duquesne in 1755, and planned the embarkation that resulted in Braddock's defeat, 9 July, 1755. Beaujeu was in command of the French and Indians, and was killed by the first fire of the British. See "Relations diverses sur la bataille de Monongahela," collected by J. M. Shea (New York, 1890). BEAJOUR, Louis Félix de (de-bzhoo), author, diplomatist, b. in Provence in 1707; d. in July, 1786. After serving as secretary of legation for France, at Munich and Dresden, and as consul-general in Sweden and Greece, he was appointed consul-general and chargé d'affaires in the United States in 1804. During his residence in America he prepared "A Sketch of the United States at the Commencement of the Nineteenth Century," which, after passing with an admirer of the map, was published in 1830, and is still consulted as one of the more trustworthy of the early foreign books about America. BEAUMARCHAIS, Pierre Augustin Caron de, French author, b. in Paris, 24 Jan., 1752; d. 18 May, 1799. He was the son of a watchmaker named Caron, and his inventive and musical tab-
ents gained him admission to the court. Through business associations with the financier Durevicy he acquired a fortune, which he augmented by a wealthy marriage. His eloquent pleadings in a
suit, brought against him by the heir of his partner, Durevicy, rendered him conspicuous as a
victim of injustice and a champion of liberty. In 1775 he memorialized the king in advocacy of aid-
ing the American colonies in their struggle with the British crown. He held negotiations with
Arthur Lee, agent of the colonists, and finally per-
suaded the prime minister, Maurepas, to sanction a
large sum of money and supplies, in addition to
an equal sum from the Spanish government. Ar
ms and ammunition for the American soldiers were de-
livered from the public arsenals to Beaumarchais,
operating under the firm name of Roderique Hor-
tazez & Co., on his entering into an obligation to
replace them. In the early part of 1777 he shipped, in three of his own ships, 20,000
guns, 25,000
muskets, and 200,000 pounds of gunpowder, and
sent over on the “Amphitrite” 50 European offi-
cers, among the number La Rouerie, Paubais, and
Baron Steuben. The shipments were continued, but,
owing to an erroneous impression that the sup-
plies were a gift from the French government,
express bills to the value of 200,000 dollars, and the
French government advanced another million
francs to relieve Beaumarchais from his embarr
assments, and he persevered in forwarding sup-
plies until 1779. The United States were indebted
to Beaumarchais at the end of the transactions in
the sum of 4,000,000 francs, an obligation which the
American government was unable to meet, and
was finally discharged in the amount of 800,000
francs to his heirs. He engaged in a variety of financial speculations, such
as establishing a national bank of discount, supply-
ing Paris with water, publishing the collected works of Voltaire, etc., which were generally successful. His writings are remarkable for their
literary qualities, and some of them for their influ-
ence on events. The drama “Enigma” (1788)
was founded on experiences that befell his sister;
“Le Barbier de Seville” (1775) was very success-
ful; “Le Mariage de Figaro” (1784) brilliantly
satirized the aristocracy. During the French revolu-
tion he fell under the suspicions of the Monta-
gnards and fled to England, whence he issued a
manifesto deploring its six suspicion, disassociating
his attachment to the cause of liberty. He re-
turned and died suddenly during the directory.
See “Beaumarchais and his Times,” by M. de Lo-
menie, Paris, 1856; “Notice sur la vie de Bea-
umarchais,” by Saint-Marc Girardin; “Vie de P. A. Caron de Beaumarchais,” by Cousin d’Avalon
(1802); and “Essai sur la vie et les ouvrages de
Beaumarchais,” by E. Berger. His collected works
were published by Gudin de la Brenellerie (7 vols.,
Paris, 1809; new ed., 1821-7).

BEAUMONT, John G., naval officer, b. in
Pennsylvania, 27 Aug., 1821; d. 2 Aug., 1882. He
entered the navy as midshipman, 1 March, 1838, and
obtained promotion as master, 30 Aug., 1838. He
was lieutenant, 29 Aug., 1855; commander, July, 1862;
captain, 1872. He participated as commander of the
steamer “Aroostock,” of the North Atlantic blockading squadron, in the severe engagement with the confederate batteries at Fort Darling;
was attached to the South Atlantic blockading
squadron in 1863; was engaged as commander of a
wrecking party attacking the fortifications in
Charleston harbor, and took a prominent part in the
capture of Fort Wagner. He commanded the
steamer “Mackinaw,” of the North Atlantic block-
ading squadron, in the two attacks on Fort Fisher,
when his vessel was badly injured by the shot and
shell from the enemy's batteries.

BEAUMONT, William, physician, b. in Leba-
non, Conn., in 1796; d. in St. Louis, Mo., 20 April,
1853. He was a young cadet when stationed at Mackinaw, Mich., in 1822, had
occasion to treat a young man named Alexis St.
Martin, who had received the discharge of a shot-
gun in his left side. By good care the wound was
healed, but an opening remained, about two and
a half inches in diameter, penetrating into the
stomach. From this aperture Dr. Beaumont
was able to watch the process of digestion and to
make experiments, extending over a series of years,
regarding the digestibility of the different kinds
of food and the effect upon the stomach of alcohol
and various drugs; and he was the first to obtain
the gastric juice and study its properties. The re
sults of these physiological experiments were pub-
lished in 1835, and attracted much attention in
America and Europe. After resigning from the
army, Dr. Beaumont practised medicine in St.
Louis, and he continued the experiments upon St.
Martin until his own death.

BEAUMONT DE LA BONNIÈRE, Gustave Auguste
de, French author, grandson of La-
vette, b. Beaumont-Chiles, in 1800, and
Sarthe, 6 Feb., 1802; d. in Paris, 22 Feb., 1866.
He was commissioned, with M. de Tocqueville, to
investigate the penal institutions of the United
States, came to this country for that purpose in
1831, and published a report on “The Penitentia
ry System of the United States and its Application
in France.” He married his cousin, the grand-
daughter of Lafayette, in 1836. He was elected to
the chamber in 1840, was a member of the consti-
tuent assembly of 1848, and was sent by Cavaignac
as ambassador to England. In 1851 he was im
prisoned for opposing the coup d’état of 2 Dec.
His principal other published writings are “L’Es
margue aux États-Unis,” of which a translation
has appeared in the United States, and
“L’Irlande, sociale, politique, et religieuse” (1839).

BEAUREGARD. Pierre Gustave Tontant,
soldier, b. near New Orleans, La., 28 May, 1818; d.
there, 20 Feb., 1889. He was graduated at
West Point in 1838. Among
his classmates were the future
confederate gen-
eerals Hardee and
Sibley and the
federal gen-
erals
Barry, Nichols,
Granger, and
McDowell. He was
assigned first to
the artillery and
then to the en-
gineers, and from
1838-9 was as-
sistant in the con-
struction of Fort
Adams, Newport.
He was on
engineering duty at
Barataria, La., in
1840-1, at the passes of the Mississippi in
1841-2, and at Fort McHenry, Md., in 1844-5. At
the beginning of the war with Mexico, he was engaged in
the construction of defences at Tampico (1846-7),
sieg operations at Vera Cruz (9 to 29 March, 1847), Cero Gordo (April 17, 18), Conteras (Aug. 19, 20), Chapultepec (Sept. 13), and city of Mexico (Sept. 13, 14), where he was twice wounded. Shortly after the war he was assigned to duty in Lake Pontchartrain, and as constructing engineer of the custom-house in New Orleans. His supervisory duties extended over the gulf coast from Florida to the Rio Grande. On 23 Jan., 1861, he was detailed as superintendent of the military academy at West Point, but held the place only a few days, resigning his commission and his record as a military officer of the United States. He at once offered his services to the southern confederacy, then organizing to resist the authority of the federal government, and was placed in command of the defenses of Charleston, S. C. On the refusal of Maj. Robert Anderson to evacuate Fort Sumter, he was ordered to attack the fort on the morning of 12 April, 1861. After a cannonade of several hours, during which, according to the official reports, not a single life was lost on either side, Fort Sumter, with ammunition and provisions nearly exhausted, capitulated to Gen. Beauregard, and the garrison marched out with the honors of war. Beauregard was almost immediately ordered to Virginia, where he was practically in command at the battle of Bull Run (July 21), though superseded at the last moment by Gen. J. E. Johnston. Here he was again victorious. In the spring of 1862 he was ordered to Tennessee, as second in command to Gen. A. S. Johnston, and when that officer was killed at the battle of Shiloh, April 6, Beauregard took command and nearly subsided in routing the northern army. The next day, however, the federals having been re-enforced, he was compelled to retreat by Gen. Grant, falling back in good order to Corinth, Miss., where he made a successful defence until 29 May, when he evacuated the place, destroying all his stores, and retreating westward towards the Tennessee river, and then his forces were crippled and his railroad. Gen. Beauregard's health failed after this campaign, and he was on leave of absence until August, when, with the full rank of general, he was again placed in command at Charleston, which for a year and a half (Sept. 1862, till April 1864) he defended against the formidable siege operations under Gen. Gillmore and Admirals Dupont and Dahlgren. In May, 1864, when Gen. Grant was closing in upon the approaches to Richmond, Beauregard re-enforced Lee, defeated Butler at Drury's Bluff, and held Petersburg against the federal advance. In October he was appointed commander of the military division of the west, and sent to Georgia to resist the march of the federals under Sherman. The attempt proved futile, and, joining forces with Gen. J. E. Johnston in North Carolina, he surrendered with that officer to Gen. Sherman in April, 1865. After the war he became president of the New Orleans, Jackson, and Mississippi railroad, adjutant-general of the state, and manager of the Louisiana Central Railway; he also published, in 1887, "The Memoirs of Gen. Beauregard in the War between the States, 1861-5," by Col. Alfred Roman (New York, 1884). Gen. Beauregard is the author of "Principles and Maxims of the Art of War" (Charleston, 1863), and "Report of the Defence of Charleston" (Richmond, 1864).
had scarcely reached the front and assumed command at the advanced line when his right leg was shattered by a rifle-ball. Amputation followed, and, although his life was saved, he was no longer capable of active military service. He was brevetted brigadier-general of volunteers, Nov., 1864, and mustered out of service at his own request on 22 Dec., of that year, refusing to remain in the army on light duty as he was urged to do. He repeatedly declined promotion that would have taken him away from his own regiment, feeling bound to remain with the men whom he had enlisted. In civil life, he was a lawyer with a law office in Lititz, Pa., A. Beck was assistant judge of the court of common pleas of Lebanon county, and was a member of the board of trustees of the Pennsylvania State College, in 1873, and has been very influential in increasing its usefulness and prosperity. He has taken active part as a speaker in the campaigns of the republican party, and at the state convention of Lebanon county in 1883, was encouraged to devote himself to the instruction of the deaf and dumb by his godfather, the Abbé Sicard, under whose direction he qualified himself for the task. He published "Essai sur les sourds-muets et sur le langage naturel" (1817), and afterward became a professor in the royal institution for the deaf and dumb. His work was much jealous of, and, in 1825, he was compelled to resign his professorship and return to his native island. His other publications were "Monographies, ou Essai d'écriture mimique" (Paris, 1822); "Manuel d'enseignement pratique" (1827); and "Éloge historique de l'abbé de l'Épeé."

BEKKER, Diego. Spanish navigator, d. in 1523. He was an officer in the army of Cortés, conqueror of Mexico. When the ship "Concepción" was built at Tepanecoy by order of Cortés, Becerra was given command of her, and went, 30 Nov., 1533, to explore the coasts of the southern sea. A short time after he had begun the work his ship was captured by the English, and was never recovered.

BECERRA, Francisco (becker-rab), Spanish architect, lived in the latter part of the 16th century. He established himself in Puebla de los Angeles, Mexico, and built there the cathedral and several convents. The famous cathedral of Lima, the church of Cuzco, and several bridges, are also numbered among his works, which rank with the best specimen of architecture in Spanish America.

BECHLER, John Christian, Moravian bishop, b. on the island of Oesel, 7 Jan., 1784; d. in Hermann, Saxony, 18 April, 1857. He was educated at the Moravian college and theological seminary in Germany, came to the United States in 1804, and entered the boarding-school of Nazareth Hall, at Nazareth. On the 15th of Feb., 1836, he was thus over the southern district. In the following year he went to Europe as a member of the general synod, and did not return, but proceeded to Russia, where he stood at the head of the Moravian establishment at Sarepa, and subsequently was the principal of a similar establishment at Zeist, in Holland. Bishop Bechler was endowed with rare musical talent, and composed various anthems and tunes, some of which are still in use.

BECK, Charles (1814), educator, b. in Heidelberg, Germany, 19 Aug., 1798; d. in Cambridge, Mass., 19 March, 1866. After completing his theological studies at Berlin and Tübingen, he was employed for some time as tutor at the university of Basle, Switzerland; but his republican sentiments endangered his liberty, and he took refuge in the United States. He was elected to the New York in December, 1824. Soon afterward he became connected with the seminary, as teacher, with the Round Hill school at Northampton, Mass., until, in 1830, he, in connection with two other teachers, established a school at Phillips-town, on the Hudson, opposite West Point. In 1832 Prof. Beck was elected to the chair of Latin language and literature at Cambridge, and, on his retirement from that professorship in 1850, he devoted himself to literary pursuits and classical studies. In 1863 he published "The Manuscripts of the Satyricon of Petronius Arbiter, described and collated." He was for two years a representative of Cambridge in the state legislature. He was specially interested in the soldiers' fund, the sanitary commissions, and the agencies for the care and education of the freedmen.

BECK, George, poet, b. in England in 1749; d. in Lexington, Ky., 24 Dec., 1812. He was instructor in mathematics at Woolwich from 1776, but was afterward dismissed. He emigrated to the United States in 1785, and was employed in painting maps and charts for the French minister. He published two volumes of Latin and French poems, made poetic translations from Amorron, Horace, and La Fontaine, and in 1812 published "Observations on the Comet." In 1795 he served as a scout in Wayne's campaign against the Indians. With his wife, who was also an artist, he conducted for many years a female seminary in Lexington, Ky.

BECK, James Bourn, U. S. senator, b. in Dunfries, Scotland, 13 Feb., 1722; d. in Washington, D. C., 3 May, 1800. He received an academic education in his native country, and, with his parents, settled in Lexington, Ky., and was graduated at the law school of Transylvania university in that place in 1846. He then practised law in Lexington, and in 1866 was elected to congress, serving four consecutive terms. In 1865, May, 1876, he was appointed a member of the commission to define the Virginia and Maryland boundary, and in the same year was elected to the U. S. senate. He took his seat on 4 March, 1877, was re-elected in 1882 for the term ending in March, 1889, and was re-elected for a third term. During his congressional career Mr. Beck served on important committees, and was prominent in important debates. He was specially interested in questions relating to the tariff and the currency.

BECK, Paul, philanthropist, b. in Philadelphia about 1760; d. there, 22 Dec., 1844. His father emigrated from Nuremberg in 1732. The son acquired a large fortune in the wine-trade, and for several years resided in London and Paris. In 1799 he returned to Philadelphia. He was one of the founders of the Philadelphia academy of fine arts, a benefactor of the deaf and dumb institution of that city, president of the American Sunday-school Union, and a contributor to various other charitable and religious undertakings.

BECK, William, diocese of Romeyn, physician, b. in Schenectady, N. Y., 11 April, 1741; d. in Utica, N. Y., 19 Nov., 1855. He was a son of Caleb Beck, and of English descent. He was graduated at Union in
1807, and, after graduation at the College of physicians and surgeons in New York, began to practice in Albany in 1811. In 1814 he presented to the Albany society of arts a comprehensive paper on the mineral resources of the United States. In 1815 he was appointed professor of the institutes of medicine, and lecturer on medical jurisprudence in the College of physicians and surgeons of western New York, and in 1817 he became principal of the Albany academy, which he directed until 1818. He was also professor of the medical jurisprudence at Fairfield medical college from 1826 till 1836, and professor of materia medica in that institution from 1836 till 1840, and in Albany medical college from 1840 till 1854. He was chosen president of the New York state medical society in 1829, and became a member of the state lunatic asylum, and in 1854 president of the board of managers. He collected statistics on deaf-mutes, which influenced the legislature to pass laws for the education of that class. From 1849 to 1853 he edited the "American Journal of Insanity." His principal work was "Elements of Medical Jurisprudence," in which he aided by his brother, John Brodhead. The first edition was printed in 1823; a seventh edition, with notes by Dunlap and Darwell, was issued in London in 1842, and a tenth in Albany in 1850. Dr. Beck also contributed to scientific journals.—His brother, John Brodhead, physician, b. in Schenectady, N. Y., 18 Sept., 1794; d. in Rhinebeck, N. Y., 9 April, 1851. He was a nephew of the Rev. John B. Romeyn, in whose house he was educated. He was graduated at Columbia in 1813, and began the practice of medicine in 1817. From 1822 till 1829 he edited the "New York Medical and Physical Journal." He became professor of materia medica and of botany in the college of physicians and surgeons in 1829, but exchanged the chair of botany subsequently for that of medical jurisprudence. He assisted T. Romeyn Beck in the preparation of his great work on medical jurisprudence (1823), and published "Medical Essays" (1843), "Infant Therapeutics" (1849), and "Historical Sketch of the State of Medicine in the Colonies" (1850).—Both brothers were graduates of the University of Pennsylvania, and graduated in medicine in 1817. They practiced medicine in New York City from 1823 till 1829, and were both elected professors of medicine and chemistry at Rutgers College in 1825. In 1836 they were appointed professors of medicine and chemistry at Rutgers and chemistry at the University of Pennsylvania in 1836, and professor of chemistry and pharmacy at Albany Medical College (1841–59). He also delivered a course of chemical lectures at Mid-
dlebury in 1837, and was appointed mineralogist to the geological survey of New York in 1837. His published works include "A Gazetteer of Illinois (1841)"; "An Account of the Salt Springs at Sabine" (1826); "A Manual of Chemistry" (1831); "Mineralogy of New York" (1842), probably his most important contribution to scientific literature; "On Adulterations" (New York, 1846); and "Botany of the United States North of Virginia" (1848). Gross's "American Medical History," "Philadelphia" ('54) and "The Sons of Volcanic Cones" (1855): "Notes on the Stratigraphy of California" (1885); "Cretaceous Metamorphic Rocks of California" (1886); "A Theorem of Maximum Dissipativility" (1886), which is a new fundamental law of mechanics, and one of its consequences is "A New Law of Thermo-Chemistry" (1886), which embraces the whole laws of this science and makes an important addition to them. He has also written "Atomic-Weight Determinations; A Digest of the Investigations published since 1814" (Washington, 1880); "Geology of the Comstock Lode" (1882); "Statistics and Technology of the Precious Metals," with S. P. Fournous (1885); and "Geology of the Quicksilver Deposits of the Pacific Slope" (1886).

BECKER, George Ferdinand, geologist, b. in New York city, 5 Jan., 1847. He was graduated at Harvard in 1868, studied at Heidelberg, receiving the degree of Ph. D. in 1869, and, two years later, passed the final examination of the Royal School of Mines in Berlin. From 1875 till 1879 he was a mining and metallurgy in the University of California, and in 1879 he became connected with the U. S. Geological Survey, and later was placed in charge of the California division of geology. In 1880 he was appointed special agent of the 10th census, and in 1882 was further appointed special agent in charge of the investigation of the precious-metal industries. His most important publications are "Geometrical Diagrams of Volcanic Cones" (1885): "Notes on the Stratigraphy of California" (1885); "Cretaceous Metamorphic Rocks of California" (1886); "A Theorem of Maximum Dissipativility" (1886), which is a new fundamental law of mechanics, and one of its consequences is "A New Law of Thermo-Chemistry" (1886), which embraces the whole laws of this science and makes an important addition to them. He has also written "Atomic-Weight Determinations; A Digest of the Investigations published since 1814" (Washington, 1880); "Geology of the Comstock Lode" (1882); "Statistics and Technology of the Precious Metals," with S. P. Fournous (1885); and "Geology of the Quicksilver Deposits of the Pacific Slope" (1886).

BECKER, Thomas Albert, R. C. bishop, b. in Pittsburg, Pa., 12 June, 1832; d. in Washington, Ga., 29 May, 1899. He studied at the Propaganda, Rome, and was ordained in 1859. On his return he went to Richmond, Va., and was afterward sent to Martinsburg, W. Va. In 1878 he was appointed bishop of the Diocese of Shenandoah. In 1886 he was transferred to the see of Savannah in May, 1886. Dr. Becker has contributed largely to reviews and periodicals, and his series of articles in the "American Catholic Quarterly," on the idea of a true university, attracted wide attention.

BECKFORD, William, West Indian planter, b. in Jamaica in December, 1709; d. in London, 21 June, 1770. After receiving his education in England, he fell heir to large plantations in the West Indies, and, entering public life, became a member of parliament and alderman of London in 1762, and was afterward alderman of London and in 1764, mayor of London. With John Wilkes, he led the popular opposition, and on 23 May, 1770, delivered a memorable remonstrance to the king, complaining of the falsification of election returns. He left estates worth £100,000 a year, and a million of money. His son was the author of "Valke."
BECKWITH, Amos, soldier, b. in Burlington, Vt., 4 Oct., 1823; d. in St. Louis, Mo., 26 Oct., 1894. He was graduated at West Point in 1843, and served in the Seminole war. During the civil war he was chief depot-commissary in Washington, chief of commissariat of the military division of the Mississippi, on the staff of Gen. Sherman in the Atlanta campaign, and, after the war, chief commissary of the department of the gulf. He was brevetted brigadier-general in the U. S. army on 13 March, 1863, and lieutenant-colonel on the general staff, 23 June, 1871. In 1888 he became full colonel, and was retired in 1889.

BECKWITH, Edward Griffin, soldier, b. in Cazenovia, N. Y., 25 June, 1818; d. in Clifton, N. Y., 22 June, 1881. He was graduated at West Point in 1842, served in the war with Mexico at Tampa and Vera Cruz, and was employed in Pacific railroad reconstructions in 1853-4; the records of which survey were published by congress. In the civil war he served as chief of commissariat of the 5th army corps, and of the army of Virginia, and in filling out Gen. Banks's Louisiana expedition. He was provost-marshal-general of the department of the gulf in 1863; in command of New Orleans from 25 Aug., 1863, till 12 Jan., 1864, also for a time chief commissary of the department, was made major on 8 Feb., 1864, and received the brevet rank of brigadier-general, U. S. army, on 13 March, 1865, for faithful and meritorious services during the war.

BECKWITH, Sir George, English soldier, b. in Barbadoes, in 1696. He came to America in 1721 as ensign, and rose to the rank of major in 1781. He commanded the British forces at the taking of Elizabeth-town and New Brunswick, and bore a distinguished part in other engagements. From 1787 till 1791, the period when there was no British minister to the United States, he was entrusted with an important confidential mission. In 1792 he was appointed governor of Bermuda, in 1804 of St. Vincent, and in 1808 of Barbadoes. In 1809 he conquered the French possession of Martinique, and in the following year he drove the French out of Guadeloupe. In 1814 he returned to England, and in 1816 took command of the military forces in Ireland.

BEDEL, Joseph, printer, b. in New York, 26 March, 1806; d. in Bath, N. Y., 26 Feb., 1875. His father was Gen. Moody Bedel. The son enlisted as a private in the Mexican war in 1847, and became captain in 1849. He was admitted to the bar in 1850, and practised in Bath until 1853, when he entered the treasury department at Washington, and remained there until the beginning of the civil war. He was then appointed lieutenant-colonel of the 3d New Hampshire volunteers, 27 June, 1862, was wounded, 10 July, 1863, and captured at Fort Wagner, 18 July, 1863. He was promoted colonel of that regiment, while a prisoner of war, 6 April, 1864, and paroled on 9 Dec. He was made a brigadier-general of U. S. volunteers, by brevet, while serving from 26 March, 1863, for gallant and meritorious services, and was mustered out of service 20 July, 1865. He represented the town of Bath in the legislature, and was several times the unsuccessful democratic candidate for governor.

BEDEL, Timothy, soldier, b. in Salem, N. H., about 1749; d. in Haverhill, N. H., in February, 1827. He served as a lieutenant in the French war. On 6 July, 1775, he was appointed captain of rangers, and on 13 Jan., 1776, colonel of the 1st New Hampshire regiment, joining the northern army under Schuyler. He was with Montgomery at the taking of St. John's, on the Sorel, and was
in command of the force at the Cedars, near Mont-
revel. He was attacked by Brant's Indians and
surrendered without resistance by order of Capt.
Butterfield, the subordinate officer in command
during the absence of Col. Bedel, who lay ill at
Lachine. Gen. Arnold threw the blame on Bedel,
who was deprived of his command, but was sub-
sequently reinstated. He was afterward major-
general of New Hampshire militia.

BEDELL, Gregory Thurston, P. E., bishop, b.
in Hudson, N. Y., 17 Aug., 1817; d. in New York,
11 March, 1892. His father was a clergyman, and
an author of much reputation. At the age of nine
years the son entered Rev. Dr. Muhlenberg's school
at Flushing, L. I., remaining until he was seven-
teen. He was graduated at the college in 1818,
was graduated at Bristol college, Pennsylvania,
in 1836, and at the Virginia theological seminary
in 1840. He was ordained deacon, 19 July, 1840,
and priest in August, 1841. He became rector of
Trinity church, West Chester, Pa., in 1841, and in
1843 was called to the rectoryship of the Church
of the Ascension, New York city. While there he
was elected bishop of Ohio, Oct. 6, 1845, and
seated 13 Oct., 1859, in St. Paul's church, Rich-
mond, Va. On the death of Bishop Mcilvaine, in
1873, he became bishop of the diocese. The year
following he gave his consent to the division of
his extensive jurisdiction, and the diocese of south-
ern Ohio was formed and a bishop chosen for it in
1875. The ecclesiastical position that was that of
the American evangelicals, Mcilvaine, Tyng, East-
ern, and others. Bishop Bedell published numer-
ous sermons and addresses, and also "Remem-
beration" (a work of his father's, with additions): "The
Pastor," a manual on pastoral theology (1880); a
"Memorial of Rev. Dr. Stephen H. Tyng." (New
York, 1881); a "Benedictus ex Officio of the American
Episcopal Apocalypse" (London, 1884).

BEDDING, Gregory Townsend, clergyman, b.
on Staten Island, N. Y., 28 Oct., 1793; d. in Balti-
more, Md., 30 Aug., 1854. His early education
was obtained chiefly at the Episcopal academy,
Cheshire, Conn. He was graduated at Columbia
college in 1811, studied for the ministry of the
Episcopal church, and was ordained by Bishop Ho-
bart, 4 Nov., 1814. His first charge was at Hud-
son, N. Y., where he remained three years. In
1818 he accepted a call to Fayetteville, N. C., but,
as his health was delicate and the climate did
not suit him, he removed to Philadelphia, Pa., in
May, 1822. St. Andrew's church was estab-
lished through his labors, and he acquired great
popularity as a preacher. In a few years,
however, his health failed, and the end came to him in
Baltimore, while on his return home from Bedford
Springs, Pa. Dr. Bedell published and was the
author of sacred poems and musical compositions.
Among his works are: "Bible Studies" (2 vols.,
1835); "The Christian's Progress"; "The Progression";
"Waymarks"; "Is it well?" and "It is well." The Rev.

BEDFORD, Gunning, patriot, b. in Philadel-
phia about 1760; d. in New Castle, Del., 30 Sept.,
1797. He was a lieutenant in the French war, and
entered the revolutionary army as major, 10
March, 1775. As lieutenant-colonel of Haslet's
regiment he was wounded at White Plains. On
18 June, 1776, he was appointed master-master-
general. He was a delegate from Delaware to the
old congress, 1783–5, and in 1796 was elected gov-
ernor of Delaware. —His cousin, Gunning, Jr., b.
in Philadelphia, Pa., in 1775, d. in New Castle,
Del., 30 March, 1812, was graduated at the College
of New Jersey in 1781, delivering the valedictory
oration. After graduation he studied in the law-
office of Joseph and Peter Mcllvaine, and was ad-
mitted to the bar, and practised law at Dover and
afterward at Wilmington, Del. During the revolu-
tionary war he acted for a short time as aide-de-
camp to Gen. Washington. Resuming his prac-
tice after the close of the war, he was in the
office of New Haven and in the course of a few years elected to the Delaware
house of representatives. He represented Dela-
ware in the continental congress from 1783 till
1786, and was also a member of the constitutional
convention, in which he took an active part, and
by his eloquence influenced the decision of the
convention to give the same representation in
the senate to large and small states. He was a
member of the Delaware board in 1789 and in 1793. He
became attorney-general of the state, and remained
in that office until the organization of the gov-
ernment in 1789, when President Washington ap-
pointed him U. S. judge for the district of Dela-
ware, which place he held until his last illness.—A
grand-nephew of the latter, Gunning Samuel,
b. at Baltimore, Md., 5 Sept., 1814, was graduated
at Mount St. Mary's college, Emmetsburg, Md., in
1835, with the highest honors of his class. He received his medical
diploma from Rutgers medical college in 1839,
and soon afterward visited Europe, where for two years
he continued his medical studies. On his return
in 1843, he was admitted as resident physician
in the medical college at Charleston, S. C., and subsequently
was called to a professorship in the new medical college
founded by Dr. Alden March, in Albany, N. Y.
He removed to New York about 1836, and soon
commanded a large practice in obstetrics. In con-
cert with the late Dr. Valentine Mott, his former
preceptor, and Dr. George Bedell, of Philadelphia,
Bedford projected the university medical college
in 1849, and took the chair of obstetrics, which he
retained until 1862. Dr. Bedford first introduced
into the United States obstetrical clinics for the
gratuitous treatment of poor women. He was the
author of two standard treatises on his special de-
partment of medicine. His "Diseases of Women
and Children" passed through ten editions in this
country, and his "Principles and Practice of Ob-
stetrics" five editions; and both have been repub-
lished in England, and translated into French and
German.—His son, Dr. Henry Moore, d. at Rich-
field Springs, 30 Aug., 1890, was his assistant in
the obstetrical clinic, the establishment of which
was accomplished against strong opposition.

BENDING, George Michael, soldier, b. in Vir-
ginia about 1750; d. at Lower Blue Licks, Ky.,
b. about 1830. He was one of the early emigrants to
Kentucky, and served as adjutant in the expedi-
tion of 1779 against Chillicothe, as major at the
battle of Blue Licks in 1782, and did valuable ser-
vice. He was elected major, and commanded the
American battalion. He was a major of U. S. infantry in 1792–3. He was a
member of the Kentucky legislature in 1792, and
represented that state in congress from 1803 till
1807. —His son, Henry (diplomatist), was born near
Shepherdstown, Va., in 1810, and died there 26
Nov., 1858. He practised law in Shepherdstown,
and afterward in Charlestown, in 1845 succeeded
his partner and brother-in-law, Gen. George Rust,
as member of congress, and was re-elected for the
following term. From 1853 till 1854 he was U. S.
minister to Denmark, and while at Copenhagen he
negotiated a treaty that settled the question of the Sound
cues.
BEDLE, Joseph D., jurist, b. in Monmouth county, N. J., 3 Jan., 1831; d. in New York city, 21 Oct., 1884. He practised law in Maitteawan, and subsequently in Freesthield, N. J., and in 1860 was appointed a judge of the superior court. In 1874 he was elected governor of the state of New Jersey, making an excellent record. After completing his term he resumed practice.

BEDON, Pedro, South American clergyman, b. in Quito, Ecuador, d. there in 1092. He entered the novitiate of the Franciscan order at the age of fourteen, completed his studies in Lima, and was then appointed professor of philosophy in the college of that city. In early life he had cultivated painting, and when afterward he had recovered from a dangerous malady, he resolved to devote his leisure to painting pictures of the Blessed Virgin. Several of his works are in the convents of Quito and Santa Fe, and a report says that the title his countrymen gave him of the Fra Angelico of Ecuador. He founded the convent of La Peña in Quito, and then went to Rio-Bomba, where he founded another convent, but returned to Quito on learning that he had been elected prior of La Peña. In 1619 he was chosen provincial of his order, and held the post with great success, being president of the convention of the provincial chapter of the Province of Quito in 1624, and was graduated in 1797. After this he continued his studies until September, 1798, when he was licensed to preach by the New Haven West Association, entered upon his clerical duties by supplying the pulpit in the Presbyterian church at East Hampton, Long Island, and was ordained in 1800. Before he married his first wife, Roxana Elliott, His salary was $800 a year, after five years increased to $400, with a dilapidated parsonage. To eke out his scanty income, his wife opened a private school, in which the husband also gave instruction. Mr. Beecher soon became one of the foremost preachers of his day. A sermon that he delivered in 1804, on the death of Alexander Hamilton, excited great attention. Finding his salary wholly inadequate to support his increasing family, he resigned the charge, and in 1810 was installed pastor of the Congregational church in Litchfield, Conn. Here he remained for sixteen years, during which he took rank as the foremost clergyman of his denomination. In his autobiography he says this pastorate was the happiest of his life, and that the experience of intemperance had become common in New England, even the formal meetings of the clergy being not unfrequently accompanied by gross excesses, and Mr. Beecher resolved to take a stand against it. About 1814 he delivered and published six sermons on intemperance, which contain eloquent passages hardly exceeded by anything in the English language. They were sent broadcast through the United States, ran rapidly through many editions in England, and were translated into several languages on the continent, and have had a large sale even after the lapse of fifty years. His eloquence, zeal, and courage as a preacher, and his leading the way in the organization of the Bible, missionary, and Sunday school societies, made him known throughout New England. During his residence in Litchfield arose the Unitarian controversy, in which he took a prominent part. Litchfield was at this time the seat of a famous law school and several other institutions of learning, and Mr. Beecher (now a doctor of divinity) and his wife undertook to supply the breaching of several young women, who were received into their family. But here too he found his salary ($800 a year) inadequate. The rapid and extensive defection of the Congregational churches in Boston and vicinity, under the lead of Dr. Channing and others in sym-
pathy with him, had excited much anxiety throughout New England; and in 1826 Mr. Beecher received a call to become pastor of the Hanover street church in Boston. At the urgent request of his clerical brethren he declined the call on the ground of his unwillingness to hold the doctrines of Puritanism, and remained in this church six years and a half. His sermons at this time were largely controversial; he flung himself into the thickets of the fray, and was sustained by an immense following. About this time the religious public had become impressed with the growth of the revival, held in the Kenilworth church, and a theological seminary had been founded at Walnut Hills, near Cincinnati, O, and named Lane Seminary, after one of its principal benefactors, and a large amount of money was pledged to the institution on condition that Dr. Beecher accept the presidency, which he did in 1832. He retained the place for twenty years, and his name was entered in the seminary catalogue, as president, until his death. He was also, during the first ten years of his presidency, pastor of the Second Presbyterian church in Cincinnati. Soon after his removal thither he startled the religious public in the east by a tract calling attention to the danger of Roman Catholic supremacy in America. In 1839, the agitation in England for reform and against colonial slavery, and the punishment by American courts of citizens who had dared to attack the slave-trade carried on under the American flag, had begun to direct the attention of American philanthropists to the evils of American slavery, and an abolition convention met in Philadelphia in 1838. Its president, Arthur Campbell, who secured liberal donations Dr. Beecher had been secured to Lane seminary, forwarded to the students a copy of the address issued by the convention, and the whole subject was soon under discussion. Many of the students were from the south; an effort was made to stop the discussions and the meetings; slavery seemed to threaten its future; the students withdrew under the spell of mob violence; and for several weeks Dr. Beecher lived in a turmoil, not knowing how soon the rabble might destroy the seminary and the houses of the professors. The board of trustees interfered during the absence of Dr. Beecher, and allayed the excitement of the mob by forbidding all further discussion in the seminary and all public meeting of the students withdrew under the encouragement of those who believed in the advantages of the students withdrawing. A very few were persuaded to return and remain, while the seeders laid the foundation of Oberlin College. For seventeen years after this, Dr. Beecher and his able co-worker, Prof. Stowe, remained and tried to revive the prospect of the seminary, but at last abandoned it. The great project of their lives was defeated, and they returned to the eastern states. In 1855 Dr. Beecher, who had been called "a moderate Calvinist," was arraigned on charges of hypocrisy and heresy by some of the stronger Calvinists. The trial took place in his own church; and he defended himself, while burdened with the cares of his seminary, his church, and his wife at home, by himself. The French revolutionists, and, and, on an appeal to the general synod, he was again acquitted; but the controversy engendered by the action went on until the Presbyterian church was rent in twain. In the theological controversies that led to the exclusion of a portion of the general assembly of the Presbyterian church in 1857–8, Dr. Beecher was in the thick of the conflict. In 1858 he resigned the presidency of Lane Seminary, and returned to Boston, purposing to devote himself mainly to the revival and publication of his works. But his intellectual powers began to decline, while his physical strength was unabated. About his eightieth year he suffered a stroke of paralysis, and thenceforth his mental powers only glowed out occasionally with some indications of their former splendor. The last ten years of his life were spent in the home of his son, Henry Ward Beecher. Dr. Beecher was a man of great intellectual power, though not a profound scholar. His sermons were usually extemporaneous, as far as form was concerned, but were carefully thought out, often while he was engaged in active physical exercise; but his writings were carefully prepared. He stood unequaled among living divines for dialectic keenness, pungent appeal, lambent wit, vigor of thought, and concentrated power of expression. He possessed intense personal magnetism, and an indomitable will, and was thoroughly devoted to his chosen work. The sincerity and spirituality of his character, probably more than any positive errors, that made him a subject of anxiety to the more conservative class of the theologians of his own denomination. His great boldness in denouncing laxity in regard to the standard of the Christian orthodoxy, and his indomitable will, has Weinhold. Since his death in 1863, Mr. Allen has written "Tappan's Life," "About America," "Life and Services of Lyman Beecher," and "Peregrination in the East," "Six Sermons in Temperance," "Sermons on Various Occasions," "Views in Theology," "Skepticism," "Lectures on Various Occasions," "Political Atheism." He made a collection of his works which he deemed the most valuable (3 vols., Boston, 1852). He was three times married; the first in 1799, 1817, and 1836—and had thirteen children. Most of his children have attained literary or theological distinction. All his sons became Congregational clergy, viz., William Henry, Edward, George, Henry Ward, Charles, Thomas Kimmer, and James Chaplin. The daughters are Catherine Esther, Harriet Beecher Stowe, Louisa Beecher, and Harriet Beecher Stowe. He was a man of polished mind. He was proverbially absent-minded, and after having been brought up by the excitement of preaching was accustomed to relax his mind by playing "Auld Lang Syne," or dancing the "double shuffle" in his parlor. His autobiography and correspondence was edited by the Rev. Charles Beecher (New York, 1883). See also "Life and Services of Lyman Beecher," by the Rev. D. H. Allen (Cincinnati, 1863).—His eldest child, Catherine Esther, educator, b. in East Hampton, Long Island, 6 Sept., 1800; d. in Elmira, N. Y., 12 May, 1878. The death of her mother when Catherine was about sixteen years of age brought upon her domestic responsibilities that lasted until after her father's second marriage, two years later. Her education was received in the seminary at Litchfield. She was betrothed to Prof. Fisher, of Yale, who was lost with the "Albion" off the coast of Ireland, while on a voyage to Europe, and she never married. Her brother, Henry Ward Beecher, said afterward that it nearly broke her heart to lose her faith in his religion, and her only consolation was in a life of earnest activity. In 1823 she opened a school for young ladies in Hartford, Conn., with such success that, under her supervision, with the assistance of her sister, Harriet (afterward Mrs. Stowe), it num-
bered 160 pupils. It was maintained for ten years. Comprehending the deficiencies of existing textbooks, she prepared, primarily for use in her own school, some elementary books in arithmetic, a work on theology, and a third on mental and moral philosophy. The last was never published, although printed and used as a college text-book. The gist of her theories on the subject of teaching was that the physical and moral training of her pupils was quite as important as the development of their intellectual powers. She also claimed that a housekeeper is responsible for the health of all the family, not the men alone, and that no child, whether he be a master or servant who has not the needful knowledge and discretion. She was constantly making experiments, and practising them upon the girls, weighing all their food before they ate it, holding that Graham flour and the Graham diet were better for them than richer food. Ten of her pupils went to the west to study, and sought the aid of educated women throughout the land. She was for many years engaged with ex-Governor Slade, of Vermont, in a scheme for introducing woman teachers into the west. The name given to the organization was "The National Board of Popular Education"; and it was claimed that hundreds of the best teachers were engaged by the women and there under the patronage of this system. To a certain extent the scheme succeeded, and were found beneficial; but the careers of the teachers were mostly short, for they soon married. She had a mind full of original vigor, but without much imagination; it was perhaps the want of this that made some of her schemes impracticable. She had a great deal of mey humor and mother-wit, with patience, ingenuity, and unbounded good-nature. Her conversation was full of fresh comments on persons and things, without the least bitterness or malice. It was her rule to make her own common sense the standard of judgment, and she doubted the value of anything not commended by that. She continued in her later years to publish health hints, and to sing, and playing the piano and the guitar; but her performances were those of a past generation, as she had no belief in modern or classic music. She believed that what she could not comprehend could not exist. It was so also in art. The work of the masters and medieval art had no meaning for her; and a collection of a hundred and fifty of the men of art were collected as "full of Virgins and Son," with "a picture of Christ all rubbed out," "a Psyche with the top of her head knocked in," and "Venus without arms." She occasionally wrote verses, and was sometimes an attendant at women's conventions and congresses. For many years she suffered from lameness and weakness of nerve and body, and all her work was carried on under great bodily difficulties. In early life she was Calvinistic in belief, but in her later years became a communicant of the Protestant Episcopal church. Miss Beecher's published works include "Letters on the Difficulties of Religion" (Hartford, 1839); "The Moral Instructor" (Cincinnati, 1838); "Treatise on Domestic Economy" (Boston, 1842); "Marriage Rights of Women" (New York, 1845); "Duty of American Women to their Country" (1845); "True Remedy for the Wrongs of Women, with a History of an Enterprise having that for its Object" (Boston, 1851); "Letters to the People on Health and Happiness" (New York, 1855); "Physiology and Calisthenics" (1856); "Common Sense applied to Religion" (1851), a book containing some of her views. In early life she was a member of the Calvinistic theology. "An Appeal to the People, as the Authorized Interpreters of the Bible" (1860); "Religious Training of Children in the School, the Family, and the Church" (1864); "Woman's Profession as Mother and Educator, with Views in Opposition to Woman Suffrage" (Philadelphia, 1872); "Women's Housekeeping and Housekeeper" (New York, 1873); and with her sister, Mrs. Harriet Beecher Stowe, "The American Woman's Home" (New York, 1869); "Principles of Domestic Science as applied to the Duties and Pleasures of Home" (1870); and also a "Domestic Receipt-Book," of which numerous editions have been sold. Apart from the books relating to her special education, she published "Travels of a Female" (Philadelphia, 1848), by her brother, George Beecher (1844); and "Truth Stranger than Fiction" (Boston, 1850), an account of an infelicious domestic affair in which some of her friends were involved. She left an autobiography nearly completed.—Her eldest son, William Henry, clergyman, b. in East Hampton, L. I., 15 Jan., 1802; d. in Chicago, Ill., 29 June, 1867. His education was obtained at home, and then he studied theology under his father and at Andover. In 1833 he received the honorary degree of A. M. from Yale. For many years he was a home missionary on the Western Reserve, and held charges in Putnam, Toledo, and Chillicothe, Ohio, and in Reading, North Brookfield, Mass. He died at Cleveland, 27 Aug., 1863; d. in Brooklyn, N. Y., 28 July, 1865. He was graduated at Yale in 1822, studied theology at Andover and New Haven, became tutor in Yale in 1825, and then removed to Boston to take charge of the Park street congregation. Here he remained from 1826 till 1839, when he was elected president of Illinois College, Jacksonville. In 1844 he returned to Boston, as pastor of Salem street church, and in 1855 he became pastor of the Congregational church at Galesburg, Ill., where he remained until 1870. For some years he was professor of exegesis in the Chicago Theological Seminary. In 1872 he retired from the ministry and removed to Brooklyn, N. Y. He married Miss Izard, a pupil of her brother, and a graduate in 1839 of Marietta College in 1841. He was a constant contributor to periodicals, was senior editor of "The Congregationalist" for the first six years of its existence, and after 1870 was a regular contributor to the "Christian Union." His two works on the "Ages" gave rise to much discussion, and have modified doctrinal and ethical views, especially of human destiny. The central idea presented is that man's present life upon earth is the outgrowth of a former life as well as the prelude to a future one; that during the ages a conflict has been
going on between good and evil, which will not be
terminated in this life, but that sooner or later all the long strides of ages will become harmonized into an everlasting accord. He has published "Aid to the Kingdom of God" (Boston, 1825); "Six Sermons on the Nature, Importance, and Means of Eminent Holiness throughout the Church" (New York, 1835); "History of Alton Riots" (Cincinnati, 1837); "Statement of Anti-Slavery Principles and Address to People of Illinois" (1857); "Baptist, its Import and Modes" (New York, 1859); "Conflict of Agendas" (1853); "Papal Conspiracy exposed" (New York, 1855); "Concord of Ages" (1860); "History of Opinions on the Scriptural Doctrine of Future Retribution" (1876).—Another son, George, clergyman, b. in East Hampton, L. L., 6 May, 1849; d. in Chillicothe, Ohio, 1 July, 1863, was graduated at Cornell University, and afterward at Chillicothe, Ohio. His death was caused by an accidental discharge of a gun while shooting birds in his own garden. See the "Memoirs of George Beecher," by his sister Catherina (New York, 1878).—A third son, W. S., clergyman, b. in Litchfield, Conn., 24 June, 1813; d. in Brooklyn, N. Y., 8 March, 1887. At an early age he had a strong desire for a seafaring life, which he renounced in consequence of a deep religious impression experienced during a revival. He studied at the Boston Latin-school, in Mount Pleasant institution was graduated at Amherst in 1834, and then studied theology at Lane seminary, under the tuition of his father, who was president of the institution. He first settled as a Presbyterian minister in Lawrenceburgh, Indiana, in 1837, and married Fannie White, daughter of Dr. Artemas Bullard; then removed to Indianapolis in 1839, where he preached until 1847. In that year he received a call from Plymouth church, a new Congregational society in Brooklyn, N. Y., and almost from the outset he began to acquire that reputation as a pulpit orator which he maintained for more than a third of a century. The church and congregation under his charge were among the largest in America. The edifice has a seating capacity of nearly 5,000, and is strongly in demand for its conventionalities of the clerical profession. In his view, humor had a place in a sermon, as well as argument and exhortation, and he did not hesitate sometimes to venture so near the comic that laughter was hardly to be restrained. He was fond of illustration, drawing his material from every sphere of human life and thought, and his manner was highly dramatic. Though his keen sense of humor continually manifested itself, the prevailing impression given by his discourses was one of intense earnestness. The cardinal idea of his creed was that Christianity is not a series of dogmas, philosophical or metaphysical, but a rule of life in evil times. He never hesitated to discuss from the pulpit the great social and political crimes of the day, such as slavery, intemperance, avarice, and political abuses. In 1878 he announced that he did not believe in the eternity of punishment. He now held that all punishment is cautionary and remedial, and that no greater cruelty could be imagined than the continuance of suffering eternally, after all penalty had been gone: and in 1882 he and his congregation formally withdrew from the association of Congregational churches, since their theology had gradually changed from the strictest Calvinism to a complete disbelief in the eternity of future punishment. His sermons, reported by stenographers, for several years formed a weekly publication called the "Plymouth Pulpit." He early became prominent as a platform orator and lecturer, and as such had a long and successful career. His lectures came to be in such demand, even at the rate of $300 a night, that he was obliged to decline further engagements, as they interfered with his ministerial duties, and for a long time he refused all applications for public addresses except for some special occasion. In January, 1859, he delivered an oration at the celebration of the centennial anniversary of the birthday of Robert Burns, which is considered one of his most eloquent efforts. He became a member of the Republican party on its formation, and delivered many political sermons from his pulpit, also addressing political meetings, especially in 1856, when he took an active part in the canvass, not only with his pen but by speaking at meetings throughout the northern states. During the presidential canvass of 1884, Mr. Beecher supported the Democratic candidate, and by his action estranged many of his political admirers. In the long conflict with slavery he was an early and an earnest worker. In 1863 he visited all the principal cities of Great Britain on the questions involved in the civil war then raging in the United States, with a special view to disabuse the public in regard to the issues of the great struggle. His speeches exerted a wide influence in changing popular sentiment, which previously had been strongly in favor of the Confederacy, and were published in London as "Speeches on the American Rebellion" (1864). In April, 1865, at the request of the government, he delivered an oration at Fort Sumter on the anniversary of its fall. In 1878 he was elected chaplain of the 13th regiment, N. G. S. N. Y., and appeared on parade in the customary uniform. In 1871 one of his parishioners, Henry W. Sage, founded a lectureship of preaching, called "The Lyman Beecher Lectureship," in Yale college divinity school, and the first three annual courses were delivered by Mr. Beecher. In the summer of 1874, Theodore Tilton, formerly Mr. Beecher's associate, afterward his successor, in the editorship of the "Independent," charged him with criminality with Mrs. Tilton. A committee of Plymouth congregation reported the charges to be without foundation; but meanwhile Mr. Tilton instituted a civil suit against Mr. Beecher, laying his damages at $100,000. The trial lasted six months, and at its close the jury, after being locked up for more than a week, failed to agree on a verdict. They stood three for the plaintiff and nine for the defendant. Mr. Beecher was of stout build, florid, and of strong physical constitution. He was fond of domestic and rural life; a student of nature; a lover of animals, flowers, and gems; an enthusiast.
in music, and a judge and patron of art. He owned a handsome residence at Peekskill on the Hudson, which he occupied during a part of every summer. In 1886 he made a lecturing tour in England, his first visit to that country after the war. During his theological course for nearly a year Mr. Beecher edited the "Cincinnati Journal," a religious weekly. While pastor at Indianapolis he edited an educational journal, "The Farmer and Gardener," his contributions to which were afterward published under the title "Plain and Pleasant Talk about Fruits, Flowers, and Leaves." Mr. Beecher was one of the founders and for nearly twenty years an editorial contributor of the New York "Independent," and from 1861 till 1863 was its editor. His contributions to this were signed with an asterisk, and many of them were afterward collected and published as "Star Papers"; or, "Experiences of Art and Nature" (New York, 1855), and as "New Star Papers"; or, "Views and Experiences of Religious Subjects" (1858). The latter has been re-published in England under the title of "Summer in the Soul." On the establishment of the "Christian Union" in 1870, he became its editor-in-chief. To a series of papers in the "New York Observer" under the title "Thoughts as They Occur," by "One who keeps a daily record at open," and they were afterward published under the title of "Eyes and Ears." (Boston, 1864). In addition to the foregoing, Mr. Beecher published "Lectures to Young Men on Various Important Subjects" (Indianapolis, 1844, revised ed., New York, 1856); "Freedom and War: Discourses selected from the "Christian Union,"" (New York, 1864); "To Prayer" (New York, 1864); "Norwood; or, Village Life in New England" (1867); "Overture of Angels" (1869), being an introductory installment of "Life of Jesus the Christ; Earliest Scenes" (1871); "Lecture-Room Talks: A Series of Familiar Discourses on Themes of Christian Experience" (New York, 1872-4); "A Summer Parish: Sermons and Morning Services of Prayer" (1874); "Evolution and Religion" (1885). Also, numerous addresses and separate sermons, such as "Army of the Republic" (1875); "The Strike and its Lessons" (1878); "Doctrinal Beliefs and Unbeliefs" (1882); "Concerns of the Living on Wendell Phillips" (1884); "A Christmas to the Confederate" (1865); sketch of his trip through the west and south (1884); and "Letter to the Soldiers and Sailors" (1866), reprinted with introduction, 1884. He edited "Plymouth Collection of Hymns and Tunes" (New York, 1855), and "Revival Hymns" (Boston, 1858). Numerous compilations of his utterances have been prepared, among which are: "Life Thoughts" (New York, 1859), by Edna Dean Proctor; "Notes from Plymouth Pulpit." (1829), by Augusta Moore; both of the foregoing have been reprinted in England; "Pulpit Pungencies" (1866); "Royal Truths" (Boston, 1866), reprinted from a series of extracts prepared in England without his knowledge; and the title "Plymouth Pulpit" (New York, 1867); "Sermons by Henry Ward Beecher: Selected from Published and Unpublished Discourses," edited by Lyman Abbott (2 vols., 1868); "Morning and Evening Devotional Exercises," edited by Lyman Abbott (1870); "Comforting Thoughts" (1884), by Irene Ovington. Mr. Beecher published the second and concluding volume of his "Life of Christ," the title of which is "Christ's Life," which was published this year (1887), with a re-publication of the first volume. His biography has been written by Lyman Abbott (New York, 1883). A new life, to be written by his son, William C. Beecher, will include an unfinished autobiography. Mr. Beecher was buried in Greenwood cemetery, and a movement was immediately begun for a monument, to be paid for by popular subscription.—Ennue White, wife of Henry Ward, b. in Worcester co, Mass., 26 Aug., 1812; d. in Stamford, Conn., 8 March, 1897. When Mr. Beecher settled in his pastorate in Lawrenceburgh, Ind., he returned to the east to claim his bride, after an engagement extending over seven years. Mrs. Beecher was a contributor, chiefly on domestic subjects, to numerous periodicals, and many articles have been published in book form. During a long and tedious illness in her earlier married life, she wrote a series of reminiscences of her first years as a minister's wife, afterward published with the title "From Dawn to Daylight: A Simple Story of a Western Home" (1856), under the pen-name of "A Minister's Wife." She also published "Motherly Talks with Young Housekeepers" (New York, 1875); "Letters from Florida." (1878); "All Around the House: or, How to Make Homes Happy." (1878); and "Home." (1883).—Another son of Lyman, Charles, clergyman, b. in Litchfield, Conn., 7 Oct., 1815, studied at the Boston Latin School and Lawrence Academy in Groton, Mass., and graduated at Bowdoin in 1835. After a theological course in Lane Seminary, Ohio, he was ordained pastor of the Second Presbyterian church in Fort Wayne in 1844. He was dismissed in 1851, and became pastor of the First Congregational church in Newark, N. J., where he remained three years. In 1857, he took charge of the First Congregational church in Elberon, N. J., and continued until 1870 when he was removed to Florida, where for two years he was state superintendent of public instruction, and later, acting pastor at Wysox, Pa. Mr. Beecher is an excellent musician, and he selected the music for the "Plymouth Collection." He has published "The Incarnation, or Pictures of the New and Ever So," (New York, 1849); "David and his Throes" (1855); "Pen Pictures of the Bible" (1856); "Autobiography and Correspondence of Lyman Beecher" (1865); "Redeemer and Redeemed" (Boston, 1864); "Spiritual Manifestations" (1879); and "Eden Tableau." (1890).—Another son, Thomas Kinneid, clergyman, b. in Litchfield, Conn., 10 Feb., 1824, was graduated in 1844 at Yale college, where his father Edward was then president, was principal of the Northeast grammar-school in Philadelphia in 1846-8, and then became principal of the Hartford (Conn.) High School. Removing to Williamsburg, now a part of Brooklyn, N. Y., in 1832, he gathered and became pastor of the New Engah Congregational church, and in 1854 he removed to Elmira, N. Y., to take charge of the Independent Congregational church, afterward the Park church. He is known as an influential speaker and writer, and is distinguished for philanthropy. He wholly ignores sectarian feeling, and seeks to promote a fraternal spirit among the various Christian denominations. Since his residence in Elmira he has worked himself into the habit of causing all of righteousness and religion in that city and immediate vicinity. For many years he edited a weekly "Miscellaneous," first in the Elmira "Advertiser," and afterward in the "Gazette," discussing as they came up all the current questions of the day. Among these, in 1874, were a series of editorials that proved the danger of allowing the people of the United States never had been, and were not at the time, in favor of universal suffrage. He has lectured in the principal cities of the
United States, and against his wishes and counsel he has been nominated for political office by the greenback, the democratic, the prohibition, and the republican parties in the last three elections to the Senate. He was chosen chaplain of the 141st New York volunteers in 1863, and served with the army of the Potomac four months. He has pronounced mechanical and scientific tastes, and is a lover of art as well as a keen critic. He made a tour of England and France in 1853, visited South America in 1854-5, Egypt and Syria in 1873, and California in 1874. He has published in book form, "Our Seven Churches" (New York, 1870), a series of lectures, one of which has been widely circulated as a tract, with the title "A Well-Considered Estimate of the Episcopal Church." The other prints but rarely published are sermons and lectures for the use of the Park Church Bible School. Another son, James Chaplin, clergyman, b. in Boston, Mass., 8 Jan., 1828; d. in Elmira, N. Y., 25 Aug., 1886, was graduated at Dartmouth in 1848, studied theology at Andover, and on 10 May, 1856, was ordained a Congregational clergyman. Until 1861 he was chaplain of the Seamen's Bethel in Canton and Hong Kong, China. During the war he under-seas was chaplain of the New York infantry (1861-2); lieutenant-colonel of the 141st (1862-3); colonel of the 35th U. S. colored troops (1863-4), and was mustered out of service in 1866 as brevet brigadier-general. Later, he held pastorates in Owege, N. Y. (1867-79); Poughkeepsie (1871-2); and Brooklyn (1881-2). At various times he was transferred to the governor's house of correction, and to the governor's lodge as penitentiary.
toric interest from its prominence in revolutionary times. Thus made independent, Mr. Beckman travelled extensively, making a careful study of the workings of different European governments. He was chosen state senator in 1839, and served two terms. In 1841 he, with Erastus Corning and Thurlow Weed, was appointed by a meeting of conservative men in New York to go to Washington and urge President Buchanan to relieve Fort Sumter. Mr. Beckman was vice-president of the New York hospital, president of the woman's hospital, and a director of the New York Dispensary.

James M. Beckman

was also one of the early members of the New York historical society, before which he delivered a centennial discourse in 1871 and read papers at different times. On 4 Dec., 1869, he delivered an address before the St. Nicholas society on "The Founders of New York," which was afterward published (New York, 1870). He "Wrote and published," by Edward F. De Lancey (New York, 1877). In February, 1876, he published a report on a village of hospitals.

BEERS, Ethel Lynn, author, b. in Goshen, Orange co., N. Y., 13 Jan., 1827; d. in Orange, N. J., 10 Oct., 1879. Her maiden name was Ethelinda Eliot, and she was a descendant of John Eliot, the apostle to the Indians. Her earliest writings bore the pen-name of "Ethel Lynn," and after her marriage with William H. Beers she wrote her name as it is now known. Her most noted poem is "All Quiet along the Potomac," suggested by an oft-repeated despatch during the first year of the civil war. Its authorship was warmly disputed, but, as is usual in such cases, only one claimant said he had written the other verses of equal merit. That was Mrs. Beers, and there is now no further doubt as to the genuineness of her title. The lines originally appeared in "Harper's Weekly" for 30 Nov., 1861, with the caption "The Picket Guard." Mrs. Beers says in a private letter: "The poor 'Picket' has had so many authentic claimants and willing sponsors, that I sometimes question myself whether I did really write it that cool September morning, after reading the stereotyped announcement 'All Quiet,' etc., to which was added in small type 'A Picket Shot.'" The most popular of her other pieces are "Weighing the Baby," "Which shall it be?" and "Baby looking out for Me." She had long had a premonition that she would not survive the publishing of her collected poems, and she died the same day the volume was issued, "All Quiet along the Potomac, and other Poems" (Philadelphia, 1879).

BEERS, Henry Augustin, author, b. in Buffalo, N. Y., 2 July, 1847. He was graduated at Yale in 1869, was tutor there from 1871 till 1875, and was then assistant professor of English for five years. He spent five months in study abroad, mainly at Heidelberg, and was made full professor in 1880. He has published "Odes and Ends," a collection of verses (Boston, 1878); "A Century of American Literature" (New York, 1878); "Life of N. F. Willis" (Boston, 1886); "Selections from Willis's Prose Writings" (New York, 1885); "The Thankless Muse," a collection of verses (Boston, 1885); "Introduction to Readings from Ruskin" (1885); and "An Outline Sketch of English Literature" (New York, 1886).

BEEST, Albert van, artist, b. in Rotterdam, Holland, 11 June, 1829; d. in New York city, 8 Oct., 1860. When quite young he accompanied Prince Henry of the Netherlands on a three years' journey to the United States, where he made a reputation as a marine painter and teacher, living mainly in Boston and New York. As an artist he was self-taught. Among his pupils were William Bradford and R. Swain Gifford.

BEHAIM, or BEHEM, Martin, German geographer, b. in Nuremberg about 1459; d. in Lisbon, 29 July, 1515. When a boy he was much interested in astronomy and mathematics. He engaged in the manufacture of cloth in Flanders in 1477, and in 1480 the commercial relations between that country and Portugal, as well as his interest in the maritime discoveries of the Portuguese, led him to visit Lisbon. Here he became a pupil of Johann Muller (Johannes de Keuren), auditor and archdeacon of the cathedral of the city. He established a Flemish colony at Faval in 1486, married the governor's daughter, and remained there until 1490 when, returning to Nuremberg, he made a large terrestrial globe, on which historical notices were written. This globe is a valuable record of the geographical knowledge of his time. It is made of papier-mache, covered with parchment, and on his a parchment surface receives the drawing. The Behaim family caused it to be repaired in 1825, and it is now in the city hall at Nuremberg. Behaim placed on his globe an island far to the west of Faval, and this is thought by some to have been on the Brazilian coast, which would make Behaim, instead of Columbus, the discoverer of America. However, that he simply represented the general impression that some such island existed. In 1498 Behaim returned to Portugal, and, being sent on a diplomatic mission to the Low Countries, was captured by English cruisers, and carried to England, but afterward escaped to the continent. See Von Murr's "Diplomatische Geschichte des Ritters M. Behaim" (1782), and Ghillian's "Geschichte des Seefahrers Ritter Martin Behaim" (1853).

BEHRENS, James, naturalist, b. in Lubbeck, Germany, 30 June, 1824. He was graduated at the gymnasium of Lubbeck in 1841, and in 1853 came to the United States. He settled in California, where he has since remained, and has become a recognized authority on botany. Mr. Behrens has contributed papers to scientific journals, and is a member of many scientific societies in the United States and Europe.

BEISSEL, Johann Conrad, German religious-ist, b. in Eberbach, in the Palatinate, in 1660; d. in Ephrata, Lancaster co., Pa., in 1768. After studying theology at a young age, he was forced to leave his native country, and settled in Pennsylvania about 1720. While a member of the Dunker society at Millbach (Mill Creek), Pa., he published (1729) a tract to prove that the se-
enth day was the only true sabbath. This caused some division in the society, and Belcher retired to a hermitage on the banks of the Cocalico. His friends were about to bid him and his society foot, the first community of Seventh-day Dunkers, or German Seventh-day Baptists. In 1738 Beissel established, at what is now the village of Ephrata, a monastic society, which at one time numbered nearly 300. The habit of the Capuchins was adopted by both sexes, and celibacy was considered a virtue, though not made obligatory. Each member adopted a new name, and Belcher was called Friedsam, to which the community afterward added the title of Gottreth. He seems to have been sincerely devout, though whimsical, was an excellent musician, and composed and set to music several volumes of hymns in German and Latin (1766–78). He also published a mystical dissertation on the fall of man, and a volume of letters. He left several curiously decorated manuscript volumes. Soon after the death of its founder, the society at Ephrata began to decline, and few of the original features are now to be found there. The principal settlement of the sect founded by Beissel is at Ephrata, Pa.

BELANGER, Solomon, Canadian voyager, d. in the parish of St. Jacques de l'Arcigean, Quebec, in April, 1863. He was one of the French Canadians that accompanied Sir John Franklin in his first expedition toward the north pole, and on one occasion (14 Sept., 1821) saved the explorer’s life. A canoe in which they were crossing a rapid stream over set, and Belanger held it while Franklin and a companion took their positions again. Owing to the violence of the current, Belanger was obliged to remain in the water and was rescued with great difficulty. On another occasion he was accused by Franklin of attempting to persuade one of his hunters to leave him, before which he had been esteemed highly by the explorer. See Franklin's "Journey to the Shores of the Polar Sea in 1819–22" (London, 1829).

BELCHER, Jonathan, governor of Massachusetts and New Jersey, b. 8 Jan., 1681; d. in Elizabeth, N. J., 31 Aug., 1757. He was the son of Andrew Belcher, one of the provincial council, and a gentleman of large estate. Jonathan was graduated at Harvard, 1699, and sailed for Europe, where he visited the court of Hanover twice, and by making the acquaintance of the Princess Sophia and her son, afterward George I., of England, prepared the way for his future advancement. Having returned to Boston and become a merchant there, in 1729, he was sent to England as the agent of the colony, and on Gov. Burnet’s death in 1730 he was appointed governor of Massachusetts and New Hampshire, which office he held for eleven years, distinguishing himself by his hospitality and style of living. He wished the assembly to vote him a fixed salary of $3,000 a year, and dissolved it when it refused to do so; but when helped by contributions and acquittances from his influence by the distribution of offices, he was finally obliged to accept a grant for one year only. This contest, together with some unnecessary assumption of authority and freedom in censure, gained him many enemies, and in consequence of popular clamor he was removed in 1741. It is also claimed that his removal was to unfair means. However this may be, he easily succeeded in vindicating himself at court, whether he went immediately, was promised the first vacancy in America, and in 1747 was appointed governor of New Jersey. Here his government was successful, for, though he found the province in confusion and the two branches of the legislature at odds, by prudence and firmness he secured comparative quiet. He enlarged the charter of the college of New Jersey, and it was its patron and benefactor, giving it, among other presents, its valuable library. See Hutchinson’s "History of Massachusetts Bay" (Boston, 1764); Smith’s "History of the Colony of New Jersey" (Burlington, 1765); Belknap’s "History of New Hampshire" (Philadelphia, 1784); and Belcher's letters, 1731–40, in the "New England Historical and Genealogical Register." His son, Jonathan, jurist, b. in Boston, 28 July, 1710; d. in Halifax, N. S., 29 March, 1776. He was graduated at Harvard in 1738, and then went to London, where he studied law in the Temple and attained eminence at the English bar. He was one of the first settlers at Chibucto (afterward Halifax), and in 1740, being senior counsellor, was appointed lieutenant-governor on the death of Gov. Lawrence. He held this office until 1763, and in 1761 was also appointed chief justice of the province. In the same year, as commander-in-chief, he made a treaty with the Indians.—Andrew, son of the second Jonathan, was a prominent citizen of Halifax, and a member of the council in 1791. - Sir Frankel, b. in Halifax, N. S., 1729; d. 13 March, 1877. He entered the royal British navy as a midshipman at the age of thirteen, was present at the battle of algiers, and served afterward on the african station, whence he returned home uninjured in 1829. Having next served on the North American station for three years, he was selected as his majesty’s assistant-surveyor to Capt. F. W. Beechey, then about to sail for Behring strait in the "Blossom" on his voyage of discovery. Belcher was made a commander in 1829, was engaged in 1830 upon a survey of the coast of Africa, and from 1836 till 1842 on a survey of the Pacific in H. M. S. "Sulphur." During this voyage he circumnavigated the globe and did important work in taking soundings of the Canton river. He was rewarded with a commission as post-captain and the companionship of the order of the bath in 1841, and was knighted in 1843. He was engaged chiefly on the East Indian station from 1842 till 1849, and was severely wounded in the battle of Borneo. In 1852 he was appointed to command an expedition to the Artic ocean in search of Sir John Franklin. This was an unfortunate appointment, for Belcher, though an able officer, was personally unpopular, and the expedition did not succeed in its object, though it brought back McClure's party, who had been ice-bound for three years, and Belcher's ships were abandoned in the ice with what has been thought unnecessary haste. One of these, the "Resolute," was afterward found floating in open water by Capt. Buddington, of New London, Conn., and was purchased by congress, retitled, and presented to the British government. On his return Belcher was retired on half pay; but he was never employed again, though he rose, in course of seniority, to the rank of admiral in 1872. He was also made a K. C. B. in 1867. He published a "Treatise on Nautical Surveying," which was long a standard work (1833); "Narrative of a Voyage round the World" (1845); "Narrative of the Voyage of H. M. S. "Daring" (1845); "The Last of the Arctic Voyages" (1855); and "Horatio Howard Benton, a Naval Novel" (1856). He also edited Smyth’s "Naval Word-Book" (1867).

BELCHER, Joseph, author, b. in Birmingham, England, 5 April, 1784; d. in Philadelphia, 10 July, 1859. He was a Baptist clergyman, and came to
the United States in 1844. He is said to have published more religious volumes than any other author of the present century, his works numbering nearly 200. He wrote lives of Whitefield and Robert Erskine; "The Baptist Pulpit and the Baptist States" (New York, 1850); "The Clergy of America" (1855); a "History of Religious Denominations in the United States" (Indianapolis, Ind., 1856); "Sketches from Life"; and "Poetical Sketches of Biblical Subjects." His last book was "Hymns and their Authors" (Philadelphia, 1859). Belknap had a provincial rank. He was appointed Lieutenant Commander in 1815. He went with one of the earliest overland emigrant parties, that of 1841. He was the first mayor of San José in 1850, was noted as merchant and politician, and took part in the raising of the American flag at the time of Com. Jones’ attempted seizure of California in 1846.

BELKNAP, William Goldsmith, soldier, b. in Newburgh, N. Y., 7 Sept., 1794; d. near Fort Washita, Tex., 10 Nov., 1851. He was a lieutenant in the war of 1812; was wounded in the sortie Wender on the 17 Sept., 1814; became captain, 1 Feb., 1822; became major, 13 May, 1822; and was brevetted lieutenant-colonel, 15 March, 1842, for his services in the Florida war. In 1828 Capt. Belknap established Fort Leavenworth in Kansas. For gallantry in Gen. Taylor’s Rio Grande campaign he received the brevet of colonel. He acted as inspector-general at the capture of Monterrey, and became lieutenant-colonel 26 Sept., 1847, and was brevetted brigadier-general for services at Buena Vista, 23 Feb., 1847. He was commandant at Fort Gibson from December, 1848, till May, 1851.—His son, William
BELL, lawyer, b. in Newburgh, N. Y., 22 Sept., 1829; d. in Washington, D. C., 13 Oct., 1890. He was graduated at Princeton, studied law at Koskuk, Island, Maine, and entered politics. He became a lawyer in 1857. At the beginning of the civil war he joined the army as major of the 15th Iowa volunteers. He was engaged at Shiloh, Corinth, and Vicksburg, became prominent in Sherman's Atlanta campaign, receiving promotion as brigadier-general on 30 July, 1864, and was brevetted major-general on 13 March, 1865. After the war he was collector of internal revenue in Iowa from 1865 till 13 Oct., 1869, when he was appointed secretary of war. This office he retained during Gen. Grant's second administration until 7 March, 1876, when, in consequence of charges of official corruption, he resigned. He was impeached and tried before the senate for receiving bribes for the benefit of post-traders, and was acquitted on the technical ground of want of jurisdiction.

BELL, Alexander Graham, physicist, b. in Edinburgh, Scotland, 3 March, 1847. He is a son of Alexander Melville Bell, mentioned below, and was educated at the Edinburgh high school and Edinburgh university, and also at the Royal Institution in London in his father's system for removing impediments in speech. He removed to London in 1867, and entered the university there, but left on account of his health, and went to Canada with his father in 1870. In 1872 he took up his residence in the United States, introducing with success his father's system of deaf-mute instruction, and continued his studies at Brown university. He had been interested for many years in the transmission of sound by electricity, and had devised many forms of apparatus for the purpose, but the first public exhibition of his invention was at Philadelphia in 1876. Its complete success has made him wealthy. His invention of the phonograph, which is a battery by means of which a beam of light, instead of a needle, is used for conveying speech, has also attracted much attention, but has never been practically used. It was first described by him before the American association for the advancement of science in Boston, 27 Aug., 1880. After the shooting of President Garfield, Prof. Bell, together with Samuel Morse, designed and improved that of Ogden's induction balance, and endeavored to find the exact location of the bullet, but failed. Prof. Bell has put forth the theory that the present system of educating deaf-mutes is wrong, as it tends to restrict them to one another's society, so that marriages between the deaf are common, and therefore the number of deaf-mute children born is on the increase. His latest experiments relate to the recording of speech by means of photographing the vibrations of a jet of water. He is a member of various learned societies, and has published many scientific papers. He has lived for some time in Washington, D. C.

BELL, Alexander Melville, educator b. in Edinburgh, Scotland, 11 March, 1819; d. in London, 12 Aug., 1885, was educated under the care of his father, Alexander Bell. He was the inventor of a method for removing impediments of speech. From 1845 till 1865 he lectured in Edinburgh at the university and at New college, and in the latter year was appointed lecturer at university college, London. He removed to Canada and became instructor in Latin at King's college, Kingston. He is the inventor of "Visible Speech," a method of instruction in orthotony, which has also been successfully used in teaching deaf-mutes to speak. He has published "Principles of Speech and Elocution" (Edinburgh, 1849); "Popular Stenography," and other books on short-hand; "Visible Speech and Universal Alphabetics"; "Line Writing on the Basis of Visible Speech"; "Faults of Speakers" (Salen, Mass.); "The Standard American English". He never married. In 1881 he removed to Washington, D. C. He now (1886) has in press, to be published in New York, "Essays and Postscripts on Elocution"; "Lectures on Phonetics"; and "English Line Writing.

BELL, Charles Heyer, admiral, b. in New York, 15 Aug., 1798; d. in New Brunswick, N. J., 19 Feb., 1873. He entered the U. S. navy as midshipman, 12 June, 1812, and served with Com. Decatur in 1813 and in Com. Chauncey's squadron on Lake Erie in 1814. In the war with Algiers he was again with Decatur on board the "Macedonian." He became a lieutenant in 1820, and in 1824 commanded the schooner "Ferrit," which he destroyed. He was raised to the rank of commander on 20 Sept., 1830, and in 1844-5 commanded one of the boats that cut out the piratical schooner "Federal" from under the guns of the forts at Guadeloupe. In 1836 he commanded the sloop "John Paul Jones" on the coast of Africa, and captured three slavers, one of them with 903 slaves on board. He was commissioned a captain in 1839, a commodore in 1844, and a rear-admiral in 1856. In 1859 he was assigned to the Mediterranean squadron, and was ordered home at the beginning of the civil war. After the capture of the British mail-steamer "Trent," in November, 1861, he was sent to Panama to take command of the Pacific squadron, in anticipation of difficulties with England, and there he remained for nearly three years. The rank of commodore was given him 16 July, 1862. He returned shortly before the close of the war, and was assigned to special duty on the James river. He took command of the Brooklyn navy-yard in May, 1865, and held it three years. He was commissioned rear-admiral, 25 July, 1866, and placed on the retired list after Fifty-two years of "Nine Months' service.

BELL, Charles Henry, b. in Chester, N. H., 18 Nov., 1823; d. in Exeter, N. H., 11 Nov., 1893. His father, John Bell—b. in Londonderry, N. H., about 1765; d. in Chester, N. H., 22 March, 1836—was a brother of Gov. Samuel Bell, and was himself governor of New Hampshire in 1809-10. Charles Henry was graduated at Dartmouth in 1841 and studied law. He presided over both branches of the New Hampshire legislature, and from March till June, 1879, by the governor's appointment, filled a vacancy in the U. S. Senate. From 1881 till 1883 he was governor of New Hampshire, and from 1888 till 1893 was elected on the Republican ticket in the 2nd term of which he was prosecuting attorney for Rockingham co., and was president of the New Hampshire historical society since 1887. He published "Men and Things of Exeter, N. H." (Exeter, 1871); "Exeter in 1776" (1875); "John Wheelwright" (published by the Exeter Academy) (Exeter, 1883); "Memorial of John T. Gilman, M. D." (1885); and various public addresses.

BELL, Clark, lawyer, b. in Rodman, Jefferson co., N. Y., 12 March, 1832. He was fitted for college at Franklin Academy, Prattsburgh, but ill health prevented the completion of his studies. Subsequently he studied law, and was admitted to
the bar in 1853, after which he practised for some time in Hammondport, and was postmaster there during Lincoln's administration. Later he moved to Bath, N. Y., where he followed his profession with great success. In 1864 he removed to New York, where he has since resided. About this time he became the attorney and counsel of the Union Pacific railroad, and assisted in preparing the act of congress under which the road was constructed. He has been employed in several important suits in New York, and as attorney for numerous corporations and organizations, Mr. Bell has become a member of the "Saturnian Night Club." Since 1870 he has devoted special attention to medical jurisprudence, having in that year joined the Medico-legal Society of New York. For six years he was its president, and its success is largely due to his energy. In 1883 he founded the "Medico-Legal Journal," and is still its editor. His writings on medical jurisprudence include the inaugural and retiring addresses during the years he was president of the medico-legal society, and also the following-named pamphlets: "The Coroner System and its Needed Reforms" (1881); "Suicide and Legislation" (1882); "The Rights of the Insane" (1883); "Madness and Crime" (1884); "Spall we hang the Insane?" (1885); and "Classification of Mental Diseases as a Basis of Insanity" (1886). He has also contributed largely to the daily press.

**BELL, George**, soldier, b. in Maryland, about 1832. He was graduated at West Point in 1853. During the civil war he served as assistant in the organization of the sub-inspection department for the Medical Corps, and as principal assistant commissary to the Army of the Potomac, and in charge of sub-inspection depots, and as chief of commissariat of the departments of Washington and the Potomac. On 9 April, 1865, he was brevetted brigadier-general for services during the war.

**BELL, Henry Haywood**, naval officer, b. in New York, 25 March, 1823, at the mouth of Osaka river, Japan, 11 Jan., 1868. He was appointed a midshipman from North Carolina in August, 1843, and during more than forty-five years of service saw much severe fighting. He was on board of the "Grampus" when she was engaged in clearing the coast of Cuba of pirates. He was in command of the East Florida for many years, and commanded one of the vessels of the squadron which, in November, 1856, captured and destroyed the four barrier forts near Canton, China. Early in the civil war he was appointed fleet-captain of the Western Gulf squadron. At the capture of New Orleans he commanded one of the three divisions of the fleet, and was sent to take formal possession of the city by raising the U. S. flag over the custom-house and city hall. For a time in 1863-4, after the recapture of Galveston by the Confederates, he was in command of the Western Gulf blockading squadron. In July, 1865, he was ordered to the command of the East India squadron, his rank being then that of commodore. In 1872 he removed to New York, and in 1867, he was retired: but Rear-Admiral S. C. Rowan, who was to have relieved him, had not arrived when he was drowned in attempting to enter the Osaka river in a boat from the "Hartford," his flagship. His widow died in 1886.

**BELL, Iram Parks**, lawyer, b. in Jackson co., Ga., in 1823. He received a common education, taught school for two years, read law, was admitted to the bar in 1849, and has since practised at Cuming, Ga. He was a candidate for presidential elector on the Bell ticket in 1860, and opposed the secession ordinance in the convention of 1861. He was a member of the state senate in 1861, and resigned to enter the confederate army, being commissioned captain in March, 1862. He became colonel of the 43d Georgia regiment, was dangerously wounded at the battle of Chickasaw Bayou, Miss., 29 Dec., 1862, and resigned soon afterward. He was a member of the Confederate House of Representatives from 1863 until 1875, and again from 1877 to 1879. He was a delegate to the St. Louis convention of 1876, which nominated Mr. Tilden for the presidency. In Congress Mr. Bell favored using the proceeds of the sale of public lands for educational purposes.

**BELL, John**, physician, b. in Ireland in 1796; d. in 1872. He emigrated to the United States in 1810, was graduated at the university of Pennsylvania in 1817, was for several years a lecturer on the institutes of medicine in the Philadelphia medical institute, and afterward professor of the theory and practice of medicine in the medical college of Ohio. He was widely known as a lecturer and popular medical writer. His principal works are "Baths and Mineral Waters" (Philadelphia, 1831); "Health and Beauty" (1838); "Rambles and Lectures on the Practice of Physic" (4th ed., 1848); "Baths and the Water Regimen" (1849); and "Mineral and Thermal Springs of the United States and Canada" (1855). Dr. Bell was editor of several medical journals.

**BELL, John**, statesman, b. near Nashville, Tenn., 15 Feb., 1797; d. at Cumberland Iron Works, Tenn., 10 Sept., 1876. His father was a former iron-master. He was graduated at Cumberland college (now the university of Nashville) in 1814, studied law, settled at Franklin, Tenn., and was elected to the state senate in 1815. Declining a re-election, he adhered to his profession until 1827, when, after an excited canvass, he was elected to congress over Felix Grundy, by a thousand majority, although Grundy had the support of Gen. Jackson, then a presidential candidate. Bell was re-elected six times, serving in the house of representatives until 1841, and for ten years he was chairman of the committee on Indian affairs. He was at first a free-trader, but changed his views and became an earnest protectionist. He was opposed to nullification, and in 1843, through voting against the bill to charter the United States bank in 1832, he protested against the removal of the deposits, and this course led to a breach between him and President Jackson. He was one of the founders of the Whig party. This change was marked by his election in 1834 to the speakership of the house, in opposition to John J. Crittenden, who was supported. He joined with Judge White in the anti-Van Buren movement in Tennessee, which completed his sins in the estimation of President Jackson, who could not, however, prevent his re-
turn to congress, as his popularity in his district remained unshaken. When petitions for the abolition of slavery in the District of Columbia were presented in the house of representatives in 1839, Mr. Bell opposed them, admitting the "Atherton gag" in 1839. In this course he was supported by his constituents, though assailed in his position. President Harrison made him secretary of war in 1841, but he resigned with the rest of the cabinet (Mr. Webster only excepted) when President Tyler separated from the whig party, who including himself, but were also opposed by the Tennessee legislature, he remained in retirement until 1847, when he was chosen to the state senate and immediately afterward to the national senate, where he remained until 3 March, 1859. He was prominent in his opposition to the policy of annexation. When the Kansas-Nebraska bill was brought forward in 1854, Bell was one of those who condemned secession, and were also opposed to all "coercion." On 18 April, 1861, with seven other citizens of Tennessee, he issued an address recommending his state to preserve an armed neutrality, and on 23 April, in a speech at Nashville, he favored standing by the southern states. 

BELL, Robert, Canadian geologist, b. in Toronto, Ont., 28 Jan., 1822. He was educated at the university of Edinburgh, Scotland, and at McGill university, Montreal, where he received the degree of C. E. in 1861, M. D. in 1878, and B. A. Sc. in 1884. Queen's university gave him the degree of L.L. D. in 1883. He has been connected with the geological survey of Canada since 1856, and was professor of chemistry and the natural sciences in Queen's university. He has travelled extensively through Canada in connection with the geological survey. He strongly advocated the building of the Canada Pacific railway in 1869, and has favored the opening of the Hudson bay route, and has surveyed the principal water-ways between Hudson bay and the great lakes, part of both shores of Hudson bay, and various rivers in the province of Quebec. In 1884 he accompanied the Hudson bay expedition in the "Neptune" as scientist and medical officer, and has contributed to the collection of geology and other specimens. Dr. Bell has taken much interest in Canadian university affairs. He was the graduates' representative fellow in McGill university, from 1889 till 1886, and was one of the eighty original fellows of the Canadian royal society. He has been a life fellow of the geological society of Montreal, and a member of several learned societies. He published reports on geology and natural history in the progress of the geological survey, nearly every year, from 1857 till 1885; numerous articles in American, Canadian, and English journals, on geology, mining, geography, natural history, medicine, and forestry, from 1859 till 1886; and wrote the chapter on the progress of science in Canada, in the "Dominion Annual Register," from 1878 till 1884, including the "Atherton gag" in 1839. In this course he was supported by his constituents, though assailed in his position. President Harrison made him secretary of war in 1841, but he resigned with the rest of the cabinet (Mr. Webster only excepted) when President Tyler separated from the whig party, who including himself, but were also opposed by the Tennessee legislature, he remained in retirement until 1847, when he was chosen to the state senate and immediately afterward to the national senate, where he remained until 3 March, 1859. He was prominent in his opposition to the policy of annexation. When the Kansas-Nebraska bill was brought forward in 1854, Bell was one of those who condemned secession, and were also opposed to all "coercion." On 18 April, 1861, with seven other citizens of Tennessee, he issued an address recommending his state to preserve an armed neutrality, and on 23 April, in a speech at Nashville, he favored standing by the southern states. 

BELL, Samuel, governor of New Hampshire, b. in Londonderry, N. H., 9 Feb., 1770; d. in Chester, N. H., 23 Dec., 1850. His family emigrated from Scotland to Ireland, whence his grandfather, John Bell, came to New Hampshire in 1722. Samuel worked on his father's farm when a boy, and then went to Dartmouth college, graduating in 1793. He studied law, and in 1796 was admitted to the bar, where he attained distinction. He was sent to the legislature in 1804, was twice re-elected, serving till 1808, and during his last two terms he was speaker. In 1807 he declined the office of attorney-general, and sat in the state senate for a term. In 1810 he entered politics, was removed as governor, from 1819 till 1823, and from 4 March, 1823, till 3 March, 1835, was a member of the U. S. senate. In 1835 he retired from public life to his farm in Chester, N. H. Goy. Cochrane had first recommended him for the governorship. Samuel Dana, jurist, b. in Franconestown, N. H., 9 Oct., 1798; d. in Manchester, N. H., 31 July, 1868. He was graduated at Harvard in 1816, read law with George Sullivan, of Exeter, and began practice in Meredith. He removed to Chester, N. H., in 1820, ten years later to Concord, and in 1839 to Manchester, where he lived until his death. He was a member of the legislature about 1835, and for several years clerk of that body, was solicitor for Rockingham co. from 1823 till 1828, and in 1830, 1842, and 1867 was one of the commissioners appointed to revise the state statutes. He was appointed justice of the superior court, and in 1853, on the reorganization of the court, chose as justice of the supreme court. In 1859 he was appointed chief justice of the same court, which office he resigned 1 Aug., 1864. In 1861 he was the unsuccessful democratic candidate for congress, in the 2d New Hampshire district. He received the degree of L. L. D. from Dartmouth college in 1854. He was one of the early members of the Boston historical society, and the establishment of the Manchester public library was due, in a large measure, to his personal efforts. 

—Another son. John, a physician of great promise, was b. 5 Nov., 1800; d. in La Foye, La., 29 Nov., 1830. He was graduated at Union in 1819, studied medicine in Boston and Paris, and received his diploma from Bowdoin in 1822. He was professor of anatomy at the university of Vermont, and editor of the "New York Medical and Surgical Journal."—Another son, James, senator, was b. in Franconestown, N. H., 13 Nov., 1804; d. in Laconia, N. H., 26 May, 1857. He was graduated at Bowdoin in 1822, and studied law with his brother, Samuel Dana Bell, and afterward at the Litchfield, Conn. law school. He was admitted to the bar in 1825, and began to practise at Gilmanton, N. H., in 1831 he removed to Exeter, N. H., and in 1846 represented that town in the legislature. In that same year he removed to Gilford, where he took charge of the enterprise of damming the outlets of Lake Winnipesaukee. Other large dams on the Merrimac might not suffer from a diminished water-supply during the dry season. By prudent management he gained over those property-owners whose interests seemed to be threatened, and the scheme was successful. He was a member of the state constitutional convention in
1850, and in 1854 and 1855 the unsuccessful whig candidate for governor. In 1855 he was elected to the U. S. senate, where he served until his death.—Another son, Luther Vose, physician, b. in Chester, N. H., 20 Dec., 1806; d. in camp near Buell's Ferry, Md., 11 Feb., 1862, was graduated at Bowdoin 1828, and, after attending a medical college with his elder brother John in New York city, received his diploma from Dartmouth in 1826. He began to practice in New York, but returned to New Hampshire after his brother's death in 1830. He became noted as a practitioner and writer, taking two Cambridge Boylston prizes for his compositions. He was a member of the American Medical Association, and an active member of the Insane Asylum at Charlestown, Mass. In 1845, at the request of the trustees of the Butler hospital for the insane, at Providence, R. I., he visited Europe for the purpose of studying institutions in both cities, and, after three months' absence, completed the plan of their present building. While at Charlestown, he brought to notice a form of disease peculiar to the insane, which is now known as "Bell's disease," and was also called upon frequently to testify in the courts as an expert. In 1850 he was a member of the state council of revision of the constitution. In 1852 he was nominated by the whigs for congress, and in 1856 for governor of the state, but was defeated both times. In 1856 he resigned his place in Charlestown, and when the civil war began he entered the army as surgeon of the 11th Massachusetts volunteers. At the beginning of the war he was medical director of Hooker's division. Dr. Bell published "An Attempt to Investigate Some Obscure Doctrines in Relation to Small-Pox" (1836), and "External Exploration of Diseases" (1836), and also described his investigations of alleged spiritual manifestations.—Another son, Louis, soldier, was b. in Chester, N. H., 1836; d. near Fort Fisher, N.C., Jan., 1863. He was graduated at Brown in 1859, and began the practice of law at Farmington, N. H. In 1860 he was appointed solicitor for Strafford co. In April, 1861, he was offered the captaincy of a company of the 1st New Hampshire regiment of three months' men, and served his term of enlistment. Returning home, he was appointed lieutenant of the 4th New Hampshire volunteers, and became colonel in March, 1862. Col. Bell was for some time a member of Gen. Thomas W. Sherman's staff, and was inspector-general of the department of the south from November, 1861, till March, 1862. Prior to the Wilmington expedition he had been several times temporarily a brigade commander, and had participated in the engagements at Poocotaligo (21 Oct., 1862) and Fort Wagner (July, 1863). In the attack on Fort Fisher (15 Jan., 1865), he commanded a brigade of Gen. Ames's division, and was mortally wounded while leading his men in an assault upon one of the traverses of that work. He died on the day following the engagement, and was buried in the New Hampshire state cemetery. Samuel Newell, lawyer, b. in Chester, N. H., 25 March, 1829, was graduated at Dartmouth in 1847, was a member of the 42d and 44th congresses, and in 1874 was appointed by the governor and council chief justice of the superior court, but declined. He retired from practice in 1876.

**BELLAMY, Emily Whitted,** author, b. in Quincy, Gauley co., Fla., 17 April, 1839. Her maiden name was Croom. She was educated at Spingler institute, New York city, taught in a seminary for girls in Easton, Ala., contributed to periodicals short prose articles and poems, and has published, under the pen-name of "Rampa Thorpe," two novels, "Four Oaks" (New York, 1867), and "Little Joanna" (1876).

**BELLAMY, John,** publisher. He was a London bookseller, who issued Mourt's "Journal of the Plymouth Colony" (1629), and from that time was for twenty-five years the principal publisher of books relating to New England.

**BELLAMY, Joseph,** clergyman, b. in Cheshire, Conn., in 1719; d. in Bethlehem, Conn., 6 March, 1790. He was graduated at Yale in 1735, and when only eighteen years old licensed to preach by the association of New Haven co. He supplied for some time the pulpit of the church at Bethlehem, Conn., was ordained its pastor in 1740, and remained there until his death. During the revival of 1743 he preached as an itinerant in Connecticut and the neighboring colonies, and after the expiration of his term in 1749, was re-elected, and established a divinity school, which soon became noted. Many of the most eminent clergymen in New England were trained by him. His system of divinity resembled that of Jonathan Edwards, with whom he was very intimate. His method of instruction was peculiar. He first gave them a question to answer; the next, a course of reading that would enable his pupils to answer them, and then, after examining and assisting the students constantly in their work, he required them to write essays on the points that had occupied their attention. He also encouraged them to read the works of the most acute and learned opponents of Christianity. In 1768 he received the degree of D.D. from the university of Aberdeen, Scotland. Dr. Bellamy was a man of commanding presence and possessed much natural humor. His works are: "True Religion Delineated" (1750); "Theron, Paulinus, and Aspasia," a collection of letters and dialogues (1759); "A Letter to Scripturists" (1769); "The Nature and Glory of the Gospel" (1782); "An Effort to Explain the Half-Way Covenant" (1769); "Four Dialogues between a Minister and his Parishioner" (1769); and a large number of sermons. An edition of his entire works appeared after his death (3 vols., New York, 1811), and another, with a memoir by Dr. T. Edwards, was published by the doctrinal tract society (2 vols., 1850).

**BELLEROSE, Joseph Hyacinthe,** Canadian senator, b. in Three Rivers in 1820. He has been long and prominently connected with the volunteer militia in Lower Canada, being the first to organize companies in the rural districts after the passing of the militia act of 1854, and later became lieutenant-colonel, commanding Laval reserve militia. He was graduated in 1869 as a member of the regiment of the British army, but soon resigned. He was elected for Laval as a conservative, and represented it in the Canada assembly from 1863 till 1867, and from that date until 1873 (when he was elected to the senate) represented the same constituency in the house of commons. He also represented Laval in the union (1867) until the general election in 1875, when he retired. During the whole of that time he had been chairman of the contingent commit-
BELLINGHAM, Richard, colonial governor of Massachusetts, b. in England in 1592; d. 17, Dec. 1662. He was one of the original patentees of the colony. He came to Boston in 1634, was one of a committee of seven to divide the town-lands, and in 1635 made deputy-governor. In 1641 he was elected governor, in opposition to Winthrop, by a majority of only six votes. He was chosen again in 1654, and again in May, 1665, after the death of Gov. Endicott, continuing in office for the remainder of his life. He served altogether thirteen years as deputy-governor and ten years as governor. In 1664 he was chosen major-general, and in the same year the four commissioners sent by Charles II. to inquire into the state of the colony ordered him, with other things they desired him to do, to go to England and account for his conduct. By authority of the general court, however, he refused compliance with this command, and the king was pacified by the present of a ship-load of masts. After the death of his wife, in 1641, Bellingham married again, performing the ceremony himself. For this reason, and because the banns were not properly published, he was prosecuted for violating the law, but escaped by refusing to leave the bench, and thus officiating at his own trial. At the time of his death he was the only surviving patentee of the colony. His will provided that, after the decease of his wife, of his son by a former wife, and of his granddaughter, the bulk of his property was to go to his second wife. He was one of the leaders of a body of godly ministers and preachers attached to the principles of Congregationalism; but this will was set aside by the general court as interfering with the rights of his family. Bellingham was very obdurate, but a man of integrity, and, although continually in conflict with his fellow-officials, they regarded him as a man of probity, with those remarkable qualities in religion, and especially severe toward the Quakers. At times he suffered from aberration of mind. His sister, widow of William Hibbens, an assistant, was executed as a witch in June, 1656.

BELLMARE, Raphael, Canadian author, b. in Yamachiche, Quebec, 22 Feb., 1821. He was educated at the college of Nicolet, in which institution he was professor of belles-lettres in 1843–7. After leaving college he edited " La Minerve" newspaper from 1847 till 1853, and, while acting in this capacity, ably supported the cause of religious instruction in the schools, in opposition to those who desired their secularization. At the confederation of the provinces he was appointed inspector of instruction in England, New York, and New Jersey. He assisted in organizing the Canadian zonaves, which corps distinguished itself in the naval service during the troubles in Italy. He is a corresponding member of the société des antiquaires de Normandie, is one of the founders of the société historique de Montreal, is an indefatigable worker in the field of his official research, and possesses a valuable collection of rare books.

BELLO, Andrés (baxyl-yo), Spanish-American poet, b. in Caracas, Venezuela, 30 Nov., 1781; d. in October, 1865. When the Venezuelan revolution began in 1810 Bello was an official in the service of the Spanish captain-general; but he soon joined the revolutionary party and went to England with Bolivar and López Méndez to negotiate for British co-operation. Bello remained in London, married an English lady, and lived there for nineteen years. After returning to South America, he established himself in Santiago, Chile, where he filled many high offices, among them that of rector of the university during the rest of his life. His works include "Teoría del Entendimiento," "Principios de Derecho Internacional," and a famous Spanish poem. The poem entitled La Agricultura de la Zona Torrida is one of his best.

BELLOMONT, or BELLOMONT, Richard Coote, earl of, colonial governor of New York and Massachusetts, b. in 1636; d. in New York, 5 Murch, 1701. His father was raised to the Irish peerage, as Baron Coote, for services at the restoration of Charles II. Richard, the eldest son, was a member of parliament of England, and one of the first adherents of the prince of Orange. In 1689 he was attainted by the parliament held by James II. in Dublin, but in the same year made earl of Belflombo by William III., and appointed treasurer and receiver-general to Queen Mary. He was appointed governor of New York in May, 1685, and, shortly after, made Deputy-Governor of Massachusetts. Unlawful trade was on the increase, and New York was "remarkably infected with those two dangerous diseases," so that a man of strong will and great honesty was required for the place. In notifying Bello Mont of his appointment, the king said that "he thought him a man of resolution and integrity, and with those qualities more likely than any other he could think of to put a stop to that illegal trade and to the growth of piracy; for which reason he made choice of him for that government, and for the same reason intended to put the government of New England into his hands." The new governor did not reach this country until 26 May, 1698. It was a time of great troubles. Kidd, a man of great courage and spirit, had been retained for a year in the province of New York, after which he went to Boston, where he arrived on 26 May, 1699, and was received with great enthusiasm. As Bellomont had been specially appointed to suppress piracy, and as none of the king's ships could then be placed at his disposal, the governor, before leaving England, had determined to accomplish the object by private enterprise, and, with the king's sanction, formed a company and sent out a sloop under the command of William Kidd, an adventurer. Bellomont had not been long in this country when the news came that Kidd had himself turned pirate, and the governor was even accused of complicity with him. Kidd was finally captured, sent to England for trial, and executed there in 1701. Soon after the May session of the general court in 1700, Bellomont returned to New York, where he attacked the illegal traders with such vigor that a petition against him was sent to England. The annoyance thus caused hastened his death. He was buried at the Battery, and now lies in St. Paul's church-yard, New York. He seems to have possessed a distinctly fair character, upright, courageous, and independent." Though his fearless course in New York made him enemies there, in Massachusetts he was very popular. His stay there lasted but fourteen months, yet he was granted a larger sum than had been given to any previous governor, receiving altogether 21,572£. He seems to have done all in his power to ingratiate himself with the people of Boston. Though a churchman, he attended the weekly lecture regularly with the general court, and professed great regard for the preachers, and, on this account, he has been charged by Hutchinson with hypocrisy. See "The Life and Administration of Richard Earl of Bellomont," by Frederic De Peyster (New York, 1868).
BELLOT, Joseph René, explorer, b. in Paris, France, in March, 1829; lost on an ice-boat Aug. 18, 1853. He was a midshipman at the siege of Vera Cruz in 1848, and rose to be a lieutenant in 1851. In 1852 he joined Belcher's English expedition to search for Franklin. While carrying despatches over the ice he was overtaken by a storm, and the ice on which he stood was severed from the land. Leaving his two companions, he crossed a luminous reed-mat, and was never seen again, narrating his Arctic adventures, was published in 1855.

BELLOWS, Albert F., painter, b. in Milford, Mass., 29 Nov., 1829; d. in Auburndale, Mass., 24 Nov., 1883. He was taken as a child to Salem, and, when sixteen years old, entered an architect's office in Boston, where he remained three years. He then went into partnership with an architect of established reputation, but, in 1840, decided to give his entire attention to painting. He accepted in that year the principalship of the New England school of design, and held it until 1846, when he went abroad and studied for many years in Europe, especially in Paris and Antwerp. His early works, mostly genre pictures in oil, include: "A Pair of Gipsies," "The Sorrows of Boyhood," and "The Lost Child." In 1865 he turned his attention to water-color painting, studying chiefly in England, and he has excelled in this branch of the art, especially in his landscapes. Among his later water-colors are "The Notch at Lancaster" (1867); "Afternoon in Surrey" (in oils) "The Reaper's Child"; "New England Homestead"; and "A Devonshire Cottage." His "Sunday in Devonshire" (in oil) and his "Study of a Head," "Autumn Woods," and "Sunday Afternoon in New England" (in water-colors), were sent to the exhibition at Philadelphia in 1876. To the Paris exhibition of 1878 he sent a "New England Village School" (in oil) and "A New England Homestead" (in water-colors). Other pictures by his hand are "The Willow Wagon," "The Nook," "Salem Turnpike," "The Christening Party," and "Coasting in New England." About a dozen of his pictures have been engraved. Most of his work in this country was done in New York and Boston. In 1869 he was elected associate of the national academy in 1859, academician in 1861, and in 1868 honorary member of the royal Belgian society of water-colorists—an honor rarely bestowed upon foreigners. He was also one of the early members of the American society of painters in water-colors. Mr. Bellows frequently painted in a boat with the sparsa, without using a brush—a method that gives great purity to the tints, but is only productive of good results in the hands of a skilful artist. In water-color painting he followed almost entirely the old school, which, for the high lights of the picture, depends on the color of the paper on which it is painted.

BELLOWS, Benjamin, b. in Walpole, N. H., 6 Oct. 1740; d. in June, 1802. He was chosen town clerk when only nineteen years old, and held the office till 1776. He was a member of the colonial and afterward of the state legislature, and was appointed a delegate to the continental congress in 1781, but his business forced him to decline. He was a member of the state convention that ratified the federal compact in 1788, and was president over the New Hampshire electoral college that voted for Washington in 1788, and was a member of the one that voted for John Adams in 1796. He was active in the colonial and state militia, rising from the rank of corporal to that of brigadier-general, and served during the revolutionary war as a colonel.

BELLOWS, Henry Adams, jurist, b. in Walpole, N. H., 26 Sept., 1803; d. in Concord, N. H., 11 March, 1873. His father's death in 1819 left him to support his mother and a younger brother and sister. The family owned a house in Westminster, Vt., a small village on the western bank of Connecticut river, and, living there, young Bellows taught in one of the public schools of Walpole, of which he was principal. An opportunity offered for him to study law in the office of William C. Bradley, a leading man of his day, and although the time that must necessarily be devoted to study seriously curtailed the family income, the struggle was bravely maintained, until, in 1826, he was admitted to the bar, and, in 1828, opened an office in Littleton, N. H. Throughout these years of hardship his mother nobly seconded his efforts. For many years the young lawyer's life was a continual struggle with poverty; but his unsparing rectitude and professional devotion to the interests of others at last won recognition. He removed to Concord in 1850, a favorable opportunity offering through the appointment of Mr. Perley to the superior court to make one of the judges. An opportunity was also given him to publish, in an ardent struggle for the benefit of others. He was especially liberal in sustaining the Unitarian church society of Concord, and gave more than a tenth of his income to its support. He was appointed associate judge of the supreme court in 1859, and after ten years of service in that capacity, became chief justice on the death of Judge Perley. An unusual fairness of mind marked all his decisions. He never, either as a practising lawyer or on the bench of the supreme court, would lend his influence to defend an unjust cause or shield a criminal. Without extraordinary mental brilliancy, he had, by nature, a rare thoroughness of method and soundness of judgment.

BELLOWS, Henry Whitney, clergyman, b. in Boston, Mass., 11 June, 1814; d. in New York city, 30 Jan., 1882. He was graduated at Harvard in 1832, and at Cambridge divinity school in 1837, was ordained pastor of the first Congregational church in New York, 2 Jan., 1839, and attained a reputation as a ready and eloquent pulpit orator and also as a lecturer on social questions. The name of the church was changed, upon its removal from Chambers street to Broadway, to the church of the Divine Unity, and after its second removal to All-Souls. In 1846 he founded the "Liberator," a weekly Unitarian paper, of which he was the principal writer till 1850. He was also associated in the editorship of the "Christian Examiner" and the "Liberal Christian." In 1853 he delivered a notable "Phi Beta Kappa Oration."
BELL-SMITH

afterward published. In 1854 Harvard university conferred the degree of D. D. upon him. In 1857 he delivered before the Lowell Institute in Boston a course of lectures on "The Treatment of Social Diseases," and the same year he made before the democratic fund society in New York, an address in defence of the drama, entitled "The Relation of Public Amusements to Public Morality, especially of the Theatre to the Highest Interests of Humanity," both of which were issued in New York. In 1860 he published "Restatements of Christian Doctrine, in Twenty-five Sermons," and in 1868, a book on "Theatre and Democracy." In 1883 he edited "The New Face." During the war he was the chief pro-moter and the president of the U. S. sanitary commission, in which capacity he showed distinguished administrative ability in directing the distribution of $15,000,000 in supplies and the disbursement of $5,000,000 in money. He held the place from 1861 till 1865. In 1867 he settled in New York, executed by Augustus St. Gaudens, was erected to the memory of Dr. Bellows in All-Souls church, where he was pastor forty-three years. It represents a full-length front view of the preacher in bas-relief.

BELL-SMITH, Frederick Marlett, Canadian artist, b. in London, England, 26 Sept., 1846. He studied drawing with South Kensington, and went to Canada in 1866. He is a member of the original members of the Royal Canadian academy, the Ontario society of artists, and the old society of Canadian artists, which latter was organized in Montreal in 1867, with Mr. Bell-Smith, Sr., as first president. Mr. Bell-Smith has directed the art department at Alma college, St. Thomas, Ontario, for several years. He is well known as an elocutionist and cartoon artist.

BELMONT, August, financier, b. in Alzey, Hesse-Darmstadt, in 1816; d. in New York city, 24 Nov., 1889. He was educated in Frankfort, and for several years was in the employ of the Rothschilds in their banking-house in that city, and also in Naples. In 1837 he settled in New York, executed by Augustus St. Gaudens, was erected to the memory of Dr. Bellows in All-Souls church, where he was pastor forty-three years. It represents a full-length front view of the preacher in bas-relief.

BELMONT, Francis Vachon de, French missionary, d. at Nola, in 1732. He was of noble birth and highly educated, and embraced the life of a missionary in the Canadian wilds, and in 1689 took charge of a school connected with the Iroquois mission in Montreal. The following year he built for himself a church. After 1701 he was superior to the seminary in Montreal. And in 1715, at the age of sixty, he was chaplain to the king of France. He was a scholar of the highest order, and a man of fine judgment, strength, and capacity, who left a name as one of the first Frenchmen in the province of Canada. His works are "Instruction et Education," "Catecismo," "De la Doctrina Cristiana," and "Catechismo," all written in the Indian language of Yucatan, or Maya. He wrote "Nathaniel Sydney Smith, clergyman, b. in New Lebanon, N. Y., 30 Nov., 1785; d. in Carbondale, Ill., 8 Aug., 1871. He was graduated at Middlebury in 1807, studied theology, and about 1810 was ordained pastor of a Congregational church in Portland, Me. A few years later he went as a missionary to Georgia, where he devoted himself to the work of establishing educational institutions. He became pastor of the Presbyterian church in Troy, N. Y., in 1822, and continued as such for upward of forty years. He was actively interested in the temperance, moral reform, revival, and anti-slavery movements of his time. In 1831 he was moderator of the general assembly of the Presbyterian church, and during the discussions of the questions before that body, he was the leader of the new-school branch. Resigning his pastorate in 1863, he passed the remainder of his life in retirement in Troy and in Carbondale. Besides sermons, essays, and addresses, which have
been separately published, he was the author of a volume entitled “Four Sermons on the Atonement.” He was also one of the compilers of the hymn-book adopted by the new-school branch of the Presbyterian church.

BEMISS, Samuel Merrifield, physician, b. in Nekoosa, Wis., 15 Oct., 1821. He received his early education from his father, Dr. John Bemiss, and from private tutors, and was graduated at the medical department of the University of New York in 1846. He practised in Bloomfield, Ky., until 1853, when he removed to Louisville, and in 1858 became connected with the medical department of the university of Louisville as a professor, and at times was its secretary and vice-president. From 1862 till 1865 he was a surgeon in the Confederate army. After the war he settled in New Orleans, and in 1866 he became professor of the theory and practice of medicine in the University of Louisiana. He is a member of the state board of health and of the American medical association, being its vice-president in 1868, and of other medical societies. Dr. Bemiss has contributed papers to the literature of his profession, among which are “Essay on Groun” and “Report on Consonguns.nerous Marriages.” He is the editor of the “New Orleans Medical and Surgical Journal.”

BENALCAZAR, or BELALCAZAR, Sebastian de (bay-nah-cah-thahr), Spanish soldier, b. in Benalcazar in the latter part of the 15th century; d. in Popayan, Colombia, in 1530. He left Spain in 1514 and joined Pedrarias’ expedition, but refused to give his real family name, Moyano, and for this reason his companions called him after his native town. When he reached America he soon became noted for his gallantry, and formed a friendship with Pizarro. He took the city of Quibdío and made a successful expedition into the Territories now belonging to Colombia, where he met, at Cundinamarcé, three other Spanish leaders, who had gone to that place from different points. After conquering Popayan, he was appointed governor of that part of the country in 1538. Some years later he was compelled to resign, and his name was involved in legal proceedings and other troubles, which caused his death before he could return to Spain.

BENAVENTE BENAVIDES, Bartolomé (bay-nah-vee-tye), Spanish priest, b. in Madrid in 1593; d. in Oaxaca, Spain, in 1652. He was professor of theology in the university of Lima, Peru, and canon, dean, and inspector or visitor of archbishopric. In 1620 he was consistorial bishop of Oaxaca, Mexico. He rebuilt the convent, and reorganized the collegiate province of that city.

Benavente was the first prelate invested by the pope with the special faculties that under the name of “solitus” are now conferred upon all the bishops of America.

BENAVIDES, Alfonso, or Alonso de (bay-nah-vee-deh), Franciscan friar, b. in Spain. He lived in the first half of the 17th century, and was noted for his great learning in theology and history. He was the author of “Relación de los Tesoros descubiertos en Mejico,” a memoir addressed to the king of Spain, which Benavides was ordered by the viceroy of Mexico, in 1637, to prepare. He was also appointed counselor of the court as to the real condition, material and moral, of that part of America. The work was published in Madrid in 1630, nine years after its author had been elected “custodian” of his chapter of New Mexico.

BENAVIDES Y DE LA CUEVA, Diego (bay-nah-vee-deh), count of Santisteban del Puerto, Spanish soldier, b. about 1600; d. in Lima, Peru, 17 March, 1666. He was a descendant of Alfonso VII. of Castile. He studied at Salamanca, and entered the army, distinguishing himself in the Italian war in 1637, and was afterward governor of Galicia, viceroy of Navarre, member of the war council, and one of the plenipotentiaries that signed the treaty of peace between Spain and France, 1659. He urged the marriage of the Spanish infanta Maria Teresa to Louis XIV. of France, for which Philip IV. gave him the title of marquis of Soleri. He was appointed viceroy of Peru, entered Lima, 31 July, 1661, re-established order at La Paz in December of that year, sent an expedition to Chili under Gov. Angel Perea, appointed a special board to regulate Indian labor, which prevented many abuses in the clearing of the Indians, and endowed a chair of mathematics in the university of Lima.

BENDIX, John E., soldier, b. 28 Aug., 1818; d. in New York city, 8 Oct., 1877. The birthplace of Gen. Bendix lies between the United States and Canada, as he was born on board the “Sarah,” one of the first steamers which approached St. Lawrence river. He learned the trade of a machinist in New York, joined the 9th regiment New York state militia in 1817, and when the civil war began, in 1861, he organized the 7th regiment of New York volunteer infantry. He participated in the battles of Antietam (16–17 Sept., 1862), Fredericksburg (13 Dec., 1862), and the Wilderness (6–7 May, 1864), besides the engagements of the intervening campaigns. He was promoted brigadier-general in 1865.

BENEDICT, Abner R., soldier, b. about 1830; d. 15 May, 1867. At the beginning of the civil war he volunteered as a private in the 12th regiment, New York state militia, which was one of the three that first started from New York for the seat of war. In the battle of Bull Run, he was appointed second lieutenant in the 4th regular infantry. In March, 1862, he embarked for the peninsula, and through the battles of the Potomac army was conspicuous for gallantry. At Fredericksburg he commanded forty men of the strong picket-line that, during the night of 13 Dec., 1862, was pushed up to the enemy’s picket-line, dismounted, and fell back to the river, but the order to hold the position until relieved, and the intention to withdraw the picket-line before daylight should reveal it to the enemy. By some mistake the line was not withdrawn as directed, and at daylight the enemy opened fire at short range. While encouraging his men, a shot from a Yankee voice, or a example of Benedict fell, shot through the lungs, but was carried off the field by his soldiers. The wound was considered mortal,
but, before the scar was fairly healed, in three months, he reported for duty at Washington. He joined his regiment at Chancellorsville while the battle was in progress. At Gettysburg his superiors were all killed or wounded, leaving him in command, and he handled the regimental division that battle with great credit to himself. Shortly after Gettysburg his health began to fail, as a result of his wound; but in spite of this he refused to give up active service, and for some time commanded the 4th infantry, as Gen. Grant's head-quarters guard during the Petersburg campaign. After being discharged for the duration of his disability, he returned to his home and, for a time, was confined to his house, and in the depth of winter, shortly before his death, was on duty at Plattsburg, N. Y., one of the coldest of the eastern army posts. He secured a change of station in the hope of benefit from a warmer climate, but died from the effects of the wound received at Chancellorsville.

BENEDICT, David, clergyman, b. in Norwalk, Conn., 10 Oct., 1779; d. in Pawtucket, R. I., 5 Dec., 1874. Early in life he learned the shoemaker's trade; but, after becoming interested in religion, he prepared for college, and was graduated at Brown in 1806. While a student, he had preached to federated congregations, and at the end of his course, he was ordained pastor of the first Baptist church at that place, where he remained for twenty-five years. Although he was not attached to any regular pastorate, he afterward preached until near the close of his life, and a sermon delivered on his ninety-second birthday is said to have been remarkable for its ability and clearness, and for the vigor with which it was delivered. Much of his time was devoted to historical research, and he is the author of several valuable works, among which are "History of the Baptists" (1813); abridgment of Robinson's "History of Baptism" (1827); abridgment of his "History of the Baptists" (1829); "History of all Religions" (1824); "History of the Baptist Denominations in America and all Parts of the World" (1848); "Fifty Years among the Baptists" (1850); and "A Compendium of Ecclesiastical History" and "History of the Donatists," which were ready for the press at the time of his death. He was likewise the author of several poems, including "The Watery War," and compiled a "Reference Hymn-Book," which has had a large circulation.

BENEDICT, Erastus Cornelius, lawyer, b. in Brantford, Conn., 19 March, 1800; d. in New York city, 22 Oct., 1880. He was a son of the Rev. Joel T. Benedict, who, a few years after the birth of Erastus, settled in New York, having charge successively of churches in New Windsor, Franklin, and Chatham. Early in life, young Benedict became a teacher in a district school, and at the age of eighteen he entered the sophomore class at Williams, where he graduated in 1821. He was principal of an academy in Jamestown, N. Y., and later in Newburg, N. Y.; after which he was tutor at Williams. Meanwhile he had studied law, been admitted to the bar, and the following year he became a deputy clerk under the U. S. district judge of southern New York. Here his attention was directed to admiralty law, and for half a century he was considered a leader in admiralty cases. In 1840 he was elected assistant alderman from the 15th ward in New York city, and the following year he was elected as the bound of education, and was its president continuously until his resignation in 1863. He was a member of the assembly in 1848 and in 1854, and a state senator in 1853. He was chosen a trustee of Williams in 1855, and in the same year became a regent of the University of the State of New York, succeeding to the chancellorship of that body in 1878. He was actively interested in various charitable organizations of New York, and a governor of the New York Hospital, after its incorporation, and was also for many years a prominent member of the New York Historical Society. Of his writings, besides numerous addresses before historical and scientific societies, the most important are "American Admiralty" (New York, 1850); "A Run through Europe" (1860); and "The History of Hildesbert and other Medieval Hymns" (1861).

BENEDICT, George Grenville, soldier, b. in Burlington, Vt., 10 Dec., 1826. He was graduated at the university of Vermont in 1847, and in 1853 became editor of the Burlington "Free Press," for many years the leading republican journal of the state. In 1860 he was elected to the Vermont legislature. In 1863 he was appointed aide on a brigade staff in the 1st Corps. On the third day of the battle of Gettysburg he participated in the repulse of the desperate charge delivered by the confederates, and, in the fighting at Gettysburg, was severely wounded in the mouth of a battery, and Lt. Benedict, with another officer, caught him as he fell from his horse. After the civil war he served on the governor's staff, was in the state senate from 1869 till 1871, postmaster of Burlington from 1871 till 1874, secretary of the state university from 1885, and president of the Vermont press association in 1886, being senioir editor of the state at that time. He has published "Vermont at Gettysburg" (Albany, 1866; new ed., 1870); "Vermont in the Civil War" (2 vols., 1866-7); and "Army Life in Virginia" (1895).

BENEDICT, George Wyllys, educator, b. in North Stamford, Conn., 11 Jan., 1796; d. in Burlington, Vt., 29 Sept., 1871. He was graduated at Williams in 1818, and became principal of an academy in Westfield, Mass. From 1819 till 1822 he was tutor at Williams, and then became principal of the academy in Newburg, N. Y. He was professor at the University of Vermont from 1823 till 1847; but failing health forced his resignation, and he entered the Associated Erie Company in the construction of the Troy and Canada junction telegraph line, becoming the first superintendent of that company. He subsequently engaged independently in telegraph-building, and contracted for the erection of several lines. He purchased the Burlington "Free Press," in 1835, and remained its editor and publisher until 1866. During 1854 and 1855 he was a member of the Vermont senate, serving as chairman of the committee on education. He was a member of the State Historical Society, and also of the Editors' and Publishers' Association.

BENEDICT, Lewis, soldier, b. in Albany, N. Y., 2 Sept., 1817; d. at Pleasant Hill, La., 9 April, 1864. After graduation at Williams, in 1837, he studied law in Albany and was admitted to the bar in 1841. In 1845-6 he was city attorney at Albany; in 1847 judge advocate; from 1848 until 1852 surrogate of Albany. In 1860 he was elected a member of the state assembly, but entered the military service in June, 1861, as lieutenant-colonel of the 73d New York volunteers. He served in the peninsular campaign, and was taken prisoner at Williamsburg, Va. After several months' confinement in Libby and Salisbury prisons, he was exchanged, and, as colo-
nel of the 162d New York volunteers, accompanied Banks's expedition to Louisiana in September, 1862. He was brevetted brigadier-general for gallantry in the assault on Port Hudson, 14 June, 1863. In the Red river campaign of 1864 he par- ticipated in the various engagements, and was mortally wounded while in command of a brigade at the battle of Pleasant Hill. His death was made the subject of a poem by Alfred B. Street. See "Memorial of Brevet Brigadier-General Lewis Beneficci, Colonel of the 162d N. Y. V. I."

BENNET, Alexander (1810-1888), soldier, b. in St. Augustine, Fla., 22 Jan., 1837. He studied at Hallowell's school in Alexandria, Va., then at the University of Georgia, and at the U. S. military academy, where he was graduated in 1849, standing third in his class. He was appointed to the ordnance corps, and served at the Watervliet arsen- nals, at Washington, and then at the St. Louis arsenal. In 1859 he became assistant professor of geography, history, and ethics at West Point, and from 1861 till 1864 was instructor of ordnance and the science of gunnery, after which, until 1869, he was in command of Frankford arsenal. In 1869 he was made assistant to the chief of ordnance, and in 1872 became the chief of the department. In 1867 he succeeded to the place, with the rank of brigadier-general. He translated Jomini's "Political and Military History of the Campaign of Water- loo" (New York, 1853), and is the author of a treatise on "Military Law and the Practice of Courts-Martial" (1869), and "Electro-Ballistic Ma- terials," a work which appeared in 1866.

BENEZET, Anthony, philanthropist, b. in St. Quentin, France, 31 Jan., 1714; d. in Philadelphia, Pa., 3 May, 1784. He was descended from wealthy French parents, who fled hastily from France to Holland in 1685, after the revolution of the edict of Nantes, and thence to England in 1715. In Ireland his relatives became Quakers, and in 1731 they settled in Philadelphia. He apprenticed him- self to a cooper, but in 1742 became instructor in the Friends' English school, and continued to teach until near the end of his life. He devoted much attention to the abolition of the slave-trade, and advocated the emancipation and education of the colored population, opening for that purpose a private school for them. During the revolution and the occupation of Philadelphia by the British army, he was active in alleviating the sufferings of the prisoners. He published tracts, which were gratuitously distributed throughout the country, the most important being "A Caution to Great Britain and her Colonies, in a Short Representa- tion of the Calumnioust State of the Enslaved Negroes in the British Dominion" (Philadelphia, 1766); "Some Historical Account of Guinea, with an Inquiry into the Rise and Progress of the Slave-Trade" (1771); "Observations on the Indian Na- tives of this Continent" (1784); "A Short Ac- count of the Society of Friends" (1789); and "Dissertation on the Christian Religion" (1782). See "Memoir of Anthony Benezet," by Roberts Vaux (New York, 1817).

BENHAM, Henry Washington, soldier, b. in Connecticut, 8 April, 1813; d. in New York, 1 New June, 1884. He was graduated at West Point in 1837, assigned to the corps of engineers, and for a year assistant in charge of improvements below Pittsburgh. In July, 1838, he was appointed first lieutenant, and from 1839 till 1844 was superintending engineer of the repairs of Fort Marion and of the sea-wall at St. Augustine, Fla. During the three years succeeding he was engaged upon government works in Pennsylvania, Maryland, and elsewhere. He was with the army in Mexico in 1847-8, and brevetted cap- tain for gallant and meritorious services in the battle of Buena Vista, 23 Feb., 1847. After the Mexican war he was engaged for a time on engi- neering duty in New York harbor, and promoted to the rank of captain in May, 1848. He was also in charge of several other works of importance at Boston, Washington, and Buffalo, from 1848 to 1857. In the latter year he was assistant in charge of the coast surveys of the U. S. navy. He was sent to Europe on duty connected therewith. During the following seven years he was occupied in professional work for the government at Bos- ton, Newport, and Sandy Hook, and on the Poto- mac aqueduct. At the beginning of the civil war in 1861, Capt. Benham entered upon active serv- ice; was on Gen. Meade's staff, and was chief of the department of the Ohio; was brevetted colonel for gallantry at the battle of Currick's Ford, Va., 13 July, 1861; in August was made brigadier-general of volunteers, and was engaged in the Virginia campaigns, including the actions at New Creek (1862) and Carnifex Ferry (10 Sept., 1862). In Dec. he was made present at the Virginia (10-11 April) and James Island (16 June). Later in the year he superintended fortifications in Boston and Portsmouth harbors, and was in command of the northern district of the department of the south. He proved very efficient in throwing pontoon-bridges across the Rappahannock, the Potomac, and the James rivers, and was in com- mand of the Virginia defense at Richmond in 1864. In the mean time he had, through the regular stages of promotion, attained the full rank of lieutenant-colonel of engineers, and in March, 1865, was brevetted brigadier-general and major- general U. S. army, and major-general U. S. volunteers, for gallant services during the rebellion and in the campaign that followed Lee's army. In 1865 (7 March) he was pro- moted colonel of engineers, and during that year was engaged in government works on the coast of New England, and from October, 1869, till July, 1877, was similarly occupied in the works on Long Island Head. Subsequent to this he was in charge of the defenses of New York. He was placed on the retired list 19 June, 1879, and was made a brigadier-general in Nov. 1882. He was appointed to the post of major in the picket-shovel used by troops in the field, and was an expert in pontoon-bridges, in the management of which he devised improved improvements.

BENITO, Fray Marcos (bay-nee-to), Spanish missionary, b. in Valencia, Spain, in the 17th cen- tury. He was a Dominican monk, and went as a missionary to the Spanish-American countries. His best known works are the "Arte de la Longua Mije," and "Devecionario in Dialecto Mije."

BENJAMIN, George, Canadian statesman, b. in England in 1799; d. in Belleville, Ontario, 6 July, 1864. He resided for a time in Liverpool, was engaged in commercial pursuits, and travelled extensively. In his early manhood he was colonel of a New France regiment, and had retired to Canada, and set- tled in Belleville, where he remained until his death. For a number of years he conducted the Belleville "Intelligencer." He became warden of Hastings on the introduction of municipal institu- tions by Lord Sydenham, and so continued for many years, and was also for several years registrar of the county. In July, 1862, he was appointed first lieutenant, and from 1839 till 1844 was superintending engineer of the repairs of Fort Marion and of the sea-wall at St. Augustine,
the Orangemen of British North America in 1848, and retained that office for several years. When the project of annexing Canada to the United States was mooted, Mr. Benjamin issued a manifesto in the Democratic newspaper in New Orleans.

**Benjamin, John Forbes**, soldier, b. in Cieero, N. Y., 23 Jan., 1817; d. in Washington, D. C., 8 March, 1877. He received a common-school education, and, after three years spent in Texas, went to Missouri, where he studied law, was admitted to the bar, and began practice at Shelbyville in 1848. He was a member of the legislature in 1850 and 1852, and presidential elector on the democratic ticket in 1856. He entered the national army as a private in the Missouri cavalry in 1861, was made captain in January, 1862, major in May, and lieutenant-colonel in September. He resigned to become provost-marshal of the 8th district of Missouri in 1865. In 1867, he was elected to Congress, where he served three successive terms, from 4 Dec., 1865, till 3 March, 1871. After this he practiced law and was a banker in Washington until his death.

**Benjamin, Judah Philip**, lawyer, b. in St. Croix, W. I., 11 Aug., 1811: d. in Paris, 6 May, 1884. His parents were English. He entered Harvard in 1831, sailed from England to settle in New Orleans. The mouth of the Mississippi being blocked by the British fleet, they landed at St. Croix, where Mr. Benjamin was born. His boyhood was passed in Wilmington, N. C., and in 1835 he entered Yale, but left college three years later, without receiving a degree. He then studied law in New Orleans in a notary's office, and was admitted to the bar, 11 Dec., 1832. For some time he was engaged in a manufacturing school, and in compiling a digest of cases decided in the local courts. This, at first only intended for his personal use, was subsequently enlarged and published as "A Digest of Reported Decisions in the Supreme Court of the late Territory of Orleans and of the Supreme Court of Louisiana" (1834). He soon rose to the head of his profession, and in 1840 became a member of the firm of Shidell, Benjamin & Conrad, having an extensive practice in planters' and cotton merchants' cases. He was a whig, and in 1843 a member of the convention held in New Orleans in opposition to the state, in which body he advocated the addition of an article requiring the governor to be a citizen born in the United States. In 1847 a U. S. commissioner was appointed to investigate the Spanish land-titles, under which the early settlers in California claimed their property, and Benjamin was one of the attorneys admitted to practice in the U. S. supreme court, and for a time much of his business was with that body at Washington. In 1848 he became one of the presidential electors at large from Louisiana, and was elected to the U. S. senate in 1852, and again in 1857, but on the secession of Louisiana he withdrew from the senate, with his colleague, John Shidell, 4 Feb., 1861. During his senatorial career he had attained pre-eminence in the southern wing of the democratic party. A breach between himself and Jefferson Davis seemed likely to cause a duel, when the latter apologized on the floor of the senate for the harsh language he had used. He advocated the Kansas-Nebraska bill of Mr. Douglas in 1854, but afterward insisted that the principle of popular sovereignty had been fundamentally set aside by the declaration of the supreme court in the Dred-Scott case, which, he contended, should be accepted as conclusive. His firm advocacy of the legal claims of slavery brought from Senator Wade, of Ohio, the remark that Mr. Benjamin was "a Hebrew with Egyptian principles." On the formation of the provisional government, the following resolution was appointed attorney-general, and in August, 1861, was transferred to the war department, succeeding L. P. Walker. Having been accused of incompetence and neglect of duty by a committee of the confederate congress, he resigned his office, but immediately became secretary of state, which place he held until the establishment of his government. He had the reputation of being "the brains of the confederacy," and it is said that Mr. Davis was in the habit of sending to him all work that did not obviously belong to the department of some other minister. It was his habit to begin work at 8 a. m., and he was often occupied at his desk until 2 o'clock next morning. Some of the confederacy had fled from Richmond with other members of the cabinet, and, on becoming separated from the party, escaped from the coast of Florida to the Bahama in an open boat, thence going to Nassau, and in September, 1865, reached Liverpool. He at once began the study of English law, and was entered as a student at Lincoln's Inn, 13 Jan., 1866. In the following autumn he was called to the English bar, at the age of fifty-five. At first his success was slight, and he was compelled to resort to journalism for a livelihood. In 1868 he published "A Treatise on the Law of Sale of Personal Property," which is now the authority on this subject in English law (3d ed., London, 1880). His practice then increased, and June, 1872, he was made queen's counsel, after which his business soon became as large and remunerative as that of any lawyer in the land. Among his many arguments, the one most generally known is that which he delivered before the court for crown cases reserved, on behalf of the captain of the "Franconia," in his last great and public case was that of Anson and others against the London and northwestern railway. After this he accepted only briefs upon appeal, and appeared solely before the house of lords and the privy council. Early in 1883 he was compelled by failing health to retire from practice, and a famous farewell banquet was given him in the hall of the Inner Temple, London, 30 June, 1883. He then went to Paris, where his wife and daughter resided, and rapidly failed until his death. See life by Francis Lawley (London, 1888).

**Benjamin, Nathan**, missionary, b. in Catskill, N. Y., 14 Dec., 1811; d. in Constantinople, Turkey, 37 Jan., 1885. He was graduated at Williams College, and another theological seminary in 1835, was appointed as missionary to Greece and Turkey by the American board, and went to Argos in 1836. He removed to Athens in 1838, and there labored for six years, chiefly in connection with the press. From 1843 till 1845 he was acting U. S. consul at Athens, and he then
entered upon the Armenian mission at Trebizond, but returned to the United States in 1845. Subsequently he was summoned to a new mission, and arrived at Smyrna, 7 Dec., 1847, where he devoted his attention to the printing of the Bible and tracts in the Armenian language. In 1852 this work was transferred to Constantinople, where he also preached steadily in the Greek and English languages. He translated numerous works into Greek and Armenian, including "Pilgrim's Progress" and Daubigny's "Reformation," and also established the first newspaper ever published in the Armenian language. The "Gazette Armenian" is still issued.—His wife, Mary Gladding Wheeler, b. in Providence, R. I., 1 March, 1814; d. in Medford, Mass., 3 March, 1871, translated several small works into Greek, and contributed poems to periodicals. She also published "The Missionary Sisters (New York, 1839).—Their son, Samuel Greene Wheeler, author, b. in Argos, Greece, 15 Feb., 1839; was graduated at Williams in 1859. Shortly afterward he became the assistant librarian in the state library, Albany, N. Y., where he remained from 1861 till 1864. In February, 1863, he was appointed U. S. minister to the court of Persia, and established the legation at Tehran. He resigned in July, 1865, Mr. Benjamin's contributions to public and literary works have been numerous. For some time he was the art editor of the New York "Evening Mail" and the "Magazine of Art." Among his books are "Constantinople, Isle of Pearls, and other Poems" (Boston, 1860); "Ode on the Death of Abraham Lincoln" (1865); "The Turk and the Greek" (1867); "Tom Riddle's" "Chalcoalphya, 1806: Advice to his Son," a medley translation from the Latin (Albany, 1870); "The Choice of Paris; a Romance of the Troad" (Boston, 1870); "What is Art?" (1875); "Contemporary Art in Europe" (New York, 1877); "The Atlantic Islands" (1868); "Art in America" (1879); "The Multitudinous Seas" (1879); "Our American Artists" (Boston, 1st series, 1879; 2d series, 1881). "The Wild's Paradise" (New York, 1880); "Troy, its Legend, Literature, and Topography" (1880); "A Group of Etchers" (1882); "Cruise of the Alice May" (1883); "The Story of Persia" (1886); and "Persia and the Persians" (Boston, 1886). He has drawn many illustrations for magazines, an illustrated edition of Lantchell's "Launcelot and his Lady." His paintings include "Home of the Sea Birds" (1875); "Porta da Cruz, Madeira" (1876); "The Corbière, or Sailor's Dread" (1876); "The Wide, Wide Sea" (1877); "Yachts Struck by a Squall" (1879); "Among the Breakers" (1879); and "In the Roaring Forties" (1882).

E. B., Benjamin, Park, journalist, b. in Denerara, British Guiana, Aug. 18, 1809; d. in New York city, 12 Sept., 1864. His father was born in Connecticut, but removed to Denerara, and there carried on business. At an early age Park was sent to New England for medical advice and to be educated. He studied for two years at Harvard, and then at Trinity, where he was graduated in 1831. He then studied law and was admitted to the bar in Boston in 1822. His tastes inclined more toward literature than to law, and he became one of the original editors of the "New England Magazine." In 1857 he removed to New York and edited, in connection with Charles Fenn Hoffman, the "American Monthly Magazine." Later he was associated with George W. MacFarland as editor of the "New-Yorker," and for a short time had charge of the "Brother Jonathan," a literary weekly paper. In 1840 he established the "New World," and edited it nearly five years, in connection with Epes Sargent and Rufus W. Griswold. He afterward edited and published, for a short time only, "The Western Continent" and "The American Mail"; but those periodicals were not altogether successful, and he withdrew from all publication. The remainder of his life was spent in New York, devoted to literary pursuits. He contributed, both in prose and verse, to various periodicals, and delivered lectures and read poems in public. "The Meditation of Nature" (1832), "Poetry, a Satire" (1832), and "Infatuation" (1844), are the best known of his compositions. "Juliet," "The Gladiator," "The Nautilus," "To One Beloved," "The Departed," and "The Old Sexton," are the most successful of his shorter poems. No collected edition of his writings has been published. Mr. Benjamin was in person a man of full chest and powerful arms, but was completely lame below the hips.—His son, Park, patent expert, b. in New York city, 11 May, 1849, was graduated at the U. S. naval academy in 1867. He was ordered to the "Franklin," Admiral Farragut's flag-ship, and with it spent two years in Europe. In 1869 he was advanced to the grade of ensign, but he soon resigned, and studied law at the Albany Law School, where he was graduated in 1870. From 1872 till 1885 he was in the employ of the "Scientific American," and since that time has been occupied as scientific expert or expert counsel in patent cases. Among his short stories are "The End of New York" and "The Story of the Telegraph." His books include "Shakings—Etchings for the Naval Academy" (Boston, 1867); "Wrinkles and Reflections on the Scientific American," "The Cyclopaedia of Applied Mechanics," edited (1880); and "The Age of Electricity" (1886).
vicinity, and manufactured iron during the year. At the beginning of the century he had increased his plant by the erection of a grist-mill, and had begun the building of a larger forge, afterward adding a nail-mill, furnaces, and other improvements. The development of the iron industry in the western part of Pennsylvania is largely due to his enterprise. The output from his works was packed on horses and sent to Pittsburgh, where for many years he enjoyed, without competition, the trade in what he called "Juninta iron." The borough of Bellefonte was greatly indebted to his enterprise and liberality. He acquired a large property, mainly from the descendants of his uncle, and added greatly to the people's wealth by making and selling iron. The fact that for more than thirty years he was the only iron manufacturer in the county is evidence of his skill and enterprise. He was, therefore, able to command a high price for his product, and to make large profits. He was a man of principle and integrity, and his word was his bond. The citizens of Bellefonte are proud of his memory, and have erected a monument to his memory in the form of a statue, which is now placed in the town square. He also contributed largely for the building of the water-works. In politics he was a democrat and was twice a presidential elector, notably on the Jackson-Calhoun ticket of 1824. In 1827 he established the "Centro Demócrata" at Bellefonte, in the interest of Gen. Jackson. He was mayor-general of the town in 1837. Many of theotton's favored the Stuarts, and the parliament wisely sought to conciliate rather than coerce them. Benet was a Roundhead, as was also his fellow-commissioner. All opposition did not disappear, however, until the British frigate "Guinea" arrived in March, 1662, with orders to carry out the instructions of the government in London, which had declared the colony to be in open rebellion against the authority of parliament. Virtual independence was, in fact, guaranteed to Virginia, and it was agreed that the people should have all the liberties of free-born Englishmen, should enact their own laws, should remain unquestioned as to their past loyalty, and should have "as free trade as the people of England." So much was preferred by parliament, that it became a precedent in the future, prohibiting taxation without representation, and agreeing that no forts should be erected without the consent of the colony, was never approved. Until the restoration, Virginia was nominally independent, although actually under the rule of the commissioners. The executive officer became legislative and judicial, and the governor was elected by the people. Members of the house of burgesses were required to take oath that they would especially provide for the "general good and prosperity" of Virginia and its inhabitants. Gov. Benet had been treated oppressively by the late royalist governor, Sir William Berkeley, but nobly refrained from taking the revenge that was due him. New York was still held by the British, and Benet's administration the house of burgesses claimed the right to define the powers of the governor and council, and declared "that the right of electing all the officers of this colony should appertain to the burgesses as the representatives of the people." Maryland was not so easily pacified, being more aggressively loyal, and Benet with Clayborne went over in the "Guinea" frigate with the English commissioners, and enforced submission. In 1664 the Maryland revolutionists, again revolted, and overthrew the parliamentarians, and intercolonial hostilities followed by land and sea, resulting in victory for the Virginians under Gov. Benet. The decisive action took place on 25 March, 1655, and many prisoners, including the整理后的内容
BENNETT

BENNETT

ling agent for a magazine, and then wrote stories for the "Daily Commercial." He also founded a magazine called "The Casket," but it lived only nine months. In 1850 Mr. Bennett moved to Philadelphia. His writings include about forty romances and many hundreds sketches of American frontier life, which have appeared in the "New York Ledger," the "Philadelphia Evening Post," and other papers. In 1860 he established the "Dollar Monthly," which was a failure. Among his novels are "Viola" and "Waldo Warren" (Philadelphia, 1852); "Clara Moreland," (1855); and "The Artist's Bride" (New York, 1857). His most popular books have been "Prairie Flower" and "Lively Forest" (Philadelphia, 1862), both of which have been reprinted in English, French, and German. He has also published 100,000 copies. A uniform edition of his novels was recently begun, but only three volumes have been published, "The Outlaw's Daughter" and "Villetta Lindon" (Philadelphia, 1873), and "The Phantom of the Forest" (1874).

BENNETT, James Gordon, journalist, b. in Mill near Keith, in the parish of Litchfield, 1 Sept., 1796; d. in New York city, 1 June, 1872. His parents were Roman Catholics of French descent, and when he was fourteen years old he was sent to Aberdeen to study for the priesthood; but, convinced that he had mistaken his vocation, he determined to emigrate, and in April, 1819, he landed at Halifax, N. S., where he attempted to earn his living by teaching. He was a successful teacher, but was lured by the prospects of an American journalism. In that, he made his way to Boston, where he found employment as a proof-reader. About 1822 he went to New York, and contributed to the newspapers, then became assistant in the office of the Charleston "Courier," and in 1824 returned to New York and attempted to establish a commercial school, but the attempt was unsuccessful, and again turned to the newspapers, becoming a reporter, paragraphist, and contributor of poetry and all kinds of articles. In 1825 he bought on credit the "Sunday Courier," but soon gave it up. The next year he became connected with the "National Advocate," but left it because of his opposition to the election of John Adams, and became correspondent of Noah's "Enquirer." About this time he joined the Tammany society. In 1828 he went to Washington as correspondent for the "Enquirer," and sent a series of lively personal letters that were widely copied. At his suggestion the "Enquirer" was consolidated with another paper, becoming the "Courier and Commonwealth," which, under his editorial management, gave a strong impetus to American journalism. In 1838 he founded the "Baltimore American," and in 1839 the "Baltimore Times," which were both noted for their vigor and independence. In 1842 he founded the "Baltimore American and Commonwealth," which was noted for its opposition to the succession of the first President, and in 1844 he founded the "Baltimore Sun," which was a decided advocate of the Whig party. He was one of the last of the old school of newspapers in the United States, and was universally respected for his integrity, intelligence, and reckless personal attacks. The paper became popular, although it offended all parties and all creeds. On 13 June, 1836, he introduced a money-article, then a novel feature in American journalism. The next month the printing-office was burned, and Smith and Anderson abandoned the enterprise; but on 31 Aug. Bennett revived the paper, of which he was henceforth sole proprietor. The great fire of 16 Dec., 1835, was reported with the fulness of incident and detail that has since become characteristic of American newspaper reports. In 1838 he engaged European journalists as regular correspondents, and extended the system to the principal American cities. He systematically employed newspapers to distribute his paper. The personal encounters in which he became involved through his lampoons were described in the same lively and picturesque style. In 1841 the income of the paper was at least $100,000. In 1846 a long speech by Clay was telegraphed to the "Herald." During the civil war its circulation was more than doubled. It employed sixty-three correspondents, and the payments for correspondence and news were disproportionate to its payment for editorial and critical matter. It was as a collector of news that Mr. Bennett mainly excelled. He had an unerring judgment of its pecuniary value. He knew how to select the subject that engaged the interest of the people, and to give them all the details they could desire. He also had a method of impressing the importance of news upon others in his employ. No exchange editor was so close a reader as he of the great papers of the country. He clipped passages for insertion or for texts for editorials or special articles, and when he visited the office it was to unperk his mind of the suggestions thus stored. There he was an editor without a gallery. To the editorial writer more than the suggestions for an article, and he required his co-laborers to meet him daily for consultation and the distribution of topics. When another person presided, the several editors made suggestions; when Bennett himself was present, the editors became mere listeners, Bennett himself wrote the editorials. From his memoirs of "J. G. Bennett and his Times" was published in New York in 1855. See Hudson's "Journalism in the United States" (New York, 1872). On 6 June, 1840, Mr. Bennett married Miss Henrietta Agnes Crean, a poor, but accomplished, music-teacher in New York. She died in Italy, 31 March, 1871. —James Gordon Bennett, Jr., New York, 10 May, 1881. The son of the founder of the "Herald," became the proprietor of the newspaper upon the death of his father. He resides mostly in Paris, and gives his attention chiefly to superintending the collection of foreign news. He added to the fame of his paper by publishing in England storm-warnings transmitted from the fleet of States, by flying out the "Cambria," whose expedition, by sending Henry M. Stanley in search of Livingstone, and by other similar enterprises. In 1883 he associated himself with John W. Mackay in forming the commercial cable company and laying a new cable between America and Europe, to compete with the combined English and French cable company. He died in New York, 8 Oct., 1883. He was a great lover of books, especially in yachting, and in 1866 he took part in a memorable race from Sandy Hook to the Needles, Isle of Wight, which was won by his schooner, the "Henrietta," in 13 days 21 hours and 55 minutes, against two competing yachts. In 1870 he sailed another race across the Atlantic from Queenstown to New York in his yacht "Pius IX.," but was beaten by the English yacht "Cambria," which arrived only two hours in advance.

BENNETT, Milo Lyman, jurist, b. in Sharon, Conn., in 1790; d. in Taunton, Mass., 7 July, 1868. He attended at Williams and also Yale, where he graduated in 1811. He studied law at the Litchfield law school, and entered upon the practice of his profession in Burlington, Vt., where he resided until his death. He became in 1839 an
associate justice of the supreme court of the state, and retained that office for twenty years. He was a member of the last local legislature, the last of which was "The Vermont Justice."

BENNETT, Thomas W., soldier, b. in Union co., Ind., 16 Feb., 1831; d. 2 Feb., 1869. He was graduated at the law-school of Indiana Asbury university, and began practice. He was elected to the state senate in 1858, and resigned in 1861 to enter the national service. He was captain in the 15th Indiana volunteers in April, 1861, major of the 36th regiment in September, colonel of the 66th in August, 1862, and commissioned brigadier-general on 5 March, 1863. He was again chosen to the state senate in October, 1864, and served till March, 1867. He was mayor of Richmond, Ind., from May, 1869, till 1871, and in September of the latter year appointed governor of Idaho territory. He resigned this office 4 Dec., 1875, supposing that he had been elected delegate to congress as a republican; but the house gave the seat to his democratic opponent.

BENNETT, William Zebina, chemist, b. in Montpelier, Vt., 25 Feb., 1830. He was graduated and became president of the agricultural and mechanic institute at that university in September of the same year. He continued as such until January, 1880, when he became master of sciences and mathematics at De Vany College. During 1879 and 1880 he was assistant teacher in the summer school of chemistry. In 1880 he became assistant professor of natural science, and in 1882 he was elected chair of natural sciences in the University of Wooster. Besides numerous contributions to scientific periodicals, he has published "A Plant Analysis" (Wooster, 1885).

BENSEL, James Berry, author, b. in New York city, 2 Aug., 1856; d. there, 3 Feb., 1886. When about eight years old he removed with his parents to Lynn, Mass., and most of his life was passed in that city. His literary tastes developed early, and his first poems appeared in print when he was but seventeen. A novel by him, called "King Cophetua's Wife," was published as a serial in the "Overland Monthly" in 1883, and a small volume of his poems was issued in January, 1886, with additional poems. An enlarged edition of this was issued in the summer of 1886. His life was full of hardships and sorrows more than most men are called to endure, and this circumstance imparted a tinge of melancholy to many of his poems. His verse is always musical, often highly finished, and is lacking in either strength of thought or delicacy of expression. Long and seemingly hopeless struggles against adversity and ill health affected his spirits and prevented him from realizing the full extent of his powers. His death, in his thirtieth year, removed from the word one of the most promising of the younger American poets.

BENTON, Egbert, jurist, b. in New York city, 22 Jan., 1765; d. in Jamaica, Long Island, 24 Aug., 1833. He was graduated at King's college in 1785, and became distinguished for eloquence as a pleader, and for legal learning. He was a member of the revolutionary committee of safety, was appointed in 1777 the first attorney-general of the state, and was elected the same year to the state legislature. In 1783 he was one of the three commissioners appointed to direct the embarkation of loyalists for Nova Scotia in June of that year. In 1788 he took the lead in the legislature in advocating the acceptance of the federal constitution. He ceased to be attorney-general of New York in 1799. He was a member of the continental congress from 1784 till 1788, and was returned to the first and to the second congress, taking an active part in their deliberations. He was judge of the supreme court of New York from 1796 till 1802, and also sat for a time on the federal bench as a circuit judge. He was a member of congress again in 1813-5. From 1789 to 1802 he was a regent of the New York university. In 1808 he received the degree of LL. D. from Harvard, and in 1811 from Dartmouth. He was the first president of the New York historical society, and author of a "Vindication of the Captors of Major André" (New York, 1817), and of a monograph entitled "Memoir on Dutch Names of Places" (1835).

BENSON, Enzie, painter, b. in Hyde Park, N. Y., in 1857. He entered the national academy, New York, about 1856, and studied also with J. H. Wright. He has been in Paris, Venice, and Rome, devoting himself particularly to the Venetian masters. His professional life has been for the most part spent on the continent and in travels in the east, Egypt, Syria, etc. He established his studio in Florence in 1871, and removed to Rome in 1883. He was elected an associate of the Royal Architecture and Fine Arts of France, and the better known of his pictures are "Cloud Towers"; "Strayed Maskers" (1873); "Interior of St. Mark's"; "Reverential Anatomist" (1876); "Bazaar at Cairo"; "Flay-Boats"; "Peasants of Cadore at Religious Worship"; "Market-Place, Egypt" (1877); "Study of Girl in Blue"; "Hashish Smokers"; "Scene in the Desert of Tenere"; "In Exile"; "Renevier"; "Making the Best of It"; "Dead Calm on the Hill"; "Fire-Worshippers" (1879); "Mountain Torrent" (1881); "Distinguished Company in Titian's Garden"; "Distant Secret in Venice" (1882); "Spring"; "Art and Love"; "Afternoon on the Lagoon"; "Aradian" (1889). Mr. Benson has been a frequent contributor to periodicals, and has published two books entitled "Gaspara Stampa; the Story of Her Life," and "Art and Nature in Italy" (Boston, 1881).

BENSON, Henry Clark, clergyman, b. in Ohio in 1815. He became a Methodist minister in 1842, joining the Indiana conference, and in 1850 was elected professor of Greek in Indiana Asbury university. On the close of the war he was successively pastor of several churches, and was editor of the "Pacific Christian Advocate" at Portland, Oregon, from 1864 to 1868, in which year he became editor of the "California Advocate." For several years he labored among the Choctaw Indians as a missionary, and he has related his experiences in a book called "Life among the Choctaws." He has also published an essay on "The Lord's Day, or the Christian Sabbath, the First Day of the Week, not the Seventh."

BENSON, James Rea, Canadian capitalist, b. in 1807; d. in St. Catherine's, Ont., 18 March, 1885. He engaged in commercial pursuits for many years, was a director of the Imperial bank of Canada, and of the Dominion and National railway company, vice-president of the international suspension bridge company, and held various other offices of trust in the commercial world. In 1867 he was elected to the Canadian parliament by acclamation for the Niagara division, which constituency he represented until the year following, when he was sent to the senate.

BENTON, Jacob, congressman, b. in Waterford, Vt., 19 Aug., 1814; d. in Lancaster, N. H., 30 Sept., 1892. After teaching school for several years he studied law with Chief-Justice Bellows, and was admitted to the bar in 1843. He began practice at Lancaster, N. H., made a high reputation as a successful advocate, and early became an earnest
member of the whig party, and was elected to the legislature in 1854, 1855, and 1856. He was a delegate to the Chicago convention of 1860, and afterward commanded the state volunteers as brigadier-general. He was elected to congress from New Hampshire, serving two terms, from 4 March, 1867, till 3 March, 1869. While in congress, Mr. Benton favored all efforts to reduce the expenses of the government and to equalize taxation. Although a clear and convincing public speaker, Mr. Benton rarely addressed the house.

BENTON, JAMES Gilchrist, soldier, b. in Lebanon, N. H., 15 Sept., 1820; d. in Springfield, Mass., 23 Aug., 1881. His father, Calvin Benton, was a wool-merchant, and introducted the merino sheep into New England. The son was graduated at the U. S. military academy in 1842, brevetted 2d lieutenant of ordnance, served at Watervliet, N. Y., arsenal until 1848, was promoted to the full rank of second lieutenant, 3 March, 1847, and transferred to the ordnance bureau in Washington, where he assisted in preparing the "System of Artillery for the Land Service" and the "Ordinance Manual." He was made first lieutenant, 25 March, 1848, served at Harper's Ferry armory in 1849, and in the San Antonio ordnance depot, Texas, from 1849 till 1852, was assistant inspector of arsenals and armories, and commanded the Charleston, S. C., arsenal in 1853. From this time until 1859 he served on the ordnance duty in Washington, and was principally in making experiments that led to the adoption of the Springfield rifle musket in place of the old smooth-bore. He was also a member of the ordnance boards of 1854 and 1856, then promoted to a captaincy after fourteen years' continuous service, and appointed instructor of ordnance and gunnery at the new Rotonde Point, Washington, remaining until the beginning of the civil war. He also designed the first wrought-iron sea-coast gun-carriage made in this country, which was adopted by the government, and has been in use ever since.

In April, 1861, Capt. Benton went to Washington as principal assistant to Gen. James W. Ripley, chief of ordnance in preparing the "System of Artillery" and the "Ordinance Manual" in 1863; and in the same year became a member of the ordnance board, when he was put in command of Washington arsenal, where he remained until 1866. Soon after he assumed command, when an explosion took place in the old penitentiary, which had been transformed into a storehouse for ammunition, he entered the building, and, with the assistance of the citizens, succeeded in extinguishing the flames, and carried the whole in his arms to a place of safety. For these services he was brevetted lieutenant-colonel and colonel, 13 March, 1865. Among the improvements made by Col. Benton in the arsenal grounds was cleaning the canal, an important sanitary measure; but the stirring of the muddy deposits engendered malaria, from the effects of which he never recovered.

In June, 1866, he was ordered to the command of the national ordnary at Springfield, Mass., where he remained until his death. The various models of the Springfield rifle, known as the models of 1866, 1868, 1873, and 1879, were made under his direction. In 1873, with Cols. Ladlely and Crispin, he went under orders from the U. S. government to Europe to collect information in regard to the construction of heavy cannon and other ordnance manufactures. His report on this matter, as well as his paper on "Experiments made at the National Armory for the purpose of revising and improving the System of Small Arms," was published by the government for use in the army and distribution to the military. He never took out a patent for his inventions, holding that, as he had been educated by the government, it was entitled to benefit in every way by his time and talents. Among his inventions was the application of electricity to determine velocity. Discovering, after a series of carefully conducted experiments, that the electrical pressure and the change in the electro-ballistic machine for one second and the thread velocimeter for determining the velocity of projectiles; a system for loading and manoeuvring barbette guns under cover from the enemy's fire, by depressing the muzzle of the piece and using a joined ramrod; re-enforcing-cup for cartridge-case; and spring-dynamometer. He published a "Course of Lectures on Electricity and Gunnery" (New York, 1861; 3d ed., 1873).

BENTON, Joel, author, b. in Amenia, Dutchess co., N. Y., 29 May, 1832. He was educated at Amenia seminary, leaving the school in 1841, and has devoted himself for the most part to philosophical and literary pursuits. As an essayist and as a poet he has contributed largely to periodical literature. Ralph Waldo Emerson's death he made valuable contributions to the study of his works, and published "Emerson as a Poet" (New York, 1883).

BENTON, Nathaniel Soley, politician, b. in Cheshire county, N. H., 19 Feb., 1792; d. in Little Falls, N. Y., 29 June, 1860. He was educated at Phillipsburg academy, New York, and then entered the seminary at Cheshire, after which he studied law, and was admitted to the bar, and practiced in Little Falls. He was first elected to Congress in 1855, in carrying on the practice of his profession. In 1851 he became surrogate of Herkimer co., but resigned in 1858 to take a seat in the state senate. From 1831 till 1841 he was U. S. district attorney for the northern district of New York, an office from which he was removed by President Harrison. In 1842 he was re-elected to Congress, and in 1846 he was made judge of the court of appeals, and in 1847 he was made judge of the judge of Herkimer co., he being the first in the series of judges in that county. In 1845 he was elected to the state senate, in which office he continued until his death. He was the first in the series of judges in that county. He was the first in the series of judges in that county. He was the first in the series of judges in that county. He was the first in the series of judges in that county. He was the first in the series of judges in that county.
Thomas H. Benton
and Mr. Benton was made auditor of the canal department. He immediately secured the passage of certain legislative enactments increasing the duties as well as the power of the office, and effectuated radical changes and improvements. When the "American party" died, Mr. Benton allied his fortunes with the republicans, but retained his office of auditor until 1868.

**BENTON, Thomas Hart**

statesman, b. near Hillsborough, Orange co., N. C., 14 March, 1782; d. in Washington, 10 April, 1857. He was the son of an attorney and lawyer. Career was that of a lawyer, who was appointed to Sec'y G. Tryon, the last of the royal governors of North Carolina. His mother was Ann Gooch, of the Gooch family of Virginia. He was a cousin of the wife of Henry Clay, and was consequently often quoted during his public life as a relative of the great statesman himself. He lost his father before he was eight years of age, and was left with a large family of brothers and sisters, all of tender age, to the care of his mother. As Thomas was the eldest, his opportunities for study were few. He was for some time at a grammar-school, and afterward at the university of North Carolina, but did not complete a course of study there, as his mother required him to return home. At the age of 18 he manumitted six slaves that had been acquired by his father. The family settled twenty-five miles south of Nashville, where for several years the main work was the opening a farm in the wilderness. The place, a tract of 3,000 acres, was known as "The Widow Benton's Settlement," and was on the extreme verge of civilization. The land itself was in a glacial state, the southern tribes led through the estate. Settlement gradually came, and with them a better assured protection. The place was called Bentonontown, and the name is retained to this day. Thomas studied law with St. George Tucker, entered the U. S. army in 1810, and was admitted to the bar in Nashville in 1811 under the patronage of Andrew Jackson, at that time a judge of the supreme court, and one of his warmest friends. He was elected to the legislature, where he obtained the passage of a law for the reform of the judicial system of the state, and another by which the right of trial by jury was given to slaves. In the war of 1812 he was Jackson's aide-de-camp, and he also raised a regiment of volunteers in the War of 1812. Jackson, his brother Jesse and William (afterward Gen.) Carroll became involved, he and his long-time friend Gen. Jackson became bitterly estranged for many years. A duel had been arranged between Jesse Benton and Carroll, and Gen. Jackson was Carroll's second. Jesse sent an offensive account of the matter to Thomas, who was then serving under Gen. Jackson in his military capacity. On 4 Sept., 1813, Jackson advanced upon Col. Benton and struck him with a horse-whip; a mettance followed, and pistols and knives were freely used, and Jackson received a ball in his left shoulder, while Jesse Benton received several dirk wounds and thrusts from a sword-cane. The president appointed Col. Benton, in 1813, a lieutenant-colonel in the U. S. army, and he set out to serve in Canada, but peace having been declared, he returned and resigned his commission. In 1815 he took up his residence in St. Louis, and resumed the practice of law. He advocated the "Missouri Compromise," by which he became involved in several duels, and in one of them killed his opponent, a Mr. Lucas. He deeply regretted the event, and carefully destroyed all the private papers connected with the matter. His journal took a vigorous stand in favor of the admission of Missouri to the union, notwithstanding her slavery constitution, and at the end of the controversy he was rewarded for his efforts by being chosen, in 1829, one of the senators from the new state. For a year he devoted himself to a close study of the Spanish language, in order to accomplish his work more thoroughly. Possessed of a commanding intellect and liberal culture, an assiduous student, resolute, temperate, industrious, and endowed with a memory whose tenacity was marvelous, he soon placed himself among the leaders in the national councils. One of his earliest efforts was to secure a reform in the disposition of the government lands to settlers. A pioneer himself, he sympathized with the demands of the pioneer, and in 1824, 1826, and 1828 advocated new land laws. The general distress that prevailed throughout the country, and bore with especial hardship on the land-purchasers of the west, forced attention to this subject. Col. Benton demanded: 1, a pre-emptive right to all actual settlers; 2, a periodic reduction according to the time the land had been in the market, so as to make the prices correspond to the quality; 3, the donation of homesteads to impoverished and industrious persons, who would cultivate the soil. His was an act the left have always opposed, as it tended to bring in people to take the land for free. He presented a bill embracing these features, and renewed it every year until it took hold upon the public mind, and was at length substantially embodied in one of President Jackson's messages, which secured its final adoption. By his earnestness in advocating this bill and securing its final adoption, he gathered the last of the frontier and the pioneer and settler in the great west. His position in the Senate, and his firmness as a supporter of Jackson's administration, gave him great influence with the democratic party, and he impressed his views upon the president on every occasion.

Col. Benton also caused the adoption of a bill throwing the saltr and mineral lands of Missouri, which belonged to the United States, open for occupancy. There was at this time a certain tribe levied on the people of the Missouri valley, which proved in many cases a most unequal burden and was frequently oppressive. One part, which met with more hostility than any other, was known as the salt-tax, and it was the subject of this bill. The session of 1820 delivered such elaborate arguments against the tax, and followed them up with such success, that it was repealed. He was one of the earliest advocates of a railroad to the Pacific, and was prominent in directing attention to explorations in the far west, in encouraging overland transit to the Pacific, and in working for the occupancy of the northern coast of the Columbia. As early as 1819 he had written largely on these subjects, and on his entry into Congress renewed his efforts to engage the nation in these great enterprises. He first elaborated the project of overland connection, listened to the reports of trappers and voyageurs, and as science expanded, and knowledge of the great wilderness toward the mountains became more definite, his views took form in the proposals that culminated in the opening of the great central Pacific railway. He also favored the opening up and protection of the trade with New Mexico; encouraged the establishment of military stations on the Missouri, and throughout the interior of the country, to secure peaceable relations with the Indian tribes, and the fostering of the commerce of our inland seas. He turned his attention to the marking out of the great system of post-roads, and providing for their permanent maintenance.
In the first annual message of President Jackson strong ground was taken against the United States bank, then the depository of the national moneys, and subsequently, when he directed the withdrawal of the deposits and their removal to certain state banks, the result was disastrous to the business of the country. Benton took up the matter, addressed himself to a consideration of the whole question of finance, circulating medium, and exchange, and urged the adoption of a gold and silver currency as the true remedy for the evils of the time. His arguments and conclusions were perhaps some of the most elaborate speeches of his life, which attracted attention throughout the United States and Europe, and the name of "Old Bullion" was given to him. His style of oratory at this period was unimpassioned and very deliberate, but overflowing with facts, figures, logical deduction, and historical illustration. The orator later life was characterized by a peculiar exuberance of wit and readiness that increased with his years. The elaboration of his views on the national finances paved the way for subsequent legislation, and did much to bring about the present sub-treasury system of the United States. Benton's claim is to be given the credit of moving the famous "expanding resolutions." A formidable combination had been effected in the senate, headed by Calhoun, Clay, and Webster, and a resolution condemning the president's course had been adopted. Benton took it upon himself to have the resolution expunged from the records. From 1814 till 1851, under Presidents Tyler, Polk, and Taylor, he participated in the discussions that arose in regard to the Oregon boundary, the annexation of Texas, and other important subjects. The administration of Mr. Polk was nominally in favor of lat. 54° 40' N. as the boundary of Oregon, and his party had promised this in its platform, but was opposed with so much force by Mr. Benton, that Mr. Polk acquiesced in his views and accepted lat. 49° N. as the line. By this the United States relinquished a piece of territory that would now make its possessions continuous to Alaska and give it every harbor on the Pacific coast. During the Mexican war Col. Benton's services, and intimate acquaintance with the Spanish provinces of the south, proved most useful to him in the debates and at the sessions of a "masterly inactivity," at first determined upon by the president, was abandoned, and that of a vigorous prosecution of the war adopted in its stead. At one time it was proposed by President Polk to confer upon him the title of lieutenant-general with full command of the war, in order that he might carry out his conceptions in person. Questions in regard to slavery were brought on by the acquisition of Mexican territory. These were adjusted by the compromise acts of 1850, which were introduced by Mr. Clay, were opposed by Col. Benton, and defeated as a whole, but passed separately. In the nullification struggle, Benton backed Col. Polk under his own direction and their opposition to each other increased into a life-long animosity. The compromise of 1853 brought a hull in the storm; but the same views soon reappeared in connection with the far more complicated question of slavery. The Calhoun doctrine was introduced into the discussion of the abolition petitions in the house of representatives in 1850, and was definitely presented in the session of 1856-7. On 19 Feb., 1847, Mr. Calhoun, in answer to the "Wilmot proviso," which excluded slavery from all territory subsequently to be acquired, introduced resolutions that embodied his doctrine as to state rights. Col. Benton, although representing a slave state, would not deviate from the positions he had maintained on former occasions. He denounced Calhoun's resolution as a "fire-brand." Calhoun expressed his surprise at saying he expected Benton's support because he represented a slave state. Benton replied that he had no right to expect any such thing, and from this moment the two intellectual giants were matched in a ferocious warfare against each other's ideas and policies. The resolutions, however, came to a vote, but they were sent back to the legislature, and every slave state, were adopted by several of them, and were made the basis of after-conflict and party organization. It was Calhoun's determination to make them a basis of instruction to senators in congress, and in his hostility to Benton he confined them to certain democrats in the Missouri legislature whom he knew to be unfriendly to his re-election. By skilful management the resolutions were passed in both branches without Col. Benton's knowledge, and a copy was sent to Washington. He promptly denounced them as not expressing the sense of the people, and containing disunion doctrines designed to produce separation and disunity of the country. As an illustration of the tendency of the resolutions he cited a resolution from the legislature to the people. On the adjournment of congress he returned to Missouri and canvassed every section of the state in a series of speeches famed for their bitterness of denunciation, strength of exposition, and caustic wit. The result was the return of a legislature in 1849-50 with Benton men in the plurality, but composed of opposite wings and parties defeated by a coalition between his democratic opponents (known as "antites") and the whigs. At the close of his term he therefore retired from the senate, after six successive elections and thirty years' continuous service. In 1852 he announced himself a candidate for congress, made a direct appeal to the people in his congresional district, and was defeated over all opposition. He gave his warm support to the administration of Franklin Pierce; but when the Calhoun party obtained the ascendency he withdrew. The administration then turned on him, and displaced from office all his friends throughout Missouri. Soon afterward the Kansas-Nebraska bill was brought up, and he exerted himself with much of the vigor of youth in delivering a memorable speech, which did much to excite the country against the act, but failed to defeat its passage. At the next election he was not returned to congress. Retiring from active politics, he devoted two years to literary pursuits, when he became a candidate for governor in 1856, his old friends rallied to his political standard, and his course became a triumphal procession; but a third ticket was in the field, and by the dividing of forces his election was lost. In the presidential election of the same year Col. Benton supported Mr. Buchanan in opposition to his own son-in-law, Col. Frémont, giving as a reason that Mr. Buchanan, if elected, would change the present administration, which he feared that the success of Frémont would engender sectional parties fatal to the permanence of the union. Afterward, during the Buchanan administration, he modified many of his opinions, and in several instances took a decided stand in opposition. The first volume of his "Thirty Years' View" of the workings of government (New York, 1854) presented a connected narrative of the time from Adams to Pierce, and dealt particularly with the secret political history of that period. The second and last volume appeared in 1856. He
then undertook the task of abridging the debates of congress from the foundation of the government. Although at the advanced age of seventy-six, he labored at this task daily, and brought the work down to the conclusion of the great compromise debate of 1850, in which, with Clay, Calhoun, and Seward, he had himself borne a conspicuous part. The last pages were dictated in whispers after he had lost the power of speaking aloud. The work was published under the title of "An Abridgment of the Debates of Congress" (15 vols., New York). Having completed the work, Mr. Benton sent for several old friends to bid them farewell. Among them was the president, whom he thanked for taking an interest in his child, and to whom he said: "Buchanan, we are friends. I supported you in preference to Frémont, because he headed a sectional party, whose success would have been a calamity to the republic for a long time, and I knew you would honestly endeavor to do right." A week before his death he wrote to friends in congress requesting that neither house should take notice of his death; but congress, nevertheless, adjourned for his funeral.

After becoming senator Col. Benton married Elizabeth, daughter of Col. James McDowell, of Virginia. In 1844 she suffered a stroke of paralysis, and from that time he was never known to go to any place of festivity or amusement. She died in 1854, leaving four daughters, the second of whom married Gen. John C. Frémont. Notwithstanding the temptations to which his public life subjected him, he abstained wholly from the use of alcohol, and, saying that his mother had wished it, he should adhere to her wishes through life. Besides his works already mentioned, he published "An Examination of the Dred-Scott Case." A fine bronze statue of him has been erected in the park in St. Louis. The steel portrait represents him in early life; that in the text, as he appeared in later years.

BENTON, William Plummer, soldier, b. near Newmarket, Frederick co., Md., 25 Dec., 1828; d. in New Orleans, 14 March, 1867. His father died when he was four months old, and his mother removed to Indiana in 1836. At the beginning of the Mexican war, being then eighteen years of age, he enlisted as private in a regiment of mounted riflemen, and took part in the battles of Contreras, Churubusco, Chapultepec, and the capture of the city of Mexico. On his return to Richmond, Ind., he re-entered college, finished his studies as a lawyer, was admitted to the bar in 1851, in 1852 appointed prosecuting-attorney, and in 1856 made judge of the county court. In 1857 Sumter was fired upon, Judge Benton was the first man in Wayne co. to respond to the president's call for 75,000 men. Twenty-four hours after he had begun to raise his company he was on his way to Indianapolis, where it was mustered into service, being the first offered by Indiana. He was soon promoted colonel of the 8th Indiana volunteers, and commanded at Rich Mountain, where he distinguished himself by personal bravery. After three months he was authorized to re-enlist and organize the regiment, and did so, returning to Gen. Frémont, 14 Sept., 1861. The regiment was placed in the vanguard of Frémont's army, and served in the campaign in Missouri and Arkansas. He commanded a brigade at Pea Ridge, and was promoted to brigadier-general for gallantry. He was in the battles of Port Gibson, Jackson, Champion Hills, Bayou Hari Ridge, the siege of Vicksburg, and Mobile. At Jackson, Miss., he was wounded. At the close of the war Gen. Benton resigned his commission and returned to Richmond, Ind., to resume the practice of law. In 1866 he went to New Orleans under government appointment, where he died.

BENZON, Giovanni, traveller, b. in Italy about 1520. He spent many years in America, and in 1565 published an account of his travels and adventures, from 1541 until 1556, entitled "History of the New World," translated by W. H. Smith, and republished by the Hakluyt society (1857).

BERARD, Claudius, educator, b. in Bordeaux, France, 21 May, 1783; d. at Point, N. Y., 6 May, 1848. He was educated in his birthplace, and became an eminent Greek and Latin scholar. He was conscripted into the army of Napoleon, but had no taste for a military life, and his father purchased a substitute. From earliest youth his mind was given to books, and the martial ardor that animated the young Frenchmen in the days of Napoleon failed to affect him. Learning that his substitute had been killed in the Spanish campaign of 1805, he determined to remove to the United States. He arrived in New York in the spring of 1807, and soon afterward became professor of ancient languages in Dickinson college, at Carlisle, Pa., where he remained until his appointment, in 1835, as professor of French in the U. S. military academy at West Point. He held this chair until his death, a period of over thirty-three years. He was conversant with the language and literature of most of the countries of Europe, and possessed, at one time, a copy of the Bible in nearly every language into which it had been translated. He was one of the first to use a prayer book in use at the military academy (1824), and "A Grammar of the French Language" (1826).—His daughter, Augusta Blanche, b. in West Point, N. Y., 29 Oct., 1824, has devoted her life mostly to teaching and study, principally at West Point, where, for many years, she has been in charge of the post-office. Her brother has published a "School History of the United States" (1854); a "School History of England" (1861); a "Manual of Spanish Art and Literature" (1868); and has edited and revised "Goodrich's Child's History of the United States" (1878).

BERG, Joseph Frederick, clergyman, b. at Pineville, in the island of Antigua, in 1812; d. in New Brunswick, N. J., 20 July, 1871. His father was a Moravian missionary, and his early education was obtained in the Moravian schools in England. In 1825 he came to the United States and continued his studies in the Moravian school at Nazareth, Pa., where he remained a few years as professor of mathematics. Berg was ordained by the synod of the German Reformed church in 1837 licensed to preach, and became pastor of the Race street German Reformed church in Philadelphia, which relation he continued until 1852, when he became pastor of the second Reformed Dutch
BERGEN, Henry, founder of the American society for the prevention of cruelty to animals, b. in New York city, 8 May, 1820; d. there, 12 March, 1888. His father, Christian, was ship-builder for several years in the service of the government, and died in 1843, leaving his fortune to his three children. Henry entered Columbia, but, before he had finished the course, made a visit to Europe, where he remained about five years. In 1862 he was appointed secretary of legation at St. Petersburg, and acting vice-consul. Being obliged by reason of ill-health to resign his office in 1864, he travelled extensively in Europe and the east. On his return he determined to devote the remainder of his life to the interests of dumb animals. Alone, in the face of indifference, opposition, and ridicule, he began a reform that is now recognized as one of the beneficent movements of the age. Through his exertions as a speaker and lecturer, but above all as a bold worker in the street, in the court-room, and before the legislature, the cause he had espoused gained friends and rapidly increased in influence. Cruelties witnessed in Europe first suggested his mission. The legislature passed the laws prepared by him, and on 10 April, 1866, the society was legally organized, with him as president. The association moved steadily forward, and by August was in a flourishing condition financially, having received a valuable property from Mr. and Mrs. Bergh. The work of the society covers all cases of cruelty to all sorts of animals. It employs every moral influence, social, personal, and legislative; it touches points of vital concern to health as well as to humanity; it looks after the transportation of cattle intended for market; it examines into the purity of milk; and fixes the times and manner of slaughtering animals for food. The society has a large and influential membership, and it has made many friends and received many gifts. In the city of New York its officers are constituted special policemen, with authority to arrest any person found practising cruelty of any kind to animals. In 1871 a Parisian, Louis Bonard, who lived with extreme simplicity in New York, died and left $150,000 to the society, which permitted a removal to quarters larger and better adapted to the work. The building at the corner of Fourth avenue and 22d street, New York city, was purchased and altered so as to be suitable for the purposes of the society. By the courtesy of the district attorney of New York Mr. Bergh was authorized by the attorney general to represent him in all cases appertaining to the laws for the protection of animals. During 1873 he made a lecturing tour in the west, which resulted in the formation of several societies similar to that in New York. He spoke before the Evangelical Alliance and Episcopal convention, and was the means of having a new canon.
BERGIN, Darby, Canadian physician, b. in Tallahassee, Florida, 1848; m. in Philadelphia, 1879. He was graduated in medicine at McGill college in 1874. He entered the voluntary military service as captain of a company raised by him during the "Trent" difficulty in 1861; became a major in 1866, and promoted in 1869 to be lieutenant-colonel of the 59th Stormont and Glengarry battalion. He was appointed during the civil war in 1863 as the civil governor of the Riel rebellion of 1885. He entered parliament as a conservative in 1872, and was returned for the same constituency (Cornwall) in 1878. In 1881 he was elected president of the medical council of Ontario, and in 1885 president of the college of physicians and surgeons of Ontario.

BERG, Joseph, musician, b. in Elbersbach, Germany, in 1821; d. in New York, 10 Aug., 1876. The rebellion of 1848 obliged him to flee his native land, and he came to New York. In 1850-2 he was the conductor of the Germania society. He organized and conducted the great German music festival, held in the Winter Garden theatre, in 1856, and in 1856 introduced German opera in the Nihlo's garden. He afterward became the conductor of German and Italian opera in New York, and was for a time the leader of the Arion (singing) society. Prof. Bergmann excelled as a player of the violincello and the piano, and composed orchestral pieces. He was conductor of the concerts of the philanthropic society in New York for several years.

BERGOSA Y JORDAN, Antonio (ber-go-sa), Spanish prelate, b. in Jaca, Spain, late in the 18th century. He was reporting counsellor to the supreme inquisition, inquisitor of the court of New Spain, bishop of Oaxaca, and then archbishop of Guatemala and Mexico. During the invasion of Spain by the French at the captivity of Pope Ferdinand VII, in 1808, Archbishop Bergoesa was for some time also governor ad interim of the territories that were under his religious jurisdiction.

BERING, Vitus, navigator, b. in Horsens, Denmark, in 1680: d. on Behring island, 8 Dec., 1741. He entered the Russian navy in 1704, was made a captain by Peter the Great, and distinguished himself in the war with Sweden. He commanded an expedition to the northern seas in 1733, and in 1728 Peter the Great was so much taken with the discovery of a passage for removing disabled animals from the street, and a derrick to rescue them from excavations into which they may fall. He is also the originator of an ingenious invention, which substitutes artificial for live pigeons as marks for the sportsman's gun. Mr. Bergh receives no salary, but gives his time and energy freely to the work. At the beginning of this reform, no state or territory of the United States contained any statute relating to the protection of animals from cruelty. At present (1886) thirty-nine states of the Union have adopted substantially the original laws procured by him from the legislature of New York, to which may be added Brazil and the Argentine Republic. The society opened in the twenty-first year of its existence, is out of debt and self-sustaining. By reason of its fidelity, discretion, and humanity, it is everywhere recognized as a power in the land for good. In 1874 he rescued a little girl from inhume treatment, and this led to the founding of a society for the Prevention of Cruelty to Animals. Mr. Berg began a series of plays, one of which was acted in Philadelphia. He has also published a volume of tales and sketches entitled "The Streets of New York"; a drama, entitled "Love's Alternative"; "The Portentous Telegram"; "The Ocean Paragon," and "Married Off," a poem (London, 1839).

BERISTAIN, Joaquin (ber-is-tain), Mexican musician, called the Mexican Bellini, b. in the city of Mexico, 15 Aug., 1747; d. in Mexico, 8 Sept., 1839. He left a vast body of musical compositions, especially an overture called "La Primavera" and a mass, which are still played. His melodies are delicate and full of pathos. "Versos de Orquesta en octavo tono obligados a pistón" is the name given by Beristain to another of his sacred pieces.

BERISTAIN, Mariano (ber-is-tain), Mexican bibliographer, b. in Puebla, 23 March, 1836; d. in the city of Mexico, 23 March, 1817. He studied in his native city, went to Spain to finish his education, and was graduated there in theology. Charles III, appointed him professor of theology in the university of Valladolid, and afterward Beristain went to Mexico to fill several high offices in the Cathedral and to twice govern ad interim. He was strongly opposed to the Mexican revolution. He left a work entitled "Biblioteca Hispano-Americana septentri- nal," a collection of biographical and bibliographical articles, the first book of the kind published in Mexico or Central America.

BERK, Thomas, clergyman, b. in Kilarin, near Thomastown, Kilkenny, Ireland, 12 March, 1684; d. in Oxford, England, 14 Jan., 1753. He was educated at Trinity college, Dublin, and in 1707 became a fellow in that institution and a clergyman of the established church. He made two prolonged tours on the continent, and in 1724 to 1725 "a proposal for the better supplying of churches in our foreign plantations, and for converting the savage Americans to Christianity, by a college to be erected in the Summer islands, otherwise called the isles of Bermudas." The concluding sentence of the proposal is this: "A benefaction of this kind seems to enlarge the being of a man, extending it to distant places and future times; inasmuch as unseen countries and afterages may feel the effects of his bounty, while he himself reaps the reward in the blessed society of all those who, having turned many to righteousness, shine as the stars for ever and ever." The project inspired the well-known verses, "On the Prospect of Planting Arts and Learning in America"—four lines of which are familiar to all who know the history of education in the new world:

Westward the course of empire takes its way;
The first four acts already past,
A fifth shall close the drama with the day;
Time's noblest offspring is the last."
These lines were quoted by Gulián C. Verplanck, of New York, in an address delivered in 1818, with the remark that he did not remember having "seen or heard the verses referred to in this country." In spite of opposition from Sir Robert Walpole, then chief minister, Berkeley persuaded the English government to promise a grant of £20,000, for the foundation of the proposed college of St. Paul's in the Bermudas, and full of enthusiasm and courage he sailed from Gravesend, May 6, 1728, and landed in the Bermudas to assume its presidency. He arrived at Newport, R. I., Jan. 23, 1729, "with a view at settling a correspondence there for supplying his college with provisions," and awaiting also the promised financial support. He bought a farm, which he named Whitchell, erected upon it a small house engaged in correspondence and study, composed one of his most famous in treatises, "Mephoron, or the Minute Philosopher," preached occasionally, and longed in vain for the expected endowment. It is said that he became convinced that the Bermudas was not the best site, and that he would have gladly sacrificed for it some place upon the mainland. It appears that he learned later the Bermudas were not what they were represented to be, and leading men came to see him in his philosopher's retreat, and gave him just ideas of the state of religion and education. Foremost among this number was Samuel Johnson, then a minister of the Episcopal church at Stratford, Conn., formerly a tutor at Yale, and afterward president of King's college (now Columbia College). He was then a Congregationalist minister in Connecticut, and a trustee of Yale, was another of Berkeley's American friends. To them, but especially to Dr. Johnson, the credit seems due of interesting Berkeley in Yale. Wearyed by the long delays of the government, and at length assured that Walpole had no intention of giving him the promised support, Berkeley gave up his residence in Newport and sailed for England, embarking at Boston in September, 1731, just three years after his departure from England. In the summer after his return to his native land, Berkeley executed an instrument by which he conveyed to Yale the Whitchell farm; and after some slight changes in the conditions laid down by the Deed of Gift, it was conveyed to Yale Nov. 3, 1732, and was dedicated Dec. 17, 1733. This indenture provided that the income from the property should be applied to the maintenance of three students of the said college, during the time between their first and second degree, such students to be known as "scholars of the house," to be elected by the head of the college jointly with the senior Episcopal missionary of Connecticut, after an examination in Latin and Greek. Other details were prescribed, and the instrument is a very interesting paper, as introducing to this country the usage of graduate scholarships and of competitive examinations for special honors. Any surplus of money, arising from vacancies in the scholarships, was to be applied to the encouragement of undergraduates who should exhibit their skill in Latin composition. The Berkelian scholarships and prizes thus established have been regularly awarded since 1758, and the list of those who have received these honors includes the names of some of the most distinguished graduates of Yale. The Whitchell farm was rented by the college in 1762 for a period of 999 years. In addition to this gift, Berkeley sent to Yale a collection of books, given by himself and several gentlemen who had been subscribers to his projected college. This was doubtless the best collection of books that had then been brought to this country. Its value was estimated at £500. It included copies of the chief classical writings, folios and editions of the apocryphal fathers, great works like Baronius, the Acta Eruditorum, the Eliza- vire republics, important apparatus for the study of the Bible, books of mathematical, physical, and medical science, modern English literature, Shakespeare, Milton, Addison, Ben Jonson, Pope, Gay, etc. Most of the volumes may still be identified. The library still contains a number of very valuable books to Harvard, and wrote a letter of advice in respect to the establishment of a college in New York. Three years after his return to the old world he became bishop of Cloyne, and many years later he declined to be translated to the see of Clogher. His health having been impaired, he removed in 1792 to the university of Oxford, where he died. His body is buried in Christ church. His philosophical writings are still widely read. The name of Berkeley is honored not only in New Haven, where a memorial window in the Battell chapel has lately been placed, and where his prizes are annually bestowed, but also in other seminaries far and wide through the land. A large body of scholars from Yale and the neighboring colleges, by Bishop Williams, bears the name of Berkeley. Another interesting tribute to his memory has been given by the promoters of liberal education in California. The site of the state university, opposite the Golden Gate, is named Berkeley. Upon one of its walls hangs a full-length portrait of Harvard's chief minister. The institution Berkeley's influence at Newport in the formation of the Redwood library should not be forgotten, nor his gift of an organ to Trinity church. In 1886 a memorial chapel was dedicated at Newport, R. I., Bishop Clark officiating. The funds for its erection were raised by private subscription, largely among the summer residents of the island. It was erected with memorial windows, and is a fitting tribute to the memory of the distinguished man whose name it bears, and whose influence was so closely identified with the early history of the town. Valuable original papers by Dean Berkeley are in the possession of Yale college. See Beardsley's "Eclesiastical History of Connecticut," (New York, 1865); and his "Life of Samuel Johnson" (1874); papers by D. C. Gilman in "Hours at Home" (1865), and in the "Proceedings of the New Haven Colony Historical Society" (1865); letters of Berkeley in the "Churchman's Magazine" (vol. vii.); Prof. Fraser's "Life and Works of Berkeley" (4 vols., Oxford, England, 1871); and Noah Porter's dissertation on "Bishop Berkeley, his works for America" (New York, 1855).

BERKELEY, John, iron-founder. He was a member of the family whose seat is Beverstone Castle, Gloucester, England, and became manager of the first iron-works established in America. These works were undertaken by the London company, which in 1619 sent over 150 skilled artisans from Warwickshire, Staffordshire, and Sussex. The establishment was on the west bank of Falling creek, a branch of James river, Va., about thirty-two miles from the sea. Three of the master-workmen died, and in 1621 Berkeley with his son Maurice and a re-enforcement of twenty men came over to
BERKELEY, Sir William, colonial governor of Virginia, b. in Bedfords, July, 1628, d. in Twickenham, 13 July, 1677. He was a son of Sir Maurice Berkeley, and brother of Lord John Berkeley, of Stratton, colonial proprietary. He was graduated at Oxford in 1623, and devoted himself to extensive travel in Europe. In 1630 he returned, an accomplished cavalier and courtier; was made one of his commissioners of Canada in 1632, and, returning to England with a high reputation for knowledge and experience, became a gentleman of the privy chamber to Charles I. On 9 Aug., 1641, he was commissioned governor of Virginia. In 1642 he arrived, and, by various salutary measures, aided by his prepossessing manners, retained his power as safely as he had obtained it. During the Cromwellian disturbances in England, Governor Berkeley took the royal side, and, when the parliamentarians gained the ascendency, he offered an asylum in Virginia to gentlemen who had been loyal to the king. The new parliament immediately sent a fleet to the colony to punish him; but, unable to offer resistance, he displayed such shrewdness as well as courage. Thus the fleet appeared in James river, in 1651, he succeeded in making terms so satisfactory to both parties that, although he was forced to resign his authority, he received permission to remain on his own plantation. Through his management Virginia was among the last of the colonial possessions to acknowledge as well as comply with the order of the king's death of Samuel Mathews, governor of Virginia, Berkeley was elected to the office, and received his commission from Charles II. soon after the restoration. His conduct in reference to the so-called rebellion of Nathaniel Bacon, in refusing a commission and hampering Bacon by every means in his power, as well as by violence and欺骗, and after having dealt with the Indian question, which had become of vital moment to the settlers; and his extreme severity to the followers of Bacon after Bacon's death, which in itself was not without suspicion, caused him to lose popularity. This intensified his bitterness, and he caused Bacon's adherents to be arrested, tried, and executed in such a hurried and indecent manner that the assembly arose in remonstrance. The king himself is reported to have exclaimed, "The old fool has taken more lives in his naked country than I have taken for my father's murder," and in 1665 demanded his return. Nevertheless, Berkeley continued to administer the affairs of Virginia for the next ten years, and the greater part of his life. Finally, after his death in 1677, the papers show that he put much pressure on Quakers. A board of commissioners was sent out by royal mandate to examine into the condition of the colony, and in one of his replies he is quoted as saying, "Thank God! there are no free schools nor printing presses, and I hope there will be none for a hundred years; for learning has brought disobedience, and heresy, and sects into the world, and printing has divulged these and other libels." Through the influence of the planters he was obliged to obey the recall, and in 1676 he returned to England, but died before he had an interview with the king. He published "The Lost Lady; a Tragi-Comedy" (London, 1678), which is included in the first and fourth editions of Dodsley's "Old Plays," and "A Description of the Colony of Virginia," (1680). 

BERLINER, Emile, inventor, b. in Hanover, Germany, 20 May, 1851. He was graduated at Samson college, Wolfenbitiil, in 1865. He came to this country in 1870 and settled in Washington, D. C., in 1882. From 1879 to 1882 he was chief instrument inspector of the Bell telephone company in New York. He invented early in 1877 the loose contact principle of the modern telephone transmitter, independently made known by Hughes in England in the autumn of that year. He also introduced the use of induction-coils in telephone transmitters and is the patentee of other inventions.

BERMUDEZ, Jose Manuel (ber-moo-deth), Peruvian scholar, b. in Tarma about 1760; d. in Lima in 1830. He was vicar of Huarcoceco for fourteen years, then went to Lima, filling several important offices; was appointed canon in 1812, deputy for Tarma, and judge of the provincial delegation from 1814 till 1829, and chancellor of the university in 1819. When Vicerey La Serna organized the board of pacification during the revolution, he offered his resignation as a deputy, thoroughly acquainted with all the questions then at issue and with the history of his country, was made a member. He made a special study of the Quechua language, and wrote a grammar, an orthographical treatise, and a correct and rich dictionary of that language. These works were published in 1823.

BERMUDEZ, Juan (ber-moo-deth), Spanish navigator of the 16th century. His fame is chiefly due to his discovery of the Bermuda islands (1522), which are named in his honor.

BERNAL, Calixto (berr-nahl), Cuban jurist, b. in Puerto Principe, Cuba, in 1804. He was admitted to the bar in 1821. In 1827, he went to Madrid, Spain, where he spent the remainder of his life. There he published his "Impresiones y Recuerdos" (1844); "Pensamientos sobre Reformas Sociales" (1847), published also in French under the title of "De la democratie au xix. siecle;" "Teoria de la Autoridad" (1846); and "El Derecho" (1827).

BERNARD, Sir Francis, governor of Massachusetts Bay, b. in Nettleton, Lincoln co., England, in 1714; d. in Aylesbury, England, 16 June, 1729. He was graduated at Oxford in 1756, studied law, and admitted to the bar at the Middle Temple, of which he afterward became a bencher. He was elected steward of the city of Lincoln and recorder of the city of Boston in England. In 1768 he was appointed governor of the province of New Jersey, whence after two years of successful rule he was transferred to the colony of Massachusetts Bay, arriving on 3 Aug., 1760. The earlier part of his administration of nine years was successful, as was shown by the salary of £1,500 voted to him, the erection of the town of Dedham, and the settlement of the coast of Maine, both of which were confirmed by the king. In 1764 the library of Harvard was destroyed by fire, and about 6,000 volumes were lost. Gov. Bernard took a special interest in the college, and successfully exerted himself in raising funds in its behalf. When two parties arose—the advocates for the crown, and the defenders of the rights of the people—Bernard determined to strengthen the royal authority in the colonies, and he probably did more than any other man toward precipitating the war of the revolution. He manifested an unhappy facility for wounding the amour propre of the colonists. One of his first acts that aroused indignation was the appointment of Mr.
Hutchinson as chief justice, instead of Col. Otis, of Barnstable, to whom the office had been pledged. This breach of faith drew on him the hostility of James Otis, the son of Col. Otis, who soon became a popular leader. Gov. Bernard also gave special offence by refusing to confirm the nomination of several members of the council. He seemed to have no talent for conciliation, and, in failing in his preliminary measures of attempted coercion to his views, he made such representations to the government of the extreme measures he considered necessary. He is said to have even occasionally excited the entire population of Massachusetts Bay, and gave an enormous impetus to the growing disaffection. The assembly requested the removal of the king's ships and troops, but Bernard refused, and business was brought to a standstill. His conduct drew on him the indignation of the province, but procured him, in a letter to the chancellor of England, as a reward for his "firmness and administrative ability." He had little command of his temper, could not conceal his resentments, nor restrain his censures. One of his last public measures was to prorogue the general court in July, in consequence of their refusal to make provision for the support of the state. But the distress in consequence of the excise went into effect the general court had drafted resolutions and petitioned the king for its removal. The English government deemed it wise to recall him, although claiming that it was only on the plea of consulting him in reference to the general condition of the province. He continued nominally governor for two years longer, but never returned to America. Bernard "held the Ministry" (1769): "Letters to the Earl of Hillsborough" (1769); and "Select Letters on the Trade and Government of America, and the Principles of Law and Polity applied to the American Colonies" (2d ed., 1774). He also edited "Antonii Ascoli Jellis Christi olim Alumni Odarum libri dux 5, 1579." The best known of his writings are "A Letter to the Lady Middy in England," written in 1748, and by his will bequeathed to the library of Harvard.—His son, Sir John bart., was b. in England in 1714; d. in the West Indies in 1809. At the close of the war of independence, his sympathies having been with the colonists in their struggle with the mother country, he did not return to England. After suffering the extremities of poverty, he was allowed to return to Massachusetts, in consideration of his conduct during the war, restored to him half of the island of Mount Desert, part of his father's property, which had been confiscated. Little is known of his subsequent career in the United States. Afterward he held offices under the British government at Barbadoes and St. Vincent. At the death of his father, in 1759, he succeeded to the title.—Sir Thomas bart., third son of Sir Francis Bernard, was b. in England about 1746; d. there in 1818. When his father was appointed governor of New Jersey, he accompanied the family to America, and was graduated at Harvard in 1767. Subsequently he lived in England, and in 1774 he returned to the United States. On the death of his brother, Sir John, he succeeded to the title. He was the author of several essays, written to improve the condition of the humber classes, and was noted for his benevolence.

BERNARD, John, actor, b. in Portsmouth, England, in 1756; d. in London, 29 Nov., 1828. He was educated at Chichester. His father, a lieutenant in the navy, tried to check his son's aspirations for the stage by placing him in a solicitor's office; but at the age of seventeen he ran away from home, joined a travelling company, and made his first professional appearance as Jaffier at Chew Magna, Somerset co., in a theatre improvised in a mill-house. He was married in the following year, and, after various experiences common to strolling actors, in 1787 he made his first appearance in London at Covent Garden, playing Archer in "The Beau's Stratagem" to the Mrs. Sullen of his wife. One reason of his success was his extreme convexity. He lost his wife in 1792, and in 1797 came to the United States. He made his American debut 4 June, 1797, as Goldfinch in "The Road to Ruin" at the Greenwich street theatre, New York. The following winter he was engaged in Boston and New York. In 1806 he was associated with Powers in the management of the Federal street theatre, Boston, and went to England for a company. He remained in the United States as actor and manager of various theatres for about twenty years, and took final leave of the stage in 1829 at Boston in his favorite character of Lord Angleby, when he returned to England, and died in poverty. A selection from his voluminous "Retrospections of the Stage" appeared two years after his death (2 vols., 1830), and a further selection, edited by his son, appeared in 1850.—His son, William Bayle, dramatist, was b. in Boston, 27 Nov., 1807; d. in London, England, 5 Aug., 1875. At the age of thirteen he left his home with his mother, and studied at Uxbridge. In 1826 he was appointed to a clerkship in the army accounts office, which he retained until 1850, when the office was abolished. In 1827 he produced a nautical drama, "The Pilot," for which he received £3, and, as an incentive "to prompt him to further exertions," he was presented with £5 and a commission of ensign. The play ran only one night. At the age of twenty-one he wrote "The Freebooter's Bride" (5 vols., 1828). The following year he compiled "Retrospections of the Stage," from memoranda found among his father's papers. At the age of twenty-three he entered fully on the career of a professional dramatist, and produced play after play, and faced with an unexampled rapidity. The total number of them is 114, not half of which have been printed. The best known are "Rip Van Winkle," "The Nervous Man, and the Man of Nerve," "The Man About Town," "Marie Ducange," "His Last Legs," "Dumb Belle," "The Boarding-School," "The Middy Ashore," "The Round of Wrong," "A Life's Travail," "A Merry Gentleman," his last play was "The Dove of Venice." He also published a life of Samuel Lover (London, 1874).

BERNARD, Simon, baron, French soldier, b. in Dôle, France, 28 April, 1779; d. in Paris, 5 Nov., 1839. He was educated by charity in his native town, and was appointed to the poltehnique school of Paris, whither he went and would have died of cold in the streets but for the kindness of an humble woman who sheltered him and took him to his destination. His instructors were Laplace, Huity, Berthollet, Foureroy, and Monge, and he obtained the second position in the class of engineering. He was appointed in the corps de ingénieurs et bâti of the artillery of the Fourth of the French empire, and led the assault upon Ivry in 1800. In 1805 he was sent on a secret service to Germany, and on his return was promoted chief of battalion. When a lieutenant-colonel he was engaged in fortifying Antwerp in 1810–12, and was promoted colonel of engineers and aide-de-camp to Napoleon. 21 Jan., 1815. His leg was shattered in the retreat of the grand army from the field of Leipzig in 1813. The same year he threw himself into Torgan with 8,000 men, superintending the defence of that place for three months during a terrible siege. Napoleon conferred on him the title of brigadier-general of
engineers, in which capacity he attained distinction. He gave in his adherence to Louis XVIII, and he was placed at the head of the topographical bureau. He again fought on the side of Napoleon at Waterloo, and once more entered the service of Louis XVIII; but, having been ordered to leave Paris for Dôle, he obtained permission from the king to go to the United States. Under a resolution of congress, which resolution was approved 29 April, 1816, President Madison issued a commission, dated 16 Nov., 1816, appointing Bernard an “assistant in the corps of engineers of the United States, of rank of brigadier-general by brevet.” Some bitter feeling was naturally engendered in military engineering circles by this invitation of a foreigner, and one of the results was the resignation of Gen. Joseph G. Swift, chief engineer, and of another distinguished officer, Col. William McRee. In 1824 Gen. Bernard arrived with Lafayette and Totten, and the two constituted a permanent board upon whom devolved the labor of working out the fundamental principles of the system, and of elaborating the project of defence for the great section of our coasts which was in association with them whenever required, and resident engineer officers had a voice in relation to their own particular works. The principal work planned and executed by him was the building of Fort Monroe at the mouth of James river. He also had a prominent part in the inauguration of some of the improvements in the works of the day, notably the Chessapeake and Ohio canal, and the Delaware breakwater. On the breaking out of the revolution of 1830, he returned to France, and was appointed aide-de-camp to the king and lieutenant-general of engineers, 15 Oct., 1831. He was strongly in favor of the system of detached forts that was afterward carried out. In 1834 he was created baron and a peer of France, being appointed minister of war, and ad interim of foreign affairs, and he was minister of war from 1836 till 1839.

BERNARDINO, Fray. See CIFUENTES.

BERNAYS, Augustus Charles, physician, b. in Highland, Ill., 15 Oct., 1854. He was graduated at McKendree college in 1872, after which he studied at Union medical college in 1872-73. In 1876 received the degree of M. D. Subsequently he spent some time at the hospitals in Berlin, Vienna, and London, and in November, 1877, was elected a member of the Royal College of Surgeons. Soon after his return to the United States he settled in St. Louis, and in 1885 became professor of anatomy in the St. Louis College of Physicians and Surgeons. Dr. Bernays is the author of two embryological monographs—one on the development of the valves of the heart, and one on the development of the knee-joint and joints in general; and also of a series of surgical papers, which appeared between the years 1880 and 1886 under the title of “A Chinaman’s Surgeon’s Workshop.”

BERRIAN, William, clergyman, b. in New York city in 1787; d. there, 7 Nov., 1862. He was graduated at Columbia in 1808, ordained in the Episcopal church in 1810, and became assistant minister of Trinity parish in 1811; was elected rector of Trinity church in 1829, and trustee in 1836, both of which offices he held till his death. His connection with this parish embraced a period of fifty-one years, broken only by a brief settlement in Belleville, N. J., and two journeys abroad. He published “Travels in France and Italy” (New York, 1820); “Devotions for the Sick Room”; “Enter Thy Closet”; “Family and Private Prayers”; “Historical Sketch of Trinity Church” (New York, 1847); “Recollections of Departed Friends” (1850); “On Communion”; and “The Sailor’s Manual.” He also edited the works of Bishop J. H. Hobart, with a memoir (3 vols., New York, 1853).

BERRIEN, John Macpherson, statesman, b. in New Jersey, 23 Aug., 1781; d. in Savannah, Ga., 1 Jun., 1866. He was a son of Maj. John Berrien, who served in the war of independence, and was graduated at Princeton in 1796, was admitted to the bar of Georgia at the age of eighteen, and attained a high reputation as a lawyer. He was solicitor of the eastern district of Georgia in 1809, and judge of the same district from 1810 till 1821; served in the Georgia senate in 1822-23, and was U. S. senator in 1823-9, and again in 1890-92. He was attorney-general of the United States from 1830 till 1831, when he resigned on account of the inhonorable condition of President Jackson’s cabinet. In 1844 he was a delegate from Georgia in the convention at Baltimore that nominated Henry Clay for the presidency. He was one of the board of regents of the Smithsonian institute. In January, 1829, he submitted a “protest” against certain measures before congress, backed by a speech so clear and impressive that the title of “American Cicero” was given him.

BERRIEN, John M., naval officer, b. in Georgia in 1802; d. in Philadelphia, 20 Nov., 1883. On receiving his appointment as midshipman he joined the frigate “Constellation,” of the West India squadron, and then to the sloop “Vincennes.” He was promoted to passed midshipman in 1831, and joined the West India squadron, commissioned lieutenant in 1837, and served on various vessels in the Pacific and Brazil stations. In September, 1844, he was ordered to the frigate “Pomona,” and in 1847 commanded the schooner “Bonito” at the capture of the city of Tobasco, Mexico. Lient Berrien received his commission as commander, 13 March, 1856, and during 1856-9 was attached to the navy-yard at Portsmouth, N. H. In February, 1860, he was ordered to Hong-Kong. In May, 1861, he took command of the sloop “John Adams,” was commissioned captain in 1862, and sent to Pittsburg, Pa., as assistant inspector of ordnance at the Fort Pitt Works. He commanded at Norfolk, Va., in 1865, and was light-house inspector in 1866-9. He was commissioned commodore, 29 Sept., 1866, and in December was placed on the retired list.

BERRY, Abraham J., physician, b. in New York city in 1799; d. in Williamsburg (now Brooklyn), 22 Oct., 1865. He was educated as a physician, and at an early age obtained prominence in
his profession. At the time of the desolation of New York by Asiatic cholera in 1832, he was among the few that remained at the post of duty. He labored night and day, and his courage and zeal resulted in many expressions of respect and admiration from all classes, as well as a public acknowledgment by the city authorities. For more than a century a considerable part of Williamsburg had belonged to his family. He identified himself with the interests of the place when it was made a city, and became its first mayor. He also assisted very materially in the establishment of the im-

promptu regiment, which was formed in York, Con-

necticut in 1861. Dr. Berry, although over sixty years of age, went out as surgeon of the 38th New York infantry. When Gen. McClellan retreated to Harrisson's Landing in July, 1862, Dr. Berry had more than 300 patients in his care near White House; but in the confusion incident to the moving of the army he and the 3d were forgotten. When he found that the army had departed, he performed the her-

culean task of carrying the sick and convalescent safely through to the James river, and when he reached it the additions of sick and wounded had swelled his train to more than 800. His death was the result of fever contracted at that period.

**BERRY, Hiram George**, soldier, b. in Thomaston, Me., Jan. 20, 1834; d. at Chancellorsville, Va., 2 May, 1863. He learned the carpenter's trade, and afterward engaged in navigation. He represented his native town in the state legislature several times, and was mayor of the city of Rockland. He originated and com-

manded for several years the Rockland guard, a volunteer company, which was afterward organized and placed in the 3d division of the 3d army corps. He was present at the battles of Williamsburg and Fair Oaks, bore a conspicuous part in the seven days' fight, and was in the second Bull Run campaign and Chantilly. In January, 1863, he was nominated by the presi-

dent as major-general of volunteers, with rank dating from 29 Nov., 1862, confirmed by the sen-

ate on 3 Jan., 1863, and bore the command of the 2d division of the 3d army corps, succeed-

ing Gen. Sickles. At a critical juncture in the battle of Chancellorsville Gen. Berry received an order from Gen. Hooker to charge upon the advancing foe. It read: "Go in, general; throw your men into the breach; don't fire a shot—they can't see you—but charge home with the bayonet." They did charge home, and for three hours Gen. Berry's division, almost alone, withstood the attack of the enemy flushed with previous victory, drove them back, and regained a portion of their lost ground. The battle was renewed the next morn-

ing, and again Berry and his division were in the front, and receiving the first assault. Intent upon charging the enemy's lines, he led his brigades in several successful bayonet charges, and in one of them was killed by a shot from the enemy.

**BERRY, Nathaniel Springer**, governor, b. in Bath, Me., 1 Sept., 1796; d. in Bristol, N. H., 27 April, 1894. His father was a ship-builder; his grandfather, John Berry, captain of infantry in the American revolution, and his grandmother, Sarah Berry, a daughter of Nathaniel Springer, a captain of artil-

lery in the same war, killed in battle. When he was six years old his father died, and the condition

of the family was such that his lot was cast among strangers, and his educational advantages were limited. He became an apprentice as a tailor and currier at Bath, N. H., at sixteen, and served until twenty-one. In April, 1818, he moved to Bristol, N. H., and in 1820 engaged in the manufacture of leathers, which business he followed about thirty-

five years. He was colonel of the 24th regiment of New Hampshire militia for two years, was a judge of the court of common pleas from June, 1841, till June, 1850, and judge of probate for the five years ending 5 June, 1861. In 1828, 1836, 1834, and 1837 he was nominated for office. In 1854 he represented the town of Hebron, and in 1855 and in 1856 was a state senator for the 11th dis-

trict. Politically he acted with the democratic party for twenty-two years, and was a delegate to its national convention at Baltimore in 1840; but the action of this convention on the subject of slavery caused him to change his party ties, and he became one of the organizers of the free-soil party in New Hampshire. At its first state convention, in 1845, he was nominated for governor, and re-

ceived votes enough to prevent an election by the people. He was re-nominated at the four succeeding conventions. In March, 1861, he was elected governor by the republican party, inaugurated in June, following, and served from 17 May, 1862, serving until June, 1863. He was indefatigable in his efforts to aid the general government in the suppression of the rebellion; and enlisted, armed, equipped, and forwarded to the seat of war more than 16,000 men. He signed, with the other northern war-governors, the letter of 28 June, 1862, to the President, asking for volunteers to fill the 2d regiment, which he formed and organized on 1 July, 1862, for 300,000 volunteers. In 1823 Mr. Ber-

ry became a member of the Methodist Episcopal church, and in 1872 was a delegate to the general conference. He lost his wife in 1857, and was residing with his son in Bristol when he died.

**BERTHIER, Louis Alexandre** (bare-te-à), prince of Wagram, French nobleman, b. in Versailles, 20 Nov., 1755; d. in Baumberg, 1 June, 1815. He was educated as a soldier by his father, chief of topographical engineers under Louis XVI., and went into active service first as a staff-lieutenant, and afterward as a captain of dragoons, with which latter rank he came to America under Lafayette, and served during the war for independence, 1777-1783. Of this service and his life little is known. On his return to France he served the royal family until the revolution, when his talents made them-

selves felt and he became one of Napoleon's generals of division, and subsequently his chief of staff, the most confidential of all positions for a military able. He followed the fortunes of Napo-

leon to the last, and was without a peer in his spe-

cial line of staff duty. He is said to have been murdered by six men in masks; but some doubt has been thrown upon this story. His memoirs were published in Paris (1826).

**BERTRAND, Saint Louis**, b. in Valencia, Spain, in 1356; d. there in 1581. He joined the Dominicans in 1544, and showed a great love for the Indians when he had finished his studies. He arrived in Carthagena in 1562, and, after a short stay in the convent of St. Joseph, was ordered to preach the gospel among the savage tribes that dwelt between the river Magdalena and the Cordilleras. As he knew no other language than Spanish, the task seemed im-

possible. His prayers, however, were answered, and, in answer to his prayers, he was able to make himself understood by his hearers, though speaking only his native language, and that he also received the gifts of
prophecy and miracles. In less than three months he converted more than 10,000 Indians in the province of Tubaíra. Leaving some of his companions to complete his work, he next went among the Indians of Opaoca, whom he found threatened with extinction, owing to the advance of malaria. The danger having been averted, as the natives believed, by the prayers of the missionary, they all embraced Christianity. After attempting unsuccessfully to evangelize the Caribs, he turned his attention to the savages of the St. Martha mountains, whom, to the number of 15,000, he formed into a civilized community which he called the "Mission of St. Andrew" and tended his labours in the province of Monopox and in the island of St. Thomas. Although his efforts to Christianize the natives were hindered by some of his countrymen whose vices he denounced, he succeeded in converting all the Indians of New Grenada. He then decided on returning to Spain, with the object, as best known to the natives, of leaving a missionary in the same mission. But the entreaties of the Indians, combined with his election as prior of the convent of Santa-Fe-de-Bogota, changed his plans. He set out from Carthagena; but the vessel which carried him was wrecked on an island in the Magdalena, and he was obliged to return. Here he was met by a summons from the General of the Inquisition in the island of Elbe on the coast of Europe. A few days later he put to sea, reaching Valencia in the month of October, 1569. He was placed at the head of a novitiate, and spent the rest of his life in training missionaries for the Indian mission.

**BESSOS, Emil**, scientist, b. in Heidelberg, Germany, 25 June, 1824; d. in Stuttgart, 30 March, 1888. He was educated at the university of his native place, was made an assistant at the Royal museum of Stuttgart, and there became interested in arctic discovery. In 1859 he made the voyage with August Petermann into waters between Spitzbergen and Nova Zembla. By his observations he traced the influence of the gulf stream east of Spitzbergen, and added to the science knowledge of that region. He was chief of the scientific department of the "Polaris" expedition of 1870–3, and in 1876 edited the first three volumes of scientific results of that expedition, devoted to hydrography, meteorology, and astronomy. He was also in the expedition of Dörst and Weyrecht, and edited reports published by the principal investigators. He returned to Washington, where he prepared articles on arctic and zoological subjects, and projected a work on the Eskimo, but all his manuscripts were destroyed by fire in 1885. Soon after he sailed for his native land, where he settled in Stuttgart, occupying his time in literary pursuits, in the study of astronomy, and in geographical instruction and lectures.

**BETANCOURT, Agustin** (bay-tahn-soo't), Mexican monk of the Franciscan order, b. in the city of Mexico in 1620; d. in 1700. He was an excellent scholar and a famous teacher of the Mexican language. Among his works are "Arte de Lengua Mejicana," "Via Crucis," in Mexican, and "Cronografia suara." The best is his "Teatro Mexicano," in which he summarised his studies down to about the end of the 17th century.

**BETANCOURT, José Ramon**, Cuban lawyer, b. in Puerto Príncipe, Cuba, in 1823; d. 24 June, 1890. He was educated in Havana, and in 1847 was admitted to the bar. In 1869 he removed to Madrid, Spain, where he represented Cuba several times in the Spanish chamber, where he published a novel entitled "Una Feria de la Caridad," a well-drawn picture of Cuban customs and manners. His other works are "Cartera de Viajes," "Juicios críticos," and "Polémicas y otras Cosas."

**BETANZOS, Domingo de** (bay-tan'thoes), missionary, b. in Leon, Spain, in 1480; d. in Valladolid, 10 Sept., 1549. He was educated at the university of Salamanca, and spent whatever time he could spare from his studies in visiting the hospitals and other charitable offices. At the end of his course he lent his possessions, distributed the proceeds among the poor, and begged his way to a hermitage in Catalonia. He led a solitary life for some months, and then set out for Rome, to consult the pope on his future vocation. From Rome he went to the island of Ponzo, near Naples, where he converted nobody but a fisherman who brought him the fish he needed to form his sole support. He finally became a Dominican in the convent of St. Stephen, Salamanca, and was sent to Santo Domingo. After studying the language of the natives, he devoted himself to their conversion. He excited the hostility of the Spaniards by his efforts to protect the Indians from their cruelty. After a stay of twelve years in Santo Domingo he was summoned to Mexico, where the mission of the Dominicans was almost ruined, all its members having died except two. The preaching of Father de Betanzos was so effective with several young Spaniards, who had come to America in search of riches, that he soon had a large congregation of converts in the convent of his order in the city of Mexico, and afterward, as every vessel that touched on the coast afforded him recruits, was able to find others in the cities of Tlascal, Puebla, and Oaxaca. Satisfied that his followers would complete his work in Mexico, he set out on a journey of 300 miles for Guatemala, accompanied by two companions, who were obliged to return in a few days. He did not remain long in Guatemala, having been recalled to Mexico in 1530; but during his stay he built a church and convent and made such an impression upon the natives that his name was afterward a protection to other missionaries. The reason of his recall was a claim set up by the Dominicans of Santo Domingo to jurisdiction over the convents of the order in Mexico. Father de Betanzos was sent to Rome to defend the rights of the province of Mexico, was successful, and on his return was elected the first provincial of the province of Santiago of Mexico. His next step was to establish a college for the study of the Indian dialects of the Province of Mexico, and to establish missions in the smaller provinces, but in different villages. He also erected schools in the pueblos with the same object. He was named bishop of Guatemala, but declined the appointment. His death occurred as he was returning from Rome, where he had gone on a mission connected with the affairs of his order.

**BETANZOS, Pedro** (bay-tan'thoes), Spanish missionary, b. in Betanzos, Galicia, Spain, early in the 16th century; d. in Chomez, Nicaragua, in 1570. He was the first missionary that went to Central America, and founded the province of Nicaragua. In eight years he learned fourteen Indian languages in Central America, and then went to Mexico to learn Mexican. He also was the first missionary that, in his sermons and teachings to Indians, substituted the Spanish word "Dios" (God) for the Indian "Cacovil." This course was opposed by other missionaries, and created much discussion between the Dominicans and Franciscans of Guatemala; but Betanzos's opinion prevailed.

**BETETA, Gregorio** (bay-tay'-to), Spanish missionary, b. in Toledo in 1562. At the age of seventeen he began his novitiate in the convent of St. Stephen, Salamanca. He finished his course in the university of the same city, and, after gaining distinction as
a professor and preacher, volunteered for the mission of New Granada. He remained in the island of Santo Domingo from 1524 till 1529, studying the Indian dialects and fitting himself otherwise for his work as a missionary. His success in New Granada was remarkable. He preached first in the valley of the Urubi, where the Indians were not then acquainted with a short time converted the inhabitants. Ambitions of martyrdom, he penetrated into Florida; but, as the natives would neither kill him nor listen to him, he was forced to return to New Granada. He traversed every part of the country, his efforts in civilizing the natives being so successful as to attract the favor of the Conquistadors. He was consecrated bishop of Carthagena in 1555, endeavored to decline the honor, and only submitted under threat of censure. He set out for Rome, finally received permission to surrender his bishopric, and then retired to a convent in Toledo.

BETHENCOURT, Pedro, Spanish philanthropist, was a colonel in the Cincinnati, and of Irish birth, in 1819; d. in Guatemala, 25 April, 1867. He was a descendant of Juan Bethencourt, conqueror and king of the Canary islands; went to Guatemala in 1611, and devoted himself to literary studies. There he entered the Franciscan order, bought a building, which was first used for a school, and then for a convent, a hospital, and a church. In that house Bethancourt, president of the order of the Bethlehemites, and soon extended its benevolent services to the rest of America. He also made numerous other religious foundations, giving all his time to charitable work, and after an early death he was beatified.

BETHESDA, Jacques Étienne (bet-o-sy), Vicomte de Calais, French soldier, b. in Caen, France, in 1747; d. in Paris in 1816. He entered the navy, and in 1768 was transferred first to the regiment Baffremont, and then to the Royal Anvergne, which he joined in America. He became "colonel en second" of this corps, a rank corresponding to a junior field officer of modern battalions. With this rank he conducted the celebrated campaign of 1779-82. At the unsuccessful siege of the British in Savannah, in August, 1779, by the combined French and American forces under D’Estaing and Lincoln, Béthisy was five times wounded, and while returning home received two more wounds in a sea-fight. At the close of the American war he was decorated with the cross of St. Louis and the order of the Cincinnati, and was made "colonel en second" of the Royal Grenadiers of Picardy. Emigrating in 1791, he served in the army of Condé, 1794-7, and lived afterward in Vienna till the restoration of Louis XVIII, who promoted him a lieutenant-general, 1 June, 1814. His death was the result of several severe wounds received in preceding battles.

BETHUNE, Alexander Neil, Canadian bishop, b. in Williamstown, county of Glengarry, Ontario, in August, 1800; d. in Toronto in February, 1879. His family was of Scottish origin, and had settled in Canada with a band of U. E. loyalists in 1783. He received his early educational training at Cornwall grammar school, but the war of 1812, before going up this school, he resumed his studies in Montreal, where his parents then resided. Acting for some time as classical tutor, he was admitted to deacon’s orders in 1823, and in the year following was ordained priest. After spending a few years in Grimsby, he became rector of Cobourg, in 1847 was appointed archdeacon of York, and in 1867 was consecrated coadjutor bishop in St. James’s cathedral, Toronto, it being provided at the time of his consecration that he should succeed Bishop Strachan on the death of the latter. While at Cobourg he edited a church newspaper, and subsequently wrote several works, the most important of which is a "Memoir of the Right Reverend John Strachan, D. D., LL. D., First Bishop of Toronto."—His son, Charles James Stewart, clergymen, b. in West Flamboro’, Ontario, 11 Aug., 1828, was educated at private schools at Cobourg, and at Upper Canada college, and graduated at Trinity college, Toronto, in 1859. He was ordained a priest in the church of England in 1852, and, after officiating as curate and rector for several years, was, in September, 1870, appointed head master of the Trinity college. He has written much attention to scientific subjects, and was one of the founders of the entomological society of Canada, and its president from 1870 till 1875. He was entomological editor of the "Canada Farmer" for nine years, and editor of the "Canadian Entomologist" from its beginning in 1868 till 1875. He has written on practical and scientific entomology, and has contributed to the yearly report on insects presented to the provincial legislature. He is a fellow of the American association for the advancement of science.

BETHUNE, George Washington, clergymen, b. in New York city in March, 1803; d. in Florence, Italy, 27 April, 1852. His parents were distinguished as a member of the church of Christ and for charitable deeds. His father, Divie Bethune, was an eminent merchant, well known as a philanthropist. He was a gracious preacher and scholar steadily growing, and after completing his course was ordained a minister and settled in the Presbyterian church in 1825. He accepted an appointment as chaplain to seamen in the port of Savannah, but in 1826 returned to the north and transferred his ecclesiastical allegiance to the Reformed Dutch church, a literary and scientific worker, and at the same time where he remained four years, when he was called to the pastorate of the first Reformed Dutch church in Utica. In 1834 his reputation as an eloquent preacher and an efficient pastor led to an invitation from a Reformed Dutch church in Philadelphia. He remained in that city till 1848, his language, character, and scholar steadily growing, and then became pastor of the newly organized ‘Reformed Dutch church on the Heights’ in Brooklyn, N. Y. For eleven years he continued in the pastorate of this church, but in 1859 impaired health led him to resign and visit Italy. In Rome he sometimes preached in the American chapel, at that time the only Protestant place of worship in the city. He returned in 1860 with improved health, and was for some months associate pastor of a Reformed Dutch church in New York city; but, his health again becoming impaired, he returned to Italy in the summer of 1861, and, after some months’ residence in Florence, died from apoplexy. Dr. Bethune, though best remembered by his literary work, exercised a wide influence as a clergymen and a citizen. One of his latest public
efforts before leaving his native city for his last voyage to Europe was an address delivered at the great mass meeting in Union square, New York, 20 Oct., 1840. At the close of the war, and eloquence he urged the duty of patriotism in the trying crisis that then threatened the nation. A memoir by A. R. Van Nest, D. D., was published in 1867. Dr. Bethune was an accomplished student of English literature, and distinguished himself as a writer and editor. He published an excellent essay on the Life of John and Female Poets, with Bibliographical and Critical Notices" (Philadelphia, 1848); and Izaak Walton’s "Complete Angler," for which last he was peculiarly qualified by his fondness for fishing. Among his original works are "Laws of Love and Faith" (Philadelphia, 1847); "Orations and Discourses" (1850); "Memoirs of Joanna Bethune" (New York, 1865); "Fruits of the Spirit," a volume of sermons; and two smaller works, "Early Lost, Early Saved," and "The History of a Penitent."

BETHUNE, James, Canadian lawyer, b. in Glengarry, Ontario, July 7, 1810; d. 18 Dec, 1884. He was descended from two old Scottish families, and although a Whig, and a firm and loyalist, who removed from the United States and settled in Glengarry in 1778. James Bethune entered Queen’s college, Kingston, and, after a two years’ course there, attended University college, Toronto, where he was graduated in 1841. Concurrently with his university pursuits, he studied law, first in Cornwall and afterward in the office of Edward Blake, Toronto, and was called to the bar of Upper Canada in 1862 and to the bar of Quebec in 1869. He began practice at Cornwall, and in 1872 was elected to represent the county of Stormont in the legislature of Ontario; was re-elected at the general elections of 1875, and represented this constituency until June, 1879, when he declined to become a candidate. In November, 1870, he removed to Toronto, and, in conjunction with Edward Blake, S. H. Blake, and J. K. Kerr, established the firm of Blake, Kerr & Bethune. Subsequently he joined Messrs. F. Osler and Charles Moss, and formed the firm of Bethune, Osler & Moss. On the elevation of Mr. Osler to the bench, Mr. Bethune, with Mr. J. K. Kerr, formed the firm of Falconbridge & Hayles, and as such became one of the most successful legal firms in Canada. Mr. Bethune was elected a bencher of the law society of Ontario in 1875, and was for some years lecturer for that body.

BETTS, Samuel Rossiter, jurist, b. in Richmond, Berkshire co., Mass., in 1787; d. in New Haven, Conn., 3 Nov., 1847. He was the son of a farmer, and was graduated at Williams in 1806. He studied law in Hudson, N. Y., was admitted to the bar, and began practice in Sullivan co., where he was earning a fair reputation at the outbreak of the war of 1812. After a term of service in the army, he was appointed judge-advocate by Gen. James W. Henry, and was called to the Congress for the district comprising Orange and Sullivan cos., N. Y. At the close of the term he declined a re-election, and returned to the study and practice of his profession. He was for several years district attorney of Orange co. At that time the bar of the state of New York contained a number of somewhat notorious arraignment lawyers. Martin Van Buren, Elisha Williams, Thomas J. Oakley, George Griffin, Ogden Hoffman, Prescott Hall, and Thomas Addis Emmet were in active practice, and with all of them Mr. Betts was constantly associated, and, though of a younger generation than most of them, was soon recognized as their peer in the profession. In 1823 Mr. Betts was appointed judge of the U. S. district court, which office he held for forty-four years, and throughout his valuable service was characterized with such dignity, courtesy, profundity of legal knowledge, and patience of investigation, that he came to be regarded as almost infallible in his decisions. To him belongs the high honor of having in a great degree formulated and codified the maritime laws of the United States. The complicated rules of salvage, general average, vengeance, and prizes, were there present well-ordered system to Judge Betts. During the first twenty years of his connection with the district court there was never an appeal from his decisions, and his opinions in his own court on maritime questions, and in the circuit court, are of the same uniformly upheld. Criminal causes of all kinds amenable to U. S. laws were decided by him. The civil war brought before him an entirely new class of questions, affecting national and international rights; but, although beyond the age of three-score-years-and-ten, Judge Betts applied himself to the study of the new causes of action, regarding the neutrality laws and the slave-trade as an instance of constitutional reasoning and argument. He received the degree of LL. D. from Williams in 1830. In 1838 he published a standard work on admiralty practice. In May, 1867, having entered upon his eighty-first year, Judge Betts retired from the bench and spent the remainder of his life at his home in New Haven.

BETTS, Thaddeus, lawyer, b. in Norwalk, Conn.; d. in Washington, D. C., 8 April, 1840. He was graduated at Yale in 1807, as was his father in 1765, was admitted to the bar, and began practice in Norwalk. He was a whig in politics, and after holding many places of public trust, including the lieutenant-governor of the state, he was elected U. S. senator on the nomination of the whig party, to serve for six years, beginning 4 March, 1839. Notwithstanding failing health, he credibly fulfilled his duties as senator until a few days before his death.

BETTS, William, lawyer, b. in Beeghly, N. Croix, Virginia; d. in Janesville, Long Island, N. Y., 5 July, 1884. His early education was received in Jamaica; thence he went to Union college, N. Y., where he stayed a year, and then, entering Columbia, was graduated in 1820. He studied law with David B. Ogden, and subsequently entered the office of his father-in-law, Beverley Robinson. Mr. Betts was counsel to several old and large corporations in New York, was a trustee of Columbia and of the college of physicians and surgeons, and from 1848 till 1851 was professor of law in Columbia. He received the degree of LL. D. from Columbia in 1850.—His son, Beverley Robinson, b. in New York city, 3 Aug., 1827; d. in Jamaica, Long Island, 21 May, 1883. He was graduated at Columbia and at the seminary of the Protestant Episcopal church in 1850. The same year he was ordained deacon, and in 1851 took orders as a priest. He was successively rector of several churches until 1865, when he was appointed librarian of Columbia. Of the large library of that college he prepared a full catalogue (1874), and in 1883 he resigned his post as librarian. He has been a frequent contributor to the church journals, and for many years one of the editors of the "New York Genealogical and Biographical Record."

BEVERIDGE, John, poet, b. in Scotland. He taught school in Edinburgh for a time, having among his pupils the blind poet Thomas Black-
lock. In 1732 he emigrated to New England, where he remained five years, and then accepted the professorship of languages in the college and academy of Philadelphia. As a member of the house of correction, Alexander Graydon, he was mercilessly im-
posed upon by the pupils, he being small of stature and a poor disciplinarian. William Bradford published for him a volume of original Latin poems entitled “Epitope Familiare Alia quaedam Miscellanea” (1766). To the Latin poems are appended his apologetic letters, for which he tearfully apologizes, since “they are done by students under age, and if the critic will only bear with them till their understandings are mature, I apprehend they are in a fair way of doing better.”

BEVERIDGE, John Lourie, b. in Greenwich, N. Y., 6 July, 1824. In 1843 he removed west-
ward, first to Illinois, and then to Tennessee, where he became a lawyer. In 1855 he returned to Illi-
nois, settling in Chicago, and he gained prominent in his profession. At the beginning of the civil war he volunteered in the service of the United States, and attained the rank of brigadier-
general of volunteers. He was elected lieutenant-
governor of Illinois in 1852, and in 1853 succeeded Gov. Oglesby as governor of

BEVERLY, Robert, historian, b. in Virginia about 1675; d. in 1716. He became clerk of the council of Virginia about 1697, when Sir Edward Andros was governor. This office his father, Maj. Robert Beverly had held before him. His “His-
tory of the Present State of Virginia” (London, 1712-14) is one of the best accounts of Virginia, and the history of the government un-
til that time. In 1707 a French translation, with fourteen wood-cuts by Gribelin, was published in Amsterdam, and in 1722 a second English edition was brought out, with the French illustrations. A third edition, with an introduction by Charles D. C. Campbell, appeared in Richmond (1865). Mr. Beverly was the first American citizen in whose behalf the habsus corpus act was brought into requisition.

BEWLEY, Anthony, clergyman, b. in Tennes-
see, 22 May, 1804; d. at Fort Worth, Texas, 13 Sept., 1890. Mr. Bewley began preaching in the Tennes-
see conference of the Methodist Episcopal church in 1832, and in 1841 he was ordained deacon. In 1843 he reorganized the church took place in Missouri, and he entered its service to find himself in a short time stigmatized as an abolitionist, and, like his brethren of the same way of thinking, in danger of violence. He continued to preach according to his convictions until 1858, when he was appointed to Texas, but was driven temporarily from his post by the mob. In 1860, contrary to the advice of his friends, he remained for a few weeks; but such was the excitement that he deemed it expedient again to flee for his life. After his departure a reward of $1,000 was offered for his apprehension, and in September, 1860, he was arrested in Missouri, carried back to Fort Worth, Texas, and hanged by the mob, solely because he had proclaimed the injustice of human slavery.

BIARD, Peter (bê-are), missionary, b. in Gren-
oble, France, in 1565; d. in France in 1622. As a missionary priest of the Jesuits he came to Amer-
ica, visiting Fort Royal, Nova Scotia, in 1611. In 1612 he ascended Kennebec river and established friendly relations with the natives. The following year he visited Penobscot river, about the same time establishing a colonia on its banks, hoping to make it a permanent missionary settle-
ment. The same year, however, the little hamlet was destroyed by the English under Samuel Argall, deputy-governor of Virginia. One of Biard’s assist-
ants was killed, and he himself made prisoner and carried away. This outrage caused the earliest ac-
counts hostile to the French and Nipmuck colonists. In 1616 was published in Lyons, from his pen, the first of the remarkable series of “Jesuit Relations” (40 vols., 1632-72), which have proved among the richest sources of information for his-
torians of America. Biard’s volume was entitled “Relation de la nouvelle France,” etc.

BIBAUD, Michel (bi-bô), Canadian author, b. near Montreal, 20 Jan., 1782; d. there, 8 Aug., 1857. He entered the Roman Catholic college of St. Raphael, and, being naturally inclined to litera-
ture, devoted himself to studies in that direction, giving his attention mainly to the defence of Canadian nationality and the preservation there of the French vernacular. He published the first French history of Canada. He produced much creditable poetry, wrote an essay on “Arithmétique élémentaire,” and contributed to the leading French publications of Canada. Dur-
ning the latter part of his life he was engaged in translating into French the report of the geological commission.—His son, Francois Marie Uncas

BIBB, George Minos, b. in Virginia, 30 Oct., 1776; d. in Georgetown, D. C., 14 April, 1859. He was graduated at Princeton in 1792, studied law, and settled in Kentucky, where he was presently admitted to the bar. He served in Congress, a member of the state, and for two years in its senate. In 1811-14 and 1829-35 he was a member of the U. S. senate. President Tyler appointed him secre-
tary of the treasury in 1844, after which he practised law in Washington, and was an assistant in the attorney-general’s office. He is the author of “Re-
ports of Cases at Common Law and in Chancery in the Kentucky Court of Appeals” (1808-11).

BIBB, William Wyatt, governor of Alabama, b. in Virginia, 1 Oct., 1780; d. near Fort Jackson, Ala., 9 July, 1820. He was the son of Capt. Willi-

BICKER, Walter, soldier, b. in New York city, 29 Feb., 1796; d. at Far Rockaway, L. I., 3 June, 1856. He served in the war of 1812, and at the
time of his death was his last surviving officer. He resigned from the army forty years before his death, and his name is forever dear to the hearts of the generations of New York. He resided in Brooklyn, where he was for many years an active member and elder of the 1st Reformed church. He retained his mental and physical vigor almost up to the period of his death, and only a few weeks preceding that event wrote a series of articles for a religious journal, giving his recollections of New York city in the olden time.

BICKMORE, Albert Smith, naturalist, b. in St. George, Me., 1 March, 1839. He was graduated at Dartmouth in 1860, and then studied under Agassiz at Lawrence scientific school. During the years 1863-9 he travelled extensively in the Malay archipelago and eastern Asia collecting objects in natural history. He was an intimate friend of President R. Biddle, and on Saturday mornings, during the winters, he delivers lectures on subjects in natural history before the teachers of the public schools of New York and vicinity. Under the direction of the state superintendent of public instruction, he gives lectures before the normal schools, Prof. Bickmore is a contributor of articles which he has contributed numerous papers. He has published "Travels in the East Indian Archipelago" (New York, 1869).

BICKNELL, Thomas Williams, educator, b. in Barrington, R. I., 6 Sept., 1831. He began his collegiate education at Amherst, but was graduated at Brown in 1860. During his senior year in college he was elected a member of the Rhode Island state legislature. From 1860 till 1869 he taught, and was principal of schools in Rehoboth, Bristol, Providence, R. I., and in Elgin, Ill., after which, until 1875, he was state commissioner of public schools. While holding that office he secured the re-establishment of the State Normal School in 1871, the passage of the first state educational laws of the city, the organization of a board of education, and other important measures. Mr. Bicknell has been very active in educational journalism, and during the years 1874-86 he founded, edited, and owned "The Journal of Education," "The Primary Teacher," "The American Teacher," "Education: a Bimonthly Magazine," and "Good Times." The New England Bureau of Education and the National Council of Education were organized by him. He has delivered numerous educational lectures and addresses, and has at various times been president of the Rhode Island Institute of Instruction, American Institute of Instruction, National Council of Education, National Jo-icm-re-nation, and chairman of the Commission for Federal Aid, Chautauqua Teachers' Reading Union, and of the Massachusetts, New England, and International Sunday-school unions. He has published "Biography of William Lord Noyes" (Providence, 1867); "Historical Sketches of Barrington, R. I." (Providence, 1870); "Reports of the Commissioner of Public Schools" (Providence, 1869-75); and "History of the Bicknell Family" (Boston, 1882).

BIDDLE, Clement, "Quaker soldier," b. in Philadelphia, 10 May, 1740; d. there, 14 July, 1814. Descended from one of the early Quaker settlers of New Jersey—refugees, for the most part, from Protestant intolerance—he was brought up in the strict order of the sect, and engaged in commercial pur-
suits in Philadelphia. In 1764 some friendly Indians sought refuge in Philadelphia from a band of savages from the interior of New York, who had recently murdered some offending Conne
toga Indians at Lancaster. These ruffians, powerful enough in numbers to defy the authorities, advanced to within six miles of the city, threatening vengeance upon all who offered resistance. But the vigor of the military preparations, including a company of Quakers by public subscription, manifest that the outlaws retreated. Close upon this local disturbance came the resolution of the British house of commons to charge stamp duties in the colonies, and the subsequent passage of the act induced the adoption of the "non-importation resolutions" in Philadelphia, 30 Oct., 1765. Among the signers of this agreement were Mr. Biddle and his brother Owen. When actual hostilities became imminent he entered into projects for defence, and was active in organizing that military anomaly the "Quaker" company of volunteers, of which he was elected an officer in 1775 before it joined the army. In June, 1776, congress authorized the appointment of the group of 5,000 men, and on 8 July, 1777, elected Col. Biddle to be the 1st quartermaster. After the battle of Trenton, Washington sent him to receive the swords of the Hessians prisoners. He was present at the battles of Princeton, Germantown, Brandywine, and Monmouth, and he also shared in the sufferings of the army at Valley Forge. He remained in the military service until 1780, when the pressure of his private affairs compelled his resignation. In the early political movements of the state and nation he took an active part, alike in the revolutionary state constitution of 1776 and in the organization of the federal constitution in 1787. At this time he was appointed by Washington U. S. marshal of Philadelphia county, and in 1781 when the pressure of his private affairs compelled his resignation. In the early political movements of the state and nation he took an active part, alike in the revolutionary state constitution of 1776 and in the organization of the federal constitution in 1787. At this time he was appointed by Washington U. S. marshal of Pennsylvania county, and in 1781 when the pressure of his private affairs compelled his resignation. In the early political movements of the state and nation he took an active part, alike in the revolutionary state constitution of 1776 and in the organization of the federal constitution in 1787. At this time he was appointed by Washington U. S. marshal of Pennsylvania county, he accompanied the expedition for the suppression of that formidable insurrection. He was the warm personal friend of Washington, as well as of the late General Yourke, of Massachusetts, New England, and International Sunday-school unions. He was an influential adviser of the government as to its financial policy at that time.

BIDDLE, Horace Peters, lawyer, b. in Fairfield county, Ohio, 24 March, 1811. He was admitted to the bar at Cincinnati in 1830, and settled at Logansport, Ind. He was presiding judge of the 8th judicial circuit in 1846-52; member of the Indian constitution convention in 1856. Elected supreme judge in 1857, but not commissioned. He made some excellent translations from French and
German poets; became a contributor to the "Southern Literary Messenger" in 1842, and afterward contributed to the "Ladies' Repository" and other periodicals. Collections of his poems were published in 1856, 32, and 58, at Cincinnati.

**BIDDLE, James**, naval officer, b. in Philadelphia in 1783; d. there, 1 Oct., 1848. He entered the navy as a midshipman in 1800, was on board the frigate "Philadelphia" when she was wrecked on the coast of Brazil, and with the rest of the officers and crew was held in captivity during the war with the Barby states. After his release he was on ordinary duty until the war of 1812, when he was assigned to the sloop-of-war "Wasp," and was present at the capture of the British sloop "Frolic." He was placed in command of the prize, with orders to make for some southern port of the United States; but while the two vessels were hastily repairing damages, a British seventy-four, the "Poictiers," appeared, and, as the two late antagonists could neither fight nor escape, they were both captured. On being exchanged in March, 1813, Mr. Biddle was promoted master-commandant and placed in charge of a gunboat. The British frigate "Frolic" was soon transferred to the "Hornet," then blockaded by the British in the port of New London, Conn. He escaped with his ship, and shortly afterward sailed for Tristan d'Ancuna. When off that island (23 March, 1813) he fought and captured the British brig "Penguin," after a sharp engagement of twenty-two minutes at close quarters, during which the "Penguin" fired her broadside at the "Hornet"'s fire that she had to be scuttled and abandoned. Just at the end of the action Biddle was severely wounded. Having repaired the damages to his ship, he sailed for the Cape of Good Hope, and on 27 April encountered a British line-of-battle ship, which followed the "Hornet" for nearly thirty-six hours, pressing her so closely—often within cannon-range—that Biddle was obliged to throw his guns overboard, only escaping capture by the exercise of good seamanship. He sailed for San Salvador to refit, but when he reached port found that a treaty of peace had been concluded. Reaching New York on 30 July, he found that he had been promoted post-captain while at sea. Congress voted him his twenty-thousand-dollar pay, and invited him to dinner, while his native city presented him with a service of plate. He asked for a court of inquiry to investigate the sacrifice of his armament, and the return of the "Hornet," which acquitted him of all blame, and commended the skill that had saved the ship from capture. After the war he was almost continuously on active duty. In 1817 he took possession of Oregon for the United States, and in 1826 represented the government in negotiating a commercial treaty with Turkey. At his suggestion, while governor of the naval asylum at Philadelphia (1838–45), Sec. Paulding sent thither unemployed midshipmen for instruction, thus laying the foundation of a naval school. He was a member of the East India Company, and negotiated the first treaty with China, afterward landing in Japan. This was his last extended cruise, though he was in command on the California coast during the Mexican war.

**BIDDLE, John**, soldier, b. in Philadelphia, Pa., 9 March, 1750; d. in White Sulphur Springs, Va., 25 Aug., 1830. He became second lieutenant in the 3d artillery, 6 July, 1812, first lieutenant in March, 1813, captain in the 42d infantry in October, and assistant inspector-general, with the rank of major, on 19 June, 1817. He became U. S. Indian agent at Green Bay, Wis., in February, 1821, and resigned in May of the same year. He then removed to Detroit, Mich., and was territorial delegate in congress from 1829 till 1831, when he was appointed register of the land-office in the district. Maj. Biddle travelled extensively in Europe just before his death. He wrote many interesting papers on Michigan history.

**BIDDLE, Nicholas**, naval officer, b. in Philadelphia, 10 Sept., 1750; killed in action, 7 March, 1780. In March, 1776, congress passed a resolution appointing nineteen days before the capture of six vessels. Nicholas Biddle, one of these, was assigned to the "Andrea Doria," an armed brig. In October, 1776, the number of captains that had been increased to twenty-four, and it became necessary to settle the question of rank. A resolution was passed accordingly, and Biddle's name stands fifth on the list. His maritime experience prior to this time had been somewhat extended. When a boy of thirteen he went on a voyage to the West Indies, and was cast away on a desert island, where, with two companions, he remained two months. In 1770 he entered the British navy as a midshipman, such appointments being open to the colonies. Three years afterward, hearing of Capt. Phips's privateering expedition, he deserted his own vessel and shipped as a seaman on board one of Phips's vessels, where he met Nelson, the future admiral, a volunteer like himself. Both boys were made cockswains before the voyage was over, and Biddle served through the cruise, but returned to America as soon as he could. He was landed in New York as a sailor, he was given an independent command. The "Andrea Doria" mounted fourteen or sixteen guns, and her first cruise was to the Bahamas with a small squadron under Fleet-Captain Hopkins. Biddle participated in the very creditable capture and occupation of New Providence, where a large quantity of merchandise was seized, and loaded upon the vessels of the squadron for transportation to the United States. Off Montauk point, Long Island, two small British cruisers were captured (4 and 5 April), and on 6 April a large ship, the "Glasgow," was engaged. In this fight, which was indecisive, Biddle took part. The Englishman drew off after having sustained and inflicted losses. After the engagement the British officers, seeing that the heavily laden Americans, made her escape. After refitting in New London, the "Andrea Doria" cruised on the banks of Newfoundland, captured two armed transports filled with soldiers, and made prizes of so many merchantmen that when he returned to the Delaware Biddle retained but five of his original crew, the rest having been placed on board prizes. On 6 June, 1776, he was appointed by congress to command the "Randolph," a 32-gun frigate then building in Philadelphia. She was launched near the close of the year, and sailed early in 1777. Some constructional defects were discovered in the ship, and Capt. Biddle put into Charleston for repairs. These made, he sailed, and encountered the British 64-gun ship "Yarmouth," which had an armament of twenty guns. The South Carolinians were so pleased with these successes that they voluntarily equipped four small vessels, which they placed under his command, and the squadron sailed in search of British cruisers supposed to be in the neighborhood. On 5 March they encountered the British 64-gun ship "Yarmouth." Prudence dictated flight from so powerful an antagonist, but she soon overtook and engaged the "Randolph." After a sharp action of twenty minutes at close quarters the latter blew up, and the vessels were so close together that fragments of
the wreck, including an American flag rolled up tightly, fell on the "Yarmouth's" deck. The British ship had suffered so severely in the action that she was unable to overtake any other of the American ships. On 12 April, while in the vicinity, she picked up four survivors of the explosion, who reported that Capt. Biddle had been severely wounded during the action, and was having his wound dressed on deck when the explosion occurred. The rest of the "Randolph's" crew, 310 in number, perished. It was generally believed that Capt. Biddle possessed all the qualities that go to make a great naval commander, and his untimely death, with the simultaneous loss of the first American frigate ever launched, was a serious blow to the infant navy of the revolted colonies.—His brother, Edward, b. 1799, d. in Baltimore, 5 Sept., 1779, was a officer in the French war of 1756-'63. He became eminent as a lawyer in Reading, Pa.; was a member and speaker of the assembly, and was a delegate to the first congress in 1774-5. He was one of the foremost advocates of independence.

BIDDLE, Nicholas, financier, b. in Philadelphia, 1786; d. there, 27, Feb., 1844. His preparatory education was received at an academy in Philadelphia, where his progress was so rapid that he entered the class of 1799 in the university of Pennsylvania, and would have taken his degree at the close of the ten years, had it not been deemed wise to keep him longer at his books. He was accordingly sent to Princeton, entered the sophomore class of the following year, and was graduated in 1801 as valedictorian, dividing the first honor of the class with his only rival. The history of the Biddle family came over with William Penn, and bore themselves nobly throughout the earlier colonial struggles against the proprietaries and the Indians. In the war for independence, Charles, father of Nicholas, was prominent in defense to the cause, while his uncle was among the most gallant of the early naval heroes. Another uncle served in the old French war, and was a member of the congress of 1774. Mr. Biddle is said to have been the handsomest man in Philadelphia. He was offered an official position before he had finished his law studies. As secretary of the U. S. minister to France, he went abroad in 1804, was in Paris at the time of Napoleon's coronation, and afterward, when the diplomatic relations of France and the United States were seriously complicated, Mr. Biddle was detailed to audit and pay certain claims against the United States, the disbursements being made from the proceeds of the withdrawal of the cash funds, a task of the first experience in financial affairs, being brought into intimate association with the dignitaries of the French government, who never ceased to marvel alike at his youth and his abilities. After completing satisfactorily the arduous task of paying the claims, he travelled extensively through Europe and Greece, returning to England to serve as secretary for Mr. Monroe, then U. S. minister to England. In this capacity he accompanied him to Cambridge, where, in a company of very learned scholars, he found himself drawn into a conversation involving familiarity with the modern Greek dialect as compared with that of Homer. He acquitted himself so well that the incident was never forgotten by Mr. Monroe, who often related the story of the discussion between the two ministers and the Cambridge professors. In 1807 Mr. Biddle returned home and began the practice of law, devoting such time as he could spare to literature, contributing papers on various subjects, but chiefly on the fine arts, to different publications. His literary tastes led him to undertake, with Joseph Dennie, the associate editor of "Dennie's Journal of History and Politics," to conduct a magazine of high character (1806-33). After Dennie's death, in 1812, Mr. Biddle conducted the magazine alone, engaging also in other literary work, the most important of which was the preparation for the press of Lewis and Clarke's report of their exploring expedition to the mouth of Columbia river. He produced Mr. Lewis's "Voyage of Discovery" and a eulogistic memoir of Capt. Lewis. Mr. Biddle's name does not appear, as he was elected to the state legislature (1810-'11), and was compelled to turn over the whole work to Paul Allen, who supervised its publication, and, with the consent of all parties, was the recognized editor. It is said, however, by Robert T. Conrad, that Mr. Biddle actually wrote the two volumes from Lewis and Clarke's notes. In the legislature he at once became prominent, possessing in a high degree the qualities of a statesman. He originated a bill favoring popular education, which was a quarter of a century in advance of the times and was defeated, but came up again in different forms until, in 1816, the Pennsylvania company of banks was incorporated as a direct result of his efforts. He was more successful in advocating the recharter of the United States bank, and on this subject made his first speech, which attracted general attention at the time, and was warmly commended by Chief-Ju

BIDDLE
vindicating his own course. In 1839 he resigned the bank presidency, and in 1841 the bank failed. He was a leading spirit in the establishment of Girard college under the provisions of the found-

er's will, and, in spite of the unfortunate conclu-
sion of his otherwise brilliant financial career, he commanded the confidence and admiration of all that knew him well. Full discussions of the con-
temporary questions involved may be found in the "Merchant's Magazine," "Niles's Register," "The Binney," and the reports of con-
gressional committees. His works include: Richard, author, b. in Philadelphia, 25 March, 1786; d. in Pittsburg, Pa., 7 July, 1847, received a classical 
education and was admitted to the bar, practising at Pittsburg, where he became eminent in his profession. He went to England in 1827, and re-
named three years, publishing while there a criti-
cal "Review of Cullender Hall's Travels in North America." He also published "A Memoir of Sebastien Cabot, with a Review of the History of Maritime Discovery" (London, 1831), in which many new facts were brought to light. He was elected to congress, as a Whig, and re-elected, serv-
ing from 4 Sept., 1837, till his resignation in 1840. — John Thomas, Charles, b. in Philadelphia in 1819; d. there, 28 Sept., 1873, was graduated at Princeton in 1837, studied law, and was admitted to the bar in 1840; served as a cap-
tain of the voltigeurs in the U. S. army in the Mexican war, and was in the actions of Contreras, Churubusco, Molino del Rey, Chapultepec, and at the capture of the city of Mexico. For gallant and meritorious services in these engagements he was brevveted major. At the close of that war he resumed the practice of his profession in his native city. In 1861 he was appointed a colonel in the Pennsylvania reserve volunteer corps, and in Oc-
tober of that year was elected to congress, to fill the vacancy caused by the resignation of Edward J. Eyre. He was tendered a commission as brigadier-general, but declined it. After the war he became one of the proprietors and editor-in-
chief of the Philadelphia "Age," and retained that 
place during the remainder of his life. His liter-
ary work was confined mainly to editorial contrib-
utions to the columns of this journal. The only section of it which has come to public notice is the "Case of Mayor Andrés," a carefully prepared essay included in the present collection before the Pennsylvania historical society, vindicat-
ing the action of Washington. The immediate occasion was a passage in Lord Mahon's "History of England," which denounced the execution of Andrés as the greatest blot upon Washington's record. By an authority so high as the London "Critic," this essay was subsequently pronounced a fair refutation of Lord Mahon's charge.

BIDDLE, Thomas, soldier, b. in Philadelphia, 21 Nov., 1790; d. in St. Louis, Mo., 29 Aug., 1831. He was appointed captain of artillery 6 July, 1812, and distinguished himself at Fort George and Stony Creek. At the reduction of Fort Erie he was wounded, and during the subsequent engagements he severely wounded in the defense of that place. At the battle of Lundy's Lane, 25 July, 1814, he com-
manded a light battery, and was wounded again. The only British field-piece retained by the Ameri-
cans on that occasion was brought away as a trophy by Capt. Biddle. On 15 Aug., 1814, he was severely wounded in the leg, and was conveyed by Dr. Oatman to Gen. Izard. In 1839 he was paymaster. He met his death at the hands of Spencer Pettis in a duel. In consequence of Maj. Biddle's defective 
eyesight, the distance was made five feet, and both men were mortally wounded at the first fire.

BIDWELL, Daniel Davidson, b. in Buffalo, N. Y., about 1816; d. near Cedar Creek, Va., 19 Oct., 1864. He resided in Buffalo, and for twenty years prior to the civil war was identified with the Whig political organization of the state. When the war began he resigned his office of police justice, enlisted as a private in the 65th N. Y. infantry, and was soon promoted captain. Withdrew-
ing his company from the regiment, he made it the nucleus of the 74th regiment, N. Y. infantry. He was commissioned colonel of the 49th regiment in September, 1861; served in the peninsular campaign, and during the "seven days' battles" was in command of a brigade, continuing in charge from Harrison's Landing to Washington, and up to the time of the battles of South Mountain and Antietam, when he resumed command of his regiment. Col. Bidwell took a prominent part in the battles of Fredericksburg and Chancell-
orsville, commanded a brigade at Gettysburg, and, when Gen. Grant took command of the armies in Virginia, was again placed in charge of a brigade, participating in the overland campaign. He was commissioned brigadier-general in July, 1864, and served with honor in the Shenandoah campaigns, during which he was commanding the action at Cedar Creek, where he lost his life.

BIDWELL, John, politician, b. in Chautauqua co., N. Y., 5 Aug., 1819. In 1829 he settled with his parents in Erie, Pa., and in 1831 removed to Ashtabula co., where he was educated in Kings-

ville academy. During the winter of 1838—9 he taught school in Darke co., and subsequently for two years in Missouri. In 1841 he emigrated to California, being one of the first to make the journey overland, which occupied at that time six months. On the Pacific coast he had charge of Bodega and Fort Ross, and also of Gen. Sutter's Feather river possessions. He served in the war with Mexico until its close, rising from second lieutenant to major-general, and afterward acting as a private in the civil war. In 1854 he was a member of the state constitutional conven-
tion, and during the same year became a member of the senate of the new state. He was one of the committee appointed to convey a box of gold-
bearing quartz to Washington in 1850, and was a delegate to the national democratic convention held in Chicago in 1856. In 1851 he emigrated to California, having been a brigadier-general of the militia, and in 1864 he was elected a representative from California to congress, serving from 4 Dec., 1865, to 3 March, 1867. He was a delegate to the Philadelphia conven-
tion in 1866, and in 1875 he was candidate for governor of California, but was defeated.

BIDWELL, Marshall S., lawyer, b. in New England in 1798; d. in New York city, 24 Oct., 1872. At an early age he removed to Canada, where he practised law, rose rapidly in his profes-
sion, and entered political life while still a young man. He was returned several times from Kings-
ton and Toronto to the Canadian parliament, and during the latter half of his term of office he was leader of the liberal party previous to and during the rebellion of 1837, and became so formidable to the government that he was ordered to leave Cana-
da. He accordingly removed to New York city, where he subsequently practised law in the higher courts and was considered one of the ablest and most powerful at the bar. In 1875 he died of a heart attack, on the same day that the death of the oldest savings-bank in New York city, a director in the American Bible soci-
ety, and a prominent member of the historical soci-
ecture, before which he delivered an address a short time before his death.
In 1700 Bienville constructed a fort fifty-four miles above the mouth of the river. Sauvole died in 1701, and Bienville succeeded to the direction of the colony, the first of which was transferred to Mobile. In 1704 he was joined by two brothers from Philadelphia, South, who brought from Canada seventeen settlers. A ship from France brought twenty women, who had been sent out by the king to be married to the settlers at Mobile. Iberville soon after died; troubles arose in the colony, Bienville quarrelled with La Salle, the royal commissioner, was charged with him with various acts of misconduct, and on 13 July, 1707 was recalled; but his successor dying on the voyage from France, Bienville retained the command. Meanwhile, in 1708, the attempt to cultivate the land by Indian labor having failed, Bienville proposed to the home government to send negroes from the Antilles to be exchanged for the route of commerce for two negroes. In 1709 and 1710 the colony was reduced to famine. In 1712 the French king granted to Antoine Crozet for fifteen years the exclusive right to trade in Louisiana, and to introduce slaves from Africa. On 15 July, 1713, Cadil- lae was sent out as governor, bringing with him a commission from Louis as governor. From 1713 to 1717 Quarrels arose between them, and the governor sent Bienville on an expedition to the Natchez tribe, hoping that he would lose his life. But Bienville succeeded in inducing the Natchez to build a fort for him, in which he left a garrison, and returned to Mobile, 4 Oct., 1716. On 9 March, 1715, Cadillaque was recalled by the French crown. Bienville received the decoration of the cross of St. Louis. Crozet surrendered his charter in 1717, and Law's Mississippi company was formed the same year, its first expedition arriving in 1718, with a commission for Bienville as governor. He now founded the city of New Orleans. War breaking out between France and Spain, Bienville took Pensacola, placed the raton in the hands of the governor. In 1723 the seat of government was transferred to New Orleans. On 16 Jan., 1724, Bienville was summoned to France, to answer charges which had been brought against him. He left behind him the "code noir," which remained in force till the annexation of Louisiana to the United States, and much of it is still in the expatriate in the state. This code regulated the condition of the slaves, banished the Jews, and prohibited every religion except the Roman Catholic. On 9 Aug., 1726, he was removed from office, and Chateauguay was also placed as lieutenant-governor, and ordered back to France. Bienville remained in France till 1733, when he was sent back to the colo- ny as governor, with the rank of lieutenant-gen- eral. In 1736, 1739, and 1740 he made unsuccessful expeditions against the Chickasaw Indians, in con- sequence of which he was superseded, and in 1743 returned to France.

BIERSTADT, Albert, painter, b. in Düssel- dorf, Germany, 7 Jan., 1830. He was brought by his parents in 1841 to New Bedford, Mass., where he early developed a taste for art and made clever crayon sketches in his youth. In 1851 he began to paint in oils, and in 1853 went to Düssel- dorf and studied four years in the academy there and in Rome, making sketching tours during the summers in Germany and Italy. On his return to the United States in 1857, he made an ex- tended tour in the west, especially in Colorado and California, obtaining from this and other vis- its material for many of his more important pic- tures. He again visited Europe in 1867, in 1878, and in 1883. Mr. Bierstadt has received many
honors. He was elected a member of the national academy in 1869, and has been awarded medals in Austria, Bavaria, Belgium, and Germany. In 1857 he was decorated with the cross of the legion of honor, and in 1869 with that of St. Stanislaus, of which he received also the second class in 1872. In 1882 his studio at Irvington, N. Y., was destroyed by fire, with many valuable pictures. Among his best-known works are: “Laramie Peak” (1861), now in the Buffalo academy of fine arts; “Lander’s Peak in the Rocky Mountains” (1863), bought by James McHenry, of London, for $25,000; “North Fork of the Shoshone” (1865) by James Corcoran in the Louvre; “Looking down the Yosemite” (1865); “El Capitan on Merced River” (1866); “Storm on Mt. Rosalie” (1866); “Valley of the Yosemite” (1866), in the Lenox library; “Settlement of California” and “Discovery of Hudson River,” both in the Capitol at Washington; “Emerald Pool on Mt. Whitney” (1870); “In the Rocky Mountains” (1871); “Great Trees of California” (1874); “Tule of Kern River, California” (1875); “Mt. Whitney, Sierra Nevada” (1877); “Estes Park, Colorado,” “Mountain Lake,” and “Mount Corcoran, in Sierra Nevada” (1878), Corcoran gallery, Washington; “Geysers” (1883); “Storm on the Matterhorn,” and “View on Kern River” (1884); “Valley of Zermatt, Switzerland” (1885); “On the Sierra, New Hampshire,” and “California Oaks” (1886).

BIGELOW, Erastus Brigham, inventor, b. in West Boylston, Mass., 2 April, 1814; d. in Boston, Mass., 6 Dec., 1879. He was the son of a cotton-weaver, and it was his parents’ desire that he should become a physician, but, his father’s business not being successful, he was unable to continue his studies, and so turned his attention to inventing. Before he had reached the age of eighteen years he had devised a handloom for suspended-weaving, and also a machine for making paper of flax fibers, and weaving cord. His work on “Stenography,” a short manual on shorthand writing, was written and published about this time. In 1838 he patented an automatic loom for weaving counterpanes, which he subsequently modified so as to produce an article equal to the finest imported counterpanes. He then invented a loom for weaving coach-lace, and soon afterward turned his attention to carpet-weaving. In 1839 he contracted to produce a power-loom capable of weaving two-ply in the same width as had been hitherto woven exclusively by the handloom, one which only produced eight yards a day. With his first loom he succeeded in obtaining ten or twelve yards daily, which he increased by improvements until a product of twenty-five yards was regularly obtained. Afterward he invented a power-loom for weaving Brussels tapestry and velvet tapestry carpets, his most important invention, which attracted much attention at the World’s Fair in London in 1851. The town of Clinton, Worcester co., Mass., owes its growth and manufacturing importance to him, as it contains the coach-lace works, the Lancaster Quilt Company, and the Bigelow Carpet Company, all of which are direct results of his inventive ability. In 1862 Mr. Bigelow prepared a scheme of uniform taxation throughout the United States by means of stamps, and he published “The Tariff Question, considered in regard to the Policy of England and the Interests of the United States” (Boston, 1863). Mr. Bigelow was elected a member of the Boston Historical Society in April, 1864, and in 1869 prepared large volumes entitled “Inventions of Erastus Bigelow,” Bigelow in England from 1837 to 1868,” in which were gathered the printed specifications of eighteen patents granted to him in England. See the memorial sketch by Robert C. Winthrop in “Winthrop’s Addresses and Speeches” (Boston, 1886).

BIGELOW, Jacob, physician, b. in Sudbury, Mass., 27 Aug., 1817; d. in Boston, 10 Jan., 1879. He was educated at Harvard in 1836, studied medicine, opened his office in Boston in 1840, and displayed unusual skill. In 1841 he delivered before the Phi Beta Kappa society a poem on “Professional Life,” afterward published at Boston. He early made a reputation as a botanist, had an extensive garden with plants from his travels, and plants were named for him by Sir J. E. Smith, in the supplement to “Rees’ Cyclopaedia,” by Schroder in Germany, and De Candolle in France. He was one of the committee of five selected in 1829 to form the “American Pharmacopoeia,” and to be credited with the principle of the nomenclature of materia medica afterward adopted by the British colleges, substituting for a single genus a species, whenever practicable. He founded Mount Auburn, the first garden cemetery established in the United States, and the model after which all others in the country have been made. The much-admired stone tower, chapel, gate, and fence were all built after his designs. During a term of twenty years Dr. Bigelow was a physician of the Massachusetts general hospital, and in 1856 the trustees of that institution ordered a marble bust of him to be placed in the hall. He was professor of materia medica in Harvard university from 1815 to 1855, and from 1816 to 1827 held the Rumford professorship in the same institution, delivering lectures on the application of science to the useful arts. These lectures were published in the edition, with notes of Sir J. E. Smith’s work on botany (1814); “American Medical Botany” (3 vols., Boston, 1817-29); “Nature in
BIGELOW, John, journalist, b. in Malden, N. Y., Dec. 5, 1823; died in Peoria, Ill., 2 Oct., 1888. Bigelow was also known as a writer on other than medical subjects. He was a frequent contributor to the reviews and periodicals, and was the reputed author of a volume of poems entitled "Eolopoeis" (New York, 1855), containing imitations of American poets.

moved to Lancaster, where he continued until his death. He was a man of genial character, exercised a great influence socially, and was successful as a preacher.

BIGLER, John, governor of California, b. in Cumberland co., Pa., 8 Jan., 1844; d. 15 Nov., 1871. He was of German descent. Learning the printing trade, he became a journalist in Wilmington, Delaware, and removed to Illinois in 1846. He went to California among the emigrants of 1849. There he became a prominent democratic politician and gained the name of "honest John Bigler." From 1852 till 1856 he was governor of the state.—His brother, William, governor of Pennsylvania, was b. in Salem, Mass., 26 Nov., 1814. In 1853 he began his editorial career, and to Badger in 1855. In 1859 he became professor of the "Center Democrat," published at Bellefonte. In 1853 he removed to Clearfield and established the "Clearfield Democrat," a Jackson paper, which became prosperous and notable. He sold it in 1859, and entered the lumber business, but his editorial career had so extended his reputation that he was already regarded as a political leader. In 1861 he was elected to the state senate, and he was speaker in 1863-4. In 1869 he was appointed one of the revenue commissioners, and in 1874 was elected governor, he received the gubernatorial nomination a second time in 1864, but was defeated by the Democratic candidate. In 1853 he was sent to the U.S. senate. He was a member of the Charleston convention in 1860, and was temporary chairman of the democratic convention of 1864, and a member of that of 1868. After the election of Mr. Lincoln, Mr. Bigler drew up a bill, and advocated it before the senate, for submitting the Crittenden compromise to the people of the several states. In 1873 he was delegate-at-large of the constitutional convention at Erie. In 1874 he was an efficient member of the board of finance of the centennial exhibition.

BIGLOW, William, educator, b. in Naticek, Mass., 22 Sept., 1773; d. in Boston, Mass., 12 Jan., 1853. He attended the village school in Salem, and then became principal of the Latin school in Boston, where he wrote a number of text-books. He also preached occasionally, and wrote for periodicals. He subsequently taught a village school in Maine, and in later life was professor in the university press at Cambridge. He wrote "The Classical Parson" and other works. He compiled "History of Natick" (1830); "History of Sherburne"; "The Youth's Library" (1808); "Introduction to the Making of Latin" (1809); and "Education, a Poem," delivered at Cambridge in 1799.

BILLINGS, Elkanah, Canadian geologist, b. in Gloucester, Canada, 5 May, 1820. He was the son of an Englishman from Massachusetts, who had settled near Brockville after the revolution, was admitted to the bar in 1845, and practised in Ottawa, but in 1856 became paleontologist of the geological survey of Canada. During that year he edited the "Canadian Naturalist," to which he has since contributed. He has also written for other scientific journals and prepared material for the third and fourth decades of the geological survey.

BILLINGS, George Herrick, metallurgist, b. in Taunton, Mass., 8 Feb., 1845. He was educated at Pittsburg, and since 1862 his attention has been occupied with the study and practice of iron metallurgy and its chemistry. Of late he has been the general manager of the Norway Iron and Steel Company in Boston. He has invented improved forms of machinery for the manufacture of iron and steel, principally appliances for drawing iron and steel bars for shafting and finishing rods. Mr. Billings is a member of the American institute of mining engineers, and has contributed papers to its transactions, among which is "The Properties of Iron alloyed with other Metals" (1877).

BILLINGS, Hannatt, architect, d. in Boston, 14 Nov., 1874. He lived in Boston for many years, and designed numerous churches and public buildings throughout the United States. He was an artist of versatile talent and refined taste, and executed decorative designs and drew illustrations for books, besides making plans for buildings and monuments. The Pilgrim "at the house of the great organ in Boston music-hall, are after his designs. Many bookcovers were designed by him. He made in sepia a noted drawing called the "Enchanted Monk."

BILLINGS, John Shaw, surgeon, b. in Switzerland, Ind., 12 April, 1838. He was graduated at Miami University in 1857, and at the Ohio Medical College in 1861. He served in Cincinnati, but in November, 1861, he was appointed acting assistant surgeon in the U.S. army. Until March, 1863, he was assistant surgeon, having charge of hospitals in Washington, D. C., and West Philadelphia. He then served with the Army of the Potomac, being with the 5th corps at the battles of Fredericksburg and Chancellorsville. In October, 1863, till February, 1864, he served on Hospital duty at David's and Bedlow's islands in the vicinity of New York city, also acting as a member of the board of enrollment, after which he became medical inspector to the Army of the Potomac, and from December, 1864, was connected with the surgeon-general's office in Washington, remaining till 1867. He returned to the South with the rank of major, in the regular army. He is also medical adviser of the Johns Hopkins Hospital, and lecturer on municipal hygiene at the Johns Hopkins University. Dr. Billings is a member of numerous scientific societies, including the American Medical Association and the National Academy of Sciences. He is an honorary member of the Statistical Society of London. During 1879-80 he was vice-president of the National Board of Health, and in 1881 he received the honorary degree of L.L. D. from the University of Edinburgh. During August, 1886, he was present at the meeting of the British Medical Association, and delivered an important address on "medicine in the United States." His contributions to the periodical literature of medicine are numerous, and he has also published reports on "Barracks and Hospitals" (War Department, Washington, 1870); "The Hygiene of the U.S. Army" (1875); and "Mortality and Vital Statistics of the United States" (Census Reports, 1880). His great literary works are "History of the Library of the Surgeon-General's Office," U. S. army (Washington, 1880-85), in 16 large quarto volumes, which contain the bibliography of every medical subject; also a companion index volume of abbreviations (1885). He was appointed in January, 1896, director of the New York Public Library, and was elected President in 1899. He assembled at Irkusk in February, 1786, in two vessels it explored the coasts of Siberia and Alaska.
and the interjacent seas and islands, returning after nine years. See "An Account of a Geographical and Astronomical Expedition to the Northern Parts of Russia, performed by Commodore Joseph Billings," from the papers of Martin Sauer, secretary to the expedition (London, 1802).

BILLINGS, Josh, See Shaw, Henry Wheeler.

BILLINGS, William, composer, b. in Boston, Mass., 7 Oct., 1746; d. there, 26 Sept., 1800. He was a tanner by trade, and afterward became a teacher. He was the earliest of American composers, and introduced in New England the lively and spirited style of devotional music. This was already in vogue in England; but the long passion of Billings for compositions, it came to be called in derision, the Yankee style. Although deficient in technical requirements, his compositions were superior in melody to the airs of Tansur and other English composers in the same style. The introduction of his airs, which contained many fugues and melodious phrasing in the bass and intermediate parts that were often contrary to correct principles of harmony, necessitated the cultivation of the art of singing, which was entirely neglected so long as the music sung in the congregations was confined to a few slow, simple, old sacred melodies. Billings wrote the words to many of his tunes. He was a zealous patriot, and during the revolution produced a number of patriotic pieces, including "Patriotism over Boston," "Retrospect," "Independence," and "Columbia," as well as verses set to the air of "Chester," which were popular in the camps of the revolutionary army. He published "The New England Psalm-Singer, or American chorister, containing a Number of Psalm-Tunes, Anthems, and Spiritual Songs," in which American beauty, which was contained in it were deficient not only in harmony, but in melody, and especially in accent. In 1778 he issued "The Singing-Master's Assistant," professing to be an abridgment of the former work, in which the greater part of the tunes was omitted, and those retained were improved in melody and accent. This collection grew to be very popular, and was known as "Billings's Best." In 1779 he published "Music in Miniature," containing thirty-two tunes from his previous books, eleven old European tunes, and thirty-one new and original compositions. In 1781 appeared "The Psalm-Singer's Amusement," which became exceedingly popular. His second volume contained "Fourteen Harmony\" (1786); "The Continental Harmony" (1794); and anthems entitled "Except the Lord Build the House," "Mourn, Mourn, ye Saints," "The Lord is Risen from the Dead," and "Jesus Christ is Risen from the Dead."

BILLING, Hiram, missionary, b. in Bennington, Vt., in 1789; d. in New Haven, Conn., 11 Nov., 1869. He was graduated at Middlebury college in 1816, and at Andover seminary in 1819, being ordained as a Congregational minister the same year. Having a strong desire to carry the gospel to the Sandwich islands, he offered his services to the American Board and received an appointment in 1819. He was stationed on the island of Oahu at Honolulu, which soon became the permanent seat of government, and the chief resort of whaling and other ships of the North Pacific. His labors for twenty years gave him a strong influence over the rulers of the islands. In 1841 he returned to the United States.

BILLING, John Armor, b. in Mercer, Pa., in 1815. He passed two years in a printing-office, and then entered Franklin college, Ohio, but left, on account of his health, before graduation. He was admitted to the bar in 1840, was district attorney for Tuscarawas co., Ohio, from 1846 till 1849, was elected to the U. S. Senate, and received an appointment in 1854, and re-elected three times, sitting from 1855 till 1863. He prepared in the 34th Congress the report on the contested Illinois elections, and in 1862 was chairman of the managers of the house in the impeachment of Judge Humphreys for high treason. He failed of re-election in 1864, and was appointed by President Lincoln judge-advocate in the army, and later the same year solicitor of the court of claims. He was special judge-advocate in the trial of the assassins of President Lincoln. In 1865 he returned to Congress, and sat until 1873, serving on the committees on military affairs, freedmen, and reconstruction, and in the 40th Congress as chairman of the committees on claims and judiciary, and as one of the managers in the impeachment trial of President Johnson. On 3 May, 1873, he received the appointment of minister to Japan, which post he held until 1885, when he was recalled by President Cleveland.

BILLINGHAM, Judson David, soldier, b. at Maumee Springs, St. Lawrence co., N. Y., 16 May, 1831. He was appointed to West Point from Indiana, and graduated in 1854. He took part in the suppression of John Brown's raid at Harper's Ferry in 1859, and during the civil war served in charge of trains to New Brunswick, and was a member of the house of assembly and of the provincial council there. He claimed the office of administrator of the government in 1823, on the death of Gov. Smythe, but was unsuccessful.

BILLINGHAM, Hiram, missionary, b. in Bennington, Vt., in 1789; d. in New Haven, Conn., 11 Nov., 1869. He was graduated at Middlebury college in 1816, and at Andover seminary in 1819, being ordained as a Congregational minister the same year. Having a strong desire to carry the gospel to the Sandwich islands, he offered his services to the American Board and received an appointment in 1819. He was stationed on the island of Oahu at Honolulu, which soon became the permanent seat of government, and the chief resort of whaling and other ships of the North Pacific. His labors for twenty years gave him a strong influence over the rulers of the islands. In 1841 he returned to the United States.
and supplies of Gen. Banks's command in Maryland in 1861, of the quartermaster's depot at Nashville, Tenn., in 1862-3, and as chief quartermaster of the Army of the Tennessee. He took part in the siege of Vicksburg and in the invasion of Georgia. On 9 April, 1863, he was brevetted brigadier-general for faithful and meritorious services during the rebellion. After the war he was successively chief quartermaster of the department of the lakes, assistant quartermaster-general at Washington, being in charge of the bureau a part of the time, as commissioner to audit the Kansas war accounts, and as chief quartermaster with the rank of lieutenant-colonel at the headquarters of the division of the Pacific and the department of the Missouri, and from 4 June, 1886, at Chicago, Ill., as chief quartermaster of the division of the Missouri.

BINGHAM, Kinsley S., senator, b. in Camillus, N. Y., 16 Dec., 1808; d. at Oak Grove, Mich., 5 Oct., 1861. He received a common-school education, and was clerk in a lawyer's office for three years. In 1833 he emigrated to Michigan and settled upon a farm. In 1837 he was elected to the Michigan legislature, continued during eight years a member of that body, and for three years as speaker. In 1849 he was elected a representative in congress, and served on the committee of commerce. In 1854 he was elected governor of the state, and in 1856 was chosen U. S. senator.

BINGHAM, William, senator, b. in Philadelphia, Pa., in 1751; d. in Bath, England, 7 Feb., 1804. He was graduated at Philadelphia college in 1768, went as agent for the continental congress to Martinique, and afterward was consul at St. Pierre. In 1787-8 he was a delegate in the old congress from Pennsylvania. In 1785 he was elected a senator, and served till 1801, when he became president of the senate pro tempore. He was a strong supporter of President Adams. In 1793 he purchased, for $250,000, more than 2,000,000 acres in Maine, which he described in a pamphlet published the same year. In 1794 he published a "Letter from an American on the Subject of the Restraining Proclamation."—His wife, Anne Williamson Bingham, was distinguished in Philadelphia by her beauty, elegance of manners, and the magnificient hospitality which the means of her husband, who was at that time the wealthiest citizen of Pennsylvania, permitted her to dispense. The accompanying portrait is after Gilbert Stuart.—Their eldest daughter, Anne Louisa, who died in 1848, married, in Philadelphia, 23 Jan., 1781, Alexander Baring, afterwards Comte de Baring, and for her second husband Henry Baring, brother of Lord Ashburton, and for her third the Marquis de Blaisse.

BINGHAM, William, educator, b. in North Carolina in 1831. He was graduated at the University of North Carolina in 1856, and succeeded to the management of a classical school at Mebaneville, Alamance co., N. C., which had been conducted with success by his father and grandfather. He has published "A Grammar of the Latin Language"; "A Grammar of the English Language"; and "Cesar's Commentaries, with Notes and a Vocabulary."—BINGEY, Amos, merchant and naturalist, b. in Boston, Mass., 18 Oct., 1803; d. in Rome, Italy, 18 Feb., 1847. He was graduated at Brown in 1821, and obtained a medical diploma in 1826, but engaged with success in commercial pursuits, devoting his leisure to natural science. He was a founder of the Boston society of natural history, and was its president from 1843 until his death, and was active in establishing the American association of geologists and naturalists. As a member of the Massachusetts legislature he was instrumental in securing the appointment of the zoological and botanical commissions, which resulted in the valuable reports of Harris, Emerson, Storer, and Gould on invertebrate animals, and invertebrate animals. To the "Journal" and "Proceedings" of the Boston society of natural history he contributed many scientific papers. He devoted many years to the study of American mollusks, and spent a large amount of money in preparing a treatise on the subject of land mollusks, including several species hitherto unknown, and published by him in other regions, and employing skilful artists to make drawings and engrave plates. His "Terrestrial and Air-Breathing Mollusks of the United States" was published under the direction of Dr. A. A. Gould (Boston, 1847-51). His son, W. G. Binge, became known as a conchologist.

BINNEY, Horace, lawyer, b. in Philadelphia, Pa., 4 Jan., 1780; d. there, 12 Aug., 1857. He was of English and Scotch descent. His father was a surgeon in the revolutionary army. In 1788, the year after his father's death, he was placed in a classical school at Bordentown, N. J., where he continued his studies, and by himself especially by his attainments in Greek. In July, 1793, he entered the freshman class of Harvard, and at graduation in 1797 he divided the highest honor with a single classmate. He had acquired the art and habit of study, and a love for it which never abated until the close of his life. This art he ever regarded as his most valued acquisition, and gradually, in the face of a competition with eminent lawyers, such as no other bar in the country ever faced. He was admitted to the bar in 1797, and an acknowledged leader. In 1806 he was sent to the legislature of the state, in which he served one year, declining a re-election. So early as 1807 his professional engagements had become extremely large, and before 1815 he was in the enjoyment of all that the legal profession could give, whether by reports for the profession or the courts, or by abridgments or reports of acts. In 1814 he prepared and published the six volumes of reported decisions of the supreme court of Pennsylvania that
bear his name. They are among the earliest of American reports, and are regarded as almost perfect models of legal reporting. Soon after 1830 Mr. Binney's health began to be impaired, and he desired to withdraw from the courts, and throw off the business that oppressed him. It was this, in part, that made him willing to accept a nomination for Congress; but there was doubtless another reason that influenced him—the hostility of President Jackson. He accepted a nomination for Congress; but there was doubtless another reason that influenced him—the hostility of President Jackson.

Mr. Binney was closely associated, while his ability, combined with his well-known knowledge of the condition and operations of the bank, pointed him out as the fittest man to defend the institution in Congress. He accepted a nomination, and was elected to the 23d Congress. True to the interest of his subjects, notably that of the removal of the public deposits from the United States bank, he proved himself to be a statesman of high rank and an accomplished debater. But official life was distasteful to him, and he declined a re-election. On his return to Philadelphia he refused all professional engagements in the courts, though he continued to give written opinions upon legal questions until 1850. Many of these opinions are still preserved. They relate to titles to real estate, to commercial questions, to trusts, and to the most abstruse subjects in every department of the law. They are model exhibitions of profound and accurate knowledge, of extensive research, of nice discrimination, and wise conclusion. They are accepted as of almost equal authority with judicial decisions. Once only after 1836 did Mr. Binney appear in the courts. In 1844, by appointment of the city councils of Philadelphia, he argued in the supreme court of the United States the case of Bidal v. Girard's executors, in which was involved the validity of the trust created by Mr. Girard's will for the establishment and maintenance of a college for orphans. The argument is in print, and it is still the subject of admiration by the legal profession in this country, and almost equally so by the profession in Great Britain. It lifted the law of charities out of the depths of confusion and obscurity that had covered it, and while the fullness of its research and the vigor of its reasoning were masterly, it was clothed with a precision and a beauty of language never surpassed. The argument was a fitting close to a long and illustrious professional life. Mr. Binney had a fine, commanding person, an uncommonly handsome face, a dignified and graceful, a persuasive voice, perfectly under his control, and modulated with unusual skill. In fine, he was in all particulars a most accomplished lawyer. No words can better describe him than those which he applied to a great man, the friend of his early manhood: "He was an advocate of great power; a master of every question in his causes; a wary tactician in the management of them; highly accomplished in language; a faultless logician; a man of the purest integrity and the highest honor; illuminated without the least volition, an indifferent degree that left every one's patience and attention unimpaired, and perspicuous to almost the lowest order of understanding, while he was dealing with almost the highest topics." If it be added to this that his mental power was equal to the comprehension of any legal subject, that his mode of presentation was perfect and that his rhetoric was faultless, that he had an aptness of illustration that illuminated the most abstruse subjects, and a personal character without a visible flaw, it will be seen that he must have been, as he was, a most persuasive and convincing advocate. In 1827, by invitation of the bar of Philadelphia, he delivered an address on the life and character of Chief Justice Tazman; and in 1835, complying with a request of the select and common councils of the city, an address on the life and character of Chief Justice Marshall. Until the close of his life he was a constant reader and an indefatigable student. He kept himself well informed of current events, and was not only a connoisseur of books, but a writer. He published a great many articles, not only some excellent work, but many others which were highly admired. He also in 1838 gave to the press a more extended discussion, entitled "An Inquiry into the Formation of Washington's Farewell Address," strikingly illustrative of the character of his own mind, and of his habits of investigation and reasoning. And in 1862 and in 1863 he published three pamphlets in support of the order claimed by President Lincoln to suspend the writ of habeas corpus. His argument was not less remarkable than the best of his earlier efforts. Throughout his life Mr. Binney manifested a deep interest in many literary, scientific, and art institutions of Philadelphia, and in many of the noblest charities. He was also an earnest Christian, a deacon of the Episcopal Church, and a member of its vestry, and often a leading member of its conventions. The activity of his mind remained undiminished until his death. This occurred forty years after the age when most men are at the zenith of their reputation, forty years after he had substantially retired from public view and from participation in all matters that attract public notice, and at the end of a period when public recollection of most lawyers has faded into indistinctness.

—His son, Horace, Jr., lawyer, b. in Philadelphia, 21 Jan., 1809; d. there, 3 Feb., 1870, was graduated at Yale in 1828, studied law with his father, and practised his profession in his native city from his admission to the bar in 1831, confining himself mostly to chamber consultations. In early life he took a deep interest in municipal politics. He was president of the Philadelphia associates of the sanitary commission, founder of the union league of that city, and president of the association at the time of his death. A memoir of Mr. Binney, read before the American Historical Association, in May, 1870, by Charles J. Stillé, has been published.

BIENNS, John, journalist, b. in Dublin, Ireland, 22 Dec., 1772; d. in Philadelphia, Pa., 16 June, 1860. He received a good education, but, becoming involved in the revolutionary movement in Ireland,
was arrested, and for two years imprisoned. Soon after his release in 1801 he went to Baltimore with his brother Benjamin, and in March, 1802, founded at Northumberland, Pa., the "Republican Argus," which gave him great influence with the democratic party. From 1807 until November, 1829, he conducted, at Philadelphia, the "Gazette of the United States," the leading paper in the state until, in 1824, it opposed the election of Jackson. He was for twenty years an alderman of Philadelphia. In 1854 he published "Recollections of the Life of John Binns: Twenty-nine Years in Europe, and Fifty-three in the United States." He was also the author of "Philadelphia in the Year 1747" (1817).

BIRCH, Thomas, artist, b. in London, England, about 1739; d. in Philadelphia, Pa., 22 Jan., 1854. He emigrated to the United States in 1763, established himself in Philadelphia about 1800, and began the painting of portraits. A visit to the capes of Delaware in 1807 turned his attention to marine views, in which he acquired a high reputation. During the war of 1812 he executed a series of historical paintings, representing the naval victories of the United States. He also painted landscapes, particularly snow scenes. The Harrison collection in Philadelphia contains his paintings of the engagements between the "United States" and the "Macedonian," and between the Constitution "and the Shannon." Three of his marine views are in the Claghorn collection.

BIRD, Robert Montgomery, novelist, b. in Newcastle, Del., 6 Feb., 1805; d. in Philadelphia, Pa., 22 Jan., 1854. He was educated for the medical profession, and, after taking his diploma in Philadelphia, practised for one year, but early turned his literary art to account. He contributed to the "Monthly Magazine" of Philadelphia, and wrote three tragedies—"The Gladiator," "Orloosa," and "The Broke of Bogota"—all of which have been popular on the stage, especially the first, the principal character of which was one of the favorite personations of Edwin Forrest. His first novel, "The Infidel," appeared in 1814, and was succeeded by "The Hawk's Hollow" (Philadelphia, 1835), the scene of which, as well as that of his first story, was in Mexico at the time of the Spanish conquest; "The Hawks of Hawk Hollow"; "Sheppard Lee"; "Nick of the Woods" (1837), the scene of which is laid in Kentucky about the close of the revolution; and "Peter Pilgrim" (1838), a collection of tales and sketches, and "Xing one of the earliest descriptions of the Mammoth Cave; and "Red Day" (1839). They are marked by picturesqueness of description, and an animated narration. In 1833 Dr. Bird retired to his native village, but for a few years previous to his death edited the "North American Gazette" at Philadelphia, of which he became a joint proprietor. His son, Malcon H. Bird, b. in Philadelphia, Pa., 28 June, 1828, was graduated at the university of Pennsylvania in 1857, and at the union theological seminary in New York in 1860, was ordained as a Lutheran minister, and served during the civil war as a chaplain in the army. He took orders in the Protestant Episcopal church in 1858, and became rector in Spotswood, N. J., in 1860, and subsequently in Indiana and Iowa. In 1881 he accepted the professorship of psychology, Christian evidence, and rhetoric in Lehigh university. He collected a large hymnological library, and was the main editor of the "Lutheran Hymn-Book" (Baltimore, 1864), and collaborator with Bishop Edenheim in "Hymns of the North" (New York, 1871). He has published "Charles Wesley seen in his Finer and Less Familiar Poems" (1866), and a series of articles on hymn writing, which appeared in the New York "Independent" in 1886 and previous years.

BIRDSALL, William Randall, physician, b. in Greene, N. Y., 1 Jan., 1832; d. in New York, 7 June, 1892. He was graduated in medicine at the university of Michigan, entered upon practice in New York the following year, and subsequently studied medicine in Europe, and after his return was engaged as a clinical teacher on nervous diseases. Besides articles in medical journals and cyclopædias, he wrote "Electro-Therapeutics and Electro-Diagnosis."

BIRGE, Edward Asahel, naturalist, b. in Troy, N. Y., 7 Sept., 1831. He was educated at the Troy high school, and in 1851 entered the office of W. A. Buckingham, with the view of becoming a military engineer. In 1873, after which he studied at Harvard, where, in 1878, he received the degree of Ph. D. In 1875 he was appointed instructor of natural history and zoology in the University of Wisconsin, and subsequently became professor in that department. He has contributed papers to scientific journals, and edited the revision of Prof. James Orton's "Comparative Zoology" (New York, 1882), and also wrote the article on "Entomostoma" in the "Standard Natural History" (Boston, 1884).

BIRGE, Henry Warner, soldier, b. in Hartford, Conn., 25 Aug., 1823; d. in New York city, 1 June, 1888. When the civil war began he was an aide on the staff of Col. Z. B. Chandler. On the day of the president's first call for troops (15 April, 1861) he began organizing the first regiments of Connecticut's quota. On 23 May he was appointed major of the 4th Connecticut volunteers, which was the first "three-years' regiment" of state troops mustered into the service of the United States. He served in Maryland and Virginia until November, 1862, at which time he became major of the 13th Connecticut infantry; joined Gen. Butler's army in New Orleans in March, 1862, and was placed in command of the defences of the city. In September he commanded his regiment in a movement in the La Fourche district, and in December, when Gen. Butler was succeeded by Gen. Banks, he was assigned to a brigade, which commanded through the first Red river campaign and the siege of Port Hudson (April to July, 1863). Before the surrender of this stronghold Gen. Birge volunteered to organize and lead a volunteer battalion to carry the confederate works by assault. Such was his reputation among the rank and file that his own regiment, the 13th, followed in his footsteps, and the full complement of 1,000 men was ready within two days. The assault was planned for the night of 10 July, but the news of the fall of Vicksburg was received, and Port Hudson surrendered 8 July, 1863. He was promoted brigadier-general 9 Sept., 1863. In 1864 he accompanied the second Red river expedition, and after the evacuation of Beaumont the Mississippi, Red River, and Cane river, returned to Alexandria and was sent to take command at Baton Rouge, La., which post was threatened by the Confederates. In July, 1864, he was ordered north with the 2d division of the 19th corps, joining Gen. Sheridan in the Shenandoah valley in August, and being present in all the battles of the ensuing campaign. In February and March, 1865, he was in command of the defences of Savannah, Ga., where he remained until November, when he resigned his commission. His services were recognized by the brevet of major-general of volunteers, and by a vote of thanks from the legislature of his native state.

BIRKBECK, Morris, (1755-1821), a painter, b. in England; d. in 1825. He purchased 16,000 acres of land in Illinois, founded the town of New Albion, and resided there. When the state was organized in
1818, he opposed the introduction of slavery into it. He was the author of "Notes on a Journey through France" (1815) and "Notes on a Journey in America" (1818), in which he gave sanguine accounts of Illinois, and of "Letters from Illinois" (1818). He was drowned while returning from a visit to Robert Owen at New Harmony, Ind.

BIRNEY, James Gillespie, statesman, b. in Danville, Ky., 4 Feb., 1792; d. in Perth Amboy, N. J., 25 Nov., 1857. His ancestors were Protestants of the province of Ulster, Ireland. His father, migrating to the United States at sixteen years of age, settled in Kentucky, became a wealthy merchant, manufacturer, and farmer, and for many years was president of the Danville bank. His mother died when he was three years old, and his early boyhood was passed under the care of a pious aunt. Giving promise of talent and force of character, he was liberally educated with a view to his becoming a lawyer and statesman. After preparation at good schools and at Transylvania university he was sent to Princeton, where he was graduated with honors in 1810. Having studied law for three years, chiefly under Alexander J., Dallas, of Philadelphia, he returned to his native place in 1814 and began practice. In 1816 he married a daughter of William McDowell, judge of the U. S. circuit court, and one of several brothers who, with their relatives, connections, and dependents, were the most influential family in Kentucky. In the same year he was elected to the legislature, in which body he opposed and defeated in its original form a proposition to demand of the states of Ohio and Indiana the enactment of laws for the seizure, imprisonment, and delivery to owners of slaves escaping into their limits. His education in New Jersey and Pennsylvania at the time when the gradual emancipation laws of these states were in operation had led him to a notion that solution of the slavery problem. In the year 1818 he removed to Alabama, bought a cotton plantation near Huntsville, and served as a member of the first legislature that assembled under the constitution of 1819. Though he was not a member of the convention that framed the instrument, it was chieflly through his influence that a provision of the Constitution, empowering the general assembly to emancipate slaves on making compensation to the owners, and to prohibit the bringing of slaves into the state for sale, was copied into it, with amendments designed to secure humane treatment for that unfortunate class. In the legislature he voted against a resolution of honor in the name of the slaves, signed his reasons in a forcible speech, which placed him politically in a small minority. In 1823, having found planting unprofitable, partly because of his refusal to permit his overseer to use the lash, he resumed at Huntsville the practice of his profession, was appointed solicitor of the northern circuit, and soon gained a large and lucrative practice. In 1826 he made a public profession of religion, united with the Presbyterian church, and was from afterward a devout Christian. About the same time he became a member of the American colonization society, regarding it as preparing the way for gradual emancipation. In 1827 he procured the enactment by the Alabama legislature of a statute "to prohibit the importation of slaves into this state for sale or hire." In 1828 he was a candidate for presidential elector on the Adams ticket in Alabama, canvassed the state for the Adams party, and was regarded as its most prominent member. He was repeatedly elected mayor of Huntsville, and was recognized as the leader in educational movements and local improvements. In 1830 he was deputed by the trustees of the state university to select and recommend to them five persons as president and professors of that institution, also by the trustees of the Huntsville female seminary to select and employ three teachers. In the performance of these trusts he spent several months in the Atlantic states, extending his tour as far north as Massachusetts. His selections were approved. Returning home by way of Kentucky, he learned that a bill had been on terms of friendship and political sympathy, and urged that statesman to place himself at the head of the gradual emancipation movement in Kentucky. The result of the interview was the final alienation in public matters and politics of the parties to it, though their friendly personal relations remained unchanged. He did not support Mr. Clay politically after 1830 or vote for him in 1832. For several years he was the confidential adviser and counsel of the Cherokee nation, an experience that led him to sympathize with bodies of men who were wronged under color of law. In 1831 he had become so sensible of the evil influences of slavery that he determined to remove his large family to a free state, and in the winter of that year visited Illinois and selected Jacksonville as the place of his future residence. Returning to Alabama, he was winding up his law business and selling his property with a view to removal, when he received, most unexpectedly, an appointment as consul to the American republic as its agent for the southwest. From motives of duty he accepted and devoted himself for one year to the promotion of the objects of that society. Having become convinced that the slaveholders of the Gulf states, with few exceptions, were hostile to the idea of emancipation in the future, he lost faith in the efficacy of colonization in that region. In his communications about that time with southern politicians and men of influence he learned enough to satisfy him that, although the secret negotiations in 1829 of the Jackson administration for the purchase of Texas had failed, the project of annexing that province to the United States and forming several slave states out of its territory was urged; that a powerful combination existed at the south for the purpose of sending armed adventurers to Texas; and that southern politicians were united in the design to secure for the south a majority in the U. S. Senate. The situation seemed to him to portend the permanence of slavery, with grave danger of civil and disunion. Resigning his agency and relinquishing his Illinois project, he removed in November, 1833, to Kentucky for the purpose of separating it from the slave states by effecting the adoption of a system of gradual emancipation. He thought its example might be followed by Vir-
ginia and Tennessee, and that thus the slave states would be placed in a hopeless minority, and slavery in process of extinction. But public opinion in his native state had greatly changed since he had left it; the once powerful emancipation element had been weakened by the opposition of political leaders, and especially of Henry Clay. His efforts were sustained by very few. In June, 1834, he set free his own slaves and severed his connection with the colonization society, the practical effect of which, he had found, was to afford a pretext for postponing emancipation indefinitely. From this time forth he sustained himself with unswerving and admirable advocacy in Kentucky of the cause of slavery. On 19 March, 1835, he formed the Kentucky anti-slavery society, consisting of forty members, several of whom had freed their slaves. In May, at New York, he made the principal speech at the meeting of the American anti-slavery society, and thenceforward he was identified with the Tappans, Judah, William, Jay, Theodore Weld, Alvan Stewart, Thomas Morris, and other northern abolitionists, who pursued their object by constitutional methods. In June, 1835, he issued a prospectus for the publication, beginning in August, of an anti-slavery weekly paper, at Danville, Ky.; but before the time fixed for issuing the first number, he was arrested and put under prohibitions and persecutions, directed against the opponents of slavery, set in. This was contemporaneous with the renewed organization of revolts in Texas; the beginning of the war for breaking up the refuge for fugitive slaves, waged for years against the Florida Seminoles; and the exclusion, by connivance of the postmaster-general, of anti-slavery papers from the mails. In a few months only, President Jackson's message recommending not only the refusal of the use of the mails, but the passage of laws by congress and also by the non-slaveholding states for the suppression of "incendiary" (anti-slavery) publications, Mr. Birney found it impossible to obtain a publisher or printer; and as his own residence in Kentucky had become disagreeable and dangerous, he removed to Cincinnati, where he established his paper. His press was repeatedly destroyed by moles; but he met all opposition with courage and succeeded finally in maintaining the freedom of the press in Cincinnati, exhibiting great personal courage, firmness, and judgment. On 22 Jan., 1836, a mob assembled at the door of his house in the purpose of destroying his property and seizing his person; the city and county authorities had notified him of their inability to protect him; he attended the meeting, obtained leave to speak, and succeeded in defeating its object. As an editor, he was distinguished by a thorough knowledge of his subject, and his views, careful and forcible, were as a jurist and statesman. The "Phalanx

Having associated with him as editor Mr. Gannill Bailey, he devoted most of his own time to public speaking, visiting in this work most of the cities and towns in the free states and also through the opposition of political leaders, the object was to awaken the people of the North to the danger menacing the freedom of speech and of the press, the trial by jury, the system of free labor, and the national constitution, from the encroachments of the slave-power and the plotted annexation of new slave states in the southwest. In consideration of his prominence as an anti-slavery leader, the executive committee of the American anti-slavery society unanimously elected him, in the summer of 1837, to the office of secretary. Having accepted, he removed to New York city, 20 Sept., 1837. In his new position he was the executive officer of the society, conducted its correspondence, selected and employed lecturers, directed the organization of auxiliaries, and prepared its reports. He attended the principal anti-slavery conventions, and his wise and conservative counsel had a marked influence on their action. He was faithful to the church, while he exposed and rebuked the ecclesiastical bodies that sustained slavery; and true to the constitution, while he denounced the constructions that severed it from the principles of independence, of the American anti-slavery society, the constitution of which recognized the duty of using both moral and political action for the removal of slavery. In the beginning of the agitation the abolitionists voted for such anti-slavery candidates as were nominated by the American anti-slavery society; but as the fight under the aggressive action of the slave power, to include the right of petition, the freedom of speech and of the press, the trial by jury, the equality of all men before the law, the right of the free states to legislate for their own territory, and the right of congress to exclude slavery from the territories, the old parties ceased to nominate anti-slavery candidates, and the abolitionists had to make independent nominations for state officers and congress, and finally to form a national and constitutional party. Mr. Birney was their first and only choice as candidate for the presidency. During his absence in England, in 1840, and again in 1844, he was unanimously nominated by national conventions of the liberty party. At the former election he received 7,339 votes; and at the latter, 62,263. This number, it was claimed by his friends, would have been much larger if the electioneering agents of the whig party had not circulated, three days before the election and too late for denial and exposure, a forged letter purporting to be from Mr. Birney, announcing his withdrawal from the canvass and advising anti-slavery men to vote for Mr. Clay. This is known as "the Garland forgery." Its circulation in Ohio and New York probably gave the former state to Mr. Clay, and greatly diminished Mr. Birney's vote in the latter. In its essential doctrines the platform of the liberty party in 1840 and 1844 was identical with those that were adopted by the American anti-slavery society, and by northern Whigs, American reformers and republicans. In the summer of 1845 Mr. Birney was disabled physically by partial paralysis, caused by a fall from a horse, and from that time he withdrew from active participation in politics, though he continued his contributions to the press. In September, 1839, he emancipated his wife, Matilda, of twenty years marriage, by a deed of gift, setting off to his co-heir $29,000, in compensation for her interest in them. In 1839 Mr. Birney lost his wife, and in the autumn of 1841 he married Miss Fitzhugh, sister of Mrs. Gerrit Smith, of New York. In 1842 he took up his residence in Bay City, Mich. In person he was of medium height, robust in frame, and his countenance and presence were those of a polished man of the world, free from eccentricities, and marked with dignity. He had neither vices nor
BISHOP

bad habits. As a presiding officer in a public meeting he was said to have no superior. As a public speaker he was generally calm and judicial in tone; but when under strong excitement he rose to eloquence. His chief writings were as follows: "Ten Letters on Slavery and Colonization," addressed to R. R. Gurley (the first dated 12 July, 1832, the last 11 Dec., 1833); "Six Essays on Slavery and Colonization," published in the Huntsville (Ala.) "Advocate" (May, June, and July, 1833); "Letter on Colonization," resigning vice-presidency of Kentucky colonization society (15 July, 1833); "Ten Letters on Slavery and Colonization" (1833); "Addresses and Speeches" (1835); "Vindication of the Abolitionists" (1835); "The Philanthropist," a weekly newspaper (1836 and to September, 1837); "Letter to Col. Stone" (May, 1836); "Address to Slaveholders" (October, 1836); "Argument on Fugitive Slave Case" (1837); "Letter to F. H. Elmore," of South Carolina (1839); "Political grades to this rank of Abolitionists" (1839); "Report on the Duty of Political Action," for executive committee of the American anti-slavery society (May, 1839); "American Churches the Bulwarks of American Slavery" (1840); "Speeches in England" (1840); "Letter of Acceptance"; "Articles in Q. A. S. Magazine and Emancipator" (1857-44); "Hon. Arthur S. Buchanan," Maine (1855). His daughter, Anna, singer, b. in London, England, in 1814; d. in New York city, 18 March, 1884. She was the daughter of a singing-master named Riviere, studied the piano-forte under Moscheles, became distinguished for her singing, in 1831 became the wife of the composer Sir Henry Rowley Bishop, and took a prominent part in the oratorio and country festivals in England. On the advice of the harpist Bochsa, she cultivated Italian music, and, with him in 1836, she sang in the principal cities of the continent till 1843, and then in Italy, where she achieved success as an operatic singer. In 1846 she returned to England, and in 1847 crossed the Atlantic and sang with great applause in the United States, Canada, and Mexico. In 1853, while making a tour in Australia, Bochsa, her companion, died. After her return to the United States she married Martin Schultz, a merchant of New York. She continued to sing in American cities, where her high and flexible soprano voice was highly appreciated, and made various tours to Australia, China, the East Indies, and Spanish-American countries. In February, 1866, on a voyage from Honolulu to China, the vessel was wrecked on a coral reef, and she suffered forty days of privation, but reached the Ladrone islands in safety, whence she embarked for Manila and sang there and in China, although her wardrobe and jewelry were lost. In 1868 she lost her voice and retired from the concert stage.

1861. He was promoted successively to brigadier- and major-general of volunteers, and distinguished himself in the battles of Yorktown, Williamsburg, the second battle of Bull Run, Fredericksburg, Chancellorsville, and Gettysburg. After the death of Gen. B. H.劈on, who commanded the division, receiving his commission as major-general, 23 May, 1863. He commanded the 3d corps at Gettysburg, after Gen. Sickles was wounded, and on 23 July, 1864, was given the command of the 10th corps. He died of disease contracted in the service.—A fifth son, Fitzhugh, died, in 1864, of wounds and disease, in the service with the rank of colonel.—A grandson, James Gillespie, was lieutenant and captain of cavalry, served as staff officer under Custer and Sheridan, was appointed lieutenant in the regular army at the close of the war, and died soon afterward of disease contracted in the service.

BISCACCIANI, Eliza (Ostinelli), vocalist, b. in London, 1825. Louis Ostinelli, her father, leader of orchestras, married, in April, 1822, the daughter of Mr. Hewett, a musical composer of Boston. Eliza went to Italy in 1843, studied under the best masters, married Signor Biscaccianti, also a musician, and in May, 1847, made her first appearance at Milan with success. She made her début in America at the Astor place opera-house, New York, in January, 1854, for the benefit of the Edinburgh University, in 1 March, 1848, at the Chestnut street theatre, as Lucia. She sang in the principal cities of the United States with success, and became an especial favorite in California.

BISHOP, Anna, singer, b. in London, England, in 1814; d. in New York city, 18 March, 1884. She was the daughter of a singing-master named Riviere, studied the piano-forte under Moscheles, became distinguished for her singing, in 1831 became the wife of the composer Sir Henry Rowley Bishop, and took a prominent part in the oratorio and country festivals in England. On the advice of the harpist Bochsa, she cultivated Italian music, and, with him in 1836, she sang in the principal cities of the continent till 1843, and then in Italy, where she achieved success as an operatic singer. In 1846 she returned to England, and in 1847 crossed the Atlantic and sang with great applause in the United States, Canada, and Mexico. In 1853, while making a tour in Australia, Bochsa, her companion, died. After her return to the United States she married Martin Schultz, a merchant of New York. She continued to sing in American cities, where her high and flexible soprano voice was highly appreciated, and made various tours to Australia, China, the East Indies, and Spanish-American countries. In February, 1866, on a voyage from Honolulu to China, the vessel was wrecked on a coral reef, and she suffered forty days of privation, but reached the Ladrone islands in safety, whence she embarked for Manila and sang there and in China, although her wardrobe and jewelry were lost. In 1868 she lost her voice and retired from the concert stage.
—Robert Nicholas Charles Bochsra, the musician with whom Madam Bishop eloped, was born in Montmedy, France, in 1789, and was a performer in public upon the piano-forte when seven years of age. He was first harpist in Napoleon's private concerts, and wrote about 150 compositions for the harp in a new and superior style. In 1822 he became "director of the orchestras in London.

BISHOP, George, author, joined the Quakers in 1654, and between 1699 and 1668 published several works on their doctrines. He published in 1661 "New England judged, being a brief Relation of the Sufferings of the Quakers in that part of America from the Beginning of the 5th Month, 1659, to the 10th Month, 1660." His second part appeared in 1667; and both were reprinted in 1763, with "An Answer to Cotton Mather's Abuses," by John Whiting.

BISHOP, Joel Prentiss, author, b. in Volney, Oswego co., N. Y., in 1814. He has published "Commentaries on the Law of Marriage and Divorce." (1859); "Criminal Law" (Boston, 2 vols., 1858-9); "Thoughts Upon the Times" (1863); "Consecration and Slavery" (1864); "Commentaries on Criminal Procedure" (1866); "First Book of the Law" (1868); "Directions and Forms"; "Law of Married Women"; "Statutory Crimes"; "On the Written Laws"; and "Prosecution and Defense," with a general index to the author's series of criminal works, 1853-80.

BISHOP, Levi, lawyer, b. in Russell, Hampden co., Mass., 15 Oct., 1815; d. in Detroit, Mich., 23 Dec., 1881. He received a common-school education, and in 1830 became apprentice clerk in a leather manufactory. He removed to Detroit, Mich., in 1836, and having lost his right arm by an accident in 1837, left his business for the law, and was admitted to the bar in 1842. He was elected justice of the peace in 1842, and from 1846 till 1858 was president of the Detroit board of education. The largest school building in Detroit now bears his name, and he was a regent of the state university from 1857 till 1863. He was a prominent war democrat, urging the suppression of the rebel army of the border, and was the democratic candidate for attorney-general. He was much interested in the early history of the west, organized the Detroit Pioneer Society in 1871, and was its president till his death. He was a delegate to the International Congress of Americanists at Luxembourg, France, in 1878, and in 1877 was appointed historiographer of Detroit. In this capacity he wrote more than fifty historical papers, under the title "Historical Notes." On 15 July, 1880, he was made corresponding member of the Royal Historical Society of Great Britain. Mr. Bishop lectured occasionally on literary topics, and published "The Dignity of Labor," a poem (1844), and "Teuchsa Grindle," a poem in twenty-eight cantos, on the Indian lore of Detroit river (1850). He also translated from the French several historical works concerning the early settlement of the northwest.

BISHOP, Robert Hamilton, clergyman, b. near Edinburgh, Scotland, 26 July, 1777; d. at College Hill, Ohio, 29 April, 1855. He was graduated at the university of Edinburgh in 1797, and came in 1801, at the solicitation of Dr. Mason, to New York city, where he preached a while in a Presbyterian church. He then went as a missionary to the northwest territory, and arrived at Chilicothe in 1802. He became a professor in Transylvania college in 1804. In consequence of difficulties with the Associate Reformed synod, which he had joined upon coming to America, he con- nected himself in 1819 with the central assembly, and accepted the presidency of Miami college in 1824, in which he remained till 1841. He continued there as professor of history and political science until 1844, and after that filled the chair of history and political economy in Farmers' college, near Cincinnati. His writings include "Sermons" (1808); "Memoirs of David Rice" (1824); "Elements of Logick" (1833); "Philosophy of the Bible" (1833); "Science of Government" (1839); and "Western Peacemaker" (1839).

BISHOP, William Darin, commissioner of the patent-office, b. in Bloomfield, N. J., 14 Sept., 1837. He was graduated at Yale in 1849, studied law, and in 1852 was elected by the State of Connecticut, and in 1856 was elected by the State of New York, New Haven, and Hartford railroad co., residing in Bridgeport, Conn.

BISHOP, William Henry, M. E. bishop, b. in 1803; d. in Newark, N. J., 2 July, 1873. He was a preacher in the Zion African Methodist Episcopalian church, but afterward became a bishop in that denomination.

BISHOP, William Henry, author, b. in Hartford, Conn., 7 Jan., 1847. He was graduated at Yale in 1867, and has published a romance entitled "Detmold" (Boston, 1879); "The House of a Merchant Prince," a novel of New York life (1882); "Choy Susan, and other Stories of Travel in China; and "Old Mexico and her Lost Provinces" (New York, 1884); "Fish and Men in the Maine Islands" (1885). He is a frequent contributor to periodical literature. His novels first appeared as serials in the "Atlantic Monthly" or "Harper's Magazine." In 1886 he published seriously in the former periodical a new novel, entitled "The Great Adventurer." He was the democratic candidate for attorney-general. He was much interested in the early history of the west, organized the Detroit Pioneer Society in 1871, and was its president till his death. He was a delegate to the International Congress of Americanists at Luxembourg, France, in 1878, and in 1877 was appointed historiographer of Detroit. In this capacity he wrote more than fifty historical papers, under the title "Historical Notes." On 15 July, 1880, he was made corresponding member of the Royal Historical Society of Great Britain. Mr. Bishop lectured occasionally on literary topics, and published "The Dignity of Labor," a poem (1844), and "Teuchsa Grindle," a poem in twenty-eight cantos, on the Indian lore of Detroit river (1850). He also translated from the French several historical works concerning the early settlement of the northwest.

BISHOP, Richard Hamilton, clergyman, b. near Edinburgh, Scotland, 26 July, 1777; d. at College Hill, Ohio, 29 April, 1855. He was graduated at the university of Edinburgh in 1797, and came in 1801, at the solicitation of Dr. Mason, to New York city, where he preached a while in a Presbyterian church. He then went as a missionary to the northwest territory, and arrived at Chilicothe in 1802. He became a professor in Transylvania college in 1804. In consequence of difficulties with the Associate Reformed synod, which he had joined upon coming to America, he con-
fair at Lyons Creek, U. C., 19 Oct., 1814; in May, 1815, became colonel of the 1st infantry, with the brevet of brigadier-general, and was transferred to the 3d artillery on 16 Jan., 1826.

BISSELL, Joseph, Moulton, engineer, b. in Rochester, N. Y., 12 May, 1818. He was the son of Josiah Bissell, an early settler of Rochester, N. Y., who employed his wealth, derived from land speculations, for benevolent objects, and who established a line of stage-coaches that did not run on Sundays. He was engaged before the civil war in the construction of the first iron-arched bridge and its趁 engineering work. During the war he was colonel of an engineer regiment attached to Gen. Pope's army, and superintended the construction of the canal that enabled the national gun-boats to approach the confederate works on Island No. 10 in Mississippi river. After his return to civil life he took a prominent part in the enterprise of collecting and indexing records of real estate titles, so as to simplify searches, and was engaged in that work in Cincinnati, and afterward in Boston.

BISSELL, Simon B., naval officer, b. in Vermont, 28 Oct., 1808; d. in Paris, France, 18 Feb., 1883. He became a midshipman in the U. S. navy 6 Nov., 1824, and was promoted to be a lieutenant 9 Dec., 1830, and commodore 16 July, 1862; commodore, 10 Oct., 1866. He was attached to the sloop "Albany" during the war with Mexico, and was present at the siege of Vera Cruz. He commanded the sloop "Cyane," Pacific squadron, in 1861-2; was on duty in the navy-yard at Mare island, Cal., in 1862-4; commanded the 2d sloop-of-war "Vera Cruz," in 1866; served on special service in 1869; and was placed on the retired list on 1 March, 1870.

BISSELL, William H., statesman, b. in Hartwick, near Cooperstown, N. Y., 25 April, 1811; d. in Springfield, Ill., 18 March, 1860. He was self-educated, attending school in summer and teaching in the winter; was graduated at Philadelphia medical college in 1833, and practised medicine two years in Steuben co., N. Y., and three years in Monroe co., Ill. He was elected to the Illinois legislature in 1840, and distinguished himself as a forcible and ready debater. He studied law, and practised successfully in Belleville, St. Clair co., and became the prosecuting attorney in 1841. He was a captain in the 2d Illinois militant, and in the Mexican war, and distinguished himself at Buena Vista. He was a representative in congress from Illinois as an independent democrat, serving from 2 Dec., 1839, till 3 March, 1845. He separated from the democratic party on the passage of the Kansas-Nebraska bill, and was chosen governor as a republican in 1856. He was re-elected, and re-elected in office. While he was in congress his resistance of the Missouri compromise involved him in a controversy with the southern democrats, and hot words passed between him and Jefferson Davis on the subject of the bravery of the northern as compared with the southern soldiers, which led to a challenge from Mr. Davis. In accepting the challenge to a duel, Mr. Bissell chose as the weapons muskets, at thirty paces, whereupon the friends of Mr. Davis interfered.

BISSELL, William Henry Augustus, P. E. bishop, b. in Randolph, Vt., 14 Nov., 1814; d. in Burlington, Vt., 14 May, 1893. He was graduated at Vermont university in 1836, and was ordained deacon in 1837, and ordained in office. He was rector of Trinity church, West Troy, N. Y., in 1841-5; of Grace church, Lyons, N. Y., in 1843-8; and of Trinity church, Geneva, N. Y., in 1848-68. He was elected bishop of Vermont, and consecrated in Christ's church, Montpelier, in 1868.

BIXBY, John Munson, lawyer, b. at Fairfield, Conn., in February, 1800; d. in New York, 22 Nov., 1876. He studied law in Wilkesbarre, Pa., and began practice in New York city. After nearly thirty years practice in New York city, he retired in 1849. He was a president of Edgar Allan Poe, and was the author of two novels, "Standing in the Puritan" (New York, 1850), and "Overing, or the Heir of Wycherly" (1852), both of which were published under the pen-name of E. Grayson. After his retirement he invested in real estate on Fifth avenue, Thirty-ninth street, and Broadway, which increased greatly in value. His estate was estimated after his death at $1,800,000.—His only son, Robert F., receives an annual ground-rent from the union league club of a larger amount than his father paid for the property on which the edifice is erected, on Fifth avenue.

BLACK, James, candidate for president of the U. S., who was re-elected in 1876; "A History of the Prohibition Party" (1880); and "The Prohibition Party" (1885).

BLACK, James Rush, physician, b. near Glasgow, Scotland, 3 March, 1827. His education was received at Granville college (now Dennison University), Ohio Medical College, and the medical department of the University of New York, where he received his degree in 1849. He resided first in Milwaukee, Wis., and then in Ohio, at Lima and Cambridge, settling in Newark, Ohio, in 1863. During the civil war he was surgeon of the 113th Ohio infantry, and afterward medical director on Gen. Gilbert's staff. He has since devoted his attention chiefly to etiology and hygiene, and in 1876 was called to the chair of hygiene in the Ohio state medical society. His work has been written for the medical and scientific journals, and is the author of "Ten Laws of

BLACK, Jeremiah Sullivan, jurist, b. in the Glades, Somerset co., Pa., 10 Jan., 1810; d. at his home in York, Pa., 19 Aug., 1883. His ancestry was Scotch-Irish. James Black, his grandfather, came to America from the north of Ireland, and settled in Somerset co., Pa., where, in 1778, Henry Black, father of Jeremiah, a man of note in his day, was born. Jeremiah's early education was obtained at school near his father's farm. He studied law, was taken into the office of Chauncey Forward, a lawyer in Somerset county, and was admitted to the bar in 1831. In 1838 he married the daughter of Mr. Forward. After an active and successful practice of eleven years, he was raised to the bench. He was a Jeffersonian democrat, and was nominated by a democratic governor, in 1851 Judge Black was elected one of the supreme court judges of Pennsylvania. After serving the short term of three years, he was re-elected, in 1854, for a full term of fifteen years. On the accession of James Buchanan to the presidency, in 1857, Judge Black became attorney-general. He was very industrious and successful, in connection with Edwin M. Stanton, in protecting the interests of the nation against false claimants to grants of land made by the Mexican government to settlers in California before that country came under the control of the United States. When the secession crisis arrived, in 1860-1, Buchanan held that there was no authority for coercing a state, if it chose to secede and set up as a separate political government; but Attorney-General Black was of the opinion that it was the duty of the government to put down insurrection, and that the constitution contained no provision for a dissolution of the union in any manner whatever. Gen. Cass having resigned as secretary of state in December, 1860, Judge Black was appointed to fill the vacancy, and he, with Stanton, took the position of attorney-general. Judge Black occupied this office during the remainder of Buchanan's administration, and exerted himself to save the government from falling into the hands of the secessionists. In March, 1861, when Abraham Lincoln became president, Judge Black retired from public life. He was appointed judge of the court of ordinary, and a vacancy in the office of county court judge occurred, he was appointed to fill the vacancy, and entered again upon the practice of law at his home, near York, Pa. He was engaged in several prominent lawsuits during the last twenty years of his life, and retained his vigor and professional skill to the close of his career. The Vanderbilt contest, the Milliken case, and the McGarrah claim were among the more notable cases in which he was engaged. He was a contributor to periodical literature, furnished an account of the Erie railway litigation, argued the third-term question in magazine articles, and had a newspaper discussion with Jefferson Davis.—His son, Chauncey Forward, was elected lieutenant-governor of Pennsylvania in 1882, and in 1886 was the democratic candidate for the governorship of the state. He was for forty years a resident of the city of Mexico, where he was a long time United States consul, and where he performed the duties of minister during the Mexican war.

BLACK, John, diplomatist, b. in New York in 1792; d. in Albany, N. Y., 19 Nov., 1873. He was for forty years a resident of the city of Mexico, where he was a long time United States consul, and where he performed the duties of minister during the Mexican war.

BLACKBURN, Gideon, clergyman, b. in Augusta co., Va., 27 July, 1772; d. in Carlinville, Ill., 23 Aug., 1838. He was educated at Martin academy, Washington co., Tenn., licensed to preach by Abingdon presbytery in 1755, and settled many years at Marysville, Tenn. He was minister of Franklin, Tenn., in 1811-3, and of Louisville, Ky., in 1826-7. He passed the last forty years of his life in Illinois. He was connected with organizing churches, and, from 1855 to 1869, during a part of each year, in his mission to the Cherokees, establishing a school at Hywassee. He established a school in Tennessee in 1866, and from 1827 till 1830 was president of Center college, Kentucky.

BLACKBURN, Joseph Clay Styles, U. S. senator, carpenter, b. in Bracken co., Ky., 1 Oct., 1801. He was graduated at Center college, Danville, Ky., in 1857, studied law with George B. Kincaid in Lexington, Ky., was admitted to the bar in 1858, and practiced in Chicago till 1860, when he returned to his native county. He entered the Confederate army in 1861, and served through the war. In 1865 he resumed the practice of law, and in 1871-3 was in the Kentucky legislature. In 1875 he entered congress as a Democrat. He was re-elected in 1876, 1878, 1880, and 1882, and became U. S. senator in 1885.—His half-brother, Luke (1816-87), was governor of Kentucky in 1879.

BLACKBURN, William, pioneer, b. in Virginia in 1814; d. in California in 1867. He went to California in 1849, and was there during the conquest of that country in 1849-6, and was appointed alcalde at Santa Cruz immediately thereafter. In this office he served two years, and in 1850 was elected county judge of Santa Cruz co. He was one of the best representatives of the large class of early popular alcahles in the new territory, legally untrained but socially important men, who administered justice after a matter-of-fact, and not too accurate in a technical sense than useful for the needs of the singular community of those days, his decisions were in some cases widely discussed, and are often quoted in historical sketches.

BLACKBURN, William Jasper, editor, b. in Randolph co., Ark., 24 July, 1828. He was early employed in newspapers, and soon was a contributor to periodical literature, being the only southern editor that denounced that action. Although born in a slave state, he was always opposed to slavery, and his office was...
twice mobbed therefor. The "Iliad" was the only loyal paper published during the civil war in the gulf states. He was a member of the constitutional convention of Louisiana convened in 1867, and was elected as a republican to congress, serving from 17 July 1868 till March, 1869. The senate till 1876 he was a member of the Louisiana state senate. Subsequently he removed to Little Rock, Ark., and became owner and editor of the Little Rock "Republican." He received the nomination of the republicans for the state senate, but failed to secure his seat, though he claimed to have been elected. Mr. Blackburn is known as an occasional writer of verse.

BLACKBURN, William Maxwell, clergyman, b. in Carlisle, Ind., 30 Dec., 1828. He was graduated at Hanover college, Ind., in 1850, and at Princeton theological seminary in 1854. He was pastor of the Presbyterian church in Erie, Pa., from 1856 to 1866, and at Princeton, N. J., 1868 to 1879, and at the University of Cincinnati, Ohio, till 1881, when he became pastor of the Central church in Cincinnati, Ohio. In 1884 he was called to the presidency of the theological university of North Dakota, and in 1886 became president of Pierson University at East Pierre, Dak. He published special studies in religious history and biography and numerous story-books for the young, and has contributed to the "Princeton Review" and the "American Presbyterian Review." His principal published works are: "Exiles of Mediaeum" (Philips 1937); "David the Maccabaeus and the Armenian Princes" (1864); "The Rebel Prince" (1864); "William Farel and his Times" (1866); "The College Days of Calvin" (1866); "Young Calvin in Paris" (1866); "Ulrich Zwingli, the Patriotic Reformer" (1868); "Geneva's Shield" (New York, 1867); "St. Patrick and the Early Irish Church" (Phil., 1869); "Admiral Coljoy and the Rise of the Huguenots" (1869); "The Theban Legion" (1871); and a comprehensive "History of the Christian Church from its Origin to the Present Time." He also wrote "Ancient Schoolmaster"; "A Curious Chapter and how its Prophecies were Fulfilled"; "The Benefit of Christ's Death," and the "American History," the latter book or the whole series, including "Cherry Bumce," "Early Watermelons," "The Nevers," "Blind Annie Lorrimer," and "Blood on the Postcards."

BLACKFORD, Eugene Gilbert, pisciculturist, b. in Morristown, N. J., 8 Aug., 1839. He was educated in the public schools and trained in mercantile life in New York city from the age of fourteen, and when about twenty-five years of age embarked in business as a fish-dealer in Fulton market. Through his efforts the red snapper, whitebill, pompano, and other varieties of fish were first introduced into the New York market, and the methods of freezing, shipping, and storing fish have been improved. He was appointed one of the four commissioners for the fisheries of the state of New York in 1879, and was instrumental in establishing a hatching-station for sea and fresh-water fish at Cold Spring harbor, on the north shore of Long Island. He conducted an investigation into the decrease of oysters in the waters of New York, and has published papers on whitebait and the question of conserving the oyster.

BLACKFORD, Isaac Newton, jurist, b. in Bound Brook, N. J., 6 Nov., 1786; d. in Washington, D. C., 31 Dec., 1859. He was graduated at Princeton in 1806. After completing his legal studies under Gabriel Ford, of Morristown, N. J., he removed to Indiana, and in 1812 settled in Vincennes. He was clerk of the territorial legislature in 1813; judge of the first judicial circuit, 1814-15; speaker of the first state legislature, 1816; judge of the supreme court of Indiana, 1819-35; and a judge of the U. S. court of claims from March, 1855, until his death. His reports fill eight volumes.

BLACK HAWK (Ma-ka-tae-nish-ka-kia-kiak), a noted chief of the Sac and Fox tribes of Indians, though by birth a Pottawattamie, b. in Kaskaskia, Ill., in 1767; d. at his camp on the river Des Moines, 3 May, 1838. He was removed with the Sac and Fox tribes of Indians to the federal lands in the state of Illinois, and in 1832 he went to his hunting grounds in Wisconsin, where he was overtaken and killed by Gen. Scott in the battle of the Thames, 26 Oct., 1813. He is remembered as a chief of the Sac, a friend of the whites, and a man of power and firmness.
Black Hawk took place on the 27th. Black Hawk, his two sons, and seven other head warriors who were detained as hostages were taken through the principal eastern cities, and then confined in Fort Monroe before 5 June, 1833. Black Hawk was deposed, and Keokuk made chief of the Sac and Foxes, who to the number of about 3,000 were removed by an act of Congress of March 1, 1830. A "Life of Black Hawk" from his own lips, edited by J. B. Patterson, was published in 1854. See his "Life," by Benjamin Drake, also Drake's "Indian Biography," and "Life of Black Hawk," by W. J. Snelling.

BLACKMAN, George Curtis, surgeon, b. in New York, April 29, 1819; d. in Avondale, Ohio, 19 July, 1871. He was graduated at the college of physicians and surgeons, New York city, in 1840, and in 1854 became professor of surgery in the medical college of Ohio, at Cincinnati. During the war he served as an army surgeon. He was a bold and skilful operator, and an able writer and lecturer. He translated and edited Velpeau's "Treatise on Venerable Disease." (New York, 1854), edited a new edition of Mott's translation of Velpeau's "Surgery," with notes and additions of his own, and was a frequent contributor to medical journals. He was a member of the society of physicians and surgeons in London.

BLACKMAN, Leverne, missionary, b. in New Jersey, about 1587, d. in Ohio in 1815. He entered the ministry of the Methodist Episcopal church in 1809; and it is said that the people among whom he was at first sent, interpreting his surname literally, thought they were to have a negro for their preacher. His appearance dispelled their fears, and he soon became popular. After preaching two years, he resigned his pastorate, and in 1805 was sent as a missionary to Nateche, Miss., then in a wild country, inhabited by Indians and pioneers. To reach his destination he travelled 800 miles on horseback. His labors did much to establish Methodism in that section of the country. In 1808 he went to Tennessee, where he labored with zeal and success. In 1813, while he was crossing the Tennessee river in a small boat, his horses became frightened and plunged into the water. In the effort to hold them, Mr. Blackman was dragged overboard and drowned.

BLACKSTONE, William, pioneer, & c. In Rehoboth, Mass., 24 May, 1675. He is supposed to have been a graduate of Emmanuel college, Cambridge, he took no part in founding the colony of Edgeland. He moved, about 1623, from Plymouth to the peninsula of Shawmut, or Trimountain, where Boston was afterward built, and was living there alone when Gov. Winthrop arrived at Charlestown in 1630. Blackstone went to Winthrop, told him of an excellent spring at Shawmut, and induced him to settle there. The first house built of the ground part of the church accepted this invitation. The land, although Blackstone had occupied it first, belonged to the governor and company, and on 1 April, 1633, they gave him fifty acres, near his house, "to enjoy forever." Blackstone, however, did not like his Puritan neighbors, and in 1634 sold his estate to the company for £20, which was raised by assessing six shillings or more on each inhabitant. He purchased cattle with the proceeds of his sale, and removed to a place on the river now called by his name, a few miles north of Providence. It is said that he planted the first orchard in Massachusetts, and also the first in Rhode Island. Although the first white settler of Rhode Island, he took no part in founding the colony. He did not sympathize with Roger Williams, and always acknowledged allegiance to Massachusetts. While living near Providence he often preached in that town, and, when he grew too old to walk there, he was accustomed to ride upon a bull, as he owned no horse. After his death his place was plundered and his library burned by the Indians, in the war of 1675. The cellar of his house is still shown, and a small mound near by, where he was accustomed to read, is known as "Study Hill." See "William Blackstone in his Relation to Massachusetts and Rhode Island" (New York, 1880).

BLACKWELL, Antoinette Louisa Brown, author and minister, b. in Henrietta, Monroe co., N. Y., 20 May, 1825. When sixteen years old she taught school and then, after attending Henrietta academy, went to Oberlin, where she was graduated in 1847. She spent her vacations in teaching and in the study of Hebrew and Greek. In the winter of 1844 she taught in the academym at Rochester, N. Y., where she delivered her first lecture. After graduation she entered upon a course of theological study at Oberlin and completed it in 1850. When she asked for the license to preach, usually given to a graduate of the theological schools, it was refused; but she preached frequently on her own responsibility. The four years following her graduation were spent in study, teaching, and in lecturing on literary subjects, temperance, and the abolition of slavery. At the woman's rights convention in Worcester, Mass., in 1850, Miss Brown was one of the speakers, and she has since been prominent in the movement. In 1853 she was regularly ordained pastor of the orthodox Congregational church of South Butler and Savannah, Wayne co., N. Y., but gave up her charge in 1854 on account of ill health and doctrinal doubts. In 1855 she investigated the charnel study medicine, and she resolved to become a physician. At first she pursued
her studies in private, with some help from Dr. John Dixon, of Asheville, N. C., in whose family she was governess for a year. She then continued her studies in Charleston, S. C., supporting herself by teaching music, and after that in Philadelphia, under Dr. Allen and Dr. Warrington. She now made formal application to the medical schools of Philadelphia, New York, and Boston for admission as a student, but in each instance the request was denied, although several professors avowed interest in her undertaking. Rejecting advice to adopt an assiduous and patient attitude, she strove after her attempt, and after several more refusals was finally admitted to the medical school at Geneva, N. Y., where she took her degree of M. D. in regular course in January, 1849. During her connection with the college, when not in attendance there upon lectures, she pursued a course of clinical study in Blackwell hospital, Philadelphia. After graduation she went to Paris, and remained there six months, devoting herself to the study and practice of midwifery. The next autumn she was admitted as a physician to walk the hospital of St. Bartholomew in London, and after nearly a year spent there she returned to New York, and began practice in 1851. In 1854, with her sister, Dr. Emily Blackwell, she opened the first hospital for women and children. In 1859 she revisited England, and delivered in London and other cities a course of lectures on the necessity of medical education for women. In 1861, having returned to New York, she held, with Dr. Emily Blackwell, a meeting in the parlors of the inquirer’s society, to which steps were taken toward organizing the women’s central relief association for sending nurses and medical supplies for the wounded soldiers during the civil war. In 1865 the two sisters organized the women’s medical college of the New York infirmary, in which Dr. Elizabeth Blackwell held the chair of hygiene and Dr. Emily Blackwell the chair of obstetrics and gynecology. In 1869, leaving Dr. Emily in charge of their joint work, Dr. Elizabeth returned to London and practised there for several years, taking an active part in organizing the women’s medical college, in which she was elected professor of the diseases of women. She also took part in forming in England the national health society, and in organizing and establishing the medical society acts. Besides several health tracts, she has published “Laws of Life, or the Physical Education of Girls” (Philadelphia, 1852), and “Counsel to Parents on the Moral Education of their Children” (1839), which has been translated into French.

BLAIDE, Thomas, governor of Maryland, lived in the 18th century. He went to England, married there Miss Jansen, sister of Lady Baltimore, and returned as governor in 1742. During his administration the western boundary of the province was fixed by treaty with the Indians, and the manufacture of flour began to attract the attention of the government. Gov. Bladen began to build a house for the residence of colonial officers; but it was not finished during his administration. He returned to England in 1746, and was succeeded by Samuel Ogles. In 1751 he was an executor of the will of Charles, fifth Lord Baltimore.

BLAINE, William, athlete, b. in York, Living-ston co., N. Y., 24 May, 1849. He was gradu-ated at Harvard in 1868. He took law school in 1869. In the following year he accompanied the Harvard crew to England as their secretary and treasurer. After a year as pupil clerk in the attorney-general’s office at Washington, and two years as assistant in the U. S. attorney’s office in New York, he entered into active practice in the latter city in January, 1873. For eight years he was commissioner of the U. S. court of claims. Mr. Blainie is widely known for the interest he has taken in athletics, sports and in physical training. He has written largely, and lectured on the subject, and has published “How to Get Strong, and How to Stay So” (New York, 1879), and “Sound Bodies for our Boys and Girls” (1884).

BLAINE, James Gillespie, statesman, b. in West Brownsville, Washington co., Pa., 31 Jan., 1809; d. in the city of Washington, D. C., 27 Jan., 1893. He was a second son. On his father’s side he inherited the hardy and energetic qualities of the Scotch-Irish blood. His great-grandfather, Ephraim Blaine, b. 1741; d. 1804, bore an honorable part in the revolutionary struggle, was an officer of the Pennsylvania line, a trusted friend of Washing-ton, and during the last four years of the war served as the commissary-general of the northern department of his command. Possessed of ample means, he drew largely from his own private purse and enlisted the contributions of various friends for the maintenance of the army through the severe and memorable winter at Valley Forge. From the Cumber-land valley, where his ancestors had already settled and had been among the founders of Carlisle, Mr. Blaine’s father removed to Washington co. in 1818. He had inherited what was a fortune in those days, and had large landed properties and real estates in western Pennsyl- vania; but their mineral wealth had not then been developed, and though relieved from poverty he was not endowed with a fortune of personal wealth, and a large family made a heavy drain upon his means. He was a man of liberal education, and had travelled in Europe and South America before sett-ling down in western Pennsylvania, where he served as prothonotary. Mr. Blaine’s mother, a woman of superior intelligence and force of character, was a devout Catholic; but her son adhered to the Presbyterian convictions and communion of his paternal Scotch-Irish ancestry. The early educa-tion of Mr. Blaine was sedulously cultivated. He had the advantage of excellent teachers at his own home, and for a part of the year 1841 he was at school in Lancaster, Ohio, where he lived in the family of his relative, Thomas Ewing, then secretary of the treasury. In association with Thomas Ewing, Jr., afterward a member of congress, young Blaine began his preparation for college under the instruction of a thoroughly trained Englishman, William Lyon, the brother of Lord Lyons, and at the age of thirteen he entered Washington college in his native county, where he graduated in 1847. It is said that when nine years old he was able to recite Plutarch’s lives. He had a marked taste for historical studies, and excelled in literature and mathematics. In the literary society he dis-
played the political aptitude and capacity that distinguished his subsequent career. Some time after graduation he became a teacher in the western military institute, at Blue Lick Springs, Ky. Here he formed the acquaintance of Miss Harriet Soule, of Maine, who was connected with a seminary for young ladies at the neighboring town of Millersburg, and to whom within a few months he was married. He soon returned to Pennsylvania, where, after some study of the law, he became a teacher in the Pennsylvania institution for the blind at Philadelphia. The instruction was chiefly oral. The young teacher had charge of the higher part of the work, and the principal left a record that his "brilliant mental powers were exactly qualified to enlighten and instruct the interesting minds before him." After an association of two years with this institution, he removed in 1854 to Augusta, Maine, where he has since made his home. Purchasing a half interest in the Kennecott "Journal," he became its editor, his ready faculty and trenchant writing being peculiarly adapted to this field. He speedily made his impress, and within three years was a master spirit in the politics of the state.

He engaged in the movement for the formation of the republican party with all his energy, and his prompt and lucid discussion of the rising conflict between the doctrines of the two parties attracted wide attention. In 1856 he was a delegate to the first republican national convention, which nominated Gen. Frémont, for the presidency. His report at a public meeting on his return home, where he spoke at the outset with hesitation and embarrassment, and advanced to confident and fervid utterance, has embodied his spirit and gave him standing as a public speaker. The next year he broadened his journalistic work by taking the editorship of the Portland "Advertiser"; but his editorial service ended when his parliamentary career began. In 1858 he was elected to the legislature, remaining a member through successive annual re-elections for four years, and serving his terms as a speaker of the civil war Mr. Blaine gained distinction not only for his parliamentary skill, but for his forensic power in the debates that grew out of that crisis. The same year that he was elected to the legislature he became chairman of the state committee, a position which he continued to hold uninterrupted for fourteen years, and in which he led in shaping and directing every political campaign of his party in Maine.

In 1862 Mr. Blaine was elected to Congress, where in one branch or the other he served for eighteen years. To the house he was chosen for seven successive terms. His growth in position and influence was gradual and unbroken. In his earlier years he made few elaborate addresses. During his first term his only extended speech was an argument in favor of the assumption of the state war debts by the general government, and in demonstration of the ability of the north to carry the war to a successful conclusion. But he gradually took an active part in the running discussions, and soon became a leading member of the active debates. For this form of contention his ready resources and alert faculties were singularly fitted. He was bold in attack, quick in retort, and apt in illustration. His close study of political history, his accurate knowledge of the record and relations of public men, and his unfailing memory, gave him great advantage. As a member of the committee on postal cars, he earnestly sustained all measures for the vigorous prosecution of the war, but sought to make them judicious and practical. In this spirit he supported the bill for a draft, but opposed absolute conscription. He contended that it should be relieved, by provisions for commutation and substitution, and urged that any inexorable draft had never been resorted to but once, even under the absolutism of Napoleon. At the same time he enforced the duty of sustaining and strengthening the armies in the field by using all the resources of the nation, and strongly advocated the enlistment act. The measures for the reconstruction of the states were then proposed, and Mr. Blaine urged the attention of congress from 1865 till 1869, and Mr. Blaine bore a prominent part in their discussion and in the work of framing them. The basis of representation upon which the states should be readmitted was the first question to be determined. Thaddeus Stevens, chairman of the committee on reconstruction, had proposed that representation should be apportioned according to the number of legal voters. Mr. Blaine strenuously objected to this proposition, and urged that population, instead of voters, should be the basis. He submitted a constitutional amendment providing that "representatives and direct taxes shall be apportioned among the several states which shall be included within their limits, according to their respective numbers, which shall be determined by taking the whole number of persons, except those whose political rights or privileges are denied or abridged by the constitution of any state on account of race or color." He advocated this plan on the ground that, while the other basis of voters would accommodate the negroes gradually, the present system of apportioning representation for the blacks unless the whites were made voters, yet it would make a radical change in the apportionment for the northern states where the ratio of voters to population differed very widely in different sections, varying from a minimum of 19 per cent, to a maximum of 58 per cent. The result of the discussion was a recommendation to the convention that the apportionment should be based on voters, and the 14th amendment to the constitution, as finally adopted, embodied Mr. Blaine's proposition in substance.

On 6 Feb., 1867, Mr. Stevens reported the reconstruction bill. It divided the states lately in rebellion into five military districts, and practically established civil government throughout. The military tribunals were made subject to military control. While the majority evinced a readiness to accept the bill, Mr. Blaine declared his unwillingness to support any measure that would place the south under military government, if it did not at the same time prescribe the methods by which the people of a state could by their own action reestablish civil government, and the provisions for military government should be inoperative. This proposition came to be known as the Blaine amendment. In advocating it, Mr. Blaine expressed the belief that the true interpretation of the election of 1866 was that, in addition to the proposed constitutional amendment—the 14th—impartial suffrage should be the basis of representation, and he urged the wisdom of declaring the terms at once. The application of the previous question ruled out the
Blaine amendment, but it was renewed in the senate and finally carried through both branches, and under it reconstruction was completed.

Public debt. The payment of the public debt should be paid in greenbacks developed strong interest in the summer of 1867 while Mr. Blaine was absent in Europe. On his return at the opening of the next session he made an extended speech against the doctrine, and was the first man in congress to give utterance to this opposition. The long unsettled question of protection against American citizens while abroad attracted special attention at this time. Costello, Warren, Burke, and other Irish-Americans had been arrested in England, on the charge of complicity in Fenian plots. Costello had made a speech in 1865 in New York, which was regarded as treasonable by the British government, and he was tried as a British subject and tried under an old law on this accusation. Plea of American citizenship was overruled, and he was convicted and sentenced to sixteen years' penal servitude. Mr. Blaine, who, with other American statesmen, resisted the English doctrine of perpetual allegiance, and maintained that a naturalized American was entitled to the same protection which would be accorded an American, took an active part in pressing these questions upon public attention, and, as the result of that agitation, Costello was released. The discussion of these cases led to the treaty of 1870, in which Great Britain abandoned the doctrine of "once a subject always a subject," and accepted the American principle of equal rights and protection for adopted and for native citizens. Mr. Blaine was chosen speaker of the house of representatives in 1869, and served by successive re-elections for six years. His administration of the speakership is commonly regarded as one of the most brilliant and successful in the annals of the house. He had rare ability and equipment for the duties of presiding officer; and his complete mastery of parliamentary law, his dexterity and physical endurance, his rapid dispatch of business, and his firm and impartial spirit, were recognized on all sides. Though necessarily exercising a powerful influence upon the course of legislation, he seldom left the chair to mingle in the conflicts of the house. On one of these occasions, March 3, 1871, he held a sharp tilt with Gen. Butler, who had criticised him for being the author of the resolution providing for an investigation into alleged outrages perpetrated upon loyal citizens of the south, and for being chiefly instrumental in securing its adoption by the republican caucus. The political revolution of 1874 placed the democrats in control of the house, and Mr. Blaine became the leader of the minority. The session preceding the presidential contest of 1876 was a period of stormy and vehement contention. A general amnesty bill was brought forward, removing the political disabilities of participants in the rebellion which had been imposed by the 14th and 15th amendments. Mr. Blaine moved to amend by making an exception of Jefferson Davis, and supported the proposition in an impassioned speech. After asserting the great magnanimity of the government, and pointing out how far amnesty had already been carried, he defined the ground of his proposed exception. The reason was, not that Davis was the chief of the confederacy, but that, as Mr. Blaine affirmed, he was the author, "knovingly, deliberately, guilty, and wilfully, of the gigantic murders and crimes of Andersonville." In fiery words Mr. Blaine proceeded to declare that no military atrocities in history had exceeded those for which Davis was thus responsible. His outburst naturally produced deep excitement in the house and throughout the country. If Mr. Blaine's object as a political leader was to arouse partisan feeling and activity preparatory to the presidential campaign, he succeeded. A resolution in the senate, which a debate was introduced by him in the confederate senate, providing that every soldier or officer of the United States captured on the soil of the confederate states should be presumed to have come with intent to incite insurrection, and should suffer the penalty of death. This episode arrested universal attention. Mr. Blaine a still stronger hold as a leader of his party.

He now became the subject of a violent personal assault. Charges were circulated that he had received $64,000 from the Union Pacific railroad company for some undefined services. On 24 April, 1876, he rose to a personal explanation in the house and made a speech which showed that he was as much at sea as the officers of the company and from the bankers who were said to have negotiated the draft, in which they declared that there had never been any such transaction, and that Mr. Blaine had never received a dollar from the company. Mr. Blaine proceeded to add that the charge had reappeared in the form of a report of the house committee that it had received bonds of the Little Rock and Fort Smith railroad as a gratuity, and that these bonds had been sold through the Union Pacific company for his benefit. To this he responded that he never had any such bonds except at the market price, and that, instead of deriving any profit from them, he had incurred a large pecuniary loss. A few days later another charge was made to the effect that he had received as a gift certain bonds of the Kansas Pacific railroad, and had been a party to a suit concerning them in the courts of Kansas. To this he answered by producing evidence that his name had been confounded with that of a brother, who was one of the early settlers of Kansas, and who had bought stock in the Kansas Pacific railroad. Since Mr. Blaine had even been nominated for congress.

On 2 May a resolution was adopted in the house to investigate an alleged purchase by the Union Pacific railroad company, at an excessive price, of certain bonds of the Little Rock and Fort Smith railroad. It soon became evident that the investigation was aimed at Mr. Blaine. An extended business correspondence on his part with Warren Fisher, of Boston, running through years and relating to various transactions, had fallen into the hands of a clerk named Mulligan, and it was alleged that the production of this correspondence would confirm the imputations against Mr. Blaine. When Mulligan was summoned to Washington, Mr. Blaine possessed himself of the letters, together with a memorandum that contained a full index and abstract. On 5 June he rose to a personal explanation, and, after denying the power of the house to compel the production of his private papers, and his willingness to go to any extremity in order to save his correspondence, he added that he had purpose to reserve nothing. "Thank God, I am not ashamed to show them. There is the very original package. And with some sense of humiliation, with a mortification I do not attempt to conceal, with a sense of outrage which I think any man in my position
would feel, I invite the confidence of forty-four millions of my countrymen, while I read those letters from this desk." The demonstration closed with a dramatic scene. Josiah Caldwell, one of the originators of the Little Rock and Fort Smith railroad, who had full knowledge of the whole transaction, was travelling in Europe, and both sides were seeking to communicate with him. After finishing the reading of the letters, Mr. Blaine turned to the chairman of the committee and demanded to know whether he had received any declaration of absence. Mr. Blaine, as an evasive answer, Mr. Blaine asserted, as within his own knowledge, that the chairman had received such a dispatch, "completely and absolutely exonerating me from this charge, and you have suppressed it." A profound sensation was created, and Gen. Garfield said: "I have been a long time in congress, and never saw such a scene in the house." The republican national convention was now at hand, and Mr. Blaine was the most prominent candidate for the presidential nomination. He had a larger body of enthusiastic friends than any other leader of his party, and the stirring events of the past few months had intensified their devotion. On 11 June, the Sunday preceding the convention, just before the closing church service, Mr. Blaine was prostrated with the extreme heat, and his illness for a time created wide apprehension. The advocates of his nomination, however, remained unshaken in their support. On the first ballot he received 285 votes out of a total of 754, the remainder being divided among Senator Morton, Sec. of State Conkling, Gov. Hayes, and several others. On the seventh ballot his vote dropped to 351, lacking only 28 of a majority, but a union of the supporters of all the other candidates gave Gov. Hayes 384 and secured his nomination. Immediately after the convention, on the resignation of Senator Morrill to accept the secretarieship of the treasury, Mr. Blaine was appointed senator to fill the vacancy occasioned by the following winter he was chosen by the legislature for the full ensuing term. In the senate he engaged in the discussion of current questions. He opposed the creation of the electoral commission for the settlement of the disputed presidential election of 1876, on the ground that congress did not itself possess the power. An act was passed to create the commission. He held that President Hayes's southern policy surrendered too much of what had been gained through reconstruction, and contended that the validity of his own title involved the maintenance of the state governments in South Carolina and Louisiana, which rested on the same popular vote. On the currency question he always assumed a pronounced position. While still a member of the house, in February, 1876, he had made an elaborate speech on the national finances and against any perpetuation of an irredeemable paper currency, and soon after entering the senate, when the subject was brought forward, he took strong ground against the deterioration of the silver coinage. He opposed the bill at the third reading, when its passage was seen to be inevitable, sought to amend it by providing that the dollar should contain 425 grains of standard silver, instead of 412½ grains. He favored a bi-metallic currency, and equally resisted the adoption of the single gold standard and the depreciation of silver. Measures for the development and protection of American industries, and particularly the Chinese, which were advocated the establishment of a line of mail steamers to Brazil, and unhesitatingly urged the application of a subsidy to this object. On frequent occasions he recurred to the subject, contending that Great Britain and France had built up their commerce by liberal aid to steamship lines, and that a similar policy would produce similar results here. He argued that congress had endowed the railroad system with $500,000,000 of money, which had produced $5,000,000,000 to the country, and that the policy ought not to stop when it reached the sea. In March, 1878, congress was deeply agitated by a conflict over the appropriation bills. The democrats and the vigilance committee had an evasive answer, Mr. Blaine asserted, as within his own knowledge, that the chairman had received such a dispatch, "completely and absolutely exonerating me from this charge, and you have suppressed it." A profound sensation was created, and Gen. Garfield said: "I have been a long time in congress, and never saw such a scene in the house." The republican national convention was now at hand, and Mr. Blaine was the most prominent candidate for the presidential nomination. He had a larger body of enthusiastic friends than any other leader of his party, and the stirring events of the past few months had intensified their devotion. On 11 June, the Sunday preceding the convention, just before the closing church service, Mr. Blaine was prostrated with the extreme heat, and his illness for a time created wide apprehension. The advocates of his nomination, however, remained unshaken in their support. On the first ballot he received 285 votes out of a total of 754, the remainder being divided among Senator Morton, Sec. of State Conkling, Gov. Hayes, and several others. On the seventh ballot his vote dropped to 351, lacking only 28 of a majority, but a union of the supporters of all the other candidates gave Gov. Hayes 384 and secured his nomination. Immediately after the convention, on the resignation of Senator Morrill to accept the secretarieship of the treasury, Mr. Blaine was appointed senator to fill the vacancy occasioned by the following winter he was chosen by the legislature for the full ensuing term. In the senate he engaged in the discussion of current questions. He opposed the creation of the electoral commission for the settlement of the disputed presidential election of 1876, on the ground that congress did not itself possess the power. An act was passed to create the commission. He held that President Hayes's southern policy surrendered too much of what had been gained through reconstruction, and contended that the validity of his own title involved the maintenance of the state governments in South Carolina and Louisiana, which rested on the same popular vote. On the currency question he always assumed a pronounced position. While still a member of the house, in February, 1876, he had made an elaborate speech on the national finances and against any perpetuation of an irredeemable paper currency, and soon after entering the senate, when the subject was brought forward, he took strong ground against the deterioration of the silver coinage. He favored a bi-metallic currency, and equally resisted the adoption of the single gold standard and the depreciation of silver. Measures for the development and protection of American industries, and particularly the Chinese, which were advocated the establishment of a line of mail steamers to Brazil, and unhesitatingly urged the application of a subsidy to this object. On
BLAINE

and Sherman united on Gen. Garfield, who received 390 votes to 306 for Grant, and was nominated. On his election, Mr. Blaine was tendered and accepted by a vote of the House. He was invited to remain at the head of the department less than ten months, and his effective administration was practically limited by the assassination of President Garfield to four. Within that period, however, he began several important undertakings. His foreign policy had two principal objects. The first was to secure and preserve peace with Europe, and the second was to cultivate close commercial relations and increase our trade with the various countries of North and South America. The accomplishment of the first object was preliminary and essential to the attainment of the second, and, in order to promote it, he projected a peace congress to be held at Washington, to which all the independent powers of North and South America were to be invited. His plan contemplated the cultivation of such a friendly understanding on the part of the powers as would permanently avert the horrors of war either through the influence of pacific counsels or the acceptance of impartial arbitration. Were such a settlement reached, it was assumed that the assembling of their representatives at Washington would open the way to such relations as would inure to the commercial advantage of this country. The project, though already determined, was delayed by the fatal shot at Garfield, and the letter of invitation was finally issued on 29 Nov., 1881, fixing 24 Nov., 1882, as the date for the proposed congress. On 19 Dec. Mr. Blaine retired from the cabinet, and within three weeks his successor had reversed his policy and the plan was abandoned, after the invitation had been accepted by all the American powers except two.

When Mr. Blaine entered the department of state, war was raging between Chili and Peru, and he sought to exercise the good offices of our government, first, for the restoration of peace, and, second, to mitigate the consequences of the crushing defeat sustained by Peru. Other efforts failing, he despatched William Henry Trescott on a special mission to offer the friendly services of the United States; but this attempt, like the one for the relief of the Columbia Republic, was interrupted and frustrated by his retirement from the cabinet. The failure of the service was also signified by an important correspondence with the British government concerning the modification of the Clayton-Bulwer treaty, making formal proposal for the abrogation of certain clauses which were not in harmony with the rights of the United States as secured by convention with the Colombian republic. He urged that the treaty, by prohibiting the use of land forces and of fortifications, without any protection against superior naval power, practically conceding to Great Britain the control of any interoceanic canal that might be constructed across the isthmus, and he proposed that every part of the treaty which forbade the fortification of the isthmus and held the political control of it in conjunction with the country in which it is located should be cancelled. To the answer of the British government that the treaty was an engagement which should be maintained and respected, Mr. Blaine replied that it could not be regarded as a conclusive determination of the question; that since its adoption it had been the subject of repeated negotiations between the two countries; that the British government had itself proposed to refer its doubtful clauses to arbitration; and that it had long been recognized as a source of increasing embarrassment. Throughout the correspondence Mr. Blaine insisted in the firmest tone that "it is the fixed purpose of the United States to consider the isthmus canal question as an American question, to be dealt with and decided by the American governments."

Upon the retirement of Mr. Blaine from the state department in December, 1881, he was, for the first time in twenty-three years, out of public station. He soon entered upon the composition of "Twenty Years of Congress," of which the first volume was published in April, 1884, and the second in January, 1886 (Norwich, Conn.). The work had a very wide sale, and secured general approval for its impartial spirit and brilliant style. When the republican party in the southern convention of 1884 met at Chicago, it was clear that Mr. Blaine had lost none of the hold upon the enthusiasm of his party. On the first ballot he received 3,943 votes, Senator Arthur 278, Senator Edmunds 53, Senator Logan 634, and the rest failed. The second ballot was gained till the fourth ballot, when he received 54 votes, the number of 813 and was nominated. The canvass that followed was one of peculiar bitterness. Mr. Blaine took the stump in Ohio, Indiana, New York, and other states, and in a series of remarkable speeches, chiefly devoted to upholding the policy of protection to American industry, deepened the popular impression of his intellectual power. The result turned upon the result in New York, which was lost to Mr. Blaine by 1,047 votes, whereupon he promptly resumed the work upon his history, which had been interrupted by the canvass. After the result had been determined, he made, at his home in Augusta, a speech in which he arraigned the democratic party for carrying the election by suppressing the republican vote in the southern States, and cited the figures of the returns to show that, on an average, only one half or one third as many votes had been cast for each presidential elector or member of congress elected in the south as for each elected in the north. This speech had a startling effect, and attracted universal attention, though few could find in it the slightest thing in a speech that he made in congress as long before that time as 11 Dec., 1878.

Mr. Blaine took an active part in the Maine canvass of 1886, opening it, 24 Aug., in a speech at Sebago Lake devoted chiefly to the questions of the fisheries, the tariff, and the third-party prohibition movement. The fisheries controversy had acquired renewed interest and importance from recent seizure of American fishing-vessels on the Canadian coast, and Mr. Blaine reviewed its history at length, and sharply criticised the attitude and action of the administration. He presented the issue of protection against free-trade as the foremost one between the two great party. He insisted that there was no warrant or reason for a third-party movement in Maine, because the republican party had enacted and enforced a prohibitory law in that state. His succeeding speeches, continued throughout the canvass, followed the same line.

At the republican national convention at Chicago, in 1888, Mr. Blaine's name was prominently used in connection with the nomination, but he sent from Italy a telegraphic message positively declining to allow it to be so used. On the election of President Harrison, the nominee of the convention, Mr. Blaine was again called to the
cabinet as secretary of state. He was active in forwarding the Pan-American congress, a conference of representatives of the independent governments of North and South America, held in Washington, and also gave his attention to the international conference for the adoption of regulations to govern vessels at sea. The McKinley tariff measure was supplemented, largely through his suggestions, by treaties of reciprocity with various nations, and he was also actively concerned in the diplomatic treatment of the seal-fishery dispute, the recognition of the new republic, the trouble with Italy over the lynching of alleged Italian subjects in New Orleans, the civil war in Chili, and a dispute with Spain regarding the rights of American missionaries in the Caroline islands.

On 4 June, 1892, Mr. Blaine suddenly resigned his portfolio, and three days later, at the republican national convention in Minneapolis, his name was once more conspicuous among those of the presidential candidates. His resignation caused much speculation, and many persons coupled it with his subsequent candidacy for the presidential nomination; but he himself gave as his reason that he desired to rest. His health now failed rapidly, and he took no more active interest in public life, his death following soon afterward.

BLAIR, Austin, governor of Michigan, b. in Caroline, Tompkins co., N. Y., 8 Feb., 1818; d. in Jackson, Mich., 6 Aug., 1894. He was educated at Union college, being graduated in 1836, studied law, and removed to Michigan. He was county clerk of Eaton county, member of the legislature in 1836, and county clerk of Montcalm county from 1832 till 1854. He was state senator from 1854 till 1856, and from 1861 till 1865 was governor of the state, in which office he was active in his support of the national government. In 1866 he was elected as a republican to congress, where he was a member of the committee on foreign affairs, rules, and militia, and was twice re-elected in succession, serving on the committee on land-claims. In 1873 he resumed law practice in Jackson, Mich.

BLAIR, Francis Preston, statesman, b. in Abingdon, Va., 12 April, 1791; d. in Silver Spring, Md., 18 Oct., 1876. He was educated at Transylvania university, Kentucky, and studied law, but never practised. He early took part in politics, and in 1819 was elected to the Virginia convention for the presidency. He dissented, however, from Clay's view in relation to the United States Bank, and in 1828 became an ardent Jackson man. In 1829 an article in a Kentucky paper by Mr. Blair against the nullification movement attracted the president's attention, and he invited the writer to establish a journal at Washington to support the union. This led to the establishment of the "Globe," which was the recognized organ of the democratic party until 1843, when President Polk, against Gen. Jackson's published protest, removed Mr. Blair from the management. This action signified the triumph of Calhoun and his adherents over the Jackson or national democracy. President Polk offered the presidency, which was declined. He supported Mr. Van Buren in 1848, and promoted the reunion of the party, by which Pierce's election was secured in 1852. After the repeal of the Missouri compromise in 1854, Mr. Blair was active in the organization of the republican party, presiding over the Pittsburg convention of 1855, and drawing up the platform adopted there. After peremptorily refusing to allow his own name to be used, he favored the nomination of Col. Fremont for the presidency. Mr. Blair was also one of the leaders in the Chicago convention of 1860, which nominated Lincoln, and, after the election of the latter, had much influence with his administration. In 1864 Mr. Blair conceived the idea that, through his personal acquaintance with many of the confederate leaders, he might be able to effect a peace. Without telling the president of his intention, he asked for a pass to the south, and had several interviews with Jefferson Davis and others. His efforts finally led to the unsatisfactory "peace conference" of 3 Feb., 1863. After Lincoln's death, Mr. Blair's opposition to the reconstruction measures of the general policy of the republicans led to his condemnation with the Democratic party, though his counsel were disregarded by its leaders till 1876, when Mr. Tilden was nominated for the presidency. — His son, Francis Preston, soldier, b. in Lexington, Ky., 19 Feb., 1821; d. in St. Louis, Mo., 8 July, 1879. After graduation at Princeton, in 1841, he studied law in Washington and was admitted to the Kentucky bar in 1843, and began to practise in St. Louis. In 1845 he went for his health to the Rocky mountains with a company of trappers, and when he returned with Mexico, having enlisted in the army as a private. After the war he returned to the practice of his profession in St. Louis. In 1848 he joined the free-soil branch of the democratic party, was for a time editor of the "Missouri Democrat," and from 1852 till 1856 was a member of the Missouri legislature. In 1856 he joined the newly organized republican party, and was elected to congress, where, in 1857, he spoke in favor of colonization of the negroes of the United States in Central America. In 1858 the democratic candidate for congress was returned, Mr. Blair successfully contested the seat, but immediately resigned, and was defeated in the election that followed. He was, however, elected again in 1860 and in 1862. Soon after the South Carolina secession convention was called, in November, 1861, Mr. Blair, at a meeting of the republican leaders in St. Louis, showed the necessity of immediate effort to prevent the seizure by the state authorities of the St. Louis arsenal, containing 65,000 stand of arms belonging to the government. He became the head of the military organization then formed, which guarded the arsenal from that time; and it was at his express suggestion that the state troops under Gen. Frost were ordered on 10 May, 1861, without orders from Washington. It is claimed that he thus saved Missouri and Kentucky to the union. Entering the army as a colonel of volunteers, he was made brigadier-general 7 Aug., 1861, and major-general 29 Nov., 1862, resigning his seat in congress in 1863. He commanded a division in the Vicksburg campaign, led his men in the battles of Lookout Mountain and Missionary Ridge, and was at the head of the 17th corps during Sher-
BLAIR

man's campaigns in 1864-5, including the march to the sea. In 1866 he was nominated by Presi-
dent Johnson as collector of internal revenue at St.
Louis, and afterward as minister to Austria; but
and case his opposition to the reconstruction
measures led to his rejection by the senate. He
was afterward commissioner of the Pacific railroad.
His dissatisfaction with the policy of the repub-
licans led him to return to the democratic party,
a. after he was his candidate for the vice-presi-
dency. In January, 1871, Gen. Blair again entered
the legislature of Missouri, and in the same month
he was elected to fill a vacancy in the U. S. senate,
where in conjunction with Leverett, he was his can-
didate for re-election, but was defeated. At the
time of his death he was state superintendent of
insurance. He published "The Life and Services
of General William O. Butler" (1848).
—His son, Andrew Alexander, chemist, b. in
Woodford co., Ky., 20 Sept., 1846. He was gradu-
at the U. S. cadet academy in 1866, and sub-
sequently entered upon the practice of chemis-
y as an analyst. He settled in St. Louis, and
soon became an authority on the analysis of iron.
The analyses of coals, iron ores, and irons of Mis-
souri made for the geological survey of that state
and published in the report of 1874 were executed
by him. In 1878 he was elected to fill a vacan-
ty in the U. S. Geological Survey and the tenth census,
Afterward he became associated with James C.
Booth and T. H. Garrett as an analytical and con-
sulting chemist in Philadelphia. He has pub-
lished many analyses of similar subjects in the "American Journal of Science,"
"Metallurgical Review," "Transactions of the American Institute of Mining Engineers,
"and "American Chemical Journal." Among his re-
ports furnished to the government are "Methods
of Analysis of Iron, Steel, Copper, Tin, Zinc, and other Metal-
lox, 1870," and "Methods of Analysis of Iron Ores" (1851).
BLAIR, Henry William, senator, b. in Camp-
ton, X. I., 6 Dec., 1834. His parents died before
he had completed his thirteenth year, and his boy-
hood was spent in the family of Richard Bartlett,
of Campton, where he worked on the farm, and attend-
ed the common schools. In 1855, when he was
began to teach, hoping to earn enough money to
take him through college. Compelled by ill health
to give up this plan, he read law with William
Leverett, of Plymouth, X. H., and was admitted to
the bar in 1859, and in 1860 was elected prosecuting
attorney for Grafton co. When the civil war began
he enlisted in the 15th New Hampshire vol-
unteers, of which he became captain of his company,
soon became major, and finally lieutenant-colonel.
He was twice wounded severely at the siege of
Port Hudson, and was prevented by his wounds,
and disease contracted in service, from taking any
active part in the remainder of the war. He
was elected to the New Hampshire house of represen-
tatives from 1871 till 1879, and, declining a
re-nomination, was elected to the U. S. senate in the
latter year, and relected in 1885. Senator Blair
has given much attention to social questions, and
is an ardent temperance reforner. He intro-
duced in 1876 and 1884 the "Agricultural School Bill," which
was introduced by him in the 47th congress. As
passed by the senate in April, 1884, the bill ap-
propriates $7,000,000 to be distributed among the
states in proportion to their literacy. In the
original bill the amount was $105,000,000. In
the 49th congress the senate again passed the bill,
making the appropriation $78,000,000. Senator
Blair has also introduced prohibitory temperance
and woman suffrage amendments to the national
constitution, is the author of the Blair scientific
temperance education bill and the Blair pension
bill, and has made important speeches on finan-
cial subjects.

BLAIR, James, educator, b. in Scotland in
1656; d. in Williamsburg, Va., 3 Aug., 1748. He
was educated in Scotland, and became a clergy-
man of the Presbyterian church. He was called
in 1838 to serve as minister to the Church of the
situation of that establishment in his native coun-
try, he resigned his preferences and removed to
England in the latter part of the reign of Charles
II. There his talents brought him to the notice of
Compton, bishop of London, who prevailed upon
him in 1683 to go as a missionary to Virginia.
He was for some time president of the colonial
commission, the highest ecclesiastical post in the
province, by virtue of which he had a seat in the
colonial council, presided at ecclesiastical trials,
and had, in general, the powers of a bishop. Per-
ceiving that the province was greatly in need of a
seminary, he resolved to establish one, and began
by taking a survey of™ the country. He then
appropriated $2,500. In 1691 he was sent by the colonial as-
sembly to England to secure the patronage of the
king and queen, and on 14 Feb., 1692, obtained the
charter of William and Mary college, and was
named as its first president. He did not formally
enter upon the duties of his office until 1729, al-
though he was acting in that capacity for the inter-
ests of the institution. The college was not at first suc-
cessful, as the wealthy planters still sent their sons to
England for education, and in 1705 the college
building was destroyed by fire. Mr. Blair was op-
posed in his plans by the royal governors and even
by the clergy, and, had it not been for his energy,
the enterprise would probably have been given up.
He was for some time president of the colonial
commission, and rector of Williamsburg. In 1727 he
assisted in compiling "The State of His Majesty's Colony
in Virginia," and in 1728 published "Our Saviour's Divine Sermon on the Mount Explained
and Recommended in divers Sermons and Dis-
courses" (4 vols., 8vo); republished with a com-
memoratory notice by the Wests (1749).

BLAIR, John, statesman, b. in Williamsburg,
Va., in 1689; d. there, 5 Nov., 1771. He was a
nephew of President James Blair noticed above.
As early as 1730 he was a member of the house of
burgesses, and he was president of the council, and
acting governor of Virginia in 1737-8 and 1768.
Campbell, on page 544 of his "History of Virginia,"
(Philadelphia, 1860), gives a letter concerning the
Baptists, written to the king's attorney of Spottis-
ylvania by Blair, when he was acting governor, and
showing a spirit of toleration as rare at that time
as it was creditable.—His son, John, jurist, b. in
Williamsburg, Va., in 1732; d. there, 31 Aug.,
1800, was graduated at William and Mary college
studied law at the Temple, London, soon became
prominent in his profession, and was a member of
the legislature as early as 1765. On the dissolution
of the assembly in 1769, Blair was one of those
that met at the Raleigh tavern and drew up the
non-importation agreement. In June, 1774, he
represented the town in the committee of the day
when a plan for governing the state, was chosen to
the council, and in 1777 became a judge of the court
of appeals. He was afterward chief justice, and in
1780 judge of the high court of chancery. When
the Virginia legislature established circuit courts, and directed the judges of the court of appeals to perform the duties of circuit judges. Judge Blair, with his colleagues, remonstrated, and declared the act unconstitutional. He was a delegate to the convention that drew up the federal constitution, and with Washington and Madison, alone of all the Virginia delegates, voted for its adoption. He afterward supported it also in the state convention. In September, 1789, he was appointed by Washington a Justice of the U. S. supreme court, and in 1796 resigned his seat.

BLAIR, John Insley, capitalist, b. in Warren co., N. J., 28 Aug., 1802; d. in Blairstown, N. J., 2 Dec., 1868. His father, Mr. John Blair, came to this country from Scotland in 1720, and his education was limited to a few months of schooling during the winter, when he reached the age of eleven. About 1813 he entered the store of a relative in Hope, N. J., for the purpose of learning business, and remained so occupied until 1821, when he settled in Blairstown, N. J. Here, with his relative, John Blair, he established a general country store, but two years later the partnership was dissolved, and the business continued independently by John I. Blair before he was of age. For forty years he remained in this place, constantly extending his business and acquiring branches at Markbrook, Paulina, Huntsville, N. J., and Johnston, and a relative, Robert Blair, and his brothers-in-law were associated with him as partners. During these years Mr. Blair was also developing business interests in other lines, such as flour-mills, the manufacture of cotton, and the marketing of the produce of the country round about, and also in wholesaling many goods to other stores. He likewise became interested in post-office work for this forty years. About 1833 he became associated with others in the development of iron-mines in the vicinity of Oxford Furnace, a forge that had been in operation in pre-revolutionary times. Success in this venture led, in 1836, to his being connected with the organization of the Lackawanna coal and iron company. His ownership and interest in the business were large, and the increase of output from the mines, of which he was part proprietor, followed as a matter of course. The road from Owego to Ithaca, N. Y., was bought and rebuilt by him and his associates during 1849. Later, the Legget's Gap road, from Scranton to Great Bend, was constructed, and thrown open in 1851. In 1852 he ran a stage, to which institution he had a relation, the corporation known as the Delaware, Lackawanna, and Western railroad came into existence. In the development of this road he was actively interested, and is one of its largest stockholders. It has since been entirely rebuilt, and is a most valuable property, transporting over 6,700,000 tons of coal in the last thirty years, a capital outlay of $10,000,000. He has been engaged in railroad building in Iowa, Wisconsin, Kansas, Nebraska, Dakota, Missouri, and Texas. He was the organizer of the railroad system of Iowa, having built the first railroad across that state from the Mississippi to the Missouri rivers, and subsequently more than 2,000 miles in Iowa and Nebraska. He was one of the original directors of the Union Pacific railroad, and was a director in seventeen companies, as well as president of three. Mr. Blair was likewise controlling owner of a large number of other wealthy corporations both in the east and the west. He has been a life-long attendant upon and supporter of the Presbyterian church, to whose institutions he has at various times given upward of $500,000. Among these benefactions is $70,000 to the college of New Jersey, Princeton, of which, in 1866, he became a trustee; $55,000 to Lafayette; and upward of $100,000 to the Blair Presbyterian Academy. In the eighty towns that he has laid out in the west, more than 100 churches have been erected, largely through his liberality. In politics Mr. Blair has been a strong republican, and he was the candidate of that party for governor of New Jersey in 1868. He has also been a delegate to every national republican convention since the organization. One of his daughters married Charles Scribner, founder of the publishing-house in New York.

BLAIR, Montgomery, statesman, b. in Franklin co., Md., 27 July, 1833; d. in Silver Spring, Md., 27 July, 1883. He was a son of Francis P. Blair, Sr., was graduated at West Point in 1855, and, after serving in the Seminole war, resigned his commission on 29 May, 1856. He then studied law, and, after his admission to the bar in 1858, began practice in St. Louis. He was appointed U. S. district attorney for Missouri, and in 1812 was elected mayor of St. Louis. He was raised to the bench as judge of the court of common pleas in 1853, but resigned in 1849. He removed to Maryland in 1852, and in 1855 was appointed U. S. solicitor in the court of claims. He was removed from this office by President Buchanan in 1856, having lost the confidence of the Republicans by his opposition to the Webster-Hayes compromise. In 1857 he acted as counsel for the plaintiff in the celebrated Dred Scott case. He presided over the Maryland republican convention in 1860, and in 1861 was appointed postmaster-general by President Lincoln. It is said that he alone of Mr. Lincoln's cabinet opposed the surrender of Fort Sumter. He subsequently went into politics for his party.

As postmaster-general he prohibited the sending of disloyal papers through the mails, and introduced various reforms, such as money-orders, free delivery in cities, and postal railroad cars. In 1864 Mr. Blair, who was not altogether in accord with the policy of the administration, told the president that he would resign whenever he thought it necessary. This he did on 23 Sept. Mr. Lincoln, in a friendly letter, accepted his offer. After this Mr. Blair acted with the democratic party, and in 1876-7 vigorously attacked Mr. Hayes's title to the office of president.

BLAIR, Samuel, clergyman, b. in Ulster, Ireland, 14 June, 1732; d. 5 July, 1791. He attended the young republic in Pennsylvania, and received his education at William Tennant's "Log College," in Neshaminy, Pa. He was licensed to preach by the Philadelphia presbytery on 9 Nov., 1753, and in September, 1754, accepted a call to Middletown and Shrewsbury, N. J. He was one of the original members of New Brunswick presbytery, formed in 1768, and served as both the colloquy and as the first moderator of a church at New Londonderry, or Fogg's Manor, in Chester co., Pa. Shortly after his settlement there he established a seminary, at which young men were educated, some of whom were afterward prominent in the Presbyterian church, among them Rev. Samuel Davies and Rev. John Rodgers. In the controversies over the right of the presbytery to visit the church in 1765, Mr. Blair sided with the so-called "New Side." His principal writings were collected by his brother John (Philadelphia, 1754), with an elegy by Samuel Davies, and Dr. Finley's funeral sermon. This volume contains an elaborate dedication to "The Preservation and Reproduction."—His brother, John, clergyman, b. in Ireland in 1729; d. in Walkill, Orange
BLAKE, Clarence John, physician, b. in Boston, Mass., 23 Feb., 1843. He studied at Lawrence scientific school, and was graduated at the Harvard medical school in 1865, after which he spent some time abroad and received the degree of "obstetrical magister" at Vienna in 1867. He began to practice in Boston in 1869, and has devoted his attention principally to diseases of the ear. In 1871 he became aural surgeon in the Massachusetts charitable eye and ear infirmary, and during the same year was appointed instructor in otorhinology in Harvard medical school. He is a member of medical and surgical societies of the United States and of the American otological society in 1870-7. Dr. Blake has invented several surgical instruments for use in the treatment of diseases of the ear, principally the membrana tympani phonograph. He has published papers on subjects in acoustics and otology, and was the editor of the "American Journal of Otology" in 1878-82, and also of Rüdinger's "Atlas of the Osseous Anatomy of the Human Ear" (Boston, 1870).
BLAKE, George Smith, naval officer, b. in Washington, D. C., Jan. 12, 1809; d. in New York, 24 June, 1871. His father, Francis Blake, was a prominent lawyer in Worcester. On 1 Jan., 1818, he was appointed to the navy as midshipman. On 5 Nov., 1821, the schooner "Alligator," on which he was serving, was attacked near the Cape Verde islands by a Portuguese ship, which was captured and sent to the United States, with Blake as her executive officer. Commissioned lieutenant, 31 March, 1827, he cruised in the "Grampus," on the West India station, for the suppression of piracy. He was employed on a survey of Narragansett bay in 1832, was attached to the navy-yard at Philadelphia in 1833, and from 1837 till 1848 was connected with the coast survey. The secretary of the treasury, in the latter capacity, appointed him, in 1847, a paymaster of the navy, and, in 1849, he became paymaster of the South Atlantic coast. He succeeded in the command of the schooner "Narragansett" in West India waters in 1850, and on his return to the United States, was commissioned commodore of the South Atlantic and the Gulf fleets. In 1855, he was made captain and assigned, under the direction of Commodore Perry, to the command of the "Portsmouth," a blockade runner employed by the Confederate States, and in 1862, using the "Narragansett," he succeeded in getting the valuable steamer "Alabama," which was a threat to the Union commerce, with the result, at the time when she was captured by Commodore Blake, was obliged to surrender, as the "Hatteras," no match for her adversary.

BLAKE, Homer Crane, naval officer, b. in Cleveland, Ohio, 1 Feb., 1822; d. 21 Jan., 1880. He was appointed to the navy as a midshipman, 2 March, 1830, and served on the frigate "Constellation," of the East India squadron, 1841-3; the schooners "Preble," 1843-5; at the naval academy in 1843-4; the schooner "Narragansett," 1844-5; and again on the "Preble" until 1848. Until 1856 he served on receiving-ships at New York and Boston, with the exception of two years in the Pacific, and in 1855 was commissioned lieutenant. From 1857 till 1859 he served on the "St. Lawrence," of the Brazil squadron, and from 1859 till 23 March, 1863, he was attached to the home squadron. He was then made lieutenant-commander and given the command of the "Hatteras," of the western gulf blockading squadron, formerly a merchant steamer. On 11 July, 1863, the "Hatteras," while at anchor off Galveston, Texas, was ordered to chase a suspicious vessel, which proved to be the Confederate cruiser "Alabama," after a short action Commander Blake was obliged to surrender, as the "Hatteras," no match for her adversary.
quently took the Yale course with tutors at home. She became interested in women's enfranchisement in 1869, and has since spoken extensively on that subject, addressing committees of Congress and state legislatures on the question. In 1876 she was a member of the delegation from the national association, that presented the woman's declaration of rights in Philadelphia on 4 July, 1876. For the past twenty-four years she has been president of the New York State Woman's Suffrage Association, and she was the first person to ask that Columbia college be open to women. Mrs. Blake has taken an active interest in many political campaigns, and was instrumental in securing the passage of the law giving school-suffrage to the women of New York state. She has been twice married; in 1855 to Frank G. Quay Unsted, who died in 1859, and in 1866 to Grenfell Blake. She has written serial stories for various periodicals and newspapers. Her published works include "Southwold" (New York, 1859); "Rockford, or Sunshine and Storm" (1863); "Fettered for Life" (1873); and "Woman's Place To-day," a series of lectures in reply to Dr. Morgan Dix's lamentations on the "Calling of a Christian Woman" (1883).

BLAKE, Thomas Holdsworth, politician, b. in Calkett, Md., 14 June, 1792; d. in Cincinnati, Ohio, 28 Nov., 1849. He received a common-school education, and then studied law in Washington, D. C. In 1814 he served in the militia of the District of Columbia, and was present at the battle of Bladensburg. Subsequently he removed to Kent-ucke and thence to Indiana, where he began the practice of law at Terre Haute, becoming prosecuting attorney and judge of the circuit courts. He then relinquished his profession and was engaged in business for several years, and also for some time a member of the Indiana legislature. In 1837 he was elected to congress as an Adams republican, but he was defeated as a candidate for re-election. From May, 1842, till April, 1845, he was commissioner of the general land office, having received the appointment to that position from President Tyler. Later he was appointed president of the Watash and Erie canal company, and also sent to Europe as the financial agent of the state of Indiana, where he made satisfactory arrangements with British public authorities.

BLAKE, William Hume, Canadian jurist, b. in Kilkegan, Wicklow, Ireland, 10 March, 1809; d. in Toronto, 17 Nov., 1870. He was graduated at Trinity college, Dublin, and studied surgery under Surgeon-General Sir Philip Crampton, and also studied theology, but before completing his course he emigrated to Canada. He was for some time a farmer near Strathroy, county of Middlesex, Ontario, before he removed to Toronto (then known as York), and studied law. When the Mackenzie rebellion began in 1837 he was appointed paymaster of the Royal Foresters. In 1838 he was called to the bar of Upper Canada, and at once took a leading place in his profession. In 1847 Mr. Blake was elected to parliament for East York (now the county of Ontario), and became solicitor-general in the Baldwin-Lafontaine ministry. In November, 1849, he was appointed to the chancellorship of Upper Canada. He retired from the bench in 1860.—His son, Edward, statesman, was b. in Adelaide, Middlesex co., Ontario, 13 Oct., 1833. He is descended, on his father's side, from the Blakes of Castlegrove, Galway, and on his mother's from William Hume, M. P. for Wicklow. He was born on his father's farm, but was taken to Toronto when a year old. The son followed, professionally, closely in his father's footsteps, as did also his younger brother, Samuel Hume Blake, who never entered public life, but was raised at a very early age to the post of vice-chancellor in the court over which his father formerly presided. Edward Blake was educated at Upper Canada college and University college, Toronto, was graduated from the latter with honors in 1857. He was called to the bar in 1859, and rose rapidly to a foremost position as a chancery practitioner. In 1867 he was a candidate for election at one to the House of Commons, and carried through a government measure. A principle that Mr. Blake always kept before the public was the obligation resting on the government to give the people's representatives detailed knowledge of the despatch of public moneys before they are voted by parliament. This very principle was the final issue on which the Sandfield Macdonald government was defeated in 1871, and it therefore became the most important plank in the platform of its successor. Mr. Blake retained the leadership of the opposition until 20 Dec., 1871, when he succeeded the Hon. John Sandfield Macdonald as premier of the Ontario legislature, but only retained the office for one session, when he resigned, thus setting the example of the dual representation act. In 1873 the conservative ministry, presided over by Sir John A. Macdonald, was compelled to resign, and the liberal party came at once into power, with Alexander Mackenzie as premier. In November, 1873, Mr. Blake was made a member of the Canadian cabinet under the Mackenzie administration, and he held, for various periods, the office of minister of justice and the portfolio of president of the council. He was offered successively the chancellorship of Ontario and the chief justiceship of the supreme court of the Dominion, both of which he refused. While he was minister of justice it fell to his lot to discuss, by correspond-
BLAKE, William Rufus, actor, b. in Halifax, Nova Scotia, in 1807; d. in Boston, Mass., 29 April, 1863. He was of Irish parentage. When only seventeen years old he went on the stage at Halifax, N. S., taking the part of the Prince of Wales, in "Richard the Third," with a company of strolling players. His first appearance in New York was in 1824, at the old Chatham theatre, as Frederick, in "The Poor Gentleman," and the next day, in "The Three Singles." While playing at the Tremont theatre, Boston, in 1827, he received the first call before the curtain ever given to an actor in this country. In 1839 he visited England, making his first appearance there in the Haymarket theatre, London. On 21 April, 1863, while playing Sir Peter Teazle, in the Boston theatre, he was suddenly taken ill, and the next day, Mr. Blake was a man of good education, and a fluent speaker. He excelled in the delineation of old men. One of his best characters was that of Jesse Rural in "Old Heads and Young Hearts." He was, at different times, stage manager of the Tremont theatre, Boston, joint manager of the Walnut street theatre, Philadelphia, and stage manager of the Broadway theatre, New York. He was the author of the plays "New"; "The Turned Head"; an adaptation of Theodore S. Fay's novel "Norman Leslie"; and "The Biggins," a burlesque.—His wife, Caroline Plaide, widow of Leigh Waring, was an actress.

BLAKELEY, Johnston, naval officer, b. near Seaford, county Down, Ireland, in October, 1781; lost at sea December, 1814. His father, John Blakeley, brought him to this country when he was only two years old, and settled in Wilmington, N. C. Young Blakeley was sent in 1790 to New York city, where he spent five years in study, and, in 1796, entered the navy. He subsequently served in the navy of North Carolina. His father died in 1797, leaving him alone in the world, and in 1799 financial troubles compelled him to leave college. On 5 February, 1800, he obtained a midshipman's warrant in the navy. He was made lieutenant 10 Feb., 1807, and in 1813 commanded the brig "En-
terprise," and did good service in protecting the coast trade. On 24 July, 1813, he was made master commander and in August was appointed to the command of the "Wasp." He sailed from Portsmouth, N. H., on a cruise, 1 May, 1814. On 28 June he fell in with the British brig "Reindeer," and captured her after a severe action of nineteen minutes. The "Reindeer" made three unsuccessful attempts to board the "Wasp," and in the last of these her captain, Captain Manners, was killed. The loss of the "Reindeer" was 23 killed, 42 wounded; that of the "Wasp," 5 killed, 22 wounded. Owing to the danger of capture, Blakeley burned his prize, and, having placed a portion of his wounded prisoners on a neutral vessel, put into L'Orient. Congress voted him a gold medal for his exploit. Sailing from L'Orient on 27 July, the "Wasp" made several captures, one of them a vessel laden with military stores. On the evening of 1 Sept., he fell in with the brig "Avon," and compelled her to surrender, but the approach of the two brigs "Castilian" and "Tartar" forced him to abandon his prize, which soon sank. After capturing the "Water Witch," a deep-draft vessel, the "Wasp," on 21 Sept., captured the brig "Atalanta," which was sent to Savannah, and on 24 Nov., Blakeley was made captain. After this nothing more was heard of the "Wasp," or those on board of her, until it was discovered that a Swedish ship had spoken her on 9 Oct., which was the last news of her until she was sunk a few years after. Blakeley was a heavily armed and sparred, and very deep-waisted, founded in a gale. Blakeley's only child, a daughter, was educated at the expense of the state of North Carolina.

BLAKELOCK, Ralph Albert, artist, b. in New York city, 15 Oct., 1847. He was educated in the public schools and in the college of the city of New York, being graduated in 1869. In the same year he travelled through the western states, Mexico, and the West Indies. He has studied his art with no master, but has grown an artist under his own experiments. He has painted landscapes, Indian figures, and moonlight scenes. One of his pictures represents the Tartary, or cataract-dammed, river. In 1882 he exhibited at the national academy "Cloverdale, Cal." "Moonlight," and "The Indian Fisherman"; in 1884, "A Landscape," and "On the Face of Quiet Waters"; and in 1885, "Cumulii." All his works are ideal or creative. Mr. Blakeley's idea of his art is that "the laws of the art of painting are the laws of the creator, as to expression, color, form, unity, harmony, height, depth, tone; when the knowledge is obtained, then we may trust our emotional nature or spirit to create, and then, upon comparison, we find them like nature." He has endeavored to bring out the beauty of a painting by the treatment of color, "until it seems to flow upon the senses under some illusion.

BLANC, Anthony, R. C., archbishop, b. in Sury, France, 11 Oct., 1792; d. in New Orleans, 20 June, 1860. He was ordained in 1816, and in the following year sailed from Bordeaux in company with twenty young missionaries who had volunteered for duty under Bishop Dubourg in the southwestern states. He landed at Arnapolis and was for some months the guest of Charles Carroll at Carrollton. In 1818 he was appointed pastor at Vincennes under Bishop Flanget, and succeeded in erecting two log chapels, the first seen in that country. Bishop Dubourg recalled him to New Orleans in 1820, and he was created bishop of New Orleans in 1833. In 1838 Texas was added to his diocese, which originally consisted of Louisiana and Mississippi. To remedy the evils caused by the size of his episcopate, he obtained from the pope the erection of these two territories within his jurisdiction, and opened a theological seminary for the training of a native clergy. He introduced the Lazarists and Jesuits, and intrusted the schools of higher education to their control. A controversy between the lay trustees of the cathedral of New Orleans and Bishop Blanc at one time assumed an alarming aspect. The bishop was unable to receive the rector whom the bishop had appointed, and an interdict was laid on the church. With the co-operation of other bishops, however, a reconciliation was effected in 1844. As Bishop Blanc had more than doubled the number of churches in his diocese in a few years after his consecration, and as the number of Catholics had largely increased, the council of Baltimore, which met in 1849, advised the pope to erect it into an archbishopric. In 1859, therefore, Bishop Blanc was made archbishop of New Orleans with four suffragan dioceses. In 1855 he visited Rome to take part in the council then sitting, and on his return he introduced the Christian Doctrine to his people. He died in 1862, and left the Mexican war he served as captain of Louisiana volunteers, being at the battle of Monterey and the siege of Vera Cruz, and he re-entered the regular army as major of the 12th infantry, serving till 25 July, 1848. After teaching in the New Orleans public schools he became a surveyor, and was afterward connected with several railroad companies. At the beginning of the civil war, in 1861, he was made a brigadier-general in the confederate army. He was wrongly charged in 1862 with issuing an order that became quite celebrated, urging the inhabitants to fire at the national army from behind trees, and obstruct its passage in every possible way. After Gen. Blaine (Gen. Blaine) was a civil engineer and surveyor in New Orleans.

BLANCHARD, Joseph, soldier, b. in Dunstable, near Nashua, N. H., 11 Feb., 1764; d. 7 April, 1785. He was a mandamus councillor from 1749 till 1758; judge of the superior court of New Hampshire from 1749 till 1757; commanded a New Hampshire regiment in 1753, and was captain at Crown Point. He speculated in lands, and, in conjunction with the Rev. Samuel Langdon, published, in 1761, a map of New Hampshire.

BLANCHARD, Joshua P., peace advocate, b. in 1782; d. in Boston, Mass., in October, 1868. He was the oldest apostle of peace in the United States, laboring for the cause of peace, Dr. Channing and under the leadership of Dr. Worcester. He
gave freely for its aid, and wrote much in support of it. Though one of the most radical on the peace question, however, he was thoroughly consistent, and, having decided that Christianity not only disconcequences but fordes war, he accepted all legitimate inferences from this position.

BLANCHARD, Justus Wardwell, soldier, b. in Milford, N. H., in 1811; d. in Syracuse, N. Y., Oct. 14, 1877. Before the civil war he was captain of the Burgess corps of Albany, N. Y. He entered the national service as captain in the 6d N. Y. volunteers in 1861, became lieutenant-colonel of the 15th, and general of volunteers on 13 March, 1865. He was at Beulah Field in 1861, took part in Banks's Red River expedition, volunteered on a forlorn hope at Port Hudson, and was with Sheridan in his Shenandoah campaign in 1864.

BLANCHARD, Thomas, inventor, b. in Sutton, Mass., 24 June, 1780; d. in Boston, 16 April, 1864. He had a fondness for mechanical employment, and was associated with his brother in the manufacture of tacks by hand. This process was exceedingly slow and tedious, and in 1806 he invented a machine, which he subsequently so improved that five hundred tacks could be made in a minute, with heads and points more perfect than those of the hand-finished work. Thus, for he sold for $5,000 to a company that afterward went extensively into the manufacture. After this he turned his attention to the manufacture of a machine for turning and finishing gun-barrels by a single operation; and this he accomplished, finishing the octagon portion of the barrel by changing the position of the work. The result of this invention, afterward extended to the turning of all kinds of irregular forms, was one of the most remarkable improvements made in the century. During the progress of its development he was employed at the Springfield armory, where he received nine cents allowance from the government for each musket made by his machines, and this was his only compensation during the first term of his patent, originally granted in 1820. In 1831 he received a patent for an improved form of steamboat, so constructed as to ascend rapids or rivers having strong currents, which was used on the Connecticut river and in the west. He introduced several improvements in the construction of railroads and locomotives for the transportation of coal. Before any railroad had ever been built. In 1851 he devised a process for bending heavy timber. He also constructed machines for cutting and folding envelopes at a single operation, and several mortising machines. Mr. Blanchard was awarded more than twenty-five patents for his inventions, for some of which he received ample compensation.

BLANCHET, Francois de. Roussel, Comte de (blahn-shay), French soldier, b. in Dijon, France, in 1755; d. in Paris, 11 April, 1793. He entered the army in 1747 and in 1779 was sent to Martinique, where he became lieutenant-colonel. He successfully defended the island of St. Vincent against the English, for which service he received a grant of land in Tobago, and was made governor in 1781. This office he afterward exchanged for that of Dominica, which he retained until his return to France at the epoch of the revolution. Later he was sent to St. Domingo as governor of the French part of that island; but showing a disposition to desert his post, the men of the island, without his knowledge, he was taken to France, condemned, and executed.

BLANCHET, Augustine Magloire Alexander, R. C. bishop, b. in St. Pierre, Quebec, in 1797; d. in Vancouver, 25 Feb., 1887. After his ordination, in 1821, he performed missionary duties. He was canon of the cathedral at Montréal when he was nominated to the newly created see of Walla Walla in 1845. He reached his diocese in 1847, accompanied by four Oblate fathers and two secular priests, and labored among the Indians for about a year, but with little success, owing to troubles among the natives. The see of Nesqually was erected in 1850, to which he was transferred the same year. He took up his residence at Fort Vancouver on the Columbia, where he built a cathedra. He labored among the Colville, Okanagan, Stelacoom, on Cowlitz river, and among the Chinook. The Catholic population of his diocese had increased to more than 6,000 in 1853, when the territory of Washington, which included the see of Nesqually, was organized. He resigned his diocese in 1879, owing to failing health. During his mission he erected twenty-four churches. He founded colleges at Vancouver and Walla Walla, several institutions conducted by the sisters of mercy, and flourishing missions at Fort Colville, Yakima, and Tulalip.

BLANCHET, Emilio (blahn-shay), Cuban author, b. in Matanzas, Cuba, in 1829. In 1870 he went to Barcelona, Spain, where he received the degree of professor of literature. His principal works are "El anillo de Maria Tudor," a drama; "Presa y Verso" (1858); a "Manual de Cuban History"; "Flores de la Literatura Francesa," and "El Libro de las Explicaciones."
1863 he raised the 17th battalion of volunteer infantry, and became its lieutenant-colonel. He was elected president of the "Cercle de Quebec in 1871; president of the Levis and Quebec gun foundry in 1872, and in 1873 was appointed a member of the Catholic section of the council of public instruction for the province of Quebec. After the St. Alans raid in 1861 he was in command of a battalion on the frontier, and commanded the force on the south shore of the St. Lawrence, Quebec district, during the Fenian war in 1866. He was elected to the provincial legislature, and chosen speaker, in which capacity he officiated from the meeting of the first parliament after the union in 1867 until the dissolution of the second parliament in 1875. He was mayor of the town of Levis for six years, and a representative in the Canadian assembly from 1861 till 1874, when he renounced his seat in that body (in consequence of the operation of the act respecting dual representation) in order to remain in the Quebec assembly, to which he had been first elected in 1867 and in which he continued until 1875, when he was defeated. On 23 Nov., 1875, he was returned for Bellechasse, which he represented until 1873, when he was re-elected for Levis. He was a liberal-conservative.

BLANCO, Núñez Vela, Spanish viceroy of Peru in 1543, during the great troubles among Gonzalo Pizarro, Vaca de Castro, Carvajal, and others. The viceroy tried to leave the country several times, and finally fell in one of the battles fought by the Indians against those that were against him.

BLAND, Richard, statesman, b. in Virginia, 6 May, 1710; d. in Williamsburg, Va., 26 Oct., 1776. He was educated at William and Mary college and at the University of Edinburgh. In 1745 he was elected to the house of burgesses and became one of its most distinguished members. He opposed the stamp act in 1765, and served on the committee to which was referred the question of the right of the king, lords, and commons. In 1765 he was one of the committee appointed to remonstrate with parliament on the subject of taxation. After the dissolution of the house in the following year he was among the first to sign the non-importation agreement proposed at the subsequent meeting held at Raleigh tavern. In 1766 he was made a member of the council of security, and in 1774 a delegate to congress. He was re-elected in 1775, but declined the honor on account of his advanced age. He was a fine classical scholar, and had acquired the name of "Virginia Antiquary" on account of his familiarity with every part connected with the settlement and progress of the colony. Moreover, he was accepted as an authority on all questions touching the rights and privileges of the colony. Mr. Bland published "A Letter to the Clergy on the Two-penny Act" (1760); and "An Inquiry into the Rights of the British Colonies" (1766), which was the first tract written on that subject.—Richard’s nephew, Theodosius Bland, 1st Earl of Guilford, Governor of Virginia, 1778; d. in New York city, 1 June, 1790. In 1753 he was sent to England, and, after preliminary studies at Wakefield, he pursued the academic and subsequently the medical course at the University of Edinburgh. After being admitted to the practice of medicine in England, he returned to this country about 1764. He was a member of the house of burgesses to enact a law forbidding any person to practise medicine in the colony without a proper license. He was among those who removed from Lord Dunmore’s palace the arms and ammunition which that official had abstracted from the public arsenal, and he afterward published a series of bitterly indignant letters against the governor, under the pen-name of "Cassius." He continued active in his profession at least until the beginning of the war, when he at once sided with the colonists and became captain of the first troop of Virginia cavalry. After the enrolment of six companies he joined the main army in 1777 as lieutenant-colonel. Later he became colonel, and throughout the war signalized himself as a vigilant and efficient officer, playing the leading part in the capture of Washington. He especially distinguished himself at the battle of Brandywine, and was placed in command of the prisoners taken at Saratoga, who were marched to Charlottesville, Va. In 1779 he had command of the troops at the Albemarle barracks in Virginia. He served during the war for one westward to California. Subsequently he settled in the continental congress, serving from 1780 till 1783. He was also a member of the Virginia convention of 1788 on the adoption of the federal constitution, and was among those opposed to adoption. Then he became representative from Virginia to the first congress, taking his seat 30 March, 1789. His death occurred during the sessions of the congress, and the news of his decease was announced in that body. He was buried in Trinity churchyard. See the "Memoir of Theodoric Bland," in "The Bland Papers," collected by Charles Campbell (Petersburg, 1849).

BLAND, Richard Parks, congressman, b. near Hartford, Ky., 19 Aug., 1853; d. in Lebanon, Mo., 6 June, 1888. He was an orphan, and worked during the summer months in order to obtain means with which to attend school in the winter. When he became of age he taught, and so was enabled to follow his academic studies. Later he studied law, was admitted to the bar, and practised his profession. In 1883 he removed to Missouri, and then went to California. Subsequently he settled in Virginia City, Nevada, where he became interested in various mining operations, and also devoted his attention to law. In 1860 he became treasurer of Carson co., Nevada, and continued in that office until the organization of the state government. In 1865 he returned to Missouri and served in the legislature of the state, and in 1867 entered into partnership with his brother C. C. Bland. In 1869 he removed to Lebanon, where he followed his profession. In 1873 he was elected to congress from Missouri as a democrat, and he has since been regularly re-elected. He became in 1875 chairman of the committee on mines and mining, and introduced in the 41st congress the well-known "Bland Bill," which provided that the secretary of the treasury shall purchase sufficient bullion to coin the minimum amount of $2,000,000 a month in silver dollars of 41½ grains each, and that these dollars shall be legal tender.

BLASCO, Núñez, one of the Spanish conquerors of America, b. in 1490. After making explorations along the coasts of Darien, he discovered near the gulf of Urabe an island (Panama) separating the two oceans, and had four fortresses built there. He defeated the Indian caciques and attempted to become the sovereign of that portion of America, but was soon overcome by Spanish troops and executed by order of King Ferdinand.

BLASHFIELD, Edwin Howland, painter, b. in New York, 15 Dec., 1848. He was prepared to enter Harvard at the Boston Latin school, but during his course of study there developed a taste for art so pronounced that it was decided to send him abroad. He studied and painted for ten years in Paris, and then, in pursuit of his profession, made

five visits to Italy, several pedestrian trips through Switzerland, and spent some time in Germany and Belgium. His studio is in New York, and when he is in the United States his summers are passed at Little Compton, R. I. He is a member of the Society of American Artists, an associate of the National Academy, and a member of water-color and pastel societies. His favorite subjects are figures, with carefully studied landscape or architecture. His portraits are characterized by a particular devotion to accuracy of detail and picturesque setting. Some of his miniatures are: "The Poet," Paris, 1856; "The Pedagogue," New York, 1857; and "Massachusetts" (1851). - "The Artist" (1858). - A Roman Emperor (1858). "The Peeping-Lessee-Roman Ladies" (1858); and "The Beggar," a fine picture, has been exhibited in the Royal Academy of London and Edinburgh; at the national academy, Peabody; and at Liverpool, Manchester, Bristol, and London. He has been very successful in the exhibition of large canvases. The possession of some of the finest private houses in New York city.

BLATCHFORD, Richard Milford, lawyer, b. in Stratford, Conn. 30 April, 1818; d. in Newport, R. I., 4 Sept., 1879. He was educated at Union in 1836, taught school in Champaign, Ill., and studied law; was admitted to the bar and has been in New York, and rose rapidly in his profession. In 1848 he was appointed financial agent and counsel for the bank of England; later he held the same appointment from the bank of the United States, and in 1860, when the treasury of that bank expired, he succeeded to the position. He was also a member of the board of directors of the First National Bank of New York. In 1863 he was appointed to the vacancy in the office of solicitor of the land department. At the beginning of the civil war he was a prominent member of the union district committee. President Lincoln appointed him, on the committee charged with the management of the large sums of money appropriated for recruiting soldiers for the union army. He was present on the occasion of General A. E. Burnside and General Grant, in 1865. He received the appointment of minister-resident to the United States, and remained in Rome until October 1866. He was a commissioner of Central Park from April, 1886, till April, 1876, when he was succeeded by the operation of the new charter. In 1877 he was appointed a Commissioner of Public Parks, and afterward removed by the appointment of a new charter.

BLITY, William, marchandises, d. in Covington, Kentucky, in 1882.

BLATTSKY.

BLATTSKY.

BLATTSKY.

BLATTSKY. He was educated in the Ohio College, in New York, and was in the army of the United States, 8 May, 1861. He was the son of the late Mr. Blatchford, and was brought up in New York city, and in March, 1889, became an associate justice of the Supreme court of the United States. For twenty-six years he was a trustee of Columbia college, and for several years has published reports of cases in the United States quarterly.

BLIDTHAY, William, lawyer, b. in Sandwich, Ill., about 1840; d. at Duryham Park, Worcestershire, in August, 1772. He was in the English Diplomatic service as early as 1686, clerk of the privy council, and one of the important witnesses; at the trial of the seven bishops for libel under James II., in 1688. He is identified with American affairs through his commissionship of trade and plantations under William III. This board was created by the king in May, 1694, for the management of American affairs. The instructions under which it acted are suggestive, in the light of subsequent history, as indicating the spirit with which England aimed to unite her colonies. Board was directed to inform the colonists of the means of making their lands and resources useful and beneficial to England, and to the means of directing them to the colonists from trades which may pay-preparatory to England." Blackwautt shows us the new charter of Massachusetts, and with the several other documents, only suggests the idea of sending to the local government, by the colonial governor or his agent, for time being, to take the place of the English governors. The new charter of Massachusetts, which was made by Governor John Winthrop, and was in force in his church, many of his manuscripts are preserved in the British museum, at Duryham Park, and in the Aulnay collection described by the Historical and Political Commission.

BLAUVEN, Andreas, d. in Connecticut, in 1674.

BLAULITZKY.
Buddhism or theosophy. Mme. Blavatsky, after spending seven years in a Himalayan retreat studying the mysteries of this subject, came to the United States and was naturalized. About 1853 she founded the Theosophical Society, with Col. Frederick Schwantes, of New York, as president. The objects of the organization are: 1. To form the nucleus of a universal brotherhood; 2. To study Aryan literature, religion, and science; 3. To indicate the importance of this inquiry; 4. To explore the hidden mysteries of nature and the latent powers of man. Branches of the society were founded in America and in England; and subsequently Mme. Blavatsky returned to India, there to establish the society among the natives. She was the author of "Isis Unveiled; a Master-Key to the Mysteries of Ancient and Modern Science and Theology" (New York, 1877), and was editor of "The Theosophist," published in India. See also "Theosophy," Vol. 4, p. 26.

BLEEDSOE, Albert Taylor, educator, b. in Frankfort, Ky., Nov. 9, 1839; d. in Alexandria, Va., Dec. 8, 1877. He was appointed from Kentucky to the U. S. Military Academy, and was graduated in 1861, at which time he served in the 5th Va. and in the 13th Va. He settled in Gibson, Indian territory, till Aug. 31, 1882, when he resigned. From 1883 to 1884 he was adjunct professor of mathematics and teacher of the French language at Kenyon, and in 1884-56 professor of mathematics at Miami. After studying theology he was ordained a clergyman in the Protestant Episcopal Church and was appointed as missionary and co-founder of various churches in Ohio till 1888. Having previously studied law, he began his practice in Springfield, Ill., in 1888, and continued it there and in Washington, D. C., till 1848. During the years 1818-54 he was professor of mathematics and astronomy at the University of Mississippi, and from 1854 to 1861 professor of mathematics at the University of Virginia. In 1861 he entered the Union service as colonel, but was soon made chief of the war bureau and acting assistant secretary of war. In 1863 he went to England to collect material for his work on the constitution, which he published on his return in 1866. He then settled in Baltimore and began the publication of the "Southern Quarterly Library," which under his editorship assumed a theological tone and became the recognized organ of the Methodist Episcopal Church South. In 1868 he became principal of the Loises school, Baltimore, and in 1871 was ordained a minister in the Methodist church. In addition to numerous contributions to periodicals he published "An Examination of Edwards on the Will" (Philadelphia, 1845); "A Theodicy or Vindication of the Divine Glory" (New York, 1853); "Liberty and Slavery" (Philadelphia, 1857); "Is Davis a Traitor? or was Secession a Constitutional Right previous to the War of 1861?" (Baltimore, 1866); and "Philosophy of Mathematics" (Philadelphia, 1866).

BLEEDSOE, Jesse, senator, b. in Calppeper co., Va., 6 April, 1776; d. near Nacogdoches, Texas, 30 June, 1837. When a boy he emigrated to Kentucky and then studied at the Transylvania seminary, where he became a fine scholar. He afterward studied law and practiced with great success. In 1804 he became secretary of state under Gov. Charles Scott, and in 1813 was a member of the legislature. He was elected U. S. senator from Kentucky, and served from May, 1813, to 1815. From 1817 till 1820 he was state senator. In 1820 he was a presidential elector, and in 1822 was appointed circuit judge in the Lexington district. Accordingly he settled in Lexington, where he also became professor of law in Transylvania University. Later he returned to the practice of his profession, in 1851 removed to Mississippi, and in 1853 to New Orleans, where he practiced and examined electric material at the time of his death.

BLEECKER, Ann Eliza, poet, b. in New York city, Oct. 1732; d. in Tomhannock, near Albany, N. Y., May 23, 1873. She was the youngest daughter of Brandt Schuyler, of New York, and passed her early life in that city. In 1769 she married John J. Bleecker, of New York. After his death, in 1813, she retired to a year's residence in Poughkeepsie, settled in Tomhannock. Here her life was very happy until the arrival of Burgoyne's army in 1777, when she fled with her young children under conditions of great suffering, reaching Albany at first, and then Red Hook, where she remained until after the surrender of New York and the return of her husband from the army. She then returned to her home at Tomhannock where she was taken sick and died. Her poems, devoted principally to domestic topics, were rather melancholy, and were written as the occasion suggested, without any intention of publication. A number of these, however, appeared in the "New York Magazine." Some years after her death her son published under the title of "Posthumous Works of Ann Eliza Bleecker in Verse and Prose," with a memoir by her daughter. Margaretta V. Faugeres (new ed., New York, 1890).

BLEECKER, Anthony, author, b. in New York city in October, 1770; d. there 19 March, 1827. He was the son of Anthony Lippsenard Bleecker, who resided on the estate through which Bleecker street now passes, and from which it has taken its name. He was graduated at Columbia in 1791 and studied law, but never was a successful practitioner on account of his unconquerable diffidence. His natural tastes led him to the pursuit of letters, and for thirty years he was a prolific contributor of both prose and verse to the papers. After he had left his home at Tomhannock she was taken sick and died. Her works, devoted principally to domestic topics, were rather melancholy, and were written as the occasion suggested, without any intention of publication. A number of these, however, appeared in the "New York Magazine." Some years after her death her son published under the title of "Posthumous Works of Ann Eliza Bleecker in Verse and Prose," with a memoir by her daughter. Margaretta V. Faugeres (new ed., New York, 1890).

BLEECKER, Richard Wade, b. in New York city, 27 Aug., 1821; d. there, 21 April, 1875. He was engaged in business in New York city, and for some time was president of the North American Life Insurance Company. He was an active patron of the arts and sciences, and the literary receptions held at his residence were attended by prominent artists and authors. Mr. Bleecker was a member of the New York Historical Society, a fellow of the National Academy of Design, a member of the American Institute, and also of other art and historical societies both at home and abroad.
March, 1813. His career in congress was memorable for his opposition to the war of 1812. From 1822 till 1834 he was a regent of the University of the State of New York. In 1825 he was appointed chargé d'affaires at the Hague, where he remained until 1832, when he returned to Albany, N. Y.

BLENAc, Charles de, governor of the French colonies in the West Indies and South America from 1712 to 1736. He died, soon after he was recalled by the king of France, in the latter year. During his administration, which was most prosperous, the secretaries of finance, justice, and police for the French section of the island of Santo Domingo were first appointed, 1718. Several revolts (from 1720 to 1728) were suppressed by pacific means. Then Blenac procured a revocation of the privileges of the West India company which were the cause of the troubles, the company having the exclusive right to import slaves into the island. Blenac also put an end to filibustersm, which had long been the only occupation of many men in Hayti. He promoted agriculture and commerce.

BLENKER, Louis, soldier, b. in Wurms, Hesse Darmstadt, Germany, 31 July, 1812; d. in Rockland co., N. Y., 31 Oct., 1863. In his youth he was apprenticed to a jeweller, but on becoming of age he enlisted in the Bavarian legion that was raised to accompany Prince Otho, then recently elected king, to Greece. When the legion was disbanded in 1837, he received the rank of Lieutenant. He then returned home and began the study of medicine in the University of Munich, but soon gave this up to engage in the wine business in Worms. In 1849 he was a leading member of the revolutionary government in that city, and also burgomaster and commander of the national guard. He fought in several successful engagements with the Prussians; but the revolutionists being soon completely crushed, he retired into Switzerland. In September, 1849, having been ordered to leave that country, he came to the United States and settled in Rockland co., N. Y., where he undertook to cultivate a farm. Later he engaged in business in New York, and continued until the beginning of the civil war, when he organized the 8th regiment of New York state volunteers, of which he was commissioned colonel, 31 May, 1861.

After some time spent in Washington his regiment was incorporated with others into a brigade attached to Col. Miles's 5th division in Gen. McDowell's army. During the first battle of Bull Run this division acted as a reserve, and covered the retreat with great steadiness, recovering two Union colors left on the field of battle by retreating soldiers. For his services at that time he was commissioned brigadier-general of the volunteers 9 Aug., 1861. He remained with the Army of the Potomac until the beginning of the peninsular campaign, when he was ordered to western Virginia. He took an active part in the battle of Cedar Keys, 8 June, 1862; but after the arrival of Gen. Fremont he was succeeded by Gen. Sigel. Gen. Blenker was then ordered to Washington, and on 31 March, 1863, was mustered out of service. He returned to his farm in Rockland co., where he remained until his death, which resulted from internal injuries received from a fall of his horse in entering the town of Warrenton, Va., while with his command.

BLENNERHASSETT, Harman, scholar, b. in Hampshire, England, 8 Oct., 1764 or 1765; d. on the island of Guernsey, 1 Feb., 1831. He was educated at Westminster school, London, and at Trinity college, Dublin, where he also studied law, and received a degree of B. A. in 1790. Having succeeded to the family property, he spent some time in travel on the continent, where he acquired the republican ideas that were prevalent at that time. He therefore decided to settle in the United States, and, after marrying Miss Querist, of Quebec, he sailed in 1797 for New York. In 1798 he purchased a small island in the Ohio river, a few miles below Parkersburg, then called Backus island. Here he erected a spacious mansion which he fitted up with rich furniture, costly pictures and statuary, and had the surrounding grounds elaborately cultivated. In this romantic locality he passed his time in the study of chemistry, galvanism, astronomy, and similar sciences, and in dispensing a generous hospitalty to his many distinguished guests. Among the latter was Aaron Burr, who visited him in 1803, and succeeded in interesting him in his treasonable schemes, the real character of which Blennerhassett probably did not realize. The fortune that had been so liberally expended in the fitting up of his property had become somewhat diminished, and he gladly entered upon any enterprise by means of which large returns might be secured. In pursuit of this he purchased the views of Burr in the "Ohio Gazette," under the pen-name of Querist, and he also invested large sums of money in boats, provisions, arms, and ammunition for the expedition. Soon after this he went to Kentucky, whence, on being warned of Burr's real designs, he returned to his island greatly disheartened; but in response to the repeated solicitations of Burr and to the persuasions of his wife, he persisted in the undertaking. A proclamation against the scheme having been issued by President Jefferson, Blennerhassett, who was expecting arrest, escaped from the island, and, eluding pursuit, joined Burr at the mouth of Cumberland river. Meanwhile his home was overrun by a party under Col. Phelps, who wantonly destroyed much of the property. Burr's scheme hav-
ing resulted in total failure. Blennerhassett was arrested, but was soon discharged. He then attempted to return to his island home, but while on his way was again arrested at Lexington, Ky., and thrown into prison. He secured the legal services of Henry Clay, who was unsuccessful in procuring his discharge, and in consequence he was taken to Richmond for trial on a charge of treason. The prosecution against Burr having failed, Blennerhassett and the other conspirators were discharged in 1807. His property had been seized by creditors, the beautiful grounds used for the cultivation of hemp, and the mansion converted into a storehouse for the preservation of crops. It was afterward purchased by the State of Ohio, and converted into the home of some careless negroes. Blennerhassett then settled in Natchez, and afterward purchased 1,000 acres of land for the cultivation of cotton, near Port Gibson, Miss.; but this venture proved unfortunate.

The war of 1812 prevented the success of most commercial enterprises, and his property steadily diminished. In 1819, after the death of his wife, the Hon. S. W. H. Safford's "Life of Harman Blennerhassett" (Cincinnati, 1853) and "Blennerhassett Papers, embodying the Private Journal of Harman Blennerhassett" (New York, 1864), John S. C. Abbott, under the title of "And who was Blennerhassett?" has very pleasantly, in "Harper's Magazine" for February, 1857, spoken of the life of this interesting man.

—His wife, Adeline Agnew, whom he married in 1796, was a woman of great beauty and much talent. She was an accomplished linguist and a poet of some ability. Her works include "The Deserted Isle" (1822) and "The Widow of the Rock, and other Poems" (1824). In 1842, after the death of her husband, she retired to Andover. Mid 1844, she petitioned Congress for a grant of money as compensation for the spoilation of her former home. The petition was presented by Henry Clay, and a committee of the Senate reported favorably upon it; but she died before the bill was acted upon, and was buried in New York by sisters of charity.

BLISS, Daniel, missionary and translator, was born in Cambridge, Mass., Aug. 17, 1813. He was educated at Harvard College and Andover Theological seminary, and graduated in 1834. He was ordained in the American Church and went to Sierra Leone as a missionary in 1850. He translated the Bible into the language of the Makalipas in 1855. He was also a linguist and did valuable work among the Lenni-Lenape of America.

BLISS, Daniel, Canadian jurist, b. in Springerfield, Mass., in 1742; d. in Fredericton, New Brunswick, June 14, 1822. He was born in 1763, and studied in the office of Lt.-Gov. Hutchinson. He was a member of the general court of Massachusetts in 1768, was one of the seventeen recusanders, and was proscribed under the act of 1778. He removed to New Brunswick with other loyalists in 1783, and in 1785 he was elected to the provincial legislature, and the same year, while he was president of the legislature, he was appointed attorney-general of the province. In 1789 he became chief justice, which office he retained until his death. He was also president of the council. One of his sons, William Blowers, became a judge of the supreme court, Halifax, and another, Henry, was a lawyer in London, and for many years agent for New Brunswick in England.

BLISS, Philip Paul, singing evangelist, b. in Clearfield co., Pa., 9 July, 1858; d. near Ashtabula, Ohio, 29 Dec., 1876. His early years were passed in the wilds of Pennsylvania and Ohio, and his education was of the most rudimentary description; but he possessed an innate passion for music, which at first was only cultivated by imitating his father singing hymns. When about ten years old, he, for the first time, heard a piano, and was unable to resist the temptation that lured him through the open door and into the room. He stood spell-bound until the music ceased, and the player, becoming aware of his presence, barefooted and in rags, hastily ordered him away. A musical convention in Rome, N. Y. The following winter he, for the first time, attended a singing-school in Trinidad, Pa., and in 1873 he taught school in Rome, his vocal powers developing through constant exercise. In the summer of 1869
he was providentially enabled to attend the normal academy of music at Geneseo, N. Y.; and in the following winter began to teach music and to compose songs, which soon attained local popularity. During 1865 he was drafted into the army, and reported for duty at Carlisle barracks; but, as the war was over, he was soon discharged. During the twelve years beginning with 1864 he wrote the songs that have made him famous. In 1865 he formed a business partnership with a Chicago firm, and held musical conventions and gave concerts throughout the northwestern states. His fame as a “singing evangelist” did not spread beyond the localities where his engagements led him until a chance meeting with D. L. Moody, the famous revivalist leader, brought about a warm friendship between the two, and resulted in his self-consecration to missionary labors that carried his songs all over the world. But it was not until 1874 that he deliberately devoted himself to evangelistic work, though he had always been religiously inclined, and had united with the Baptist church at Elk Run, Pa., when thirteen years old. A fine personal and inventive genius and a wonderful voice, gave him an irresistible power over miscellaneous audiences. His singing, though not scientific, according to classical standards, appealed strongly to the hearts of the multitudes. According to an expert, the “chest range” of his voice was from D flat below to A flat above, and this without straining or confusing the vowel sounds. The power of his voice was supplied by a message signalled by flag during the civil war from Kanesaw mountain, Georgia, to Attoona Pass, twenty miles distant, over the heads of the enemy. It ran thus: “Hold the fort; I am coming.—W. T. Sherman.” These words and the inspiring air that Mr. Bliss composed to accompany them have been sung wherever he is spoken of. Others of his compositions have commanded a popularity hardly second to that of “Hold the Fort.” Among them are “Down Life’s Dark Vale We Wander,” “Hail, Jehovah! ’Tis done!” “Jesus Loves Me,” and “Pul for the Shore, Sailor!” As a conductor of popular meetings for the purpose of stimulating religious zeal, Mr. Bliss was remarkable. A society of which he was the only organ throughout the United States and Canada, and his influence as a revivalist was extraordinary. He lost his life in a railway disaster near Ashtabula, Ohio, where a bridge gave way under the train. When last seen alive Mr. Bliss was striving to rescue his wife from the burning wreck. His “Memories” by D. L. Moody and Ira D. Sankey, were published in 1877. The published collections of his songs are “The Charm” (1871); “The Song Tree” (1872); “The Joy” (1873); and “Gospel Songs” (1874).

BLISS, Porter Cornelius, journalist, b. in Erie co., N. Y., 28 Dec., 1838; d. in New York city, 27 May, 1879. He was a son of the Rev. Bliss, for many years missionary to Indians on the reservations in western New York. He studied at Hamilton and Yale, and in 1860 travelled through Maine, New Brunswick, and Nova Scotia to investigate the condition of the remnants of Indian tribes, and in 1861 became private secretary to James Watson Webb, appointed minister to Brazil. In 1862 Mr. Bliss was commissioned by the Argentine government to explore the Gran Chaco, where he spent eight months in learning the Indian dialects and investigating the antiquities. The results were published by the government. He edited for a short time, at Buenos Ayres, the "River Plate Magazine," and then went to Paraguay, where he became private secretary of the U. S. minister, Charles A. Washburn, in 1866. President Lopez commissioned him to write a history of Paraguay; but while he was engaged in this work the war between that country and Brazil began, he fell under suspicion, and was thrown into prison, where he was tortured to compel him to confess that he had been a Brazilian spy. At the end of three months, (October, 1868) he was released on the demand of the U. S. government, supported by the presence of an American squadron. He went to Washington, was a translator in the war department, edited the "Chronicle" for a year and a half, and was then (July, 1870) appointed secretary oflegation in Mexico, which office he held for four years. During that time he made archaeological explorations, and wrote much on the condition of Mexico and its opportunities for American enterprise. By his sole personal exertions he saved from execution three American officers in the army of Diaz, who had been captured and condemned by a court-martial, "in the summer of 1874 Mr. Bliss came to New York, and the next year, 1875, he published "Mr. Bliss’s Cyclopaedia." After that he edited a weekly called "The Library Table," wrote a history of the Russo-Turkish war of 1877, and in 1879 went to South America as a correspondent of the New York "Herald." He was for two years president of the philological society, and was an enthusiastic student of natural and musical science. He was a son of Capt. John Bliss (West Point, 1811), and was graduated at the U. S. military academy in 1833. After serving in the Cherokee war of 1833-4, he was assistant professor of mathematics at West Point from 1834 till 1840, and then became assistant adjutant-general at the headquarters of the western military departments, 1842 till 1845. During the Mexican war he was chief of staff to Gen. Taylor, and took an active part in the engagements of Palo Alto, Resaca de la Palma, Monterey, and Buena Vista. In appreciation of his conduct as a soldier, the state of New York presented him with a gold medal, and for gallant action he was brevetted lieutenant-colonel. From 4 March, 1848, till 9 July, 1850, he was private secretary to President Taylor, whose youngest daughter he married. Subsequent to the death of Taylor he was adjutant-general of the western division, with headquarters at New Orleans, La., from 19 Nov., 1850, till his death.

BLITZ, Antonio, pretidigitateur, b. in Deal, Kent, England, 21 June, 1810; d. in Philadelphia, Pa., 28 Jan., 1877. At the age of thirteen years he began his career in Hamburg, Germany. After travelling for two years in northern Europe, he returned to England, appearing first in Dover in December, 1835. He then visited Ireland and Scot- land. In 1837 he went to America, where he performed in New York, travelled throughout the country. Later he visited Canada and the West Indies. On his return from the south he settled in Philadelphia, Pa., where he resided until his death. His experiences have been related in "Fifty Years in the Magic Circle" (Hartford, 1871), written by him.

BLOCK, or BLOK, Adriaen, navigator. Within three years after the discovery of Hudson river (1610) Block visited Manhattan (now New York) bay, making a successful voyage and bringing back to Amsterdam a cargo of rich furs and two sons of native seamen. In 1614, encouraged by an ordinance of the states-general favoring explo-
ration, he brought out another ship, the “Tiger,” one of a fleet of five equipped by merchants for trading, and again visited Manhattan. The “Tiger” was accidentally burned in port, but Block and his crew built a yacht of sixteen tons, named the “Unrest,” with which he explored the neighboring waters. First of all Europeans, he dared the perilous passage of Hell Gate, and, sailing eastward through Long Island sound, discovered the “River of Red Hills” and the “Freshwater,” known to us respectively as the Ronsonic and the Connecticut. The latter he explored as far as the site of Hartford. Still pushing eastward, he navigated among the islands off Long Island and the color of the clay on parts of the coast. The island had, however, been previously discovered by English navigators. He discovered Block island, which bears his name. He sailed as far north as Nahant, and then, leaving the “Unrest,” first of American-built yachts, at Cape Cod to be used in the fur trade, he returned to Holland in one of the ships that accompanied him in the westward voyage.

**BLODGET, Lorin, physicist, b. near Jamestown, Chautauqua co., N. Y., 25 May, 1823.** He was educated at Jamestown Academy and at Geneva (now Hobart) College. In November, 1851, he became assistant at the Smithsonian Institution in charge of researches on climatology, and at the meeting of the American Association for the advancement of science, held in Cleveland in 1853, he presented seven papers on atmospheric physics. These early contributions were among the first ever published in this country on that subject, and were of value in establishing the science. From 1852 till 1856 he was associated with the engineers on the Hawaiian and California expeditions for the determination of altitudes and gradients by means of the barometer. The latter part of this period was spent in the war office, to which he had been transferred. In 1857, he published “The Climatology of the United States and of the Temperate Latitudes of the North American Continent,” which was the most ambitious work on that subject ever issued in this country. It was extensively circulated, and 500 copies sent to Europe were disposed of in six months. The book was highly complimented by Humboldt. In 1863 he was placed in charge of the financial and statistical reports of the treasury department, and in that capacity published several volumes of official reports. From 1863 till 1877 he was U. S. appraiser-at-large of customs, and during 1874–5 he was special assistant of the treasury department. While connected with the government service he wrote reports on finance, revenue, industrial progress, and census of industry. From 1858 till 1865 he was secretary of the Philadelphia Board of Trade. In 1857 he published “North American,” published there. His publications include 150 bound volumes and 350 pamphlets, with thousands of editorial articles. The most important of these are probably the accounts of his researches on climatology, and were published by the government. His "Commercial and Financial Resources of the United States" (1844) was published in 1844, was translated into German, and much did to sustain the credit of the United States in the money markets of the old world. The industrial census of Philadelphia has been taken four times by him, and he has resided in that city since 1857.

**BLODGET, Samuel, colonial patron, b. about 1560, d. 17 April, 1624; in Haverhill, Mass., 1 Sept., 1807.** He participated in the French and Indian war, was a member of the expedition against Louisbourg in 1745, and afterward became a judge of the court of common pleas for the county of Hillsborough, N. H. In 1783, with a machine of his own invention, he raised a valuable cargo from a ship sunk near Plymouth, and then went to Europe for the purpose of engaging in similar enterprises. He met with discouragement in Spain, and the proposition in England to raise the “Royal George” was unsuccessful. On his return to the United States he established a duck factory in 1791, and in 1793 removed to New Hampshire, where he began the canal that bears his name, around Amoskeag falls in the Merrimack. He expended a large fortune on the work, and was left, therefore, being able to complete the work, and, becoming financially embarrassed, was for a time imprisoned for debt. See “Massachusetts Historical Collections” (new series, vol. iv).

**BLODGET, Foster, politician, b. in Augusta, Ga., 15 Jan., 1826; d. in Atlanta, 12 Nov., 1877.** He became mayor of Augusta in 1857, and was re-elected in 1860, but was defeated in 1861. During the civil war he was captain of the Blodget artillery, from Augusta. After the war he joined the republican party and was appointed postmaster of Augusta in 1865, but was removed from that office in 1868, and re-instated in 1869. In 1867 he was made president of the Union Republican Club of Augusta, and during the same year he was again elected mayor. He was a delegate to the constitutional convention of 1867, and in 1870 claimed to have been chosen U. S. senator from Georgia, but failed to secure his seat, as the senate decided in favor of the claims of Thomas M. Norwood.

**BLOEDE, Marie, author, b. of a noble family in Switzerland, in the county of Berne, in 1792; d. in New York in 1870.** Her brother, Friedrich von Sallet, was a poet of merit and an intense liberal in his political views, who died in 1843. His sister shared his poetical gifts and his liberal sympathies. She married early, and in opposition to the wishes of her family, Dr. G. Bloede, and in the revolution of 1848 her husband was arrested, tried, and condemned to death, and Dresden, but escaped to the United States. Her poems and articles, both in English and German, attracted attention. Her husband, as the editor of the “New-Yorker Demokrat,” a daily republican paper, received assistance from her literary labors.

**BLOMMAERT, Samuel, colonial patron, b. about 1560, d. 17 April, 1624; in Haverhill, Mass., 1 Sept., 1807.** He participated in the French and Indian war, was a member of the expedition against Louisbourg in 1745, and afterward became a judge of the court of common pleas for the county of Hillsborough, N. H. In 1783, with a machine of his own invention, he raised a valuable cargo from a ship sunk near Plymouth, and then went to Europe for the purpose of engaging in similar enterprises. He met with discouragement in Spain, and the proposition in England to raise the “Royal George” was unsuccessful. On his return to the United States he established a duck factory in 1791, and in 1793 removed to New Hampshire, where he began the canal that bears his name, around Amoskeag falls in the Merrimack. He expended a large fortune on the work, and was left, therefore, being able to complete the work, and, becoming financially embarrassed, was for a time imprisoned for debt. See “Massachusetts Historical Collections” (new series, vol. iv).
included in the purchase. A palisaded fort was built, with the "red lion, rampant," of Holland adjoined to its gate, and the country was called Swannendael, while the water was called Godyu's bay. The estate was further extended, on 5 May, 1639, by the purchase of a tract twelve miles square on the coast of Cape May, opposite, and the transaction was duly attested at Port Amsterdam. The existence of the Virginian barrier for Delawares came down upon it in revenge for an arbitrary act on the part of Hosset, and it was destroyed, not a soul escaping to tell the tale. According to acknowledged precedent, occupancy of the wilderness served to perfect title; but before the Dutch could reoccupy the desolated site at Lewes, the English were practically in possession.

BLONDIN, Emile Gravelet, b. in St. Omer, France, 28 Feb., 1824; d. in London, Eng., 22 Feb., 1897. In 1855 he was engaged by William Niblo to perform with the Ravel troupe in New York, and was subsequently part proprietor of a circus. On 30 June, 1859, he accomplished the remarkable exploit of crossing the Niagara River on a tight rope, and after having crossed with a man on his right arm, he performed similar feats in other parts of America and Europe. The rope on which he crossed, a short distance below the falls, at a height of 150 feet from the water, was 1,300 feet long and 3½ inches in diameter.

BLOODGOOD, Delavan, surgeon, b. in Springville, Erie co., N. Y., 20 Aug., 1831. He was graduated at the Medical College of New York in 1852, studied medicine in the college of physicians and surgeons, New York city, Michigan University, and Jefferson Medical College, Philadelphia, where he received his degree of M. D., and entered the U. S. navy as assistant surgeon 13 March, 1857. In his first cruise, in the steam frigate Merivale, he was detailed for duty in the coasting service. He was ordered to the Pacific coast blockading squadron when a supposed epidemic broke out among the employés of the Pacific steam navigation company at Tobago. At the beginning of the civil war he was on duty in the gulf of Mexico, and afterward in Hampton Roads, receiving promotion as surgeon 24 Jan., 1862. He was subsequently attached to the West India flying squadron when yellow fever became epidemic on the Pearl, and was ordered to the Guiana blockading squadron when a severe epidemic of small-pox occurred. He was ordered to the "Jamestown" at Panama in February, 1867, and was one of the few survivors of the virulent epidemic of yellow fever that raged among the men. He was promoted 22 Aug., 1884, to medical director, and assigned to the naval laboratory in Brooklyn, N. Y.

BLOODGOOD, Simeon DeWitt, merchant and author, b. in Utica, N. Y., in 1799; d. in New York city, 14 July, 1866. He wrote "The Saxenagery, or Reminiscences of the American Revolution" (Albany, 1833), and a treatise "On Roads" (1839), and contributed largely to the periodical press. A few months before his death he was appointed consul-general for the United States at Shanghai.

BLOODWORTH, Timothy, statesman, b. in 1763; d. near Washington, N. C., 24 Aug., 1814. He was for thirty years a member of the legislative assembly of North Carolina; member of the continental congress in 1786–7; a member of congress in 1790 and 1791; U. S. senator, 1807–1809, and afterward collector of the port of Wilmington. He was brought up in poverty, followed by turns the callings of farmer, smith, preacher, doctor, wheelwright, and politician, and was noted for his benevolence.

BLOOMER, Amelia Jenks, reformer, b. in Homer, N. Y., 27 May, 1818; d. in Council Bluffs, Iowa, 30 Dec., 1894. She married, and lived in Seneca Falls, N. Y., where she wrote frequently on the enfranchisement of women, and on 1 Jan., 1849, issued the first number of "The Lily," a semi-monthly publication, devoted to temperance and woman's rights, which attained a circulation of 1,000. In 1853 she removed with her husband to Mt. Vernon, Ohio, where she continued the publication of "The Lily," and was also associate editor of the "Western Home Journal," a literary weekly. In 1855, on account of her husband's business interests, they removed to Council Bluffs, Iowa, where it was impracticable, for lack of manufacturing and postal facilities, to continue the publication of the paper, which she therefore, sold to Mary B. Birsball. She afterward took up woman's rights as well as in the columns of her paper, and took a prominent part in the movement for woman suffrage. She also lectured on temperance in the principal cities of the north-west, and adopted and publicly recommended a sanitary dress for women, known as the Bloomer costume, which was first introduced by Elizabeth Smith Miller, of New York, and consisted of skirts reaching just below the knee and Turkish trousers. In the winter of 1855 Mrs. Bloomer addressed the territorial legislature of Nebraska on the subject of conferring the ballot on women. She took part in organizing the Iowa state suffrage association, and was at one time its president. She lectured the following year extensively from public life, devoting her time to her family.

BLOOMFIELD, Joseph, soldier, b. in Woodbridge, N. J.; d. in Burlington, N. J., 3 Oct., 1883. He studied law until the beginning of the war of independence, when he was made a captain in Day- ton's regiment, the 3d New Jersey, in 1776, and served through the war, attaining the rank of major. He was governor of the state of Vermont, 1832–3, and, after practising for some time at Burlington, became attorney-general of the state. He was governor of New Jersey in 1801–12, was brigadier-general during the war of 1812–5, was a representative in congress during 1817–21, and chairman of a committee on revolutionary pensions. He was a member representing a county position in the Senate and House of Assembly, and was speaker of the latter.

BLOSSOM, Thomas, pioneer, d. in Plymouth, Mass., in the summer of 1635. He was a deacon of the church of Plymouth, and a correspondent of Gov. Bradford, who speaks of him as one of "our ancient family in Holland." The church records describe him as being "a holy man and experienced saint," and one "competently accomplished with abilities."

BLOT, Pierre, cook, b. in France about 1818; d. in Jersey City, N. J., 26 Aug., 1874. He aimed at popularizing good cookery and effecting economy in the preparation of food, published a series of magazine articles in which he imparted practical information and discouraged the consumption of game and of strong wines of little nutritive value. His cookery, entitled "What to Eat, and how to Cook it" (New York, 1863), containing over a thousand recipes. He also lectured on that subject, established schools of instruction in the art, and engaged in business enterprises in Brooklyn and New York, partly with the view of carrying into effect his views as to the preparation of good cookery.

BLOUNT, William, statesman, b. in North Carolina in 1744; d. in Knoxville, Tenn., 21 March, 1800. He was a son of Jacob Blount, who was a member of the provincial assemblies of 1775–6. He was a delegate from North Carolina to the old congress in 1782–3 and 1786–7, member of the assembly from Newbern in 1780 and 1781, a signer of the federal constitution in 1787, and it
1790 was appointed governor of the territory south of the Ohio. Chosen president of the convention to form the state of Tennessee in 1796, he was its representative in the U. S. senate in 1796, but was expelled in July, 1797, for being concerned in a conspiracy to deliver New Orleans to Great Britain, and for having instigated the ideas of Spain and Governor he knew to assist the British in conquering the Spanish territory of Louisiana. The proceedings against him increased his popularity in Tennessee, and he was elected to the state senate, and chosen president of that body.—His brother, Thomas, soldier, was b. in Edgecombe co., N. C., in 1790; d. in Washington, Tenn. He was a lieutenant in the revolutionary army at sixteen, became deputy paymaster-general in 1780, and, with the rank of major, commanded a battalion of North Carolina militia at Eutaw Springs. He became a major-general of militia, and was a representative in congress in 1789–91, 1805–9, and 1811–2. He again sat in Congress, being elected as a democrat.—Another brother, Willie, governor of Tennessee, was b. in North Carolina in 1767; d. near Clarksville, Tenn., 10 Sept., 1835. He was secretary to his brother William while the latter was territorial governor of Ohio, and afterward removed to Montgomery co., Tenn., and was soon returned to the legislature. He was governor of the state from 1813 to 1817.

BLOW, Henry T., statesman, b. in Southampton co., Va., 15 July, 1717; d. in Saratoga, N. Y., 11 Sept., 1835. He went to Missouri in 1830, and was graduated at St. Louis university. He then engaged in the drug business and in land-speculating, in which he was successful. Before the civil war he was a member of the state house of representatives, and served four years in the state senate. In 1861 he was appointed minister to Venezuela, but resigned in less than a year. He was a republican member of congress from 1863 till 1867, and served on the committee of ways and means. He was minister to Brazil from 1868 to 1871, and was appointed one of the commissioners of the District of Columbia in 1874.

BLOWERS, Sampson Salters, jurist, b. in Boston, Mass., 22 March, 1742; d. in Halifax, N. S., 25 Oct., 1812. He was a grandson of Rev. Thomas Blowers, minister, of Beverly (1701–29), was graduated at Harvard in 1763, and studied law under Gov. Hutchinson. In 1768 he was chosen a junior counsel, in 1770, in the defense of the British soldiers concerned in the Boston massacre. Being a loyalist, he went to England in 1774, but returned in the spring of 1778 to his native city, and after a short imprisonment went to Halifax, where he successfully pursued his profession. In 1785 he was appointed attorney-general and speaker of the assembly as a democrat, and in 1786 he was appointed a justice of the supreme court, having had for some years a seat in the council. In 1799 he became chief justice of Nova Scotia, with the presidency of the council, which offices he resigned in 1833.

BLUNT, Edmund March, author, b. in Portsmouth, N. H., 29 June, 1759; d. in Sing Sing, N. Y., 2 July, 1802. He was a bookseller and publisher, and published the Newburyport "Herald." In 1796 he published his first "American Coast Pilot," which is still in use and has been translated into most of the languages of Europe. About thirty editions of this work, which describes all the ports of the United States, with sailing directions, list of lighthouses, and other knowledge important to seamen, have been issued. He also published "Stranger's Guide to N. Y. City" (1817), and numerous nautical books and charts.—His son, Joseph, lawyer, b. in Newburyport, Mass., in February, 1792; d. in New York city, 16 June, 1890, first came into notice by writing on the Missouri question in 1820. Soon afterward he wrote an article on the Loyalist circular, published in the "North American Review," which attracted the attention of politicians. He was long a leading Whig and protective, was one of the first members of the republican party, and drew up the original resolutions of the republican state convention at Saratoga in 1834. Mr. Blunt declined the commissionship to China offered him by President Fillmore. He was appointed an assistant secretary of the navy, in 1840. He edited the "American Annual Register" (1827–60), and published "Historical Sketch of the Formation of the American Confederacy" (New York, 1853); "Speeches, Reviews, and Reports" (1843); "Merchants' and Shipmasters' Assistant" (1829 and 1848).—Another son, Edmund, hydrographer, b. in Nantucket, Mass., 29 Nov., 1790; d. in Brooklyn, N. Y., 2 Sept., 1850, made a long journey and a taste for practical mathematics, and when scarcely seventeen made the first accurate survey of New York harbor. In 1819–20 he made the first survey of the Bahama banks and the shoals of George and Nantucket, and in 1824 surveyed the entrance of New York harbor from Barneget to Fire Island. In 1825–6 he surveyed the coast from the San Juan to the Pacific ocean for a canal on the Nicaragua route. In 1827–30, as a private enterprise, he surveyed Long Island sound from New York to Montauk Point. On the organization of the U. S. coast survey in 1852 he was appointed first assistant, holding that place till the time of his death. In 1855–6 he surveyed the western side of the exterior line of New York harbor. While he was on the coast survey his attention was directed to the inferiority of the lights in the American light-houses, and he was the proposer and advocate of the introduction of Fresnel's system of signal-lights. He also invented the dividing-engine. He was a partner of his brother, in the firm of E. & G. W. Blunt, nautical publishers, of New York.—Another son, George William, author, b. in Newburyport, Mass., 11 March, 1802; d. in New York city, 19 April, 1878, was a sailor from fourteen to nearly twenty-one years of age. From 1822 till 1839 he was a publisher of charts and nautical books in New York, and was engaged in marine surveys on the Bahama banks and New York harbor, neither of which had been recently surveyed. In 1834 he called the attention of the government to the superiority of the French light-houses, as his brother Edmund did in 1833, and the result was the establishment in 1856 of the present light-house board, and the adoption of the French system. In 1845 he was one of a committee to organize the present system of pilotage for New York. He was appointed a pilot commissioner in that year, and continued to be one, except during six months, to the time of his death. In 1857 he was made a harbor commissioner to protect the harbor of New York. He was for five years a trustee of the seamen's retreat, and in 1852 "a commissioner of emigration. He published "Atlantic Memoir," "Sheet Anchor," "Pilot Laws and Harbor and Quarantine Regulations of New York" (New York, 1869), and "Plan to Avoid the Centre of Violent Gales" (1867), and prepared several editions of the "American's Guide to N. Y. City."
college, Columbus, Ohio, in 1849, and practiced medicine in Darke co. until 1856, when he settled in Anderson co., Kansas. He took a prominent part in the contest over the introduction of slavery into Kansas, and was a member of the convention that framed the constitution of the state. In July, 1861, he entered the army as lieutenant-colonel of the 3d Kansas volunteers. He commanded the cavalry in Gen. James H. Crittende, and on 8 April, 1862, was promoted brigadier-general and assigned to the command of the military department of Kansas. On 22 Oct., 1862, in the battle of Old Fort Wayne, his Kansas and Cherokee troops routed the confederate force concentrated at Maysville, on the western border of Arkansas. On 28 Nov. he attacked and defeated Marmaduke's forces at Cane Hill, Ark. On 7 Dec., 1862, he encountered and defeated, with the aid of Gen. Herron, the Confederates under Hindsman at Prairie Grove, and thereby checked the advance of the southern troops into Missouri. On 28 Dec. he captured Fort Van Buren on Arkansas river. He was promoted to major-general, 29 Nov., 1863. In June, 1863, being relieved of command of the troops, he took the field with the army of the frontier. On 16 July, 1863, he defeated Gen. Cooper at Honey Springs; and on 28 Oct., 1864, at Newtonia, Mo., with the assistance of Gen. Sanborn's cavalry, his troops gave the final blow to Price's invasion of Missouri. During the latter part of the war he was in charge of the department of the district of southeast Kansas. After he was mustered out he settled in Leavenworth, Kansas.

BLYDEN, Edward Wilmot, negro author, b. in St. Thomas, West Indies, 3 Aug., 1832. His parents were of pure negro blood, of decided character and strong religious feeling. Young Blyden received his first instruction at the secular schools of the island; but the stimulus of the higher training came from the late Rev. J. P. Knox, of Newton, L. L., who was temporarily in charge of the Reformed Dutch church at St. Thomas. At the instance of this gentleman, young Blyden came to New York in 1843, seeking entrance into some American college. But so hostile to negroes was the country that he encountered that he gave up his purpose, and was about returning to his island home. At this juncture the New York colonization society offered him a free passage to Liberia, West Africa, which country he reached in January, 1850. He at once entered the Alexander high school, then under the charge of the Rev. David Wilson, and began acquiring a classical education with a view to the ministry of the Presbyterian church. He was graduated at this school in 1858, and soon afterward became its principal. Very early in life Dr. Blyden developed a decided talent for languages, and he has since become distinguished in that branch of learning. At the age of ten, during a brief residence in Venezuela, he began to study the Spanish language. At Alexander high school he became proficient in Latin, Greek, and Hebrew, and to these he added French and Italian at a later period. In 1876 he undertook Arabic, and went to the Orient to improve his knowledge of that language. His attainments have placed him in many responsible positions in the republic of Liberia. As a preacher and teacher he has filled the positions respectively of Presbyterian pastor, principal of the Alexander high school, professor, and in 1880 president, of Liberia college, commissioner to the general assembly of the American Presbyterian church in 1891, and again in 1890. At the age of nineteen he was editor of the "Liberia Herald," and since then he has been government commissioner to the colored people of the United States. He has held the offices of secretary of state and of the interior several times. Twice he has been appointed minister to the court of St. James. He has published "Liberia's Offering" and "From West Africa to Palestine" (1873). His contributions to periodicals include "The Negro in Ancient History," "A Liberian in South America," "Mechanization and the Negro Race," "Christianity and the Negro Race," "Islam and Race Distinctions," and "Africa and the Africans."

BLYTHE, James, clergyman, b. in Mecklenburg co., N. C., 28 Oct., 1765; d. near Hanover, Ind., 30 May, 1842. He was graduated at Hampden-Sidney in 1789, studied theology under the Rev. Dr. Hall, and was ordained pastor of the Presbyterian church in Pisgah, Ky., 25 July, 1793. When the Kentucky academy, for which he had secured contributions in the eastern states, was merged into the university of Transylvania, he was called to the chair of mathematics and natural philosophy. He received the degree of D. D. from Princeton in 1805. In 1812 he began the publication of the "Evangelical Record and Western Review," which only reached the second volume. He was president of Transylvania college for several years, but resigned about 1818 and established a seminary for young ladies, continuing his connection with the college as professor of chemistr, 1821. He left Transylvania in 1830, and while flying at the same time a pastoral charge as associate pastor of the church in Lexington. In 1832 he accepted the presidency of South Hanover college, which he resigned in 1836. He was subsequently pastor of the New Lexington church.

BLYTHE, Samuel, British naval officer, b. in 1743; d. in London, 1794. He was a man of decided talent, a "Boxer," which engaged the American cruiser "Enterprise," commanded by Lient. Burrows, off Portland, Me., on 4 Sept., 1814. Capt. Blythe's ship, having been riddled with shot, was captured and taken into Portland. The commanders of both vessels left at the first exchange of shots, and were buried side by side with military honors in Portland. "Blythe's" is the subject of one of Longfellow's tenderest poems.

BOARDMAN, David Sherman, lawyer, b. in 1768; d. in New Milford, Conn., 2 Dec., 1864. He was graduated at Yale in 1783, was admitted to the bar in 1785, and soon took a high rank in the profession. For several years he was chief justice of the supreme court of Connecticut. Judge Boardman was a friend of Fitz-Greene Halleck, and also of the poet's father.

BOARDMAN, Elijah, senator, b. in New Milford, Conn., 7 March, 1759; d. in Boardman, Ohio, 8 Oct., 1833. After receiving a classical education, he turned his attention to business pursuits, and was very successful. He was a member of the lower branch of the Connecticut legislature, and for some time a member of the executive council. In 1821 he was elected to the U. S. senate from Connecticut, and served in the 17th congress. His death occurred at Boardman, Ohio, a town in which he was largely interested.

BOARDMAN, George Dana, missionary, b. in Livermore, Me., 8 Feb., 1801; d. in Burmah, 11 Feb., 1831. He was the son of a clergyman, was graduated at Waterville in 1822, studied at Andover theological seminary, and was ordained in the Baptist church, with the intention of becoming a missionary, at West Yarmouth, Me., 16 Feb., 1825. He married Sarah Hall, 4 July, and on the 16th sailed for Calcutta, where he arrived 2 Dec.,
1825. After acquiring the Burman language, he entered upon his labors at Mauthinmain in May, 1827, and planted a mission, which became the central point of all the Baptist missions in Burmah. In April, 1828, he established a mission at Tavoy, where he soon afterward baptized the first-born Karen convert, whose labors were very successful among his countrymen. On 5 Feb., 1828, he set out on a tour among the Karen villages, and met with such success that he determined upon a systematic course of itinerary labor. On these trips he was usually accompanied by Ko-mah-lyn or some other devoted mission clothing. During the progress of his health and on his early death by consumption. His widow married the Rev. Adoni-ram Judson, the missionary. See "Memoir of George Dana Boardman," by the Rev. A. King (Boston), and "G. D. Boardman and the Burman Mission" (Boston, 1875).—His son, George Dana, clergyman, b. in Tavoy, May 28, 1838, was graduated at Union College in 1852, and at Newton theological institution in 1855, and in that year became pastor of the Baptist church at Barnwell, S. C. But his views on the slavery question impelled him to exchange his charge in 1856 for a church in the north. He was pastor of the 2d Baptist church in Rochester, N. Y., until 1861, and afterward in the church in Batavia, N. Y., sides review articles, sermon, and addresses, he has published "Studies in the Creative Work" (New York, 1878); "Studies in the Model Prayer" (1879); "Epistles of the Risen Lord" (1879); and "Studies in the Mountain Instruction" (1889).

BOARDMAN, Henry Augustus, clergyman, b. in Batavia, N. Y., Oct. 31, 1829; d. in New York, N. Y., May 15, 1889. He was graduated at Yale in 1852 with the highest class honors, and at Princeton theological seminary in 1856. He was a leading member in Presbyterian societies, and pastor of the 10th Presbyterian church of Philadelphia from 1853 till 1876, when he became pastor emeritus. His published works include: "The Scripture Doctrine of Original Sin" (Philadelphia, 1852); "Hints on Cultivating the Christian Temper"; "On High-Church Episcopacy"; "Correspondence with Bishop Doane on the Oxford Tracts" (1841); "The Prelatical Doctrine of the Apostolical Succession Examined" (1844); "The Importance of Religion to the Legal Profession" (1849); "The Bishop and the Counting-House" (1853); "Vanity of a Life of Fashionable Pleasure"; "Discourse on the Low Value set upon Human Life in the United States" (1853); "The Great Question, Will you Consider the Subject of Personal Religion?" which passed through many editions (1855); "Discourse on the American Union" (1855); "The Christian Minis-try is a Priesthood"; "The Book" (1861); and "Earthly Suffering and Heavenly Glory" (1875). Passages from his writings were published under the title "A Handful of Corn" (New York, 1884).

BOARDMAN, Charles, naval officer, b. in Maryland; d. in Martinsburg, W. Va., 13 Sept., 1879. He was appointed a midshipman from the District of Columbia, after attending the naval school at the navy-yard in Washington, he was ordered to the sloop "Erie," and then attached, during the war of 1812, to the brig "Jefferson" on Lake Ontario. He was commissioned as lieutenant, 15 March, 1817; as commander, 9 Feb., 1857; as captain, 29 March, 1844, commanding the sloop "Essex" in the Brazil line, from 1844 till 1850, and the navy-yard at Brooklyn from 1852 till 1855. During the civil war he was on special service. He was retired with the rank of commodore on 4 April, 1867, and made a rear-admiral on the retired list, 15 Aug., 1876.

BOBADILLA, Francisco (bo-bah-deel'-ya), Spanish official; d. 29 June, 1652. He was sent to Santo Domingo to re-establish order and to put an end to secessions, arriving in 1500. He ordered Columbus and his brother sent to Spain as prisoners in chains. When they arrived at Cadiz, Queen Isabella and King Ferdinand disapproved of Bobadilla's action, renstated Columbus in his honors and emoluments, and immediately sent Nic-olis de Ocampo to replace Bobadilla. Under his administration the island, with a coast of alarming extent. Columbus landed again in His-paniola on the very day that Bobadilla and several of his supporters started for Spain. Their fleet was hardly out of sight when it was wrecked by a hurricane, and Bobadilla perished.

BOCK, Thomas Stanley, b. in Buckingham county, Va., 6 Aug., 1891. He pursued the study of law, and began practice at Appomattox Court-House, Va., was state's attorney in 1845—6, sat for several terms in the house of delegates, was elected to congress as a democrat in 1846, and sat for seven successive terms, until the ordinance of secession was enacted. In 1861 he was elected to the house of representatives in the 39th federal congress, and was elected speaker of the confederate house of representatives on its permanent organization, 18 Feb., 1862.

BODEGA Y CUADRA, Juan Francisco (bo-deh-ga), South American navigator, b. in Lima, Peru; d. in 1794. He won a high rank in the Spanish navy, was ordered to San Blas, exploring the coast of Californ, and constructed a special chart of them, which was engraved and published in Mexico in 1788.

BODISCO, Waldenmar de, b. in Russia; d. at Jordan Alum Springs, Va., 31 July, 1878. He came to this country at an early age with his parents, and in 1829 settled in Marshall county, Va., and was graduated at Georgetown college. For nearly twenty years he was secretary of the Russian lega-tion at Washington, in 1866 and 1869 acted as chargé d'affaires, and was appointed Russian consul-general in New York in 1871, holding that office at the time of his death.

BODMER, Johann, artist, in Zurich, Switzerland, in 1817; d. 31 Oct., 1883. He travelled in America with Maximilian, prince of Wied, and executed the copper-plates in the atlas accompanying the latter's "Journey through North America" (1835—43). He also drew a series of water-colors, reproduced and published in 1836 under the name of "Costumes et personages indiens." He re-sided subsequently in Paris and in Germany, painting pictures of animal life, and etching.

BODWELL, Joseph Robinson, governor, b. in Methuen, Mass., 16 June, 1818; d. in Hallowell, Me., 15 Dec., 1887. He opened quarries, in 1852, on an island in Penobscot bay, and organized the Bodwell, and, in 1870, the Hallowell granite company. He served twice in the state legislature, and in 1886 was elected governor by the republicans.

BOEHLER, Peter (lay ler), Moravian bishop, b. in Frankfurt-on-the-Main, Germany, 31 Dec., 1712; d. in London, England, 27 April, 1773. He was graduated at Jena, and in 1736 became a tutor. On 16 Dec., 1757, he was ordained a Moravian min-ister by Caspar Andrew, founder of the brotherhood. In 1738 he was sent as a Moravian evangelist to the negro population of Carolina and Georgia; but on his way thither he was detained for several months in England, and became acquainted with
John and Charles Wesley, and a number of awakened students at Oxford. His influence upon John Wesley formed and directed, to a considerable extent, the religious convictions of the founder of Methodism, and it is recorded in Wesley's published journal that Boehler was the person through whose instrumentality Wesley was brought to believe in Christ. Having reached Georgia, Boehler developed a trial colony of Moravians beside negroes and Ogilverope's colonists, and subsequently in the German settlement in South Carolina.

When the Moravian colony, in consequence of the war with Spain, was broken up in 1740, he led the remnant to Pennsylvania, and there established the settlement of Bethlehem. On the Delaware river Boehler was met by Count Zinzendorf, Nitschman, the first bishop of the renewed Unitas Fratrum, and the elders David Nitschman and Arna, who had come to America on a mission to the Indians. He accompanied them in their perilous undertaking, and underwent severe toils and privations. In 1741 he returned to Europe, and two years later brought a large colony of Moravians to America. For several years he officiated as pastor of the Moravians at Bethlehem, and came to be recognized as one of the superintendents of the sect. As the church expanded, the community of Nazareth was founded by Boehler near the original settlement. In 1745 he again went to Europe, where, on 10 Jan., 1748, he was consecrated to the episcopal office. He visited many of the churches in England, Ireland, Wales, and America. After discharging the duties of his office in various parts of Germany and England, he arrived in 1753 a third time in America, where he assisted in superintending the Moravian churches until 1764, when he was called to Germany to take his seat in the Diet of Berlin, which met at the withe Unitas Fratrum. He died while on an official visit to the English churches. Bishop Boehler is highly esteemed, even at the present day, both among Wesleyans and Methodists; the former, as a visible token of what he did for John Wesley, have built a memorial chapel in London, known as the Peter Boehler chapel. See T. P. Lockwood's "Memorials of the Moravians of North America.""
BOGARDUS

charges brought against him, before the classis in Amsterdam. The vessel entered Bristol channel by a mistake, and struck upon a rock, going down with eighty persons, among them Bogardus and Kieft.

—His wife, Annetje Jansen, corrupted into Anna Trincks, an Indian, who resided at the village of Beverwyck, N. Y., 19 March, 1663. She first came to America in 1630, with her first husband, Roelof Jansen, of Waterland, who had been sent out by Patroon Van Rensselaer as assistant steward to Albany. They afterward removed to New Amsterdam, among the earliest Dutch settlers. Here in 1635, they obtained Gov. Oranje and Van Twiller a grant of sixty-two acres of land, the present boundaries of which are the North river, Christopher street, Bedford street, West Houston street, Sullivan street, Canal street, West Broadway, Bar-

clay street, Broadway, and Fulton street, around to the river again. Shortly afterward Jansen died, leaving Anneke with four children. In 1638 she married Everardus Bogardus. After the death of Dominic Bogardus, Anneke, again a widow, with four additional children, continued to reside in the city, and in 1654 she obtained from Gov. Stuyvesant a patent in her own name of the farm above mentioned. In her will she named as her sole heirs Sarah Reedofson, Katriny Reedofson, Jannetty and Rachel Hartzger (two children of her deceased daughter Frytie), and John Reedofson, her children by her first husband, and William, Cornelius, Jonas, and Peter Bogardus, children of the second marriage. On 27 Aug., 1664, the grant of land was confirmed by the English government, as may be found recorded in the office of the secretary of state at Albany in the "Patent Book," pp. 28-30.

In 1670 part of the land, a salt meadow north of Canal street, was sold at public auction; but the sale was never carried out, on account of some alleged flaw in the title. In 1671 five of the heirs conveyed the whole farm (or bonery) to Col. Francis Lovelace, then governor of the province of New York. But one of the sons, Cornelius, did not join in this conveyance, and therefore his heirs have always claimed that they have a right to their share of the property. In 1705 the estate, then known as the "King's Farm," was leased or granted by the colonial authorities under Queen Anne to Trinity church; and, in spite of many contests, that corporation has continued to enjoy all the benefits and revenues of the vast property to this day. Nicholas Brover, one of the heirs, brought a suit in ejectment in 1750, claiming that the title was not in Queen Anne. He was non-suited by default, renewed his suit in 1760, and was in 1762 dismissed. In 1780, when he married an heir, brought an unsuccessful suit in the New York supreme court, to recover a part of the property. In 1830 three other heirs had a similar experience. Chancellor Walworth in 1834 dismissed a suit brought by Jonas Humbert. In 1847 Cornelius Brower brought nine suits, all of which were dismissed. In these Vice Chancellor Sanford, after examining every fact on both sides, decided that, waving all other points, the church had acquired a perfectly valid title by undoubted possession longer than the limitation at which title might be gained by possession in 1705, when the land came to the church. The accompanying view represents New York at that time.

BOGARDUS, James, inventor, b. in Catskill, N. Y., 14 March, 1800; d. in New York city, 13 April, 1874. He was the son of a school education afforded by his native town, at the age of fourteen was apprenticed to a watchmaker, and soon became skilled as a die-sinker and engraver. His inventive ability was first manifested by an eight-day, three-wheeled chronometer clock, for which he received the highest premium at the first fair of the American Institute, and which portraits of the queen, by Robert Peel, and numerous other distinguished persons were engraved, and he also agreed to construct in London a machine for engine-turning that would copy all kinds of known machine engraving, but could not imitate its own work. The British government in 1839 offered a reward for the best plan of manufacturing a steel watch, that submitted to him was selected from among 2,000 competing designs, and it is still in use. His later inventions include a machine for pressing glass, appliances for shining India-rubber fabrics, and for cutting India-rubber into fine threads. Besides improvements in drilling-machines and in eccentric mills, he patented in 1843 a sun-and-planet horse-power, and a dynamometer for measuring the speed and power of machinery while in motion. His factory in New York city, built in 1847 entirely of cast-iron, five stories high, was the first building so constructed in the United States, and probably the first in the world. His success in this undertaking led to his engaging in the business, and to about 300 competitors or producers of similar machinery, which can be used without a line and is very accurate, and also made numerous improvements in the manufacture of tools and machinery.

BOGARDUS, Robert, lawyer, b. in 1771; d. in New York city, 29 Nov., 1840. He practised law in New York for nearly fifty years. In the war of 1812 he was, from July, 1813, till June, 1815, colonel of infantry. He was also a member of the New York state senate.
BOGART, Elizabeth, poet, b. in New York city about 1806. She was a daughter of the Rev. David S. Bogart, and contributed to periodicals, chiefly the New York "Mirror," under the pen-name of "Estelle," her first pieces appearing in 1825. Specimens of her poetry are reprinted in Griswold's "Female Poets of America." She wrote two prize stories entitled "The Effect of a Single Folly" and "The Forged Note," evincing constructive ability; but "He Came too Late," and other poems, were her most admired productions.

BOGART, William Henry, author, b. in Albany, N. Y., 28 Nov., 1810; d. in Aurora, N. Y., 21 Aug., 1888. His early life was passed at Aurora. Here he was educated. His first book was "Who Shot the Whippoorwill?" a book of historical reminiscences; but his chief work was done as the "Sentinel" correspondent of the New York "Courier and Enquirer," and the New York "World," in reviving the taste for American antiquarian history, especially of the colonial period of New York. He contributed a monograph on Cornelius and William H. Vanderbilt to the "New York Genealogical and Biographical Record" for April, 1886.

BOGGS, Charles Stuart, naval officer, b. in New Brunswick, N. J., 29 Jan., 1811; d. there 29 April, 1888. A nephew ofCapt. James Lawrence, he entered the navy 1 Nov., 1826. He was present at the battle of Manilla 6 Sept., 1846, on "Princeton," of Com. Conner's squadron, during the Mexican war, was present at the siege of Vera Cruz, and commanded the boat expedition that destroyed the "Truxton" after her surrender to the Mexicans. He was promoted commander, 14 Sept., 1855, and assigned to the U. S. mail steamer "Illinois," which he commanded three years. He then became inspector at New York, U. S. Navy Yard, and Washington territory. In 1861 he was ordered to the gun-boat "Varuna," of Farragut's gulf squadron. In the attack on Forts St. Philip and Jackson, in April, 1862, he destroyed six of the Confederate gun-boats, but finally lost his own vessel, which steamed ahead of the fleet and engaged the Confederate ships in the flotilla. He was attacked by two rams and ran into the banks of the river and there sank, causing, however, the destruction of her antagonists, which were both burned. He returned to Washington as bearer of despatches, and was ordered to the command of the new sloop-of-war "Junias." He was promoted to the rank of captain on 16 July, 1862, and was made a commodore, 25 July, 1866. He commanded the steamer "De Soto," of the North Atlantic squadron, in 1867-8. In 1869-70 he was assigned to the European fleet, and prepared a report on the condition of steam-engines afloat. On 1 July, 1870, he received promotion to rear-admiral, and was appointed light-house inspector of the 3d district on the coast.

BOGGIS, Libbun W., pioneer, b. in Kentucky in 1798; d. in California in 1861. He was governor of Missouri in 1836, and took a prominent part in the expulsion of the Mormons. In 1846 he migrated to California, and in the years 1847-9 was alcalde of the Sonoma district, where he gained reputation for his energy and ability in the laying position during the period of the interregnum.

BOGLE, James, painter, b. in Georgetown, S. C., in 1817; d. in Brooklyn, N. Y., 11 Oct., 1873. He came to New York in 1836 and entered the studio of Prof. Morse, inventor of the telegraph and the founder of the national academy of design. Mr. Bogle, like Rembrandt, excelled in painting, soon achieved distinction in that department. In 1850 he was elected an associate of the national academy, and in 1861 an academician. For many years his pictures occupied annually a prominent position at the academy; but he exhibited only at rare intervals in the later years of his life, when the state of his health compelled him to live in the south. He executed portraits of John C. Calhoun, Henry Clay, Daniel Webster, Chief-Justice Jones, Bishop Atkinson, of North Carolina, De Witt Clinton, and Rev. Dr. Budington. Among his later pictures were portraits of Gen. John A. Dix and Henry J. Raymond.

BOGY, Lewis Vital, senator, b. in St. Genevieve, Mo., 9 April, 1813; d. in St. Louis, 20 Sept., 1877. He was descended from the early French settlers of St. Louis. His father, John Bogle, a regent of the university of St. Louis, was for some years a clerk, afterward studied law in Illinois and Kentucky, was graduated at the Lexington law school, Ky., in 1835, and began practice in St. Louis. He was several times elected to the legislature, and in 1867-8 was commissioner of Indian affairs. He was interested in the development of the mineral resources of the state, and was a projector of the St. Louis and Iron Mountain railroad, of which he was president for two years. He was elected to the U. S. senate as a democrat in 1873, and served on the committees on Indian affairs, land claims, and education and labor.

BOHLEN, Henry, soldier, b. in Bremen, Germany, 29 July, 1835; near Rappahannock Station, Va., 22 Aug., 1862. He enlisted to the U. S. states when young, and settled as a liquor merchant in Philadelphia, acquiring wealth in that trade. In 1861 he became colonel of the 75th Pennsylvania (German) volunteers, and was attached to Gen. Blenker's command, was made brigadier-general of volunteers, 28 April, 1862, and served with his regiment in the Rappahannock, and fell while directing the movements of his brigade in a skirmish near that river. He led his brigade across the river to attack a detachment of Longstreet's division, but was assaulted by superior numbers, and re-crossed under cover of the batteries.

BOHORQUES, Juan (bo-or'-kes), Mexican prelate, b. in the city of Mexico late in the 16th century; d. in Mexico. He was sent to the college of St. Louis in Puebla, filling several high ecclesiastical offices in Mexico, and representing his country at the court of Madrid and his ecclesiastical province at Rome. Philip III. of Spain caused Bohorques to be appointed bishop of Curacas in 1610, but soon afterward he was placed in charge of the bishopric of Mexico in 1617, Mexico, which he administered until his death.

BOHORQUES, Pedro (bo-or'-kes), Spanish soldier, b. in 1657. He served in the army of Peru and made the Indians believe that he was a descendant of the Incas and must reinstate the Peruvian kingdom. He set out to discover the Paititi, a kind of El Dorado, a name applied to the white palace, which was said to be at the borders of Guallago river. He found only a very poor Indian town belonging to the Paelados, which was very poor, and came to account of their utmost misery. They proclaimed him sovereign; but he soon grew weary of his miserable kingdom, disappeared from there, and was twice a prisoner by Spanish troops. He was sentenced to death and executed in the city of Lima.
BOISE, James Robinson, educator, b. in Blandford, Mass., 27 Jan., 1815; d. in Chicago, 9 Feb., 1895. He was graduated at Brown in 1840, became a tutor of Latin and Greek in that college, and in 1843 professor of Greek, which chair he held until 1856. From 1852 to 1868 he was professor of Greek in the university of Michigan, and after 1868 in the university of Chicago. He published in Chicago Vanderslice's "American," with English notes, the first six books of Homer's "Iliad," "Greek Syntax," "First Lessons in Greek," and other text-books, and in 1884 "Notes Critical and Explanatory on St. Paul's Epistles.

BOIKER, George Henry, author, b. in Philadelphia, Pa., 6 Oct., 1829; d. there, 2 Jan., 1890. He was the son of a wealthy banker, and graduated at Princeton in 1842, and studied law, but did not practise. In 1847, after his return from a tour in Europe, he published "The Lesson of Life, and other Poems," followed in 1848 by a tragedy called "Ca- hyenas," which was successfully brought out on the stage in England. He next produced in succession the tragedies of "Anne Boleyn" (1850), "Leonor de Guzman," and "Francesca da Rimini." Among his other plays are "The Betrthal" and "The Widow's Marriage." In 1856 he published in Boston two volumes of "Plays and Poems." Among his individual poems, "The Ivory-Carver," "The Podesta's Daughter," "Song of the Earth," "A Ballad of Sir John Franklin," and "Dirge for a Soldier," are noteworthy. During the civil war he wrote many patriotic lyrics, collected in a volume and published under the title of "Poems of the War" (Boston, 1864). Later works were "Street Lyrics," "Königs mark, and other Poems" (1869), and "The Book of the Dead" (1882). In the autumn of 1871 he was appointed by President Grant U. S. minister to Turkey, and in 1875 was transferred to the more important mission of Russia. He returned to Philadelphia in 1879. Mr. Boker's dramas are classical in form, and his sonnets and other lyrical poems greatly admired. He also wrote vigorous and eloquent press articles, especially for the New York Morning Post, which were contained in the reports of the union league club, of which he was secretary from the time of its establishment until recently, when he was elected its president. His latest work was a volume of sonnets, which appeared in 1886.

BOLIVAR, Gregorio, Spanish missionary. Early in the 16th century he preached the gospel for twenty-five years among the Indians of Mexico, Peru, and other regions where European civilization had not yet reached. He belonged to the Franciscan order, and left a curious work entitled "Memorial de Arbitrios para la Separacion de España.

BOLIVAR, Simon, the liberator, leader in the struggle for South American independence, b. in Caracas, Venezuela, 24 July, 1783; d. in San Pedro, near Santa Martha, 17 Dec., 1830. His father was Juan Vicente Bolívar y Ponte, a wealthy proprietor of Peru, of noble descent, as was also his mother, Maria Concepcion Palacios y Sojo. Losing his parents early, young Bolívar was brought up by his uncle, the Marqués de Palacios. After receiving a liberal education at home, he spent several years in the study of law in Madrid, and in travel, soon in the south of Europe. He remained some time in Paris, and was a witness of the closing scenes of the revolution. Returning to Madrid, he married, in 1801, a daughter of Don N. Toro. Embarking for America with the intention of devoting himself to the care of his estate, Bolívar lost his young wife, who died when her husband was in the act of leaving Europe to assure his sorrow, in 1804, and spent five years in Paris. On his return to Venezuela, in 1809, he passed through the United States, where he had the opportunity of observing the working of free institutions. He soon afterward joined in the revolutionary movement in South America, and, having, in the month of April, 1810, received a colonel's commission from the junta, and was sent with Luis Lopez Mendez to Great Britain to purchase arms and solicit the protection of the government, returning in 1811 with a cargo of arms. After the declaration of Venezuelan independence, 5 June, 1811, he joined the forces, was attached to Gen. Miranda's staff in September as lieutenant-colonel, and was placed in command of the important fortress of Puerto Cabello. He lost that place, the strongest fortified post in the country, through a revolt of the Spanish prisoners of war in the citadel. The fortress was reoccupied by the Spaniards under Moutovryde, the Spanish troops regarded as the best in the New Granada, Bolívar went to Cumaná, where he had taken refuge, to Carthagena, and obtained a commission to operate against the royalist forces on Magdalena river. He set out in January, 1813, with 300 men, enlisted for the expedition from refugees at Carthagena. Manuel Castillo accompanied him with 500 grenadiers, detailed for the expedition by the president of Carthagena, but soon decamped with his force. Bolívar and his cousin Ribas advanced up the river, driving the Spaniards out of Tenerife, Mompos, and other places as far as the valley of Cucuta on the Venezuelan border. He then determined to endeavor to rekindle the revolution in Venezuela and risk another encounter. Hearing of the unexpected movements in New Granada, Bolivar, with other officers, who attributed their failure to the inactivity of Miranda, apprehended the latter at La Guayra, and delivered him up to the Spanish authorities. Hearing of his movement, Gen. Miranda, on the authority of the congress, signed the treaty of Victoria, restoring Venezuela to Spanish rule, 25 July, 1812. Bolivar, with other officers, who attributed their failure to the inactivity of Miranda, apprehended the latter at La Guayra, and delivered him up to the Spanish authorities. Hearing of his movement, Gen. Miranda, on the authority of the congress, signed the treaty of Victoria, restoring Venezuela to Spanish rule, 25 July, 1812. Bolivar, with other officers, who attributed their failure to the inactivity of Miranda, apprehended the latter at La Guayra, and delivered him up to the Spanish authorities. Hearing of his movement, Gen. Miranda, on the authority of the congress, signed the treaty of Victoria, restoring Venezuela to Spanish rule, 25 July, 1812. Bolivar, with other officers, who attributed their failure to the inactivity of Miranda, apprehended the latter at La Guayra, and delivered him up to the Spanish authorities.
met Gen. Monteverde at Lostaguenas and inflicted upon him a crushing defeat, following upon reverses at Niquialo, Betisoque, Caracá, Barquisimeto, and Varinas. Gen. Monteverde was compelled to fall back upon Puerto Cabello and shut himself up in the fortress with the remnant of his army. Gen. Fiero, governor of Caracas, signed the capitulation at Victoria, and on 4 Aug., 1814, Bolivar entered Caracas at the head of the liberating army. Gen. Marínó had recovered from the royal troops the eastern part of the province, and assumed the title of dictator of eastern Venezuela. Bolivar was honored with a triumphal entry into the capital, being conveyed on a car drawn by twelve young ladies, proclaimed himself dictator and liberator of the western provinces of Venezuela, invested with a bodyguard, and established the "Order of the Liberator." The enthusiasm of the people was dampened by this display of courtly pomp, and by the arrogance of Bolivar's officers, while the royalists concentrated their forces and applied all their efforts to regaining possession of Venezuela. Several sanguinary battles were fought, in which the revolutionists were at first successful. Public dissatisfaction impelled Bolivar, on 1 Jan., 1814, to call together a junta of influential citizens of Caracas and offer to resign the dictatorship into their hands, but the assembly, by its decision on the following day, insisted upon his retaining the supreme military and civil authority. The Spanish general Boves, collecting a large force, ranged for a desultory encounter, marched, in June, 1814, from Calabozo upon La Puerta, where the united forces of Bolivar and Marínó were encamped. The revolutionary army was split up into three divisions as the Spanish army came up, and on 11 June Boves inflicted upon the patriots a ruinous defeat near Cura, and well-nigh annihilated their army, killing 1,500. The Spanish took Caracas, and defeated Bolivar a second time at Aragua.

Bolivar escaped to Cumaná with some of his officers, and sailed thence to Carthagena, proceeding thence to Tunja, where the revolutionary congress was sitting, and offered his services to the confederated provinces of New Granada. Notwithstanding his misfortunes and the treachery of his numerous enemies, he was appointed commander-in-chief of the forces of the federal republic, and ordered to march against Cundinamarca, the president of which province refused to acknowledge the authority of the central government and the union of the provinces. He liberated Cundinamarca, and took possession of the seat of government at Bogotá. He appeared before that city in December, 1814, with 2,000 men, carried the suburbs by storm, and forced the leaders of the defection to capitulate. For this service he received the thanks of congress, which immediately made Sante Fé the seat of government. Bolivar was then sent to recapture Santa Marta, which had fallen into the hands of the enemy, being the only sea-port in New Granada in their possession. Castillo, the commandant in Carthagena, refused to supply the troops with arms and ammunition ordered from the citadel, whereupon Bolivar led his forces against that city, laid siege to it, and remained there till May. Meanwhile, Gen. Morillo had arrived from Spain with large reinforcements, debarked on the island of Margarita, 25 March, 1816, took the Spanish garrison in Santa Marta, and soon afterward captured Carthagena.

Bolivar, on 10 May, 1815, embarked with about a dozen of his officers for Kingston, Jamaica, where he looked for assistance. While he remained in Jamaica, for eight months, New Granada was overthrown by Morillo's troops, and the patriots in Venezuela and Gen. Arismendi in the island of Margarita held their ground against the Spaniards. In Kingston, Bolivar narrowly escaped being murdered by a hired assassin, who stabbed his secretary instead of him. From Kingston he went to Port au Prince, in Hayti. On his promising to emancipate the slaves, President Petion, of Hayti, dispatched with four negro battalions. In Cayes he met Admiral Brion, who had arrived from England with a corvette and a supply of arms and military stores for the patriots. Bolivar gathered a force, enlisted from patriot refugees, and with it and his negro troops sailed for Margarita, 16 April, 1816, for the purpose of aiding Arismendi. He landed on 27 June, and marched toward the spot of Pampatar on the island. With the approval of Gen. Arismendi, upon Bolivar's promise to call a national congress as soon as his power should be established in Venezuela, a junta was summoned in the cathedral of La Villa del Norte, which proclaimed Bolivar commander-in-chief of the forces of Venezuela. In July, marching toward Caracas, he met Admiral Brion, who had arrived from England with a corvette and a supply of arms and military stores for the patriots. Bolivar gathered a force, enlisted from patriot refugees, and with it and his negro troops sailed for Margarita, 16 April, 1816, for the purpose of aiding Arismendi. He landed on 27 June, and marched toward the spot of Pampatar on the island. With the approval of Gen. Arismendi, upon Bolivar's promise to call a national congress as soon as his power should be established in Venezuela, a junta was summoned in the cathedral of La Villa del Norte, which proclaimed Bolivar commander-in-chief of the forces of Venezuela. forces met on 16 Feb., 1817, and a desperate battle ensued, lasting three days, at the end of which the Spaniards were defeated and retired in disorder. During their retreat they were set upon and entirely cut to pieces by the llaneros of Paez. While Bolivar pursued his victories in the west, Piar, the negro leader, wrested from the Spaniards the provinces of Guiana, his land force being supported by Bolivar's fleet of Andes. On 12 April, ten days after Bolivar had left that city in search of new recruits, Barcelona was captured by the Spaniards, who slaughtered the garrison, comprising the entire force that he had collected up to that time; but a new army was enlisted, and by the middle of July the royalists had evacuated all the provinces. On 20 July, while Bolivar was absent, Piar, Zea, Marino, Arismendi, and the other military chiefs summoned at Angostura a provincial congress, which recorded a decision to vest the executive powers in a triumvirate, consisting of Bolivar and two associates. On hearing of this action, Bolivar hastened to Angostura, and, supported by Brion, dissolved the congress, suppressed the powers of the triumvirate, and assembled the congress, consisting of himself as chief with Louis Brion and Antonio Francisco Zea as assistants, the former being the director of the military, and the latter of the political department. Piar, who asso iled the character of Bolivar, stigmatizing him as a "Napoleon of retreat," was arrested and tried by a committee of congress composed of Paez, and thrown into prison on a charge of conspiring against the whites, plotting against the life of Bolivar, and aiming at the supreme power. He was convicted, condemned to death, and shot on 16 Oct., 1817. Warned by the fate of Piar, Marrojo deserted from his rivalry with Bolivar and wrote an abject letter, throwing himself upon the mercy of the liberator. Bolivar had an army of 8,000 volunteers, equipped and provided, which he sent to Paez's aid. The provincial troops, double the Spanish force in the country; yet the patriot forces were so scattered that in the campaign that followed they were beaten in detail a dozen times, and by the end of May, 1818, were driven from the provinces north of the Orinoco. Defection and discontent were rife. Bolivar's troops numbered only 6,000, and he sent to the governor of New Granada, a citizen of New Granada, who informed him that the people of that colony were prepared for a general revolt, and begged for assistance in invading the country. Bolivar answered him by carrying out that project; and English, French, German, and Polish officers flocked to Angostura and offered their services to Bolivar, while supplies, arms, and volunteers came from England. On the advice of Dr. Roscio, Bolivar summoned, on 15 Feb., 1819, a national congress at Angostura, and was soon in a position to put 14,000 men in the field and resume the offensive. At the opening of the congress he submitted a detailed exposition of his views of government, and offered to dissolve the congress, or to set it aside, and invest him with supreme authority until the independence of the country should be completely established.

Bolivar then reorganized the army and decided upon a bold strategical plan to march over the Cordilleras, unite with Santander's guerrillas, seize Bogota, and drive the Spaniards out of New Granada, after first inducing them to concentrate their forces in Venezuela by a diversion in the coast provinces of that country. On 24 Feb., 1819, he left Angostura with the army, after nominating Zea president of the congress and vice-president of the republic during his absence. By the bold and successful manœuvres of Paez, Morillo and La Torre were routed at Acharigua, a victory that resulted in the occupation of the province of Barinas, leaving the town open in New Granada. Bolivar's daring and original plan of campaign was entirely successful. He marched his army, a third part of his troops consisting of Englishmen and other foreigners, through the difficult passes of the Andes in June, encountered and defeated the enemy on 1 July in the province of Tunja, entered the town of Tunja on 27 July, and after a sharp engagement on the adjoining heights, and decided the fate of Bogota and of all New Granada on 7 Aug. by the victory of Boyaca. On 12 Aug., the liberator made his triumphal entry into Santa Fé. All the provinces of New Granada rose against the Spaniards, who shut themselves up in the fortified town of Monskop. After organizing a government in Bogota and leaving Gen. Santander as commander-in-chief, Bolivar returned to Montecal, in Venezuela, where he had ordered the patriot leaders to assemble with their forces, arriving there on 3 Nov., 1819. Morillo had fallen back before the attacks of Paez from San Fernando de Apure to San Quintin, and now fled in terror before him. Bolivar, on hearing of this, marched upon Angostura with his foreign legion, sustained the victory of Paez, and took control of the territory. He then proclaimed the republic of Colombia, securing the enactment of a fundamental law on 17 Dec., 1819, for the union of the states of Venezuela and New Granada under his presidency, with a common congress and a single constitution. The seat of government was transferred provisionally to Tunja, which Bolivar captured, and was replaced by Tunja, the capitals of the two provinces. The absence of the foreign legion and the patriot commander gave Morillo an opportunity to collect re-enforcements, and the Spaniards were encouraged furthermore by the news of a formidable expedition about to start from Spain under O'Donnell; but an inscription of Spanish troops revealed the extent of the expedition. Bolivar took the field again, and on 20 Jan., 1820, returned to San Fernando de Apure. The republican army was now larger and better appointed than at any previous time, and gained important advantages over the royalists. By autumn, fifteen of the twenty-two provinces of New Granada had joined the government of Colombia, while the Spaniards still retained only Cartagena and the fortified posts on the isthmus of Panama. In Venezuela the government of the republic was effective in six out of the eight provinces. On 25 Nov., 1820, Bolivar, probably in the hope of avoiding further bloodshed, concluded with Morillo at Trujillo an armistice of six months. On 17 Dec., Gen. Morillo embarked in a Spanish ship, and learning that he was appointed of the Spanish forces.

On 10 March, 1821, Bolivar notified Gen. La Torre that hostilities would be resumed at the expiration of thirty days. The Spaniards were strongly entrenched at Carabobo, southwest of Valencia, but had not brought up all their forces. Paez with his 2,000 llaneros, and the British legion, 1,000 strong, turned the enemy's position by a side-path and threw them into complete confusion, when Torre retreated with the remnant of his army to Puerto Cabello. This victory, which occurred on 24 June, 1821, virtually ended the war in Venezuela, and Bolivar entered Caracas on 29 June. By the end of the year Puerto Cabello was the only
post still held by the Spaniards. In New Granada the powerful fortress of Carthagena surrendered to Gen. Santander on 21 Sept., 1821. The naval battle of Maracaibo, in August, 1823, and the capitulation of Puerto Cabello in July, 1824, were necessary to drive the Spaniards from their last foothold. Yet after the decisive victory of Carabobo the republicans were masters of the country and free to attend to its political organization. The congress of Colombia assembled in Cuenca in May, 1821, and the province of Quito, which included the isthmus of Panama, was declared to be independent. A severe battle was fought at Pichincha, which was won for the republicans through the able strategy of Gen. Sucre, Bolivar's colleague. Bolivar entered Quito in June, 1822, a right of his colleague and his position, and incorporated Quito, Pasto, and Guayaquil in the Colombian republic. Then, in response to an appeal from San Martin, the patriot leader in Peru, he left the direction of the government in the hands of his vice-presidents and marched upon Lima, which was evacuated by the royalists at the approach of the Colombian army. He made a triumphal entry into the Peruvian capital on 1 Sept., 1823, and on 10 Feb., 1824, the congress of Lima made him dictator of Peru and authorized him to employ all the resources of the country. He in the position of president of Colombia, but was continued in that office by the vote of a large majority of the congress. The intrigues of the opposing factions in Peru forced Bolivar to retire to Trujillo, whereupon Lima was reoccupied by the Spaniards under Canterac. By June, Bolivar had organized another army, which routed the advance guard of the royalist force, and won a decisive victory on the plains of Junin, 6 Aug., 1824. After this decisive victory Bolivar returned to Lima to reorganize the government, while Sucre pursued the Spaniards on their retreat through upper Peru, and shattered their forces in the final victory of Ayacucho on 9 Dec., 1824. The Spaniards were reduced to the size of post of Callao, in Peru, from which they could not be dislodged until more than a year later. On 10 Feb., 1825, Bolivar convoked a constituent congress and resigned the dictatorship of Peru; but that body, on account of the unsettled state of the country, decided to invest him with dictatorial powers for a year longer. Congress voted him a grant of a million dollars, which was declined.

The boundary between the two republics was fixed at Chuquisaca, in August, 1825, which detached that territory from the government of Buenos Ayres and constituted it a separate state, called, in honor of the liberator, Bolivia. Bolivar was declared perpetual protector of the new republic, and was requested to prepare for it a constitution. He returned to Lima after visiting upper Peru, and thence sent a project of a constitution for Bolivia, which was presented to the congress of that state on 25 May, 1826, accompanied by an address in which he defined the forms of government that he conceived to be expeditious for the newly established republics. The Bolivian code, copied in some of its features from the code Napoléon, contained a provision for vesting the executive authority in a president for life, without responsibility to the legislature, and with power to nominate his successor. This proposal excited the apprehensions of a section of the republicans in Bolivia, Peru, Venezuela, New Granada, and even in Buenos Ayres and Chili. The tendencies that accompanied Bolivar's administration of the Bolivian republic seemed to indicate that political consolidation caused the alarm to spread beyond the confines of the territory affected by the new code, and he was suspected of a design to weld the South American republics into an empire and to introduce the Bolivian code and make himself perpetual dictator. Peru, as well as Bolivia, adopted the new code; but from this time the population of the republics were divided into angry factions on questions raised by that instrument, and a long and bitter struggle ensued between the centralists, or Bolivarists, and the federalists, the military rivals of Bolivar uniting with the latter party. A serious trouble occurred in Venezuela during the absence of the president. Paez, vice-president of Peru, Camba, and other Bolivians, inevitably brought down the Bolivian pretensions by arbitrary conduct in the enrolment of the militia, refused to obey the summons of the senate, and, encouraged by a strong separatist party in the northern provinces, openly rebelled against the central government. Bolivar confided affairs in Peru to a council nominated by himself, with Santa Cruz as its chief, and hastened back to Lima, hoping to control the disturbances, leaving Lima in September, and reaching Bogota on 14 Nov., 1826. On 23 Nov. he issued a decree from Bogota assuming the extraordinary powers conferred upon the president in case of rebellion, and hastened to Venezuela to stop the spilling of blood, reaching Puerto Cabello on 31 Dec. The following day he issued a proclamation declaring a general amnesty. In an interview with Paez he confirmed him in his command, and, fixing his headquarters at Caracas, checked the disturbances in the northern departments. In 1826 Bolivar and Santander were re-elected president and vice-president of Colombia for the term beginning in January, 1827. In February, Bolivar, in order to silence those who believed he was free from ambitious designs and interested motives, insisted on resigning the presidency and retiring into private life. Santander urged him to retract his decision, declaring that the agitation of the country could only be dispelled through the influence and authority of the liberator, while in the congress there was a majority of his supporters, and a resolution was carried requesting him to continue in the presidency. He accordingly withdrew his resignation, and repaired to Bogota to take the oath of office; but before doing so he issued a proclamation calling a national convention to be held at Ocaña in March, 1828. Another decree granted a general amnesty, and a third proclaimed the establishment of constitutional order throughout Colombia.

Shortly after the departure of Bolivar from Lima, the Bolivian code was adopted as the constitution of Peru, and under it the liberator was elected, on 9 Dec., 1826, president for life. A few weeks later, while he was restoring order in Venezuela, a counter-revolution was imposed in Peru by the third division of the Colombian auxiliary army, then stationed at Lima. This consisted of veteran troops under Luna and Sanda, who had hitherto been the liberator's most efficacious instruments, not only in conquering the independ-
ence of the South American republics, but in imposing his own ideas of government on the states he liberated gave rise to the growing republican reaction against centralized power, and were filled with distrust toward Bolivar. Six weeks after the adoption of the Bolivian code the Peruvian republicans hostile to Bolivar, with the support of the Colombian troops cantoned in Lima, deposed the council appointed by Bolivar, and the Bolivian code and organized the provisional government. Gen. Lanuza was chosen president of Peru, and the Colombian troops departed from her soil. These stationed in Bolivia were expelled, with the aid of the Peruvians, and after a brief war a treaty was concluded between Colombia and Bolivia, by which the boundaries of the latter were extended to their original limits, its debt was separated from that of Colombia, and its complete independence and equality were recognized. The third division sailed from Callao on 17 March, 1827, and in April landed in southern Colombia. Bolivar, who was in the north, prepared to march against the rebellious soldiery; but the latter made no attempt to carry the revolting soldiers, but instead proceeded to Caracas. Gen. Ovando. The congress of Ocaña met on 2 March, 1828. A new constitution, giving the executive stronger and more permanent authority, was submitted. When it was found that the majority was opposed to its adoption, the friends of Bolivar vacated their seats, leaving the body without representatives; but the country-seat of the neighborhood of Ocaña, Bolivar published an address, which, while reprehending the proceeding of his partisans, appealed to the country to support him in introducing stability and order. Popular conventions in Bogota, Caracas, and Carthagena called upon the liberator to adopt extraordinary means to establish tranquility and security; and in August, 1828, he was invested by popular elections with dictatorial powers. The anti-Bolivar republicans entered into a conspiracy to assassinate the president. Vice-President Santander and the other leaders of the party were implicated in this crime. Bolivar was attacked in his bedroom in Bogota, 25 Sept., 1828, but escaped with a three-inch wound in his arm. He was removed from Bogota to the country-seat of Ocaña, eighteen miles from the city; and on his death his part in the plot. This occurrence prompted Bolivar to exercise more arbitrary powers, a course that augmented the popular suspicions of his aims and motives and the aversion to a military dictatorship. A decree was issued from Bogota, 27 Aug., 1828, by which Bolivar assumed unlimited authority in Colombia. It was at a time when party passion in Colombia was inflamed to an extraordinary degree that Peru, in 1829, declared war against the dictator of Colombia. Bolivar, in a new address to the people of Colombia; and the party adhering to the liberator; but insurrections broke out in various places. In January, 1830, Bolivar for the fifth time resigned the presidency, but was again confirmed in his position by the general voice. He then undertook to compel Paez and the Venezuelan disunionists to submit to the Colombian congress. The congress, however, now contained a majority made up from his opponents, and it voted to accept his proffered resignation, granting him a pension of $50,000 a year on condition of his residing abroad. The patriot leader sent in his final resignation to congress on 27 April, 1830, and left Bogota on 9 May with the intention of embarking for England from Cartagena; but his adherents induced him to remain in the country, and made ineffectual attempts to restore him to power. South from the murder of which he died, he went to Santa Marta to visit the bishop, and there breathed his last. In accordance with an act of the congress of New Granada, his remains were removed in 1842 to Caracas, where a monument was erected in his honor. In 1858 the city of Lima erected an equestrian statue of Bolivar, who was described in the inscription as the "liberator of the Peruvians.", A statue of him, the gift of the government of Venezuela, was erected in 1883 in Central Park, New York city. There is also a fine statue of him in Santa Fe de Bogota.

It was Bolivar's hope and ambition to unite the South American republics into a strong confederation. The object of his efforts in the last years of his life, with the object of establishing an international code for the Latin republics, was set on foot by him. The example of Napoleon led him into acts too arbitrary and a policy too autocratic to please the independent temper of his compatriots. During the faction fights that prevailed in his lifetime, there was a move for a violent and unanimous attempt to free succeeding generations of South Americans have paid due honor to his memory. His lack of judgment and of coolness in the battle-field betrayed his military incapacity, and brought him at times into contempt and disrepute; yet the pertinacity and patience with which he clung to the cause of independence through every danger and discouragement revealed a noble spirit; and the sacrifices and sufferings, voluntarily undergone for the sake of the cause in which he engaged, are sufficient to disprove the charges brought against him of ignoble ambition and egotism. Of the accounts that have been published of the life of Bolivar, the "Histoire de Bolivar," by Gen. Ducaquoy of Paris, 1863, is, on the other hand, an indiscriminate panegyric. See also "Memoirs of Gen. William Miller (in the Service of the Republic of Peru)" (2 vols., London, 1825); Col. Hippisley's "Account of his Journey to the Orinoco" (London, 1831). The publication of the correspondence of Bolivar, including his messages, manifestoes, and proclamations, preceded by his life, was begun in New York, and the first two volumes, containing the life, written in Spanish, by Felipe Larrazabal, appeared in 1871. BOLLAN, William, lawyer, b. in England; d. in Massachusetts in 1776. He was educated for
the legal profession in England, removed to Massachusetts about 1740, settled in Boston, married a daughter of Gov. Shirley in 1743, and became advocate-general. In 1745 he was sent to London as agent of the colony, to secure from the government the repayment of £183,649 advanced by Massachusetts for the Cape Breton expedition, in which mission he succeeded after three years. He was sent to England a second time as agent for the colony, but was dismissed by the general court in 1762, because of his connection with the Dutch and his adherence to his allegiance to the episcopal form of worship. He still acted as agent of the council, and his popularity in the colony was restored when he obtained from Alderman Beckford in London, and sent over to Massachusetts in 1769, thirty-three letters of Gov. Bernhard and Gen. Gage calumniating the colonists, for which act he was denounced by Lord North in parliament. In 1775 he wrote in favor of conciliatory measures toward the colonies. John Hancock declared, in the Massachusetts house of representatives, that there was no man to whom the colonies were more indebted. He published numerous political tracts relating chiefly to American affairs, among which the most important were "The Rights and Measures of the Colonies Considered" (London, 1746); "Colonize Anglicane Illustriati" (1762); "The Ancient Right of the English Nation to the American Fishery Examined and Stated" (1764); "The Mutual Interests of Great Britain and the American Colonies Considered" (1765); "The Importance of the Colonies in North America and the Interests of Great Britain with regard to them Considered" (1766); "Freedom of Speech and Writing upon Public Affairs Considered" (1766); "Epistle from Timoleon" (1768); "Continued Corrupton of Standing Armies" (1768); "The Free Briton's Memorial, in Defence of the Right of Election" (1769); and a Supplemental Memorial, on the Origin of Parliaments, etc." (1770). As agent for the council of the province of Massachusetts, he offered "A Petition to the King in Council, Jan. 26, 1774, with Illustrations intended to Promote the Harmony of Great Britain and her Colonies."

**BOLLER, Alfred Pancost**, civil engineer, b. in Philadelphia, Pa., 23 Feb., 1840. He was graduated at the University of Pennsylvania in 1859, and at the Reussner Polytechnic Institute, Troy, N.Y., in 1861. He has been connected as assistant engineer with the Lehigh Coal and Navigation Company (1862), Philadelphia and Erie Railroad (1864), and Atlantic and Great Western Railroad (1866); as chief engineer with the Hudson River Railroad (1866), Westside and Youngers Railroad (1860), Yonkers Rapid Transit Commission (1881), Manhattan Elevated Railroad Company (1882), Albany and Greenbush Bridge Company (1883), and Staten Island Rapid Transit Railroad (1885); and he has held consulting relations with the Aza railroad in Cuba (1857), Department of Public Parks, New York (1883), and with other corporations. He has conducted his business as a contractor, and has made a specialty of bridge construction. The double-track bridge over the Hudson river at Albany, the Eighth avenue bridge over the Harlem, the Madison avenue bridge over the same river, the Croton lake bridge, the Central avenue bridge, Newark, N. J., the great gas-holder tanks of the Bay State Gas Company, in Boston, under the superintendence of Alfred Pancost, Staten Island, and all of the locomotive turn-tables on the West Shore Railroad, were built under his supervision. He is a member of the American institute of civil engineers and mining engineers, and is the author of various reports on bridge construction and of a "Practical Treatise on the Construction of Iron Highway Bridges" (New York, 1877).

**BOLLEN, Edwin Cortield**, geologist, was born in Hartford, Conn., Sept. 18, 1836. He was graduated at Trinity college, Hartford, in 1855, after which he studied theology and became a Universalist clergyman. His attention has been largely devoted to microscopy, in which science he has achieved eminence. From 1870 to 1875 he was professor of microscopy and geology at the high school in Canton, N. Y., and since 1870 has lectured on that subject in Tufts college at College Hill, Mass. He has contributed articles on his specialty to periodicals, and published sermons. He received the degree of Ph. D. from the university of St. Lawrence in 1860, and that of S. T. D. from Tufts college in 1881. He is a member of several scientific societies, to whose proceedings he has contributed.

**BOLLEN, John Augustus**, lawyer, b. in Eastford, Conn., 16 April, 1809; d. in Washington, D.C., 25 May, 1878. He was graduated at Brown in 1829, admitted to the bar in Boston in 1833, and in 1843 chosen secretary of state under Gov. Marcus Morton. He was a member of the harbor and back channel commission in 1866. He acted as counsel in the famous case of the Great Glen. He served as judge-advocate on the staff of Gen. John A. Dix, who was his brother-in-law. He was brevetted brigadier-general of volunteers in 1863, and appointed naval solicitor the same year.

**BOLLMAN, Eric**, physician, b. in Hoya, Hanover, in 1769; d. in Jamaica, W. I., 9 Dec., 1821. He studied medicine at the University of Gottingen, and in Paris, where he settled at the beginning of the French revolution. He accompanied Count Narbonne, who fled to England in 1792, and in London fell in with Lally-Tollendal, who induced him to go to Austria and endeavor to find out where Gen. Lafayette was kept in confinement. He established himself as a physician in Vienna, and learning that Lafayette was a prisoner at Olmütz, he formed a plan to rescue him with the assistance of Francis Kinlock Huger, a young American. Communicating with the prisoner through the prison surgeon, the two fell upon his guards while he was taking exercise in a carriage, and succeeded in getting him away on a horse; but the same evening Menilbourg and another prisoner, Dr. Bollman escaped to Prussia, but was handed over to the Austrian authorities, who kept him in prison for nearly a year, and then released him on condition that he should leave the country. He came to the United States and was well received; but in 1806 was implicated in Aaron Burr's conspiracy and was Burr's agent in New Orleans. In 1814 he returned to Europe, and, after another visit to the United States, took up his residence in London. He published "Paragraphs on Banks" (2d ed., Philadelphia, 1811); "Improved System of the Money Concerns of the Union" (1816); and "Strictures on the Theories of M. Ricardo."

**BOLTON, Henry Carrington**, chemist, b. in New York, N.Y., in 1810. He was graduated at Columbia in 1832, and then studied chemistry in Paris under Wurtz and Dumas, in Heidelberg under Bunsen, in Göttingen under Wohler, and in Berlin under Hofmann. In 1866 he received the degree of Ph. D. from the University of Göttingen, his thesis being on the "Fluorine Compounds of Uranium." Then in 1867 he went to Berlin, and from 1872 till 1877 was assistant in quantitative analysis in the Columbia School of Mines. In 1874 he was called to the chair of chemistry in the Woman's Medical College of the New York Infantary, which
BOLTON, Sarah Knowles, author, b. in Farmington, Conn., 15 Sept., 1841. Her maiden name was Knowles. She married Charles E. Bolton, a merchant and philanthropist. She has written extensively for the press, was one of the first corresponding secretaries of the Woman's national temperance union, was for three years associate editor of the "Congregationalist," and travelled for two years in Europe, studying profit-sharing, female higher education, and other social questions. Her published works are "Ordeal Lamar, and other poems" (New York, 1863); "The Present Problem," a novellette (1874); "How Success is Won" (Boston, 1884); biographies of Poor Boys who became famous" (New York, 1885); "Girls who became famous" (1886); "Social Studies in England" (Boston, 1886); and a collection of short stories under the title "Stories from Life" (New York, 1886). She presented a paper on "Employers and Employed" to the social science association. She was engaged in 1886 on a joint collection of poems by herself and her son Charles Knowles Bolton.

BOLTON, Sarah Tittle, poet, b. in Newport, Ky., 18 Dec., 1815: d. in Indianapolis, Ind., 4 Aug., 1893. Her father, Jonathan B. Barrett, removed to Indiana. At sixteen she married an editor, Nathan Bolton. In 1855 her husband was appointed consul at Geneva, and during the two years that she spent there as companion of her husband, she made an extensive reading of the newspapers. She contributed numerous short poems to periodicals, among them "Padding Your Own Canoe" and "Left on the Battlefield." A volume of her poems was published in New York in 1865, and a complete collection, with a life by Jonathan W. Gordon (Indianapolis, 1886).
BONAPARTE

thology of the country. In 1828 he removed to Italy, in the revolution of 1848 was a leader of the republican party in Rome, and in 1849 was chosen vice-president of the constituent assembly. After the occupation of Rome by French troops, he returned to France, but was expelled by order of Louis Napoleon. Permitted to return to Paris in 1850, he became in 1854 director of the Jardin des Plantes. He published in the United States a supplement to Wilson's "Ornithology," entitled "American Ornithology, or History of the Birds of the United States" (4 vols., Philadelphia, 1825-33), containing more than 100 new species discovered by himself; also "Observations on the Nomenclature of Wilson's "Ornithology,"" printed in the "Journal" of the academy of Philadelphia; a "Synopsis of the Birds of the United States" in the "Annals" of the lyceum of New York; a "Catalogue of the Birds of the United States" in the "Contributions" of the Machirian lyceum of Philadelphia; and other papers on the same subject. In Italy he was the originator of several scientific congresses and lectured and wrote extensively on American and European ornithology and other branches of natural history. He published "Specchio Comparativo delle Ornithologie di Roma e di Filadelph" (Pisa, 1827), presenting a comparison between birds of the latitude of Philadelphia and Italian species; "Iconografia della Pianta Italiana" (Pisa, 1827-31), an elaborate illustrated work on the fauna of Italy; "L'Esplorazione dell' America" (1838); "Conspexit Generum Avium" (Leyden, 1850); "Revue critique de l'ornithologie Européenne" (Brussels, 1850); in collaboration with H. Schlegel, "Monographie des Loxiens" (Leyden, 1850); and, after his return to Paris, a "Catalogue des oiseaux d'Europe" (Paris, 1850); also a descriptive catalogue of pigeons and one of parrots, prepared in conjunction with M. de Ponanee and published after his death. His "Memoirs," written by himself, appeared in New York in 1836.

BONAPARTE, Jerome, king of Westphalia, b. in Ajaccio, Corsica, 15 Nov., 1784; d. in Villegenis, near Paris, 10 July, 1867. He entered the navy in 1800, and in 1803, during a visit to the United States, married Miss Patterson, of Baltimore, without the consent of his family. This marriage was declared null by Napoleon in 1806. He was promoted to rear-admiral by Napoleon in 1806, and in the same year was transferred to the army, becoming a general of brigade. His corps gained some successes in Silesia in 1807, and in July of that year his brother placed him on the throne of the new kingdom of Westphalia. He married the princess Catherine of Württemberg, in August, 1807, and resigned till the expulsion of the French from Germany in October, 1813. After Napoleon's return from Elba, Jerome joined him, and commanded a division at Waterloo, winning the special praise of Napoleon for his gallantry there. After living in exile at Trieste, Rome, and Lausanne, he returned to France in 1847, and became a field-marshal in 1850. His wife, Elizabeth Patterson, b. in Baltimore, Md., 6 Feb., 1785; d. there, 4 April, 1879. Her father, William Patterson, emigrated from Ulster, Ireland, when a lad, pushed his way in business, became the owner of a line of clipper ships, and, Charles Carroll of Carrollton, only excepted, was the wealthiest citizen of Maryland. At a ball at the house of Samuel Chase, a signer of the Declaration of Independence, in the autumn of 1803, Capt. Jerome Bonaparte was introduced to Elizabeth Patterson. They were mutually pleased; but her father, foreseeing that his daughter's marriage with a youth with such brilliant prospects would prove distasteful to the first consul, forbade the courtship, and sent his daughter to Virginia. The lovers contrived to correspond, and in a short time became engaged. Jerome and Elizabeth went so far as to procure a marriage license. The match was postponed until 24 Dec., 1803, when Jerome would have passed his sixteenth birthday. All legal formalities were carefully complied with; the contract was drawn up by Alexander Dallas, afterward secretary of the treasury, and the vice-consul of France, the mayor of Baltimore, and many other dignitaries witnessed the ceremony, which was solemnized by Archbishop Carroll. Joseph and Lucien advised Jerome to become an American citizen, and took steps to procure him a provision enabling him to live there in accordance with his rank. From first to last Napoleon remained obdurate. Jerome received a message from his brother to the effect that if he left the "young person" in America, his youthful indiscretion would be forgiven; if he brought her with him, she should not put a foot on French territory. Capt. Bonaparte and his wife sailed in March, 1805, on one of Mr. Patterson's ships, reached Lisbon, and found a French frigate there to prevent her landing. Jerome left his young wife and went to Paris to plead her cause with the emperor, while the vessel proceeded to Amsterdam. At the mouth of the Texel two men-of-war awaited her, and Elizabeth Bonaparte was forced to seek an asylum in England. Pitt sent a regiment to Dover to prevent mischief, so great was the multitude that thronged thither to witness her landing. A few days later her son, Jerome Napoleon Bonaparte, was born, 7 July, 1805, at Camberwell. Here she continued to reside, constantly receiving messages and letters from Jerome, protesting his fidelity and affection. Napoleon applied to Pius VII., to dissolve the marriage, which the pontiff steadfastly refused; but a decree of divorce was passed by the imperial council of state. On condition of her going to America, the emperor
offered Madame Bonaparte a pension during her life of 60,000 francs a year, "provided she does not take the name of my family," and after some time she consented to return to America, hoping thus to save the cost of her support. Jerome was admitted to Napoleon's presence, the emperor upbowed him rudely, and concluded: "As for your affair with your little girl, I do not regard it." As a reward for his desertion, Jerome was created a prince of the empire, and was promoted admiral. He received subsequently the rank of general. In 1808 he was made by the senate successor to the imperial throne in the event of Napoleon's leaving no male heir, and in 1807 was created king of Westphalia. On 12 Aug., 1807, he married Catherine Frederica, princess of Wurttemburg. By his second marriage he had three children, of whom the surviving son, Prince Napoleon, of the Regency, was admitted by Madame Bonaparte employed every means to maintain the legality of her marriage and the legitimacy of her son. When Napoleon III. mounted the throne, a formal trial was granted her, Jerome, the father, appealed to the council of state to forbid "Jerome Patterson" to assume the name of Bonaparte. The order was confirmed, but the son of Madame Elizabeth Patterson was entitled to the name of Bonaparte, although he could not be recognized as a member of the imperial family. After the death of Jerome she brought suit for a share in his estate; but documentary proofs, the fact that the validity of her marriage was questioned, the general belief that Jerome's marriage was bigamous, and the eloquence of her advocate, Berryer, did not prevent an adverse decision, probably inspired by the imperial court. Her son was, however, recognized by official decree as a legitimate child of France. Jerome Bonaparte, the son, refused to sue for the hand of a daughter of Joseph Bonaparte, as his mother desired, and married Miss Woolcloud, a millionaire. Madame Bonaparte was proud and ambitious temper both from her son and his mother, Madame Bonaparte passed much of her time in Europe, where her unfortunate position attracted sympathy and attention. She inherited a part of her father's wealth in the form of real property in Baltimore, which rose in value and gave her a certain amount of independence, but retained her noble manner and brilliant conversational powers. She passed many winters in Florence, and counted with pride royal and distinguished persons among her acquaintance. After the downfall of the second empire and the death of Napoleon III., she actively put forward the claims of her grandson Col. Bonaparte, who had served with distinction in the French army, and hoped to see him called to the regency, or perhaps to the imperial throne.—*Jerome Napoleon*, Madame Bonaparte's son, b. in Camberwell, England, 7 July, 1805; d. in Baltimore, where he had passed his life, 17 June, 1870. He was graduated at Harvard in 1829, and studied law, but did not practise. He was naturalized as an American citizen, and cultivated terms of intimacy with his father and the French court. His management of his inherited fortune and the property that came to him by marriage made him one of the richest residents of Baltimore. He left two sons, who inherited his wealth. Jerome, the elder, *Jerome Napoleon*, b. in Baltimore, 5 Nov., 1836, d. at Pride's Crossing, Mass., 3 Sept., 1893. He was graduated at the U. S. military academy, but resigned from the service on 16 Aug., 1854, and was appointed a lieutenant of dragoons in the French imperial army. He served through the Crimean war, distinguishing himself at Balaklava, Inkerman, Teherania, and the siege of Sebastopol, and received the decoration of the Medjidie order from the sultan of Turkey, the Crimean medal from the queen of England, and a large number of French and Italian decorations. He was promoted to the rank of chef d'escautron in 1855, and in 1867 transferred to the chasseurs d'Afrique, where he served as lieutenant, and afterward as captain in that corps in the Algerian campaign of 1857, and in several actions against the Kabyles. In the Italian campaign against Austria he served with distinction in the battles of Montebello and Solferino, and in various skirmishes, receiving several French and Italian decorations. He was promoted to the rank of chef d'escautron in 1855, and in 1867 transferred to the empress's dragoon guards.—The younger grandson of Madame Bonaparte, Charles Joseph, b. in Baltimore, Md., 9 June, 1851, was graduated at Harvard in 1871, and was a similar and their brother's policy and not by his own well-meaning impulses, he was twice driven out of Madrid by hostile armies, and twice reinstated, but in June, 1813, was defeated by Wellington at Vittoria, and soon afterward left Spain. In January, 1814, he was appointed lieutenant-general of the empire in the absence of his brother, and went to Paris to meet the representatives of the United States at the capitulation of Paris. When Napoleon returned in 1815, Joseph went to Paris and exerted himself to obtain the support of his influential friends for a restoration of the empire under constitutional guarantees. He had a single interview with his brother after the battle of Waterloo, arranged to meet him in the United States, and sailed for New York from Ruyan, 25 July, 1815, under the assumed name of Comte de Survilliers. He bought a mansion in Philadelphia, and a country-seat near Bordentown, N. J. An act to enable him to hold real estate was passed by the legislature of New Jersey in 1817, and when he acquired a summer-place on the edge of the Adirondack forest a similar law was enacted by the New York assembly. He was accompanied to the United States by his two daughters and the prince of Canino, husband of the elder daughter, Zénaide; but his wife, who was the daughter of a merchant of Marseilles and sister of the queen of Sweden, remained an invalid in Europe. Her benevolence and hospitality, his affable and son amiable manners and his knowledge and taste, made him a general favorite. He endeavored to advance the claims of Napoleon II. after the revolution of July, 1830, and in 1832, when the duke of Reichstadt fell ill, he went to Europe, but remained in England upon hearing of
his nephew's death. He returned to the United States in 1837, but remained only two years. Obtaining permission in 1841 to reside in Italy, he passed the remainder of his life in Florence. The confidential letters that passed between him and Napoleon I. were published in "Memorie," or memoirs, of Joseph, by A. du Casse. See also "Memoires," by Miot de Molito, and "Biographical Sketch of Joseph Bonaparte" (London, 1837).

BONARD, Louis, m. 1809, in Rouen, France; d. in New York city, 20 Feb., 1871. Of his life previous to his coming to the United States in 1812, the present writer has but little knowledge. He resided in New York city he occupied, in squaw and wretchedness, a room six by eight feet in dimensions on an obscure street. Heavy wooden bars were fastened across the solitary dingy window, and bars and bolts protected the door. The room was devoid of furniture, save a broken table, a mattress lifted from the floor by a few boards supported by bricks, and a trunk. There was no fire and no place for one. On 14 Feb., a few days before his death, he sent a message to Henry Erhgh, of the society for the prevention of cruelty to animals, whom he had never met, and desired to make his will. In it was revealed that he had hoarded the property of $150,000, all of which was a bequest of his great-grandfather, Mr. Melito, of Philadelphia. The trunk was filled with gold and silver watches in alternate layers, together with a large quantity of jewelry and diamonds. Bonard's remains were buried in Greenwood cemetery and a suitable memorial erected over them.

BOND, Henry, physician and genealogist, b. in Watertown, Mass., 21 March, 1790; d. in Philadelphia, Feb. 29, 1852. He was the son of a pioneer of Ohio. In his youth he travelled on horseback through the wilderness to Kankakee river, and then in a skiff down that river and the Mississippi to St. Louis. He owned at different times as many as eighty western newspapers, was the founder of the Louisville "Courier-Journal," and at the time of his death was editor of the "Congressional Globe." He was a member of the Episcopalian church, and gave liberally to the support of the church.
to defend their right to the office, authorized his appointees to raise followers sufficient to put the resisting commissioners out, and called upon President Polk to send federal troops. The Judge Bond told Gen. Grant, who came to investigate the situation, that the de facto commissioners would obey a written order from the president brought by a single soldier bearing the U. S. flag; but that, if the federal authorities declined to interfere, he would arrest the Swan commissioners, and hold them to bail to keep the peace, which was accordingly done. After the emancipation of the slaves under the revised constitution of 1864, the slave-holders took advantage of an old apprenticeship law, and had the children of the free negroes brought to the probate courts and apprenticed to themselves. Judge Bond decided that these appointments had been made, and proceeded to publish them, thereby rendering himself a public scandal. William Bennett, Cary, served, and was released, on habeus corpus, all but one, before his death. He was a prominent member of an association for the education of colored people, to which his friend, Sec. Stanton, transferred all the federal barracks in Maryland for the purpose of building school-houses. With assistance from the friends of the Negro, schools were established in all the counties of the state, and Judge Bond visited every locality, and made speeches intended to overcome the prejudices of the people against the schools, which frequently broke out into violence. He lost his seat on the bench in 1808, when the democrats obtained political ascendency in the state, and retired to practice of law in Baltimore. On 13 July, 1870, President Grant nominated him judge of the 4th circuit of the U. S. court, which includes the states of Maryland, the two Virginias, and the two Carolinas. In 1871 he conducted, at Raleigh, N. C., and Columbia, S. C., many trials of ku-klux conspirators, more than 100 of whom he sentenced to the penitentiary.

BOND, William Cranch, astronomer, b. in Portland, Me., 9 Sept., 1818; d. in Cambridge, Mass., 29 Jan., 1839. He was the son of a watchmaker, and was brought up to that trade, but at the same time studied astronomy and conducted observations in a private observatory that he built in Dorchester. In 1835 he went to Europe to carry out a commission for Harvard University with reference to the "Orbits of Comets," under the direction of Prof. Stetson. The U. S. government commissioned him to conduct a series of astronomical and meteorological observations in connection with the exploring expedition to the South Sea. He superintended the erection of the Harvard observatory in 1839 and became its director. The result of his observations was published in the "Annals of the Observatory of Harvard College." Those on Saturn and the fixed stars gave him an extensive reputation. He was associated with his son, George Phillips, in the discovery of the eighth satellite of Saturn and of the single moon of Neptune, and was also one of the earliest astronomers that employed photography to record the aspects of heavenly bodies.—His son, George Phillips, astronomer, b. in Dorchester, Mass., in 1839, d. in Cambridge, Mass., 17 Feb., 1865, was graduated at Harvard University in 1859, was appointed professor of astronomy and director of the observatory of Harvard college. Among other works he wrote "A Treatise on the Construction of the Rings of Saturn," in which their fluid nature was first established; another on the "Elements of the Orbits of Hyperion and the Satellite of Neptune," and participated in the discovery of both. He published papers also on the nebula of Andromeda, on various comets, and on stellar photography. The royal astronomical society of London voted a gold medal to Mr. Bond for a work on the Donati comet (Cambridge, 1862).

BONDI, Jonas, Jewish rabbi, b. in Dresden, Saxony, 15 July, 1804; d. in New York, 11 March, 1874. He received a thorough secular and theological education at Prague, but did not enter upon the active duties of the ministry until his call to New York in 1859 as rabbi of a synagogue. At the expiration of his term he engaged in literary pursuits, contributing to the "Occident," of Philadelphia, and establishing in New York the "Hebrew Leader," which he edited for twenty years. Rabbi Bondi was earnest and eloquent as a speaker and writer in the German language, regarded as an authority on Talmudical and rabbinical questions, and belonged to the conservative school of Jewish thought. He was prominently connected with Jewish charitable organizations.

BONHAM, M. Jedge Lake, soldier, b. in South Carolina, 6 May, 1815; d. in White Sulphur Springs, Va., 28 Aug., 1890. He was graduated in 1834, admitted to the bar at Columbia in 1837, and settled and began practice in Edgefield. In the Mexican war he commanded a battalion of South Carolina volunteers. From 1848 till 1850 he was state solicitor for the eastern district of South Carolina. In 1856 elected to congress as a state-rights democrat, and in 1858 re-elected. On 21 Dec., 1860, he left congress with the other members of the South Carolina delegation. He was a commissioner from South Carolina to Mississippi, and detailed as major-general to command the South Carolina troops. He entered the civil war as major-general, and commanded a brigade at the battles of Blackburn's Ford and Bull Run. He was then elected a representative from South Carolina in the confederate congress, and served until he was elected governor of that state for the term 1862-4. In 1864 he returned to the confederate army, and served until the close of the war. He was a delegate to the national democratic convention held in New York in 1868.

BONNER, Robert, publisher, b. near Londonderry, Ireland, 28 April, 1824; d. in New York city, 6 July, 1890. He came to the United States and learned the printer's trade. In 1859 he was employed in the office of the Hartford "Courant," where he became the most rapid compositor in Connecticut. In 1844 he removed to New York, and in 1851 purchased the "Ledger," at that time an insignificant sheet. By printing the most popular class of interesting stories, he gave the paper a wide circulation, which was further extended by the contributions of Fanny Fern, Edward Everett, Henry Ward Beecher, and other eminent authors and elogymen. He has made large gifts of money to Princeton college, and to various charities. To gratify his taste for fast horses, he has purchased several of the most celebrated trotters in the world, but withdrawn them from the race-course. Among his horses are
Peerless, Dexter, and Maud S., which he purchased, with a record of $2,093, afterwad reduced to $2,892, from William II. Vanderbilt for $40,000.

BONNER, Sherwood, Sec. McDowell, Kate.

BONNEVILLE. Benjamin L. E., explorer, b. in France about 1795; d. at Fort Smith, Ark., 12 June, 1878. He was appointed to West Point from New York, was graduated in 1815, became lieutenant of artillery, and in 1820 was engaged in the construction of a military road through Missis- sissippi, and was appointed by General in 1853, and in 1851–6 engaged in expeditions in the Rocky mountains and in California. His journal was edited and amplified by Washington Irving, and published under the title of “Adventures of Captain Bonneville, U. S. A., in the Rocky Mountains and the Far West” (Philadelphia, 1857). He was promoted major, 15 July, 1845, and fought through the Mexican War taking part in the march through Chihuahua, in the siege of Vera Cruz, the battle of Cerro Gordo, the capture of San Antonio, the battle of Churubusco, where he was wounded, the battle of Molino del Rey, the storming of Chapultepec, and the assault and capture of the city of Mexico. For gallantry at Contreras and Churubusco he was brevetted lieutenant-colonel. He was promoted to the full rank of lieutenant-colonel on 7 May, 1849, and to the grade of colonel on 3 Feb., 1855. He was commandant of the Washington Barracks in 1856–7, commanded the Gila expedition in 1857, resumed command of the department of New Mexico in 1858, and on 9 Sept., 1861, was retired from the active service for disability. During the civil war he served as a brigadier-general of volunteers in Missouri, and from 1862 till 1865 as commandant of Benton barracks in St. Louis. On 13 March, 1865, he was brevetted brigadier-general for long and faithful services. At the time of his death he was the oldest officer on the retired list.

BONNEVILLE, C. de, French engineer, b. in Lyons, 29 July 1789. He served as captain of engineers in the beginning of the seven years' war in Prussia, and afterward in America, until the close of the war in 1763. During his stay in America he studied the productions of the country and the manners of the inhabitants, and, besides other works, published in 1771 “De l’Amérique.”

BONNYCASTLE, Sir Richard Henry, English soldier, b. in 1791; d. in 1848. He served in Canada during the war in 1812, became a captain of engineers in 1825, and took part in the capture of Fort Custin and the occupation of the Maine coast east of Pencosket. He commanded the engineers in Canada West during the rebellion of 1837-9, was knighted for services in the defence of Kingston in 1838, was subsequently commander of engineers in Newfoundland, and in 1848 was made lieutenant-colonel. Most of his life was passed in British North America. He published “Spanish America” (London, 1818; Philadelphia, 1819); “The Canadians in 1843” (London, 1843); “The Canadian Pioneers” (London, 1846); and “Canada as it was, Is, and May be,” edited by Sir J. E. Alexander (1846).—His brother, Charles, mathematician, b. in Woolwich, England, in 1792; d. in Charlotteville, Va., in October, 1840. He was a son of John Bonnycastle, professor of mathematics at Woolwich military academy, and assisted his father in the preparation of mathematical text-books, besides contributing to cyclo- pedias and periodicals. At the organization of the University of Virginia, in 1825, he came over to take the professorship of natural philosophy, which he exchanged in 1827 for that of mathematic-

ics. He published treatises on “Inductive Geome- try” (Philadelphia, 1832); “Algebra” (New York); “Mensuration” (Philadelphia); and various papers on scientific subjects.

BONPLAND, Aimé (the pen-name of Gougaud, Arédée Jacques Alexandre), French traveler, b. in La Rochelle, France, 22 Aug., 1773; d. in Santa Anna, Uruguay, 11 May, 1858. He studied medi- cine in La Rochelle, was surgeon on a war vessel, afterward studied under Corvisart, and became in- timate with the philosopher von Humboldt, whom he accompanied in the explorations he undertook in “Voyages aux régions équinoxiales du nouveau continent” (12 vols., Paris, 1815–21). The collections made during his five years' travels in Mexico, Colombia, and the Orinoco and Amazon valleys were presented by him to the French government, which rewarded him with a pension, and appointed him superintendent of the gardens at Malmaison. He collected and classified about 6,000 plants, for the most part previously unknown, which he afterward described in “Plantes équinoxiales” (Paris, 1806–10). After endeavoring to persuade Napoleon to retire to Mexico, he departed for Buenos Ayres in 1816, taking with him a number of Euro- pean botanical plants. There he was appointed professor of natural history, but was afterward re- signed in order to explore the central parts of South America. In Paraguay he was arrested as a spy in 1821 by order of Dr. Francia, and was a prisoner for ten years. On regaining his liberty he settled at San Borje, in Corrientes, where the government of the province presented him with an ample estate, and a library. He published his travels in reeunelles au Mexique, à l'île de Cuba, dans les provinces de Caracas, de Cumana, aux Andes de Quito, et sur les bords de l'Orénoque et des Amazones” (2 vols., Paris, 1805–10); and “Monographie des melastomées” (2 vols., Paris, 1806–9).

BONVOULOIR, M. de, diplomatic agent, born and died in France during the 18th century. He was the secret envoy of Vergennes, the French minister of state, through whom the negotiations were opened in 1775 that resulted in French inter- vention for American independence. He is described as a man of remarkable prudence and judgment. He had been in Santo Domingo, and returned home about July, 1775, by way of the colonies, then over the Saint Lawrence. By receiving British agent at Philadelphia, New York, Providence, and Boston, he was well qualified to express an opinion regarding the state of affairs in America. At this time De Gui- nes, French ambassador to the court of St. James, became aware of a faction in England that favored war with France, on the ground that the colonies would thereby be driven back to their old allegiance, through a fear that Canada would be regained by the French. Bonvouloir, who was well known to De Guines, offered a perfectly trustworthy medium, and was sent to America, at the suggestion of the French minister of state, with verbal instructions to learn what he could of public sentiment, and so far as possible to eradicate the idea of martial revo- lution in the hearts of the American people. He was received in America just as the leading spirits—Franklin, Harrison, Jay, and the rest—were in secret con- clave on the very problem that he came to solve. Seeking an introduction to Franklin, he had sev- eral conferences with the committee, and conduct- ed his part of the delicate negotiations with con- summate tact and wisdom. His written reports to the French minister were prudent and truthful, and speedily brought about deliberations of the most momentous character, resulting in the ma- terial and afforded by France to the struggling
American colonies. See Trescot's "Diplomacy of the Revolution" (New York, 1922).

BOOKER, George William. A lawyer, b. in Patrick co., Va., 14 Dec., 1821; d. in Martinsville, Va., 4 June, 1883. He studied law and taught school, soon after his admission to the bar became a justice of the peace in Henry co., and from 1857 till 1862 was the presiding justice of Henry co. court. During the civil war he was an unconditional union man. In 1865 he was elected to the house of delegates of the legislature of Virginia, and in 1868 received the nomination of state attorney-general. This office he resigned, and was elected as a conservative to congress, where he served from 31 Jan., 1870, till 3 March, 1871. He was elected to the state legislature in November, 1873, and, after serving for two years, retired entirely from public life.

BOOMER, George Boardman, soldier, b. in Sutton, Mass., 26 July, 1832; killed at Vicksburg, Miss., 22 May, 1863. He removed to St. Louis at an early age and became a bridge-builder. The town of Osage Rock, on Osage river, was laid out and partly built by him. He was present, as colonel of the 22d Missouri volunteers, at the battle of Island No. 10, and distinguished himself at the battle of Iuka, where he was severely wounded. He commanded the second brigade of Gen. Quinby's division of MacPherson's corps at the battle of Champion Hills with conspicuous gallantry, and was recommended for promotion. While leading his brigade in an assault upon the works on the east side of the city of Vicksburg he was killed by a sharp-shooter.

BOONE, Daniel, pioneer, b. in Bucks co., Pa., 11 Feb., 1735; d. in Missouri, 26 Sept., 1820. Among the immigrants that landed, 10 Oct., 1777, at Philadelphia was George Boone, of Exeter, England, who came with his wife and eleven children, bought land near Bristol, Bucks co., Pa., and joined the society of Friends. His son, Squire Boone, married Sarah Morgan, and Daniel was their son. Squire Boone, who was a farmer, moved, about 1748, to Holman's Ford, on the Yadkin, in North Carolina. Daniel's education was very limited; he could read and write, but beyond that all he knew related to the fields, the woods, rifle, and hunting. He was a hunter born, and loved the solitude of the forest. Strong, brave, lithe, inured to hardship and privation, he traced his steps through the pathless forest, sought out the hiding-places of panther, bear, and wolf, and was the match of any Indian in the sagacity with which he detected the footsteps of the red man. About 1755 he married Rebecca Bryan and set up his own log-cabin, but, displeased with the encroachments of civilization on his solitude, and incited by the glowing accounts brought by John Finley, who had penetrated into the unknown regions of Kentucky, formed a company of six kin-

dred spirits, and, biding adieu to his family and the comforts of home, on 1 May, 1768, set out on his perilous and marvelous expedition. After various adventures with the Indians, having become intimately acquainted with the character of the country, established an enviable reputation for sagacity and integrity on important frontier service assigned to him by Lord Dunmore in the campaign against the Indians, usually called "Lord Dunmore's War," and constructed a strong fort on the left bank of Kentucky river, which he named "Boonesborough," he determined to bring his wife and family to the new home. Some of his neighbors joined him, and he conducted the party, numbering upward of thirty, safely to "Boonesborough" without having encountered any other difficulties than such as are common to this passage. On one occasion Boone, with an armed party of thirty men, had gone for a supply of salt to a place called "Salt Licks," nearly 100 miles north of Boonesborough, and was captured, with twenty-seven of his men, by a band of more than 100 Indian warriors led by two Frenchmen. They carried them first to Old Chillicothe, on the Point, and then to Fort Dunmore, from which they were ransomed for a ransom all their prisoners except Boone; him they took back to Old Chillicothe, where the great Blackfish, a renowned Shawanape chief, adopted him into his family under an imposing but painful ceremonial; all his hair, except a tuft three or four inches in diameter on the crown of his head, was cut off, and his hair was allowed to grow to the length of the "war-lock," dressed with feathers and ribbons; an ablation in the river was supposed to cleanse him from the taint of white blood; a coat of paint on his face, and a solemn charge from Blackfish, completed the rite. After a prolonged and anxious residence among them, during which he was kindly treated, he discovered the intention of running a road into Boonesborough, and resolved, at the peril of certain death in the event of recapture, to attempt his escape and save his family and friends. Chased by 450 Indians, he performed that daring feat in the forty-third year of his age, and thus simply records it: "On the 16th of June, before sunrise, I departed in the night with the rest of my family from Boonesborough on the 20th, after a journey of 160 miles, during which I had but one meal." At the fort he learned that his wife and children, despairing of ever seeing him again, had returned, and safely reached her father's home in North Carolina. The Indians assailed the fort, but were repelled with loss, and retreated. Boone then, in the autumn of 1778, rejoined his family on the Yadkin, and returned with them to Kentucky in 1780. The country, though well settled, was still unsafe, and, soon after his return, Boone and his brother, Squire, were surprised by Indians; Squire was killed and scalped, and Daniel had a narrow escape. A sanguinary engagement, called the Battle of White Oak Ford, in which Daniel Boone's two sons fought at his side. One of them was killed, and the other severely wounded. Boone was full of expedients, and on one occasion extricated himself from four armed Indians by blinding them with tobacco-dust. Kentucky was admitted into the union, 4 Feb., 1791, and in the survey of the state the title to Boone's land was disputed. The cause was decided against him, and, stung to the quick by the wrong, he had again to seek a new home, which he established at Point Pleasant, between the Ohio and the Great Kanawha; but in 1795 he removed to Missouri, then a Spanish possession, and received not only the ap-
pointed of commandant of the Fiume Osage district, but a grant of 8,000 acres. The Spanish possessions passed into the hands of Napoleon, who sold them to the United States, and, in the survey that followed, the Spanish grant of Boone's lands was pronounced invalid. An appeal to the legislature of Kentucky, and another to congress, resulted in a grant by the latter of 560 acres. Boone was then seventy-five years of age, hale and strong. The charm of the hunter's life clung to him to the last, and in his eighty-second year he went on a hunting excursion to the mouth of Kan-saw, near his last residence, and died of exposure to the cold and his death led him in it to rest by the side of his wife, who had passed away seven years before. On 13 Sept., 1845, their remains were removed to the cemetery near Frankfort, Ky., a few miles from the fort of Boonesborough, by the concurrent action of the citizens of Frankfort and the legislature of Kentucky.—His son, Boone, b. in Boonesborough, Ky., in 1777; d. 8 March, 1862, was the first white male child born in Kentucky. Daniel Boone's wife, with her daughters, went to live with her husband in his palisaded fort in June, 1776, and while there gave birth to this son; but after Boone's capture, on 7 Feb., 1778, his family returned to North Carolina.

BOONE, William Jones, bishop, b. in Cedar County, Pa., in 1811; d. in Shanghai, China, 17 July, 1864. He was graduated at the college of South Carolina in 1829, studied law with Chancellor De Saussure, and admitted to the bar in 1833: but soon afterward went to the theological seminary of Virginia to prepare for orders. Intending to devote himself to missionary life and work, he went through a course of medical study, and was received as a member of the South Carolina medical college. He was ordained deacon in Charleston, S. C., 18 Sept., 1836, and priest the year following. Dr. Boone was appointed missionary to China, and sailed for that country in July, 1837. In 1844 he was elected mission-ary bishop to China, the first one appointed by the American Missionary Society, and consecrated in Philadelphia, 25 Oct., 1844. At the close of the year he returned and spent the last twenty years of his life at his post of duty, excepting two visits to the United States, in 1852 and 1857, for the benefit of his health. He returned to the east from his last visit to the United States, in 1857, and was consecrated in Philadelphia, 18 Oct., 1857, with the new mission in Japan. Bishop Boone was noted for scholarship in the Chinese language and literature, and did eminent service in securing an accurate version of the Holy Scriptures and of the Prayer-Book into that difficult tongue. He began his translation of the Prayer-Book in 1846, and in 1847 was appointed one of the committee of delegates from the several missions to recast the translation of the Bible, a work on which he was already engaged.—His son, William Jones, P. E. bishop, b. in Shanghai in 1847, obtained his early education from members of the China mission, after which he came to the United States, and was graduated at Princeton in 1865. He studied theology at the divinity school in Philadelphia, spent two years in the Alexandria seminary, and then went abroad for a year of further study. He was ap-pointed missionary to China in 1869, and reached Shanghai in January, 1870. He was ordained deacon in Petersburg, Va., in 1868, and priest in the English church, at Hankow, China, in 1870. Having been appointed missionary bishop, he was consecrated in the cathedral of St. John's, by Bishop Williams, of Yedo, and Bishops Moule and Scott, English missionary bishops in China.

BOORMAN, James, merchant, b. in Kent co., England, in 1783; d. in New York city, 21 Jan., 1866. He accompanied his parents to the United States when about twelve years of age, was apprenticed to Divie Bethune, of New York, and entered into partnership with him, 1806. Afterward, in connection with John Johnston, he formed the firm of Boorman & Johnston, which almost entirely controlled the Dunlee trade, and dealt largely in Swedish iron and Virginia tobacco. Mr. Boorman was one of the pioneers in the construction of the Hudson river railroad, and was for many years its president. He was a member of the board of directors of the Bank of Commerce. He retired from active business in 1855. The institution for the blind, the Protestant half-orphan asylum, the southern aid society, and the union theological seminary were among the recipients of his bounty.

BOOTH, John Fletcher, Cherokee preacher, b. about 1796; d. 8 Aug., 1833. He was converted and made a member of the Cherokee nation council. In 1825 he was converted to Christianity, and in 1827 licensed to preach. He was subsequently ordained a deacon in the Methodist Episcopal church, south, in Nashville, Tenn., and later received ordination as elder in Lebanon. He preached effectively in the Cherokee tongue.

BOOTH, Benjamin, writer on book-keeping. He was an American merchant, who became clerk in a store in New York about 1750, and when he rose to the chief clerkship introduced a system of book-keeping of his own invention which he employed also in his own business. He was a retail merchant in New York until the war of independ-ence interfered with his business, when he retired and went to Enfield. There he made known his system of keeping accounts in a volume entitled "A Complete System of Book-Keeping by an Improved Method of Double Entry, containing also a New Method of stating Faqetorage Accounts, adapted particularly to the Trade of the British Colo-nies" (London, 1789). It was written humorously, with much familiarity and directness, and illustrated by noted persons, to illustrate the new method.

BOOTH, James Curtis, chemist, b. in Phila-delphia, Pa., 28 July, 1810; d. in West Haverford, Pa., 21 March, 1888. He was educated at Hartsville seminary, and was graduated at the university of Pennsylvania in 1829, after which he spent a year in the U. S. Navy. He received the degree of Ph. D. in 1832 he went to Germany, and studied chemistry in Wohler's private laboratory in Cassel, at a time when there were no laboratories in Germany ar ranged for the regular reception of students. He spent some time under G. Magnus in Berlin, then in Vienna, and afterward went to chemical research in 1855 to studying technical chemistry at various places in Germany and England. In 1836 he established in Philadelphia a laboratory, the first of its
kind in the United States, for instruction in chemical analysis and chemistry applied to the arts. A course under Dr. Booth was considered essential to those who followed chemistry, and many of his students have become well known. Among these are J. F. Prazer, Thos. H. Garrett, his late partner, R. S. McCulloh, Campbell Morfit, Clarence Morfit, and R. E. Rogers. During the same year (1856) he became professor of applied chemistry at the Franklin institute, and for nine successive winters he continued his lectures, making three full courses of three years each. In 1849 he was appointed melter and refiner of the U. S. mint in Philadelphia, a place which he retained until 1888. His published papers cover topics in the entire domain of analytical and technical chemistry. His larger works include the first and second "Annual Report of the Delaware Geological Survey" (Dover, 1839); "The Memoirs of the Geological Survey of the State of Delaware" (Dover, 1841); "Encyclopedia of Chemistry," in the preparation of which he was assisted by Martin H. Boyce, R. S. McCulloh, and Campbell Morfit (Philadelphia, 1849); and a report as to "Drawn and Painted Arts" (Washington, 1852). He was president of the American chemical society in 1884 and 1885.

**BOOTH.** *Junius Brutus,* actor, b. in London, 1 May, 1786; d. 3 Nov., 1852. His father, Richard Booth, the son of a silversmith of Bloomsbury, after studying law, having become imbued with republican ideas, gave himself up to acting, in order to gain a livelihood for his eldest son, received a classical education, essayed painting, sculpture, and poetry, was induced for a time to work in his father's office with a view of becoming a solicitor, and then, evincing a preference for naval life, was commissioned as a midshipman to Capt. Blythe's brig "Boxer"; but, when the ship was sunk by the French in the West Indies, he returned to London, took up the study of law, and unwilling that his son should serve against the United States, dissuaded him from joining the ship. After appearing as an amateur in a small London theatre, he announced his intention of becoming an actor, and, against his father's wishes, made an engagement, and played subordinate parts, in Peckham, Deptford, and in 1814 made a professional tour through Holland and Belgium. A few critics and influential friends, who recognized his talents, seconded his efforts to secure a London engagement; but he was forced to accept an offer to play in the Worthing and Brighton theatres for the season of 1815. He left there in October, having finally secured a contract with the management of the Theatre Royal, Haymarket; but he continued to appear at Worthing and in Brighton, where he was announced for inferior parts instead of for Richard III., he returned to Worthing, and gained a triumph as a substitute for Edmund Kean in the character of Sir Giles Overreach, captaining an audience that was at first indignant at the young actor's presumption. He continued to play at Worthing, and found influential admirers, who prevailed upon the manager, Harris, to give him a trial as Richard III., at Covent Garden, where he appeared in that character on 17 Feb., 1817, and delighted the metropolitan audience. Before the third performance, after a quarrel with the manager, he was induced by Kean, of the Drury lane company, to enter into an engagement with the rival theatre, where he was announced to play Iago to Kean's Othello; but he soon learned with elation that in entrapping him into so false a contract Kean designed only to prevent rivalry by robbing the new favorite of the opportunity to appear in leading parts. Booth, when made aware of this, signed an agreement with the proprietors of Covent Garden theatre, who agreed to him of legal duties. The town was divided into Boothites and Keanites, but Booth's reappearance at Covent Garden as Richard was the occasion of a riotous tumult, which was renewed on subsequent evenings. He played Richard and Sir Giles Overreach alternately, and then Posthumus in "Cymbeline," appeared as Othello at Woolwich, afterward as Sir Edward Mortimer in "The Iron Chest" at Covent Garden, acted with applause, in July, 1818, at Glasgow and Edinburgh, strolled through the provinces, gave Shylock in the Jewish dialect at Covent Garden during the succeeding autumn, and in the winter entered into an engagement with the Colourg theatre, where he acted Richard, Horatius, and Brutus. In April, 1819, he appeared as Richard III., with his boy, Lear, which was recognized as one of his finest parts. In August, 1820, he performed with Kean at Drury lane, playing Iago, Edgar in "King Lear," and Pierre. In the winter, while Kean was in the United States, he acted Lear, Cassius, and the part of an Indian chief at Drury lane theatre. On 18 Jan., 1821, Mr. Booth married Mary Anne Haines, and after a winter tour to the West Indies, and back to Madeira, and took passage thence for the United States, landing at Norfolk, Va., 30 June, 1821. On 6 July, Booth appeared in Richmond. His freedom from vanity and calculating self-interest was evinced in his sudden arrival unheralded in the United States. After a winter in Charleston, he went to New York, and in southern cities he seriously entertained the idea of retiring from the stage and spending his days in quiet as a light-house keeper. His first appearance in New York was at the Park theatre on 5 Oct., 1821. In the summer of 1822 he purchased, in Harford co., Md., twenty-five miles from Baltimore, a retreat in the midst of woods, which he always attended as a retired person, and there, on the stage, and where he carried on amateur farming with the help of a few slaves. Thither his father, the constant admirer of America, came the same year to pass his remaining days. In 1825 he again visited London with his family, and when the Royalty theatre was burned lost his entire wardrobe. After he returned to the United States he began an engagement at the Park theatre, New York, on 24 March, 1837, in which he acted Selim in the "Bride of Abydos" at his benefit. In June he appeared in the part of Pescara in "The Apostate," a character written for him by Shiel. In 1828 he undertook the management of the Camp theatre in New York, where he not only profited by his experience after his return from the United States, but also, as a manager, as "The Governess" in Richard III, to packed houses, studied French parts, and afterward personated characters in several French dramas, astonishing the audience with the purity of his accent and his familiarity with the peculiarities of French acting. The manager of the Théâtre d'Orleans persuaded him to take the part of Orestes in Racine's "Electra," which he greatly pleased the French-speaking public. In September, 1831, in New York, he played Pierre in "Venice Preserved," and Othello to Forrest's Jaffier and Iago. The same year he took the lease of the Adelphi theatre in Baltimore. While his theatre was undergoing repairs he took the holiday street theatre. During the season hean-
Booth made his first regular appearance upon the stage, at the Boston Museum, on 10 Sept., 1849. The play was Cibber's version of Shakespeare's "Richard III," and the youth came forward in the little part of Trossil. At first the elder Booth opposed his son's choice of the stage, but ultimately he relinquished his opposition. The boy persevered, and presently, still acting in his father's train, he appeared at Providence, R. I., at Philadelphia, and at other places, as Cassio in "Othello," and as Richard in "The Iron Chest"—the latter impersonation being peculiarly appropriate, inasmuch as Edwin Booth continued to act with his father for more than two years after the advent at the Boston Museum. His first appearance on the New York stage was on 27 Sept., 1850, at the National theatre, Chatham street, as Wilford. At the same theatre, in 1851, his father being ill, he suddenly and promptly took the place of the elder tragedian, and for the first time in his life enacted Richard III. This effort, remarkably successful for a comparative novice, was hailed as the indication of great talent and as the augury of a brilliant future. In the summer of 1852 he accompanied his father to San Francisco, where his elder brother, Junius, Jr., had already established himself as an actor and a theatrical manager, and where the three Booths gave a successful tour. In company with other cities were visited by them, and the elder Booth remained in California for about three months. One night, at Sacramento, seeing Edwin dressed for Jaffier in "Venice Preserved," he said: "Edwin: does it look like Hamlet? why don't you play it?"—a remark that the younger Booth had good reason to remember, for no actor has ever played Hamlet so often or over so wide a range of territory. Just as the name of Junius Brutus Booth is inseparably associated with Richard III, so the name of Edwin Booth is inseparably associated with Hamlet. In October, 1852, the father and son parted for the last time. The California period of Edwin Booth's professional career lasted from the summer of 1852 till the autumn of 1856, and included a trip to Australia. The young actor at first played parts of all kinds, and he had a severe experience of poverty and hardship. Soon, however, he began to display uncommon merit, and thereupon to receive universal admiration. One of his earliest and best successes was obtained as Sir Edward Mortimer in "The Iron Chest." For a time, indeed, he travelled in California, conveying his wardrobe for this piece in a trunk fashioned and painted to resemble a chest made of iron. His trip to Australia, in 1854, was made with a dramatic company, and the elder Booth pressed Miss Lanier Keene as leading woman. Previous to this he had, in his brother's theatre at San Francisco, acted Richard III, Shylock, Macbeth, and Hamlet, had made an extraordinary

Booth appeared in several new characters, such as Roderick Dhu, Selim, Richard II., Peurifiddle, Falkland in "The Rivals," and Luke in "Riches." In January, 1852, he appeared in the Chestnut street theatre, Philadelphia, in "Sororitis," a new play, by the Philadelphia lawyer, David Paul Brown. The death of two of his children robbed him for a time of his reason, and after his recovery an engagement, made with the actor Hamblin, for Richmond, was renewed for the Bowery theatre, New York, 1852, he appeared in New Orleans and Mobile, and on a tour through the west of the United States, and from that time forth, his mental disorder, slight attacks of which had occurred in earlier years, returned with increasing frequency and severity. As he grew older his partial insanity was aggravated by intemperance. After playing Shylock for eight nights to crowded houses at the National theatre, New York, and visiting Baltimore and Philadelphia, he sailed, in October, 1856, for Europe with his family, played Richard and Iago at Drury lane theatre, and in Birmingham, where he was prostrated with the news of the death of his favorite son, Henry Byron, in London, from small-pox. He immediately returned to the United States, and in the autumn of 1857 performed at the Olympic in New York, afterward sailed for the south on a professional tour, and during the voyage attempted suicide in a moment of aberration. On the same trip his nose was broken, impairing the beauty of his face and his rich tones of voice; but in the course of two years he regained the strength and scope of his vocal organs. During these last ten years of his life he spent much of his time with his family, residing in Baltimore, and only visiting his farm in the heat of summer. He played when and where he pleased, often in small, out-of-the-way theatres, but made annual visits to New Orleans and Boston, where he was an established favorite. In 1859 and the succeeding season he played at the National theatre, New York, and made his last appearance in that city on 19 Sept., 1851. In 1851 he performed several parts at the Chestnut street theatre, Philadelphia, and in the spring of 1852, with his son Edwin (Junius Brutus had previously gone thither), he went to California, playing to crowded houses in San Francisco with Edwin in companion character. During the last ten years of his life he spent with the intention of retiring completely from the stage. Arriving at New Orleans in November, he performed six nights with his usual ability, but contracted a cold, and during his passage up the Mississippi river remained in his state-room, suffering from fever and dysentery, and died for lack of medical care. See Asia Booth Clarke's "The Elder and the Younger Booth" in the American Actor Series (Boston, 1882); Genest's "History of the Stage"; and "Booth Memorials," by his daughter Asia (New York, 1866).—His son, Edwin, actor, b. in Bel Air, Md., 13 Nov., 1833; d. in New York, 7 June, 1893, was named Edwin Thomas, in compliment to his father's friends, Edwin Forrest and Thomas Moore. The boy was brought up by different teachers near his home; but this tuition was neither continuous nor thorough. He was thoughtful and studious, and made much of his limited opportunities. He was reticent and singularly profound and sensitive, and the eccentric genius of the elder Booth found in him an object of the most warm and devoted attachment. The boy fondly attached to each other from the first, and while Edwin was yet very young his father made a companion of him in professional journeys. It was in the course of one of these tours that Edwin
impression, and acquired abundant local popularity. At this time his acting began to receive thoughtful attention from learned and critical authorities. He stopped and acted at the Sandwich islands on his return voyage from Australia to San Francisco, and reappeared there at the Metropolitan theatre, then (1856) managed by Miss Catherine Sinclair (Mrs. Edwin Forrest, who had left her husband and obtained a divorce from him), and he was then and there the original representative in America of Raphael in "The Marble Heart." In 1856 he took leave of California, being cheered on his way by several farewell testimonial benefits, organized and conducted by one of his earliest and best friends, Mr. M. P. Butler, of Sacramento, and he inspected for himself the cities of the east. He first appeared at the Front street theatre, Baltimore, and then made a rapid tour of all the large cities of the south, being everywhere well received. In April, 1857, he appeared at the Boston theatre as Sir Giles Overreach in "A New Way to Pay Old Debts," and his great success on that occasion led to his engagement by the managers of the Hunter Garden, in New York, at Burton's Metropolitan theatre, as Richard III., and in the following August he was again seen there in a round of great characters, all of which he acted with brilliant ability and greatly to the public satisfaction. On 7 July, 1859, he married Miss Mary Devlin, of Proy, N. Y., an actress, whom he had met three years before at Buffalo, Vigo county, Indiana, and shortly afterward, had made a visit to England. Their only child, a daughter, Edwina, was born in Fulham, 9 Dec., 1861. After their return to America, Mrs. Booth, sinking under a sudden illness, died at Dorchester, Mass., on 21 Feb., 1863. While in England, Booth appeared at the London Haymarket theatre, under the management of J. B. Buckston, who, in the short time of 14 days, had recaptured London for Booth by having appeared with him in "Macbeth," "The Merchant of Venice," "Richelieu," and other plays. The latter part, with which, as much as with Hamlet, his name is identified, he had first assumed at Sacramento, Cal., in July, 1856. His performance of it was much admired in London, and also at Liverpool and Manchester, where he afterward appeared. On his return to New York, his stock company, including Frank Barrett, Edwin L. Davenport, J. W. Wallace, Jr., Mark Smith, Edwin Adams, A. W. Fenno, D. C. Anderson, D. W. Waller, Robert Pateman, Mrs. Emma Weller, Bella Pateman, and others—one of the most brilliant dramatic organizations ever formed in America. Among the stars who acted at his theatre were Joseph Jefferson, Kate Bateman, James Hackett, Kate Hackett, S. S. Burnet, S. S. Burnet, John E. Owens, and James H. McVicker. Booth's theatre was almost invariably a prosperous house; but it was not economically managed, and for this reason, and this alone, it eventually carried its owner into bankruptcy. Edwin Booth then began his career over again, and in course of time paid his debts and earned another fortune. In 1866, he made a tour of the south, which was in fact a triumphal progress. Thousands of spectators flocked to see him in every city that he visited. In San Francisco, where he acted for eight weeks, he drew upward of $96,000, a total of receipts till then unprecedented on the dramatic stage. In 1868, and again in 1869, he visited Great Britain, and he acted with brilliant success in London and other
cities. He went into Germany in the autumn of 1882, and was there received with extraordinary enthusiasm. In 1883 he returned home and resumed his starring tours of America. Booth acted many parts in his day, but of late years his reputation had been limited to Hamlet, Macbeth, King Lear, Othello, Iago, Wolsey, Richard III, Shylock, Richard II, Benedick, Petrucho, Richardien, Payne's Brutus, Bertuccio (in "The Fool's Revenge") by Tom Taylor, Ruy Bias, and Don Caesar de Bazan.

He published an edition of these plays, in fifteen volumes, the first volume of which appeared in 1889. The last four of the seventeen volumes of the original work, in 1896 under the title of "The Decline of the French Monarchy." It was intended to follow these with the other volumes from the beginning, but, although two others were translated by Miss Booth, the enterprise was abandoned for lack of success. Miss Booth's French translation of Martin's abridgment of his "History of France" appeared in 1880. She also translated Laboulaye's "Fairy Book," and Macé's "Fairy Tales." An enlarged edition of the "History of the City of New York" was printed in 1867, and a second revised edition, brought down to date, in 1890. Miss Booth was the editor of "Harper's Bazar," since its establishment in 1854.

BOOTH, Mary H. C., poet, b. in Connecticut in 1831; d. in New York city, 11 April, 1895. She married a journalist, and went to reside in Milwaukee, Wis., about 1850. She lived in Zurich, Switzerland, several years for the benefit of her health, and while there corresponded with American journals. In 1864, just before her return to the United States, she published a volume of poetry, partly original and partly translated, entitled "Wayside Blossoms among Flowers from German Gardens" (Milwaukee). She reached New York in the last stage of the cancer but succeeded in writing her account of her experience before her death, in preparing a revised edition of her poetry (Philadelphia, 1865).

BOOTH, Mary Louise, author, b. in Millville, now Yaphank, N. Y., 19 April, 1831; d. in New York city, 5 March, 1889. She was descended on her father's side from John Booth, who came to America about 1649, while her mother was the granddaugh- ter of a member of the French republic of the Revolution. At an early age she became a contributor to various journals. In 1845 and 1846 she taught in her father's school at Williamsburg, L. I., but gave up that pursuit on account of her health, and devoted herself to literature. Besides writing tales and sketches for newspapers and magazines, she translated from the French "Marble-Walker's Manual" (New York, 1856) and "The Clock and Watch Maker's Manual." She translated Mery's "André Chenier" and About's "King of the Mountains" for "Emer- son's Magazine," which also published original articles from her pen. She next translated Victor Cousin's "Secret History of the French Court; or, Life and Times of Madame de Chevresen" (Boston, 1857), and her "History of the City of New York," which was the result of great research. After its publication Miss Booth assisted O. W. Wight in making a series of translations of the French classics, and she also translated Edmund About's "Germaine" (Boston, 1860). During the civil war she engaged in the patriotic task of translating the writings of eminent Frenchmen in favor of the cause of the union, and these were published in rapid succession: Gasparin's "Uprising of a Great People" and "America before Europe" (New York, 1861), Edouard Labon- haye's "Paris in America" (New York, 1865), and Augustin Cochin's "Results of Emancipation" and "The Second and Third Emancipation." For her labor she received praise and encouragement from President Lincoln, Senator Sumner, and other statesmen. During the entire war she maintained a correspondence with Gasparin, Cochin, Henri Martin, Labonlaye, Montalembert, and other European sympathizers with the union. She also translated at that time the Countess de Gasparin's "Vesper," "Camille," and "Human Sorrows," and Count Gasparin's "Happiness." Documents forwarded to her by French friends of the union were translated and published in pamphlets, issued by the union league club, or printed in the New York journals. Miss Booth's next undertaking was a translation of Henri Martin's "History of France." The two volumes treating of "The Age of Louis XIV," were issued in 1864, and two others, the last of the seventeen volumes of the original work, in 1896 under the title of "The Decline of the French Monarchy." It was intended to follow these with the other volumes from the beginning, but, although two others were translated by Miss Booth, the enterprise was abandoned for lack of success. Miss Booth's French translation of Martin's abridgment of his "History of France" appeared in 1880. She also translated Laboulaye's "Fairy Book," and Macé's "Fairy Tales." An enlarged edition of the "History of the City of New York" was printed in 1867, and a second revised edition, brought down to date, in 1890. Miss Booth was the editor of "Harper's Bazar," since its establishment in 1854.

BOOTH, Newton, senator, b. in Salem, Ind., 25 Dec., 1825; d. in Sacramento, Cal., 14 July, 1892. He was graduated at Asbury University, after which he studied law, and was admitted to the bar. Subsequently he removed to California, and engaged in business as a wholesale grocer in Sacra- mento, and as a manufacturer of hats and caps. He practised his profession until 1869, when he again went to California. He was elected to the state senate in 1863, and in 1871 to the governor-ship on an independent ticket. This office he re- signed in 1875, when he was elected to the U. S. senate as an anti-monopolist. He took his seat on March 4, 1877, and served until 1883. Subsequently he engaged in commercial occupations in California.

BOOTT, Elizabeth, artist, b. in Cambridge, Mass. She studied painting on the continent of Europe, ending her studies in Paris with Couture, remained in that city, and devoted herself mainly to figure-painting. She sent a portrait to the Philadelphia re-establishment exhibit in 1876. One of her pictures were exhibited in Boston in 1877; and at the mechanics' fair in Boston in 1878 she exhibited "Head of a Tuscan Ox" and "Old Man Reading." At the national academy exhibition of 1886 she had "Hydrangias" and "Old Woman Spinning."
the quadrant. His works include "Voyage fait en 1771 et en 1772 en diverses parties de l'Europe et de l'Asie," written at the request of the French government.

**BORDEN, Enoch Robbins,** journalist, b. in New Sharon, N. J., 3 March, 1822; d. in Trenton, N. J., 16 May, 1870. For twenty years he was editor of the "Daily State Gazette," except while serving as aide-de-camp to Gen. Newell and as secretary to the New Jersey state senate in 1855-6. Under the administration of President Fillmore he held an appointment in the public document department, and afterward in the pension agency at Washington.

**BORDEN, Gail,** inventor, b. in Norwich, N. Y., 6 Nov., 1801; d. in Bordentown, Texas, 11 Jan., 1874. His parents were of New England descent, and in 1814 they emigrated from New York, settling in Covington, Ky., and later in Madison, then in Louisiana. In 1822, finding his health impaired, he removed to Mississippi, where he taught, and also filled the positions of county surveyor and U. S. deputy surveyor. In 1829 he went to Texas. He was elected delegate to the convention that, in 1833, petitioned the Mexican government for separation, and was so in charge of surveys of the colony, compiling the first topographical map of Texas. The land office at San Felipe was under his charge up to the time of the Mexican invasion. In 1835, with his brother, Thomas H., he established the "Telegraph and Texas Land Register" at San Felipe, which was afterward transferred to Houston, and he is said to have purchased more acres of Texas during the war for the independence of that colony. After the establishment of the republic of Texas he was appointed by President Houston first collector of the port of Galveston. That city in 1837 had not been laid out, and its first surveys were made by him. From 1839 till 1857 he was agent of the Galveston land company, and surveyed several thousand acres of land on which the city is now built. About 1849 his attention was drawn to the need of more suitable supplies for emigrants crossing the plains, and after some experimenting he produced the "pemmican," which Dr. Kane carried with him on his Arctic expedition. The "meat biscuit," the most simple, economical form of preserved food, was invented by him. This article gained for him the "great council medal" at the world's fair, London, 1851, and he was elected an honorary member of the London Society of Arts. Meeting with opposition from the army contractors, he was unsuccessful in the manufacture of his biscuit, and lost his entire means. He then removed to the north and turned his attention to the preservation of milk, and in 1853 applied for a patent for "producing concentrated sweet milk by evaporation in vacuo, the same having no sugar or other foreign matter mixed with it," but failed of securing it until 1856. Later, the New York Condensed Milk Company was formed, and condensed milk was produced, and a station at Elgin, Ill. During the civil war his condensed milk was extensively used in the army and navy. Condensed meat-juices were then experimented upon, and he produced an extract of beef of superior quality, which at first he made in Elgin, but afterward established his factory at Bordentown, N. J. Later, he produced excellent preparations of condensed tea, coffee, and cocoa, and in 1862 patented a process by means of which the juice of fruit—such as apples, currants, and grapes—could be reduced to one seventh of its original bulk. Mr. Borden acquired great wealth from his patents, and was very liberal in the use of his money.

**BORDEN, Simeon,** inventor, b. in Freetown, now Fall River, Mass., 29 Jan., 1814; d. in Fall River, 28 Oct., 1896. He acquired a rudimentary education in the district school at Tiverton, R. I., and pursued by himself the study of geometry and applied mathematics. Without serving any apprenticeship, he made himself a thorough workman in wood and metals. He also practised surveying with success, constructing his own observing apparatus. In 1828 he took college-work in a shop in Fall River. He devised and constructed, in 1830, an apparatus for measuring the base line of the trigonometrical survey of Massachusetts, which was found to be more accurate and convenient than any instrument of the kind then in existence. The apparatus, fifty feet in length, was enclosed in a tube, and was accompanied by a number of microscopes, the tube and microscopes being mounted on trestles, and adjusted so as to move in any desired direction. Mr. Borden assisted in fixing the base line, and in the subsequent triangulation in 1834 the state authorities appointed him superintendent of the survey, which he completed in 1841. The engineer's operations accomplished in America, is described in the ninth volume of the "American Philosophical Transactions." Its accuracy was subsequently established by the U. S. coast survey. Mr. Borden was employed as surveyor in the case of Rhode Island v. Massachusetts, tried before the U. S. supreme court in 1841. The survey was made by Mr. Borden and marked the boundary-line between the two states. He engaged later in the construction of railroads, and in 1851 published a volume entitled "A System of Useful Formulae, adapted to the Practical Operations of Locating and Constructing Railroads." In 1851 he accomplished the engineering feat of stringing a telegraph wire, from one hundred miles high, across the Hudson river from the Palisades to Fort Washington, a distance of more than a mile.

**BORDLEY, John Beale,** agricultural writer, b. in Annapolis, Md., 11 Feb., 1727; d. in Philadelphia, 26 Jan., 1804. He was a lawyer by profession, was prophoranon of Baltimore co. in 1755—56, judge of the provincial county court, the admiralty court in 1767—76, and a commissioner to fix the boundary-line between Maryland and Delaware in 1768. He was one of the few members of the provincial councils who sympathized with the movement for independence. Removing to Philadelphia in 1768, he established there the first agricultural society in the United States. By his experiments upon his estate in Wye island, Chesapeake bay, and by his writings, he was instrumental in diffusing a knowledge of the art of husbandry. He published "Forsyth on Fruit-Trees, with Notes:" "On Rotation of Crops" (1792); "Essays and Notes on Husbandry and Rural Affairs, with Plates" (1799—1801); and "A View of the Curses of Crops In England and Maryland" (1784).

**BOREMAN, Arthur Ingraham,** senator, b. in Waynesburg, Pa., 24 July, 1823; d. 19 April, 1886. While he was a child his father removed to western Virginia. He received a common-school education, studied law, was admitted to the bar in 1845, and began the practice at Parkersburg. He was elected to the Virginia house of delegates in 1855, and re-elected for each successive term until the beginning of the civil war. He was a member of the extra session of the legislature in 1861, and a vigorous opponent of secession. Of the Wheeling convention of unionists of the northern counties, called in June, 1861, for the purpose of recr
organizing the government of Virginia, he was made president. In October, 1861, he was elected a judge of the circuit court, and in 1863 governor of the newly constituted state of West Virginia. He was twice re-elected, but during his third term of office resigned, as he had been elected to the U. S. senate, in which he held a seat from 4 March, 1868, till 3 March, 1875.

BORIELLA, Jérôme-Maximilien, president of Hayti, b. in Port au Prince, 6 May, 1753; d. in September, 1842. His mother being a colored woman, Borgella could not legally use the name of his father until the whites, by right on the proclamation of equality, 4 April, 1792. After receiving some education he entered a carpenter's shop to learn that trade in 1786, and three years later joined the mulatto insurgents and fought against the negroes and the whites; but the negroes under Toussaint prevailed, and Borgella suffered persecution. When Napoleon I sent troops to resettle the republic, Borgella served in the French army for some time, but returned to the revolutionary party and distinguished himself by his bravery and his generosity toward the vanquished, many of these being saved by him when Dessalines ordered the slaughter of the whites. He took an active and important part in the affairs of the state during the period of the republic, of which he was appointed president by the assembly as successor of Rigaud, who died 18 Sept., 1811. Borgella afterward filled the highest offices in the army, in the chambers, and in several departments of the government, during Boyer's administration.

BORLAND, Edward, b. in Philadelphia, 25 Nov., 1803; d. there, 5 Feb., 1880. His father was a member of a family of refugees from Santo Domingo, of whom a large number settled in Philadelphia. In 1826 he was graduated at the Pennsylvania university, and went to Paris to complete his education. After spending several years abroad he returned to the United States and entered upon mercantile pursuits, was for many years a member of the firm of Young & Son, and was for a long time a factor in the East India trade. In 1862, when the first union league of the country was formed in Philadelphia, Mr. Borie was one of its founders and its vice-president. He gave large sums toward the enlistment and care of soldiers during the civil war, but took no part in politics. On 5 March, 1863, he became a member of the cabinet appointed by President Grant, as secretary of the navy, which office he resigned, 22 June, 1869. He accompanied Gen. Grant, who was much attached to him, during a part of his tour around the world in 1877-8.

BORJA, Ana, daughter of the duke de Gandía, and wife of count de Lemos, viceroY of Peru, b. at Gandía, 21 Nov., 1668, he did not transfer his powers to the Audencia, as was customary, but to his wife, all the authorities consulting. She governed Peru till about the end of the year 1693, and soon after the death of the viceroy returned to Spain.

BORGELLA Y ARAGON, Francisco (bor'ba), a descendant of the kings of Aragón, prince of Esquilache and viceroy of Peru, b. in Madrid in 1582; d. there, 26 Oct., 1658. He studied in Spain, and had won a good literary reputation and discharged high offices in the court of Philip III, when he was appointed viceroy of Peru in 1614. During his term of office he introduced several colleges and made important changes in the organization of the university of San Marcos, He instituted the tribunal del consulado, a special court and corporation to regulate commercial affairs generally, increased the navy and the artillery, and gave a great impulse to mining in the province of Chuquisato. On the death of Philip, Borgia embarked to return to Spain, 31 Dec., 1621. His best-known works are "Necro recupera por el Rey Alfonso," a poem (1551): "Obras en Verso" (Antwerp, 1654); and "Oraciones y Meditaciones de la Vida de Jesucristo" (Brussels, 1661).

BORLAND, Solomon, b. in Virginia: d. in Texas, 31 Jan., 1864. He was educated in North Carolina, and became a mechanic in Little Rock, Ark. He served in the Mexican war as major in Yell's cavalry, and was taken prisoner with Maj. Gaines in January, 1847. He was discharged when his troop was disbanded in June of that year, but continued in the service as volunteer aide-de-camp to Gen. Worth during the Mexican war, and later on in the campaign of Molino to the capture of the city of Mexico on 14 Sept., 1847. After his return to Arkansas, Mr. Borland was appointed to fill the vacancy caused by the resignation of Senator Ambrose H. Sevier, and subsequently elected by the legislature to serve through Mr. Sevier's unexpired term. After serving in the senate from 24 April, 1848, till 3 March, 1853, he was appointed minister to Nicaragua, being also accredited to Costa Rica, Guatema la, Honduras, and Salvador. He received his credentials, 18 April, 1853, and remained in Nicaragua till 17 April, 1854, when he returned home, and on 30 June resigned. At San Juan de Nicaragua, when he was returning to the United States, he was assassinated by a band of Indians; but he went to him in May, 1854, for interfering to prevent the arrest of a person charged with murder at Puntas Arenas. He took refuge in a hotel, and while he was engaged in protesting against arrest a man in the crowd threw a glass bottle and struck the envoy. This result was the chief ground for the bombardment and destruction of Greytown, or Signy, under Commander Hollins, on 13 July, 1854, under instructions from the U. S. government. President Pierce offered the post of governor of New Mexico to Mr. Borland after his return, but he declined the appointment and remained at Little Rock in the practice of his profession, taking no part in the movement to secede, but held himself an adherent of the state-rights doctrines. In the spring of 1861, before the ordinance of secession, which was passed 6 May, he organized a body of troops, and, under the direction of Gov. Rector, on 24 April at midnight, took possession of the buildings at Fort Smith an hour after the withdrawal of the garrison. He raised the 31 Arkansas confederate cavalry and became colonel of that regiment, and was after ward a brigadier-general in the same service.
BORRE, Prudhomme de, general in the continental army, b. in France. He was a French nobleman who volunteered, with other officers, to fight in the cause of American independence, and on 19th May, 1776, was commissioned a brigadier-general, but resigned on 14 Dec., 1777.

BORREJO, Eusebio (bor-ray'-ro), South American soldier, b. in Cali, Colombia, in 1790; d. there in 1853. He entered the revolutionary forces of New Granada in 1811, fought in the battle of Páez, which was the first in the campaign against Spanish forces in the eastern provinces. He was finally graduated to the rank of general. After the establishment of the republic in New Granada, Borrejo was several times a member of congress, where he distinguished himself as a parliamentary orator. In 1845 he was a candidate for the office of president of the republic.

CAWEN, Ed. Gen., British admiral, b. in Cornwall, England, 19 Aug., 1711; d. near Guildford, 10 Jan., 1761. He was the third son of Hugh Boscawen, first Lord Falmouth, his mother being daughter of a sister of Marlborough. He entered the navy 3 April, 1726, became a lieutenant on 25 May, 1732, and was promoted to the rank of captain in September, 1745. Having distinguished himself at Portobello and Carthagena, he was promoted, in 1744, to the "Dreadnought," sixty guns, in which he took the "Medee" in the channel, 28 April, 1744. He signalized himself under Anson, at the battle off Cape Finisterre in 1747, where he was severely wounded, and, being made a rear-admiral, was despatched, in 1748, with a squadron to the West Indies. Having distinguished himself at Pondicherry, but took Madras, and, on his return to England, became a member of the admiralty board in 1751. He sailed for North America in 1755, and in an action with a French squadron captured two ships of the line. In 1756 he became vice-admiral of the blue, and in 1758, in conjunction with Amherst, who commanded the land forces, reduced Louisburg and Cape Breton. In 1759, having charge of the Mediterranean fleet, he pursued the Toulon fleet under De la Clue through the straits of Gibraltar, and, over-taking it in Lagos bay, defeated it, taking three ships and burning two. He received the thanks of the king and the thanks of Parliament. He was created a baronet, and the rank of general of marines. On his return to Spithead with 2,000 prisoners and his prizes, he received the freedom of the Scottish capital, and had many other marks of public regard conferred upon him. He was elected to parliament in 1741 for Truro, and served in that capacity until 1761. Lord Chatham said of him: "When I apply to other officers respecting any expedition I may chance to project, they always raise difficulties; Boscawen always finds expedients."

BOSOMWORTH, Thomas, clergyman. He came to America with Gen. Oglesthorpe's regiment of Highlanders in 1756. About 1749 he married Mary Musgrove, or Mathews, a woman of the Creek nation, and lived among the Creek and Cherokee tribes for 14 years. Having special charge of the white husbands. When the English first arrived, she had no especial influence with the Indians, but gradually came to be recognized by them as their queen. Gov. Oglesborough gave her a yearly allowance of £500, in payment for her services as interpreter, and in order to retain her good-will. Bosomworth continued to serve the Indians, and was finally admitted by him to the rank of brigadier-general, and to the command of the Cherokee tribe, and was given a yearly allowance of £200 from the crown. He died at Brandywine in 1776.

BOSWORTH, David, clergyman, b. in New Milford, Conn., 8 Jan., 1715; d. in New York city, 11 Nov., 1763. His ancestor, Arthur, emigrated from Cheshire, England, in 1665. David became a teacher in Newton, and subsequently the presiding elder of the Presbyterian church in that city. He was born at the Presbyterian church. His sermon on "Self disclaimed and Christ exalted" was pub-
fished in 1758. In 1761 he published an "Account of the Life, Death, and Character of President Davies," prefixed to a sermon of the latter on the death of George II. A "Vindication of Infant Baptism," containing the substance of several of his sermons, was published after his death and repeatedly reprinted in London in 1763.

**BOSTICK, Helen Louise**, poet, b. in Charleston, S. C., 1826. She is a daughter of Dr. Putnam Barron, who removed to Bucyrus, Ohio, in 1838. In early life she became a contributor to literary journals. After her marriage she resided at Ravenna, Ohio. A volume of her poems, entitled "Poems of Rhymes and Berries," was published in New York in 1864.

**BOTETOURT, Norborne Berkeley**, baron, colonial governor of Virginia, b. in England about 1717; d. in Williamsburg, Va., 15 Oct., 1770. He was colonel of the North Gloucestershire militia in 1761, and represented that division of the county in parliament until he was made a peer in 1769. He claimed the title of Baron Botetourt, or Botetourte, as the lineal descendant of Sir Maurice de Berkeley, who died in 1347. Having lost heavily at gambling, he solicited an appointment, and in July, 1768, was made governor of Virginia. He was instructed to impress the colonists with a display of power and dignity, and to enforce submissiveness whenever occasion required, but while competing with other superiors he was in the habit from time to time ofimporting English officers. In May, 1769, when the assembly passed resolutions condemning the parliamentary taxation and the sending of accused persons to England for trial, Botetourt dissolved the legislature, in which Thomas Jefferson, a young lawyer recently elected from Albemarle county, was a leader. The next day he left the colony in a barque for England, and was never of friendly terms with the Virginians. In 1789, when the assembly passed resolutions condemning the parliamentary taxation and the sending of accused persons to England for trial, Botetourt dissolved the legislature, in which Thomas Jefferson, a young lawyer recently elected from Albemarle county, was a leader. The next day he left the colony in a barque for England, and was never of friendly terms with the Virginians.

In 1770 the assembly voted to erect a statue of the deceased governor, which was executed in 1774 and placed in front of the capitol, whence it was removed in 1797 to the front of William and Mary college, where it stood until the civil war, during which it was taken to the inclosure of the insane asylum at Williamsburg.

**Botsford**, Robert, b. in New Haven, Conn., 31 Jan., 1744, was graduated at Yale in 1763, became a lawyer, and after his removal to Nova Scotia was elected to the assembly, for two years a speaker of that body, and died in St. Johns, 14 March, 1812. The son was admitted to the bar in 1793, a judge of admiralty in New Brunswick in 1802-7, elected to the assembly in 1812, and for every succeeding term until 1823, holding the office of speaker from 1817 to 1823, and in the latter year became judge of the supreme court, and retained that position till 1846.—His son, **Amos Edwin**, Canadian jurist, b. in St. John, N. B., in 1804, was educated at Bowdoin College, and was admitted to the bar. He has been prominently employed in public duties, and has been president or vice-president of the dominion rifle association since its organization. He was a member of the executive council, New Brunswick, from 1838 till 1840, and of the legislative council from 1839 till 1867, a junior judge of the court of common pleas for several years, a commissioner with L. B. Chandler to settle boundary-line between New Brunswick and Nova Scotia in 1836. He went to Washington as a commissioner respecting the border difficulty in 1839, and again in 1852 with respect to reciprocity with the United States, a treaty for which was concluded in 1854, and a member of the council of general administration. In that year he published his "Précis historique de la maison de Savoie et du Piémont." In 1804 he went to Paris as a representative of the department of the Dora in the legislative body, and in 1806—9 was vice-president of the assembly. In 1809—10 he issued in Paris the first edition of the "Storia d'Italia continuata da quella del Guicciardino sino al 1789," a narrative of history from the year 1000 to 1815. In 1815 he published an epic poem entitled "Camillo o Vejo conquistata." His last work was a large history of Italy connecting Guicciardini's work, which came down to 1532, with his own history of Italy during the epoch of the French revolution. This work, entitled "Storia d'Italia continuata da quella del Guicciardino sino al 1789," appeared in 1815 in 10 volumes, 1839. See Tocci's "Biografia degli Italiani illustri"; also "Elogio storico di C. Botta," by F. Becchi.
Botta, Vincenzo, author, b. in Piedmont, 11 Nov., 1818; d. in New York, 5 Oct., 1894. He was educated at the university of Turin, where he became professor of philosophy in 1848. He was elected to the Sardian parliament, and in 1850 commissioned, in association with Dr. Parola, another deputy, to examine the educational system of Germany. Their report on the German universities and schools was published at the expense of the government. In 1851 he emigrated to the United States for the purpose of investigating the public-school system, settled here, became naturalized, and for many years filled the chair of Italian language and literature in the university of the city of New York. He married, in 1853, Anne Charlotte Lynch, the author. He published an "Account of the System of Education in Piedmont"); "Discourse on the Life Choirs for the Policy of Cavour" (1862); "Dante as Philosopher, Patriot, and Poet," with an analysis of the "Diva Commedia" (New York, 1865); and "An Historical Account of Modern Philosophy in Italy."—His wife, Anne Charlotte Lynch, author, b. in Bennington, Vt., 11 Nov., 1851; d. in New York city, 23 Nov., 1880, was a Literary and Artistic painter, author, and critic. She was a frequent contributor to the periodicals of Europe and America. During the Franco-Prussian war (1870-1) an effort was made in New York city to collect funds for the suffering women and children of Paris. Mrs. Botta prepared as her contribution an album of autographs, photographs, and original sketches by celebrated artists, which was sent to France for $7,000. As the war had closed before the collection was complete, this sum was appropriated to found a prize at the French academy, to be awarded every five years, when the interest of this sum reached $1,000, for the best essay on the "Condition of Woman."—Mrs. Botta's style is musical, elegant, andfinish. Among her best poems are "Paul at Athens," "Weathers," "Bookyos," and "Wasted Fountains." Her sonnets are especially successful. She published in periodicals innumerable stories, essays, and criticisms. The first collected edition of her poems (New York, 1848; new ed., 1884) was illustrated by Brown, Darley, Durand, Huntington, and other artists. Her "Leaves from the Diary of a Recluse" appeared in "The Gift," for 1845. She also published a "History of Art and Architecture" (New York, 1869), containing concise accounts of great authors of all ages and their works. A memorial volume, with selections from her writings, prepared by Prof. Botta, appeared in 1894.

Bottos, John Minor, statesman, b. in Dumfries, Prince William co., Va., 16 Sept., 1802; d. in Culpepper, Va., 2 Jan., 1884. Son of his father's second marriage, he was sent for his education (New York, 1869), containing concise accounts of great authors of all ages and their works. A memorial volume, with selections from her writings, prepared by Prof. Botta, appeared in 1894.

Botta's, John Minor, statesman, b. in Dumfries, Prince William co., Va., 16 Sept., 1802; d. in Culpepper, Va., 2 Jan., 1884. Son of his father's second marriage, he was sent for his education (New York, 1869), containing concise accounts of great authors of all ages and their works. A memorial volume, with selections from her writings, prepared by Prof. Botta, appeared in 1894.
French minister at Washington, formed the basis of a volume prepared by Mr. Botts, "The Great Rebellion, its Secret History, Rise, Progress, and Disastrous Failure!" (New York, 1866). After his release from prison Mr. Botts returned to his home at Culpepper, where he was continually persecuted by the enemy. His farm was repeatedly overrun by both armies, and dug over at various times for military operations. When the war had closed, Mr. Botts again took a deep interest in political matters. He labored earnestly for the early restoration of his state to the union, but without success. He was a delegate to the national convention of southern states held in Nashville in 1867, signed his name on the ball-bond of Jefferson Davis.—His brother, Charles T., b. in Virginia in 1809; d. in California in 1884, was a Californian pioneer and politician. He went to the territory as a naval store-keeper at Monterey in 1848, and was a member of the constitutional convention of 1849, taking part prominently in the discussion of the right of the territory to form a state without the previous sanction of congress, and in the discussion concerning the proposed boundary of the new state. Later he was a lawyer in San Francisco, then a journalist, and for some time a district judge in Sacramento, and afterward a member of the legislature of California. 

BOUCHER, John, eldest son of John, b. in Blen- ego, Cumberland, England, 12 March, 1738; d. in Epsom, England, 27 April, 1801. He came to America at the age of twenty-one, and was for some time a private teacher, afterward took orders in the Anglican church, and was appointed rector of Hanover, and then of St. Mary's parish, Va. Garrett, Md., and also the ancient St. Mary's, Annapolis, and that of Queen Anne in St. George's county. He took a firm stand in opposition to the prevalent doctrines of independence, and gave such offence to his congregation that he was obliged to return to England in 1775. He was appointed vicar of Epsom, and employed himself during the last fourteen years in compiling a glossary of pro- native words, which was published from his family in 1831 by the proprietors of the English edition of Webster's "Dictionary," with the intention of making it an appendix to that work. He published in 1799 "A View of the Causes and Consequences of the American Revolu- tion," dedicated to Gen. Washington, consisting of a discussion of the whole war in North America between 1763 and 1775, and containing many an- ecdotes illustrating the political condition of the colonies at that time. 

BOUCHER, Pierre, Sieur de Boucheville, Canadian pioneer, b. in Perche, France, in 1622; d. in Boucheville, Canada, 29 April, 1717. In 1653 he came to America with his father, who was engaged in the wars with the Iroquois, whom he frequently defeated, and was also for many years an interpreter of the Huron dialect. He was sent as a deputy by the colony to France in 1661, to lay the condition of the country before the court, and this led to the publication of his little work entitled "Histoire véritable et naturelle des mœurs et de l'ancien des Indiens du comte de New France" (Paris, 1663). He was emnoblled for his services, made governor of Three Rivers in 1663, and, receiving a grant of the seigneurie of Boucheville, settled there in 1668. He was esteemed as a man of courage, intelligence, piety, and integrity. From him are descended many prominent families of Canada. The Adieux of Grandfather Boucher, addressed to his children shortly before his death, is characteristic of the man and the times.

BOUCHERVILLE, George Boucher de, Canadian author, b. in the province of Quebec about 1812. He studied law, and was admitted to the bar of Lower Canada in 1837; was one of the commissioners to consolidate the public general statutes of Lower Canada in 1837; and in 1838; was appointed secretary to the first li- tenant-governor of Quebec, 6 July, 1867, which office he resigned on being made clerk of the legislative council on 30 Oct. of the same year. His published works include "Programme de étude pour la formation d'une banque agricole nation- ale pour le Bas Canada" (1850).
self in the early period of the revolutionary war on the northern frontier of the United States. In 1770 he entered the office of his uncle, Maj. Holland, surveyor-general of British North America, and in 1814 succeeded to this office himself. While connected with the surveyor-general's department in a subordinate capacity, he served in the colonial navy on the lakes, and in the royal Canadian volunteers until 1808, when he was employed in the campaign of 1812-4, and in August, 1814, went to England to publish his topographical and geographical description of Canada, which was issued in 1816. During 1817 and 1818 he was engaged in establishing the boundary-line between the United States and the British possessions. In 1831 he published "The British Deportation of the American Indians," which contains the result of fifteen years' labor on the topography, geography, and statistics of Canada, and in 1832 the "Topographical Dictionary of Lower Canada."

BOUCICAULT, Dion, British dramatist, b. in Dublin, Ireland, 29 Dec., 1822; d. in New York city, 18 Sept., 1890. Boucicault was educated for a civil engineer, but he made his way to fame as a writer, being graduated in 1846 from the University of London, but devoted himself to the drama. In March, 1841, he produced the comedy "London Assurance," which was brought out in Covent Garden theatre, and met with great success. He married Agnes Robertson, and in September, 1853, came to the United States, performing in New York, and then returned to the stage. In 1860 he went to London and brought out, at the Adelphi theatre, his famous Irish play of "Colleen Bawn," founded on Gerald Griffin's novel of "The Collegians." In 1861 he was produced, in the same theatre, a drama illustrating the evils of American slavery, called "The Octopus." After that he wrote, in rapid succession, more than 100 dramas, some of which were original, and others adaptations from the French. In 1862 he brought out "Dot," and "The Relief of Lucknow"; in 1863, "The Trial of Effie Deans"; in 1864, "The Streets of London"; in 1865, "Arrah-na-Pogue," "Rip Van Winkle," which was rendered famous by the acting of Joseph Jefferson, and "The Wicker Clerk," which last piece was written for Mr. Jefferson; in 1866, "The Flying Sow," "Hunted Down," and "The Long Strike"; in 1867, "How She Loves Him" and "Foul Play," the latter written in collaboration with Charles Reade; in 1868, "After Dark"; in 1869, "Lost at Sea" and "Formosa"; in 1870, "The Rapparree," or the "Treaty of Limerick," and "Jezabel"; in 1872, "Babyl and Bijou." In the autumn of 1874 he returned to the United States, where, since 1876, he has resided most of the time. In 1873 he produced, at Booth's theatre, New York, the Irish play of "Daddy O'Dowd"; at Wallack's theatre, "Mora" and "Mimi," and at the Union square theatre, "The Scapegoat." In 1880, after 1873, he opened the New Park theatre in partnership with the Hon. William Stuart. During his former residence in the United States he had established a theatre in Washington in 1858, and reconstructed the Metropolitan theatre in New York, changed it into the Winter Garden in 1859, and in 1862, after his return to England, he built over Astley's theatre and altered its name to the Westminster a speculation that proved a failure. Of his other plays the best-known are "Janet's Pride"; "Louis XI."; "Faust and Marguerite"; "Paul Lafarge" (1870); "A Dark Night's Work" (1870); "The Dead Secret" (1878); "Andy Blake," and "The Shanghaired," Mr. Boucicault excelled as a dramatist in brightness of dialogue, dramatic action, and the treatment of incidents. His melodramas are more natural than those that preceded them. He elevated and improved the character of the Irish drama. The plots of his plays are seldom original; but in the drawing of character, the introduction and handling of dramatic incidents, and the composition of scenes of pathos, passion, or humor, he displayed originality, knowledge of human nature, and dramatic judgment. He has elevated the status of the dramatic author by insisting on higher rates of compensation than were usual, and by making the play itself the leading attraction.

BOUCK, William C., governor of New York, b. in Schoharie co., N. Y., in 1780; d. there, 19 April, 1836. After filling several town offices he was appointed sheriff of the county in 1812, was a member of the state assembly in 1813, 1815, and 1817, state senator in 1820, canal commissioner from 1821 till 1840, and governor of the state from 1843 till 1845. He was a member of the state constitutional convention in 1846, and from that year till 1849 was assistant treasurer in New York city. His last ten years were spent on his farm.

BOUDINOT, John, president of the Board of Engineers of the District of Columbia, b. in Philadelphia, Pa., 2 May, 1740; d. in Burlington, N. J., 24 Oct., 1821. His great-grandfather, Elias, was a French Huguenot, who fled to this country after the revocation of the edict of Nantes. After receiving a classical education, he studied law with Richard Stockton, and became eminent in his profession, practising in New Jersey. He was devoted to the patriot cause, in 1777 appointed commissary-general of prisoners, and, in the same year elected a delegate to congress from New Jersey, serving from 1778 till 1779, and again from 1781 till 1784. He was chosen president of congress on Nov., 1782, and in that capacity signed the treaty of peace with England. He then resumed the practice of law, but, after the adoption of the constitution, was elected to the 1st, 2d, and 3d congresses, serving from 4 March, 1789, till 3 March, 1795. He was appointed by Washington in 1796 to succeed Rutledge as director of the mint at Philadelphia, and held the office till July 1805, when he resigned, and passed the rest of his life at Burlington, N. J., devoted to the study of Biblical literature. He had an ample fortune, and gave liberally. He was a trustee of Princeton college, and in 1803 endowed it with a cabinet of natural history, valued at $8,000. In 1812 he was chosen a member of the American board of commissioners for foreign missions, to which he gave $100 in 1813. He assisted in founding the American Bible society in 1816, was its first president, and gave it $10,000. He was interested in attempts to educate the Indians, and when three Cherokee youth were brought to the foreign mission school in 1818, he allowed one of them to take
his name. This boy became afterward a man of influence in his tribe, and was murdered on 10 June, 1859, by Indians west of the Mississippi. Dr. Bougainville was also interested in the instruction of deaf-mutes; the education of young men for the ministry, and efforts for the relief of the poor. He bequeathed his property to his only daughter, Mrs. Bradford, and to charitable uses. Among his bequests were one of $200 to buy spectacles for the aged poor, another of 13,000 acres of land to the mayor and corporation of Philadelphia, that the poor might be educated with it, for which no money was required, and another of 3,000 acres to the Philadelphia hospital for the benefit of foreigners. Dr. Bougainville published "The Age of Revelation," a reply to Paine (1790); an oration before the Society of the Cincinnati (1790); "Second Advent of the Messiah" (Trenton, 1815); and "Star in the West, or An Attempt to Discover the Long-Lost Tribes of Israel" (1816). He corresponded with James Adair in the opinion that the Indians are the lost tribes. He also wrote, in "The Evangelical Intelligencer" of 1806, an anonymous memoir of the Rev. William Tennent, D. D.

BOUGAINVILLE, Louis Antoine de, navigator, b. in Paris, 11 Nov., 1729; d. 91 April, 1814. He was a cadet in the French navy, served with distinction in the American war, and was one of the younger members of the parliament of Paris. He was proficient in mathematics, and in 1753 published a work on the integral calculus. In 1754 he became an aide-de-camp to Gen. Chevert, and later was secretary of the French embassy in London, and while there made a fellow of the royal society. Subsequently he served as aide-de-camp to the Marquis de Montespan, whose daughter he married, and re-enforcements to France, in 1758, and there made a colonel and a knight of St. Louis. He returned to Canada in 1759, and distinguished himself at the capture of Quebec. In 1761 he was appointed aide-de-camp of Choiseul Stainville in Germany, and in 1761 displayed such courage in the seige of Kassel that he received from the king two guns he had taken from the enemy. After peace had been declared, he engaged in the naval service, and founded a colony on one of the Falkland islands, being a large proprietor jointly with merchants of St. Malo. In 1766 this colony was purchased by Spain for 500,000 crowns, and Bougainville was sent, Nov. 15, to make the French arrangements for the transference of the colony to Spain. After two years of residence there he returned to France, in 1768, having made such observations as enabled him to organize the "Armament of the Americas." He embarked at Rochefort, in 1769, in the "Boudeuse," 51 guns and 94 men, and the "Étoile," a store-ship—and was accompanied by Prince Sieglen, of Nassau, and the naturalist Commercon, and after a cruise of over two years, during which he made some important discoveries, returned to St. Malo in March, 1770. He published "Voyage aux Amériques" (2 vols., Paris, 1771), which was at once translated into English and subsequently into German. In 1778, when France took part in the American war, Bougainville commanded ships of the line, and gained distinction in the engagements between the British and the French fleets. In 1779 he became a commodore, and in 1790 a fleet marshal in the army. When Admiral Rodney defeated De Grasse, 13 April, 1792, Bougainville commanded the "Auguste," and, though she suffered severely, he succeeded in maintaining her position in line, and by judicious manoeuvring rescued eight sail of his own division, which he conducted safely to St. Eustats. He attempted, with a fleet of thirteen ships, to capture Martinique, 20 March, 1790, and soon afterward retired from professional employment. In 1796 he was elected a member of the geographical section of the institute, and afterward of the bureau des longitudes. On the creation of the senate he was made a member of that body, and subsequently he was created a count of the empire by Napoleon. Bougainville was the author of "Théorie du calcul intégral" (1729); "Essai historique sur les observations anciennes et modernes"; and "Notice historique sur les sauvages de l'Amérique du Nord." BOUGHTON, George Henry, artist, b. in Norfolk, England, in 1836. His family came to this country about 1789, and he passed his youth in New-York. In 1855 he published "A Memoir on the Antilles" (1790); and subsequently spent his spare moments in making pen-and-ink sketches. From this time he continued to paint. In 1858 he sold several of his pictures, and, with the money thus obtained, went to London for study. After a few months he returned to Albany, and subsequently moved to New York, where he remained two years, and soon made himself known as a landscape painter. In 1858 he exhibited his first picture at the national academy, "Winter Twilight." Another picture produced during this period was "The Lake of the Dismaid Swamp." His paintings at this time indicate a transition from landscape to genre, and to fit himself for the latter he studied two years in Paris, In 1861 he became a member of the French government as a greater part of his time, contributing annually to the exhibitions of the royal academy, of which he is an associate. He has also exhibited frequently at the national academy in New York, and was made an academican in 1871. His works are popular and meet with a ready sale. They are marked by simplicity, tenderness, and subdued, but not weak, coloring. He excels in delineating Puritan life in New England. Among his pictures on American subjects are "The Scarlet Letter," "Return of the Mayflower," "Puritans Going to Church," and "Rose Standish." He has also been successful in painting pictures of French peasant-life, as "Passing into the Shade" (1863); "A Breton Haymaker" (Royal Academy, 1864); "Wedges Devotion" (1867); "Breton Pastoral" (1869); "Coming from Church," "Cold Without," and "Morning Prayer." To the American fine-art department at the Philadelphia exhibition of 1876 he sent, among other paintings, "Normandy Girl in a Shower," "By the Sea," and "Going to Seek his Fortune," and to the British department at the Paris exhibition of 1878, "Le Paturon," "Breton Pastoral." Among his other works are the "Canterbury Pilgrims" (1874); "A Ruffling Breeze" (1877); the "Waning of the Honeymoon" (1878); and "The Idyl of the Birds," a composition in three parts, "The Testy Governor" (1877) is in the Corcoran gallery at Washington, D. C., Mr. Boughton has been especially successful in painting FrenchLEGIES.

BOUILLE, François Claude Amour, Marquis de, French soldier, b. in Auvergne, 19 Nov., 1759; d. in London, 14 Nov., 1800. He entered the army at an early age, and distinguished himself in the seven-years' war. He was governor of Guadaloupe in 1785-87, and in 1777-79 governor of Martinique, and during the American war, while defending the French Antilles against the British, he also succeeded in conquering Dominica, St. Eustatius, Tobago, St. Christopher, Nevis, Montserrat, Saint Martin, and Saba. He returned to Paris, and was made a lieutenant-general and subsequently chief of the province of Trois-Îles. He supported the policy of the government in Bouillé, and was the author of notable books, of which he was made a member by Louis XVI, and displayed courage and talent in suppressing the revolt of the garrisons of Metz and
BOURGEOIS

Nancy. In 1790 he was made commander-in-chief of the army of the Meuse, the Saar, and the Moselle. He was a devoted royalist, and promoted the escape of Louis XVI. from Paris, which project would probably have succeeded but for the king's prohibition of bloodshed. On its failure, by the arrest of the king at Varennes, Bouillé went to Russia to invite assistance of the Empress Catharine, who promised him an army of 30,000 men with which to invade France, but her promise was never fulfilled. He enlisted under the banners of Condé, after serving for a time under Gustavus III. of Sweden, and went to England in 1796. There he wrote his "Memoirs of the Revolution" (London, 1797; German ed., 1798; French, 1801). 

BOULBON, Raymond, Comte de, French adventurer, b. in Avignon in 1817; d. near Guayamas, 12 Aug., 1854. Having squandered his estates, he went in 1852 to California, and there induced other adventurers to join him in an expedition to Sonora. The Mexicans, who opposed his designs upon the gold mines, were defeated and driven from New Sonora. Flushéd with victory, he then rallied round him 500 men, and seizing Arispe, the capital of Sonora, proclaimed a republic. He was defeated by the Mexicans on 4 Jan., 1853; then returned to California, where he planned a new expedition in April, 1854, and, returning to Sonora, was defeated by the Mexicans on 13 July, was captured, and on 12 Aug., 1855, he was brought before the Mexican army and hanged. A book written by Jules de la Madeleine (Paris, 1855).

BOULIGNY, Dominique, senator, b. in Louisiana in 1753; d. in New Orleans, La., 5 March, 1833. He received a public-school education and studied law. After admission to the bar he practised in New Orleans, and subsequently was elected to the house of representatives in New Orleans, serving from 21 Dec., 1824, until 3 March, 1829. Mr. Bouiligny was in command of a regiment during 1765. His nephew, John Edward, congressman, b. in New Orleans, La., 17 Feb., 1824; d. in Washington, D.C., 29 Feb., 1864. He received a public-school education, studied law, was admitted to the bar and began practice in New Orleans, where he afterward held several important offices. Subsequently he was elected to congress as a "national American," serving from 5 Dec., 1839, till 3 March, 1861. Mr. Bouiligny was opposed to the doctrine of secession, and was the only representative from a seceding state who did not leave his seat. During the civil war he remained in the north, dying in Washington before its close.

BOUQUET, Henry, British soldier, b. in Rolle, Switzerland, in 1719; d. in Pensacola, Fla., in February, 1766. He first entered the Dutch service, afterward that of Sardinia, and in 1748 was again in the service of Holland, as lieutenant-colonel of Swiss guards. He entered the English army with the rank of major, was made a brigadier-general, Sept. 19th, 1762, and brigadier-general in 1765. He co-operated with Gen. Forbes in the expedition against Fort Duquesne in 1758, and it was by his advice that the army constructed a new road through Pennsylvania, instead of using the old one made by Braddock, and approved by Washington. On 13 Oct., Bouquet was attacked by a body of French and Indians at Loyal Hanna, but repulsed them, and was present at the capture of the fort on 24 Nov. In 1763 Bouquet, then in command at Philadelphia, was ordered to the relief of the same fort, then called Fort Pitt (now Pittsburg). He set out with 500 men, mostly Highlanders, and found the frontier settlements in a state of terror, many of the inhabitants fleeing eastward to escape the fate of their neighbors, who had been murdered by savages. The expedition relieved Forts Ligonié and Bedford, and by noon of 5 Aug., had nearly reached Bushy Run, a small stream on which Bouquet intended to camp. Suddenly a furious attack was made by Indians on the advance guard. Re-enforcements were sent forward, the cattle and baggage-trains parked, and a firm stand made against the assailants. The fire appeared on all sides in increased numbers, and the plunging of 400 frightened and wounded horses, in the square, added to the confusion. The contest continued until night and was renewed on the following morning. The troops were on a hill where no water could be obtained, and Bouquet, not expecting that an Indian could be so necessary, feigned retreat to bring the enemy together in a compact body. The rush was successful; the Indians, seeing that the advance guard fell back, left their ambush and rushed to the attack in a mass, when Bouquet's men easily surrounded them and, by volleys of musketry and a rain of shot and shell, routed them. After this battle Bouquet lost 8 officers and 115 men. The rest of his march was un molested, and he reached Fort Pitt with supplies four days later. In October, 1764, he led an expedition against the Ohio Indians and compelled the Shawnees, Delawares, and other tribes to make peace at Tuscawawas. An account of the expedition by William Smith, D.D., was published in Philadelphia in 1791, and afterward translated into French (new edition, with preface by Francis Parkman, Cincinnati, 1885).

BOURGADÉ, P., R. C. bishop, b. in France in 1845. He was educated in the college of Bilou and in the grand séminaire of Puy-de-Dome. The present archbishop of Santa Fe, when vicar-apostolic of Arizona, was close to him. He attended the synods of Rome, and was a learned man. He was consecrated bishop in the United States in 1853, and during the next six years was pastor at San Elizario, Texas. He then went to Silver City, Colorado, and in 1885 was consecrated vicar-apostolic of Arizona, with the titular rank of bishop of Taumac.

BOURGEOIS, Sister Margaret, b. in Troyes, France. In 1630; d. in Montreal, Canada, in 1700. Although her parents were poor, she received a good education. She lost her mother at an early age, and was obliged to take charge of her father's household. When her brothers and sisters were settled, she applied for admission into the Carmelite order, but was refused, and a similar refusal attended her petition to be received among the nuns. She finally received the name of the congregation of Notre Dame. She again returned to France to obtain letters-patent from Louis XIV. for the confirmation of her institute, and the French monarch granted her request, accompanied with promises of protection. In 1672 she returned to Montreal, and enthusiastically set to work to perfect her institute. Although she founded many prosperous missions, she did not obtain a confirmation of the
rules of her order till 1869, two years before her death. The bishop of Quebec hesitated many years before he could determine on giving his final approbation; but he yielded at last, having become persuaded that Sister Bourgeois was a saint. For twenty years she had begged her sisters to elect another superior in her place; her resignation was finally accepted in 1863, and for the rest of her life she performed the humble offices in the convent she had founded.

BOURGET, Ignatius, Canadian bishop, b. in Recollet, near Montreal, 8 June, 1836. He went to Montreal in 1821, and was ordained 9 Nov., 1822, by Bishop Laritique, first Roman Catholic bishop of that diocese. This prelate, struck by Bourget's abilities, appointed him his secretary. In 1836 he was named vicar-general of Montreal, and on 25 July, 1837, was created coadjutor bishop of the diocese, being the first bishop of Telmessas, in partibus infidelium. He succeeded Mgr. Laritique as bishop of Montreal on the latter's death in 1840, and in 1876 resigned, to become, on 10 July of that year, archbishop of Martianopolis, in partibus. A history of his work would be a record of the progress made by the French people in that part of Canada during the 40 years. In 1838 he established the society for the propagation of the faith. He created in 1840 the first cathedral chapter of Montreal. The arch-confraternity of Mary Immaculate, a charitable association that has since spread over North America, was founded by him in 1844. Previous to this he had introduced the Jesuit and Oblate orders, and placed the charitable institutions in Montreal, the orphanages, hospitals, and the first temperance society in Canada. In 1844 he established the asylum of providence for the aged, and also several houses of the ladies of charity; and in the same year he founded the community of nuns of "Our Lady of Charity of the Good Shepherd," which has three houses in Montreal. In 1847 he founded the religious orders; the priests of the congregation of holy-cross, who have three colleges in Canada; the Josephist brothers; the clerks of St. Viateur; and the Marist nuns, who direct several colleges and schools in Canada. A society for helping servant-girls, an asylum for Irish orphans, and the hospice of the holy child Jesus, for the education of the deaf and dumb children of the city, all originated between 1846 and 1850. In 1864 he erected another immense institution for the deaf and dumb in the rue St. Denis, and in 1874 founded the celebrated asylum of St. John of God, for the care of the insane. The same year witnessed the establishment through his agency of the Catholic union, and the school of medicine and surgery of Montreal. Archbishop Bourget was the recognized leader of the ultramontane party in Canada, and was a prolific writer, his best-known work, which is accepted as a standard, being "Le cérémonie des évêques, commenté et expliqué, par les usages et les traditions de l'Église Romaine."

BOURINOT, John George, Canadian author, b. in Sydney, Nova Scotia, 30 Oct. 1847. He was educated first by a tutor at Sydney, and subsequently at Trinity college, Toronto. After leaving college he became a journalist, subsequently studied law for a short time, and in 1860 established the Halifax "Reporter," of which he was chief editor for several years. From 1861 till the year 1867, he was correspondent of the Nova Scotian assembly, and, after passing through various subordinate grades, he was appointed chief clerk of the dominion house of commons on 18 Dec., 1880. He has contributed largely to British and American periodicals, and has published "The Intellectual Development of the Canadian People" and "The Practice and Procedure of Parliament, with a Review of the Origin and Growth of Parliamentary Institutions in the Dominion of Canada." Mr. Bourinot is honorary secretary of the royal society of Canada, fellow of the statistical society of London, and honorary corresponding secretary of the royal colonial institute.

BOURINOT, MARQUE, M. de, French soldier, d. in July, 1776. He was governor of the island of Guadeloupe, and accompanied Montcalm to Canada in May, 1756, as colonel of engineers. He controlled the operations at the capture of Fort Oswego and George, where he was wounded, 14 Aug., 1756. He directed the siege of Fort William Henry, commanded the left column, and risked his life to save the town from massacre after the capitulation. On 9 July, 1757, he commanded the left of the defences of Ticonderoga against the assault of Gen. Abercrombie, and was dangerously wounded. He was promoted to brigadier-general, 19 Feb., 1759, and was in command at Ticonderoga, where he blew up and abandoned in July, 1759, the town that he had defended and won in Richelieu river, and distinguished himself as a leader) in the battle of Silly, 28 April, 1760. He returned to France after the close of the war, and on 1 Aug., 1762, addressed a memoir on Canada to the French government.

BOURNE, Edward Emerson, jurist, b. in Kennebunk, Me., 19 March, 1797; d. there, 25 Sept., 1873. He was engaged in law after studying law at home and in Philadelphia, was admitted to the bar in 1819. He first practised his profession in Albion, but returned to Kennebunk, where, with the exception of a brief residence in York, he continued to the close of his life. He was first selectman of the town from 1822 till 1838, and a member in the legislature from 1826 till 1831, when, dissatisfied with the policy of his party, he declined a renomination and devoted himself to his profession, delivering an occasional lecture. He was state's attorney for York co. in 1838 and 1841, and judge of the probate court from 1857 till 1872. He was also for several years president of the Maine historical society, and from 1847 till his death was a professor of Bowdoin college, which gave him the degree of LL. D. in 1872. Judge Bourne was the father of Lizzie Bourne, whose death in an attempt to ascend Mount Washington with him on 14 Sept., 1855, has made her name familiar. Besides contributing to the transactions of the state historical society, and to various periodicals, he published an historical discourse, delivered at Bath, Me., on the 257th anniversary of the Topsham settlement, and wrote an extensive history of the towns of Wells and Kennebunk, which was published by his son (1875). See a sketch of his life by E. B. Smith in the "New England Historical and Genealogical Register," (vol. xxv., 1875).}

BOURNE, George, III, b. in England about 1780; d. in New York city in 1845. He was educated in his native country, emigrated to the United States, and became a minister of the reformed Dutch church in 1835. He held no pastorale, but engaged in literary work in New York city. He was an ardent and learned controversialist, and he was at last solicited by the denomination to write an history of the church, which he refused to do. He was a man of great learning and high ability.

BOURNE, Nehemiah, British admiral, b. in London about 1611; d. there in 1691. He was a son of Robert Bourne, a Wapping shipwright.
hemiah came to New England in 1638, and settled as a ship-builder first in Charlestown and afterward in Dorchester, Mass. He became a freeman of Boston, 9 June, 1641, and in the same year the "Trial," the first vessel built there. In 1644-5 he was a major in the parliamentary army, but returned to this country in June, 1643, and on 12 Aug., was appointed sergeant-major of the Suffolk regiment. He returned to England in December, 1646, and commanded the "Speaker," a ship of the second rate. In September, 1643, he carried to London the Scottish records and regalia taken in Stirling castle, and for his services was given a gold medal valued at £60. In May, 1652, he was captain of the "Andrew" and senior officer of the Downs, and commanded the division in the fleet that had so important a share in the battle of 19 May, 1652, with the Dutch. Without knowledge of the battle the council had already made Bourne a rear admiral, and he commanded in the third post in the battle of 28 Sept., when his ship was "very much maimed." He was appointed, in the latter part of 1652, to superintend the equipment and manning of fleets, and continued in this office until the end of the puritan Commonwealth. It is said that he was permitted "to transport himself and family into any of the plantations," and passed several years in exile.

Bourne, Richard, missionary, b. in England; d. in Sandwich, Mass., in 1682. He was one of the first settlers at Sandwich, and, as there was no minister there, took charge of the religious services on the same mission as a member of the Dutch church and then resolved to devote himself to the conversion of the Indians, and went to Marshpee as early as 1658, where he is spoken of as assisting in the settlement of a boundary between the property of the Indians and that of the settlers at Barnstable. He acquired a knowledge of the Indian tongue, and on 17 Aug., 1670, obtained a license to preach under the Congregational church at Marshpee, consisting of his converts, the ceremony being performed by the celebrated "apostle to the Indians," John Eliot. In 1669 he obtained at his own expense a deed securing to those under his charge the possession of Marshpee. His son Shearjashub, his grandson Ezra, and his great-grandson Joseph, had charge after him; the last was admitted to the Society of Friends.

Benjamin, jurist, b. in Bristol, R. I., 9 Sept., 1755; d. 17 Sept., 1808, was graduated at Harvard in 1775, studied law, and practised in Providence, R. I., where he filled several public offices. He was quartermaster of the 2d Rhode Island regiment in 1776, and in 1780 was a member of a committee sent to the continental congress with a petition from Rhode Island. He was often a member of the state legislature, and was elected the first representative to congress from Rhode Island after the adoption of the constitution. He was re-elected three times successively, serving from 17 Dec., 1790, till 1796, when he resigned. In 1801 he was appointed judge of the U. S. district court in Rhode Island.

Boussingault, Jean Baptiste Joseph Diendonné, French chemist, b. in Paris, 2 Feb., 1802. He was educated in the school of mines at St. Etienne, and sent by an English company to work mines in South America. In the Colombian war for independence he joined and attained the rank of colonel under Bolivar. He explored the region between Carthagena and the months of the Oriocolo, as well as other parts of Venezuela, Peru, and Ecuador, and after returning to France became professor of chemistry and published important works on rural economy and agricultural chemistry, containing the results of experiments on the value of manures and on fattening cattle.

Boulene, De Witt Clinton, artist, b. in Troy, N. Y., 6 April, 1829; d. 5 Nov., 1884. Although a self-taught artist, he came early under the influence of Cole and Durand. His first picture, painted in 1839, was sold for $5. After painting in New York and Philadelphia he removed his studio to Bethlehem, Pa., where he lived for many years. Among his works are "Front Brook Showing," "Morning in the Valley of the Batterkill," which has been engraved; "Niagara," "Terrapin Tower, Niagara"; and a life-size portrait of Asa Packer, presented by his sons to Lehigh University. He was elected an associate of the National academy in 1854, and member of the Pennsylvania academy in 1862, but seldom in public. He was a close student of nature, and a hard and conscientious worker.

Bouton, Nathaniel, clergyman, b. in Norwich, Conn., 29 June, 1797; d. in Concord, N. H., 6 June, 1878. He was graduated at Yale in 1821, and at Andover theological seminary in 1824. On 22 May, 1825, he was married to Miss Sarah Hawks, and was ordained pastor of a Congregational church in Concord, N. H. He was president of the New Hampshire historical society from 1842 till 1844, trustee of Dartmouth college from 1840 till 1857, secretary of the board of trustees from 1845 till 1873, and president of the New Hampshire missionary society from 1852 till 1886. He also served as vice-president of the American Historical Association. He was a corporate member of the New England historical and genealogical society, and of the Maine, the Wisconsin, and the Pennsylvania historical societies. In 1867 he gave up his parochial and became editor of the records of the state of New Hampshire, receiving the honor of appointment of state historian. Besides numerous sermons, addresses, and articles in periodicals, he published "Help to Prayer" (1825); "Sinners Directed," abridged from Baxter (1832); "History of Education in New Hampshire," a discourse (12 June, 1833); "Memoir of Mrs. Elizabeth Macfarland" (1839); "History of the Ministers of the New Hampshire Bible society, 1813-1837," and the "History of the Ministers of the New Hampshire Bible society, 1837-1850," "Collections of New Hampshire Historical Society," vols. vii. and viii. (1850-6); an annotated edition of Rev. Thomas Syney's "A Cauty of Capt. John Lovell's Great Fight with the Indians at Pequawket, May 8, 1725" (1861); "Discourse Commemorative of a Forty Years' Ministry" (Concord, 23 March, 1865); and ten volumes of the "Provincial Records."—His son, John Bell, author, b. in Concord, N. H., 13 March, 1830. After he was graduated at Dartmouth in 1849 he studied law and became editor of the Cleveland "Plain Dealer" in 1852, a member of the New York "Times" in 1857, and became one of the editors of the "Journal of Commerce." He has published "Loved and Lost," a series of essays (1857); "Round the Block," a novel (1864); "Treasury of Travel and Adventure" (1865); "Memoir of General Bell" (1865); and "Roundabout to Missouri" (1857).

Boutwell, George, b. in Brookline, Mass., 28 Jan., 1818. His early life was spent on his father's farm until, in 1835, he became a merchant's clerk in Groton, Mass. He was afterward admitted to partnership, and remained in business there until 1855. In 1836 he began by himself to study law, and was admitted to the bar,
BOUTWELL

but did not enter into active practice for many years. He also began a course of reading, by which he hoped to make up for his want of a college education. He entered politics as a supporter of Van Buren in 1830, and between 1842 and 1851 was seven times chosen as a democrat to the state legislature, where he soon became recognized as the leader of his party. In 1844, 1846, and 1848 he was defeated as a candidate for congress, and in 1849 and 1850 he was the democratic nominee for governor with no better success; but he was finally elected in 1851 and again in 1852 by a coalition with the free-soil party. In 1849–50 he was state bank commis-
sioner. He entered the state constitutional convention in 1854; he assisted in organizing the republican party, with which he has since acted. In 1860 he was a member of the Chicago convention which nominated Lincoln, and in February, 1861, was a delegate to the Washington peace conference. President Lincoln invited him to organize the new department of revenue in 1862, and he was its first commissioner, serving from July, 1862, till March, 1863. In 1862 he was chosen a member of congress from Massachusetts, and twice re-elected. In February, 1868, he made a speech advocating the impeachment of President Johnson, was chosen chairman of the committee appointed to report articles of impeachment, and became one of the seven senators who voted for the trial. In March, 1863, he entered President Grant’s cabinet as secretary of the treasury, where he opposed diminution of taxation and favored a large reduction of the national debt. In 1870 congress, at his recommendation, passed an act providing for the funding of the national debt and authorizing the selling of certain bonds, but not an increase of the debt. Secretary Boutwell attempted to do this by means of a syndicate, but expended more than half of one per cent, in which he was accused of violating the law. The house committee of ways and means afterward absolved him from this charge. In March, 1873, he resigned and was succeeded as a U. S. senator from Massachusetts, having been chosen to fill the vacancy caused by the election of Henry Wilson to the vice-presidency. In 1877 he was appointed by President Hayes to codify and edit the statutes at large. Mr. Boutwell was for six years an overseer of Harvard, and for five years secretary of the Massachusetts state board of education, preparing the elaborate reports of that body. He afterward opened a law office in Washington, D. C. He is the author of “Educational Topics and Institutions” (Boston, 1859); a “Manual of the United States Direct and Revenue Tax” (1863); “Decisions on the Tax Law” (New York, 1865); “Tax-Payer’s Manual” (Boston, 1865); a volume of “Speeches and Papers” (1867); and “Why I am a Republican” (Hartford, Conn., 1884).

BOUVE, Thomas Tracy, merchant, b. in Boston, Mass., 14 Jan., 1815; d. in Hingham, Mass., 3 June, 1896. He received his education in the Boston public schools, and at the age of twelve began his business career, in which he was eminently successful, and amassed a large fortune. His leisure was devoted to the study of natural history, and for many years he filled the offices of curator and councillor to the Boston society of natural history, becoming its president in 1870, and continuing as such until 1880. Mr. Bouvé contributed many scientific papers to the proceedings of that society, and was the author of a “History of the Boston Society of Natural History for the First Half Century of Its History.”

BOUVIER, John, jurist, b. in Cologno, Italy, in 1787; d. in Philadelphia, Pa., 18 Nov., 1851. His family, who were Quakers, settled in Philadelphia in 1802. He was employed for several years in a book-store, and then went to Brownsville, Pa., where he published in 1814 a newspaper called the American Telegraph. He afterward studied law, and during his studies made a comprehensive analysis of Blackstone’s “Commentaries.” He was admitted to the bar in 1818 at Unionville, Fayette Co., Pa., where he published, from April, 1818, till July, 1829, “The Genius of Liberty and American Telegraph.” In 1828 he began practice in Phila-
delphia, was recorder of that city in 1836, and in 1838 became a member of the constitutional convention. He published a “Law Dictionary adapted to the Constitution and Laws of the United States of America” (2 vols., Philadelphia, 1839: 15th ed., revised, 1886). On this work he had spent ten years of labor, and it was highly praised by Chief Justice Story, Judge Greenleaf, and other noted law writers. It has been called “Bacon’s Abrigment of the Law,” consisting of ten octavo volumes, and finished it in four years. Two months before his death he published his greatest work, the “Institutes of American Law” (4 vols., Philadelphia, 1851; new edition by D. A. Gleson, 2 vols., 1870). This is a compendium of American law, based on Pothier’s system, for which Judge Bovée was responsible.

BOVE, Christian Nestell, author, b. in New York city, 22 Feb., 1820. His early instruction was obtained at private schools, and included some time spent under the teaching of Goold Brown, the grammarian. He served for six years in a flour store, but subsequently was admitted to the bar and followed law for many years with success, gaining thereby a fortune, which in later years was lost. At one time he was the law partner of Clark-
son N. Potter, and later was associated with other firms. He was associated in the founding of the Athenaeum club of New York, and was for some time in its management, and was also for many years a regent of the Long Island College Hospital. He wrote “Thoughts, Feelings, and Fancies” (New York, 1857), and “Intuitions and Summaries of Thought” (Boston, 1862). Many of his epigrammatic sayings, extracted from these volumes, have had a wide circulation. “Thoughts and Events,” a paper for the poorer classes, was edited by him during its short-lived career.

BOYES, José Tomás (bo’ves), Spanish-American adventurer, b. in Spain; d. at Urica, Vene-
zuela, 5 Dec., 1814. While employed as a naval officer on the northern coast of South America he was tried and imprisoned for bribery. After his release he acted with the revolutionists on the outbreak of the war of independence in Venezuela, but subsequently joined the royalists and served
as captain under Cagigal, after whose defeat he took up a position at El Calabozo, and with 500 men defeated Marino, dictator of the eastern provinces. His band being increased by vagabonds and fugitives from justice, he wrested the independence twice, slaughtered all his prisoners, and gained for his force the name of the infernal division. He was routed by Rivas, when many of his men were captured and put to death; but in 1814 he defeated Bolivar and Marino at La Puerta, and captured Valencia after a blockade, and, in violation of a solemn pledge, ordered the repudiating refugees and many of the soldiers who went to the ships. Boves, co-operating with Morales, was again victorious at Angüita, obliged Bolivar to retreat to Cartagena, and entered Caracas. He fell in the battle of Uríca, and was buried while his victorious troops were massacring their captives.

Bowden, John, clergyman, b. in Ireland, 7 Jan., 1792; d. in New-York, 31 July, 1817. He came to America early in life, studied at Princeton for two years, returned to Ireland with his father (who was in the army), and came back to America in 1760. He was graduated at King's college in 1783, studied for orders, went to England, and was ordained in London in 1774, and on coming to New York was appointed a professor of the college, and in 1776 was made principal and rector of the college, and in 1788, was made an instructor in the college, and in 1792, was made an associate minister in Trinity church. At the beginning of the revolution he retired to Norwalk, Conn. While here he was warned by some patriots of that place to leave the town, and, escaping to Long Island in a boat, he returned to New York, then occupied by the British. Trouble with his health prevented his resuming his charge in that city, so he removed to Jamaica, L. I., where he officiated occasionally. In December, 1784, he accepted the rectorship of the church in Norwalk, and in 1789 went to St. Croix, W. I. Not obtaining the benefit to his health which he sought, he returned in about two years and settled at Stratford, Conn. Soon afterward he took charge of the Episcopal academy at New-York, Conn., and held that place for six years. In October, 1796, he was unanimously chosen bishop of Connecticut, but, on account of physical disability, he declined undertaking so arduous a work. In April, 1802, he became professor of moral philosophy, belles-lettres, and logic in Columbia college, the duties of which office was regarded as the crowning glory of his life. He received the degree of S. T. D. from Columbia in 1797. Dr. Bowden's works include two letters to Ezra Stiles, president of Yale college, "Concerning Church Government" (1788), and "An Address to the Episcopal Church in Stratford" (1792), successfully urging the adoption of the altered "Book of Common Prayer," to which the rector of Stratford, Rev. James Sayre, was violently opposed. He was also the author of "A Full-Length Portrait of Calvinism," "The Essentials of Ordination," "The Apostolic Origin of Episcopacy" (2 vols., New York, 1808), "Observations on the Colonial Controversy," and other controversial letters and writings.

Bowden, Lennard Jackson, senator, b. in Williamsburg, Va., 16 Jan., 1815; d. in Washington, D. C., 2 Jan., 1864. He was graduated at William and Mary, was admitted to the Virginia bar, and became prominent in his profession. He was three times chosen to the state legislature, was a member of the state constitutional conventions of 1839 and 1860, and was a presidential elector in 1840 and 1860. When the civil war began he remained true to the union, and in the early part of the war his estate suffered much at the hands of the confederate army. When the national troops were at Will-}

The text reads like a biographical account of a historical figure, detailing his life, education, and career. It also reflects on his contributions to various fields such as academia and politics. The document is rich with historical context, providing insights into the social and political climate of the time.
BOWDITCH

BOWDITCH

marine insurance company of Salem, Mass. He declined professorships in Harvard in 1808, in the university of Virginia in 1818, and in West Point academy in 1820. While at Salem he made a beautiful chart of the harbor of that place and those of Beverly, Marblehead, and Manchester, and contributed twenty-three papers on astronomy, to the "Transactions" of the American academy. He also wrote during this time many articles in the American edition of "Rees's Cyclopedia." In 1814 he undertook his greatest work, a translation of Laplace's "Mécanique celeste," accompanied by a commentary elucidating obscure passages, giving interesting historical information, and bringing the work up to date. The latter part of his commentary forms more than half the work, as produced by Dr. Bowditch. It is said that there were at this time only two or three persons in the country capable of reading the original work critically. The greater part of this gigantic undertaking was finished in 1817; but publication would cost at least $1,000, a sum beyond the mathematician's means. In 1823, however, he was given the place of actuary to the Massachusetts hospital life insurance company of Boston, with a liberal salary, which enabled him to give his work to the world. Bowditch refused to publish the book by subscription, saying that he would rather spend $800 than $1,000 than object than in keeping a carriage. His wife and family refused to make any sacrifice necessary to its accomplishment, and he dedicated his translation to the former, stating that "without her approbation the work would not have been undertaken." The first volume appeared in 1828, the second in 1832, the third in 1834, and the fourth just after his death. The fifth volume was not published till after the death of his wife, in 1847, and appeared for the first time many years after the others, was subsequently issued under the care of Prof. Benjamin Peirce. During the latter years of his life Dr. Bowditch was a trustee of the Boston Athenæum, president of the American academy of arts and sciences, and a member of the corporation of Harvard college, which had given him the degree of LL. D. In 1836, he and Alexander Young, the editor of the "Nautical Magazine," were invited to the academies of London and Edinburgh, the royal academies of Palermo and Berlin, the royal Irish society, the royal astronomical society of London, and the British association. He also twice held a seat in the state executive council of Massachusetts. Like many other mathematicians, Mr. Bowditch was a friend of poetry. He admired the American poet, and he considered the "Old Man's Funeral" one of the most beautiful pieces in the English language. His tomb and statue are in Mount Auburn cemetery, Cambridge, and his scientific library is still preserved in Boston. Prof. Pickering delivered a eulogy of him, including an account of the way in which the publication of Bowditch's second volume of "Almanac" was financed by the sale of the "Almanac" (1839) in Europe. Dr. Bowditch was the compiler of the "American Almanac," a biographical dictionary of the "American Almanac," and "A Catalogue of the Library of Bowditch." A full list of his mathematical papers may be found in the "Mathematical Monthly" (vol. ii., Cambridge, Mass.).—His son, Nathaniel Ingersoll, author, b. in Salem, Mass., 17 Jan., 1805; d. in Brookline, Mass., 16 April, 1861, was graduated at Harvard in 1822, studied law, and was admitted to the bar in 1825, but soon left the practice and devoted himself to business as a convey-
Sciences, and of numerous medical societies. In 1876 he was elected a member of the Boston school board. He has published many papers on physiology. Three of his papers have appeared in the various medical journals, notably in the "Boston Medical and Surgical Journal."
